ALLOCATION OF FUNDS MADE AVAILABLE SUBSEQUENT TO JUNE 30, 1952, AND PRIOR TO JUNE 30, 1953, FOR THE FISCAL YEAR 1953, OR WHICH, ALTHOUGH APPROPRIATED AND AVAILABLE PRIOR TO JULY 1, 1952, REMAIN UNALLOCATED ON JULY 1, 1952

Sec.

104.27 Definitions.
104.28 Procedure if funds are inadequate to make all payments.
104.29 Determination made for fiscal year 1953 of insufficiency of available funds.
104.30 Deadline for applications for fiscal year 1953.
104.31 Applications previously filed.
104.32 Order of making certifications from available funds.
104.33 Priority certifications restricted to cost of minimum school facilities.
104.34 Priority and certification conditioned on readiness to proceed with construction.
104.35 Preceding provisions not exhaustive of jurisdiction of Commissioner of Education.

AUTHORITY: §§ 104.27 to 104.35 issued under sec. 208, 64 Stat. 975; 20 U. S. C. Sup. 278. Interpret or apply sec. 206, 64 Stat. 973; 20 U. S. C. Sup. 276.

§ 104.27 *Definitions.* All terms used in this subpart which are defined in Public Law 815, 81st Congress, and not defined in this section shall have the meaning given to them in such act. As used in this subpart, the following terms shall have the meaning indicated hereinbelow:

(a) *Complete application.* Where applicant submits only one project, the complete application consists of both Part I (Entitlement) and Part II (Project) of the application form RSF–2 prescribed by the Commissioner for use under this act, properly completed and executed, together with all documents, amendments, and communications in support thereof. Where applicant submits more than one project, the Part I form and all Part II forms, together with all documents, amendments, and communications in support thereof, submitted by a local educational agency shall be considered as the complete application. Where more than one Part II application is submitted by an applicant, applicant shall indicate the order in which its project applications are to be considered by the Commissioner.

(b) *Project application.* Form RSF–2, Part II, properly completed and executed, making application for Federal assistance in the construction of new school buildings, or the addition to or modification of existing school buildings, upon a single site.

§ 104.28 *Procedure if funds are inadequate to make all payments.* Section 206 (d), Public Law 815, 81st Congress reads as follows:

If the Commissioner of Education determines for any fiscal year that the funds which will be available therefor may not be sufficient to pay in full the amounts which all local educational agencies would otherwise be entitled to receive under applications approved under this title before the end of such year, he shall by regulations prescribe (1) a date or dates before which all applications for payments out of such funds shall be filed, and (2) the order in which the certifications required by subsections (a) and (b) of this section will be made. The order so prescribed shall be based on relative urgency of need and shall give applications under section 205 (b) priority over applications under section 205 (c).

§ 104.29 *Determination made for fiscal year 1953 of insufficiency of available funds.* The Commissioner of Education has determined that for the fiscal year 1953 available funds may not be sufficient to pay in full the amounts which all local educational agencies would otherwise be entitled to receive under sections 202 and 205, as provided in section 206 (d), Public Law 815, 81st Congress.

§ 104.30 *Deadline for applications for fiscal year 1953.* Section 205 (a) of Public Law 815, 81st Congress, fixes July 1, 1952, as the date before which all complete applications for payments to which an applicant may be entitled under section 202 shall be filed.

§ 104.31 *Applications previously filed.* All complete applications duly filed prior to July 1, 1952, within the terms of the sections of Subpart B of this part in effect on the date of filing will be considered for participation in funds made available subsequent to June 30, 1952, or remaining unallocated as aforesaid on July 1, 1952.

§ 104.32 *Order of making certifications from available funds.* Subject to the condition of readiness hereinafter stated, the order in which certifications required by subsections (a) and (b) of section 206, Public Law 815, 81st Congress, from funds made available for the fiscal year 1953 or which, though appropriated and available prior to July 1, 1952, remain unallocated on July 1, 1952, will be made as follows:

(a) *Preference to project applications for school facilities where none are presently available.* Project applications designed to provide school facilities for children for whom no facilities are presently available, as indicated in subparagraph (1) of this paragraph, will be preferred.

(1) *When children deemed to be without school facilities.* For the purposes of this section, children will be deemed to be without school facilities who (i) are in excess of 110 percent of the normal one-session per-day capacity of the useable school facilities presently available or (ii) are presently housed in basement rooms, hallways or other space the use of which for school purposes in view of its character, inaccessibility, or other equally cogent reason, prejudices or would prejudice the educational objective or has impaired or will impair the health of the school children. All facilities which were constructed as permanent school buildings and parts of which have been used continuously for classroom purposes shall be considered as available or usable, unless such buildings have been made unsafe or otherwise unusable to the extent that such buildings have been abandoned or must be abandoned during the current year.

(2) *Determination of order of priority for payments.* A priority index will be determined for the first or number one project application for each applicant by adding (i) the percentage of the average daily attendance with respect to which the local agency is eligible for payment under the act and the application is made, to (ii) the percentage of the school membership within the same jurisdictional area which is without school facilities under the definition in subparagraph (1) of this paragraph, those project applications with the highest combined percentages being first certified for payment: *Provided,* That in no case shall the total of the two percentages used in determining the priority index exceed twice the percentage described in subdivision (i) of this subparagraph:

(3) *Provided, however,* (i) That where the jurisdictional area of the applicant with respect to which the application is made comprises an extensive territory and the Federal activity is localized within an area served by one or more attendance centers, and the other attendance centers within the applicant district are substantially unavailable to meet the needs of such attendance centers affected by Federal activities, then, in such case, the percentages described in subdivisions (i) and (ii) of subparagraph (2) of this paragraph will be determined with respect to the Federally affected attendance areas, and not with respect to the entire school district or jurisdiction: *And provided,* (ii) That where an applicant has filed more than one project application, the priority index for the second project application considered for certification will be determined by: (*a*) Dividing 110 percent of the normal capacity of the first project by the total membership; (b) reducing the applicant's priority index for the second project application considered by twice the percentage obtained in (*a*). Where more than two project applications have been filed, the applicant's priority index for each succeeding project application considered for certification shall be reduced by the cumulative total capacity, computed as provided in the last preceding sentence, of all the certified projects of the applicant agency: *And provided,* (iii) That all school facilities for the construction of

which contracts were let before July 1, 1952, shall be considered as available facilities in determining the priority index and, in addition, all projects on which a payment has been certified under the provisions of Public Law 815 shall be considered to be available as of the date of certification of the first payment.

(4) *Responsibility of applicant and Field Representative in priority determinations.* The applicant must submit as a part of its complete application all facts and circumstances in each case which are pertinent to an accurate determination of priority status as above, and the Field Representative will assume primary responsibility for designating and determining differentiated attendance centers under subparagraph (3) (i) of this paragraph.

(b) *Certification of remaining funds and priority of construction applications over reimbursement applications.* Federal funds not certified under paragraph (a) of this section may be drawn upon to replace or improve obsolescent, substandard, or temporary facilities, or for projects requiring amounts of Federal funds in excess of those necessary to provide minimum facilities as described in § 104.33. All applications under section 205 (b), Public Law 815, 81st Congress, will have priority over applications under section 205 (c), Public Law 815, 81st Congress.

§ 104.33 *Priority certifications restricted to cost of minimum school facilities.* Certification of funds for priority projects will be restricted in amount to the cost of providing minimum school facilities, as measured by the square footage per pupil, necessary to operate a school program on a one-session-per-day basis above the kindergarten level, including an all-purpose room and auxiliary school facilities, exclusive of single-purpose auditoria or gymnasia, for 91 percent of those children deemed to be without school facilities as defined in this subpart. All school facilities for which contracts have been let or for which a payment has been certified under this act prior to the date of the first certification of funds for each project application under section 206 (a) shall be considered to be available in determining the amount of funds which may be certified on such application: *Provided,* That facilities shall not be deemed available for which contracts were let subsequent to July 1, 1951, and which are financed wholly from State or local sources and which are required either to replace unsafe or unsatisfactory school buildings which have not been and which will not be abandoned during the current school year or to provide for enrollment increases anticipated during the school year 1952–53. In no instance will the funds certified exceed the Federal funds requested in the application. However, nothing contained in the regulations of this subpart shall be deemed to bar the State, or the applicant with the approval of the State educational agency, from using for an approved project, in addition to the Federal grant, moneys otherwise obtained to provide a higher type or larger or better implemented facility, as the State or local authorities may deem reasonable under the existing circumstances. The applicant will be required to show in such cases that the added cost is being thus independently met.

§ 104.34 *Priority and certification conditioned on readiness to proceed with construction.* Certification and transfer of funds with respect to any project application described in this subpart will be subject to postponement in the event the applicant is not ready to proceed with construction within 90 days from the date of approval, unless such period is extended by the Commissioner for good cause shown, and may be subordinated by reason thereof to other project applications of lower rank or forfeit its priority in the discretion of the Commissioner.

§ 104.35 *Preceding provisions not exhaustive of jurisdiction of Commissioner of Education.* The provisions of §§ 104.27 to 104.34, inclusive, shall not be deemed exhaustive of the jurisdiction of the Commissioner of Education under section 206 (d), Public Law 815, 81st Congress. Such provisions may be modified or further regulations may be issued hereafter as circumstances may require.

Dated: October 7, 1952.

[SEAL] EARL J. MCGRATH,
U. S. Commissioner of Education.

Approved:

JOHN L. THURSTON,
Acting Federal Security Administrator.

PROPOSED RULE MAKING

DEPARTMENT OF AGRICULTURE

Production and Marketing Administration

[7 CFR Part 984]

HANDLING OF WALNUTS GROWN IN CALIFORNIA, OREGON, AND WASHINGTON

BUDGET OF EXPENSES OF WALNUT CONTROL BOARD AND RATE OF ASSESSMENT FOR MARKETING YEAR BEGINNING AUGUST 1, 1952

Notice is hereby given that the Department is considering the issuance of the proposed administrative rule herein set forth pursuant to the provisions of Marketing Agreement No. 105 and Order No. 84 regulating the handling of walnuts grown in California, Oregon, and Washington (7 CFR Part 984), effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.).

Prior to the final issuance of such administrative rule, consideration will be given to any data, views, or arguments pertaining thereto which are submitted in writing to the Director, Fruit and Vegetable Branch, Production and Marketing Administration, United States Department of Agriculture, Washington 25, D. C., and which are received not later than the close of business on the tenth day after publication of this notice in the FEDERAL REGISTER, except that if said tenth day after publication should fall on a Saturday, Sunday, or holiday, such submission may be received by the Director not later than the close of business on the next following work day.

The proposed budget of $83,700 and rate of assessment of 0.12 cent per pound of walnuts handled or certified for handling were unanimously recommended by the Walnut Control Board, the administrative agency under said agreement and order, at a duly called meeting in San Francisco on August 26, 1952, and appear to be reasonable.

The proposed budget makes provision for increases in administrative, office and field salaries. It will, of course, be necessary that all such increases be in conformity with the provisions of the Defense Production Act of 1950, as amended, Executive Order No. 10161, and any supplementary order, directive or regulation pursuant thereto.

The rate of assessment of 0.10 cent per pound of merchantable walnuts handled or certified for handling provided for in the agreement and order would not assure collection of sufficient funds from handlers to cover the proposed budget. The recommended rate of assessment of 0.12 cent per pound applied to the quantity of merchantable walnuts which it is expected will be handled or certified for handling under said program during the marketing year beginning August 1, 1952, will provide sufficient funds to cover the proposed budget of expenses. Any assessment funds collected in excess of expenditures, under provisions of the program, will be refunded or made available on a pro rata basis to handlers from whom assessments are collected.

Therefore, the proposed administrative rule is as follows:

§ 984.304 *Budget of expenses of the Walnut Control Board and rate of assessment for the marketing year beginning August 1, 1952*—(a) *Budget of expenses.* Expenses in the amount of $83,700 are reasonable and likely to be incurred by the Walnut Control Board for its maintenance and functioning, and for such purposes as the Secretary may, pursuant to the provisions of the marketing agreement and order, determine to be appropriate for the marketing year beginning August 1, 1952.

(b) *Rate of assessment.* Each handler shall pay to the Control Board on demand by the Control Board, from time to time, 0.12 cent for each pound of merchantable walnuts handled or certified for handling by him during the marketing year beginning August 1, 1952.

Done at Washington, D. C., this 9th day of October 1952.

[SEAL] S. R. SMITH,
Director,
Fruit and Vegetable Branch.

NOTICES

DEPARTMENT OF LABOR

Wage and Hour Division

LEARNER EMPLOYMENT CERTIFICATES

ISSUANCE TO VARIOUS INDUSTRIES

Notice is hereby given that pursuant to section 14 of the Fair Labor Standards Act of 1938, as amended (52 Stat. 1068, as amended; 29 U. S. C. and Sup. 214) and Part 522 of the regulations issued thereunder (29 CFR Part 522), special certificates authorizing the employment of learners at hourly wage rates lower than the minimum wage rates applicable under section 6 of the act have been issued to the firms listed below. The employment of learners under these certificates is limited to the terms and conditions therein contained and is subject to the provisions of Part 522. The effective and expiration dates, occupations, wage rates, number or proportion of learners, and learning period for certificates issued under the general learner regulations (§§ 522.1 to 522.14) are as indicated below; conditions provided in certificates issued under special industry regulations are as established in these regulations.

Single Pants, Shirts and Allied Garments, Women's Apparel, Sportswear and Other Odd Outerwear, Rainwear, Robes and Leather and Sheep-Lined Garments Divisions of the Apparel Industry Learner Regulations (29 CFR 522.160 to 522.166, as amended December 31, 1951; 16 F. R. 12043, and June 2, 1952; 17 F. R. 3818).

Allen Garment Co., North College Street, Franklin, Ky., effective 10-9-52 to 10-8-53; 10 percent of the productive factory force (men's and boys' sport shirts).

Archbald Sewing Co., 140 Cherry Street, Archbald, Pa., effective 10-6-52 to 10-5-53; 10 percent of the productive factory force (children's dresses).

Art Pleating & Stitching, 126 North Tenth Street, Reading, Pa., effective 10-3-52 to 10-2-53; five learners (specialty pleating and stitching on parts of blouses and dresses).

Carlton Shirt Co., Inc., 701 Whaley Street, Columbia, S. C., effective 10-1-52 to 9-30-53; 10 percent of the productive factory force (sport shirts).

J. A. Lamy Manufacturing Co., Pacific and Osage Streets, Sedalia, Mo., effective 10-1-52 to 3-31-53; 20 learners for expansion purposes (overalls and dungarees).

New Castle Manufacturing Co., Inc., New Castle, Va., effective 10-3-52 to 4-2-53; 10 learners for expansion purposes (ladies' pajamas and robe sets).

New Castle Manufacturing Co., Inc., New Castle, Va., effective 10-16-52 to 10-15-53; 10 learners (ladies' pajamas and robe sets).

K. W. Pollock's Tompkinsville Garment Co., Tompkinsville, Ky., effective 10-6-52 to 4-5-53; 18 learners for expansion purposes (dungarees).

Port City Hosiery Mills, Inc., 715 Greenfield Street, Wilmington, N. C., effective 10-6-52 to 10-5-53; 10 percent of the productive factory force (ladies' woven underwear).

Puritan Sportswear Corp., 813 Twenty-fifth Street, Altoona, Pa., effective 10-1-52 to 9-30-53; 10 percent of the productive factory force (sport shirts, army jackets).

Rice Stix Factory No. 25, Farmington, Mo., effective 10-6-52 to 10-5-53; 10 percent of the productive factory force (dress and sport shirts).

Shane Uniform Co., Inc., 2015 West Maryland Street, Evansville 7, Ind., effective 10-11-52 to 10-10-53; 10 percent of the productive factory force (washable service apparel).

Weaver Pants Corp., Corinth, Miss., effective 10-11-52 to 10-10-53; 10 percent of the productive factory force (men's single pants).

Glove Industry Learner Regulations (29 CFR 522.220 to 522.231, as amended October 26, 1950; 15 F. R. 6888).

Stott & Son Corp., Winona, Minn., effective 10-6-52 to 10-5-53; 10 learners (work gloves).

Hosiery Industry Learner Regulations (29 CFR 522.40 to 522.51, as revised November 19, 1951; 16 F. R. 10733).

Chancellor Hosiery Mills, Inc., 1110 Moss Street, Reading, Pa., effective 10-6-52 to 10-5-53; 5 percent of the productive factory force.

Cherokee Hosiery Mills, Inc., Centre, Ala., effective 10-1-52 to 5-31-53; 15 learners for expansion purposes.

Dolly Hosiery Mills, Inc., Box D, Valdese, N. C., effective 10-3-52 to 10-2-53; five learners.

Holston Manufacturing Co., Ninth Avenue & Mitchell Street, Knoxville, Tenn., effective 9-30-52 to 9-29-53; 5 percent of the productive factory force.

Mayo Knitting Mill, Inc., Tarboro, N. C., effective 10-3-52 to 6-2-53; four learners for expansion purposes.

Van Raalte Co., Inc., Franklin, N. C., effective 9-30-52 to 9-29-53; 5 percent of the productive factory force.

Knitted Wear Industry Learner Regulations (29 CFR 522.68 to 522.79, as amended January 21, 1952; 16 F. R. 12866).

Marion Mills, Division of Munsingwear, Inc., Hamilton, Ala., effective 10-1-52 to 3-31-53; 100 learners for expansion purposes (women's nylon gowns, pajamas and panties).

Stone Manufacturing Co., 3424 Main Street, Eau Claire, Columbia, S. C., effective 10-3-52 to 10-2-53; 5 percent of the productive factory force (men's and boys' woven undershorts).

Shoe Industry Learner Regulations (29 CFR 522.250 to 522.260, as amended March 17, 1952; 17 F. R. 1500).

Vincent Horwitz Co., Inc., 2121 Beale Avenue, Altoona, Pa., effective 10-16-52 to 10-15-53; 10 percent of the productive factory force.

Martinsburg Shoe Co., Inc., 107 Highland Street, Martinsburg, Pa., effective 10-1-52 to 3-31-53; 100 learners for expansion purposes.

The following special learner certificate was issued to the school-operated industry listed below:

Enterprise Academy, Enterprise, Kans., effective 9-1-52 to 8-31-53; print shop—compositor, pressman and related skilled and semiskilled occupations; 4 learners; 350 hours at 55 cents per hour, 325 hours at 60 cents per hour, 325 hours at 70 cents per hour.

Each certificate has been issued upon the employer's representation that employment of learners at subminimum rates is necessary in order to prevent curtailment of opportunities for employment, and that experienced workers for the learner occupations are not available. The certificates may be cancelled in the manner provided in the regulations and as indicated in the certificates. Any person aggrieved by the issuance of any of these certificates may seek a review or reconsideration thereof within fifteen days after publication of this notice in the FEDERAL REGISTER pursuant to the provisions of Part 522.

Signed at Washington, D. C., this 6th day of October 1952.

MILTON BROOKE,
Authorized Representative of the Administrator.

CIVIL AERONAUTICS BOARD

[Docket No. 2190]

UNITED AIR LINES, INC.; RESTRICTION CASE

NOTICE OF HEARING

In the matter of the application of United Air Lines, Inc., for amendment to its certificate of public convenience and necessity for route No. 1 to remove the restrictions respecting regularly scheduled nonstop service between certain points east and west of Salt Lake City, Utah.

Notice is hereby given that a hearing in the above-entitled proceeding is assigned to be held on December 3, 1952, at 10:00 a. m., P. s. t., in the Hearing Room, United States Court House, Fifth Avenue and Madison Street, Seattle, Washington, before Examiner Ferdinand D. Moran, and is to be adjourned for further hearing at Washington, D. C., at a time and place to be announced later.

Without limiting the scope of the issues presented in this proceeding, particular attention will be directed to the following matters:

(1) Does the public convenience and necessity require the alteration, amendment or modification of the following certificate of public convenience and necessity in the manner indicated:

(a) United's certificate for route No. 1 to provide for unrestricted nonstop service between Twin Falls, Idaho; Boise, Idaho; Pendleton, Oregon; The Dalles, Oregon; Portland, Oregon; Tacoma, Washington; Seattle, Washington; Walla Walla, Washington; or Spokane, Washington, as one of the two points between which such service is rendered, and points east of Salt Lake City, Utah?

(2) Should the public convenience and necessity require the alteration, amendment, or modification of United's certificate of public convenience and necessity for route No. 1, is United fit, willing, and able to perform the service contemplated in (a) above?

(3) In the event the public convenience and necessity require the proposed service, what terms and conditions, if any, should be imposed with respect to such service?

(4) What adverse effect, if any, will the operation have upon any other carrier?

For further details of the issues involved interested persons are referred to the application, the prehearing conference report, pleadings, orders, and correspondence on file with the Board under the above docket number.

Notice is further given that any person other than parties of record desiring to be heard in this proceeding should file with the Board on or before December 3, 1952, a statement setting forth such relevant propositions of fact or law on which he desires to be heard.

Dated at Washington, D. C., October 9, 1952.

[SEAL] FRANCIS W. BROWN,
Chief Examiner.

DEPARTMENT OF DEFENSE

Office of the Secretary

SECRETARY OF THE ARMY

DELEGATION OF AUTHORITY TO ORDER MEMBERS AND UNITS OF RESERVE COMPONENTS INTO ACTIVE FEDERAL SERVICE

Pursuant to the authority vested in me by Executive Order 10271, dated July 7, 1951 (16 F. R. 6659) and by section 202 (f) of the National Security Act of 1947, 61 Stat. 495, as amended, paragraph 1 of the delegation of authority dated July 13, 1951 (16 F. R. 6968), as amended by delegation of authority dated August 24, 1951, is hereby amended to read as follows:

1. The Secretary of the Army is authorized to order into active military service units of the National Guard of the United States, including the members thereof, and other members and units of the Army of the United States, including those of the Organized Reserve Corps, as may be necessary. The Secretary of the Army is authorized to redelegate to the Continental Army Commanders and to the Commanding General, United States Army Forces Antilles, Commanding General, United States Army Alaska, and Commanding General, United States Army Pacific, the authority to order into active military service of the United States such units of the National Guard of the United States and of the Organized Reserve Corps as may be designated special security forces for critical installations.

ROBERT A. LOVETT,
Secretary of Defense.

Commodity Credit Corporation

SALES OF CERTAIN COMMODITIES AT FIXED PRICES

DOMESTIC AND EXPORT PRICE LISTS FOR OCTOBER 1952

Pursuant to the Pricing Policy of Commodity Credit Corporation issued March 22, 1950 (15 F. R. 1583), and subject to the conditions stated therein, the following commodities are available for sale in the quantities and at the prices stated:

OCTOBER 1952 DOMESTIC PRICE LIST

Commodity and approximate quantity available (subject to prior sale)	Domestic sales price
Nonfat dry milk solids, in carload lots only, 1952 production, 21,000,000 pounds.	Spray process, U. S. Extra Grade, 1952 production, 18 cents per pound. Prices apply "in store" at location of stock in any State. ("In store" means at the processor's plant or in storage at warehouse, but with any prepaid storage and outhandling charges for the benefit of the buyer.)
Cottonseed oil, bleachable prime, summer yellow, 120,000,000 pounds.[1]	Market price or 1¾ cents per pound, whichever is higher, f. o. b. tank cars at points of storage location.
Linseed oil, raw, 195,000,000 pounds.	Market price on date of sale. (See note on Ceiling Price Certification at the end of this price list.)
Dry edible beans	On all beans, for areas other than those shown below, adjust prices upward or downward by an amount equal to the price support program differential between areas. Where no price support differential occurs, the price listed will apply. For other grades of all beans, adjust by market differentials. Prices listed below, on all beans, are at point of production. Amount of paid-in freight to be added, as applicable.
Pinto, bagged 299,000 hundredweight.	No. 1 Grade 1949[1] crop: $8.14 per 100 pounds, basis f. o. b. Denver rate area.
Great Northern, bagged 479,000 hundredweight.	No. 1 Grade 1948[1], 1949, 1950, and 1951 crops: $8.61 per 100 pounds, basis f. o. b. Twin Falls, Idaho, area. $8.99 per 100 pounds, basis f. o. b. Morrill, Nebr., area.
Baby lima, bagged 488,000 hundredweight.	No. 1 Grade 1949[1] crop: $6.93 per 100 pounds, basis f. o. b. California area.
Small white, bagged 151,000 hundredweight.	No. 1 Grade 1951 crop: $8.88 per 100 pounds, basis f. o. b. California area.
Pink, bagged 117,000 hundredweight.	No. 1 Grade 1951 crop: $8.99 per 100 pounds, basis f. o. b. Idaho and California areas. Available Portland and San Francisco PMA Commodity offices.
Pea, bagged 846,000 hundredweight.	No. 1 Grade 1951 crop: $9.25 per 100 pounds, f. o. b. Michigan area.
Austrian winter pea seed, bagged, 2,151,000 hundredweight.	$4.00 per 100 pounds, basis f. o. b. point of production plus paid-in freight, as applicable.
Austrian winter peas, bagged. Not certified for purity or germination. 1,677,000 hundredweight.[1]	In Portland, Oreg., and San Francisco areas only. The domestic market price for feed but not less than $3.50 per 100 pounds, f. o. b. point of storage, plus paid-in freight, as applicable. Purchaser must certify that commodity will be used for feed purposes only.
Blue Lupine seed, bagged, 1,100,000 hundredweight.	$4.00 per 100 pounds, basis f. o. b. point of production, plus paid-in freight as applicable.
Common and Willamette vetch seed, bagged, 129,400 hundredweight.	$7.00 per 100 pounds, basis f. o. b. point of production, plus paid-in freight, as applicable. Available Portland, Dallas, and New Orleans PMA Commodity offices.
Red Clover seed (uncertified), bagged, 55,770 hundredweight.	$37.59 per 100 pounds, basis f. o. b. point of production, plus paid-in freight, as applicable.
Red clover seed, certified, bagged Cumberland, 1,000 hundredweight; Midland, 620 hundredweight.	$42.89 per 100 pounds, basis f. o. b. point of production, plus paid-in freight, as applicable. Available Portland and San Francisco PMA Commodity offices.
Ladino clover seed, bagged, certified, 66,480 hundredweight.	$106.61 per 100 pounds, basis f. o. b. point of production, plus paid-in freight, as applicable. Available Portland and San Francisco PMA Commodity offices.
Crimson clover seed, bagged 130 hundredweight.	$18.00 per 100 pounds, basis f. o. b. point of production, plus paid-in freight, as applicable. Available Portland PMA Commodity office.

See footnotes at end of table.

OCTOBER 1952 DOMESTIC PRICE LIST—Continued

Commodity and approximate quantity available (subject to prior sale)	Domestic sales price
Barley, bulk, 4,500,000 bushels [1]	Basis in store, the market price but in no event less than the applicable 1952 loan rate for the class, grade, quality and location, plus: (1) 17 cents per bushel if received by truck, or (2) 13 cents per bushel if received by rail or barge. Examples of minimum prices per bushel: Minneapolis, No. 1 Barley, ex rail or barge, $1.55; San Francisco, No. 1 Western Barley, ex rail or barge, $1.59.
Corn, bulk, 50,000,000 bushels [1]	At points of production, basis in store, the market price but not less than the applicable 1952 county loan rate for No. 3 yellow plus: (1) 11 cents per bushel if received by truck, or (2) 11 cents per bushel if received by rail or barge. At other locations, the foregoing plus average paid-in freight. Examples of minimum prices per bushel: Chicago, No. 3 yellow, $1.89; St. Louis, No. 3 yellow, $1.91; Minneapolis, No. 3 yellow, $1.80; Omaha, No. 3 yellow, $1.82; Kansas City, No. 3 yellow, $1.87; for other classes, grades, and quality, market differentials will apply.
Grain sorghums, bulk, 208,000 hundredweight.	Basis in store, the market price but in no event less than the applicable 1952 loan rate for the class, grade, quality, and location, plus: (1) 30 cents per hundredweight if received by truck, or (2) 25 cents per hundredweight if received by rail or barge. Examples of minimum prices per hundredweight: Kansas City, No. 2 grain sorghums, ex rail or barge, $3.09; ex truck $3.14.
Flaxseed, bulk, 144,000 bushels	Market price on date of sale at place of delivery, provided delivery takes place within 15 days unless otherwise agreed upon, but not less than the following: $4.33 per bushel, No. 1 Grade, basis in-store, Minneapolis; for other markets and grades, adjust by market differentials.

[1] These same lots also are available at export sales prices announced today.

Ceiling Price Certification. Any purchaser from CCC of raw linseed oil, must be able and will be required to certify that the price paid to CCC does not exceed the highest ceiling price he could pay any of his usual suppliers for the commodity in the quantity and at the place and season that delivery is made.

OCTOBER 1952 EXPORT PRICE LIST

Commodity and approximate quantity available (subject to prior sale)	Export price list
Cottonseed oil, bleachable prime summer yellow 120 million pounds.[1]	Market price f. o. b. tank cars at points of storage locations.
Dry edible beans	
Great Northern, bagged, 1948 crop, 50,000 hundredweight.[1 2]	No. 1 Grade delivered on track present location, on basis costs and freight paid to f. a. s. vessel at locations shown below.
Baby Lima, bagged 1949 crop 458,000 hundredweight.[1]	$6.60 per 100 pounds, U. S. Gulf ports (see note below).
Pinto, bagged, 1949 crop, 299,000 hundredweight.[1 3]	To be sold on a written "Offer and Bid" basis. Interested buyers should contact the San Francisco PMA Commodity Office for information and further details. $6.90 per 100 pounds, Gulf ports, $7.00 per 100 pounds, Mexico border points. NOTE: Available at PMA Commodity offices at: (1) Dallas, Tex. or Mexico Border-Nogales to El Paso, inclusive; (2) Kansas City, Mo., or Texas-Mexico border points and Gulf ports. NOTE: "U. S. Gulf ports" means ports with freight rates not greater than to New Orleans. Any excess freight will be for account of the buyer. Discounts for grades on all beans: No. 2, 25 cents less than No. 1; No. 3, 50 cents less than No. 1; appropriate discounts will also be given for "off-color" beans. At CCC's option, 1949 crop beans may be furnished in place of 1948 beans in instances where stocks of 1948 beans of the type and grade desired are exhausted.
Austrian winter peas, bagged, not certified for purity or germination, 1,677,000 hundredweight.[1]	In Portland, Oreg., and San Francisco areas only. The domestic market price for feed but not less than $3.50 per 100 pounds, f. o. b. point of storage plus paid-in freight, as applicable.
Wheat, bulk, 25 million bushels [1]	Market price on date of sale at point of delivery, provided delivery takes place within 15 days unless otherwise agreed upon.
Oats, bulk, 4,500,000 bushels [1]	Market price on date of sale at point of delivery, provided delivery takes place within 15 days unless otherwise agreed upon.
Barley, bulk, 4,500,000 bushels [1]	Market price on date of sale at place of delivery, provided delivery takes place within 15 days unless otherwise agreed upon.
Corn, bulk, 50,000,000 bushels [1]	Market price on date of sale at place of delivery, provided delivery takes place within 15 days unless otherwise agreed upon.

[1] These same lots are available at domestic sales prices announced today.
[2] Ceiling Price Certification: Any purchaser from CCC of Pinto or Great Northern beans for export, must be able and will be required to certify that the price paid to CCC does not exceed the highest ceiling price he could pay any of his usual suppliers for the commodity in the quantity and at the place and season that delivery is made.

(Pub. Law 439, 81st Cong.)

Issued: October 9, 1952.

HAROLD K. HILL,
Acting President, Commodity Credit Corporation.

SECURITIES AND EXCHANGE COMMISSION

[File No. 7-1461]

NEW YORK, CHICAGO & ST. LOUIS RAILROAD CO.

NOTICE OF APPLICATION FOR UNLISTED TRADING PRIVILEGES, AND OF OPPORTUNITY FOR HEARING

At a regular session of the Securities and Exchange Commission, held at its office in the city of Washington, D. C., on the 8th day of October A. D. 1952.

The Boston Stock Exchange, pursuant to section 12 (f) (2) of the Securities Exchange Act of 1934 and Rule X-12F-1 thereunder, has made application for unlisted trading privileges in the Common Stock, $20 Par Value, of New York, Chicago & St. Louis Railroad Company, a security registered and listed on the New York Stock Exchange.

Rule X-12F-1 provides that the applicant shall furnish a copy of the application to the issuer and to every exchange on which the security is listed or already admitted to unlisted trading privileges. The application is available for public inspection at the Commission's principal office in Washington, D. C.

Notice is hereby given that, upon request of any interested person received prior to October 29, 1952, the Commission will set this matter down for hearing. In addition, any interested person may submit his views or any additional facts bearing on this application by means of a letter addressed to the Secretary of the Securities and Exchange Commission, Washington, D. C. If no one requests a hearing on this matter, this application will be determined by order of the Commission on the basis of the facts stated in the application, and other information contained in the official file of the Commission pertaining to this matter.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

[File No. 31-587]

GILMAN PAPER CO.

ORDER GRANTING EXEMPTION

OCTOBER 8, 1952.

Gilman Paper Company ("Gilman"), having filed an application and an amendment thereto with this Commission pursuant to section 3 (a) (3) (A) of the Public Utility Holding Company Act of 1935 ("act") requesting exemption from the provisions of the act on behalf of itself, its public-utility subsidiary, Gilman Electric Light & Power Company, and its non-utility subsidiaries, St. Marys Kraft Corp., Kraft Bag Corp., and the Cellucord Corporation, all of which are engaged in the manufacture of paper and paper products, and

Due notice of the filing of said application having been given and a hearing thereon not having been requested of, or ordered by, the Commission; and

The Commission having examined the application and the amendment thereto and the statements contained therein and having found that Gilman is only incidentally a holding company, being primarily engaged in a business other than that of a public-utility company and not deriving, directly or indirectly, any material part of its income from one or more companies the principal business of which is that of a public-utility company; and further finding that the granting of an exemption to Gilman as a holding company and to its subsidiaries as such will not be detrimental to the public interest or the interests of investors or consumers:

It is ordered, Pursuant to section 3 (a) (3) (A) of the act and subject to the provisions of section 3 (c) thereof, that Gilman as a holding company and its subsidiaries as such be, and the same hereby are, exempted from all provisions of the act, said companies remaining subject, however, to any obligation imposed upon them in any capacity other than as a holding company or as a subsidiary of a holding company.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

[File No. 54-207]

AMERICAN POWER & LIGHT CO.

NOTICE OF FILING OF PLAN FOR DISSOLUTION OF REGISTERED HOLDING COMPANY AND NOTICE AND ORDER FOR HEARING

OCTOBER 7, 1952.

I. Notice is hereby given that American Power & Light Company ("American"), a registered holding company, has filed an application for approval of a plan (hereinafter referred to as the "Dissolution Plan"), pursuant to section 11 (e) of the Public Utility Holding Company Act of 1935" ("act"), proposing the dissolution of American and the distribution of all of its net assets to its stockholders. The Dissolution Plan is stated to be in compliance with the Commission's order dated August 22, 1942, directing that the existence of American be terminated and that it be dissolved.

On February 15, 1950, American consummated a plan filed pursuant to section 11 (e) of the act under which it distributed most of its assets and reclassified its preferred and common stocks into a single class of capital stock. Such plan will be referred to hereinafter as American's "Stock Reclassification Plan". In June 1950, and November 1951, American distributed cash to its stockholders and in August 1952, American distributed the common stock of the Washington Water Power Company to its stockholders, all pursuant to plans under section 11 (e) of the Act.

American's assets presently consist of 10 percent of the outstanding shares of the common stock (54,763 shares without par value) of Portland Gas & Coke Company ("Portland"), a gas utility company, certain cash or cash items aggregating approximately $5,500,000 as of June 30, 1952, and other minor assets. American's capitalization consists of 2,342,411 shares of capital stock, without par value, issued or issuable pursuant to the provisions of the Stock Reclassification Plan.

II. All interested persons are referred to said Dissolution Plan, which is on file in the offices of the Commission, for a full statement of the transactions therein proposed which may be summarized as follows:

1. American proposes to dissolve on a date to be fixed by its board of directors as soon as practicable after entry of an order by this Commission approving the Dissolution Plan and a subsequent order approving and enforcing such plan by an appropriate United States District Court upon application for enforcement filed by this Commission. Such dissolution date will be the effective date of the Dissolution Plan.

2. On the effective date, the holders of, and any other persons having any interest in, shares of American's capital stock shall cease to have any rights or interest in respect of such stock other than the rights which are specified in American's Dissolution Plan. Certificates for shares of American's capital stock shall not be transferable on the books of American on and after the effective date. Holders of certificates for shares of the former preferred and common stocks of American (or scrip therefor) who shall surrender such certificates or scrip under the Stock Reclassification Plan will not, on and after the effective date of this Dissolution Plan, receive certificates for capital stock of American. However, such holders, for the purpose of further distributions in liquidation, will be treated as record holders of the number of shares of capital stock of American (including fractions) to which they would have been entitled had they surrendered such certificates or scrip under the Stock Reclassification Plan before the effective date of the Dissolution Plan.

3. On and after the effective date, the liquidation and winding up of American's affairs will be under the control of three Trustees who, in turn, will be

under the supervision of the United States District Court enforcing the Dissolution Plan. Such Trustees shall have all the powers possessed by American immediately prior to the effective date for the purpose of discharging or providing for the discharge of all of American's liabilities, liquidating the assets of American, and distributing the net proceeds thereof to American's stockholders. The Dissolution Plan proposes that D. W. Jack, C. W. Scholz, and Miller A. Huhn, who are presently officers of American, shall become and act as the Trustees. Trustees who shall have been officers or full-time employees of American immediately prior to the effective date, shall be compensated at the average salary rate pertaining to them, respectively, during the twelve months' period next prior to the effective date unless modified by the Commission.

4. On the date which shall be thirty days (excluding Saturdays, Sundays and holidays) after the effective date (such date to be known as the "Distribution Date") the Trustees will cause to be distributed, in partial liquidation of American, (a) for each of the 2,342,411 shares of American's capital stock, cash of 95 cents, and (b) for each 43 shares of American's capital stock, one share of common stock of Portland.

5. American or the Trustees will select a Distribution Agent who will make the distribution of cash and of common stock of Portland on the Distribution Date to those persons who, at the close of business on the day before the effective date, are holders of record of American's capital stock. No certificates for fractional shares of Portland's common stock will be issued and any fractions involved will, to the extent feasible, be combined with other fractions and sold, at prevailing market prices, by the Distribution Agent for the account of the holders entitled thereto without cost to them. Any holder of American's capital stock of record at the close of business on the day before the effective date who is entitled to receive less than five shares of Portland's common stock under the provisions of the Dissolution Plan may request the Distribution Agent to sell, at prevailing market prices and at the expense of such stockholder, such shares as he would otherwise be entitled to receive and remit the net proceeds of any such sale to such holder.

6. On the Distribution Date the Trustees shall deliver to the Distribution Agent under the Stock Reclassification Plan funds in the aggregate amount of the cash payments and certificates for such number of shares of Portland's common stock as would be distributed in respect of shares of American's capital stock which shall not have been issued pursuant to the Stock Reclassification Plan prior to the effective date. Neither the Trustees nor the Stock Reclassification Plan Distribution Agent shall vote the shares of Portland's stock so held by the Stock Reclassification Plan Distribution Agent. A holder receiving shares of Portland's common stock shall also be entitled to receive the amount of any dividends collected on such shares by the Stock Reclassification Plan Distribution Agent. As soon as practicable after February 15, 1955, the Stock Reclassification Plan Distribution Agent shall sell all the shares of Portland's common stock then held by it.

7. American reserves the right to effect the distribution of the cash and Portland common stock at any time after the entry by the Commission of an order approving the Dissolution Plan and without awaiting the entry of an order by an appropriate United States District Court enforcing such plan. In such event, American shall fix a new distribution date for the making of the distribution of cash and common stock of Portland, and shall also fix a record date for the determination of stockholders to whom such distributions shall be made. The Commission shall be given ten days' notice of the record date and the distribution date so fixed, and the distribution may be made without further approval of the Commission unless the Commission shall disapprove of such distribution within five days after the receipt by it of such notice.

8. Subsequent to the distribution of cash and Portland common stock, the Trustees shall make interim distributions from the funds of American's estate, and, at such time as the Trustees may be able to reduce all of American's remaining assets to cash and to discharge or make provisions for the discharge of all of American's liabilities, the Trustees shall make a distribution in final liquidation of American. Such distributions will be made on a pro-rata basis to the holders of American's present and formerly outstanding capital stock entitled thereto. The Commission shall be given twenty days' notice of any such distributions after which such distributions may be made without further approval of the Commission unless the Commission shall indicate its disapproval within ten days after the receipt by it of such notice.

9. The holders of certificates of shares of former preferred or common stock of American (or scrip therefor) who do not surrender such certificates or scrip on or prior to February 15, 1955, to the Stock Reclassification Plan Distribution Agent, and any other persons having any interest whatsoever in shares of American's former preferred or common stocks, shall cease at the close of business on February 15, 1955, to have any right to, or interest in, the cash payment and shares of common stock of Portland, or the proceeds of the sale of such common stock or rights received in respect thereto, or dividends received thereon, and shall have no rights in substitution therefor.

10. The record holders of American's presently outstanding capital stock who, at the close of business on February 15, 1955, have not received or claimed the shares of Portland common stock distributable to such holders as provided in this Dissolution Plan, or the shares of common stock of the Washington Water Power Company to which they are entitled under the prior plan for distribution of that stock, shall cease thereafter to have any right to receive such certificates. However, as soon as practicable after that date, all unclaimed shares represented by any certificates for said shares of common stock of Portland and the Washington Water Power Company shall be sold by the Dissolution Plan Distribution Agent for the account of the persons entitled thereto, and thereafter said agent shall hold the net proceeds of such sales, after deducting the cost of such sales, for the account of such persons.

11. The Trustees, at least 60 days prior to the final distribution of American's assets, will notify all payees of unclaimed or unpaid checks of American both by mail and newspaper publication to the effect that all such checks issued more than two years prior to the date of such notice which are not claimed or presented for payment before the close of business on a date to be set forth in such notice, which shall be at least 30 days prior to the final distribution, shall become null and void and all liability in connection therewith terminated. The amounts represented thereby will thereafter be included in the assets of American to be finally distributed.

12. The Trustees, at least 60 days prior to the final distribution of American's assets, shall notify by mail and newspaper publication all holders of American's 6 percent Debenture Bonds and the 6 percent Debenture Bonds (assumed by American) of Southwestern Power & Light Company who have not surrendered such Debenture Bonds. All such Debenture Bonds which are not presented to the appropriate Debenture Trustee for payment before the close of business on the date to be set forth in such notice, which shall be at least 30 days prior to the final distribution, shall become null and void and all rights to receive payment thereon terminated. Thereafter any amounts remaining unclaimed in the hands of the Debenture Trustees shall be turned over to the Dissolution Plan Trustees and included as assets of American in the final distribution. The Dissolution Plan provides that the amended plan and the amended supplemental plan (File No. 54–100), under which the aforesaid Debenture Bonds were retired, are amended accordingly.

13. The Trustees shall pay out of the assets of American's estate the ordinary expenses of the liquidation of American and shall file annually with the Commission statements of estimated and actual expenses together with a statement of the assets and liabilities of American's estate at the end of the twelve month period covered by such statement of actual expenses. In the case of special or extraordinary expenses, such as special fees for legal or other professional services which the Commission disapproves in whole or in part, any excess thereof over the amount subsequently approved by the Commission, if already paid, shall be returned by the recipients to the Trustees.

14. The effectuation of the Dissolution Plan is conditioned, among other things, upon the Commission making the necessary recitations in its order approving the Plan in accordance with the requirements of the Internal Revenue Code, as amended, including section 1808 (f) and Supplement R thereof and American or the Trustees obtaining from the United States Treasury Department such rulings or closing agreements, satisfactory to American or the Trustees, as to the tax consequences of the Dissolution Plan. The Dissolution Plan is also subject to approval by a District Court of the United States having jurisdiction with respect thereto, subject to the provisions of paragraph 7 above.

III. The Commission being required by the provisions of section 11 (e) of the act, before approving any plan thereunder to find, after notice and opportunity for hearing, that such plan as submitted or as modified is necessary to effectuate the provisions of section 11 (b) of the act and is fair and equitable to the persons affected thereby, and it appearing to the Commission that it is appropriate in the public interest and in the interest of investors and consumers that a hearing be held concerning the Dissolution Plan to afford all interested persons an opportunity to be heard with respect thereto:

It is ordered, That a hearing on the Dissolution Plan be held on October 28, 1952, at 10:00 o'clock a. m., e. s. t., at the offices of the Securities and Exchange Commission, 425 Second Street NW., Washington 25, D. C. On such day the hearing room clerk in Room 193 will advise as to the room where such hearing will be held. Any person desiring to be heard or otherwise wishing to participate in this proceeding shall file with the Secretary of the Commission on or before October 23, 1952, a request relative thereto as provided in Rule XVII of the Commission's rules of practice.

It is further ordered, That James G. Ewell, or any other officer or officers of the Commission designated by it for that purpose shall preside at the hearing on such matter. The officer so designated to preside at such hearing is hereby authorized to exercise all powers granted to the Commission under section 18 (c) of the act and to a hearing officer under the Commission's rules of practice.

The Division of Public Utilities of the Commission having advised the Commission that it has made a preliminary examination of the Dissolution Plan and upon the basis thereof the following matters and questions are presented for consideration without prejudice to its specifying additional matters and questions upon further examination:

1. Whether the Dissolution Plan as submitted or as it may be modified is necessary to effectuate the provisions of section 11 (b) of the act and is fair and equitable to the persons affected thereby.

2. What further steps, if any, should be taken by American in order to comply with the Commission's order dated August 22, 1942, directing that the existence of American be terminated and that it be dissolved.

3. Generally, whether the proposed transactions are in all respects in the public interest and in the interest of investors and consumers and consistent with all applicable requirements of the act and of the rules and regulations thereunder, whether any modification should be required to be made therein, and whether any terms and conditions should be imposed to satisfy applicable statutory standards.

It is further ordered, That notice of this hearing be given by registered mail to American, that notice shall be given to all other persons by general release of this Commission which shall be distributed to the press and mailed to the persons on the mailing list for releases under the act, and that further notice shall be given to all other persons by publication of this notice and order in the FEDERAL REGISTER.

It is further ordered, That American shall give notice of this hearing by mailing a copy of this notice and order for hearing at least fifteen days prior to the date set for said hearing to the Comptroller of the State of New York; the Treasurer of the State of Maine; each of the security holders of American, including (insofar as the identity of such security holders is known or is available to American) holders of its former preferred and common stocks who have not surrendered such shares under the Stock Reclassification Plan; payees of all unclaimed or unpaid checks shown on the books of American as at June 30, 1952; and all holders who have not yet surrendered Debenture Bonds, Coupons or Receipts in connection with the retirement of American's 6 percent Debenture Bonds and the 6 percent Debenture Bonds of Southwestern Power & Light Company, assumed by American.

By the Commission.

[SEAL] NELLYE A. THORSEN, *Assistant Secretary.*

[File No. 70–2927]

UNITED GAS CORP.

SUPPLEMENTAL ORDER REGARDING ISSUANCE AND SALE OF DEBENTURES AND CONCERNING FEES

OCTOBER 8, 1952.

The Commission by order dated September 25, 1952, having granted the application and permitted the declaration to become effective of United Gas Corporation ("United"), a gas utility subsidiary of Electric Bond and Share Company, a registered holding company, concerning the issuance and sale by United of $60,000,000 principal amount of -- percent Sinking Fund Debentures due 1972, pursuant to the competitive bidding requirements of Rule U-50, and with respect to certain related transactions, subject to a reservation of jurisdiction with respect to the results of competitive bidding under Rule U-50 and with respect to the fees and expenses incurred in connection with the proposed transactions;

A further amendment to said application-declaration having been filed on October 8, 1952, setting forth the action taken to comply with the requirements of Rule U-50, and stating that pursuant to the invitation for competitive bids on the Debentures, the following bids have been received:

Underwriting group	Coupon rate (percent)	Price to company (percent)	Annual cost of money (percent)
The First Boston Corp..... Harriman Ripley & Co., Inc. Goldman, Sachs & Co..... Halsey, Stuart & Co., Inc.. Morgan Stanley & Co..... White, Weld & Co..... Equitable Securities Corp..	4¾ 4¾ 4½	101.1499 100.88 100.819	4.2888 4.3089 4.4378

Said amendment setting forth that United has accepted the proposal of the underwriting group headed by the First Boston Corporation, Harriman Ripley & Co., Incorporated and Goldman, Sachs & Co., as shown above, and further stating that said Debentures will be reoffered to the public at a price of 102.35 percent of the principal amount thereof, resulting in an underwriting spread of 1.2001 percent and an aggregate spread of $720,060; and

The record also having been completed with respect to the fees and expenses to be incurred in connection with the proposed transactions, which expenses are estimated in the aggregate amount of $238,000 including $15,000 to Baker, Botts, Andrews & Parish and $10,000 to Reid & Priest, both firms being counsel to the company, and the record also showing the fee of counsel for the purchaser in the amount of $12,500 to be paid to Milbank, Tweed, Hope & Hadley, which fee is to be paid by the purchaser; and

The Commission observing no basis for adverse findings with respect to the results of competitive bidding or the fees and expenses to be paid in connection with the proposed transactions, and deeming it appropriate that said application-declaration, as amended, should be granted and permitted to become effective and that jurisdiction heretofore reserved should be released;

It is ordered, Pursuant to Rule U-23 and the applicable provisions of the act, and subject to the terms and conditions contained in Rule U-24 that said application-declaration, as amended, be, and the same hereby is, granted and permitted to become effective forthwith; and

It is further ordered, That jurisdiction heretofore reserved with respect to the results of competitive bidding and the payment of fees and expenses be, and the same hereby is, released.

By the Commission.

INTERSTATE COMMERCE COMMISSION

BOARD OF SUSPENSION AND FOURTH SECTION BOARD

CONVERSION INTO BOARDS OF EMPLOYEES TO ACT INITIALLY IN SUSPENSION AND FOURTH SECTION MATTERS

OCTOBER 9, 1952.

The Interstate Commerce Commission announces the following changes in its organization:

Effective December 1, 1952, the Board of Suspension and the Fourth Section Board are to be converted into boards of employees under section 17 (2) of the Interstate Commerce Act, with power to act initially in Suspension and Fourth Section matters, subject to certain specified exceptions.

The purpose of this action is in harmony with suggestions emanating from practitioners, from legislators, and from others, in order to relieve members of the Commission of as much detail as possible. In addition to the reservations specifically set out in the Commission's order delegating this power, each of these boards is given authority, when it deems it advisable, to certify any matter to Division 2 for decision. Division 2, in respect of all initial actions by these boards, will serve as an appellate division of the Commission.

Certain administrative changes have been necessary which are effectuated through regular minute entries and are not a part of the order of delegation. In substance, these administrative changes require that:

The Fourth Section Board and the Board of Suspension shall hereafter consist, respectively, of not less than three nor more than five members, including the chairman, and that the chairman of each is authorized to assign the work to the members of his Board in order to obtain a working quorum in accordance with the provisions of section 17 (3) of the Interstate Commerce Act.

Unless their classifications are such that they fall within the classes of eligible employees otherwise specifically designated in section 17 (2) of the Interstate Commerce Act, all regular members of the Board of Suspension and the Fourth Section Board, except the chairman, shall hereafter be designated as "Special Transportation Examiners, Board Members." Minimum qualifications are prescribed for these classifications which are designed to assure ample experience and training for the work involved.

[SEAL] GEORGE W. LAIRD, *Acting Secretary.*

[F. R. Doc. 52–11055; Filed, Oct. 13, 1952; 8:47 a. m.]

ORGANIZATION OF DIVISIONS AND ASSIGNMENT OF WORK, BUSINESS, AND FUNCTIONS

At a general session of the Interstate Commerce Commission held at its office in Washington, D. C., on the 7th day of October A. D. 1952.

Section 17 of the Interstate Commerce Act, as amended (49 U. S. C. 17), particularly paragraph (2) thereof, and other provisions of the law being under consideration, and with a view to providing for the elimination from the assignment of work of Division Two of initial jurisdiction over applications for relief from section 4 of the act and the suspension provisions of sections 15 (7) of Part I, 216 (g) and 218 (c) of Part II, 307 (g) and (i) of Part III, and 406 (e) of Part IV, subject to certain qualifications; to provide for the delegation of authority to boards of employees; and to provide further for the designation of Division Two as an appellate division to consider applications for hearing, argument, or reconsideration of an order or requirement of boards under the above enumerated provisions of the act, the decisions of said appellate division to be administratively final and not subject to review by the Commission, the following order, amending and supplementing the order of June 8, 1942, as amended, Organization of Divisions and Assignment of Work, Business, and Functions, was duly adopted:

It is ordered, That the order of June 8, 1942, as amended, be further amended by:

(1) Changing the assignment of work of Division Two so as to amend the paragraph referring to section Four by deleting the period after the word "therefrom" and adding the following: "when such proceedings have been formally heard, when applications are certified to the Division by the Fourth Section Board, when fourth-section relief arises as a result of an order or requirement of the Commission, or a division thereof, or when applications are to be considered in connection with general rate-increase proceedings."

(2) Changing the assignment of work of Division Two so as to amend the paragraph commencing with "section 15 (7)" by deleting the period at the end thereof, and adding: "when such matter is certified to the Division by the Suspension Board, when there are petitions or requests for suspension of proposed general increases in rates, fares, or charges for application throughout a rate territory or region, or of wider scope, or when there are involved petitions for suspension of schedules filed in purported compliance with any decision, order, or requirement of the Commission or a Division thereof."

(3) Adding new provisions immediately following the close of the section *Assignment of work, business and functions to individual members of the Commission under section 17* (2) as follows:

ASSIGNMENTS TO BOARDS

Fourth Section Board. Section Four, relating to long-and-short-haul and aggregate-of-intermediate rates, and relief therefrom, except proceedings made the subject of formal hearing, matters prompted by an order or requirement of the Commission or a division thereof, or matters arising from general increase proceedings. The Board may certify to Division Two any matter which, in its judgment, should be passed on by that division or the Commission.

Suspension Board. Section 15 (7) of Part I, sections 216 (g) and 218 (c) of Part II, sections 307 (g) and (i) of Part III and 406 (e) of Part IV, relating to the initial disposition of petitions or requests for suspension of schedules and tariffs, or parts thereof, including authority to institute investigations into rates, fares, charges, and practices of carriers under Parts I, II, III, and freight forwarders under Part IV, as ancillary to the suspension of any tariff or schedule, including also the power to enter orders discontinuing investigation and suspension proceedings when, prior to hearing, the suspended schedules have been withdrawn and canceled pursuant to special permission authority. This delegation of authority shall not include (1) petitions or requests relating to tariffs or schedules filed in purported compliance with any decision or order of the Commission or a division thereof, (2) petitions or requests for suspension of proposed general increases in rates, fares, or charges for application throughout a rate territory or region, or of wider scope, nor (3) any action in connection with suspensions to be taken during or after formal hearings or investigations. The Board may certify any question or matter which, in its judgment, should be acted upon by Division 2 or, upon the recommendation of Division 2, by the Commission.

(4) In the section *Rehearings and further proceedings*, delete the words "or an individual Commissioner" and substitute: "individual Commissioner, Board of Suspension, or Fourth Section Board."

(5) In the section *Rehearings and further proceedings* after the words "succeeding paragraphs" insert the following: "further excepting matters relating to long-and-short-haul and aggregate-of-intermediate rates, and relief therefrom, when such matters have not been subject to formal hearing; and further excepting matters relating to the disposition of applications for suspension of schedules and tariffs or parts thereof, as more especially provided in the third succeeding paragraph,"

(6) To the section *Rehearings and further proceedings*, adding a fifth paragraph to read as follows:

Division Two is hereby designated as an appellate division to which applications or petitions for reconsideration or review of any order, action or requirement of the Board of Suspension or the Fourth Section Board shall be assigned or referred for disposition and the decisions or orders of the appellate division shall be administratively final and not subject to review by the Commission.

And it is further ordered, That the foregoing amendments shall become effective December 1, 1952.

By the Commission.

[SEAL] GEORGE W. LAIRD, *Acting Secretary.*

[4th Sec. Application 27450]

ACRYLONITRILE FROM POINTS IN W. VA., TO DECATUR, ALA., AND BATON ROUGE, LA.

APPLICATION FOR RELIEF

OCTOBER 9, 1952.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: L. C. Schuldt, Agent, for carriers parties to his tariffs I. C. C. Nos. 4367 and 4510, pursuant to fourth-section order No. 17220.

Commodities involved: Acrylonitrile, in tank-car loads.

From: Charleston and other points in West Virginia, grouped therewith.

To: Decatur, Ala., and Baton Rouge, La.

Grounds for relief: Competition with rail carriers and circuitous routes.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission, Division 2.

[SEAL] GEORGE W. LAIRD, *Acting Secretary.*

[4th Sec. Application 27451]

STOVES AND RANGES FROM GLENCLIFF AND NASHVILLE, TENN., TO NEW ORLEANS, LA.

APPLICATION FOR RELIEF

OCTOBER 9, 1952.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: F. C. Kratzmeir, Agent, for carriers parties to Agent C. A. Spaninger's tariff I. C. C. No. 1171, pursuant to fourth-section order No. 16101.

Commodities involved: Stoves and ranges, electric cooking, carloads.

From: Glencliff and Nashville, Tenn.

To: New Orleans, La.

Grounds for relief: Competition with rail carriers, circuitous routes, and operation through higher-rated territory.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission, Division 2.

[4th Sec. Application 27452]

PIG IRON FROM DAINGERFIELD AND LONE STAR, TEX., TO HALE AND SAND SPRINGS, OKLA.

APPLICATION FOR RELIEF

OCTOBER 9, 1952.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: F. C. Kratzmeir, Agent, for The Atchison, Topeka and Santa Fe Railway Company and other carriers.

Commodities involved: Pig iron, carloads.

From: Daingerfield and Lone Star, Tex.

To: Hale and Sand Springs, Okla.

Grounds for relief: Competition with rail carriers, circuity, and additional routes.

Schedules filed containing proposed rates: F. C. Kratzmeir, Agent, I. C. C. No. 3960, Supp. 25.

Any interested person desiring the Commission to hold a hearing upon such

application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission, Division 2.

[4th Sec. Application 27453]

GRAIN FROM POINTS IN ILLINOIS TO POINTS IN ARKANSAS, MISSOURI AND TENNESSEE

APPLICATION FOR RELIEF

OCTOBER 9, 1952.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: F. C. Kratzmeir, Agent, for carriers parties to schedules listed below.

Commodities involved: Grain, grain products, and related articles, also seeds, carloads.

From: Chicago, Joliet, and Lockport, Ill.

To: Points in Arkansas and Missouri and Memphis, Tenn.

Grounds for relief: Competition with rail carriers, circuity, and to maintain grouping.

Schedules filed containing proposed rates: F. C. Kratzmeir, Agent, I. C. C. No. 3939, Supp. 22. StLSF Ry. tariff I. C. C. No. A–313, Supp. 16.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

[4th Sec. Application 27454]

SUPERPHOSPHATE FROM POINTS IN SOUTHERN TERRITORY TO SCHUYLER, NEBR.

APPLICATION FOR RELIEF

OCTOBER 9, 1952.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: R. E. Boyle, Jr., Agent, for carriers parties to Agent C. A. Spaninger's tariff I. C. C. No. 1286.

Commodities involved: Superphosphate (acid phosphate), other than ammoniated, carloads.

From: Points in southern territory.

To: Schuyler, Nebr.

Grounds for relief: Competition with rail carriers, circuitous routes, and to apply rates constructed on the basis of the short line distance formula.

Schedules filed containing proposed rates: C. A. Spaninger, Agent, I. C. C. No. 1286, Supp. 1.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

[4th Sec. Application 27455]

SUGAR FROM PORT WENTWORTH AND SAVANNAH, GA., TO BRISTOL, VA.-TENN.

APPLICATION FOR RELIEF

OCTOBER 9, 1952.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: R. E. Boyle, Jr., Agent, for carriers parties to Agent W. P. Emerson, Jr.'s tariff I. C. C. No. 380.

Commodities involved: Sugar, beet or cane, also liquid or invert sugar, carloads.

From: Port Wentworth and Savannah, Ga.

To: Bristol, Va.-Tenn.

Grounds for relief: Competition with rail carriers, circuitous routes, market competition, and port competition.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission, Division 2.

OF THE UNITED STATES

VOLUME 17 1934 NUMBER 202

Washington, Wednesday, October 15, 1952

TITLE 3—THE PRESIDENT

EXECUTIVE ORDER 10401

PRESCRIBING PROCEDURES FOR PERIODIC REVIEW OF ESCAPE-CLAUSE MODIFICATION OF TRADE-AGREEMENT CONCESSIONS

By virtue of the authority vested in me by the Constitution and the statutes, including section 332 of the Tariff Act of 1930 (46 Stat. 698), the Trade Agreements Act approved June 12, 1934, as amended (48 Stat. 943; 57 Stat. 125; 59 Stat. 410; 63 Stat. 697; Public Law 50, 82d Congress), and the Trade Agreements Extension Act of 1951 (Public Law 50, 82d Congress); and in the interest of the foreign-affairs functions of the United States, in order to carry out international obligations of the United States, and in order that the interests of the various branches of American economy may be effectively promoted and safeguarded in the administration of the trade-agreements program, it is hereby ordered as follows:

1. So long as a trade-agreement concession remains withdrawn, suspended, or modified, in whole or in part, pursuant to action taken under section 7 of the Trade Agreements Extension Act of 1951 or comparable provisions of any statute or Executive order, the Tariff Commission shall keep under review developments with regard to the product to which such concession relates, and shall make periodic reports to the President concerning such developments. The first such report shall in each case be made at such time, not more than two years after the original withdrawal, suspension, or modification of the trade-agreement concession, as will best enable it to be based upon a full marketing year for the product involved, and any subsequent reports with respect to such product shall be made at intervals of one year. The Tariff Commission shall also make such a report in any case at such other time as it may consider appropriate or as may be requested by the President, and a report so made shall constitute compliance with any requirement of this paragraph for a periodic report within six months before or after the date of its submission.

2. Whenever in the judgment of the Tariff Commission conditions of competition with respect to the trade in the imported article and the like or directly competitive domestic product concerned have so changed as to warrant it, or upon request of the President, the Commission shall institute a formal investigation to determine whether, and, if so, to what extent, the withdrawal, suspension, or modification of a trade-agreement concession remains necessary in order to prevent or remedy serious injury or the threat thereof to the domestic industry concerned. As a part of any such investigation, the Commission shall hold a hearing at which interested parties shall be given reasonable opportunity to be present, to produce evidence, and to be heard. Upon completion of such an investigation the Commission shall report to the President its findings as to what extent, if any, the withdrawal, suspension, or modification involved remains necessary in order to prevent or remedy serious injury or the threat thereof to the domestic industry concerned. The Commission may prescribe such rules and regulations for the conduct of investigations under this paragraph as it shall deem appropriate.

§ 518.401 *Eligible countries.* Eligible countries include all foreign countries and their territories or dependent areas except those located in North, Central and South America, the Islands of the Caribbean Sea, the Bahamas, Australia, New Zealand, Cyprus, Greece (including Crete), Iran, Turkey, Spain, the Union of South Africa, and except those countries and areas listed in Subgroup A of Group R of the Comprehensive Export Schedule issued by the Office of International Trade, United States Department of Commerce.

§ 518.402 *Rate of payment and determination of net weight.* (a) The rate of payment applicable to raisins exported in conformity with the terms and conditions contained in this subpart shall be:

Processed packed raisins	*Rate per pound net processed packed weight (cents)*
Natural Thompson Seedless	2.50
Sultanas	2.50
Muscats, except soda-dipped (Valencia) and layer Muscats	2.50
Zante currants	2.50
Golden Bleached Thompson Seedless	3.00

(b) The net weight marked on containers or invoiced or billed shall be considered the net weight of raisins exported under this subpart. If, however, the United States Department of Agriculture determines and shows on the inspection certificate an actual net weight that is less than the marked, invoiced or billed net weight, the net weight as determined by the United States Department of Agriculture and shown on the inspection certificate shall, for purposes of this subpart, be considered to be the net weight.

§ 518.403 *Eligibility for payment*—(a) *Sales contract and application for program participation.* No payment will be made under this subpart unless the exporter has entered into a sales contract (as defined in § 518.411 (g)) on or after, but not prior to, the effective date of this subpart and files, on prescribed form, an application to participate in this program with, and secures the approval thereof by either W. B. Blackburn, Anthony J. Tarlock, or Werner Allmendinger, representatives of the Secretary, Fruit and Vegetable Branch, Production and Marketing Administration, United States Department of Agriculture, P. O. Box 3638, Rincon Annex, San Francisco 19, California, or E. M. Graham or James Poole, representatives of the Secretary, Fruit and Vegetable Branch, Production and Marketing Administration, United States Department of Agriculture, Washington 25, D. C., whichever is nearer the billing office of the exporter. Applications must be filed separately, in quadruplicate, for each sale and as promptly as possible after the date of sale but in no event later than the second day (exclusive of Saturdays, Sundays, and holidays) prior to the date of export (see § 518.411 (e)) unless the Secretary, upon a written request by the exporter stating substantial reasons therefor, grants an extension of time for such filing. The Secretary will, in the order in which they are received or on such other basis as he may determine to be equitable, approve applications covering sales for exports which meet the requirements of this subpart so long as funds which have been allocated to this subpart are available, and will furnish to the exporter prompt written notice of approval or disapproval, or, in the event the application fails to conform with the applicable terms and conditions of this subpart, will so notify the exporter. If a sales contract with respect to which the Secretary has approved an application is modified in any respect, the exporter shall notify the Secretary promptly of such modification. The Secretary will give notice to the exporter of the approval or nonapproval of such modification.

(b) *Restriction and use of Mutual Security funds.* Under Chapter XI, entitled "Mutual Security," of the Supplemental Appropriations Act, 1953, Public Law 547, 82d Congress, funds appropriated under that chapter may not be used to finance foreign purchases on which export payments are made pursuant to section 32 of the act of August 24, 1935 (Pub. Law 320, 74th Cong.), as amended. The exporter at the time of negotiating the sale, in order to protect himself against the use of such funds in making payment for raisins sold under this subpart, shall in every instance receive assurance from the foreign buyer that such funds are not being used, or will not be used, in consummating the transaction, and shall support his claim for payment with a warranty, as set forth in § 518.404 (d), that no such funds have been, or will be, used in payment for raisins sold under this subpart. The exporter and the foreign buyer may, of course, outside of this subpart and without benefit of payments under this subpart, agree upon the sale of raisins at the prevailing market price with the total amount of such sales price to be paid by the foreign buyer in whole or in part out of such funds.

(c) *Minimum grade.* Raisins exported under this subpart shall meet or exceed the requirements of "U. S. Grade C," or "U. S. Standard," as defined in "United States Standards for Grades of Processed Raisins" effective May 26, 1952. Golden Bleached Thompson Seedless raisins shall meet or exceed the requirements for "fairly well bleached color (or Extra Choice color)" as described in such United States Standards. Zante currants shall meet or exceed the requirements of "U. S. Grade B," or "U. S. Choice," as defined in "United States Standards for Grades of Dried Currants" as revised and published in the FEDERAL REGISTER on September 19, 1952.

(d) *Inspection.* Exporter shall furnish, at no expense to the Secretary, certificate of inspection for each lot of raisins exported pursuant to this offer. Such certificates shall be issued by the Processed Products Standardization and Inspection Division, Fruit and Vegetable Branch, United States Department of Agriculture. The period from date of inspection to date of exportation, both dates inclusive, shall not exceed 21 calendar days: *Provided*, That, upon written request of the exporter stating substantial reasons therefor, the Secretary may, if he deems it desirable, grant an extension of time of such period.

(e) *Packaging.* Raisins exported under this subpart shall be suitably packed for export in a manner which shall reasonably assure arrival in good condition in the country of destination. Export containers shall bear a lot number, code or other markings by which the applica-

ble requirements of § 518.404 (b) may be fulfilled.

(f) *Minimum quantity.* An application will not be approved nor will payment under this subpart be made if the total quantity covered by such application is less than two thousand (2,000) pounds net weight of raisins.

(g) *Re-entry, diversion, re-exportation, or loss.* If any quantity of raisins exported under this subpart re-enters the continental United States, or is diverted or re-exported to U. S. territories or possessions or is diverted or re-exported to other than eligible countries as described in § 518.401, payment will be withheld by the Secretary or, if payment has already been made by the United States Government, the exporter shall refund the amount received on such quantity: *Provided*, That, if the raisins with respect to which payment may be withheld or refund required under this section are damaged after exportation, the payment withheld or refund required shall be an amount determined by the Secretary, which, however, shall not exceed the amount realized or which might reasonably be realized by the exporter over the price at which he sold to the foreign buyer in the sales contract covered by the approved application. In case of complete loss or destruction of the raisins or any part thereof after exportation, without fault or negligence of the exporter, no refund of the payment shall be required for the quantity so lost or destroyed. The exporter shall notify the Secretary immediately upon becoming cognizant of any such re-entry, diversion or re-exportation of, or damage to, the raisins which have been exported under this program and shall furnish information as to any claim he may have in connection with such event.

(h) *Final dates.* The final date for entering into a sales contract shall be 12 o'clock midnight, August 10, 1953; the final date for filing an application shall be 12 o'clock midnight, August 29, 1953: *Provided*, That such date is not later than the second day (exclusive of Saturdays, Sundays and holidays) prior to date of export (§ 518.403 (a)); the final date of export shall be 12 o'clock midnight, August 31, 1953; the final date for filing claims under this subpart shall be 12 o'clock midnight, September 30, 1953: *Provided*, That, upon written request of the exporter stating substantial reasons therefor, the Secretary may, if he deems it desirable, grant an extension of time for final dates.

§ 518.404. *Claims for payment supported by evidence of compliance.* (a) If the exporter's billing office is located in California, Nevada, Utah, Arizona, Idaho, Oregon, or Washington, he shall file claim for payment under this subpart with the Director, San Francisco PMA Commodity Office, Production and Marketing Administration, United States Department of Agriculture, P. O. Box 3638, 333 Fell Street, San Francisco 2, California. If the exporter's billing office is located in any other state, he shall file claim for payment under this subpart with the Director, New York PMA Commodity Office, Production and Marketing Administration, United States Department of Agriculture, 139 Centre Street, New York 13, New York. Such claim shall be filed so that it will be received by the Director of the PMA Commodity Office concerned not later than the final date specified in § 518.403 (h). Each claim for payment shall be filed in an original and three copies on voucher form FDA–564, "Public Voucher—Diversion Programs," shall show the number assigned by the United States Department of Agriculture to the related approved application, and shall be supported by:

(1) Two signed or certified copies of the sales contract;

(2) Two certified copies of the sales invoice to the buyer showing:

(i) The total sales price (see § 518.411 (i)),

(ii) The payment to be made by the Secretary,

(iii) The price f. a. s. (see § 518.411 (j)) to be paid by the buyer (other charges, if any, such as ocean freight or insurance, shall be shown separately on the invoice);

(3) Two copies of the on-board export bill of lading, signed by an agent of the exporting carrier, except that, where loss, destruction or damage occurs subsequent to loading on board exporting carrier but prior to issuance of on-board bill of lading, two copies of a loading tally sheet or similar document may be submitted in lieu of such bill of lading;

(4) The original or signed copy and one copy of the inspection certificate(s) required in § 518.403 (d);

(5) Such other documents as may be required by the Secretary, evidencing purchase, sale or exportation of the commodity on which payment is claimed under this subpart.

(b) The export bill of lading must show the quantity and description of the commodity, including the lot, code or brand markings appearing on containers, or other reference sufficient to relate the commodity loaded on board the export carrier to the commodity covered by the related inspection certificate, the date and place of loading, the destination of the commodity, and the name and address of both the exporter and the consignee. If the shipper or consignor named in such bill of lading is other than the exporter (seller) named in the application, the exporter shall furnish with each copy of such bill of lading a waiver by such shipper or consignor, in favor of such exporter, of any right to claim payment under this subpart for the commodity covered by such bill of lading. If the bill of lading shows the name of a consignee different from that appearing as the buyer on the contract under which the bill of lading is made, the exporter shall accompany his claim on the exportation covered by such bill of lading with a certification in duplicate that the shipment under that bill of lading is to the buyer named in the contract and is made pursuant to that contract.

(c) The foregoing required evidence will not be accepted as conclusive if the Secretary has reason to believe that exportation of all or any quantity of the commodity was not actually accomplished or that there has not been compliance with other requirements of this subpart, and in any such instance the Secretary may require such additional evidence as he deems reasonable.

(d) The exporter shall file with each claim for payment submitted under this subpart the original or a true copy of a warranty obtained from the foreign buyer stating that no part of the purchase price for the raisins covered by the sales contract attached to the claim for export payment has been, or will be, paid from funds appropriated under Chapter XI, entitled "Mutual Security," of the Supplemental Appropriation Act, 1953. If the sales contract contains such a warranty, this additional document is not required.

§ 518.405 *Records and accounts.* The exporter shall maintain adequate records showing purchases, sales and deliveries of raisins exported or to be exported in connection with this subpart. Such records, accounts, and other documents relating to any transaction in connection with this subpart shall be available during regular business hours for inspection and audit by authorized employees of the United States Department of Agriculture, and shall be preserved until September 30, 1955.

§ 518.406 *Amendment and termination.* The Secretary may amend or terminate this subpart at any time upon public announcement thereof. Such amendment or termination, however, shall not apply to any sales contract for which an application has been approved under the subpart prior to the effective time of such amendment or termination.

§ 518.407 *Persons not eligible for payments.* (a) Payments under this subpart will not be made to any Department, agency or establishment of the United States Government administering any law providing for the furnishing of assistance or relief to foreign countries.

(b) No member of, or delegate to, Congress or resident commissioner shall be admitted to any share or part of any payment made under this subpart or to any benefit that may arise therefrom, but this provision shall not be construed to extend to a payment made to a corporation for its general benefit or to any such person in his capacity as a producer of the raisins exported.

§ 518.408 *Set-off.* The Secretary may set off, against any amount owed to any exporter under this subpart, any amount owed by such exporter to Commodity Credit Corporation, the United States Department of Agriculture, or any other agency of the United States.

§ 518.409 *Joint payment or assignment.* An exporter may name a joint payee on claim for payment or may assign the proceeds of any claim for payment as provided in this subpart. The exporter may assign, in accordance with the provisions of the Assignment of Claims Act of 1940, Public Law No. 811, 76th Congress, as amended by Public Law 30, 82d Congress, the proceeds of any claim to a bank, trust company, Federal lending agency, or other recognized financing institution: *Provided*, That such assignment shall be recognized only if and when the assignee thereof files written notice of the assignment with the designated Representative of the Secretary, together with a signed copy of the instrument of assignment, in accordance with the instructions on Form PMA–66, "Notice of Assignment," which form must be used in giving notice of assignment to the designated Representative of the Secretary. The "Instrument of Assignment" may be executed on Form PMA–347 or the assignee may use his own form of assignment.

§ 518.410 *Good faith.* If the Secretary determines that any exporter has not acted in good faith in connection with any transaction under this subpart or has failed to discharge fully any obligation assumed by him under this subpart, such exporter may be denied the right to continue participating in this subpart or the right to receive payment under this subpart in connection with any sales previously made under this subpart, or both.

§ 518.411 *Definitions.* As used in §§ 518.400 to 518.410 the following terms have the following meanings:

(a) "Raisins" means natural Thompson Seedless raisins, Golden Bleached Thompson Seedless raisins, Sultana raisins, Zante currants and Muscat raisins, except soda dipped (Valencia) or layer Muscat raisins, processed and packed in the United States from grapes produced in the United States and which meet the requirements of § 518.403 (c).

(b) "Secretary" means the Secretary of the United States Department of Agriculture, or any authorized Representative of the Secretary.

(c) "Exporter" means any individual, corporation, partnership, association, the Raisin Administrative Committee, which administers Marketing Agreement No. 109 and Order No. 89 (7 CFR Part 989) regulating the handling of raisins produced from raisin variety grapes grown in California, or other business entity, located in the continental United States and engaged in the business of selling and exporting raisins produced, processed and packed in the continental United States.

(d) "Exported" means that raisins, pursuant to a sale made under this subpart, were loaded on board the final ocean carrier for shipment from the continental United States to a country described as an eligible country in § 518.401.

(e) "Date of export" means the date of loading on board the final ocean carrier for exportation from the continental United States as shown on the on-board bill of lading.

(f) "Application" means Form FV–361, "Application for Program Participation."

(g) "Sales contract" means a contract under which the seller is clearly obligated to sell and the buyer is clearly obligated to buy a definite quantity of raisins at a definite price, and shall consist of a written instrument signed by the buyer and the seller or shall consist of a written offer and acceptance evidenced by an exchange of telegrams, cablegrams, or letters, but may, however, be subject to the condition that the Secretary makes an export payment in connection therewith pursuant to this subpart. The terms include a contract between an exporter and his foreign branch or any affiliate or associate located in an eligible country.

(h) "Date of sale" means the date on which both buyer and seller signed a firm sales contract, or the date of written acceptance of either a written offer or counter offer to buy or sell by which a firm sales contract is effected.

(i) "Total sales price" means the price to the buyer free-alongside-ship United States port plus the payment to be made by the Secretary.

(j) "Price f. a. s." means the price to the buyer free-alongside-ship United States port and does not include the payment to be made by the Secretary.

(k) "On-board export bill of lading" includes any bill of lading covering the final exportation of raisins from the United States.

(l) "Public announcement" means the issuance of a press release or the publication of a notice in the FEDERAL REGISTER.

(m) "Filed." Applications, claims and related documents are deemed to be filed when received by the designated Representative of the Secretary.

(n) "Certified" means a written, signed declaration, contained in or attached to any document, stating that the document is a true and correct copy of the original of such document.

NOTE: The record keeping and reporting requirements contained herein have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

Effective date. This offer shall be effective on October 15, 1952.

Dated this 10th day of October 1952.

[SEAL] S. R. SMITH,
Authorized Representative of the Secretary of Agriculture.

Subchapter C—Loans, Purchases, and Other Operations

[1952 C. C. C. Grain Price Support Bulletin 1, Supplement 1, Amdt. 1, Winter Cover Crop Seed]

PART 601—GRAINS AND RELATED COMMODITIES

SUBPART—1952-CROP WINTER COVER CROP SEED LOAN AND PURCHASE AGREEMENT PROGRAM

SCHEDULE OF BASIC SPECIFICATIONS AND RATES; SETTLEMENT

The regulations issued by the Commodity Credit Corporation and the Production and Marketing Administration, published in 17 F. R. 4553 and containing the specific requirements for the 1952-crop winter cover crop seed price support program are hereby corrected and amended as follows:

1. Section 601.1960 *Schedule of basic specifications and rates*, is corrected to provide a discount for willamette vetch seed (item 4 of the table) of $0.018 per hundredweight for each percent or fraction thereof by which the purity is below the basis price requirements. The amount of $0.18 was erroneously printed.

2. Section 601.1963 *Settlement*, is amended by changing the requirements with respect to the determination of quality at the time of settlement so that the amended section reads as follows:

§ 601.1963 *Settlement.* Where seed is delivered to CCC in accordance with §601.1518 of the 1952 C. C. C. Grain Price Support Bulletin 1, the following additional provisions shall be applicable.

(a) *Drawing representative sample.* Except where the seed is stored in an approved warehouse and the warehouseman guarantees the quality and quantity of the seed, a representative sample of each lot of seed shall be drawn when the seed is delivered to CCC.

(b) *Farm-storage loans.* Settlement under a farm-storage loan shall be made with the producer at the applicable support price on the basis of the quantity of the seed delivered, and on the basis of the quality of the seed when placed under loan, except that in the following cases settlement shall be made on the basis of purity and germination tests of the seed as determined from a representative sample of the lot of seed which shall be drawn when the seed is delivered to the point designated in the delivery instructions issued by the county committee:

(1) When damage or deterioration has resulted from negligence on the part of the producer or other person having control of the storage structure;

(2) When the quantity of seed in the lot delivered is in excess of the quantity in the lot represented by the original test;

(3) When the lot number or other lot identification on the analysis report and/or germination test certificate does not agree with the lot number or other identification shown on the lot of seed delivered; or

(4) When the entire lot of seed delivered is not the identical seed placed under loan. (If the purity of the seed delivered varies from the purity indicated on the purity analysis report furnished by the producer to a greater extent than the tolerances permitted under the Federal Seed Act, it shall be presumed that the identical seed was not delivered and settlement shall be made on the basis of the quality determined at the time of the delivery, unless the producer establishes to the satisfaction of the county committee that the identical seed was delivered.)

(c) *Warehouse-storage loans*—(1) *Quality not guaranteed.* If the quality of the seed is not guaranteed by an approved warehouseman, settlement shall be made with the producer at the applicable support price on the basis of the quantity of seed shown on the warehouse receipt, and on the basis of the quality of the seed when placed under loan, except that in the following cases settlement shall be made on the basis of purity and germination tests of the seed as determined from a representative sample of the lot of seed which shall be drawn at the time of settlement:

(i) When damage or deterioration has resulted from negligence on the part of the producer or other person having control of the storage structure;

(ii) When the quantity of seed in the lot delivered is in excess of the quantity in the lot represented by the original test;

(iii) When the lot number or other lot identification on the analysis report and/or germination test certificate does not agree with the lot number or other identification shown on the lot of seed delivered; or

(iv) When the entire lot of seed at the time of settlement is not the identical seed placed under loan. (If the purity determined at the time of settlement varies from the purity indicated on the purity analysis report furnished by the producer to a greater extent than the tolerances permitted under the Federal Seed Act, it shall be presumed that the seed is not the identical seed placed under loan and settlement shall be made on the basis of the quality determined at the time of delivery unless the producer establishes to the satisfaction of the county committee that the identical seed was delivered.)

(2) *Quality guaranteed.* If the seed is stored in an approved warehouse and the warehouseman guarantees the quality and quantity of the seed settlement shall be made with the producer at the applicable support rate on the basis of the quality and quantity of the seed shown on the warehouse receipt.

(d) *Purchase agreements.* If the producer has notified the county committee of his intention to sell seed under a purchase agreement in accordance with the provisions of § 601.1518 of the 1952 C. C. C. Grain Price Support Bulletin 1, eligible seed will be purchased upon delivery at the applicable support price.

(1) *Quality not guaranteed.* If the quality of the seed is not guaranteed by an approved warehouseman, settlement will be made on the basis of the quantity of seed actually delivered and the quality shown by official purity analysis reports and germination test certificates based on representative samples taken not more than five calendar months prior to the first day of the month in which the seed is delivered to CCC, except that in the following cases settlement shall be made on the basis of purity and germination tests of the seed as determined from a representative sample which shall be drawn from the lot of seed at time of delivery:

(i) When the purity of the seed determined at time of delivery varies from the purity indicated on the original purity analysis report furnished by the producer to a greater extent than the tolerances permitted under the rules and regulations of the Federal Seed Act;

(ii) When the quantity of seed in the lot delivered is in excess of the quantity in the lot represented by the tests;

(iii) When the lot number or other lot identification on the analysis report and/or germination test certificate does not agree with the lot number or other identification shown on the lot of seed delivered; or

(iv) When the county committee determines that the physical condition of the seed indicates the original reports and certificates are no longer representative.

(2) *Quality guaranteed.* If the seed is stored in an approved warehouse and the warehouseman guarantees the quality and quantity of the seed settlement will be made with the producer at the applicable support rate on the basis of the quality and quantity of the seed shown on the warehouse receipt.

(e) *Disposition of seed which at time of delivery does not meet the purity requirements of eligibility for loan.* In the case of farm-storage and unguaranteed warehouse-storage loans (see paragraphs (b) and (c) (1) of this section), if on the basis of the purity analysis made from the sample taken at time of delivery, the seed does not meet the minimum purity requirements of eligibility for loan, the producer shall be furnished the results of the purity analysis and notified that if he does not (1) have the seed recleaned at his own expense to meet the minimum purity requirements of eligibility for loan; or (2) repay his loan and pay any expenses incurred in removing the seed from a warehouse or a CCC bin, the producer shall be liable for any deficiency on the loan after disposing of the seed as follows:

(1) In the case of salable seed, the seed shall be sold at public or private sale in accordance with section 7 (b) of the chattel mortgage or section 9 (b) of the note and loan agreement.

(2) In the case of seed which is not salable, the seed shall be disposed of at the expense of the producer.

(f) *Ineligible seed under purchase agreements.* Seed which does not meet the eligibility requirements of §§ 601.1953 and 601.1960 will not be accepted under purchase agreements.

(g) *Cost of quality determinations, appeals.* Expenses incident to taking one sample of eligible seed tendered for delivery and the cost of making one official germination test and purity analysis of such lot of seed shall be borne by CCC. If the producer is not satisfied with the result of the tests made at time of delivery, the producer may request that another representative sample of the lot of seed be drawn and submitted to a seed testing laboratory approved by the Director, Grain Branch, PMA, to conduct such appeal tests. The cost of resampling and retesting for the appeal germination and purity determinations shall be assumed by the producer requesting the appeal and funds to cover such cost shall accompany the request when transmitted to the county committee. The results of such laboratory germination test and purity analysis, without taking into consideration tolerances, shall be final.

(h) *Refund of paid-in freight.* Where any seed delivered to CCC has been shipped by the producer, or for him, "in line," as determined by CCC, from point of origin to an approved warehouse for storage where transit privileges are in effect, freight (including transportation tax) at a rate not exceeding the lowest published rate, or the lowest transcontinental rate, where applicable, paid on the inbound rail movement will be refunded to the producer: *Provided,* That (1) the shipment has been properly registered for transit; (2) the paid railway freight bill or a validated copy thereof, representing the identical seed, is endorsed to CCC in accordance with the covering tariffs at the transit point, and turned over to CCC; (3) a freight certificate signed by the warehouseman is turned over to CCC; and (4) the refunded freight is limited to the quantity of seed shown on the warehouse receipt; and (5) whenever the support rate for the point of delivery is higher than the support rate for the point of origin shown on the freight certificate, the amount refunded shall be the freight paid on the inbound rail movement less the difference between the support rate for the point of delivery and the support rate for the point of origin. The freight certificate shall show the original shipping point, date and number of waybill, car initials and number, date and number of freight bill, name of the carrier, transit weight, and rate paid in, the total amount of freight paid, and such other information as CCC may require. Refunds for paid-in freight under this paragraph will be made by the appropriate PMA commodity office subsequent to actual delivery of the seed to CCC pursuant to a loan or purchase agreement.

(Sec. 4, 62 Stat. 1070, as amended; 15 U. S. C. Sup. 714b. Interpret or apply sec. 5, 62 Stat. 1072, secs. 301, 401, 63 Stat. 1051; 15 U. S. C. Sup. 714, 7 U. S. C. Sup. 1447, 1421)

Chapter I—Production and Marketing Administration (Standards, Inspections, Marketing Practices), Department of Agriculture

PART 52—PROCESSED FRUITS AND VEGETABLES, PROCESSED PRODUCTS THEREOF, AND CERTAIN OTHER PROCESSED FOODS PRODUCTS

U. S. STANDARDS FOR GRADES OF DRIED CURRANTS

Correction

In F. R. Doc. 52-10249, appearing on page 8415 of the issue for Friday, September 19, 1952, the following addition has been made:

In § 52.288, immediately preceding Table I, insert a new subparagraph (3) in paragraph (b) *Grades of dried currants* to read as follows:

(3) "Substandard" is the quality of dried currants that fail to meet the requirements of U. S. Grade B or U. S. Choice.

Done at Washington, D. C., this 10th day of October 1952.

[SEAL] GEORGE A. DICE,
Acting Assistant Administrator, Production and Marketing Administration.

Chapter IX—Production and Marketing Administration (Marketing Agreements and Orders), Department of Agriculture

PART 909—HANDLING OF ALMONDS GROWN IN CALIFORNIA

REVISION OF GRADE REQUIREMENT FOR SURPLUS

Notice of proposed rule making with respect to a revision of the grade requirement for surplus almonds was published in the FEDERAL REGISTER of September 24, 1952 (17 F. R. 8518), pursuant to the provisions of Marketing Agreement No. 119 and Order No. 9 regulating the handling of almonds grown in California (7 CFR 1951 Supp., Part 909). In said notice it was proposed to revise the grade requirement for surplus almonds set forth in § 909.65 (b) of the marketing agreement and order. Opportunity was afforded interested persons to submit to the Department written data, views, or arguments for consideration prior to issuance of the final rule in respect to the revised grade requirement. No such documents were received during the period specified.

Therefore, after consideration of all relevant matters, the administrative rule is as follows:

§ 909.401 *Revised grade requirement for surplus almonds.* In lieu of the grade requirement for surplus almonds set forth in § 909.65 (b) of the marketing agreement and order regulating the handling of almonds grown in California, the following grade requirement shall apply. Lots of almonds to be eligible for certification as surplus must meet the following requirements, and only edible kernel weight, inclusive of the weight of loose edible kernels included in in-shell lots or the weight of edible kernels in-shell included in shelled lots, shall be credited as surplus: (a) Each lot shall consist of almonds which do not vary widely in grade factors and such almonds must be well mixed or commingled so as to permit representative sampling; (b) each lot shall be dry and properly cured; (c) unshelled almonds shall not be affected by adhering hulls (where more than 10 percent of the surface is affected) on more than 10 percent by count; shall contain no more than 5 percent by weight of loose shells, hulls, and other foreign material; and not more than 10 percent by count of the kernels shall be inedible; (d) shelled almonds shall not contain, in the aggregate, more than 15 percent by weight of loose hulls, shells, unshelled almonds, other foreign material, inedible kernels, and material of any kind which will pass through a round opening one-eighth inch in diameter.

It is hereby found and determined that good cause exists for making this administrative rule effective upon its publication in the FEDERAL REGISTER instead of waiting 30 days after publication for the reasons that (1) it is desirable that the revised grade requirement become effective as soon as practicable after growers begin to deliver 1952 crop almonds to handlers; (2) such deliveries of 1952 crop almonds have begun; and (3) compliance with this administrative rule will not require handlers to make advance preparation of a special nature.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup. 608c)

Issued at Washington, D. C., this 10th day of October 1952, to become effective upon publication of this document in the FEDERAL REGISTER.

[SEAL] S. R. SMITH,
Director, Fruit and Vegetable Branch, Production and Marketing Administration.

[F. R. Doc. 52-11185; Filed Oct. 14, 1952; 8:48 a. m.]

[Grapefruit Reg. 86]

PART 955—GRAPEFRUIT GROWN IN ARIZONA; IN IMPERIAL COUNTY, CALIF.; AND IN THAT PART OF RIVERSIDE COUNTY, CALIF., SITUATED SOUTH AND EAST OF THE SAN GORGONIO PASS

LIMITATION OF SHIPMENTS

§ 955.347 *Grapefruit Regulation 86*—(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 55, as amended (7 CFR Part 955), regulating the handling of grapefruit grown in the State of Arizona; in Imperial County, California; and in that part of Riverside County, California, situated south and east of the San Gorgonio Pass, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended, and upon the basis of the recommendations of the Administrative Committee (established under the aforesaid amended marketing agreement and order), and upon other available information, it is hereby found that the limitation of shipments of grapefruit, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule making procedure, and postpone the effective date of this section until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) because the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient, and a reasonable time is permitted, under the circumstances, for preparation for such effective date. The Administrative Committee held an open meeting on October 2, 1952, to consider recommendations for a regulation, after giving due notice of such meeting, and interested persons were afforded an opportunity to submit their views at this meeting; information regarding the provisions of the regulation recommended by the committee has been disseminated to shippers of grapefruit, grown as aforesaid, and this section, including the effective time thereof, is identical with the recommendation of the committee; it is necessary, in order to effectuate the declared policy of the act, to make this section effective on the date hereinafter set forth so as to provide for the regulation of the handling of the grapefruit at the start of this marketing season; and compliance with this section will not require any special preparation on the part of persons subject thereto which cannot be completed on or before the effective date hereof.

(b) *Order.* (1) During the period beginning at 12:01 a. m., P. s. t., October 19, 1952, and ending at 12:01 a. m., P. s. t., December 14, 1952, no handler shall ship:

(i) Any grapefriut of any variety grown in the State of Arizona; in Imperial County, California; or in that part of Riverside County, California, situated south and east of the San Gorgonio Pass unless such grapefruit are at least fairly well colored, and otherwise grade at least U. S. No. 2; or

(ii) From the State of California or the State of Arizona (*a*) to any points outside thereof in the United States, any grapefruit, grown as aforesaid, which are of a size smaller than $3^{11}/_{16}$ inches in diameter, or (*b*) to any point in Canada, any grapefruit, grown as aforesaid, which are of a size smaller than $3^{6}/_{16}$ inches in diameter ("diameter" in each case to be measured midway at a right angle to a straight line running from the stem to the blossom end of the fruit), except that a tolerance of 5 percent, by count, of grapefruit smaller than the foregoing minimum sizes shall be permitted which tolerance shall be applied in accordance with the provisions for the application of tolerance, specified in the revised United States Standards for Grapefruit (California and Arizona), § 51.241 of this title: *Provided,* That, in determining the percentage of grapefruit in any lot which are smaller than $3^{11}/_{16}$ inches in diameter, such percentage shall be based only on the grapefruit in such lot which are of a size $4^{2}/_{16}$ inches in diameter and smaller; and in determining the percentage of grapefruit in any lot which are smaller than $3^{6}/_{16}$ inches in diameter, such percentage shall be based only on the grapefruit in such lot which are of a size $3^{15}/_{16}$ inches in diameter and smaller.

(2) As used in this section, "handler," "variety," "grapefruit," and "ship" shall have the same meaning as when used in said amended marketing agreement and order; and the terms "U. S. No. 2" and "fairly well colored" shall each have the same meaning as when used in the revised United States Standards for Grapefruit (California and Arizona), 7 CFR 51.241.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup. 608c)

Done at Washington, D. C., this 9th day of October 1952.

[SEAL] S. R. SMITH,
Director, Fruit and Vegetable Branch, Production and Marketing Administration.

PART 992—IRISH POTATOES GROWN IN WASHINGTON

RECODIFICATION

EDITORIAL NOTE: Federal Register Document 52-3886, appearing at page 2912 of the issue for Friday, April 4, 1952, has been corrected as follows:

In § 992.120 (a), the reference "§§ 992.54 and 992.57" should read "§ 992.50", and the reference "§§ 992.50 to 992.57, inclusive" should read "§ 992.48".

TITLE 16—COMMERCIAL PRACTICES

Chapter I—Federal Trade Commission

[Docket 5971]

PART 3—DIGEST OF CEASE AND DESIST ORDERS

KENTUCKY CHEMICAL INDUSTRIES, INC.

Subpart—*Discriminating in price under section 2, Clayton Act as amended—Price discrimination under* 2 (a): § 3.725 *Cumulative quantity discounts and schedules;* § 3.770 *Quantity rebates or discounts.* In the sale of animal feed products, including both concentrated and complete feeds, whether sold under the name of "Provico" or any other name or designation, in commerce, directly or indirectly discriminating in price between different competing purchasers of animal feed products, including both concentrate and complete feeds of like grade and quality, where the aforesaid products are sold for use, consumption or resale within the United States, by employing in any manner, or by any means, any arrangement or plan, regardless of designation, whereby allowances, discounts, rebates, refunds, compensation or consideration of any nature or description are granted or paid in any manner to competing dealer purchasers of such products when such allowances, discounts, rebates, refunds, compensation or consideration are compiled or computed at varied or different rates or percentages dependent upon the quantity or amount of the products purchased; prohibited.

(Sec. 6, 38 Stat. 722; 15 U. S. C. 46. Interprets or applies sec. 2, 38 Stat. 730, as amended, 15 U. S. C. 13) [Cease and desist order, Kentucky Chemical Industries, Inc., Cincinnati, Ohio, Docket 5971, August 6, 1952]

This proceeding was instituted by complaint which charged respondent with violation of subsection (a) of section 2 of the Clayton Act, as amended.

It was disposed of, as announced by the Commission's "Notice of Acceptance of consent settlement and order to file report of compliance," dated August 13, 1952, through the consent settlement procedure provided in Rule V of the Commission's rules of practice as follows:

The consent settlement tendered by the parties in this proceeding, a copy of which is served herewith, was on August 6, 1952 accepted by the Commission, subject only to the condition that the respondent comply with the requirements of the following paragraph with respect to the filing of a report showing the manner and form in which it has complied with the order to cease and desist; and subject to such condition said consent settlement was ordered entered of record as the Commission's findings as to the facts,[1] conclusion,[1] and order in disposition of this proceeding.

The foregoing consent settlement is hereby accepted by the Federal Trade Commission and ordered entered of record this 6th day of August 1952, subject only to the condition that the respondent shall, within sixty (60) days after services upon it of a copy of this consent settlement, file with the Commission a report in writing setting forth in detail the manner and form in which it has complied with the order to cease and desist contained in said consent settlement.

Said order to cease and desist, thus entered of record, following the findings as to the facts and conclusion, reads as follows:

It is ordered, That the respondent, Kentucky Chemical Industries, Inc., a corporation, directly or indirectly, through any corporate or other device, through its officers, agents, representatives or employees, or by any other means or methods in the sale of animal feed products, including both concentrate and complete feeds, whether sold under the name of "Provico" or any other name or designation, in commerce, as "commerce" is defined in the aforesaid Clayton Act, do forthwith cease and desist from:

Directly or indirectly discriminating in price between different competing purchasers of animal feed products, including both concentrate and complete feeds of like grade and quality, where the aforesaid products are sold for use, consumption or resale within the United States, by employing in any manner, or by any means, any arrangement or plan, regardless of designation, whereby allowances, discounts, rebates, refunds, compensation or consideration of any nature or description are granted or paid in any manner to competing dealer purchasers of such products when such allowances, discounts, rebates, refunds, compensation or consideration are compiled or computed at varied or different rates or percentages dependent upon the quantity or amount of the products purchased.

It is accordingly ordered, That the respondent, Kentucky Chemical Industries, Inc., a corporation, shall within sixty (60) days after service upon it of this notice and order, file with the Commission a report in writing setting forth in detail the manner and form in which it has complied with the order to cease and desist contained in the consent settlement entered herein.

Issued: August 13, 1952.

By direction of the Commission.

[SEAL] WM. P. GLENDENING, JR.,
Acting Secretary.

TITLE 14—CIVIL AVIATION

Chapter I—Civil Aeronautics Board

Subchapter A—Civil Air Regulations

[Supp. 13]

PART 42—IRREGULAR AIR CARRIER AND OFF-ROUTE RULES

COCKPIT CHECK LIST TO BE USED PRIOR TO LANDING

This amendment removes the "challenge and response" method of check in the case of several of the items to be double-checked prior to landing. A momentary visual check has been substituted so that one pilot may be observing the traffic at all times when approaching for a landing at busy air terminals.

In § 42.25–2 (published on November 22, 1949, in 14 F. R. 7031 and amended on May 24, 1950, in 15 F. R. 3151) the check list entitled "Prior to Landing" is revised to read:

§ 42.25–2 *Minimum standard cockpit check list (CAA policies which apply to § 42.25).* • • •

PRIOR TO LANDING

Fuel system: [2a]
Proper tank selection—checked.
Mixtures—landing position.
Fuel booster pumps—as required.
Cross feeds—as required.
Weight and balance:
Maximum landing gross weight—checked.
Hydraulic system: [2a]
Hydraulic pressure—checked.
Brakes—checked and off.
Hydraulic selector valves—checked.
Anti-icing and de-icing equipment [2a]—checked.
Power plants and propellers:
Propellers—as required.
Super chargers—as required.
Manual reverse pitch actuator or indicator [2a]—checked.
Heaters [2a]—checked.
Instruments:
Static and vacuum selectors—checked.
Altimeter—set.
Directional gyro—set.
Pressurization [2a]—checked.
Controls:
Auto pilot—off.
Trim tabs—as desired.
Landing gear: [2]
Down and locked—checked.
Flaps: [2a]
Wing flaps—as desired.
Cowl flaps—as desired.

[2] Items thus marked will be double-checked such as by challenge and response, or positively checked such as by a mechanical method.

[2a] Items thus marked will be checked by one pilot calling out the item to be checked and then performing the operation with the other pilot observing the action or making a momentary visual check after the operation is completed.

(Sec. 205, 52 Stat. 984, as amended; 49 U. S. C. 425. Interpret or apply secs. 604, 605, 608, 52 Stat. 1010, 1011, as amended; 49 U. S. C. 554, 555, 558)

These policies shall become effective October 31, 1952.

[SEAL] F. B. LEE,
Acting Administrator of Civil Aeronautics.

[F. R. Doc. 52-11157; Filed, Oct. 14, 1952; 8:45 a. m.]

[Supp. 23]

PART 61—SCHEDULED AIR CARRIER RULES

COCKPIT CHECK LIST TO BE USED PRIOR TO LANDING

This amendment removes the "challenge and response" method of check in the case of several of the items to be double-checked prior to landing. A momentary visual check has been substituted so that one pilot may be observing the traffic at all times when approaching for a landing at busy air terminals.

In § 61.63–1 (published on February 4, 1950, in 15 F. R. 622) paragraph caption "(a) *General*" is deleted, and the check list entitled "Prior to Landing" is revised to read:

§ 61.63–1 *Air carrier cockpit check list (CAA policies which apply to § 61.63).* • • •

PRIOR TO LANDING

Fuel system: [2]
Proper tank selection—checked.
Mixtures—landing position.
Fuel booster pumps—as required.
Cross feeds—as required.
Weight and balance:
Maximum landing gross weight—checked.
Hydraulic system: [2]
Hydraulic pressure—checked.
Brakes—checked and off.
Hydraulic selector valves—checked.
Anti-icing and de-icing equipment [2]—checked.
Power plants and propellers:
Propellers—as required.
Super chargers—as required.
Manual reverse pitch actuator or indicator [2]—checked.
Heaters [2]—checked.
Instruments:
Static and vacuum selectors—checked.
Altimeter—set.
Directional gyro—set.
Pressurization [2]—checked.
Controls:
Auto pilot—off.
Trim tabs—as desired.
Landing gear: [1]
Down and locked—checked.
Flaps: [2]
Wing flaps—as desired.
Cowl flaps—as desired.

(Sec. 205, 52 Stat. 984, as amended; 49 U. S. C. 425. Interpret or apply secs. 601, 604, 605, 52 Stat. 1007, 1010, as amended; 49 U. S. C. 551, 554, 555)

[1] Items thus marked will be double-checked such as by challenge and response, or positively checked such as by a mechanical method.

[2] Items thus marked will be checked by one pilot calling out the item to be checked and then performing the operation with the other pilot observing the action or making a momentary visual check after the operation is completed.

These policies shall become effective October 31, 1952.

[SEAL] F. B. LEE,
Acting Administrator of Civil Aeronautics.

[F. R. Doc. 52-11158; Filed, Oct. 14, 1952; 8:45 a. m.]

Chapter II—Civil Aeronautics Administration, Department of Commerce

[Rev. of May 10, 1949, Amdt. 18]

PART 550—FEDERAL AID TO PUBLIC AGENCIES FOR DEVELOPMENT OF PUBLIC AIRPORTS

PROJECT COSTS

Acting pursuant to the authority vested in me by the Federal Airport Act, I hereby amend Part 550 of the regulations of the Administrator of Civil Aeronautics as follows:

Section 550.4 (a) is hereby amended by adding a new subparagraph (9) as follows:

§ 550.4 *Project costs*—(a) *Eligibility.* • • •

(9) Any costs incurred in connection with bond elections, the sale of bonds, the premium on bonds, or any interest on monies borrowed or other interest on monies used prior to or subsequent to the completion of a project.

(Secs. 1–15, 60 Stat. 170–178, as amended; 49 U. S. C. 1101–1114)

This amendment shall become effective upon publication in the FEDERAL REGISTER.

[SEAL] S. A. KEMP,
Acting Administrator of Civil Aeronautics.

[F. R. Doc. 52-11159; Filed, Oct. 14, 1952; 8:45 a. m.]

[Amdt. 36]

PART 608—DANGER AREAS

ALTERATION

The danger area alteration appearing hereinafter has been coordinated with the civil operators involved, the Army, the Navy, and the Air Force, through the Air Coordinating Committee, Airspace Subcommittee, and is adopted to become effective when indicated in order to promote safety of the flying public. Since a military function of the United States is involved, compliance with the notice, procedures, and effective date provisions of section 4 of the Administrative Procedure Act is not required. Part 608 is amended as follows:

In § 608.14, the Muroc Lake, California, area, published on July 16, 1949, in 14 F. R. 4288, is amended by changing the "Using Agency" column to read: "Edwards AFB, Edwards, Calif." and the "Time of Designation" column to read: "Continuous".

(Sec. 205, 52 Stat. 984, as amended; 49 U. S. C. 425. Interprets or applies sec. 601, 52 Stat. 1007, as amended; 49 U. S. C. 551)

This amendment shall become effective on October 15, 1952.

[SEAL] S. A. KEMP,
Acting Administrator of Civil Aeronautics.

[F. R. Doc. 52-11162, Filed, Oct. 14, 1952; 8:46 a. m.]

[Amdt. 37]

PART 608—DANGER AREAS

ALTERATION

The danger area alteration appearing hereinafter has been coordinated with the civil operators involved, the Army, the Navy, and the Air Force, through the Air Coordinating Committee, Airspace Subcommittee, and is adopted to become effective when indicated in order to promote safety of the flying public. Since a military function of the United States is involved, compliance with the notice, procedures, and effective date provisions of section 4 of the Administrative Procedure Act is not required. Part 608 is amended as follows:

In § 608.29, a Cape Cod, Massachusetts, temporary area is added to read:

Name and location (chart)	Description by geographical coordinates	Designated altitudes	Time of designation	Using agency
CAPE COD (Boston Chart).	An area extending 15 miles on either side of a direct line between lat. 41°33'00" N, long. 70°03'00" W, and lat. 42°04'00" N, long. 70°17'00" W.	20,000 feet to unlimited.	From 2000 Oct. 15, 1952, to 0100 Oct. 16; from 2000 Oct. 16 to 0100 Oct. 17; from 2000 Oct. 17 to 0100 Oct. 18, all times e. s. t.	Eastern Air Defense Command.

(Sec. 205, 52 Stat. 984, as amended; 49 U. S. C. 425. Interprets or applies sec. 601, 52 Stat. 1007, as amended; 49 U. S. C. 551)

This amendment shall become effective on October 15, 1952.

[SEAL] S. A. KEMP,
Acting Administrator of Civil Aeronautics.

[F. R. Doc. 52-11163; Filed, Oct. 14, 1952; 8:46 a. m.]

[Amdt. 20]

PART 609—STANDARD INSTRUMENT APPROACH PROCEDURES

USE OF RADIO RANGES REQUIRING FLIGHT CHECK

The purpose of this amendment is to remove from § 609.3 (d), as published on August 14, 1952, in 17 F. R. 7384, the detailed specification of language to be used for notification that radio ranges are "ground checked only, awaiting flight check," in order that changes in

the language may be made when necessary without affecting the intent.

This amendment is adopted to become effective when indicated in order to provide for the protection of fair traffic. Compliance with the notice, procedures, and effective date provisions of section 4 of the Administrative Procedure Act would be impracticable and therefore is not required.

Section 609.3 (d) is revised to read:

§ 609.3 *Introduction.* • • •

(d) *Use of radio ranges requiring flight check.* When a flight check of a radio range is required, a notice to airmen will be issued advising that the range is ground checked only, awaiting flight check, and the following will apply with regard to operation and use of the range:

(1) If the radio range is a very high frequency type (108.3 through 117.9 mcs) range, the entire radio range (consisting of the navigational, voice, and identification features) will be shut down.

(2) If the radio range is a low frequency type (200 through 400 kcs) nonsimultaneous range, the navigational feature will be shut down, and no utilization for navigational purposes will be authorized.

(3) If the radio range is a low frequency type (200 through 400 kcs) simultaneous range, it may be used as a homing facility only.

(i) In addition, this type of radio range may be used as an ADF approach aid by scheduled air carriers, provided that their operations specifications authorize an ADF instrument approach to the airport concerned.

(ii) Irregular air carriers and other operators may use this type of radio range as an ADF instrument approach aid if an ADF procedure for the airport concerned is prescribed by the Administrator, or if an approach is conducted using the same course for an ADF track as that specified in the approved range procedure and with identical altitudes as used in the range approach.

This paragraph shall not apply in the Territory of Alaska, including the Aleutian Islands, or in the central and western Pacific islands under United States jurisdiction, including the Territory of Hawaii and the islands of Canton, Wake, and Guam until further notice.

(Sec. 205, 52 Stat. 984, as amended; 49 U. S. C. 425. Interpret or apply sec. 601, 52 Stat. 1007, as amended; 49 U. S. C. 551)

This amendment shall become effective October 15, 1952.

[SEAL] S. A. KEMP,
Acting Administrator of Civil Aeronautics.

[F. R. Doc. 52-11164; Filed, Oct. 14, 1952; 8:46 a. m.]

TITLE 32—NATIONAL DEFENSE

Chapter XVII—Federal Civil Defense Administration

PART 1701—CONTRIBUTIONS FOR CIVIL DEFENSE EQUIPMENT

PART 1705—CONTRIBUTIONS FOR TRAINING AND EDUCATION

Part 1701 of the FCDA Regulations, as amended, is hereby revised and Part 1705 is hereby revoked. Such revision and revocation, however, does not relieve any State, political subdivision or person of any obligation or liability incurred under the former Part 1701 or Part 1705 nor does it deprive any State, political subdivision or person of any rights received or accrued under said regulations.

Sec.
1701.1 Purpose.
1701.2 Definitions.
1701.3 Request for contributions.
1701.4 Conditions of contributions.
1701.5 Amount of Federal contributions.
1701.6 Project application approval.
1701.7 Billing and payment.
1701.8 Advances of Federal funds for State procurement.
1701.9 Retroactive contributions.

AUTHORITY: §§ 1701.1 to 1701.9 issued under sec. 401, 64 Stat. 1254; 50 U. S. C., App. Sup. 2253.

§ 1701.1 *Purpose.* The purpose of the regulations in this part is to prescribe the requirements for Federal contributions for the purchase of civil defense equipment, and the conditions under which such contributions will be made.

§ 1701.2 *Definitions.* (a) Except as otherwise stated the following terms shall have the following meanings when used in the regulations in this part:

(1) *Civil defense equipment.* Such materials, facilities and organizational equipment for which the Administrator approves financial contributions under section 201 (i) of the Federal Civil Defense Act of 1950.

(2) *Organizational equipment.* Equipment (other than materials and facilities) determined by the Administrator to be (i) necessary to a civil defense organization, as distinguished from personal equipment, and (ii) of such a type or nature as to require it to be financed in whole or in part by the Federal Government. It shall not be construed to include those items which the local community normally utilizes in combating local disasters except when required in unusual quantities dictated by the requirements of the civil defense plans.

(3) *Materials.* Raw materials, supplies, medicines, equipment, component parts and technical information and processes necessary for civil defense.

(4) *Facilities.* Buildings, shelters, utilities, and land.

(5) *Program.* That course of action adopted by a State or political subdivision in a specific civil defense area of activity (e. g., fire program, rescue program, attack warning program, communications program).

(6) *Project.* A definable part of a program which is complete in itself.

§ 1701.3 *Request for contributions.* A request for a Federal contribution by the State must be made on Project Application (FCDA FORM 233) in accordance with the procedures and criteria outlined in the FCDA Contributions Manual M25-1. The request for contribution shall be signed by the Governor or by such other State official as shall be duly authorized. In the latter case, such officer's authorization shall be on file with FCDA.

§ 1701.4 *Conditions of contributions.* The FCDA shall make contributions for civil defense equipment, including approved costs, subject to the following conditions:

(a) *Matching State funds.* The amounts authorized to be contributed to each State for civil defense equipment shall be equally matched by such State from any source it determines consistent with its laws. The making of a request for a contribution shall constitute a certification by the State (and the political subdivision, if applicable) that funds to match the requested Federal contribution are available, that the equipment to be acquired is required for civil defense purposes, and that the State (and political subdivision, if applicable) will comply with FCDA regulations covering Contributions for Civil Defense Equipment, United States Civil Defense Corps, and Official Civil Defense Insigne.

(b) *Administrative expenses and personal equipment.* No contribution shall be made for State or local personnel or administrative expenses or for items of personal equipment for State or local workers.

(c) *Specifications.* Specifications for civil defense equipment shall be approved by the Administrator.

(d) *Cancellation or breach.* If for any reason the State (or the political subdivision, if applicable) should revoke or cancel its request for financial contribution after approval by the FCDA, or breaches any condition of this section or the project application by which the contribution was approved, it shall promptly reimburse the Federal Government for any loss, as determined by FCDA, occasioned by the Federal Government.

(e) *Inspection and accounting.* Civil defense equipment shall be controlled in accordance with accepted or prescribed methods of accounting, identification, and administrative responsibility. FCDA representatives shall have access to the equipment at all reasonable times for purposes of inspection. The FCDA shall also be granted ready access to the books and records of the State and political subdivision relating to such equipment.

(f) *Use and disposal.* Civil defense equipment shall be distributed, maintained, and used solely for civil defense purposes unless the FCDA prescribes or authorizes otherwise and such equipment shall not be disposed of without prior approval of the FCDA; *Provided, however,* That equipment subject to deterioration shall be rotated or replaced in advance of expiration dates in such a manner as to minimize loss by deterioration.

(g) *Distribution and maintenance.* Civil defense equipment shall be protected and maintained in such a way as to assure its ready availability for the civil defense purpose for which it was acquired. Such equipment shall, to the extent possible, be distributed and stored in such a manner as to minimize its loss in the event of an attack and at the same time assure its availability for use at the places required immediately after an attack.

(h) *Information and reports.* The State (and the political subdivision, if applicable) shall transmit to the FCDA, as required, a statement of its plans for meeting the conditions of this section and such reports as the FCDA may from time to time request.

(i) *Insigne.* Civil defense equipment shall, whenever practical, be marked with the official civil defense insigne.

(j) *Damage or loss.* If civil defense equipment procured by the FCDA should be lost or damaged prior to its delivery to the State (or political subdivision, if applicable) FCDA shall promptly make replacement or any necessary repair. If civil defense equipment procured either by FCDA or the State is consumed, lost, damaged, or destroyed after delivery, the State (or political subdivision, if applicable) shall promptly make replacement: *Provided, however,* That the State (or political subdivision, if applicable) shall not be required to replace such equipment which is consumed, lost, damaged, or destroyed in the course of civil defense operations during a civil defense emergency.

(k) *Title.* Title to civil defense equipment procured by FCDA shall pass to the State upon delivery of such equipment to the State. When procurement contracts are let by FCDA on an f. o. b. origin basis and FCDA executes inspection and receiving reports which have the effect of accepting the equipment at the shipping point, it shall be considered that title has passed at that time and at that place. The State shall furnish to FCDA the name or names of such person or persons who has or have been authorized, in the name of the State, to execute the necessary receiving reports, fiscal transactions, and other necessary documents in connection with such equipment.

(l) *Loyalty oath.* No request for civil defense equipment shall be approved by FCDA unless (1) the State law requires that each person who is appointed to serve in a State or local organization for civil defense shall, before entering upon his duties take an oath of the character and in the manner provided for in subsection 403 (b) of the Federal Civil Defense Act of 1950, as amended, or (2) the State certifies that it has directed the State or local civil defense agency to require that such person shall, before entering upon his duties, take such oath, unless it is determined that an oath of equivalent character has been taken by such person or a combination of an oath plus requirements of State or Federal law imposes on such person an obligation equivalent to that imposed by the oath contained in subsection 403 (b) of the Federal Civil Defense Act of 1950, as amended.

(m) *Failure to expend funds.* Where a State acts as its own purchasing agent, and the Administrator, after reasonable notice and opportunity for hearing in accordance with Part 1703 of this chapter, finds that the State has failed or is failing to expend funds in accordance with the terms and conditions of the act, or this part, the FCDA may withhold payments of any financial contributions to such State, due or to become due.

§ 1701.5 *Amount of Federal contribution.* Federal contributions for civil defense equipment may not exceed fifty percent of the total cost for such equipment: *Provided, however,* That such percentage may be varied for the Territory of Alaska: *Provided further,* That in the event of State procurement of an item designated for Federal procurement in the FCDA Contribution Manual the contribution shall not exceed fifty percent of the acquisition cost which FCDA would have incurred had it purchased the item. A Project Application involving State procurement may include the costs of transportation, installation, and taxes (other than those imposed by the State or the political subdivision submitting the application) but may not include procurement or maintenance charges.

§ 1701.6 *Project application approval.* (a) If a project application is found acceptable and approved without change by FCDA, a signed copy thereof evidencing such approval shall be returned to the State.

(b) If FCDA's approval of a project application is made subject to revisions or additional conditions, the project application shall be returned to secure the consent of the State (and the political subdivision, if applicable) to such revisions or additional conditions. If the State (and the political subdivision, if applicable) agrees to such revisions or additional conditions, it shall so signify by signing and returning the project application.

(c) If the project application is disapproved, it shall be returned to the State with a brief statement of the reasons for such disapproval.

§ 1701.7 *Billing and payment.* (a) When civil defense equipment procured by the FCDA has been delivered to the State, the FCDA shall invoice the State for the State's share, and the State will make payment, through FCDA, to the Treasurer of the United States.

(b) When civil defense equipment procured by a State has been delivered to the State, the FCDA, upon receipt of proper invoice, shall make payment, by check drawn against the Treasury of the United States, to the properly authorized State official.

§ 1701.8 *Advances of Federal funds for State procurement.* Upon approval by the FCDA of a project application for civil defense equipment which the State is to procure, the FCDA may make advance contribution of Federal funds to the States for this purpose, subject to the following conditions:

(a) The State shall have satisfactorily demonstrated that it cannot accomplish the procurement without the advance of funds.

(b) The Treasurer (or comparable fiscal officer of the State) shall be the sole custodian of the funds advanced.

(c) The funds shall be held in a separate fund or account.

(d) The funds shall not be withdrawn from such account except upon the certification of the Governor or other authorized State official and then only for payment of items covered by the project applications against which the advance was made.

(e) The State shall keep such central records and accounts as are in accordance with accepted or prescribed methods of accounting, showing the receipt and expenditure of the Federal funds advanced to it. FCDA and General Accounting Office representatives shall be granted ready access to such records and accounts and may require such additional records, and the preparation of such reports as are reasonable and necessary.

(f) Final settlement of balances due the United States or the State, as the case may be, shall be made on the basis of the invoices submitted by the State in connection with each project application consistent with the reports, records, and accounts called for in paragraph (e) of this section.

§ 1701.9 *Retroactive contributions.* The FCDA, upon the enactment by the Congress of appropriations for contributions, shall after FCDA requirements are met, make retroactive contributions for civil defense equipment contracted for by the State (or political subdivision, if applicable) after the date of such appropriation enactment.

These regulations shall take effect October 15, 1952.

J. J. WADSWORTH,
Acting Administrator Federal Civil Defense Administration.

[F. R. Doc. 52-11225; Filed, Oct. 14, 1952; 8:55 a. m.]

TITLE 32A—NATIONAL DEFENSE, APPENDIX

Chapter III—Office of Price Stabilization, Economic Stabilization Agency

[Ceiling Price Regulation 174]

CPR 174—PREPARED CONCRETE REINFORCING BARS AND REINFORCEMENT MATERIALS

Pursuant to the Defense Production Act of 1950, as amended, Executive Order 10161, and Economic Stabilization Agency General Order No. 2, this Ceiling Price Regulation 174 as hereby issued.

STATEMENT OF CONSIDERATIONS

This regulation establishes ceiling prices for independent sellers of prepared concrete reinforcing bars and reinforcement materials. This regulation also establishes ceiling prices for mill affiliates who sell prepared concrete reinforcing bars in direct competition with independent sellers.

Description of the industry. There are about 150 firms engaged in the selling of prepared reinforcing bars. In the year 1951, they shipped approximately 1,382,500 tons of prepared concrete reinforcing bars. About 130 firms are independent preparers as defined in this regulation. A few are resellers (as defined in this regulation) and the balance are mill affiliates. This regulation sets forth provisions for the calculation of ceiling prices for each of these groups of sellers.

Concrete reinforcing bars are generally rolled in only ten standard sizes ranging from ¼ inch to 1¼ inch diameter. These bars are deformed in rolling at the producing mill in such a manner that they can be used only as reinforcement for concrete.

These bars are shipped from the mill to the persons covered by this regulation,

who warehouse these bars and resell them. The cost of the concrete reinforcing bars from the mill accounts for over 70 percent of the resale price. Extras, transportation costs, and the preparer's markup have historically accounted for the balance of the resale price. Only simple bending and cutting operations are performed by these preparers on these bars for which extras are charged. These operations are quite similar to those of the warehousers of iron and steel products.

Pricing techniques of the regulation. In view of the similarity of the operations of sellers of prepared reinforcing bars and materials to those of warehousers of iron and steel products, and the established trade practice of computing prices by the addition of a markup to acquisition costs, the pricing techniques used in this regulation generally follow those embodied in Ceiling Price Regulation (CPR) 98 (Resellers of Iron and Steel Products), and reflect customary practices of the industry. Two methods are set forth in this regulation for computing the ceiling prices of prepared concrete reinforcing bars. One method is to be used by preparers, classified in this regulation as "independent preparers", who purchase their reinforcing bars, and by preparing divisions of those producing mills which customarily published, as of January 25, 1951, a base price for sales of concrete reinforcing bars to preparers. They are required to compute new ceiling prices monthly (the ceiling prices being effective from the 15th day of one month through the 14th day of the following month), to reflect the current cost of their bars. Such a preparer's ceiling price is the sum of the cost to him of the hot rolled reinforcing bars which he receives, his inbound and outgoing transportation costs, extras, and his markup. His cost of bars and the inbound transportation cost of these bars must be computed each month, and is based on the invoices of such bars received during the preceding calendar month. The cost of his bars includes only the cost of hot rolled concrete reinforcing bars, since less than 2 percent of bars sold are cold rolled bars and these are used only in the preparation of spirals. Historically, the cost of these cold rolled bars is $1.00 per 100 pounds more than hot rolled bars. However, since the recognition of this difference in the monthly base period would unduly complicate the computation of that figure, it has been reflected by making the extra for spirals made from cold rolled bars $1.00 per 100 pounds more than those made from hot rolled bars.

Investigation of the prices of these sellers during the pre-Korea period indicates that they had no customary markup and that, therefore, the provisions of section 402 (k) (the Herlong Amendment) of the Defense Production Act of 1950, as amended, are not applicable. A survey of the prices of about 60 percent of this industry, however, reveals an average markup on the cost of their bars of 33 percent in May–June 1950 which is considered a representative period. This markup is generally fair and equitable and this regulation permits independent preparers a markup of 33 percent of their cost of the bars.

The second method of computing ceiling prices is to be employed by "integrated preparers." These are preparers of concrete reinforcing bars who produce their own concrete reinforcing bars and who did not customarily publish, as of January 25, 1951, a base price for sales of concrete reinforcing bars to other preparers. Such a preparer's ceiling price is computed by adding outgoing transportation costs and extras to his base price in effect on January 25, 1951, adjusted to reflect the dollars-and-cents amount of any increase in the ceiling price of concrete reinforcing bars authorized by the OPS, such as the increase granted by SR 100, Revision 1 to the GCPR. Since their base prices on January 25, 1951, included their inbound transportation costs and markup, it has not been necessary to provide specifically for these factors with respect to these sellers.

Ceiling prices for reinforcement materials are computed on the basis of the preparer's formula in effect on January 25, 1951, thus continuing normal industry practice for establishing prices for these materials.

There are a few resellers or brokers who do not stock or prepare reinforcing bars, but who sell these materials in competition with preparers. These resellers customarily perform engineering and designing services and have the concrete reinforcing bars and materials prepared by the independent or integrated preparer. They normally sell these materials at the same price for which the preparers sell these materials, receiving their margin of profit by purchasing these materials from the preparers at a discount. This regulation continues this practice by establishing as their ceiling prices the ceiling prices that their supplier could charge to the reseller's purchaser.

The persons covered by this regulation must not adjust their prices in accordance with General Overriding Regulation 35, since this regulation accomplishes the intent of that regulation in setting forth methods for determining ceiling prices based on current costs of concrete reinforcing bars, and because persons under this regulation are treated as resellers and not manufacturers. Therefore, the provisions of GOR 35 do not apply to them.

The ceiling prices established by this regulation are not expected to change appreciably the level of prices for these products.

Findings. In the judgment of the Director of Price Stabilization the provisions of this ceiling price regulation are generally fair and equitable and are necessary to effectuate the purpose of the Defense Production Act of 1950, as amended.

So far as practicable, the Director has given due consideration to the national effort to achieve maximum production in furtherance of the objectives of the Defense Production Act of 1950, as amended, and to relevant factors of general applicability. In the judgment of the Director the provisions of this regulation comply with all the requirements with respect to the establishment of ceiling prices set forth in the Defense Production Act of 1950, as amended.

In formulating this regulation the Director consulted with industry representatives, including trade association representatives, and has given full consideration to their recommendations.

In particular the Director has consulted at several meetings with the Industry Advisory Committee with respect to the trade practices as affected by the pricing techniques and with respect to the coverage of this regulation and has in general adopted the recommendations of the committee.

The provisions of this ceiling price regulation and their effect upon business practices, cost practices, or means or aids to distribution in the industry have been considered. It is believed that no changes in such practices or methods have been effected. To the extent, however, that the provisions of this regulation may operate to compel changes in such practices or methods, such provisions are necessary to prevent circumvention or evasion of the regulation and effectuate the policies of the Act.

REGULATORY PROVISIONS

Sec.
1. Coverage of this regulation.
2. General pricing provisions.
3. Ceiling prices for prepared concrete reinforcing bars sold by independent preparers.
4. Ceiling prices for prepared concrete reinforcing bars sold by integrated preparers.
5. Ceiling prices for preparers of reinforcement materials.
6. Special provisions for average price and lump sum bids and contracts.
7. Ceiling prices for resellers.
8. Customary price differentials.
9. Application for establishment of ceiling prices.
10. Petitions for amendment.
11. Adjustable pricing.
12. How to treat taxes.
13. Transfers of business.
14. Record keeping requirements.
15. Interpretations.
16. Prohibitions.
17. Prices lower than ceilings.
18. Evasions.
19. Supplementary Regulations.
20. Definitions.

AUTHORITY: Sections 1 to 20 issued under sec. 704, 64 Stat. 816, as amended; 50 U. S. C. App. Sup. 2154. Interpret or apply Title IV, 64 Stat. 803, as amended; 50 U. S. C. App. Sup. 2101–2110. E. O. 10161, Sept. 9, 1950, 15 F. R. 6105; 3 CFR, 1950 Supp.

SECTION 1. *Coverage of this regulation*—(a) *Persons covered.* This regulation applies to preparers of prepared concrete reinforcing bars or concrete reinforcement materials, and to resellers of such products (as defined in section 20). It also applies, insofar as his purchases are concerned, to any person who, in the regular course of trade or business, buys any of the products covered by this regulation from a preparer or reseller.

(b) *Products and transactions covered.* This regulation applies to all your sales of prepared concrete reinforcing bars and reinforcement materials, other than those listed in paragraph (c) of this section, including export sales and sales for export.

(c) *Products and transactions not covered.* This regulation does not apply to the following transactions:

(1) Sales of concrete reinforcing bars and reinforcement materials for delivery from a warehouse operated separately from a preparing plant. The ceiling prices for such sales are determined in accordance with Ceiling Price Regulation 98.

(2) If you so elect, sales and deliveries of prepared concrete reinforcing bars and reinforcement materials made pursuant to written contracts entered into prior to the issuance of this regulation. Any such transactions which you elect not to price under this regulation are covered by the General Ceiling Price Regulation. If you elect to determine your ceiling prices for any such transaction under the General Ceiling Price Regulation, you must determine your ceiling prices for all such transactions under that regulation.

(d) *Geographical applicability.* This regulation applies in the 48 states of the United States, the District of Columbia, Alaska, Hawaii, Puerto Rico, and the Virgin Islands.

SEC. 2. *General pricing provisions*—(a) *General description.* Section 3 sets forth the method for computing the ceiling prices for prepared concrete reinforcing bars sold by independent preparers. Section 4 sets forth the method for computing ceiling prices for prepared concrete reinforcing bars sold by integrated preparers. Section 5 sets forth methods for establishing ceiling prices for reinforcement materials. Special provisions for average price and lump sum contracts are set forth in section 6. If you are a reseller covered by this regulation, you must determine your ceiling prices in accordance with section 7. (For the definitions of these various types of sellers, see section 20).

You may not include in any cost computation under this regulation the amount by which the price you pay for any product or service exceeds the ceiling prices established under the applicable OPS ceiling price regulation.

(b) *Separate plants.* If you sell prepared concrete reinforcing bars or reinforcement materials in more than one plant, you must determine ceiling prices for each plant separately.

SEC. 3. *Ceiling prices for prepared concrete reinforcing bars sold by independent preparers*—(a) *General provisions.* (1) If you are an independent preparer you compute your ceiling price monthly. This ceiling price will be effective from the 15th day of the month through the 14th day of the following month. Your ceiling price for prepared concrete reinforcing bars is the sum of your monthly base cost, markup, average inbound transportation cost, applicable extras, and outgoing transportation cost, if any. You determine each of these factors in accordance with the provisions of this section.

(2) In computing your cost of hot rolled concrete bars invoiced to you, you follow the directions set forth in this subparagraph:

(i) If you buy concrete reinforcing bars from a domestic supplier (other than your own mill), you use the base price shown on the invoice.

(ii) If you obtain concrete reinforcing bars from your own mill, you use your published base price for sales of concrete reinforcing bars to other preparers of prepared concrete reinforcing bars on the date you receive the invoice.

(iii) If you buy concrete reinforcing bars from an importer, you use the cost for these bars shown on the invoice but excluding transportation charges, and taxes (other than import duties).

(iv) In the case of concrete reinforcing bars with respect to which you are an importer, you use the ceiling price which would be applicable to such bars under Ceiling Price Regulation 31 on the date you receive the invoice for them, if you had sold these bars on that date, less any transportation charges and taxes (other than import duties) paid or incurred by you.

(v) In the case of conversion steel concrete reinforcing bars made from domestic steel, you use your acquisition cost, excluding extras, transportation charges, and taxes, as shown on any invoices applying to these bars. You may not, however, use an amount in excess of 200 percent of the base price for concrete reinforcing bars obtained from your normal source of supply. "Normal source of supply" means the domestic producing mill from which you received the greatest tonnage of concrete reinforcing bars during the first 6 months in 1952.

(vi) In the case of conversion steel concrete reinforcing bars made from imported steel, you must apply by registered mail, return receipt requested, to the Industrial Materials and Manufactured Goods Division, Office of Price Stabilization, Washington 25, D. C., for the establishment of a cost. Your application, signed by an authorized person, must contain the following information: your trade name and address; the nature of your business such as indicated in section 1 (a); an itemized statement of the conversion costs; a description of the material to be converted (billets, axles, etc); the country of origin; the port of entry; and such other information as you may deem pertinent.

(3) You may round the sum of your applicable monthly base cost, markup, and average inbound transportation charges, so that it will be expressed in the nearest cent or fraction of a cent you normally employ. Such rounding must be made in accordance with your customary practice, and if you elect to round for any month you must round for all subsequent months.

(b) *Monthly base cost*—(1) *First month.* Your base cost for sales of prepared concrete reinforcing bars from the 15th day of the month in which this regulation becomes effective through the 14th day of the following month, is the average cost, per 100 pounds, as your inventory of hot rolled concrete reinforcing bars (as shown by inventory records or physical count) on the first day of the month in which this regulation becomes effective. You determine this average cost as follows:

(i) Take as many of the invoices last received prior to the first day of the month in which this regulation becomes effective as are necessary to cover the weight of the hot rolled bars in your inventory. To cover the exact weight of these bars, you may split the earliest invoice, if necessary.

(ii) Find the total cost (determined in accordance with the provisions of Section 3 (a) (2)) of this inventory as shown on these invoices.

(iii) Divide the figure obtained in (ii) above by the weight of your inventory of hot rolled bars, in pounds, on hand on the first day of the month in which this regulation becomes effective.

(iv) Multiply the figure obtained in (iii) above by 100. This is your monthly base cost per one hundred pounds, from the 15th day of the month in which this regulation becomes effective through the 14th day of the following month.

EXAMPLE: Assume that this regulation becomes effective on October 1. On October 1, you had 1,000 tons of hot rolled concrete reinforcing bars in your inventory. The four invoices last received prior to October 1 covered this quantity. You determine your monthly base cost for this first monthly period as follows:

INVOICES RECEIVED		
Sept. 30: 400 tons	400 tons at $4.00/cwt.	$32,000
" 25: 400 tons	400 tons at $4.20/cwt.	33,600
" 19: 150 tons	150 tons at $4.10/cwt.	12,300
" 14: 50 tons	50 tons at $4.00/cwt.	4,000
Total: 1,000 tons		$81,900

1,000 tons = 2,000,000 pounds.

Monthly base cost is $\frac{\$81,900}{2,000,000} \times 100 = \$4.10/\text{cwt.}$

(2) *Succeeding months.* In general, the monthly base cost for each monthly period (the 15th day of the month to the 14th day of the following month) following the first monthly period is the monthly base cost of the inventory of hot rolled concrete reinforcing bars on hand on the first day of the preceding calendar month, adjusted to reflect receipts and shipments of hot rolled concrete reinforcing bars during that calendar month. You determine the monthly base cost for each monthly period following the first monthly period in the following manner:

(i) Multiply the weight of the inventory of hot rolled concrete reinforcing bars you had on hand on the first day of the preceding calendar month by the preceding monthly base cost.

(ii) Add to the figure obtained in (i) above the total cost (determined in accordance with the provisions of section 3 (a) (2)) of hot rolled concrete reinforcing bars invoiced to you during the preceding calendar month regardless of when the bars were actually shipped or received.

(iii) Multiply the weight of the prepared hot rolled concrete reinforcing bars which you shipped during the preceding calendar month by the preceding monthly base cost.

(iv) Subtract the figure obtained in (iii) from that obtained in (ii).

(v) Take the weight of the hot rolled bars in your inventory on hand on the first day of the preceding calendar month and add the weight of such bars as shown on the invoices received by you during the preceding month.

(vi) Subtract from the figure obtained in (v) above, the weight of these prepared hot rolled concrete reinforcing bars which you shipped during the preceding calendar month. You express this figure in pounds.

(vii) You divide the figure obtained in (iv) above by the figure obtained in (vi) above and multiply this result by 100. This is your monthly base cost per 100 pounds.

EXAMPLE: Your inventory of hot rolled bars on October 1, was 1,000 tons. Your monthly base cost for October 15 through November 14, 1952, was $4.10 per hundredweight. You received 500 tons of hot rolled bars at $4.20 per hundredweight and shipped 700 tons of such bars during the month of October. Your monthly base cost, per 100 pounds from November 15 through December 14, 1952, is computed as follows:

Inventory Oct. 1	1,000 tons at $4.10/cwt.	$82,000
Invoices received in October	500 tons at $4.20/cwt.	42,000
Subtotal	1,500 tons	124,000
Shipped in October	700 tons at $4.10/cwt.	57,400
Inventory Nov. 1	800 tons	66,600

800 tons=1,600,000 pounds.
Your monthly base cost from November 15, through December 14, 1952 is $\frac{\$66,600}{1,600,000 \text{ pounds}} \times 100 = \$4.16/\text{cwt.}$

(c) *Average inbound transportation cost*—(1) *First month.* Your inbound transportation cost from the 15th day of the month in which this regulation becomes effective through the 14th day of the following month is the average inbound transportation cost per 100 pounds of your inventory of hot rolled concrete reinforcing bars on hand on the first day of the month in which this regulation becomes effective. You determine this average transportation cost in the following manner:

(i) Determine the total inbound transportation cost (including any taxes thereon) applicable to the weight of the hot rolled concrete reinforcing bars as shown on the invoices used in determining the initial monthly base cost.

(ii) Divide the figure obtained in (i) by the weight, expressed in pounds, of such inventory of hot rolled bars as determined in subparagraph (b) (1) of this section.

(iii) Multiply the result obtained in (ii) above by 100. This is your average inbound transportation cost per 100 pounds, from the 15th day of the month in which this regulation becomes effective through the 14th day of the following month.

EXAMPLE: Assume this regulation becomes effective on October 1. On October 1, you had 1,000 tons of hot rolled reinforcing bars in your inventory. The four invoices last received prior to October 1 covered this quantity. You determine your average inbound transportation cost as follows:

INVOICES RECEIVED

Sept. 30: 400 tons	400 tons at $0.50/cwt.	$4,000
" 25: 400 tons	400 tons at $0.45/cwt.	3,600
" 19: 150 tons	150 tons at $0.50/cwt.	1,500
" 14: 50 tons	50 tons at $0.60/cwt.	600
1,000 tons		9,700

1,000 tons=2,000,000 pounds.
Average inbound transportation cost is $\frac{\$9,700}{2,000,000 \text{ pounds}} \times 100 = \$0.49/\text{cwt.}$

(2) *Succeeding months.* In general, your average inbound transportation for sales of concrete reinforcing bars for each monthly period (the 15th day of one month through the 14th day of the following month) following the first monthly period is determined by taking the average inbound transportation cost of your inventory on hand on the first day of the preceding month and adjusting this figure to reflect the inbound transportation cost of such bars shipped and received by you during that calendar month. You determine this cost in accordance with the provisions of this paragraph.

(i) You multiply the weight of the hot rolled concrete reinforcing bars on hand on the first day of the preceding month by the preceding monthly average inbound transportation cost.

(ii) Add the figure obtained in (i) above to the total inbound transportation cost of hot rolled concrete reinforcing bars invoiced to you during the preceding calendar month, regardless of when such bars are shipped or received. If the bills for transportation charges for any invoice are not available as of the time you compute you costs, you must calculate the applicable transportation charge for the material covered by the invoice by using the published carrier rate (including taxes) for transporting the product involved from the shipping point shown on the invoice to your plant or plants. In making this calculation you must use the rate for the kind of transportation by which the material is transported to your warehouse (e. g., railroad, truck or barge) in effect at the time you are computing your ceiling price.

(iii) Multiply the weight of such bars which you shipped during the preceding calendar month by the average inbound transportation cost you used for the preceding monthly period.

(iv) Subtract the figure obtained in (iii) from that obtained in (ii).

(v) Take the weight of such bars on hand at the end of the preceding calendar month as determined under subparagraph (b) (2) (vi) above.

(vi) Divide the figure obtained in (iv) by that obtained in (v) and multiply the result by 100. This is your average inbound transportation cost per 100 pounds.

EXAMPLE: Assume that this regulation becomes effective on October 1, 1952, and that your average inbound transportation cost from October 15 to November 14, 1952 is $0.49 per hundredweight. Your inventory of hot rolled bars on October 1 is 1,000 tons. You received 500 tons during October on which the transportation cost was $0.60 per hundredweight. You shipped 700 tons of bars during October. Your average inbound transportation cost from November 15 to December 14, 1952 is computed as follows:

Invoice Oct. 1	1,000 tons at $0.49/cwt.	$9,800
Received October	500 tons at $0.60/cwt.	6,000
	1,500 tons	15,800
Shipped Nov. 1	700 tons at $0.49/cwt.	6,860
	800 tons	8,940

800 tons=1,600,000 pounds.
Average transportation cost is $\frac{\$8,940}{1,600,000 \text{ pounds}} \times 100 = \$0.56/\text{cwt.}$

(d) *Markup.* You may include in your ceiling price a markup of 33 percent of your monthly base cost as determined in accordance with paragraph (b) of this section.

(e) *Extras.* You may include in your ceiling price the extras set forth in this paragraph.

(1) *Size extra.* You determine the size extra by multiplying the applicable amount in Table A by the weight of each size furnished by you.

TABLE A

Deformed bars	Plain bars, nominal size	Per hundredweight
No. 2	¼" rd	$1.90
No. 3	⅜" rd	.80
No. 4	½" rd	.50
No. 5	⅝" rd	.25
No. 6	¾" rd	.15
No. 7	⅞" rd	.15
No. 8	1" rd	.10
No. 9		.10
No. 10		.10
No. 11		.00
1½" square		.15
2" square		

(2) *Quantity extra.* You determine the quantity extra by multiplying the applicable amount set forth in Table B by the total weight of the prepared concrete reinforcing bars furnished by you pursuant to each sale or contract except:

(i) If spirals or reinforcement materials are furnished by you in connection with a sale or contract, a quantity extra may be determined separately for the spirals and for the reinforcement materials so furnished.

(ii) If a purchaser increases the quantity of prepared concrete reinforcing bars to be delivered pursuant to a particular contract, you may determine the extra for such additional quantity as if it were furnished pursuant to a new contract.

TABLE B

Quantity bracket	Per cwt.	But not to exceed a total of—
For less than 1,000 pounds	$0.90	$6.50
For 1,000 but less than 2,000 pounds	.65	10.00
For 2,000 but less than 10,000 pounds	.50	40.00
For 10,000 but less than 40,000 pounds	.40	160.00

(3) *Bending extras.* You determine the bending extra by multiplying the applicable amount in Table C by the weight of prepared concrete reinforcing bars, except spirals, on which you perform the bending service.

TABLE C

	Per cwt.
Light bending	$2.00

This includes bending all No. 2 and No. 3 bars; No. 4 bars or larger bent as stirrups and column ties; bars of any size bent at more than 6 points; bars bent in more than one place; bars bent to more than one radius or a combination of radius and pin bending.

Heavy bending	.50

This includes No. 4 bars and larger bent at not more than 6 points; single radius bending; all other bending not included in light bending.

(4) *Engineering extra.* You determine the engineering extra by multiplying the applicable amount set forth in Table D by the total weight of the prepared concrete reinforcing bars furnished by you pursuant to each sale or contract except:

(i) An extra for listing may not be charged where an extra for detailing is applicable;

(ii) A minimum extra of $20 for designing and detailing may be included in determining your ceiling price for any one sale or contract;

(iii) If a purchaser increases the quantity of prepared concrete reinforcing bars to be delivered pursuant to a particular contract, you may determine the extra for detailing for such additional quantity just as if it were furnished pursuant to a new contract.

TABLE D

	Per cwt.	But not to exceed a total of—
Designing (not including detailing and listing)	$0.60	
Detailing (preparation of placing plans and bills of material from designs furnished by others):		
For less than 10,000 pounds	.85	$70
For 10,000 pounds, but less than 40,000 pounds	.70	240
For 40,000 pounds, but less than 400,000 pounds	.60	2,000
For 400,000 pounds, but less than 1,000,000 pounds	.50	4,500
1,000,000 pounds or more	.45	
Listing only (preparation of shop material lists from detailed placing plans furnished by others)	.15	

(5) *Spiral Extras.* You determine the extra for spirals by multiplying the applicable amount set forth in Table E by the weight of all concrete reinforcing bars which are prepared into spirals.

TABLE E

	Per cwt.
For unassembled spirals prepared from hot rolled wire or rods	$1.75
For shop assembled spirals prepared from hot rolled wire or rods	2.25
For unassembled spirals prepared from cold drawn wire or rods	2.75
For shop assembled spirals prepared from cold drawn wire or rods	3.25

(6) *Square cut end extra.* You determine the extra for square cut ends by multiplying the applicable amount set forth in Table F by the number of ends of prepared concrete reinforcing bars resulting from this cutting service.

TABLE F

	Per end
When cut is made by means other than sawing or milling	$0.05
When cut is made by sawing or milling	.15

(7) *Restrictive specification extras.* You determine the extras for restrictive specifications by multiplying the applicable amount set forth in Table G, by the weight of prepared concrete reinforcing bars to which such restrictive specifications are applicable.

TABLE G

	Per cwt.
When a tensile range more restrictive than the applicable A. S. T. M. specification range for the specified grade is required and the reduction in such range does not exceed 5,000 pounds per square inch	$0.05
When a weight tolerance more restrictive than the applicable A. S. T. M. specification is required, but in no case more restrictive than 2½ percent over or under the specification	.10

(8) *Galvanizing extras.* The extra for galvanizing may not exceed the sum of:

(i) The price paid by you for the service of galvanizing;

(ii) A markup of 20 percent of such price; and

(iii) Any transportation costs incurred by you in procuring such galvanizing.

(9) *Less than carload extras.* If the quantity of prepared concrete reinforcing bars specified in a sale or contract made by you is less than a rail carload, you may include, in determining your ceiling price for such sale of contract, an amount equal to the difference between the lowest established less than carload and lowest established carload rail rate of freight in effect on the date you made shipment, for transporting concrete reinforcing bars from your nearest regular source of supply to your plant. "Regular source of supply", means the producing mill from which you received at your plant, during the calendar quarter preceding the date on which you make shipment, invoices covering the largest quantity of hot rolled concrete reinforcing bars invoiced to the plant during the quarter.

(10) *Special packing extra.* If you are required to furnish special packing for prepared concrete reinforcing bars to be transported in ocean going vessels, you may include, in determining your ceiling prices, an extra of 25 cents per 100 pounds for all such bars so packed.

(f) *Outgoing transportation costs.* If you pay or incur costs (including delivery in your own trucks) for transportation from your plant to the purchaser's receiving point, you may include in your ceiling price a charge for transportation. This charge must be determined in accordance with the following provisions but need not be less than $5.00 for each sale, contract or delivery.

(1) Where a delivery is made entirely by truck from your plant to a puchaser's receiving point within the metropolitan area in which your plant is located, and there is no established line haul railroad charge for transporting concrete reinforcing bars between your plant and the rail siding nearest such receiving point, you may include 30 cents per 100 pounds for deliveries to points located in metropolitan New York, 20 cents per 100 pounds for deliveries to points located in metropolitan Chicago, or 15 cents per 100 pounds for deliveries to points located elsewhere.

(2) Where delivery is made by truck and there is an established line haul railroad charge between your plant and the rail siding nearest the purchaser's receiving point, you may include a charge equal to the lowest applicable established line haul rail charge (including taxes) for transporting the prepared concrete reinforcing material from your plant to the rail siding nearest the purchaser's receiving point plus the applicable amount set forth in subparagraph (1) of this paragraph.

(3) Where a delivery is made by rail, you may include a charge equal to the lowest applicable established line haul rail charge (including taxes) for transporting the prepared concrete reinforcing material from your plant to the rail siding nearest the purchaser's receiving point. In addition to this charge, you may include the amount set forth in subparagraph (1) above where a delivery is made by truck from this nearest rail siding to the purchaser's receiving point.

(4) Where a delivery is made in whole or in part by water, you may include a charge based on the lowest established water, or rail and water rate or rates (including taxes, dock handling, and insurance) applicable to the transportation of the quantity of prepared concrete reinforcing bars from your plant to the landing point or rail siding nearest the purchaser's receiving point. Where delivery is made by truck from such landing point or rail siding to the purchaser's receiving point, you may also add the amount set forth in subparagraph (1) above.

SEC. 4. *Ceiling prices for prepared concrete reinforcing bars sold by integrated preparers*—(a) *General provisions.* If you are an integrated preparer of prepared concrete reinforcing bars, your ceiling price is the sum of your base cost, outgoing transportation costs, and applicable extras.

(b) *Base cost.* If you are an integrated preparer, you must determine your base cost in accordance with the following provisions.

(1) Your base cost is the price determined by the first of the following you are able to use, adjusted in accordance with subparagraph (2) below.

(i) The base price, per one hundred pounds, specified in any authorization issued by OPS prior to the issuance of this regulation, permitting you to change your pricing method;

(ii) The base price, per one hundred pounds, for prepared concrete reinforcing bars set forth in a price list in effect on January 25, 1951, and distributed by you to your customers;

(iii) The base price, per 100 pounds, for prepared concrete reinforcing bars set forth in any document distributed by you to your employees for use in making bids or quotations and in effect on January 25, 1951;

(iv) The highest base price, per 100 pounds, at which you contracted in writing during the period December 19, 1950, January 25, 1951, inclusive, to sell prepared concrete reinforcing bars;

(v) The highest base price, per 100 pounds at which you made an offer in writing during the period December 19, 1950, to January 25, 1951, inclusive, to sell prepared concrete reinforcing bars.

(2) You may add to the amount determined under subparagraph (1) above, the dollars and cents amount of the increase authorized by any regulatory order issued by OPS after January 25, 1951, in the ceiling price of concrete reinforcing bars sold by producers of these bars. This increase may be made effective on the first day of the calendar month following that in which the increase is authorized.

(c) *Extras.* You may include all applicable extras set forth in section 3 (e) of this regulation, except the less than carload extra.

(d) *Outgoing transportation costs.* If you pay or incur costs (including delivery in your own trucks) for transportation from your plant to the purchaser's receiving point, you may include in your ceiling prices a charge determined in accordance with section 3 (f) of this regulation.

SEC. 5. *Ceiling prices for preparers of reinforcement materials.* (a) If you are a seller of reinforcement materials, your ceiling price for any such material is the price determined in accordance with the formula you had in effect on January 25, 1951, for pricing the same kind of material. You must apply such formula in accordance with the following provisions:

(1) You must apply your formula in exactly the same manner as you would have on January 25, 1951, and you must not include any pricing factors which you would not have included on that date.

(2) You must use your base cost; markup, if any; average inbound transportation cost, if any; applicable extras; and applicable outgoing transportation charges, if any, all as established in Section 3 or 4, whichever is applicable, for the concrete reinforcing bars used in the material you are pricing.

(3) You must use the same dollar and cents amount for any other pricing factors which you had in effect on January 25, 1951. If any such factor was set forth in percent, you must use the same percent for such factor.

SEC. 6. *Special provisions for average price and lump sum bids and contracts—*(a) *Bids.* In submitting bids with respect to average price and lump sum contracts, you may quote on the basis of the ceiling price in effect at the time you submit your bid and estimates of the quantity of prepared concrete reinforcing bars, and reinforcement materials required. Such estimates must be made in accordance with your customary practice and in carrying out any such contracts entered into by you, you may invoice and collect periodically in accordance with your customary practice on the basis of the amount specified in the contract. The total amount collected by you in connection with such contracts, however, must not exceed the amount provided for in paragraph (b) of this section and you must make the adjustments required therein.

(b) *Total charges.* (1) If the total amount specified in an average price or lump sum contract entered into by you does not exceed 102½ percent of the aggregate of the ceiling prices in effect at the time of shipment of the prepared concrete reinforcing bars and reinforcement materials delivered by you pursuant to such contract, you may charge the contract price. If the total amount specified in an average price or lump sum contract entered into by you is not less than 97½ percent of the aggregate of the ceiling prices in effect at the time of shipment for the prepared concrete reinforcing bars and reinforcement material delivered by you pursuant to such contract, you must not charge more than the contract price.

EXAMPLE: Assume that you contract to deliver prepared concrete reinforcing bars and reinforcing materials for a specified project for $102,500. Delivery is made over a 3-month period, and the aggregate of your ceiling prices for all material delivered amounts to $100,000. You may charge $102,500.

EXAMPLE: Assume that you contract to deliver prepared concrete reinforcing bars and reinforcement material for a specified project at a price of $98,000. Delivery is made over a period of 3 months and the aggregate of your ceiling prices for all material delivered is $100,000. You may not charge more than $98,000.

(2) If the total amount specified in an average price or lump sum contract entered into by you exceeds 102½ percent of the aggregate of the ceiling prices in effect at the time of shipment for the prepared concrete reinforcing bars and reinforcement material delivered by you pursuant to such contract, you may not charge more than such aggregate plus 2½ percent thereof. Within 60 days after the completion of any such contract, you must submit to the purchaser a statement setting forth the ceiling prices applicable to the prepared concrete reinforcing bars and reinforcement material delivered by you pursuant to such contract and the quantity shipped during the period in which each such price was in effect. You must refund the amount, if any, by which the total amount received by you pursuant to the contract exceeds the aggregate of such ceiling prices plus 2½ percent thereof. If the total amount specified in an average price or lump sum contract entered into by you is less than 97½ percent of the aggregate of the ceiling prices in effect at the time of shipment for the prepared concrete reinforcing bars and reinforcement material delivered by you pursuant to such contract, you may charge 97½ percent of the aggregate of the ceiling prices.

EXAMPLE: Assume that you contract to deliver prepared concrete reinforcing bars and reinforcement materials for a specified project for $105,000. Delivery is made over a period of 3 months and the aggregate of your ceiling prices for all material delivered amounts to $100,000. You may not charge more than $102,500 and must submit the required statement and make any necessary refund within the period specified.

EXAMPLE: Assume that you contract to deliver prepared concrete reinforcing bars and reinforcement materials for a specified project for $100,000. Delivery is made over a period of 3 months and the aggregate of your ceiling prices for all materials delivered is $105,000. You may charge 97½ percent of $105,000 which is $102,375.

SEC. 7. *Ceiling prices for resellers.* If you are a reseller of prepared concrete reinforcing bars or reinforcement materials, your ceiling price is the ceiling price which your supplier might charge under this regulation for the sale of the same material to your purchaser.

SEC. 8. *Customary price differentials.* You must adjust the ceiling prices determined under this regulation to reflect the class of purchaser differentials, special customer discounts, cash discounts, and other terms and conditions of sale that you had in effect on January 25, 1951.

SEC. 9. *Application for establishment of ceiling prices.* (a) If for any reason you cannot determine a ceiling price under the provisions of this regulation, you must apply to the Office of Price Stabilization, Washington 25, D. C., for the establishment of a ceiling price or pricing formula.

(1) Any application made pursuant to this section must be signed by an authorized person, must be made by registered mail, return receipt requested, and must contain the following information: Your trade name and address; the location of your plant or plants, from which delivery is to be made; the specifications of the product you propose to sell; a statement of the reason why you cannot determine a ceiling price under this regulation; a proposed ceiling price and why you believe it is in line with the ceiling prices otherwise established by this regulation, or a proposed pricing formula; and a statement setting forth the extras you used in determining such pricing formula.

(2) Any ceiling price established by the Office of Price Stabilization pursuant to this section will be in line with the ceiling prices otherwise established in this regulation.

(3) After receipt of an application pursuant to this section, the Office of Price Stabilization may approve or disapprove your proposed ceiling price or pricing formula, establish a different ceiling price or pricing formula, or request additional information. Pending any such action, you may sell the product covered by your application at your proposed ceiling price provided that you agree in writing with the purchaser to refund the amount, if any, by which such price exceeds the ceiling price established by the Office of Price Stabilization. If the Office of Price Stabilization has not acted upon your application within 30 days of the receipt thereof, your proposed ceiling price shall be deemed to be established for all deliveries made between the date of filing your application and the date of any order issued by the Office of Price Stabilization disposing of your application.

(b) If you are required to file an application pursuant to paragraph (a) of this section and do not do so, the Office of Price Stabilization may issue an order establishing a ceiling price or pricing formula for you. Any ceiling price set forth in any such order will be in line with the ceiling prices otherwise established in this regulation, and will apply to all deliveries for which a ceiling price was not otherwise properly established in this regulation, including deliveries completed prior to the date of the order. The issuance of such an order will not relieve you of your obligation to comply with the requirements of this regulation or of the various penalties for your failure to do so.

SEC. 10. *Petitions for amendment.* Any person who wishes to have this regulation amended may file a petition for amendment in accordance with Price Procedural Regulation 1, Revised.

SEC. 11. *Adjustable pricing.* Nothing in this regulation shall be construed to prohibit any person making a contract or offer to sell a product covered by this

regulation at (a) the ceiling price in effect at time of delivery or (b) the lower of a fixed price or the ceiling price in effect at time of delivery. No person, however, may deliver or agree to deliver such product at a price to be adjusted upward in accordance with any increase in a ceiling price after delivery.

SEC. 12. *How to treat taxes.* The ceiling prices determined under the provisions of this regulation are your ceiling prices exclusive of taxes. If a tax on a particular sale or delivery, such as a sales tax or a compensating use tax is imposed and the tax law permits the tax to be stated separately and passed on to your customers, you may charge or collect the tax on the sale or delivery of the product in addition to the ceiling price, provided you state the tax separately. However, if the tax was in effect on January 25, 1951, and you did not charge your customers for the tax on that date, you may not do so now.

SEC. 13. *Transfers of business.* If the business or assets of a preparer are sold after the issuance date of this regulation, and the transferee carries on the sale of proposed concrete reinforcing bars in the plant or plants, included in such transfer, the ceiling price of the transferee for prepared concrete reinforcing bars produced in such plant or plants, shall be the same as those to which his transferor would have been subject if no transfer had taken place an his obligation to keep records sufficient to verify such prices shall be the same. The transferor shall either preserve and make available, or turn over to the transferee all records of the transactions prior to the transfer which are necessary to enable the transferee to comply with the provisions of this regulation.

SEC. 14. *Record keeping requirements.* (a) You must prepare and preserve for the life of the Defense Production Act of 1950, as amended, and for two years thereafter, all records necessary to determine whether you have computed your ceiling prices correctly, including, but not limited to records showing:

(1) Your formula in effect on January 25, 1951, for pricing reinforcement materials;

(2) Your class of purchaser differentials and terms of sale in effect on January 25, 1951; and

(3) Your calculations of your monthly base cost, including the invoices and freight bills on which such calculations are based.

(b) Every person making a sale of prepared concrete reinforcing bars or reinforcement materials covered by this regulation must keep for inspection by the Office of Price Stabilization, for a period of 2 years after each sale, accurate records or invoices of each such sale showing: the date thereof; the name and address of the seller and buyer; a description of the prepared concrete reinforcing bars or reinforcement material sold including, but not limited to, size and quantity of the product sold, and extras, if any; the point of shipment; the monthly base cost or the base cost charged; the average inbound transportation cost; the extras, if any, charged; the terms of sale; and the outgoing transportation charges, if any, by whom they were paid, the name of the carrier and the method of transportation (e. g. rail, water or truck).

SEC. 15. *Interpretations.* If you have any doubt as to the meaning of this regulation, you should write to the Regional Counsel of the proper OPS Regional Office or to the Division Counsel, Industrial Materials and Manufactured Goods Division, Washington 25, D. C., for an interpretation. Any action taken by you in reliance upon and in conformity with a written official interpretation will constitute action in good faith pursuant to this regulation. Further information on obtaining official interpretation is contained in Price Procedural Regulation 1, Revised.

SEC. 16. *Prohibitions.* (a) You shall not do any act prohibited or omit to do any act required by this regulation, nor shall you offer, solicit, attempt, or agree to do or omit to do any such acts. Specifically (but not in limitation of the above), you shall not, regardless of any contract or other obligation, sell or deliver, and no person in the regular course of trade or business shall buy or receive from you at a price higher than the ceiling price established by this regulation, and you shall keep, make and preserve true and accurate records and reports, required by this regulation. If you violate any provisions of this regulation, you are subject to criminal penalties, enforcement action, and action for damages.

SEC. 17. *Prices lower than ceilings.* Prices lower than the ceiling prices established in this regulation may be demanded, charged, paid, or offered.

SEC. 18. *Evasions.* Any means or device which results in obtaining indirectly a higher price than is permitted by this regulation or in concealing or falsely representing information as to which this regulation requires records to be kept is a violation of this regulation. This prohibition includes, but is not limited to, means or devices making use of commissions, services, cross sales, transportation arrangements, premiums, discounts, special privileges, up-grading, tie-in agreements and trade understandings, as well as the omission from records of true data and the inclusion in records of false data.

SEC. 19. *Supplementary regulations.* The Director of Price Stabilization may issue supplementary regulations modifying or supplementing this regulation as he deems appropriate.

SEC. 20. *Definitions.* When used in this regulation, the term: (a) "Class of purchaser" refers to your practice of charging different prices for sales to different purchasers or kinds of purchasers. Such practice may be based on the characteristics or distributive level of the buyer (for instance, government agency, public institution, broker or individual consumer), or on the location of the purchaser, or on whether the purchase was on a cash or credit basis. If you have followed the practice of charging an individual customer a price different from that charged others, that customer constitutes a separate class of purchaser.

(b) "Concrete reinforcing bars" means any plain or deformed steel bars customarily used in concrete construction, including but not limited to the following plain bars, and deformed bars made to the following specifications approved by the United States Department of Commerce, Division of Simplified Practice, Recommendation R26-50:

Deformed bars	Plain bars	Area in square inches	Perimeter (in inches)	Weight (per foot)
No. 2	¼" rd	0.05	0.785	0.167
No. 3	⅜" rd	.11	1.178	.376
No. 4	½" rd	.20	1.571	.668
No. 5	⅝" rd	.31	1.963	1.043
No. 6	¾" rd	.44	2.356	1.502
No. 7	⅞" rd	.60	2.749	2.044
No. 8	1" rd	.79	3.142	2.670
No. 9		1.00	3.544	3.400
No. 10		1.27	3.990	4.303
No. 11		1.56	4.430	5.313

and also means any plain round steel bars, rods or wire customarily used in concrete construction for the fabrication of spirals including, but not limited to, the following specifications:

Sizes	Area in square inches	Perimeter (in inches)	Weight (per foot)
¼" rd	0.05	0.785	0.178
⅜" rd	.11	1.178	.376
½" rd	.20	1.571	.668
⅝" rd	.31	1.963	1.043
¾" rd	.44	2.356	1.502
⅞" rd	.60	2.749	2.044
1" rd	.79	3.142	2.670

(c) "Independent Preparer" means a preparer who does not produce concrete reinforcing bars. It also includes preparing divisions of producing mills if such mills published as of January 25, 1951, a base price for sales of concrete reinforcing bars to other preparers.

(d) "Integrated Preparer" means a preparer who produces concrete reinforcing bars and who did not, as of January 25, 1951, publish a base price for sales of concrete reinforcing bars to other preparers. The fact that such preparer may supplement his production of concrete reinforcing bars with sizes which he does not roll does not remove him from this classification.

(e) "Person" includes an individual, corporation, partnership, association, or any other organized group of persons, or legal successor or representative of the foregoing, and includes the United States or any agency thereof, or other government or any of its political subdivisions, or any agency of the foregoing.

(f) "Preceding monthly base cost" is the monthly base cost for the monthly period preceding the monthly period for which you are computing a new monthly base cost.

(g) "Preparer" means any person who processes concrete reinforcing bars into prepared concrete reinforcing bars or reinforcement materials, and who: (1) maintains a stock of concrete reinforcing bars, (2) operates a plant or plants equipped with adequate machinery for cutting and bending of concrete rein-

forcing bars, and (3) is equipped to supply engineering service.

(h) "Prepared concrete reinforcing bars", means any concrete reinforcing bars used for concrete reinforcement which are cut to specified lengths, or are cut and bent to specified shapes or form in a manner customarily performed by preparers. The term also includes spirals. It also includes any concrete reinforcing bars in random lengths when sold by a preparer and delivered from his preparing plant.

(i) "Reinforcement material" means any material (other than prepared concrete reinforcing bars) made from concrete reinforcing bars and other materials for use as concrete reinforcement, and customarily priced by reference to a base price for concrete reinforcing bars. It includes, but is not limited to, square spirals, welded rings for concrete pipe, assemblies of concrete reinforcing bars, expansion joint (load transferring devices), and welded stirrups.

(j) "Reseller" means any person who buys prepared concrete reinforcing bars or reinforcement materials from a seller, and resells such products, whether or not he has the facilities for furnishing engineering or designing services in connection with a particular purchase and resale, and customarily does so.

(k) "Shop assembled spirals" means rods or wire coiled to specified diameter and to which spacers are attached in the preparer's plant.

(l) "Spirals" includes both unassembled and shop assembled spirals.

(m) "Unassembled spiral" means rods or wire coiled to a specific diameter without spacers attached. The term also includes unattached spacers.

(n) "You" means any preparer, reseller or buyer of prepared concrete reinforcing bars or reinforcement materials.

(o) "Metropolitan Chicago" means the area within the corporate limits of Chicago, Evanston, Oak Park, Cicero, Berwyn, River Forest, Spring Forest, Worth, Homewood, and Lansing, Illinois; the area within the township limits of Miles, Maine, Leyden, Norwood Park, Proviso, Lyons, Riverside, Stickney, Worth, Calumet, Bremen, and Thornton Townships, Cook County, Illinois; and the area within the corporate limits of Hammond, Whiting, East Chicago and Gary, Indiana.

(p) "Metropolitan New York" means the area within the five Boroughs in New York City, which are Brooklyn, Manhattan, Queens, Bronx and Richmond; and the following Counties in New Jersey: Union, Hudson, Passaic, Bergen, Essex, Morris, Middlesex and Somerset; also included are Westchester and Nassau Counties in New York State, and the towns of Huntington and Amityville in Suffolk County.

Effective date. The effective date of this regulation shall be November 1, 1952.

NOTE: All record-keeping and reporting requirements of this regulation have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

JOSEPH H. FREEHILL,
Acting Director of Price Stabilization.

OCTOBER 13, 1952.

[F. R. Doc. 52-11246; Filed, Oct. 13, 1952; 4:16 p. m.]

[Ceiling Price Regulation 12, Amdt. 3]

CPR 12—MILLED RICE

REVISION OF CEILING PRICES

Pursuant to the Defense Production Act of 1950, as amended, Executive Order 10161, and Economic Stabilization Agency General Order No. 2, this Amendment 3 to Ceiling Price Regulation 12 is hereby issued.

STATEMENT OF CONSIDERATIONS

This amendment to Ceiling Price Regulation (CPR) 12 sets new ceiling prices for the various varieties of milled head rice. This revision in ceiling prices for milled rice is made in order to reflect changes in the legal minimum price for rough rice, as determined by the Secretary of Agriculture, since the issuance of CPR 12 in March of 1951. Ceiling prices for short grain varieties of milled head rice are increased $0.25 per hundredweight. No change is made in the ceiling prices of long grain varieties of head rice, nor in the ceiling prices of broken rice.

The ceiling prices set by this amendment are issued on an interim basis. The allowances for milling costs and margin included in ceiling prices originally established under CPR 12 have been used in the revised ceiling prices. Data available to the Director indicate that these allowances may require revision. Consequently, the Director proposes to initiate a survey of milling costs and margins on an industry-wide basis in the very near future. Ceiling prices for milled rice may then be revised as indicated by the results of the survey.

In the formulation of this amendment there has been extensive consultation with industry representatives, including trade association representatives, and consideration has been given to their recommendations.

In the judgment of the Director of Price Stabilization, the provisions of this Amendments are generally fair and equitable, are necessary to effectuate the purposes of Title IV of the Defense Production Act of 1950, as amended, and comply with all applicable standards of that act.

AMENDATORY PROVISIONS

Section 4 (a) (1) of Ceiling Price Regulation 12 is amended to read as follows:

(1) For varieties of milled rice containing not less than 93 percent of whole kernels and grading U. S. No. 2, your ceiling prices are as follows:

Varieties	*Price per 100 pounds*
Group 1: Rexora, Rexark, Patna Blue Bonnet, and Nira	$12.00
Group 2: Fortuna, Edith, and Rex Nira sometimes known as RN	11.25
Group 3: Blue Rose, Arkrose, Kamrose, and Magnolia	11.00
Group 4: Prelude, Zenith, Calady, and Lady Wright	10.75
Group 5: Calrose, Pearl, Early Prolific, and all other varieties not specifically named	9.75

(Sec. 704, 64 Stat. 816, as amended; 50 U. S. C. App. Sup. 2154)

Effective date. This amendment is effective October 14, 1952.

JOSEPH H. FREEHILL,
Acting Director of Price Stabilization.

OCTOBER 14, 1952.

[F. R. Doc. 52-11261; Filed, Oct. 14, 1952; 11:08 a. m.]

[General Ceiling Price Regulation, Supplementary Regulation 63, Area Milk Price Regulation 35, Amdt. 1]

GCPR, SR 63—AREA MILK PRICE ADJUSTMENTS

AMPR 35—WILMINGTON, DELAWARE MILK MARKETING AREA

PRODUCER PRICES

Pursuant to the Defense Production Act of 1950, as amended, Executive Order 10161 (15 F. R. 6105), Economic Stabilization Agency General Order No. 2 (16 F. R. 738), Delegation of Authority No. 41 (16 F. R. 12679), and Redelegation of Authority 21 (17 F. R. 171), this area Milk Price Regulation pursuant to Supplementary Regulation 63 to the General Ceiling Price Regulation (16 F. R. 9559) is hereby issued.

STATEMENT OF CONSIDERATIONS

The purpose of this amendment is to correct a typographical error appearing in section 7 (a) of the regulation wherein Class I, Grade A pasteurized milk is described as having 3.5 percent butterfat content whereas that figure should read 4.0 percent.

AMENDATORY PROVISIONS

1. Paragraph (a) of section 7 of Area Milk Price Regulation 35 issued under Supplementary Regulation 63 to the General Ceiling Price Regulation is amended by deleting the figure 3.5 and inserting in lieu thereof the figure 4.0 so that the paragraph as amended reads as follows:

SEC. 7. *Producer prices.* (a) The producer price for Class I, Grade A pasteurized milk of 4.0 per cent butterfat content, upon which the ceiling prices established under this regulation are based, is $6.12 per hundredweight.

(Sec. 704, 64 Stat. 816, as amended; 50 U. S. C. App. Sup. 2154)

Effective date. This amendment 1 to Area Milk Price Regulation 35 pursuant to Supplementary Regulation 63 to the General Ceiling Price Regulation shall become effective October 14, 1952.

WILLARD D. BOYCE,
District Director.

OCTOBER 14, 1952.

TITLE 38—PENSIONS, BONUSES, AND VETERANS' RELIEF

Chapter I—Veterans' Administration

PART 8—NATIONAL SERVICE LIFE INSURANCE

EXCHANGE OF POLICY BEARING SAME EFFECTIVE DATE AND HAVING LOWER RESERVE VALUE

Section 8.36 is revised to read as follows:

§ 8.36 *Exchange to a policy bearing the same effective date and having a lower reserve value.* National Service life insurance may be exchanged for insurance of the same amount, bearing the same date, and based on the same age, on any plan of insurance on the same reserve basis, issued by the Veterans' Administration having a lower reserve value except to the 5-year level premium term plan: *Provided*, The applicant is in good health at the time of application and furnishes evidence thereof satisfactory to the Administrator upon such forms as the Administrator shall prescribe, or otherwise as he shall require. The old policy must be in force under premium-paying conditions and must be surrendered with all rights and claims thereunder. The difference between the reserve on the old policy and the reserve on the new policy, less any indebtedness, may be used to cover payment of future premiums or withdrawn in cash at the option of the insured. If the old policy has been in force for less than 12 months, the difference in reserve may be used only for the purpose of paying future premiums on the insurance, and such premiums shall not be subject to withdrawal by the insured prior to the expiration of the first policy year.

(Sec. 608, 54 Stat. 1012, as amended, sec. 6, Public Law 23, 82d Cong.; 38 U. S. C. 808. Interpret or apply sec. 602, 54 Stat. 1009, as amended; 38 U. S. C. 802)

This regulation is effective September 22, 1952.

[SEAL] H. V. STIRLING,
Deputy Administrator.

[F. R. Doc. 52-11207; Filed, Oct. 14, 1952, 8:54 a. m.]

TITLE 47—TELECOMMUNICATION

Chapter I—Federal Communications Commission

[Docket No. 10068]

PART 1—PRACTICE AND PROCEDURE

PART 11—INDUSTRIAL RADIO SERVICES

PART 16—LAND TRANSPORTATION RADIO SERVICES

NOTICE OF ERRATA

In the matter of amendments of Parts 1, 10, 11, and 16 of the Commission's rules to eliminate obsolete forms and require the use of proposed new application Form 400 and Amendment Request Form 400-A and to make editorial changes as are necessary.

The order in the above-entitled proceeding dated September 10, 1952 should be corrected by making the following changes in the sections set forth below:

1. In § 1.319 revise paragraph (b) (Instruction 6, 17 F. R. 8511) to insert FCC Form 400-A in subparagraph (6), renumber present subparagraphs (6) through (12) as (7) through (13) respectively and correct an omission in the newly designated subparagraph (11).

§ 1.319 *Application for modification of license; broadcast and nonbroadcast.*

• • •

(b) The following application forms should be used:

• • • • • •

(6) FCC Form 400-A, "Request for Amendment of Radio Station Authorization."

• • • • • •

(11) FCC Form 503, "Application for Modification of Ship Radio Station License" Form 503 should be accompanied by FCC Form 500, submitted in triplicate, if there is to be any change in the equipment specification.

• • • • • •

2. In § 11.56 revise last sentence of paragraph (e) (2) (Instruction 28, 17 F. R. 8514) to correct a typographical error so that the sentence reads as follows: "The information necessary for Commission action on requests for Special Temporary Authority is set forth in § 11.53."

3. In § 16.56 revise first sentence of paragraph (b) (Instruction 42, 17 F. R. 8516) to delete the word "station" in the eighth line and insert in its place the word "stating" so that the sentence reads as follows:

§ 16.56 *Standard forms to be used.*

• • •

(b) When the holder of a station authorization desires to assign to another person the privilege to construct or use a radio station, he shall submit to the Commission a notarized letter setting forth his desire to assign all right, title, and interest in and to such authorization, stating the file number and expiration date of his authorization and the call sign and location of station. • • •

4. In § 16.56 revise last sentence of paragraph (g) (1) (Instruction 42, 17 F. R. 8516) to delete reference to § 11.53 in the last line and insert in its place reference to § 16.53 and to correct a typographical error so that the sentence reads as follows: "The information necessary for Commission action on requests for Special Temporary Authority is set forth in § 16.53."

Released: October 7, 1952.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] T. J. SLOWIE,
Secretary,

TITLE 49—TRANSPORTATION

Chapter I—Interstate Commerce Commission

PART 57—RECORDATION OF DOCUMENTS

FORM AND CONTENTS OF LETTER OF TRANSMITTAL; ADMINISTRATIVE PROCEDURE

At a session of the Interstate Commerce Commission, Division 1, held at its office in Washington, D. C., on the 8th day of October A. D. 1952.

There being under further consideration the provisions of section 20c of the Interstate Commerce Act, as amended (49 U. S. C. 20c), providing for the recordation of any mortgage, lease, equipment trust agreement, conditional sale agreement, or other instrument evidencing the mortgage, lease, conditional sale, or bailment of railroad rolling stock, as described in said section, and the rules and regulations prescribed in order of July 28, 1952, as amended August 25, 1952 (17 F. R. 7093, 7903):

It is ordered, That the order of July 28, 1952, as amended, is hereby further amended as follows:

1. The word "parties" is substituted for the word "carriers" in the second line of the first ordering paragraph.

2. The word "railroad" is deleted from paragraph (c) of § 57.4 *Form and contents of letter of transmittal*, and the word "mortgagee" is inserted following the word "lessee." As amended, this paragraph will read:

(c) A general description of the equipment covered by the document, whether locomotives, car or other rolling stock, the type of such equipment, with A. A. R. mechanical designation, if any, the number of each type, and identifying marks such as the name or initials of the lessee, mortgagee, or vendee, the road or serial number, or if more than one number of each type, the first and last inclusive numbers.

3. The words "the transmitting carriers" are deleted from § 57.4 (e), and the words "one of the parties" are substituted therefor. As amended, this paragraph will read:

(e) The letter of transmittal shall be signed by an executive officer of one of the parties having knowledge of the matters set forth therein and shall show the name and address of the person to whom the original document should be returned.

4. The word "railroad" is deleted from paragraph (c) of § 57.5 *Administrative procedure* and the word "party" is substituted therefor. As amended, this paragraph will read:

(c) There will also be established and maintained and kept open to public inspection under appropriate rules, an index showing for each party the recordation number of all documents to which it is a party which have been filed under section 20c of the act.

Notice of these regulations shall be given to the general public by depositing copies in the office of the Secretary of the Interstate Commerce Commission, Washington, D. C., and by filing with the Director of the Federal Register.

(65 Stat. 290, 66 Stat. 724; 5 U. S. C. 140, 49 U. S. C. 20c)

By the Commission, Division 1.

[SEAL] GEORGE W. LAIRD,
Acting Secretary.

[F. R. Doc. 52-11169; Filed, Oct. 14, 1952; 8:48 a. m.]

TITLE 50—WILDLIFE

Chapter I—Fish and Wildlife Service, Department of the Interior

Subchapter E—Alaska Wildlife Protection

PART 46—TAKING OF ANIMALS, BIRDS, AND GAME FISHES

BISON

Basis and purpose. Pursuant to sound management practice and because of the inability of hunters to remove certain bison from the herds as permitted by the Alaska Game Law Regulations, it has been determined to extend by 10 days the season in Alaska for hunting these animals in a portion of the Big Delta Area and in the Mt. Hayes-Blair Lake areas and thus give each of those persons in the group of 25 holding special permits in addition to a current hunting license an opportunity to take one such animal. Adverse weather conditions have precluded most of these hunters from reaching the shooting area to obtain and remove bison designated by an enforcement agent.

Since the following amendatory regulation is a relaxation of existing restrictions applicable to the hunting of bison, notice and public procedure thereon are not required (60 Stat. 237; 5 U. S. C. 1001, et seq.).

Effective immediately upon publication in the FEDERAL REGISTER, § 46.109 of the regulations under the Alaska Game Law (57 Stat. 301, 48 U. S. C. 192–211) is amended to read as follows:

§ 46.109 *Bison.* (Selected bulls only.)

In the Big Delta Area, (south of the Tanana River) including the Mt. Hayes-Blair Lake areas, October 1 to October 20: *Provided*, That hunting for bison shall be by permit only and in accordance with regulations of the Commission as stated in § 165.2. Limit, 1 a year.

(Sec. 9, 43 Stat. 743, as amended; 48 U. S. C. 198)

Dated: October 10, 1952.

VERNON D. NORTHROP,
Acting Secretary of the Interior.

[F. R. Doc. 52–11165; Filed, Oct. 14, 1952; 8:47 a. m.]

PROPOSED RULE MAKING

DEPARTMENT OF AGRICULTURE

Production and Marketing Administration

[7 CFR Part 967]

[Docket No. AO–170–A6]

MILK IN SOUTH BEND-LA PORTE, INDIANA, MARKETING AREA

NOTICE OF RECOMMENDED DECISION AND OPPORTUNITY TO FILE WRITTEN EXCEPTIONS WITH RESPECT TO PROPOSED AMENDMENTS TO TENTATIVELY APPROVED MARKETING AGREEMENT AND TO ORDER, AS AMENDED, REGULATING HANDLING

Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), hereinafter referred to as the "act", and the applicable rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and orders (7 CFR Part 900), notice is hereby given of the filing with the Hearing Clerk of this recommended decision of the Assistant Administrator, Production and Marketing Administration, United States Department of Agriculture, with respect to proposed amendments to the tentative marketing agreement and to the order, as amended, regulating the handling of milk in the South Bend-La Porte, Indiana, marketing area.

Interested parties may file exceptions to this recommended decision with the Hearing Clerk, Room 1353, South Building, United States Department of Agriculture, Washington 25, D. C., not later than the close of business on the 10th day after its publication in the FEDERAL REGISTER. Exceptions should be filed in quadruplicate.

A public hearing on proposed amendments to the aforesaid order was called by the Production and Marketing Administration, United States Department of Agriculture, following a request of the Pure Milk Association, and was held June 2–3, 1952. Proposed amendments to the order were submitted by the Pure Milk Association, the Reliable Dairy Company, Inc., et al., the Constantine Cooperative Creamery Company, and the Dairy Branch, Production and Marketing Administration.

The major issues presented on the record of the hearing and covered by this decision were whether the order should be amended to provide for:

(1) Revision of the price differentials (over the basic formula price) for Class I milk and of the provision under which such differentials are revised automatically;

(2) Modification of the price formula for Class II milk;

(3) Revision of the provision dealing with milk priced under other Federal orders;

(4) Expansion of the marketing area;

(5) Modification of the provision dealing with partial payments to producers;

(6) The adoption of a provision to establish requirements by which "pool plant" status might be acquired for plants from which no route is operated wholly or partially within the marketing area; and

(7) The substitution of price quotations on cheese at Wisconsin primary markets for Wisconsin Cheese exchange quotations at Plymouth.

Findings and conclusions. The following findings and conclusions on the issues decided herein are hereby made upon the basis of the record of the hearing:

(1) Class I milk price differentials (over the basic formula price) should be revised.

It was proposed by a producer organization that the Class I milk price differentials over the basic formula price be revised so that the level of producer milk prices under the South Bend-La Porte order would be at approximately the same level as prices under the Cleveland, Ohio, order or under the Chicago order, whichever is the higher. It was testified that the Chicago market continues to compete strongly for milk produced for the South Bend-La Porte market and that other markets, including Fort Wayne, Indianapolis, Warsaw, Nappanee, and the Calumet cities, located within the State of Indiana and Cleveland, Ohio, are attractive outlets for South Bend-La Porte producers.

Approximately 20 producers have left the South Bend market for the Fort Wayne and Cleveland markets since November 1951. However, about 38 producers shifted from the Chicago market to plants of South Bend handlers during the first three months of 1952. Certain Chicago handlers distribute milk in the South Bend market and such distribution currently constitutes between 5 and 10 percent of the total market sales. Such handlers represent not only major competition for milk supply but are also an important factor in milk distribution in South Bend and La Porte.

Total Class I sales in the South Bend market for the months of September 1951–March 1952, inclusive, averaged approximately 110 percent of producer milk receipts, necessitating the importation of sizable quantities of milk and milk products from other than producer sources. Statistics introduced into the record, together with testimony from producers, show substantial increases during the past year in the feed, labor, farm machinery and other materials used by farmers in the production of milk.

At the present time the monthly Class I differential under the South Bend-La Porte order is nominally 10 cents per hundredweight higher than the Class I price differential (55 to 70 mile zone) provided for the same month in the Chicago order. This difference of 10 cents is offset, however, by the more favorable return per hundredweight of milk which results, at a given Class I price, from the accounting system used to compute the volume of Class I milk under the Chicago order and by a marketing area price differential of 4 cents per hundredweight required to be paid by Chicago handlers. Thus, returns per hundredweight to producers for milk disposed of in fluid form as milk and cream may be considered as being comparable in the two markets after giving effect to the stated 10 cent difference in prices for milk so utilized.

Data for the year 1951 and the first seven months of 1952 indicate that the Class I price level for the South Bend-La Porte market, as established by the order, has averaged approximately 7

cents per hundredweight above the minimum Class I price applicable at Goshen, Indiana, under the terms of the Cleveland order (official notice is taken of South Bend-La Porte and Cleveland price data for June and July 1952). However, for the winter months of December 1951-February 1952, the Class I price at South Bend-La Porte was, on the average, 59 cents less than the minimum Class I price for milk delivered to the Goshen plant. In addition, a premium above order prices in the average amount of 28 cents per hundredweight was paid at the Goshen plant for such three months. The shortage of producer milk for South Bend-La Porte during such winter months and the prices offered at the Goshen plant appear to be the principal reasons underlying the payment by South Bend handlers of premiums amounting to 63 cents per hundredweight in December 1951, 43 cents per hundredweight in January 1952 and 34 cents per hundredweight in February 1952. It should be noted in this connection that under Cleveland order provisions which have been in effect, the Class I price differential in such market has not been reduced from its seasonal high until the month of March of each year while the South Bend-La Porte Class I price differential has been reduced seasonally beginning with the month of December. This has been the primary cause of the marked price disparity between the two markets in the winter months.

Official notice is taken of the fact that on July 1, 1952, Class I and Class II price differentials under the Chicago order were increased and a revised provision for the automatic adjustment of such differentials was adopted. In order to provide a price level which will encourage an adequate supply of milk for the South Bend-La Porte market and to restore equity in pricing among handlers, an increase in the present Class I price differentials under the South Bend-La Porte order is appropriate and necessary. It is provided, therefore, that the Class I price differentials be established at $1.30 for the months of July through January, inclusive, 70 cents for May and June, and 90 cents for February through April, inclusive. In view of the conditions outlined and because the South Bend-La Porte market continues to be extremely short of producer milk supplies in the months of December and January, it is concluded that the Class I price differential should not be reduced from its highest seasonal level prior to February.

As a general proposition, however, it appears that the close relationship of the South Bend-La Porte market to the Chicago market, both supplywise and in the distribution of milk at wholesale and retail, warrants price direction closely related to that of Chicago. Producers proposed that an automatic price adjustment be based on a combination of producer supply-Class I sales experience for a 12-month period and a 2-month period. This same proposal was submitted at the Chicago hearing held March 11–14, 1952, and was dealt with fully in a decision for Chicago issued on June 13, 1952. Official notice is taken of such decision. In a decision issued for the South Bend-La Porte order on May 24, 1951, the close relationship between the Chicago and South Bend markets was explained fully and the present record does not indicate that such relationship has changed to any important degree. It is concluded, therefore, that the automatic price adjustment provision should continue to be related to the Chicago market and to accomplish an appropriate price adjustment the revised provision as adopted on July 1, 1952 under the Chicago order should be applied in connection with the determination of Class I price changes in the South Bend-La Porte market. For the month of September 1952 such adjustment had the effect of adding 15 cents to the Class I and Class II price differentials under the Chicago order.

Official notice is also taken of the parity price of all milk sold at wholesale in the United States, which is the applicable parity under present legislation, of $4.82 per hundredweight as of August 15, 1952. Such price does not reflect what the record shows to be the price of feeds, the available supplies of feeds, and other economic conditions which affect market supply and demand for milk or its products in the marketing area, nor would it insure a sufficient supply of pure and wholesome milk for the marketing area or be in the public interest.

A proposal submitted by handlers proposed that the price differentials (over the basic formula price) for Class I milk be established as specified percentages of the basic formula price. At the hearing the original proposal was revised to provide for the following monthly percentages: 20 percent of the basic formula price for January, February, March, April, July and August; 15 percent for May and June; 30 percent for September and December; and 35 percent for October and November.

In support thereof it was testified by proponents that a "percentage differential" automatically adjusts the differential to be added to the basic formula price as the level of prices under the basic formula increases or decreases.

There was no evidence presented on the record to show that costs for producing inspected milk increase or decrease in the same ratio as the manufacturing price level changes. It is pointed out that a major factor affecting the level of prices is the relationship of milk production to milk sales and the competition with other nearby markets both in milk supply and distribution. In this connection no evidence was presented by proponents that "percentage differentials" would establish a supply-sales relationship or maintain a proper price relationship to other markets. In view of the foregoing it is concluded that the proposal should not be adopted.

(2) The price formula for Class II milk should be revised. The Class II milk price for each month is computed by the market administrator by averaging the prices paid dairy farmers for such month by three milk manufacturing plants located within the South Bend-La Porte milkshed. It was proposed that one plant be deleted from the list of plants specified in the order and that two additional plants be added, increasing the list from three to four plants. Testimony indicated that at times the price reports necessary for the monthly Class II price computations have not been forthcoming from the plant proposed for deletion by the date the Class II price must be computed and announced. It was stated further that this circumstance has limited the usefulness of the reports of such plant to the extent that the substitution of reports available from other plants is appropriate. The two plants proposed for addition to the list are plants which accept milk in excess of the needs of the marketing area during the months of seasonally high milk production and are representative outlets for any seasonal excesses which must be disposed of through manufacturing channels. They are not affiliated with any handler. No counter testimony or objections to the proposals were offered at the hearing.

It is concluded from the evidence that the changes suggested should be adopted.

(3) The proposal to require payments to the producer-settlement fund with respect to milk subject to pricing under another Federal order at a rate per hundredweight equal to the amount by which the Class I price exceeds the price applicable to the comparable classification under the other order should not be adopted.

Milk is distributed regularly in the South Bend-La Porte marketing area from plants subject to Order No. 41 for the Chicago, Illinois, marketing area. The amounts distributed have been at times as much as 15 percent of the total quantity of milk distributed in fluid form in the South Bend-La Porte market. It was proposed that whenever the Class I price under the South Bend-La Porte order exceeds the price of the comparable class under the other, an amount equal to the difference between such class prices be paid to producers under the South Bend-La Porte order with respect to the total hundredweight of such outside milk distributed in the marketing area. Proponents stated, however, a reservation that such payment should not be required if the other order provides for payment to the producers thereunder of the South Bend-La Porte Class I price for such milk.

In the circumstances prevailing between the two markets it is concluded that a reasonably close alignment of class prices under the orders concerned, taking into account the approximate cost of moving milk between markets, will maintain equity among the various handlers affected. The price provisions adopted will result in an annual average return for Class I milk of 10 cents per hundredweight higher than that of the Chicago market, after giving effect to the price and accounting factors previously mentioned which are applicable in the latter market. A provision in Order No. 67 that requires payment of the money difference into the producer-settlement fund when the local Class I price is higher than that of the Federal order in another market where the milk originates is not necessary to such end and should not be adopted.

(4) The marketing area should not be enlarged.

Handlers proposed that the marketing area should be increased to include that portion of St. Joseph County, Indiana, which lies outside the city limits of South Bend and Mishawaka. A similar proposal was offered at a hearing held in South Bend, Indiana, on February 15–16, 1951. Official notice is taken of the decision issued on June 21, 1951 by the Secretary of Agriculture as the result of such hearing as well as of the record of such hearing and the recommended decision thereon. Review of the evidence presented at the February 15–16, 1951 hearing does not warrant a change in the conclusions reached and no new evidence was offered at the present hearing in support of the proposal. It is concluded therefore that the marketing area should remain as now defined.

(5) The provision dealing with partial payments to producers should be revised.

Handlers proposed that the producer payment provisions be revised to provide for a part payment to each producer equal to one-half the full payment made to the producer by the handler for the preceding month. At present the order provides for partial payment (covering deliveries of the first 15 days of the month) at the rate of the uniform price for the preceding month. It was testified that the present provision has increased the amount of clerical work required of handlers and has resulted in numerous questions by producers as to the basis of payment employed. In addition it was testified that at times above payments order minimums have resulted inadvertently under such method.

The record indicates that the proposed partial payment provision described above would not necessarily correct the conditions to which complaint is directed. Another proposal offered at the hearing suggested the adoption of a "sliding scale" method of determining the amount of the partial payment, based on the level of the uniform price for the preceding month. No specific scale was presented by proponents but the following payment scale should assist in making the present provision more workable:

Uniform price for preceding delivery period:	*Amount of partial payment*
Under $1.00	$0.00
$1.00–$1.99	1.00
$2.00–$2.99	2.00
$3.00–$3.99	3.00
$4.00–$4.99	4.00
$5.00–$5.99	5.00
$6.00–$6.99	6.00
$7.00 and over	7.00

It does not appear probable that any overpayment would be made under the above schedule since the amount of the partial payment is substantially less than the full value of the milk delivered during the month. The partial payment is provided in the schedule in terms of even dollars to expedite the necessary computations by handlers. It is concluded that the schedule as outlined above is reasonable for all handlers and should be adopted.

(6) A provision enabling the qualification as a "pool" plant of a plant from which no route is operated wholly or partially within the marketing area should not be adopted.

An association of dairy farmers operating a milk plant located approximately 45 miles from South Bend and not subject to the South Bend-La Porte order proposed the adoption of a provision under which a plant from which no route is operated wholly or partially within the marketing area might qualify and maintain status as a "pool" plant. Under the proposal made such a plant, if approved by an appropriate health authority, would qualify to participate in the market wide pooling of milk under the order on the basis of the delivery of not less than 50 percent of its farm supply of milk or butterfat in the months of seasonally low milk production to plants from which routes are operated within the marketing area. To qualify for pool status at the present time a plant must be approved by an appropriate health authority in the marketing area, be engaged in the processing and distribution of milk for consumption in fluid form, and have a route which is operated wholly or partially within the marketing area.

It was testified that there have been occasions since January 1952 when milk has been sold from proponents' plant to a plant located in the South Bend-La Porte marketing area from which a route is operated within the marketing area, but the quantities so sold were not stated. No such sales had been made prior to this year. Such plant currently is subject to the pricing and pooling provisions of Order 41 in effect in the Chicago, Illinois, marketing area and has not been approved by any health authority having jurisdiction within the South Bend-La Porte marketing area. For the foreseeable future, deliveries of milk from such plant would continue to be made to a fluid milk processing and distributing plant under the Chicago order and according to the testimony the provisions proposed for the South Bend-La Porte order would be used for the disposition of milk from such plant into the South Bend-La Porte marketing area only if the latter market should prove to be more profitable to the plant than the present Chicago outlet. The distributing plant under the Chicago order now being supplied by proponents' plant was stated to have first call on such supplies to the exclusion of any other requests for such milk.

No proposals for pool status have been made on behalf of other plants not having routes in the marketing area. The supplies of "other source milk" needed by South Bend-La Porte handlers appear to have been readily available from plants which have not been covered by the order as "approved", or "pool", plants. In view of the extent of milk production in counties close to the marketing area, it does not appear necessary to include distant plant sources to insure adequate supplies for the market if prices are established at an appropriate level. It may not be concluded from the record that the adoption of the proposed provisions would result in an improved supply situation or that producers who have been serving the market regularly would benefit therefrom. On the basis of present information, it is concluded that special provisions for the inclusion in the pool of milk from a plant from which no route is operated in the marketing area would not tend to effectuate the declared policy of the act.

(7) Price quotations for cheese from Wisconsin primary markets should be used in connection with the "butter-cheese" price formula in lieu of Wisconsin Cheese Exchange prices quoted at Plymouth, Wisconsin.

Price quotations are reported four days a week (excluding Friday) for "Wisconsin primary markets" which are based on actual sales of cheese. There have been only a few instances in the past several years when sufficient sales have not been made on the Wisconsin primary markets on which to base a report. The Wisconsin Cheese Exchange at Plymouth, Wisconsin, on the other hand meets each Friday so that a quotation is available for only one day of each week.

The volume of cheese sold on the Wisconsin Cheese Exchange is small in relation to the total volume of cheese sold on Wisconsin primary markets. Moreover, there have been numerous occasions when no sales of cheese were made through the Exchange and at times such condition has existed for a considerable period. It has been necessary therefore to use prices for weeks when no sales were reported which were derived from either bids or offers rather than from actual sales. For the purposes of the order the price for cheese at Wisconsin primary markets is the more representative report to use in reflecting prices actually received by manufacturers of cheese.

The types of transaction on which the two cheese quotations discussed above are based are similar—both are for the same type of cheese and are for cheese loaded for shipping at assembly points. The quotations differ, however, in that the price at primary markets includes a charge for certain services, such as paraffining and assembly, which is not included in the Exchange price but is made as a separate charge to the purchaser. Over the past two years the primary markets' price has averaged higher than the Exchange price by approximately 1.3 cents per pound and deduction of this amount should be made in adopting the price of the primary markets.

General findings. (a) The tentative marketing agreement and the order, as amended, and as hereby proposed to be further amended, and all of the terms and conditions thereof will tend to effectuate the declared policy of the act;

(b) The parity prices of milk as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the marketing area, and the minimum prices specified in the tentative marketing agreement and the order, as amended, and as hereby proposed to be further amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(c) The order, as amended, and as hereby proposed to be further amended, will regulate the handling of milk in the same manner as, and will be applicable only to persons in the respective classes of industrial and commercial activity specified in a marketing agreement upon which a hearing has been held.

Rulings on briefs. A brief was filed on behalf of the Reliable Dairy Company, Inc., et al. The brief contained proposed findings of fact, conclusions and argument with respect to the proposals discussed at the hearing. Every point covered in the brief was carefully considered along with the evidence in the record in making the findings and reaching the conclusions hereinbefore set forth. To the extent that such suggested findings and conclusions contained in the brief are inconsistent with the findings and conclusions contained herein, the request to make such findings or to reach such conclusions is denied on the basis of the facts found and stated in connection with the conclusions in this decision.

Recommended marketing agreement and order. The following proposed amendments to the order are recommended as the detailed and appropriate means by which these conclusions may be carried out. The proposed amendments to the marketing agreement are not included because the regulatory provisions thereof would be the same as those contained in the proposed amendments to the order:

1. Delete § 967.50 (b) (2) and substitute therefor the following:

(2) Add an amount computed as follows: From the simple average of the daily prices paid per pound, using the midpoint of any price range as one price, for Wisconsin State Brand cheddars in cars or truckloads, f. o. b. Wisconsin assembling points, as reported by the Department for the trading days during the delivery period, subtract 1.3 cents, and multiply by 2.4;

2. Delete § 967.51 in its entirety and substitute therefor the following:

§ 967.51 *Class I milk prices.* The minimum prices per hundredweight to be paid by each handler for skim milk and butterfat in producer milk received and classified as Class I milk for each delivery period shall be computed by the market administrator as follows:

(a) Add to the basic formula price (3.5 percent milk) the following amount for the delivery period indicated: May and June, $0.70; July through January, inclusive, $1.30; and February through April, inclusive, $0.90: *Provided*, That such Class I price differential shall be increased or decreased, respectively, 3 cents for each full percent that the current supply-demand ratio is greater or less than 72 percent.

(b) Add together the amount computed pursuant to § 967.50 (c) (2) and any amount per hundredweight by which (on a 3.5 percent butterfat basis) the effective basic formula price pursuant to § 967.50 is higher than the price computed pursuant to § 967.50 (c), divide such sum by 0.035, and then add thereto the following amount for the delivery period indicated: May and June, $8.25; July through January, inclusive, $13.75; and all others, $11.00: *Provided*, That such amount for the delivery period indicated shall be increased or decreased, as the case may be, by the amount per hundredweight resulting from the proviso of paragraph (a) of this section divided by 0.035. The resulting amount shall be the price of butterfat in Class I milk.

(c) Subtract from the price computed pursuant to paragraph (a) of this section the amount computed in paragraph (b) of this section times 0.035, and divide the remainder by 0.965. The resulting amount shall be the price of skim milk in Class I milk.

(d) On or before the last day of each delivery period the market administrator shall make the following computations based upon the reported receipts and utilization of handlers as defined in the order, as amended, regulating the handling of milk in the Chicago, Illinois, marketing area, as computed by the market administrator under the latter order:

(1) Determine the total receipts of Grade A milk from all producers (including receipts from own farm production) for the most recent 12-month period.

(2) Determine the total pounds of Grade A milk actually utilized in Class I milk and Class II milk products during the most recent 12-month period and subtract therefrom the amount of Class II milk represented by frozen cream and plastic cream moving into storage during such 12-month period.

(3) Divide the amount obtained in subparagraph (2) of this paragraph by the amount obtained in subparagraph (1) of this paragraph and round to the nearest full percent, which resulting percentage shall be known as the "current supply-demand ratio".

(4) In making the computations specified in subparagraphs (1) and (2) of this paragraph, the market administrator shall use the reported receipts and utilization of handlers of Grade A milk under both Order 41 and former Order 69 (Suburban Chicago, Illinois, marketing area) when it is necessary to use data for delivery periods prior to July 1, 1951.

3. Delete § 967.52 (c) and substitute therefor the following:

(c) Compute the arithmetical average of the basic (or field) prices per hundredweight reported to have been paid, or to be paid, for milk of 3.5 percent butterfat content received from farmers during the delivery period at the following plants or places for which prices have been reported to the market administrator or the Department by the companies listed in this paragraph: *Provided*, That in the case of any such plant for which prices are reported on a biweekly basis, the simple average of the two most recent price quotations applicable to milk received during the delivery period at such plant shall be used in computing the average price for the four plants.

Present Operator and Location
Goshen Milk Condensing Co., Goshen, Ind.
New Paris Creamery Co., New Paris, Ind.
Schlosser Bros. Creamery, Plymouth, Ind.
Elgin Milk Products Co., Galien, Mich.

4. Delete § 967.80 (c) and substitute therefor the following:

(c) On or before the 4th day after the end of such delivery period each handler shall pay to each producer, or to a cooperative association authorized to collect payment, not less than the amount per hundredweight provided in the schedule set forth in this paragraph, for milk received from such producer or caused to be delivered to such handler by such cooperative association during the first 15 days of such delivery period: *Provided*, That in the event any producer or cooperative association discontinues shipping to such handler during any delivery period, such partial payments shall not be made and full payment for all milk received from such producer or cooperative association during such delivery period shall be made on or before the 18th day after the end of such delivery period pursuant to paragraphs (a) and (b) of this section:

When the uniform price for the preceding delivery period is—	*The amount of the partial payment*
Under $1.00	$0.00
$1.00–$1.99	1.00

National Production Authority

[Suspension Order 28; Docket No. 40]

TEXAS LAWN SPRINKLER CO. OF DALLAS ET AL.

SUSPENSION ORDER; MODIFICATION ON APPEAL

The original hearing in this matter was held in Dallas, Tex., on August 27, 1952, before Hearing Commissioner Farley, and was held following a misunderstanding of his order designating the time and place for the hearing. It was incomplete and therefore unsatisfactory, largely because of the zeal of counsel for both sides in their attempts to protect their clients' best interests. Faced with a very difficult situation, Dean Farley acted in accordance with the National Production Authority's rules and regulations and exercised his best judgment. He signed a suspension order the same day at the conclusion of the hearing. On September 3, 1952, a stay order was granted by the Chief Hearing Commissioner, Walter H. Foster, after hearing oral argument in Washington, D. C.

Hearings on the appeal and petition for modification in the above-entitled matter were held by me, J. Forrester Davison, as designated appeal commissioner of the National Production Authority. These hearings were held in Washington, D. C., on September 15, 25, and 26, 1952; both parties were represented by counsel; and all issues raised by either party were subjected to full examination as in a hearing de novo. Testimony was received from the respondents and from the National Production Authority, and counsel argued at length on the points of law in issue. A written record was made of the testimony and argument on each day of hearing.

It is hereby determined:

Findings of fact. (1) The respondents, Texas Lawn Sprinkler Company of Dallas, Inc., Texas Lawn Sprinkler Company, Inc., and M. E. Snoddy, during the period starting April 5, 1951, and running through June 30, 1951, used copper controlled materials, to wit: copper tubing for the installation of lawn sprinkler systems in construction in violation of section 7 (e) of NPA Order M-12 dated April 1, 1951 (16 F. R. 2957), and as amended April 9, 1951 (16 F. R. 3175); and

(2) Respondent, Texas Lawn Sprinkler Company of Dallas, Inc., during the period beginning July 9, 1951, and running through July 31, 1951, used copper controlled material, to wit: copper tubing for the installation of lawn sprinkler systems in construction, in violation of section 4 (c) of NPA Order M-4 as amended July 1, 1951 (16 F. R. 6513); and

(3) Respondents, Texas Lawn Sprinkler Company of Dallas, Inc., Texas Lawn Sprinkler Company, Inc., and M. E. Snoddy, on or about August 9, 1951, used copper controlled materials, to wit: copper tubing for the installation of lawn sprinkler systems in construction, in violation of section 6 of NPA Order M-4A of August 3, 1951 (16 F. R. 7703); and

(4) Respondents, Texas Lawn Sprinkler Company of Dallas, Inc., Texas Lawn Sprinkler Company, Inc., and M. E. Snoddy, during the period beginning April 16, 1951, and running through August 31, 1951, obtained and used 8,000 feet of copper tubing for the installation of lawn sprinkler systems in construction, in violation of section 7 (e) and sections 11 (a) and 11 (b) of NPA Order M-12 as amended April 9, 1951 (16 F. R. 3175), and section 6 of NPA Order M-4A of August 3, 1951 (16 F. R. 7703), as amended August 20, 1951 (16 F. R. 8361); and

(5) Respondents, Texas Lawn Sprinkler Company of Dallas, Inc., Texas Lawn Sprinkler Company, Inc., and M. E. Snoddy, during the period starting August 1, 1951, and running through October 31, 1951, used copper controlled materials, to wit: copper tubing for the installation of lawn sprinkler systems in construction in violation of section 6 of NPA Order M-4A dated August 3, 1951 (16 F. R. 7703), and section 7 of NPA Order M-4A as amended August 20, 1951 (16 F. R. 8361); and

(6) The respondent, G. W. Kehres, was not shown to have committed the violations of the orders as charged in Charge No. 8.

Conclusions. (1) As shown above, the first three of the respondents, i. e., Texas Lawn Sprinkler Company of Dallas, Inc., Texas Lawn Sprinkler Company, Inc., and M. E. Snoddy, during the period beginning April 5, 1951, and ending October 31, 1951, used copper controlled materials in violation of the National Production Authority orders, regulations, and directives as hereinbefore cited by the unlawful use of copper tubing for purposes prohibited by the National Production Authority, i. e., installing such copper in lawn sprinkler systems in construction. This series of unlawful installations used at least 92,000 feet of copper tubing.

(2) As shown above, the first three of the respondents, Texas Lawn Sprinkler Company of Dallas, Inc., Texas Lawn Sprinkler Company, Inc., and M. E. Snoddy, also violated the National Production Authority orders, regulations, and directives by unlawfully obtaining copper tubing for the installation in lawn sprinkler systems as prohibited by the National Production Authority regulations.

(3) The actions cited above were not charged as having been done wilfully, nor do I conclude they were wilful. They were carried out because of the respondents' erroneous interpretation of the relevant orders of the National Production Authority even after the May 3, 1951, advice from the National Production Authority that the installation of lawn sprinkler systems in construction was prohibited under National Production Authority orders. On the advice of their counsel the respondents disagreed with this interpretation from the National Production Authority.

(4) Legal interpretations of the applications in this case of NPA Order M-12, as amended April 1 and April 9, 1951, and NPA Orders M-4 and M-4A as amended August 3 and August 20, 1951, and as found in the Federal Register citations given above, depend primarily on the question of the meaning of the amendment of a phrase which first appeared in the List A of Prohibited Uses under section 7 (d) of NPA Order M-12 as amended December 30, 1950 (16 F. R. 125), and reading as follows:

> Tube, tubing and fittings for interior piping systems or for lawn sprinkler systems • • •

This clause was amended February 19, 1951 (16 F. R. 1730), and continued in the amended form of NPA Order M-12 during the periods charged, and was also later included in NPA Orders M-4 and M-4A as amended during the periods charged, and reads as follows:

> Tube, tubing, and fittings for piping systems in construction (except for Type K for underground water connections • • •

The meaning of this phrase was conceded by the respondents' counsel as critical in supporting or not supporting the legal interpretation insisted on by the respondents. The new and more general words "in construction" obviously include "for interior piping systems or for lawn sprinkler systems" as well as any other form of construction using copper tubing and fittings. Therefore, I have decided on the law against the interpretation urged by the respondents.

On other points covering alleged exemptions in sections 7 (a) (2), 7 (h), and 11 (c) of NPA Order M-12 as amended April 1 and April 9, 1951, it is clear that only operations of producers and manufacturers unlike those of the operations of the various respondents would come within the exemptions even if it could be conceded that they met the requirement of delivery of the irrigation piping to the Texas Lawn Sprinkler Company of Dallas, Inc., before April 1, 1951. The claim that delivery had occurred was based on an unusual general order and so-called technical control of inventory of irrigation piping by the Texas Lawn Sprinkler Company of Dallas, Inc. The control of the irrigation piping inventory was in fact the Texas Lawn Sprinkler Company, Inc., and that piping was transferred and sold after April 1, 1951, in units delivered to the site of installations during the remaining 9 months of 1951. Accordingly, I cannot find that the delivery contemplated under sections 7 (a) (2), 7 (h), and 11 (c) took place within the meaning of those sections.

The unlawful obtaining and use of copper tubing by the three respondents, Texas Lawn Sprinkler Company of Dallas, Inc., Texas Lawn Sprinkler Company, Inc., and M. E. Snoddy, occurred under orders setting forth absolute prohibitions as to the actions charged. At present no such prohibitions are in effect; instead there are limitations on the amount that may be self-authorized and used in CMP Regulation No. 6 as amended and NPA Order M-100 as amended. The question of how best to compensate for the harm done to the allocations and priority systems of copper by the actions of the three respondents named above is a very difficult one. As pointed out, they acted on an erroneous interpretation of law after being so advised by the National Production Authority as well as before but did so on the advice of counsel.

It is accordingly ordered:

Subject to future revision as indicated below, in order to bring about an equitable adjustment of the dislocation to the priorities and allocations system in copper, the three respondents named in the next preceding paragraph shall be limited to self-authorization of copper for use, manufacture, assembly, installation, or sale to 50 percent of the amounts permitted during the next two calendar quarters under CMP Regulations Nos. 1 and 6, and directives thereto, as amended from time to time, and NPA Order M-100, as amended from time to time, the period to start October 1, 1952, and end March 31, 1953. These restrictions may be terminated sooner if the above respondents show, before March 31, 1953, that they have refrained from self-certification of actual operations or installations within the terms of the above limitations so as to restore an amount of copper to the allocations and priorities system equivalent to the 92,000 feet of copper piping unlawfully used by them in the violations charged and as established in the findings of fact above. In the event of hardship in any customary operation of manufacture or assembly or installation, the respondents may apply for individual relief to the administrators of the provisions of the relevant orders and regulations; and if the concurrence of the Chief Hearing Commissioner is given, this order shall be modified to the extent advised by those administrators as deemed necessary to avoid hardships which may be considered as excessive.

Dated this 4th day of October 1952.

NATIONAL PRODUCTION AUTHORITY,
By J. FORRESTER DAVISON,
Appellate Commissioner.

[F. R. Doc. 52-11248; Filed, Oct. 13, 1952; 4:27 p. m.]

[Suspension Order 29; Docket No. 38]

DAYTON IRRIGATION SYSTEMS, DALLAS

SUSPENSION ORDER; MODIFICATION ON APPEAL

The original hearing in this matter was in Dallas, Tex., on August 22, 1951, before Hearing Commissioner Thomas. The respondent charged that subpoenas were too general, as in the Texas Lawn Sprinkler case, and sought to have them quashed. There was also the motion to quash a subpoena against the National Production Authority which called for the production of orders and regulations which were matters of record published in the Federal Register. The commissioner granted the motion of the National Production Authority to quash the subpoena and refused to quash the subpoena directed toward the respondents. The respondent then moved for a continuance because of delay in receiving the charging letter as it was addressed to Mr. Harry S. Jack and he is Mr. Herbert S. Jack. The commissioner pointed out the respondent had received the charges and also the attorney had received the charges a month ago and that under the National Production Authority regulations the National Production Authority would make proof in any event. He refused to grant a motion for continuance and proceeded to hear the case on the merits.

Following a three-hour recess, the Government witness testified and the respondent testified very briefly. The commissioner received orally proposed findings of fact from the National Production Authority Counsel and signed a compliance order on the 3d of September 1952, withdrawing from the respondent all National Production Authority allocations and priority assistance. On September 10, 1952, after oral argument in Washington, the Chief Hearing Commissioner issued a stay order. A brief was submitted by the respondent on the appeal and application for the stay order. The Chief Hearing Commissioner designated me, J. Forrester Davison, as appellate commissioner in this case. One week after sending a letter to the respondent informing him of my appointment and asking for his response, on September 24, 1952, I informed him by telegram that the formal hearing of the appeal was set for October 2 or 3, 1952, at his election, and that the appeal would be decided in any event on the latter of those dates if he did not care to appear and to submit further arguments in support of his appeal. He did ask a delay of over a month in response to my letter, which was unreasonable delay, and there has been no reply to my telegram. Counsel for the National Production Authority presented no argument on the appeal and has elected to stand on the record made before the hearing commissioner and his order thereon.

The legal questions in this appeal are similar to those raised in the case involving the Texas Lawn Sprinkler Company of Dallas, Inc., et al., recently decided by me on appeal. I find that the same principles of law govern this case as were followed by me in that earlier case. I therefore find that the determination of the violations by the respondent herein made by the hearing commissioner below must be upheld as a matter of law.

The respondent's violations resulted from his using at least 16,000 feet of copper tubing in the installation of lawn sprinkler systems in construction in violation of National Production Authority Order M-4A (16 F. R. 7703), and as amended August 20, 1951 (16 F. R. 8361), and in the installation of lawn sprinkler systems using copper pipe and copper tubing in excess of the poundage permissible under Schedule I of the National Production Authority Order M-100 of March 6, 1952 (17 F. R. 2012), said poundage totalling 2,529 pounds.

I find that the suspension order in this matter withdrawing all allocations, allotments, and priorities assistance and the rights of self-certification under the National Production Authority orders for the duration of the Defense Production Act of 1950, as amended, or to be amended hereafter, is not appropriate in consideration of the legal interpretation of those orders given the respondent by his attorney and in the absence of charges and proof of wilful violations by the respondent. These violations in large part took place under orders containing absolute prohibitions as well as under the order containing limitations only, the type of order now applicable to these matters. It is very difficult to arrange a compensation now for the harm done to the allocations and priorities system in copper. To attempt however to compensate for the dislocation of the controls on the use of copper,

It is hereby ordered:

Paragraphs 1, 2, and 4 in the conclusion and order portion of Suspension Order 29 are revoked, and paragraph 3 thereof is modified to the terms which follow, viz: subject to further revision as indicated below, in order to bring about an equitable adjustment of the dislocation of the priorities and allocations system in copper, the respondent herein shall be limited to self-authorization of copper for use, manufacture, assembly, installation, or sale to 50 percent of the amounts permitted during the next 2 quarters under CMP Regulations Nos. 1 and 6 and directives thereto, as amended from time to time, and NPA Order M-100, as amended from time to time, the period to start now and run until March 31, 1953. These restrictions may be terminated sooner if the respondent shows before March 31, 1953, that he has refrained from self-certification of actual operations or installations within the terms of this limitation so as to restore an amount of copper equal to the

amounts unlawfully used by him as set forth above. In the event of hardship in any customary operation or use, the respondent may apply for individual relief to the administrators of the provisions of the relevant orders and regulations; and if the concurrence of the Chief Hearing Commissioner is given, this order shall be modified to the extent advised by those administrators as deemed necessary to avoid hardships which may be considered as excessive.

Issued this 6th day of October 1952.

NATIONAL PRODUCTION AUTHORITY,
By J. FORRESTER DAVISON,
Appellate Commissioner.

[Suspension Order 34; Docket No. 48]

ROLSCREEN CO.

SUSPENSION ORDER

A hearing having been held in the above-entitled matter on the 25th day of September 1952, before Palmer D. Edmunds, a hearing commissioner of the National Production Authority, on a statement of charges made by the General Counsel, National Production Authority, in accordance with the National Production Authority General Administrative Order 16-06 (16 F. R. 8628), dated July 21, 1951, and Implementation 1 to National Production Authority General Administrative Order 16-06 (16 F. R. 8799), dated August 30, 1951, and Delegation of Authority under NPA-GAO 16-06 (17 F. R. 2098); and

The respondent, Rolscreen Company, a corporation organized and existing under and by virtue of the laws of the State of Iowa, having been duly apprised of the Specific violations charged and the administrative action which may be taken, and having been duly informed of the rules and procedures which govern these proceedings; and

The National Production Authority being represented by John M. Cleary, Jr., Regional Attorney, Ninth Region, and the respondent being represented by Messrs. Arnold F. Schaetzle and Rolland E. Grefe of the law firm of Schaetzle, Swift, Austin, and Stewart of Des Moines, Iowa; and

The respondent having heretofore filed an answer to the charges herein, and the respondent having stipulated on the 8th day of September 1952, to a statement of facts to be filed in these proceedings and admitted in evidence without the necessity of presenting other evidence either in support of the statement of charges or in opposition thereto, it is hereby determined:

Findings of fact. 1. The respondent herein was entitled to use 34,499 pounds of aluminum during the period beginning January 1, 1951, and ending March 31, 1951, but nevertheless did use 35,604 pounds of aluminum during said period.

2. That the said Rolscreen Company having received an authorized production schedule and related allotments providing for the use of 5,941 pounds of aluminum in the production of residential window sashes (Symbol K-7) during the calendar quarter beginning October 1, 1951, and ending December 31, 1951, placed authorized controlled material orders for 10,000 pounds of aluminum and accepted delivery of 9,818 pounds of aluminum; that said Rolscreen Company received 3,877 pounds of aluminum in excess of that permitted by sections 19 (f) and 17 (b) of CMP Regulation No. 1, dated May 3, 1951 (16 F. R. 4127), as amended November 23, 1951 (16 F. R. 11860); that the Rolscreen Company received allotments of 3,621 pounds of aluminum for production of venetian blinds (v 3 X) and 700 pounds of aluminum for the production of doors (Allotment Symbol P 9) and placed no orders against such allotments and accepted no deliveries; that the total allotments of aluminum for the fourth quarter amounted to 10,262 pounds.

Conclusions. Respondent violated the provisions of National Production Authority regulations, orders, and directions as follows:

(a) The respondent used 1,105 pounds of aluminum during the period beginning January 1, 1951, and ending March 31, 1951, more than was permitted by section 26.25 (b) of NPA Order M-7 as amended December 1, 1950, and section 6 (b) of NPA Order M-7 as amended February 1, 1951, and March 31, 1951.

(b) The respondent placed certified controlled material orders and accepted delivery of 3,877 pounds of aluminum during the calendar quarter beginning October 31, 1951, and ending December 31, 1951, more than was permitted by sections 19 (f) and 17 (b) of CMP Regulation No. 1 dated May 3, 1951 (16 F. R. 4127), and as amended November 23, 1951 (16 F. R. 11860).

(c) Said violations by the respondent were not done wilfully, but as a result of the failure of the respondent to maintain proper controlled materials records and to understand adequately the requirements of National Production Authority orders and regulations.

In order to correct the unauthorized use of aluminum occasioned by the violations found herein, and in order to prevent future violations of National Production Authority regulations, orders, and directives by the respondent,

It is accordingly ordered:

1. That all allocations and allotments of aluminum which respondent might be entitled to receive either by application using Form CMP-4B or by self-certification for use during the fourth calendar quarter of 1952, be reduced by 4,982 pounds of aluminum.

Issued this 30th day of September 1952 at Des Moines, Iowa.

[Suspension Order 35; Docket No. 43]

PILGRIM PLUMBING SUPPLY CORP.

SUSPENSION ORDER

A hearing having been held in the above-entitled matter on the 30th day of September 1952 before Philip E. Hoffman, Esq., a hearing commissioner of the National Production Authority on a statement of charges made in accordance with the National Production Authority General Administrative Order 16-06 as amended (16 F. R. 8628) and Implementation 1 to National Production Authority General Administrative Order 16-06 (16 F. R. 8799); and

The respondents, Pilgrim Plumbing Supply Corp., a New York corporation, of 1632 Washington Avenue, Bronx, N. Y., and Albert Bacrac of 1632 Washington Avenue, Bronx, N. Y., having been duly apprised of the specific violations charged and the administrative action which may be taken, and having been fully informed of the rules and procedures which govern these proceedings, and the National Production Authority being represented by J. Read Smith, Regional Attorney, and the respondents being represented by Robert Goldstein, Esq.; and

The respondents, by their attorney Robert Goldstein, having entered into a stipulation dated September 30, 1952, wherein it was admitted that the respondent, Pilgrim Plumbing Supply Corp., a New York corporation, did commit the acts charged in Charges 1 through 6 of the statement of charges filed herein and dated August 4, 1952, and wherein it was further admitted that the respondent, Albert Bacrac, did commit the acts charged in Charge 7 of the statement of charges filed herein and dated August 4, 1952, and the respondent having fully stipulated that the said stipulation be filed in lieu of the presentation of other evidence in support of, and in opposition to, the statement of charges; the following findings of fact as stipulated by the parties hereto are found:

Findings of fact. 1. That on or about July 3, 1952, the respondent, Pilgrim Plumbing Supply Corp., a New York corporation, refused to make available for inspection and audit, by duly authorized representatives of the National Production Authority, its records of receipts, deliveries, inventories, production, and use of materials.

2. That on or about July 3, 1952, the respondent, Pilgrim Plumbing Supply Corp., a New York corporation, refused to make available for inspection, by representatives of the National Production Authority, its records of allotments received, of procurement pursuant to all allotments, and of the subdivision of all allotments among its direct secondary consumers.

3. That on or about July 3, 1952, the respondent, Pilgrim Plumbing Supply Corp., a New York corporation, refused to make available for inspection, by representatives of the National Production Authority, all documents on which it relied as entitling the said respondent to make or receive an allotment and to deliver or accept delivery of controlled materials or Class "A" products.

4. That the respondent, Albert Bacrac, owning, dominating, managing, and controlling Pilgrim Plumbing Supply Corp., on or about July 3, 1952, directed, supervised, and participated in the commission of the acts of said respondent corporation as set forth in the findings of fact numbered 1 to 3 herein.

Conclusions. 1. The respondent, Pilgrim Plumbing Supply Corp., a New York corporation, of 1632 Washington Avenue, Bronx, N. Y., has, on or about July 3, 1952, committed acts prohibited by National Production Authority Regulation 1, section 17 (a) and 17 (b) as amended April 2, 1952 (17 F. R. 2926); National Production Authority Regulation 2, sections 23 and 24 as amended September 13, 1951 (16 F. R. 9413); National Production Authority Order M-82, section 10 (a) and 10 (b) as amended May 28, 1952 (17 F. R. 4889); National Production Authority Order M-6A, section 10 (a) and 10 (c) as amended February 27, 1952 (17 F. R. 1760); in that said Pilgrim Plumbing Supply Corp. refused to make available for inspection and audit, by duly authorized representatives of the National Production Authority, its records of receipts, deliveries, inventories, production, and use of materials as requested by the aforesaid regulations.

2. The respondent, Pilgrim Plumbing Supply Corp., a New York corporation, of 1632 Washington Avenue, Bronx, N. Y., on or about July 3, 1952, has committed an act prohibited by National Production Authority CMP Regulation No. 1, section 23 (a) as amended November 23, 1951 (16 F. R. 11860), in that said respondent refused to make available for inspection, by representatives of the National Production Authority, its records of allotments received, of procurement pursuant to all allotments, and of the subdivision of all allotments among its direct secondary consumers, as required by said regulation.

3. The respondent, Pilgrim Plumbing Supply Corp., a New York corporation, of 1632 Washington Avenue, Bronx, N. Y., on or about July 3, 1952, committed an act prohibited by National Production Authority CMP Regulation No. 1, section 23 (b) as amended November 23, 1951 (16 F. R. 11860), in that said respondent refused to make available for inspection by representatives of the National Production Authority, all documents on which it relied as entitling the said respondent to make or receive an allotment and to deliver or accept delivery of controlled materials or Class "A" products, as required by said regulation.

4. The respondent, Albert Bacrac, on or about July 3, 1952, committed acts prohibited by National Production Authority Reg. 1, section 17 (b) as amended April 2, 1952 (17 F. R. 2926); National Production Authority Reg. 2, section 24, as amended September 13, 1951 (16 F. R. 9413); National Production Authority Order M-82, section 10 (b) as amended May 28, 1952 (17 F. R. 4889); National Production Authority Order M-6A, section 10 (c) as amended February 27, 1952 (17 F. R. 1760); National Production Authority CMP Regulation No. 1, section 23 (a) and 23 (b) as amended November 23, 1951 (16 F. R. 11860), in that said respondent, owning, dominating, managing, and controlling Pilgrim Plumbing Supply Corp., during the time the aforementioned violations were committed, directed, supervised, and participated in the commission of the violations committed by the respondent, Pilgrim Plumbing Supply Corp.

It is accordingly ordered:

1. That the acquisition, use, and disposition of controlled materials and materials under control, be prohibited to Pilgrim Plumbing Supply Corp. of 1632 Washington Avenue, Bronx, N. Y., its successors and assigns, and Albert Bacrac, of 1632 Washington Avenue, Bronx, N. Y., for the duration of the Defense Production Act of 1950, its amendments or extension, unless within ten (10) days from the date of issuance of this order Pilgrim Plumbing Supply Corp. of 1632 Washington Avenue, Bronx, N. Y., and Albert Bacrac of 1632 Washington Avenue, Bronx, N. Y., make available and continue to make available for inspection and audit, by duly authorized representatives of the National Production Authority:

(a) its records of receipts, deliveries, inventories, and use of materials;

(b) its records of allotments received, of procurement pursuant to all allotments, and of the subdivision of all allotments, among its direct secondary consumers;

(c) all documents relied upon as entitling the said Pilgrim Plumbing Supply Corp. to make or receive an allotment and to deliver or accept delivery of controlled materials or Class "A" products; and

(d) any and all records necessary to complete a proper audit of the operations of said Pilgrim Plumbing Supply Corp. under National Production Authority regulations and orders.

Issued this 3d day of October 1952.

NATIONAL PRODUCTION AUTHORITY,
By PHILIP E. HOFFMAN,
Hearing Commissioner.

SECURITIES AND EXCHANGE COMMISSION

[File No. 59–99]

NORTHERN STATES POWER CO. (MINNESOTA) ET AL.

ORDER EXTENDING TIME FOR FILING ANSWERS AND FOR HEARING

OCTOBER 9, 1952.

In the matter of Northern States Power Company (Minnesota), and its subsidiary companies, respondents; File No. 59–99.

The respondents Northern States Power Company (Minnesota) and subsidiaries having requested that the time for filing their answers herein be extended from October 20, 1952, to January 20, 1953, and that the date of hearing be extended from October 28, 1952, to January 28, 1953; and

The Commission being of the opinion that the requested extensions of time are excessive, and that the extensions herein granted should provide adequate additional time for respondents to prepare their answers and supporting factual data:

It is ordered, That the time for the filing of the answers of respondents be and is hereby extended to December 1, 1952, at 5:30 p. m., e. s. t., and that the date of the hearing be and is hereby extended to December 9, 1952, at 10:00 o'clock a. m., e. s. t. In all other respects the notice of and order for hearing issued herein on September 22, 1952, (Holding Company Act Release No. 11498) will stand as written.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

[File No. 70–2791]

STANDARD POWER AND LIGHT CORP.

NOTICE OF PROPOSED ACQUISITION BY PARENT OF PORTFOLIO SECURITIES OF SUBHOLDING COMPANY AS PART OF LATTER'S LIQUIDATION

OCTOBER 9, 1952.

Notice is hereby given that an application has been filed with this Commission by Standard Power and Light Corporation ("Power"), a registered holding company and the parent of Standard Gas and Electric Company ("Standard"), also a registered holding company. Applicant has designated sections 6, 7, 9, 10, and 12 of the act and Rule U-46 promulgated thereunder as applicable to the proposed transaction which is summarized as follows:

On October 1, 1952, this Commission issued its findings, opinion and order (Holding Company Act Release No. 11510), approving Steps I and I–A of a plan for the liquidation of Standard filed pursuant to section 11 (e) of the act. An application by the Commission for court enforcement of such Steps is now pending in the United States District Court for the District of Delaware. Under Step I the Prior Preference Stock of Standard is to be retired by the distribution of common stocks of subsidiaries held by Standard. Power, as the holder of 40,843 shares of Standard's $7 Prior Preference Stock, is entitled under Step I to receive in exchange therefor 118,444.7 shares of common stock of Oklahoma Gas and Electric Company ("Oklahoma"), 191,962.1 shares of common stock of Wisconsin Public Service Corporation ("Wisconsin") and 85,770.3 shares of common stock of Duquesne Light Company ("Duquesne"), all of which companies are public utility subsidiaries of Standard. Under the instant application Power proposes to acquire such securities. Such acquisition would result in Power's holding 4.91 percent of the common stock of Oklahoma, 8.65 percent of the common stock of Wisconsin, and, together with 31,000 shares of common stock of Duquesne to be received by Power pursuant to Step I–A of the aforesaid plan, 1.97 percent of the common stock of Duquesne presently outstanding.

In the Commission's aforesaid findings, opinion and order approving Step I of the Standard plan, reference was made to the instant application and the Commission stated that the application would be processed separately pursuant to Rule U-23 and that the Commission's order to be entered on such application would contain a specific condition that the securities to be acquired by Power are to be held subject to the Commission's order dated June 19, 1942, requiring Power to liquidate and dissolve. It was further stated that under the circumstances surrounding the proposed acquisition by Power the requirements of section 10 would be satisfied.

Applicant requests that the Commission's order herein become effective upon issuance.

Notice is further given that any interested person may, not later than October 22, 1952, at 5:30 p. m., request the Commission in writing that a hearing be held on such matter, stating the reasons for such request, the nature of his interest and the issues of fact or law raised by said application which he desires to controvert, or may request that he be notified if the Commission should order a hearing thereon. Any request should be addressed: Secretary, Securities and Exchange Commission, 425 Second Street NW., Washington 25, D. C. At any time thereafter said application, as filed or as amended, may be granted as provided in Rule U-23 of the rules and regulations promulgated under the act or the Commission may exempt such transaction as provided in Rule U-20 (a) and U-100 thereof.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

[File No. 70–2932]

STANDARD GAS AND ELECTRIC CO. ET AL.

NOTICE REGARDING PROPOSED PURCHASE BY PARENT HOLDING COMPANY OF COMMON STOCK OF SUBSIDIARY, OF PROPOSED AMENDMENTS OF CHARTER AND BY-LAWS OF SUBSIDIARY, AND OF PROPOSED TAX AGREEMENT AMONG PARENT AND TWO SUBSIDIARIES

OCTOBER 9, 1952.

In the matter of Standard Gas and Electric Company, Wisconsin Public Service Corporation, Menominee & Marinette Light & Traction Company; File No. 70–2932.

Notice is hereby given that a joint application-declaration has been filed with this Commission by Standard Gas and Electric Company ("Standard"), a registered holding company and a subsidiary of Standard Power and Light Corporation, also a registered holding company, by Wisconsin Public Service Corporation ("Wisconsin"), a public utility subsidiary of Standard, and by Menominee & Marinette Light & Traction Company ("Menominee"), a public utility subsidiary of Wisconsin. Applicants-declarants have designated sections 6 (a), 9 (a) and 12 (f) of the act and Rules U-43 and U-45 (b) (6) promulgated thereunder as applicable to the proposed transactions which are summarized as follows:

On October 1, 1952, the Commission approved Steps I and I–A of a plan of liquidation of Standard, filed pursuant to section 11 (e) of the act. (Holding Company Act Release No. 11510.) Step I involves the retirement of the Prior Preference Stock of Standard through the distribution of portfolio stocks of Standard, including common stock of Wisconsin. An application by the Commission for court enforcement of Step I and I–A is now pending in the United States District Court for the District of Delaware. Standard presently holds 2,000,000 shares, representing all of the outstanding $10 par value common stock of Wisconsin. Under Step I of the Standard plan it is proposed that Standard will purchase 218,070 additional shares of such common stock for $2,600,000 in cash and will distribute to the Prior Preference stockholders all but 46,834.8 shares of its total holdings of Wisconsin common stock. The instant application-declaration proposes, among other things, the issuance and sale of the said 218,070 additional shares of common stock by Wisconsin to Standard.

It is also proposed under Step I of the aforementioned plan that Standard, Wisconsin and Menominee will enter into an agreement whereby (a) the latter two companies will pay to Standard four separate installments aggregating $2,100,000, which, according to Standard's tax counsel, is the approximate net maximum liability of the two companies for Federal income and excess profits taxes for the period 1944 through 1950 for which period they joined in consolidated Federal tax returns as part of the Standard holding company system; (b) Standard will indemnify Wisconsin and Menominee for any unpaid liability or future assessment for such taxes for all periods ending on or prior to December 31, 1950; and (c) Standard will be entitled to receive any refunds of such taxes otherwise applicable to Wisconsin and Menominee and to retain any portion of the $2,100,000 not required to be paid on behalf of Wisconsin and Menominee. The proposed tax agreement will enable Wisconsin to credit its consolidated earned surplus by the amount of $828,477, representing the excess of the accruals per books for Federal income and excess profits taxes for periods prior to 1951 over the $2,100,000 payable therefor to Standard. In its findings and opinion approving Step I of the aforesaid Standard plan, this Commission found that the proposed agreement would be fair and equitable to Standard's security holders and to Wisconsin and Menominee. In the present application-declaration specific approval is sought as to the execution of the proposed agreement by the three companies (Wisconsin and Menominee were not parties to the proceeding involving Step I of the Standard plan) and the carrying out of that portion of the agreement relating to the payment of $2,100,000 by Wisconsin to Standard. Wisconsin proposes, in this regard, (a) to pay $525,000 in cash to Standard when this application-declaration is permitted to become effective or on December 1, 1952 (whichever date is later), and (b) to issue three unsecured non-interest bearing promissory notes, payable to Standard or order, each in the amount of $525,000 and maturing on the first days of March, June and September, 1953, respectively: *Provided*, That if the distribution of the Wisconsin common stock by Standard under Step I of the aforementioned plan is postponed beyond October 31, 1952, the dates for the payment of each note shall be postponed an equal length of time. Menominee will reimburse Wisconsin in the amount of $61,000 in cash or on open account as the financial position of Menominee shall warrant.

It is also proposed in the instant filing to amend the articles of incorporation and by-laws of Wisconsin, in order to bring them into conformity with the standards of this Commission, prior to the distribution of the Wisconsin common stock to the Prior Preference stockholders of Standard pursuant to Step I of the said plan. The proposed amendments will:

(a) Provide preemptive rights to the holders of the common stock of Wisconsin to purchase pro rata any additional common stock offered for sale for cash, other than by a public offering of such shares, prior to any sale of such stock to others;

(b) Provide that Wisconsin shall not merge or sell all or substantially all of its assets without the affirmative vote of the holders of at least two-thirds of the outstanding shares entitled to vote;

(c) Provide that a quorum at a meeting of stockholders shall be the holders of a majority of the outstanding shares entitled to vote;

(d) Place limitations on the authority of the Board of Directors of Wisconsin to adopt or alter the by-laws of the company without the affirmative vote of the holders of a majority of shares entitled to vote; and

(e) Provide that the holders of one-tenth of the outstanding common stock may request that a special meeting of stockholders be called.

The filing states that the Public Service Commission of Wisconsin has jurisdiction over the proposed issuance of common stock, the proposed tax agreement and the proposed issuance of promissory notes and further states that no State or Federal Commission other than this Commission and the Wisconsin Commission has jurisdiction over the proposed transactions.

Applicants-declarants request that the Commision's order herein become effective upon issuance.

Notice is further given that any interested person may, not later than October 22, 1952, at 5:30 p. m. request the Commission in writing that a hearing be held on such matter, stating the reasons for such request, the nature of his interest and the issues of fact or law raised by said application-declaration which he desires to controvert, or may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, 425 Second Street NW., Washington 25, D. C. At any time thereafter said application-declaration, as filed or as amended, may be granted and permitted to become effective as provided in Rule U-23 of the rules and regulations promulgated under the act or the Commission may exempt such transactions as provided in Rule U-20 (a) and U–100 thereof.

By the Commission.

[File No. 70–2938]

GRANITE STATE ELECTRIC CO. AND NEW ENGLAND ELECTRIC SYSTEM

NOTICE OF FILING REGARDING ISSUANCE AND SALE BY SUBSIDIARY OF SHARES OF CAPITAL STOCK AND ACQUISITION THEREOF BY PARENT COMPANY

OCTOBER 9, 1952.

Notice is hereby given that an application-declaration has been filed with this Commission, pursuant to the Public Utility Holding Company Act of 1935, by New England Electric System ("NEES"), a registered holding company and its public-utility subsidiary company, Granite State Electric Company ("Granite"). NEES and Granite have designated sections 6 (b), 9 (a) and 10 of the act and Rules U-23 and U-42 (b) (2) promulgated thereunder as applicable to the proposed transactions, which are summarized as follows:

Granite proposes to issue and sell, for cash, 5,500 shares of additional capital stock, $100 par value, at a price of $100 per share. NEES, the sole stockholder of Granite, proposes to acquire such additional shares and will use available cash for such purchase.

Pursuant to a bank loan agreement with the First National Bank of Boston, Granite presently has outstanding $450,000 principal amount of note indebtedness, and pursuant to this Commission's order dated October 1, 1952 (File No. 70–2928), Granite has authority to increase such note indebtedness by the issuance of $100,000 of additional promissory notes. The application-declaration states that the proceeds from the proposed issuance and sale of capital stock will be applied by Granite to the payment of its then outstanding note indebtedness, and the balance, if any, to the payment of construction expenditures or reimbursement of the treasury therefor. At the time of the sale of the capital stock, the amount of authorized but unissued promissory notes will be reduced by the amount, if any, by which the proceeds of $550,000 from the sale of the capital stock exceeds the amount of Granite's then outstanding note indebtedness.

The application-declaration further states that the total expenses to Granite and to NEES in connection with the proposed transactions, including services rendered by New England Power Service Company, an affiliated service company, at the actual cost thereof, are estimated at $1,405 and $300, respectively.

The application-declaration further states that Granite has applied to the New Hampshire Public Utilities Commission for approval of the proposed issuance and sale of capital stock and that no other State commission or Federal commission, other than this Commission, has jurisdiction over the proposed transactions.

It is requested that the Commission's order herein become effective upon issuance.

Notice is further given that any interested person may, not later than October 24, 1952, at 5:30 p. m., e. s. t., request the Commission in writing that a hearing be held on such matter, stating the nature of his interest, the reason or reasons for such request and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, 425 Second Street NW., Washington 25, D. C. At any time after said date, the application-declaration, as filed or as amended, may be granted and permitted to become effectives as provided in Rule U-23 of the rules and regulations promulgated under the act, or the Commission may exempt such transactions as provided in Rules U-20 and U-100 thereof.

By the Commission.

[File No. 70-2943]

COLUMBIA GAS SYSTEM, INC.

NOTICE REGARDING PROPOSED ISSUANCE AND SALE OF NOTES TO CERTAIN BANKS

OCTOBER 9, 1952.

Notice is hereby given that a declaration has been filed with this Commission by the Columbia Gas System, Inc. ("Columbia"), a registered holding company, pursuant to the Public Utility Holding Company Act of 1935. Sections 6 and 7 of the act have been designated as being applicable to the proposed transactions.

All interested persons are referred to said declaration which is on file in the offices of this Commission for a statement of the transactions therein proposed, which are summarized as follows:

Columbia proposes to borrow an aggregate of $25,000,000 ($12,500,000 on or before November 15, 1952 and $12,500,000 on or before January 15, 1953) from certain banking institutions and to issue notes in evidence thereof. The proposed borrowings will be made in the indicated amounts from the following banks:

Name of bank	Maximum participation
Guaranty Trust Co	$8,530,000
Bankers Trust Co	2,500,000
Chemical Bank & Trust Co	2,500,000
Irving Trust Co	2,500,000
Mellon National Bank & Trust Co. (Pittsburgh, Pa.)	2,500,000
The Hanover Bank	1,000,000
Brown Bros., Harriman & Co	1,000,000
The First National Bank of the City of New York	1,000,000
J. P. Morgan & Co., Inc	1,000,000
National City Bank of New York	1,000,000
Manufacturers Trust Co	1,000,000
The Ohio National Bank (Columbus, Ohio)	250,000
The Kanawha Valley Bank (Charleston, W. Va.)	100,000
The Charleston National Bank	100,000
First National Bank of Binghamton	20,000
Total	25,000,000

The bank notes to be issued by Columbia in evidence of such borrowings will be dated as of the date the money is borrowed and will mature on October 31, 1953. The rate of interest will be 3 percent per annum and the notes may be prepaid at any time prior to the date of maturity.

Columbia states that the proposed borrowings are necessary in order to provide the Columbia system with funds to continue its construction program. Columbia further represents that it is the intention of the Company to sell common stock in the Spring of 1953, unless at that time there should be any unusual adverse market conditions. In addition, Columbia also proposes to sell additional debentures during 1953 and the proceeds to be derived from the sale of additional common stock and debentures will be used to repay the bank loans which are the subject of this declaration and to provide additional funds to finance its 1953 construction program.

The declaration further states that no State Commission or Federal Commission, other than this Commission, has jurisdiction over the proposed transactions.

It is requested that the Commission's order herein become effective forthwith upon issuance.

Notice is further given that any interested person may, not later than October 24, 1952, at 5:30 p. m., e. s. t., request the Commission in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law, if any, raised by the said declaration which he desires to controvert, or may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, 425 Second Street NW., Washington 25, D. C. At any time after October 24, 1952, said declaration, as filed or as amended, may be permitted to become effective as provided in Rule U-23 of the rules and regulations promulgated under the act, or the Commission may exempt such transactions as provided in Rule U-20 (a) and Rule U-100 thereof.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

[File No. 70-2942]

GAS SERVICE CO.

NOTICE OF FILING REGARDING PROPOSED BANK BORROWINGS

OCTOBER 9, 1952.

Notice is hereby given that a declaration has been filed with this Commission pursuant to the Public Utility Holding Company Act of 1935 ("act") by the Gas Service Company ("Gas Company"), a gas utility company and a subsidiary of Cities Service Company, a registered holding company. Declarant has designated sections 6 (a) and 7 of the act as applicable to the proposed transactions, which are summarized as follows:

Gas Company proposes to enter into a Credit Agreement with the Chase National Bank of the City of New York ("Chase Bank") and Commerce Trust Company ("Commerce Trust") whereby Gas Company may borrow from time to time on or prior to November 1, 1954, aggregate principal amounts of $5,500,000 from Chase Bank and $2,000,000 from Commerce Trust. Each loan will be evidenced by a promissory note payable on June 1, 1956, and bearing interest at the rate of 3 percent per annum up to January 1, 1954, and at the rate of 3¼ percent per annum thereafter. The Credit Agreement provides, among other things, that Gas Company will pay a commitment fee of ¼ of 1 percent per annum on the daily average unused amount of the commitments from October 1, 1952, which commitments may be terminated or reduced by the Company upon five days' written notice and that the notes may be prepaid without premium, unless such prepayment is made before June 1, 1955, and is made from proceeds of bank loans.

The filing states that the net proceeds from the loans will be used by Gas Company for construction purposes and to reimburse the Company's treasury in part for construction work heretofore completed. This construction program is estimated to require the expenditure of approximately $13,619,000 during the years 1952 to 1954, inclusive. Gas Company expects that of this amount, approximately $7,500,000 will be available under the proposed Credit Agreement (to be borrowed in approximate amounts of $2,000,000, $4,000,000, and $1,500,000 respectively in the years 1952, 1953, and 1954) and that the balance of approximately $6,119,000 can be provided out of the Company's general funds.

The filing further states that the State Corporation Commission of Kansas, the Public Service Commission of Missouri and the Nebraska State Railway Commission have jurisdiction over the proposed transactions and that the orders of these Commissions will be filed by amendment to the instant declaration.

Gas Company states that no finder's fees, commissions or remuneration will be paid in connection with the proposed transactions, and estimates its expenses at $10,500, which include legal fees of $7,500, fees and expenses in connection with applications to State Commissions of $1,500, expenses of Gas Advisers, Inc., a mutual service company, of $500, and printing and miscellaneous expenses of $1,000.

Notice is further given that any interested person may, not later than October 23, 1952, at 5:30 p. m., e. s. t., request the Commission in writing that a hearing be held on such matter, stating the reasons for such request, the nature of his interest and the issues of fact or law raised by said declaration which he desires to controvert, or may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, 425 Second Street NW., Washington 25, D. C. At any time after October 23, 1952, said declaration, as filed or as amended, may be permitted to become effective as provided in Rule U-23 of the rules and regulations promulgated under the act, or the Commission may exempt such transaction as provided in Rules U-20 (a) and U-100 thereof.

Declarant requests that the Commission's order herein become effective upon issuance.

By the Commission.

INTERSTATE COMMERCE COMMISSION

[4th Sec. Application 27456]

SPENT SULPHURIC ACID FROM ANNISTON, ALA., TO LAVERGNE, TENN.

APPLICATION FOR RELIEF

OCTOBER 10, 1952.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: R. E. Boyle, Jr., Agent, for the Louisville and Nashville Railroad Company and The Nashville, Chattanooga & St. Louis Railway.

Commodities involved: Sulphuric acid, spent, in tank-car loads.

From: Anniston, Ala.

To: Lavergne, Tenn.

Grounds for relief: Competition with rail carriers, circuitous routes, and to apply rates constructed on the basis of the short line distance formula.

Schedules filed containing proposed rates: C. A. Spaninger, Agent, I. C. C. No. 1200, Supp. 62.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission, Division 2.

[SEAL] GEORGE W. LAIRD,
Acting Secretary.

[F. R. Doc. 52-11168; Filed, Oct. 14, 1952; 8:47 a. m.]

[4th Sec. Application 27457]

LUMBER FROM PACIFIC COAST TERRITORY TO WASHINGTON, D. C., AND VIRGINIA

APPLICATION FOR RELIEF

OCTOBER 10, 1952.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: R. E. Boyle, Jr., Agent, for carriers parties to Agent L. E. Kipp's tariffs I. C. C. Nos. 1504 and 1511.

Commodities involved: Lumber and forest products, carloads.

From: Pacific Coast territory.

To: Washington, D. C., and points in Virginia.

Grounds for relief: Competition with rail carriers, circuitous routes, and to maintain grouping.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission, Division 2.

[SEAL] GEORGE W. LAIRD,
Acting Secretary.

[F. R. Doc. 52-11167; Filed, Oct. 14, 1952; 8:47 a. m.]

[4th Sec. Application 27458]

COKE FROM TERRE HAUTE, IND., TO SIGLO, TENN.

APPLICATION FOR RELIEF

OCTOBER 10, 1952.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: R. G. Raasch, Agent, for carriers parties to his tariff I. C. C. No. 741.

Commodities involved: Coke, coke breeze, dust, and screenings, carloads.

From Terre Haute, Ind.

To: Siglo, Tenn.

Grounds for relief: Rail competition, circuitous routes, to maintain grouping, and to apply rates constructed on the basis of the short line distance formula.

Schedules filed containing proposed rates: R. G. Raasch, Agent, I. C. C. No. 741, Supp. 28.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission, Division 2.

DEPARTMENT OF JUSTICE

Office of Alien Property

[Vesting Order 19028]

JASPER EILERTS

In re: Estate of Jasper Eilerts, deceased. 017-27664.

Under the authority of the Trading With the Enemy Act, as amended, (50 U. S. C. App. and Sup. 1-40); Public Law 181, 82d Cong., 65 Stat. 451; Executive Order 9193, as amended by Executive Order 9567 (3 CFR 1943 Cum. Supp.; 3 CFR 1945 Supp.); Executive Order 9788 (3 CFR 1946 Supp.) and Executive Order 9989 (3 CFR 1948 Supp.), and pursuant to law, after investigation, it is hereby found:

1. That Klaas Ackermann, a k/a Claas Peter Bernhard Ackermann whose last known address is Germany, on or since December 11, 1941, and prior to January 1, 1947, was a resident of Germany and is, and prior to January 1, 1947, was a national of a designated enemy country (Germany);

2. That all right, title, interest and claim of any kind or character whatsoever of the person identified in subparagraph 1 hereof, in and to the Estate of Jasper Eilerts, deceased, is property which is and prior to January 1, 1947, was within the United States owned or controlled by, payable or deliverable to, held on behalf of or on account of, or owing to, or which is evidence of ownership or control by, the aforesaid na-

tional of a designated enemy country (Germany);

and it is hereby determined:

3. That the national interest of the United States requires that Klaas Ackermann, a/k/a Claas Peter Bernhard Ackermann, be treated as a person who is and prior to January 1, 1947, was a national of a designated enemy country (Germany).

All determinations and all action required by law, including appropriate consultation and certification, having been made and taken, and, it being deemed necessary in the national interest,

There is hereby vested in the Attorney General of the United States the property described above, to be held, used, administered, liquidated, sold or otherwise dealt with in the interest of and for the benefit of the United States.

The terms "national" and "designated enemy country" as used herein shall have the meanings prescribed in section 10 of Executive Order 9193, as amended.

Executed at Washington, D. C., on October 9, 1952.

For the Attorney General.

[SEAL] ROWLAND F. KIRKS,
Assistant Attorney General, Director, Office of Alien Property.

[Vesting Order 19029]

CHRISTINA AND AMANDUS TAUBERT

In re: Claims of Christina Taubert and the personal representatives, heirs, next of kin, legatees and distributees of Amandus Taubert, deceased. F-28-31796, F-28-31797.

Under the authority of the Trading With the Enemy Act, as amended (50 U. S. C. App. and Sup. 1-40); Public Law 181, 82d Congress, 65 Stat. 451; Executive Order 9193, as amended by Executive Order 9567 (3 CFR 1943 Cum. Supp.; 3 CFR 1945 Supp.); Executive Order 9788 (3 CFR 1946 Supp.) and Executive Order 9989 (3 CFR 1948 Supp), and pursuant to law, after investigation, it is hereby found:

1. That Christina Taubert, whose last known address is Kallenlengsfeld, Thuringen, Germany, on or since December 11, 1941, and prior to January 1, 1947 was a resident of Germany and is, and prior to January 1, 1947 was, a national of a designated enemy country (Germany);

2. That the personal representatives, heirs, next of kin, legatees and distributees of Amandus Taubert, deceased, who there is reasonable cause to believe on or since December 11, 1941, and prior to January 1, 1947 were residents of Germany, are, and prior to January 1, 1947, were, nationals of a designated enemy country (Germany);

3. That the property described as follows: Any and all rights and claims to Social Security benefits under the Social Security Act approved August 14, 1935, as amended (Pub. Law 271, 74th Cong., 1st Sess., 49 Stat. 620) to January 1, 1947, of Christina Taubert, identified by Social Security Account Number 115-16-6766,

is property which is and prior to January 1, 1947, was within the United States owned or controlled by, payable or deliverable to, held on behalf of or on account of, or owing to, or which is evidence of ownership or control by, Christina Taubert, the aforesaid national of a designated enemy country (Germany);

4. That the property described as follows: Any and all rights and claims to survivor benefits to January 1, 1947, under the Social Security Act approved August 14, 1935, as amended (Pub. Law 271, 74th Cong. 1st Sess. 49 Stat. 620) to January 1, 1947, arising out of the demise of Amandus Taubert, and identified by Social Security Account Number 115-16-6766,

is property which is and prior to January 1, 1947, was within the United States owned or controlled by, payable or deliverable to, held on behalf of or on account of, or owing to, or which is evidence of ownership or control by, the personal representatives, heirs, next of kin, legatees and distributees of Amandus Taubert, deceased, the aforesaid nationals of a designated enemy country (Germany);

and it is hereby determined:

5. That the national interest of the United States requires that the persons referred to in subparagraph 1 and 2 hereof be treated as persons who are and prior to January 1, 1947, were nationals of a designated enemy country (Germany).

All determinations and all action required by law, including appropriate consultation and certification, having been made and taken, and, it being deemed necessary in the national interest,

There is hereby vested in the Attorney General of the United States the property described above, to be held, used, administered, liquidated, sold or otherwise dealt with in the interest of and for the benefit of the United States.

The terms "national" and "designated enemy country" as used herein shall have the meanings prescribed in section 10 of Executive Order 9193, as amended.

Executed at Washington, D. C., on October 9, 1952.

For the Attorney General.

[SEAL] ROWLAND F. KIRKS,
Assistant Attorney General, Director, Office of Alien Property.

[F. R. Doc. 52-11205; Filed, Oct. 14, 1952; 8:53 a. m.]

HERBERT SCHWARZ

Washington, Thursday, October 16, 1952

TITLE 3—THE PRESIDENT

PROCLAMATION 2992

KOREA—SUSPENSION OF TONNAGE DUTIES

BY THE PRESIDENT OF THE UNITED STATES OF AMERICA

A PROCLAMATION

WHEREAS section 4228 of the Revised Statutes of the United States, as amended by the act of July 24, 1897, c. 13, 30 Stat. 214 (U. S. C., title 46, sec. 141), provides, in part, as follows:

"Upon satisfactory proof being given to the President, by the government of any foreign nation, that no discriminating duties of tonnage or imposts are imposed or levied in the ports of such nation upon vessels wholly belonging to citizens of the United States, or upon the produce, manufactures, or merchandise imported in the same from the United States or from any foreign country, the President may issue his proclamation, declaring that the foreign discriminating duties of tonnage and impost within the United States are suspended and discontinued, so far as respects the vessels of such foreign nation, and the produce, manufactures, or merchandise imported into the United States from such foreign nation, or from any other foreign country; the suspension to take effect from the time of such notification being given to the President, and to continue so long as the reciprocal exemption of vessels, belonging to citizens of the United States, and their cargoes, shall be continued, and no longer • • •";

AND WHEREAS satisfactory proof was received by me from the Government of Korea on October 1, 1952, that no discriminating duties of tonnage or imposts are imposed or levied in the ports of Korea upon vessels wholly belonging to citizens of the United States, or upon the produce, manufactures, or merchandise imported in such vessels, from the United States, or from any foreign country:

NOW, THEREFORE, I, Harry S. Truman, President of the United States of America, by virtue of the authority vested in me by the above-quoted statutory provisions, do hereby declare and proclaim that the foreign discriminating duties of tonnage and imposts within the United States are suspended and discontinued so far as respects the vessels of Korea and the produce, manufactures, or merchandise imported in said vessels into the United States from Korea or from any other foreign country; the suspension to take effect from October 1, 1952, and to continue so long as the reciprocal exemption of vessels belonging to citizens of the United States and their cargoes shall be continued, and no longer.

IN TESTIMONY WHEREOF, I have hereunto set my hand and caused the seal of the United States of America to be affixed.

DONE at the City of Washington this thirteenth day of October, in the year of our Lord nineteen hundred and fifty-two and of the Independence of the United States of America the one hundred and seventy-seventh.

[SEAL] HARRY S. TRUMAN

By the President:

DAVID BRUCE,
Acting Secretary of State.

PROCLAMATION 2993

COPYRIGHT—PRINCIPALITY OF MONACO

BY THE PRESIDENT OF THE UNITED STATES OF AMERICA

A PROCLAMATION

WHEREAS section 9 of title 17 of the United States Code, entitled "Copyrights", as codified and enacted into positive law by the act of Congress approved July 30, 1947, 61 Stat. 652, provides in part that the copyright secured by said title shall extend to the work of an author or proprietor who is a citizen or subject of a foreign state or nation only:

"(a) When an alien author or proprietor shall be domiciled within the United States at the time of the first publication of his work; or

"(b) When the foreign state or nation of which such author or proprietor is a citizen or subject grants, either by treaty, convention, agreement, or law, to citizens of the United States the benefit of copyright on substantially the same basis as to its own citizens, or copyright protection, substantially equal to the protection secured to such foreign author under this title or by treaty; or when such foreign state or nation is a party

WHEREAS section 1 of the said title 17 provides in part as follows:

"Any person entitled thereto, upon complying with the provisions of this title, shall have the exclusive right:

* * * * *

"(e) To perform the copyrighted work publicly for profit if it be a musical composition; * * * *Provided*, That the provisions of this title, so far as they secure copyright controlling the parts of instruments serving to reproduce mechanically the musical work, shall include only compositions published and copyrighted after July 1, 1909, and shall not include the works of a foreign author or composer unless the foreign state or nation of which such author or composer is a citizen or subject grants, either by treaty, convention, agreement, or law, to citizens of the United States similar rights.";

and

WHEREAS section 9 of the said title 17 further provides that "The existence of the reciprocal conditions aforesaid shall be determined by the President of the United States, by proclamation made from time to time as the purposes of this title may require * * *"; and

WHEREAS a Sovereign Ordinance has been issued this day by His Serene Highness the Prince of Monaco whereby citizens of the United States as of this day are entitled to obtain copyright protection in the Principality of Monaco for all their artistic and literary works on substantially the same basis as nationals of Monaco, including rights similar to those provided by section 1 (e) of the said title 17:

NOW, THEREFORE, I, HARRY S. TRUMAN, President of the United States of America, do declare and proclaim:

That as of this day the conditions specified in sections 9 (b) and 1 (e) of title 17 of the United States Code exist and are fulfilled with respect to nationals of the Principality of Monaco, and that nationals of the Principality of Monaco as of this day are entitled to all the benefits of the said title 17 except those conferred by the provisions embodied in the second paragraph of section 9 (b) thereof regarding the extension of time for fulfilling copyright conditions and formalities.

Provided, that the enjoyment by any work of the rights and benefits conferred by the said title 17 shall be conditioned upon compliance with the requirements and formalities prescribed with respect to such works by the copyright laws of the United States:

And provided further, that the provisions of section 1 (e) of the said title 17, so far as they secure copyright controlling parts of instruments serving to reproduce mechanically the musical work, shall apply only to compositions published on or after this day, and registered for copyright in the United States which have not been reproduced within the United States prior to this day on any contrivance by means of which the work may be mechanically performed.

IN WITNESS WHEREOF, I have hereunto set my hand and caused the Seal of the United States of America to be affixed.

DONE at the City of Washington this fifteenth day of October in the [SEAL] year of our Lord nineteen hundred and fifty-two and of the Independence of the United States of America the one hundred and seventy-seventh.

HARRY S. TRUMAN

By the President:

DAVID BRUCE,
Acting Secretary of State.

RULES AND REGULATIONS

TITLE 32A—NATIONAL DEFENSE, APPENDIX

Chapter I—Office of Defense Mobilization

[Defense Mobilization Order 22]

DMO 22—PROGRAM TO MINIMIZE PROSPECTIVE FULL MOBILIZATION DEFICIENCIES OF STRATEGIC AND CRITICAL BAND I MATERIALS

Purpose. The purpose of this order is to reaffirm the policy, assign responsibility and specify the further actions necessary to minimize the prospective full mobilization shortages of certain strategic materials specified as Band I.

Definition. Band I materials are those for which the presently prospective supply without remedial steps is currently calculated to be inadequate by substantial margins to meet minimum requirements for full scale mobilization. Periodically, DPA, with the advice of other responsible agencies, will review the Strategic and Critical Materials Stockpile List and, with the approval of ODM, make appropriate changes in the materials included in Band I.

Policy. All responsible agencies will intensify their current activities to (a) expand supply and (b) eliminate unessential requirements for these Band I materials so that, in case of full mobilization, shortages of these strategic materials will not be a limiting factor in meeting the major end-item programs of the Department of Defense.

Program. The following program is designed to reinforce current actions being undertaken to carry out this policy:

1. DPA shall prepare quarterly analyses of the demand-supply position of Band I materials under specific assumptions with respect to 5-year full mobilization requirements, conservation practices and supply expansions. These analyses shall be used by all responsible agencies in developing these programs. They will provide a continuing record of programs realized and projected to permit the Government to know as accurately as possible the magnitude of the risk entailed by prospective shortages. They will also provide a basis and justification for extraordinary measures to be taken to eliminate unessential requirements and expand supply. The responsible agencies shall provide DPA with information in the detail it prescribes to fulfill this responsibility.

The analyses shall be submitted to ODM once a quarter, starting November 1, 1952. DPA shall include with these analyses a statement of the policy issues involved and recommendations with respect to future action for the consideration of the Director of ODM.

2. The Munitions Board and the responsible civilian agencies shall intensify action required to improve techniques for estimating military, war-supporting and essential civilian full mobilization requirements for Band I materials. Estimates of requirements for military "A" products are the responsibility of the Munitions Board. It is essential that to the greatest extent possible full mobilization requirements be based on feasible schedules of end-item production and on realistic end-item bills-of-materials, reflecting feasible prospective conservation practices. To the extent factoring is necessary, it should reflect not projections of historical data, but realistic bills-of-materials. In reviewing requirements for military "A" products, representatives of the DPA Military and Atomic Energy Division of the Office of Program and Requirements shall have access to the bases underlying the Munitions Board's estimated requirements in order to facilitate the preparation of reliable estimates. They shall also assist the Munitions Board in the development of these bases, where appropriate. Estimates of military "B" product requirements are the responsibility of NPA. Estimates of requirements for war-supporting and essential civilian programs are the responsibility of DPA working with the other responsible civilian agencies.

3. All agencies shall intensify conservation efforts. DPA, working with the Munitions Board and the responsible civilian agencies, shall (a) prepare a quarterly list of feasible conservation recommendations, (b) wherever practicable, set quantitative goals for each recommendation, and (c) measure progress being achieved. These conservation practices should be reflected in requirements estimates submitted to DPA.

Both civilian and military agencies shall strengthen their administrative procedure for putting conservation recommendations into effect as rapidly as possible. Re-design and substitution will be necessary in some military end-items to insure the absolute minimum use of scarce materials consistent with desired performance characteristics. Through control measures, maximum practicable conservation of these scarce materials should be achieved in industrial and civilian production. Research must be emphasized leading to development of alternate materials and alloys, which will make materials available with similar performance characteristics for specific uses.

4. DMPA shall intensify expansion activities necessary to increase the supply of Band I materials beyond presently achieved levels. Based on programs authorized by DPA, DMPA should initiate such extraordinary measures as may be required to expand supply. To achieve this objective any of the following measures may be used by DMPA: loans and advances, grants of funds for exploration and technological development, long-term contracts with market guarantees and prices substantially higher than current market prices, bonus payments for accelerated delivery, the underwriting of additional cost on an arbitration basis for early delivery, negotiations with foreign governments and other Government assistance available under existing legislation. In those cases where the Administrator of the Defense Materials Procurement Agency finds it is necessary to make future Government contracts or letters of intent binding in order to accelerate the accomplishment of these programs, such contracts or letters of intent may be made binding even though later information may lead to a reduction of calculated deficiencies.

DMPA shall prepare for DPA quarterly reports, indicating both reasonably assured and potential sources of supply—with data specifying the financial obligation assumed by the Government in each case. These reports should also include specific recommendations for further action, indicating whether existing measures are adequate or whether new measures and authority are required.

DMPA shall also prepare a study, directed in the case of each Band I material, to that price level and market guarantee above and beyond which it is to the Government's interest to build facilities rather than to purchase materials. Review of tax legislation and changes in defense legislation pertaining to the question of construction of facilities versus purchase of materials is also requested of DMPA.

5. The Munitions Board shall give priority to the review of stockpile objectives for Band I materials and, jointly with the Secretary of the Interior, revise them where necessary. Stockpile objectives shall provide a firm basis for commitments to expand supply.

6. The DPA will rely on the Director for Mutual Security to arrange for appropriate steps to: (a) Formulate estimates of friendly countries' supply-demand position for Band I materials under conditions of full mobilization; (b) encourage expansion of production in friendly countries, and (c) stimulate conservation programs in friendly consuming countries.

The Director for Mutual Security also should recommend to the Director of Defense Mobilization such other steps concerning U. S. policies affecting programming, procurement, conservation, and development of materials which would make foreign sources of supply more reliable and contribute to the maximum collective strength of the free world.

7. The coordination and direction of this program shall be the responsibility of DPA. The primary objective of DPA shall be to establish a firm basis for action by all agencies in order to obtain, as soon as possible, the indispensable minimum amount of materials necessary for full mobilization.

This order is to take effect on October 17, 1952.

OFFICE OF DEFENSE MOBILIZATION,
HENRY H. FOWLER,
Director.

OCTOBER 15, 1952.

[F. R. Doc. 52-11299; Filed, Oct. 15, 1952; 11:22 a. m.]

Chapter III—Office of Price Stabilization, Economic Stabilization Agency

[Ceiling Price Regulation 122, Amdt. 1]

CPR 122—CEILING PRICES FOR WESTERN SOFTWOOD PLYWOOD AND VENEER

MISCELLANEOUS AMENDMENTS

Pursuant to the Defense Production Act of 1950, as amended, Executive Order 10161, and Economic Stabilization General Order No. 2, this Amendment 1 to Ceiling Price Regulation 122 is hereby issued.

STATEMENT OF CONSIDERATIONS

This amendment to CPR 122 adds to the regulation ceiling prices and established weights for direct mill sales of most grades and sizes of Plyron, a Douglas Fir plywood faced with hardboard. It also clarifies Section 3 (b) of the regulation which deals with less-than-carload sales.

Plyron is grade marked and inspected by the Douglas Fir Plywood Association and is nationally advertised under that trade name. It has many industrial uses, in addition to being used as siding and concrete forms and in connection with cabinet and built-in fixtures. The production of Plyron on a large scale began at a relatively recent date. Thus, about 10 companies are presently producing it, whereas there were only 3 producers 2 years ago. Most manufacturers who are presently manufacturing only a few items are planning the manufacture of a fuller and more diversified line. Other mills which are not producing this product at the present time are planning to start its manufacture in the near future. The purpose of this amendment is to give all manufacturers a uniform ceiling price on most grades and sizes of Plyron.

The level of prices established by this amendment for Plyron is approximately at the level prevailing in the base period of the GCPR. The average GCPR level was generally used in establishing ceiling prices for other commodities covered by CPR 122.

The changes in section 3 (b) of CPR 122 make it clear that the addition for less than carload direct mill sales of any product covered by this regulation is permitted only when a less-than-carload freight rate applies from the manufacturer's point of origin of shipment. Such was the original intent of the provision, which was placed in the regulation to provide an additional reimbursement to the producing mill to cover increased expenses involved in handling less-than-carload shipments. An interpretation to this effect was previously issued by the Office of Price Stabilization.

The character of this amendment made it impracticable to consult formally with industry representatives, although, wherever feasible, various representatives from industry were informally consulted and consideration was given to their recommendations.

In the judgment of the Director of Price Stabilization the provisions of this amendment are generally fair and equitable and are necessary to effectuate the purposes of Title IV of the Defense Production Act of 1950, as amended.

AMENDATORY PROVISIONS

Ceiling Price Regulation 122 is hereby amended in the following respects:

1. A new paragraph (g) is added to section 16 immediately following paragraph (f) to read as follows:

(g) *Plyron.* The ceiling prices f. o. b. mill for carload direct mill sales per 1,000 square feet of Plyron, a plywood with inner plies of Douglas Fir veneer manufactured in accordance with the standards of the United States Department of Commerce, National Bureau of Standards, published in Commercial Standard CS 45-48 (Douglas Fir Plywood, domestic grades) Eighth Edition, effective November 1, 1948, and faced with 1/10" or 1/8" hardboard (tempered or treated) shall be as follows:

TABLE 10—PLYRON

[Widths 24" to 48" in 6" breaks; lengths 48", 60", 72", 84", 96"]

Thickness	Number of plies	Interior	Exterior
5/16 inch	3		$190
3/8 inch	3		210
1/2 inch	5	$235	277
5/8 inch	5	267	275
3/4 inch	7	286	295
7/8 inch	7	321	357
1 inch	7	364	374
1 1/8 inches	7	377	405
1 1/4 inches	9	419	444

2. Section 18 is amended to read as follows:

SEC. 18. *Established weights of plywood.* Established weights no higher than the following may be used in figuring delivery charges of plywood:

[Pounds per 1,000 square feet]

Thickness	Douglas fir, hemlock, noble fir, white fir, spruce	Western pine	Redwood cedar	Plyron
1/4-inch	490	450		
5/32-inch	640	525		
9/32-inch	790	700	600	
11/32-inch	950	875		
5/16-inch	1,125	1,050	850	
3/8-inch	1,300	1,225		
7/16-inch	1,525	1,400	1,175	2,125
15/32-inch	1,675	1,575		
9/16-inch	1,825	1,750	1,425	2,425
5/8-inch	2,000	1,925		
11/16-inch	2,225	2,100	1,950	2,825
3/4-inch	2,375	2,275		
13/16-inch	2,600	2,450		3,200
7/8-inch	2,800	2,625		
15/16-inch	3,000	2,800		3,600
1 inch	3,175	2,975		
1 1/8-inches	3,350	3,150		3,950
1 1/4-inches	3,640	3,325		
1 5/16-inches	3,790	3,500		4,440

For thicknesses greater than 1 1/4" use 1" weight plus weight of other thicknesses necessary.

NOTE: The seller must apply to the Lumber & Wood Products Branch, Office of Price Stabilization, Washington 25, D. C., for established weights for other softwood species and other products covered by this regulation not shown in above tables.

3. Section 3 (b) of CPR 122 is amended to read as follows:

(b) *Ceiling prices f. o. b. mill for less-than-carload direct mill sales.* When a less-than-carload freight rate applies at the manufacturer's point of origin of shipment, the ceiling price f. o. b. mill for less-than-carload direct mill sales of any product covered by this regulation shall be 10 percent over the prices set forth in the ceiling price tables of this regulation. You may not make a charge under this paragraph if you charge under section 17 (l) for carload shipments mixed with lumber.

(Sec. 704, 64 Stat. 816, as amended; 50 U. S. C. App. Sup. 2154)

Effective date. This amendment is effective October 20, 1952.

JOSEPH H. FREEHILL,
Acting Director of Price Stabilization.

OCTOBER 15, 1952.

[F. R. Doc. 52-11309; Filed, Oct. 15, 1952; 4:00 p. m.]

[Ceiling Price Regulation 161, Amdt. 1]

CPR 161—CONSUMER DURABLE GOODS REGULATION

CLARIFYING AMENDMENTS

Pursuant to the Defense Production Act of 1950, as amended, Executive Order 10161, and Economic Stabilization Agency General Order No. 2, this amendment to Ceiling Price Regulation 161 is hereby issued.

STATEMENT OF CONSIDERATIONS

This amendment to Ceiling Price Regulation 161 adds to, clarifies and corrects the list of commodities contained in Appendix A, and makes technical changes in the text of the regulation.

Certain commodities were inadvertently included within the coverage of this regulation although they were not within the classification of consumer goods subject to Ceiling Price Regulations 22 and 161 and are covered by other regulations. These items—lighting fixture glassware (blown and pressed only), butcher saws, auto radio antennas, electronic signaling systems and parts, and motor scooters—are by this amendment removed from Appendix A and the coverage of CPR 161.

Thermostats for use on gas and electric cooking ranges are subject to CPR 22, but special considerations have dictated their exclusion from CPR 161, and they are, consequently, removed from Appendix A by this amendment.

Jewelled watches, wholly manufactured in the United States, are added to Appendix A because they are consumer durable goods presently subject to Ceiling Price Regulation 22 or the General Ceiling Price Regulation, and, consequently, are in the same classification as other commodities listed in Appendix A to CPR 161 and should be covered by that regulation for the same reasons. Clock type watches are presently listed in Appendix A. Watches and clocks made in the United States with imported movements remain subject to Ceiling Price Regulation 145.

Hot plates, portable ovens, and domestic space heaters are also consumer durable goods presently subject to CPR 22 or the General Ceiling Price Regulation and were intended to be covered by Ceiling Price Regulation 161. For this reason, this amendment adds them to Appendix A. In addition, the present listings of freezers and refrigerators are amended to make clear that the larger commercial and industrial types are not covered by Ceiling Price Regulation 161.

The listing of motion picture cameras, etc., is altered to exclude cameras and other photographic apparatus taking film of 35 mm. or larger. This is necessary to avoid conflict with CPR 30, which provides for cameras using the larger film and for studio, theatre, commercial and industrial cameras and other photographic apparatus.

A typographical error appeared in subparagraph 3 of Appendix A. Since signs are now exempted from price controls, this subparagraph is being deleted instead of corrected. Another typographical error in paragraph 9 relating to asphalt tile is being corrected.

Section 6 (d) of CPR 161 relates to ceiling prices for sales to a new class of purchaser. This provision was intended to apply to all commodities listed in Appendix A and not only to "new" commodities. The first unnumbered paragraph of section 1 and the heading of section 6 are amended to make this intention clear.

Subsequent to the issuance of CPR 161 certain small manufacturers have been exempted from CPR 22 and the GCPR. This amendment extends that exemption to CPR 161 for the same reasons as are set forth in the Statement of Considerations for Amendment 33 to the GCPR.

In view of the technical nature of the changes and clarifications made by this amendment, and the desirability of immediate correction, the Director of Price Stabilization has found that special circumstances have rendered consultation with industry representatives, including trade association representatives, impracticable.

AMENDATORY PROVISIONS

Ceiling Price Regulation 161 is hereby amended in the following respects:

1. Section 1 is amended by inserting the following sentence at the end of the third sentence of the first unnumbered paragraph after the words "General Ceiling Price Regulation":

Similarly, this regulation applies to, and replaces CPR 22 and the GCPR as to the determination of ceiling prices for, sales of all commodities listed in Appendix A to a new class of purchaser.

2. Section 1 is amended by adding the following paragraph at the end of the section:

This regulation does not cover manufacturers who are exempt from price control by virtue of section 14 (n) of the General Ceiling Price Regulation or Appendix A (a) (4) of Ceiling Price Regulation 22.

3. Section 6 is amended by deleting the period and adding the following words at the end of its heading, "and for sales to a new class of purchaser" so that it reads as follows:

SEC. 6. *Ceiling prices for new commodities not covered by the preceding sections and for sales to a new class of purchaser.*

4. Paragraph 1 of Appendix A is amended in the following respects:

(i) Add the words "farm and home" after the word "Freezers" so that the subparagraph reads as follows:

Freezers, farm and home.

(ii) After the subparagraph "Freezers, farm and home" add a new subparagraph to read as follows:

Hot plates.

(iii) After the subparagraph "Laundry washers and driers" add a new subparagraph to read as follows:

Portable ovens.

(iv) Add the word "domestic" after the word "Refrigerators" so that the subparagraph reads as follows:

Refrigerators, domestic.

(v) After the subparagraph "Sewing machines and attachments" add a new subparagraph to read as follows:

Space heaters, domestic.

5. Paragraph 3 of Appendix A is amended by deleting the subparagraph:

Signs (except car, lithographed and printed).

6. Paragraph 5 of Appendix A is amended in the following respects:

(i) Insert the words "and watches and clocks made with imported movements" in the heading so that it reads as follows:

Clocks and watches (except time clocks and industrial timing devices and watches and clocks made with imported movements)

(ii) Insert the following subparagraph after "Timers, clock":

Watches, jewelled, wholly manufactured in the United States.

7. Paragraph 9 of Appendix A is amended by correcting the first subparagraph to read as follows:

Asphalt tile.

8. Paragraph 12 of Appendix A is amended by deleting the subparagraph:

Lighting fixture glassware (blown and pressed only).

9. Paragraph 14 of Appendix A is amended by deleting the following subparagraphs:

Butcher saws.
Thermostats for use on gas and electric cooking ranges.

10. Paragraph 27 of Appendix A is amended by adding to the last subparagraph the phrase "less than 35 mm." immediately following the word "apparatus," and the word "not" immediately preceding the phrase "for studio" so that it reads as follows:

Motion picture cameras, projectors and apparatus, less than 35 mm., including sound equipment and parts for recording, reproducing and projecting (not for studio, theatre, commercial, and industrial use).

11. Paragraph 33 of Appendix A is amended in the following respects:

(i) Delete from the first subparagraph the words "automobile radio" so that it reads as follows:

Antennas, household radio and television.

(ii) Delete the following subparagraph:

Signaling systems and parts, electronic (not covered by CPR 30).

12. Paragraph 40 of Appendix A is amended by deleting the words "motor scooter" from the sixth subparagraph so that it reads as follows:

Motor bicycles and power cycles.

(Sec. 704, 64 Stat. 816, as amended; 50 U. S. C. App. Sup. 2154)

Effective date. This amendment is effective October 15, 1952.

JOSEPH H. FREEHILL,
Acting Director of Price Stabilization.

OCTOBER 15, 1952.

UNIVERSITY OF MICHIGAN

[Distribution Regulation 1, Revision 1, Amdt. 4]

DR 1—Fair Distribution of Livestock and Meat

REGISTRATION OF SLAUGHTERERS; SUSPENSION OF REPORTING REQUIREMENTS

Pursuant to the Defense Production Act of 1950, as amended, Executive Order 10161, Delegation of Authority by the Secretary of Agriculture with respect to meat, as amended, and Economic Stabilization Agency General Order 5, Revision, this Amendment 4 to Distribution Regulation 1, Revision 1, is hereby issued.

STATEMENT OF CONSIDERATIONS

This amendment makes the following changes in Distribution Regulation 1, Revision 1 (DR 1, Rev. 1):

(1) This amendment permits the registration of slaughterers who slaughtered during the base period (January 1, 1950, to February 9, 1951) but who failed to register by the cut-off date of December 15, 1951. It has been found that a few slaughterers who slaughtered during the base period failed to register in time. The cut-off date has been eliminated in order to prevent hardship to such persons and because it has been determined that this action will not contravene the policies of this regulation.

(2) In accordance with the general policy of OPS of relieving industry of the burden of reporting requirements whenever practicable, this amendment also suspends the reporting requirements of DR 1, Rev. 1, concerning the volume of slaughter. These reports were useful in enforcing slaughter quotas when quotas were in effect and in enforcing restrictions on the species of livestock which could be slaughtered when such restrictions were in existence. In addition, they are necessary in connection with any allocations of meat. Congress, however, has eliminated slaughter quotas and the authority of OPS to place restrictions on the species of livestock which may be slaughtered by registered slaughterers. Moreover, there are no allocations of meat in effect at the present time. Accordingly, these reporting requirements are not now essential to the effective administration of this regulation.

In the formulation of this amendment, special circumstances have rendered consultation with industry representatives, including trade association representatives, impracticable.

In the judgment of the Director the provisions of this amendment are generally fair and equitable, are necessary to effectuate the purposes of Title I of the Defense Production Act of 1950, as amended, are appropriate to promote the national defense, and conform with all applicable standards of that Act.

AMENDATORY PROVISIONS

Distribution Regulation 1, Revision 1, is amended in the following respects:

1. Section 15 is amended by redesignating section 15 (c) as section 15 (d) and inserting before it a new section 15 (c) to read as follows:

(c) If you slaughtered livestock during the period January 1, 1950, to February 9, 1951, and you are not now registered as a slaughterer, you may apply to the OPS for a Class 1 or Class 2 registration. The Director of Price Stabilization may grant you a registration, on such conditions as he may deem necessary to further the policy of this regulation, if you submit a signed application showing the following information:

(1) Your name and address. (If you are a corporation, state the name and address of each person owning stock amounting to 10 percent or more of the total issued. If you are a partnership, state the name and address of each person with an interest of 10 percent or more in the partnership.) Submit the same information regarding the name and address of the slaughtering establishment in which you operated in the period January 1, 1950, to February 9, 1951;

(2) Documentary evidence establishing that you slaughtered during the period January 1, 1950, to February 9, 1951, and indicating whether you slaughtered for your own account or for others during that period;

(3) A description of the sanitary facilities with which your plant is equipped. To be registered, your establishment must meet the sanitary requirements of section 15 (a).

2. Section 17 (b) is amended by adding a new subparagraph (5) to read as follows:

(5) This paragraph 17 (b) is suspended until further notice, commencing with slaughterers' accounting periods beginning after September 27, 1952.

(Sec. 704, 64 Stat. 816, as amended; 50 U. S. C. App. Sup. 2154)

Effective date. The provisions of this amendment shall be effective on October 20, 1952.

NOTE: All reporting requirements of this amendment have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

JOSEPH H. FREEHILL,
Acting Director of Price Stabilization.

OCTOBER 15, 1952.

[General Overriding Regulation 4, Revision 1, Amdt. 9]

GOR 4—Exemptions and Suspensions of Certain Consumer Soft Goods

SUSPENSION OF IMPORTED RAW COTTON

Pursuant to the Defense Production Act of 1950, as amended, Executive Order 10161, and Economic Stabilization Agency General Order No. 2, this Amendment to General Overriding Regulation 4, Revision 1, is hereby issued.

STATEMENT OF CONSIDERATIONS

This amendment adds imported raw cotton to the list of commodities suspended from price controls by section 3 of General Overriding Regulation 4, Revision 1.

This action is being taken in line with the policy of suspending or otherwise relaxing price controls on commodities whose selling prices are substantially below ceilings and are not expected to reach ceiling prices in the foreseeable future. Imported raw cotton, insofar as it is subject to price control, is presently covered by CPR 31, as amended. Such regulation provides that ceiling prices for the sale of any commodity by an importer other than an importing-retailer shall be the landed cost of the commodity plus a dollars and cents markup based on sales of such commodity during the base period (July 1, 1949 to June 30, 1950, inclusive). Consequently, under this margin type of regulation, as the landed cost of imported raw cotton decreases the importer's ceiling price likewise decreases.

Current selling prices of imported raw cotton are substantially below the ceiling levels reached under CPR 31 during 1951. Further, it is unlikely that present selling or ceiling prices of imported raw cotton will in the foreseeable future reach the levels of ceiling prices for this cotton which obtained during 1951 or that importers of raw cotton will be able to increase their margins upon suspension of CPR 31. Prices of raw cotton in countries which export to the United States, such as Egypt, India, Peru and Mexico, have followed the decline in selling prices of raw American upland cotton which has taken place in this country during the past year. Further, the cotton covered by this regulation amounts only to an insignificant part of total United States consumption of cotton.

During the past crop year (August–July) consumption of cotton in the United States declined from the large total of the previous year, coincident with the production of a fairly large crop in this country. As a result, domestic prices of American upland cotton receded from the ceiling level of 45.76 cents per pound for odd lots of white middling 15/16 inch in the Group B mill area of the Carolinas. In line with this decline in domestic prices and the larger domestic cotton crop, importers have bought foreign cottons sparingly, and imports of foreign growths during the first eight months of the current crop year were only 66,814 bales compared with imports of 137,195 bales for the same period of the previous crop year. In addition, consumption of cotton in foreign countries is declining and world carryover of cotton on August 1, 1952 is expected to be more than 2,000,000 bales larger than the 11,000,000 bale carryover for the same date in 1951. With these considerations it is unlikely that, for the foreseeable future, the selling or ceiling prices of imported cotton in this country will reach the 1951 peak. With this prospect there seems little reason to expect any widening of importers' margins unless United States demand for foreign cottons strongly increase and prices of foreign growths rise abruptly.

Ceiling prices for raw American upland cotton were established by CPR 8, effective March 3, 1951. While selling prices for such cotton remained at ceilings from March through June 1951, they subsequently declined and have remained below ceilings. Accordingly, on May 20, 1952, price controls on sales of raw American upland cotton were suspended.

The suspension of ceiling prices on imported raw cotton will have little, if any, effect on imports of cotton of foreign growths for the following reasons: Extra long staple cotton is exempt from price regulation by section 14 (s) (5) of the GCPR and imports of other foreign growths of cotton, such as short staple harsh Indian, long staple Peruvian, medium staple Mexican and all other growths of Egyptian except extra long staple, are limited to established quotas which have been in effect for many years. Although it is foreseeable that raw cotton imports may increase over current amounts in successive years because import quotas are larger than actual imports this year, nevertheless, these minor increases would not be the result of suspension of price ceilings, nor is it now foreseeable that such increases would raise prices above the level of ceiling prices reached in 1951.

Should domestic and foreign growths advance in price, then the control of importers' markups will again be necessary. Accordingly, the suspension of this regulation, as it relates to ceiling prices of imported cotton, will be terminated whenever the suspension of ceiling prices for domestic cotton is discontinued or, at the discretion of the Director of Price Stabilization, whenever there may be abnormal increases in prices of any or all varieties of imported cottons.

In the judgment of the Director, price controls on the commodities covered by this amendment are not required at this time in order to carry out the purposes of the Defense Production Act of 1950, as amended. However, all records which were required to be prepared and preserved under applicable ceiling price regulations in effect prior to this suspension must continue to be preserved. In the formulation of this amendment there has been consultation with industry representatives, including trade association representatives, to the extent practicable, and consideration has been given to their recommendations.

AMENDATORY PROVISIONS

Section 3 of General Overriding Regulation 4, Revision 1, is amended by adding the following paragraph:

(m) Imported raw cotton, until such time as the suspension of ceiling price regulations applicable to American upland cotton is discontinued.

(Sec. 704, 64 Stat. 816, as amended; 50 U. S. C. App. Sup. 2154)

Effective date. This Amendment 9 to General Overriding Regulation 4, Revision 1, is effective October 15, 1952.

TIGHE E. WOODS,
Director of Price Stabilization.

OCTOBER 15, 1952.

[F. R. Doc. 52-11307; Filed, Oct. 15, 1952; 11:45 a. m.]

[General Overriding Regulation 5, Revision 1, Amdt. 7]

GOR 5—Exemptions and Suspensions of Certain Consumer Durable Goods and Related Commodities

REVOCATION OF SUSPENSION OF RADIO, TELEVISION AND PHONOGRAPH PARTS

Pursuant to the Defense Production Act of 1950, as amended, Executive Order 10161, and Economic Stabilization Agency General Order No. 2, this amendment 7 to General Overriding Regulation 5, Revision 1, is hereby issued.

STATEMENT OF CONSIDERATIONS

By Amendment 1 to General Overriding Regulation 5, Revision 1, price controls were suspended over radios, television sets and phonographs at all levels of distribution. This action was taken because selling prices for these commodities were materially below ceiling prices. At the same time, parts for these commodities were also suspended. The justification for this action was that prices for these parts can normally be expected to parallel prices for the finished commodities.

However, it has developed, since the issuance of Amendment 1 to GOR 5, Rev. 1, that the suspension of controls over radio, television and phonograph parts is threatening to impair the effectiveness of price controls in other areas where selling prices are at, or close to, ceiling prices. Consequently, it has been decided in the interest of the stabilization program to end the suspension of controls over parts at all levels of distribution.

Of the areas affected by the suspension of control over parts, the one of greatest importance to the consuming public is the repair of radio and television sets. It is common knowledge that there is a serious shortage throughout the country of service men for radios and television sets. Of major importance to every owner of a television set is the cost of servicing it. Prices charged for repairing radio and television sets generally are at ceiling. Since the repair of these sets usually involves the replacement of one or more parts, it is clear that there can be no effective control over the charges made for repairing a set as long as there is no control over the part which is included in the repair. In order to protect consumers utilizing the services of radio and television repair men it is essential that parts be kept under control.

In the short time that controls have been suspended it has become apparent that there is much uncertainty in the industry as to exactly what commodities are included in the suspension. With a few exceptions, such as tubes, the major portion of radio and television parts are not manufactured by radio and television manufacturers, but are produced by "parts" manufacturers for use in a variety of other commodities as well as in radios, television sets, and phonographs. Numerous parts having such interchangeable uses, though they might properly be said to be radio, television or phonograph parts, were, nevertheless, not intended to be suspended from controls. Furthermore, radio, television and phonograph part manufacturers manufacture items which cannot properly be designated as parts, but are merely materials for use in a part or in the finished product. There are indications that the uncertainties as to the exact coverage of the suspension, together with the burdens placed on both sellers and this Agency in drawing the line and maintaining the distinction between items under control and items suspended, may interfere with a workable and enforceable stabilization program in areas where prices are at, or near, ceilings.

With regard to many of the parts which may be used interchangeably in other finished products, it is not possible to ascertain whether and to what extent prices for such parts follow those of the completed radio, phonograph or television set. In addition to these interchangeable parts there are many parts manufactured by the same manufacturers as those who make radio, phonograph and television parts which are similar to the latter but which are used in finished products which are not suspended from price control. In view of the possible pressure which suspension of controls on television, radio and phonograph parts may exert on the ceiling prices of the wide number of commodities using the same or similar parts as go into radio and television sets, it is deemed desirable to bring back under control all parts, except cabinets. The suspension of cabinets is continued.

The effect of this amendment is to reimpose the same ceiling prices and regulations which would have been applicable if no suspension had taken place. However, sellers who have introduced new parts since the suspension are permitted to sell such parts for 30 days at the prices they had in effect during the suspension period. This will allow time for the calculation of ceiling prices and the filing of any reports required under the applicable regulation. In view of the short period of time which has elapsed since the suspension of controls, it is not expected that recontrol upon this basis will present any difficulties for the industry.

In view of the emergency nature of this amendment and the necessity of acting speedily to reimpose controls with as little disturbance to the industry as possible, formal consultation with industry representatives, including trade association representatives, has been rendered impracticable. There has, however, been informal consultation with individual members of the industry.

In the judgment of the Director, based upon data presently available, this action is necessary in the interests of the stabilization program and the ceiling prices reimposed meet the requirements and will effectuate the purposes of Title IV of the Defense Production Act of 1950, as amended.

AMENDATORY PROVISIONS

General Overriding Regulation 5, Revision 1, is hereby amended in the following respects:

1. Section 1 is amended by adding the following sentence at the end thereof:

"The sections in Article IV contain special provisions covering the revocation of certain exemptions and suspensions."

2. Section 102 is amended by deleting from the third line the words "Parts of the foregoing, including" and by deleting from the fourth line the words "and parts thereof" so that the section will read as follows:

SEC. 102. *Radios.*

Radio receivers.
Radio-phonograph combinations.
Radio cabinets.

3. Section 103 is amended by deleting the words "and television accessories" from the section heading, by deleting the words "Television antennae, boosters, accessories" from the fourth line and by deleting from the fifth and sixth lines the words "Parts of the foregoing, including" and the words "and parts thereof" so that the section will read as follows:

SEC. 103. *Television sets.*

Television receivers.
Television combinations, including combinations with radio or phonograph or both.
Television cabinets.

4. Section 104 is amended by deleting from the sixth line the words "Parts of the foregoing" and by substituting the words "Phonograph cabinets." As amended, the section will read as follows:

SEC. 104. *Phonographs, recorders, and related commodities.*

Record player attachments.
Phonographs.
Magnetic recorders, tape or wire (not including office equipment).
Tape and wire for magnetic recording.
Phonograph cabinets.

5. There is added a new Article IV to read as follows:

ARTICLE IV—REVOCATION

SEC. 200. *Radio, television and phonograph parts.* On and after October 15, 1952, regardless of any contract or other obligation, you shall not sell, and you shall not buy in the regular course of business or trade, any radio, television or phonograph part, except a cabinet, at a price exceeding its ceiling price under the regulation applicable to such part. Notwithstanding the foregoing provision, however, if the part is one which you first sold or offered for sale after August 28, 1952, you may sell it until November 15, 1952, at a price not to exceed the highest price at which you delivered it between August 29, 1952 and October 15, 1952 or, if the part was not delivered during this period, the highest price at which you offered it for delivery during this period to a purchaser of the same class. All terms used in this section have the same meaning as in the regulation which establishes your ceiling prices for radio, television and phonograph parts.

(Sec. 704, 64 Stat. 816, as amended; 50 U. S. C. App. Sup. 2154)

Effective date. This amendment is effective on October 15, 1952.

JOSEPH H. FREEHILL,
Acting Director of Price Stabilization.

OCTOBER 15, 1952.

[F. R. Doc. 52-11305; Filed, Oct. 15, 1952; 11:44 a. m.]

[General Overriding Regulation 32, Special Order 7]

GOR 32—ADJUSTMENT OF CEILING PRICES FOR MATERIALS TO THE MINIMUM PRICES FIXED BY STATE LAWS

SO 7—SELLERS OF CIGARETTES IN NEW HAMPSHIRE

CEILING PRICES RAISED TO CONFORM WITH THE NEW HAMPSHIRE UNFAIR SALES ACT

Statement of considerations. This special order raises the ceiling prices of New Hampshire cigarette sellers above those previously established under regulations of the Office of Price Stabilization (OPS) where necessary to conform to the minimum prices required to be charged by the New Hampshire Unfair Sales Act. This action does not presently affect ceiling prices of New Hampshire cigarette sellers which are at or above the minimum prices required by that act on the effective date of the special order. Provision is also made for the adjustment of ceiling prices of cigarette sellers subject to the New Hampshire Unfair Sales Act in the event of a change in the minimum prices computed pursuant to that act and in some instances for the establishment of ceiling prices for new brands of cigarettes sold in New Hampshire.

This special order is issued pursuant to section 5 of General Overriding Regulation (GOR) 32. That regulation was issued by the OPS to conform to the requirements of section 402 (1) of the Defense Production Act of 1950, as amended. GOR 32 sets forth certain facts which must be shown to exist in a particular State before the OPS is required by the above-noted statutory provision to raise ceiling prices to the minimum prices required by the law of that State.

It appears from the information contained in the application of the Director of the Tobacco Products Division of the New Hampshire State Tax Commission that the New Hampshire Unfair Sales Act was in effect and enforced on June 30, 1952, and on August 18, 1952 (the date of the application); that the act has not been held invalid by any court of competent jurisdiction; and that the ceiling prices of some cigarette sellers in the State of New Hampshire are lower than the minimum sales prices required to be charged by that act.

Special provisions. For the reasons set forth in the Statement of Considerations and pursuant to section 5 of GOR 32 this special order is hereby issued.

1. Ceiling prices of cigarette sellers subject to the New Hampshire Unfair Sales Act of 1952, hereinafter referred to as the New Hampshire Act, which are below the minimum sales prices computed pursuant to that act, as specified in paragraph 5 hereof, are hereby raised to those minimum sales prices.

2. If the minimum prices for brands of cigarettes sold in New Hampshire on August 18, 1952 (the date of the application submitted by the Director of the Tobacco Products Division of the New Hampshire State Tax Commission, hereinafter referred to as the State Director, under GOR 32), have increased after that date pursuant to the New Hampshire Act, such higher minimum prices shall become ceiling prices as hereinafter specified in this paragraph, upon the sending of a report by the State Director by registered mail to the Grocery Products Branch, Office of Price Stabilization, Washington 25, D. C. That report will indicate the reason for the change as well as the computations by which the new required minimum prices have been determined and will list the new prices for various brands of cigarettes. The higher minimum prices so reported shall be established as ceiling prices for the sellers affected by paragraph 1 hereof and any other seller subject to the New Hampshire Act whose ceiling prices would, as a result of such change, be below the new required minimum prices. If the minimum prices for brands of cigarettes sold in New Hampshire on August 18, 1952, are decreased after that date pursuant to the New Hampshire Act, ceiling prices of the sellers affected by paragraph 1 hereof shall be established at the new required minimum prices. However, where such lower minimum prices are below the ceiling prices in effect immediately prior to the date of this special order, these ceiling prices shall be in effect after such change in the minimum prices.

3. If new brands of cigarettes are sold in New Hampshire after August 18, 1952, the cigarette sellers subject to the New Hampshire Act who are unable to compute ceiling prices for the new brands pursuant to section 5 of the General Ceiling Price Regulation (because their comparison brands are not priced under section 3 of the General Ceiling Price Regulation but are priced under paragraph 1 or 2 of this special order) shall take as their ceiling prices for such new brands the minimum sales prices computed for them in accordance with the New Hampshire Act. These prices will be established as ceiling prices for such cigarette sellers upon the sending of a report by the State Director by registered mail to the Grocery Products Branch, Office of Price Stabilization, Washington 25, D. C. This report will set forth the brand names of the cigarettes and the minimum sales prices required to be charged for them in accordance with the New Hampshire Act and will indicate how these minimum prices were computed.

4. Nothing in this special order shall prevent a cigarette seller subject to the New Hampshire Act whose ceiling prices would be affected by the State Director's filing the report set forth in paragraph 2 or 3 hereof, from filing such report in his own behalf. The individual seller may use as his ceiling prices the minimum prices required by the New Hampshire Act upon his mailing of such report

unless and until such seller is notified by the OPS that the reported prices are disapproved or that further information is required. In the event of a request for further information, the reported minimum prices shall not be used as ceiling prices until such further information is sent by registered mail to the Grocery Products Branch, Office of Price Stabilization, Washington 25, D. C.

5. As used in this special order, the term "New Hampshire Unfair Sales Act" means that Act as amended up to June 30, 1952 (Chapter 204, Revised Laws of New Hampshire 1942).

6. This special order or any provision hereof may be revoked, suspended, or amended by the Director of Price Stabilization.

(Sec. 704, 64 Stat. 816, as amended; 50 U. S. C. App. Sup. 2154)

Effective date. This special order is effective October 16, 1952.

NOTE: The record-keeping and reporting requirements of this special order have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

JOSEPH H. FREEHILL,
Acting Director of Price Stabilization.

OCTOBER 15, 1952.

[F. R. Doc. 52-11310; Filed, Oct. 15, 1952; 4:00 p. m.]

Chapter VI—National Production Authority, Department of Commerce

[NPA Order M-20, Direction 1, as amended Oct. 15, 1952]

M-20—IRON AND STEEL SCRAP

DIR. 1—ALLOY SCRAP SEGREGATION

This amended direction to NPA Order M-20 is found necessary and appropriate to promote the national defense and is issued pursuant to the Defense Production Act of 1950, as amended. In the formulation of this amended direction, there has been consultation with industry representatives, including trade association representatives, and consideration has been given to their recommendations. However, consultation with representatives of all trades and industries affected in advance of the issuance of this amended direction has been rendered impracticable due to the necessity for immediate action and because the order affects a large number of different trades and industries.

EXPLANATORY

Direction 1 of August 14, 1952, to NPA Order M-20 is amended by changing the definition of "person" appearing in section 1 (a), and by deleting two specification numbers from List A of the order.

REGULATORY PROVISIONS

Sec.
1. Definitions.
2. Segregation required.
3. Sale and delivery.
4. Mingling prohibited.
5. Use limitation.
6. Exceptions.
7. Reports.

AUTHORITY: Sections 1 to 7 issued under sec. 704, 64 Stat. 816, Pub. Law 429, 82d Cong.; 50 U. S. C. App. Sup. 2154. Interpret or apply sec. 101, 64 Stat. 799, Pub. Law 429, 82d Cong.; 50 U. S. C. App. Sup. 2071; sec. 101, E. O. 10161, Sept. 9, 1950, 15 F. R. 6105; 3 CFR, 1950 Supp.; sec. 2, E. O. 10200, Jan. 3, 1951, 16 F. R. 61; 3 CFR, 1951 Supp.; secs. 402, 405, E. O. 10281, Aug. 28, 1951, 16 F. R. 8789; 3 CFR, 1951 Supp.

SECTION 1. *Definitions.* (a) "Person" means any individual, corporation, partnership, association, or any other organized group of persons, and includes any agency of the United States Government or of any other government. A person who keeps separate inventory records for any separate operating or producing unit shall treat each such separate operating or producing unit as a separate person for the purpose of this direction, unless NPA otherwise directs or permits upon application of such person.

(b) "Melter" means a person who produces an alloy product (which may be either ferrous or nonferrous) by melting.

(c) "Alloy scrap" means ferrous or nonferrous scrap containing 0.5 percent or more of nickel. (Reference is made to the exceptions contained in section 6 of this direction.)

SEC. 2. *Segregation required.* Any person, except a melter, who, as a result of a production or manufacturing operation, generates during any calendar month a total of 20 gross tons or more of alloy scrap, shall segregate such scrap into the appropriate type or types indicated in List A of this direction.

SEC. 3. *Sale and delivery.* (a) No person shall accept delivery of any of the types of alloy scrap described in List A of this direction which have been segregated into lots of 20 gross tons or more, except where such scrap is to be used for melting pursuant to section 5 of this direction, or except where such scrap is purchased for resale as permitted in paragraphs (b) and (c) of this section.

(b) Any person, except a melter, who, as a result of a production or manufacturing operation, generates alloy scrap shall, as soon as he has accumulated or otherwise holds 20 gross tons or more of any type of alloy scrap, offer it for sale and immediate shipment to a melter or scrap dealer or to a broker for further immediate shipment by him to a melter. If his terms of sale are met, he shall make delivery of all such scrap to the purchaser, but if his terms of sale are not met, he shall report the tonnage of each type of scrap offered, the proposed terms of sale, the names of the persons to whom offered, and any other pertinent information in writing to NPA, Washington 25, D. C., Ref: M-20, Dir. 1, within 10 days from the date on which he accumulated the minimum tonnage of scrap specified in this paragraph.

(c) Any scrap dealer, or any other person (except a melter or generator) who accumulates alloy scrap shall, as soon as he has accumulated 20 gross tons or more of any type of alloy scrap, offer it for sale and immediate shipment to a melter or to a broker for further immediate shipment by him to a melter. If his terms of sale are met, he shall make delivery of all such scrap to the purchaser, but if his terms of sale are not met, he shall report the tonnage of each type of scrap offered, the proposed terms of sale, the names of the persons to whom offered, and any other pertinent information in writing to NPA, Washington 25, D. C., Ref: M-20, Dir. 1, within 10 days from the date on which he accumulated the minimum tonnage of scrap specified in this paragraph.

SEC. 4. *Mingling prohibited.* No person shall (except in melting pursuant to section 5 of this direction) mingle alloy scrap segregated pursuant to section 2 of this direction with scrap which is unclassified or of a different type, or ship or deliver such scrap without clearly identifying the type to which it belongs.

SEC. 5. *Use limitation.* No person shall melt any alloy scrap except in the production of ferrous or nonferrous alloys in which nickel is required.

SEC. 6. *Exceptions.* The provisions of this direction shall not be applicable to copper scrap or copper-base alloy scrap (as defined in NPA Order M-16) nor to aluminum scrap (as defined in NPA Order M-22).

SEC. 7. *Reports.* Each person who purchases any alloy scrap for melting shall report to NPA by the seventh day of each month on Form NPAF-113 his inventory at beginning and end of the month and his receipts during the month, beginning with the report for September 1952, for each type of scrap indicated on List A of this direction.

This direction, as amended, shall take effect October 15, 1952.

NATIONAL PRODUCTION AUTHORITY,
By GEORGE W. AUXIER,
Executive Secretary.

LIST A OF NPA ORDER M-20—NICKEL ALLOYS

Type	*Name*	*AISI Specification No.*
1.	Nickel types and nickel chromium types (nickel 1.0% to 5.25%).	2300, 2500, 3100, and 3300 series.
2.	Nickel molybdenum types and high nickel chromium molybdenum (nickel 1.0% to 5.25%).	4300, 4600, 4800, 9300, and 9800 series.
3.	Low nickel chromium molybdenum types (nickel under 1.0%, molybdenum 0.08% to 0.65%).	8600, 8700, and 9700 series.
4.	Stainless steel 6.0% to 12.0% nickel	301, 302, 303, 304, 305, 308, and 321.
5.	Stainless steel 12.0% to 22.0% nickel	309, 310, 311, and 314.
6.	Stainless steel 10.0% to 14.0% Ni, 1.75% to 4.0% Mo	316, 317, and 318.
7.	Stainless steel 9.0% to 12.0% Ni plus Cb or CbTa	347.

TITLE 35—PANAMA CANAL

Chapter I—Canal Zone Regulations

PART 4—OPERATION AND NAVIGATION OF PANAMA CANAL AND ADJACENT WATERS

LOAD AND TRIM; CHOCKS AND BITTS

Pursuant to the authority vested in the Governor by Rule 9, Executive Order No. 4314 of September 25, 1925 (35 CFR 4.11), §§ 4.3 and 4.42 are hereby amended to read as follows:

§ 4.3 *Load and trim.* All vessels shall be properly trimmed before transiting the Canal. No vessel shall be permitted to transit while having a list of more than 10° or while she is so loaded or is so trimmed as to dangerously affect her maneuverability. Any vessel having a list between 3° and 10°, or which is so loaded or so trimmed as to affect her maneuverability, will be denied transit unless the master, in the presence of the pilot, signs an undertaking releasing the Panama Canal Company from, and indemnifying it against, any loss, damage, or liability which may result from injury to the vessel or its cargo, to other vessels or their cargo, or to Canal structures or equipment, or from injury to or death of any person, where any such injury or death is caused in whole or in part by such failure of the vessel to meet, substantially, the requirements of this section.

§ 4.42 *Chocks and bitts.* For each towing wire used the ship shall be fitted with a heavy closed chock and a heavy pair of bitts, capable of withstanding a strain of 50,000 pounds on the towing wire from any angle, and a straight clear lead shall be provided from each chock to the securing bitts. The most suitable installations for the bow and stern towing chocks are large chocks set thwartships right in the stem and in the stern, respectively. Such chocks and bitts shall be double the size and strength given above. Both bow wires and both stern wires shall be run through such chocks. For 6-locomotive ships there shall be, in addition, a chock on each side forward of amidships, and for 8-locomotive ships, two additional chocks on each side, one set of two about one-third the ship's length abaft the bow, and the other set of two the same distance forward of the stern. If a vessel fails to meet, substantially, the requirements of this section, it will be denied transit unless the master thereof, in the presence of the pilot, signs an undertaking releasing the Panama Canal Company from, and indemnifying it against, any loss, damage, or liability which may result from injury to the vessel or its cargo, to other vessels or their cargo, or to Canal structures or equipment, or from injury to or death of any person, where any such injury or death is caused in whole or in part by such failure of the vessel to meet, substantially, the requirements of this section.

(Sec. 5, 37 Stat. 562, as amended; 2 C. Z. Code 9, 48 U. S. C. 1318, E. O. 4314, Sept. 25, 1925)

Issued at Balboa Heights, Canal Zone, October 2, 1952.

J. S. SEYBOLD,
Governor of the Canal Zone.

[F. R. Doc. 52-11220; Filed, Oct. 15, 1952; 8:48 a. m.]

TITLE 50—WILDLIFE

Chapter I—Fish and Wildlife Service, Department of the Interior

Subchapter C—Management of Wildlife Conservation Areas

PART 31—PACIFIC REGION

SUBPART—RED ROCK LAKES MIGRATORY WATERFOWL REFUGE, MONTANA

MOOSE HUNTING PERMITTED

Basis and purpose. On the basis of observations and reports of field representatives of the Fish and Wildlife Service and of the Montana Fish and Game Commission, it has been determined that certain lands in addition to those opened to moose hunting by regulations published in the FEDERAL REGISTER of August 29, 1952 (17 F. R. 7905), also can be opened to the hunting of moose.

Since the following regulation is a relaxation of existing restrictions applicable to the Red Rock Lakes Migratory Waterfowl Refuge, notice and public procedure thereon are not required (60 Stat. 237; 5 U. S. C. 1001, et seq.).

Effective on the date of publication of this document in the FEDERAL REGISTER, § 31.291 is revised to read as follows:

§ 31.291 *Moose hunting permitted.* Moose may be taken with firearms during the 1952 State season for the hunting of moose on the refuge lands lying south and east of Elk Springs Creek, Shambow Creek and Shambow Pond in the following subdivisions:

Sections 5, 6, 7, 8, 17, 18, and 19, T. 14 S., R. 1 E., section 31, T. 13 S., R. 1 E., and sections 1, 2, 3, 10, 11, 12, 13, 14, 15, and 20 to 30, inclusive, T. 14 S., R. 1 W., M. P. M.,

subject to the provisions, conditions, and requirements of §§ 31.292 and 31.293.

(Sec. 10, 45 Stat. 1224; 16 U. S. C. 715i)

Dated: October 9, 1952.

O. H. JOHNSON,
Acting Director.

[F. R. Doc. 52-11212; Filed, Oct. 15, 1952; 8:45 a. m.]

PART 35—NORTHEASTERN REGION

SUBPART—MONTEZUMA NATIONAL WILDLIFE REFUGE, NEW YORK

DEER HUNTING

Basis and purpose. On the basis of observations and reports of field representatives of the Fish and Wildlife Service and the Division of Fish and Game of the State of New York Conservation Department, it has been determined that a surplus of deer exists on and in the vicinity of the Montezuma National Wildlife Refuge, New York, the removal of which can best be accomplished by public hunting on a portion of the refuge.

Since the following regulations are relaxations of existing restrictions applicable to the Montezuma National Wildlife Refuge, notice and public procedure thereon are not required (60 Stat. 237; 5 U. S. C. 1001, et seq.).

Effective on the date of publication of this document in the FEDERAL REGISTER, the following subpart is added:

SUBPART—MONTEZUMA NATIONAL WILDLIFE REFUGE, NEW YORK

DEER HUNTING

Sec.
35.21 Deer hunting permitted.
35.22 Entry.
35.23 State hunting laws.
35.24 State cooperation.

AUTHORITY: §§ 35.21 to 35.24 issued under sec. 10, 45 Stat. 1224; 16 U. S. C. 715i.

§ 35.21 *Deer hunting permitted.* Deer may be taken with firearms during the 1952 State season for the hunting of deer on the following designated areas of the Montezuma National Wildlife Refuge, which shall be designated by suitable posting by the refuge officer in charge:

(a) All refuge lands east of May's Point and north of the Clyde River (including the relocated channel of the Clyde River).

(b) All refuge lands south of the New York State Throughway right-of-way, and west of Highway 414.

(c) All refuge lands south of Highway 5 and 20, bounded on the north by the cleared power line right-of-way bordering said highway; on the east by a refuge patrol road; on the southeast by a power line crossing the southeast corner of the refuge; on the south by the cleared right-of-way of a telephone cable line; and on the west by the refuge boundary,

subject to the provisions, conditions, and requirements of §§ 35.22 through 35.24, inclusive.

§ 35.22 *Entry.* Entry on and use of the refuge are governed by the regulations in Parts 18 and 21 of this chapter, and strict compliance therewith is required. Hunters must follow such routes of travel within the refuge as are designated by posting by the officer in charge. When entering or leaving the public hunting area, hunters must report at such checking stations as may be established for the purpose of regulating the hunt.

§ 35.23 *State hunting laws.* Strict compliance with all State laws and regulations is required, and any person who hunts on the refuge must have in his possession and exhibit at the request of any authorized Federal or State officer a valid State hunting license for the taking of deer, if such is required by the State laws and regulations, which license shall serve as a Federal permit for the hunting of deer on the refuge.

§ 35.24 *State cooperation.* State cooperation may be enlisted in the regulation, management, and operation of the public hunting area, and the State may promulgate such special regulations as may be necessary for such regulation, management, and operation. In the event that such State regulations are issued, compliance therewith shall be a requisite to the lawful entry for the purpose of hunting.

Dated: October 9, 1952.

O. H. JOHNSON,
Acting Director.

NOTICES

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

ARIZONA

AIR-NAVIGATION SITE WITHDRAWAL, ARIZONA NO. 1

OCTOBER 9, 1952.

By virtue of the authority contained in section 4 of the act of May 24, 1928, 45 Stat. 729 (49 U. S. C. 214), and in section 7 of the act of June 28, 1934, 48 Stat. 1272, as amended by the act of June 26, 1936, 49 Stat. 1976 (43 U. S. C. 315f), and pursuant to section 2.22 (a) of Delegation Order No. 427 of August 16, 1950 (15 F. R. 5641), it is ordered as follows:

Subject to valid existing rights and the provisions of existing withdrawals, the following-described public lands in Arizona are hereby withdrawn from all forms of appropriation under the public-land laws and reserved for the use of the Civil Aeronautics Administration, Department of Commerce, in the maintenance of air-navigation facilities, the reservation to be known as Air-Navigation Site Withdrawal, Arizona No. 1:

GILA AND SALT RIVER MERIDIAN

T. 16 N., R. 21 W., sec. 14. N½S½SE¼SW¼, S½N½SE¼SW¼, S½NW¼SW¼SE¼ and N½SW¼SW¼SE¼.

containing approximately 30 acres.

This order shall take precedence over, but not otherwise affect, the order of the Secretary of the Interior of March 6, 1936, establishing Arizona Grazing District No. 2, so far as it affects the above-described lands.

It is intended that the above-described lands shall be returned to the administration of the Department of the Interior when they are no longer needed for the purpose for which they are reserved.

E. R. SMITH,
Regional Administrator.

[F. R. Doc. 52–11215; Filed, Oct. 15, 1952; 8:46 a. m.]

ARIZONA

ORDER OF RESTORATION FROM POWER PROJECT NO. 30

OCTOBER 9, 1952.

Pursuant to an order of the Federal Power Commission, dated April 8, 1947, vacating withdrawal of June 17, 1922 for Power Project No. 30, and in accordance with Order No. 427, section 2.22 (a) (4) of the Director, Bureau of Land Management approved August 16, 1950 (15 F. R. 5641), it is ordered as follows:

Subject to valid existing rights and the provisions of existing withdrawals, the lands hereinafter described, so far as they were withdrawn or reserved for power purposes, are hereby restored to disposition under any applicable public-land law:

GILA AND SALT RIVER MERIDIAN

T. 10 N., R. 18 W.,
Secs. 5, 6, and 7.
T. 11 N., R. 18 W.,
Secs. 3, 4, 5, 8, 9, 10, 11, 14, 15, 21, 22, 23, 26, 27, 28, 31, 33, 34, and 35.
T. 12 N., R. 18 W.,
Secs. 19, 29, 30, 31, 32, and 33.
T. 10 N., R. 19 W.,
Secs. 1, 11, 12, 13, 14, 15, 22, 23, 26, and Lot 5 and NW¼NE¼ of 27.
T. 12 N., R. 19 W.,
Secs. 4, 5, 6, 7, 8, 9, 10, 14, 15, 22, 23, 24, and 25.
T. 13 N., R. 19 W.,
Secs. 30 and 31.
T. 13 N., R. 20 W.,
Secs. 4, 8, SW¼ of 14, 20, 22, W½ of 24, and 26.
T. 14 N., R. 20 W.,
Secs. 5, 6, 7, 8, 17, 18, 19, 20, 21, 28, 29, and 33.
T. 14 N., R. 20½ W.,
Secs. 1, 2, and 12.
T. 15 N., R. 20½ W.,
Secs. 2, 3, 10, 11, 14, 15, 22, 23, 24, 25, 26, and 35.
T. 15 N., R. 21 W.,
Secs. 11, 12, 13, 24, and 25.
T. 16 N., R. 21 W.,
Secs. 6, 8, 18, 20, 22, 26, 28, and 34.
T. 17 N., R. 21 W.,
Secs. 18, 20, and 28.
T. 17 N., R. 22 W.,
Secs. 4, 10, 14, 22, and 24.

The areas described, including both public and non-public lands, aggregate 46,579.62 acres.

All of the lands above described are embraced in first form reclamation withdrawal. Some of these lands are withdrawn for the Havasu Lake National Wildlife Refuge.

The public lands in the above described areas shall be subject to application by the State of Arizona for a period of ninety days from the date of publication of this order in the FEDERAL REGISTER for rights-of-way for public highways or as a source of material for the construction and maintenance of such highways, as provided by section 24 of the Federal Power Act, as amended.

This order shall not otherwise become effective to change the status of such lands until 10:00 a. m. on the 91st day after the date of publication.

E. R. SMITH,
Regional Administrator.

[F. R. Doc. 52–11216; Filed, Oct. 15, 1952; 8:46 a. m.]

NEW MEXICO

AIR NAVIGATION SITE WITHDRAWAL NO. 125; REDUCED

OCTOBER 9, 1952.

In accordance with the authority contained in section 4 of the act of May 24, 1928, 45 Stat. 728 (49 U. S. C. 214), and pursuant to section 2.22 (a) of Delegation Order No. 427 of August 16, 1950 (15 F. R. 5641), it is ordered as follows:

Departmental Order of April 27, 1939, modified June 10, 1939, withdrawing certain lands in New Mexico for use by the Department of Commerce in the maintenance of air navigation facilities, is hereby revoked so far as it affects the following-described lands:

NEW MEXICO PRINCIPAL MERIDIAN

T. 24 S., R. 3 E., sec. 26, NW¼SE¼, E½SW¼ and SW¼SW¼.

containing 160 acres.

The lands are situated on the west slope of Bishop's Cap Mountain approximately 15 miles southeast of Las Cruces, New Mexico. The slope varies from about 7 percent to 70 percent and the soil is mostly sandstone. These lands will not be subject to occupancy or disposition under any nonmineral public land law until they have been classified. It is unlikely that the lands will be classified for homestead, desert land, or small tract uses.

This order shall become effective immediately as to administration of grazing on these lands by the Bureau of Land Management, but shall not otherwise become effective to change the status of such lands until 10:00 a. m. on the 35th day after the date hereof. At that time the said lands shall become subject to application, petition, and selection, subject to valid existing rights, the provisions of existing withdrawals, the requirements of applicable law, and the 90-day preference right filing period for veterans and others entitled to preference under the act of September 27, 1944 (58 Stat. 747; 43 U. S. C. 279–284), as amended.

Information showing the period during which, and the conditions under which veterans and others may file applications for these lands may be obtained on request from the U. S. Land and Survey Office, Santa Fe, New Mexico.

E. R. SMITH,
Regional Administrator.

[F. R. Doc. 52–11214; Filed, Oct. 15, 1952; 8:46 a. m.]

UTAH

NOTICE OF FILING OF PLATS OF SURVEY

OCTOBER 7, 1952.

Notice of filing of plats of survey in Tps. 7 and 8 S., R. 21 E., S. L. M., Utah, accepted April 18, 1952.

Notice is given that the plats of (1) dependent resurvey of sections 1 to 6, inclusive, T. 8 S., R. 21 E., and sections 19, 20, 21, 28 to 33, inclusive, T. 7 S., R. 21 E., S. L. M., Utah, and (2) survey of previously omitted lands hereinafter described, will be officially filed in the Land and Survey Office, Salt Lake City, Utah, at 10:00 a. m. on December 9, 1952.

The lands affected by this notice are described as follows:

SALT LAKE MERIDIAN

T. 7 S., R. 21 E.,
Sec. 19, lot 13;
Sec. 20, lot 9;
Sec. 29, lots 16 and 18;
Sec. 30, lots 12, 13, and 14;
Sec. 31, lots 10 to 16, inclusive;
Sec. 32, lots 11 to 16, inclusive.
T. 8 S., R. 21 E.,
Sec. 6, lots 12 to 15, inclusive.

The area described aggregates 669.21 acres.

All of the above lands were temporarily withdrawn by Executive Order No. 5327 of April 15, 1930, as oil shale lands.

All the above lands were temporarily withdrawn by the Secretary of the Interior on September 26, 1933, for the Uncompahgre Indians and modified by him August 24, 1945, to permit oil and gas leasing.

Anyone having a valid settlement or other right to any of these lands initiated prior to the withdrawals should assert the same within three months from the date on which the plats are officially filed by filing an application under the appropriate public-land law, setting forth all facts relevant thereto.

All inquiries relating to these lands should be addressed to the Manager, Land and Survey Office, Salt Lake City, Utah.

ERNEST E. HOUSE,
Manager.

[F. R. Doc. 52–11213; Filed, Oct. 15, 1952; 8:45 a. m.]

Bureau of Reclamation

BOISE PROJECT, IDAHO

ORDER OF REVOCATION

MAY 21, 1952.

Pursuant to the authority delegated by Departmental Order No. 2515 of April 7, 1949 (14 F. R. 1937), I hereby revoke Departmental Order of December 22, 1903, insofar as said order affects the following described lands; provided, however, that such revocation shall not affect the withdrawal of any other lands by said order or affect any other orders withdrawing or reserving the lands hereinafter described:

BOISE MERIDIAN, IDAHO

T. 1 S., R. 1 W.,
Sec. 5, SW¼NW¼;
Sec. 7, SE¼NE¼.

The above areas aggregate 80 acres.

G. W. LINEWEAVER,
Assistant Commissioner.

OCTOBER 10, 1952.

I concur. The records of the Bureau of Land Management will be noted accordingly.

The lands are chiefly valuable for grazing.

No applications for these lands may be allowed under the homestead, small tract, desert land, or any other non-mineral public land laws, unless the lands have already been classified as valuable or suitable for such type of application, or shall be so classified upon consideration of an application.

This order shall not otherwise become effective to change the status of such lands until 10:00 a. m. on the 35th day after the date of this order. At that time the said lands shall, subject to valid existing rights and the provisions of existing withdrawals, become subject to application, petition, location, and selection as follows:

(a) *Ninety-one day period for preference-right filings.* For a period of 91 days, commencing at the hour and on the day specified above, the public lands affected by this order shall be subject only to (1) application under the homestead or the desert-land laws or the Small Tract Act of June 1, 1938, 52 Stat. 609 (43 U. S. C. 682a), as amended, by qualified veterans of World War II and other qualified persons entitled to preference under the act of September 27, 1944, 58 Stat. 747 (43 U. S. C. 279–284), as amended, subject to the requirements of applicable law, and (2) application under any applicable public-land law, based on prior existing valid settlement rights and preference rights conferred by existing laws or equitable claims subject to allowance and confirmation. Applications under subdivision (1) of this paragraph shall be subject to applications and claims of the classes described in subdivision (2) of this paragraph. All applications filed under this paragraph either at or before 10:00 a. m. on the 35th day after the date of this order shall be treated as though filed simultaneously at that time. All applications filed under this paragraph after 10:00 a. m. on the said 35th day shall be considered in the order of filing.

(b) *Date for non-preference-right filings.* Commencing at 10:00 a. m. on the 126th day after the date of this order, any lands remaining unappropriated shall become subject to such application, petition, location, selection, or other appropriation by the public generally as may be authorized by the public-land laws. All such applications filed either at or before 10:00 a. m. on the 126th day after the date of this order, shall be treated as though filed simultaneously at the hour specified on such 126th day. All applications filed thereafter shall be considered in the order of filing.

A veteran shall accompany his application with a complete photostatic, or other copy (both sides), of his certificate of honorable discharge, or of an official document of his branch of the service which shows clearly his honorable discharge as defined in § 181.36 of Title 43 of the Code of Federal Regulations, or constitutes evidence of other facts upon which the claim for preference is based and which shows clearly the period of service. Other persons claiming credit for service of veterans must furnish like proof in support of their claims. Persons asserting preference rights, through settlement or otherwise, and those having equitable claims, shall accompany their applications by duly corroborated statements in support thereof, setting forth in detail all facts relevant to their claims.

Applications for these lands, which shall be filed in the Land and Survey Office, Boise, Idaho, shall be acted upon in accordance with the regulations contained in § 295.8 of Title 43 of the Code of Federal Regulations and Part 296 of that title, to the extent that such regulations are applicable. Applications under the homestead laws shall be governed by the regulations contained in Parts 166 to 170, inclusive, of Title 43 of the Code of Federal Regulations, and applications under the desert-land laws and the said Small Tract Act of June 1, 1938, shall be governed by the regulations contained in Parts 232 and 257, respectively, of that title.

Inquiries concerning these lands shall be addressed to the Manager, Land and Survey Office, Boise, Idaho.

WILLIAM ZIMMERMAN, Jr.,
Associate Director,
Bureau of Land Management.

[Order 2018, Amdt. 2]

COMMISSIONER OF RECLAMATION

DELEGATION OF AUTHORITY WITH RESPECT TO COLUMBIA BASIN PROJECT

OCTOBER 8, 1952.

New subsections (r), (s), (t), and (u), reading as follows are added to section 1 of Order No. 2018:

(r) To approve the form of affidavit required in connection with leases be-

tween landowners and lessees of farm units or portions thereof on the Columbia Basin Project which are covered by recordable contracts.

(s) To suspend, where the total area of irrigable lands under the control of a lessee does not exceed 160 acres for which the United States is prepared to deliver water, with the consent of the irrigation districts involved, the enforcement of the provisions of Article 12 of said recordable contracts which require all landowners to obtain and submit from their lessees, in connection with leases of farm units or portions thereof on the project covered by said contracts, executed affidavits on an approved form stating and describing the total area of project lands under the control of their lessees as owner and lessee, until such time as the need for enforcing those provisions becomes apparent or their enforcement is requested by said irrigation districts.

(t) To accept such affidavits under said recordable contracts, in cases where the enforcement of the provisions relating thereto is not suspended under the preceding subsection, when submitted by either the landowner or his lessee.

(u) To review the terms and conditions of leases of farm units or portions thereof on the Columbia Basin Project covered by recordable contracts where the leaseholds or the combined leaseholds and ownership of the lessee exceed 160 irrigable acres of project lands for which the United States is prepared to deliver water; to require the furnishing of such material as may be necessary in connection with the review of such leases or of the operations thereunder; to determine that the terms and conditions of those leases are satisfactory and in keeping with the purposes of the Columbia Basin Project Act (57 Stat. 14), as amended, and that operations thereunder would be beneficial to the lands involved; and, after making those affirmative determinations, to approve such leases.

VERNON D. NORTHROP,
Acting Secretary of the Interior.

[Docket No. G-1677]

COLORADO INTERSTATE GAS CO.

ORDER FIXING DATE OF HEARING

OCTOBER 10, 1952.

On March 20, 1952, Colorado Interstate Gas Company and Public Service Company of Colorado each filed an application for rehearing of the order of the Commission entered on February 20, 1952, issuing a certificate of public convenience and necessity in the above-docketed proceeding.

By order of April 17, 1952, the Commission granted rehearing of said order at a date and place to be fixed by further order of the Commission.

The Commission orders:

(A) A public hearing be held commencing on October 27, 1952, at 10:00 a. m., e. s. t., in the Hearing Room of the Federal Power Commission, 1800 Pennsylvania Avenue NW., Washington, D. C., on the matters raised by the application for a certificate of public convenience and necessity filed herein on April 24, 1951, the findings and order of the Commission entered on February 20, 1952, and the applications for rehearing filed on March 20, 1952.

(B) Interested State Commissions may participate as provided by §§ 1.8 and 1.27 (f) (18 CFR 1.8 and 1.37 (f)) of the Commission's rules of practice and procedure.

Date of issuance: October 10, 1952.

By the Commission.

[SEAL] J. H. GUTRIDE,
Acting Secretary.

[Docket Nos. G-1694 G-1695, G-1699, G-1749, G-1777]

CITY GAS CO. OF PHILLIPSBURG, N. J., ET AL.

ORDER FIXING DATE OF HEARING

OCTOBER 9, 1952.

In the matters of City Gas Company of Phillipsburg, New Jersey, Docket No. G-1694; the Manufacturers Light and Heat Company, Docket No. G-1695; Texas Eastern Transmission Corporation, Docket No. G-1699; Penn-Jersey Pipe Line Company, Docket No. G-1749; Allentown-Bethlehem Gas Company, Docket No. G-1777.

On July 3, 1952, the Commission issued its order reinstating the applications filed in each of the above-entitled proceedings, consolidating said proceedings for purpose of hearing, and ordering that said hearing be held at a time and place to be fixed by further order of the Commission.

The application in Docket No. G-1694 was filed on May 25, 1951, by City Gas Company of Phillipsburg, New Jersey (City Gas) for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act, adjudging and ordering that 1,700 Mcf per day of natural gas to be made available to it pursuant to the Commission's Opinion No. 206 and accompanying order, can be economically delivered to it as proposed in said application. Said application proposes that said gas be delivered by Texas Eastern Transmission Corporation (Texas Eastern) to the Manufacturers Light and Heat Company (Manufacturers) for transportation through its Coatesville-Port Jervis pipeline to a point of connection with the facilities of Penn-Jersey Pipe Line Company (Penn-Jersey) where delivery would be made for further transportation by Penn-Jersey to the facilities of City Gas.

The application in Docket No. G-1695 was filed on May 28, 1952, by Manufacturers for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act, authorizing the installation and operation of a connection together with a meter and regulator station at a point on its Coatesville-Port Jervis pipeline in Northampton County, Pennsylvania, for the sale and delivery of natural gas to City Gas.

The application in Docket No. G-1699 was filed on May 31, 1951, by Texas Eastern for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act, authorizing the sale and delivery to Manufacturers of a maximum daily volume of 1,700 Mcf of natural gas for delivery to City Gas pursuant to a condition contained in said Opinion No. 206 and accompanying order.

The application in Docket No. G-1749 was filed on July 17, 1951, by Penn-Jersey, styling itself a de facto corporation, and supplemented on June 6, 1952, by Penn-Jersey, as a corporation de jure, for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act, authorizing the construction and operation of approximately 6 miles of 6-inch (or in part 8-inch) natural gas transmission pipe line between the facilities of Manufacturers and the facilities of City Gas.

The application in Docket No. G-1777 was filed on August 24, 1952, by Allentown-Bethlehem for an order pursuant to section 7 (b) of the Natural Gas Act, authorizing and approving the abandonment of certain natural-gas facilities extending from its distribution system in Pennsylvania to the middle of a bridge crossing the Delaware River, and the discontinuance of the delivery and sale of natural gas by means of said facilities to City Gas.

Each of the above-named applicants has requested that its application be heard under the shortened procedure provided by § 1.32 (b) of the Commission's rules of practice and procedure (18 CFR 1.32 (b)) for noncontested proceedings, and this consolidated proceeding is a proper one for disposition under the aforementioned rule, no request to be heard, protest, or petition raising an issue of substance in opposition to the granting of said applications having been received subsequent to the giving of due notice of the filing thereof, including publication in the FEDERAL REGISTER. Notice of the application filed in Docket No. G-1694 was published on June 9, 1951 (16 F. R. 5504). Notice of the application filed in Docket No. G-1695 was published on June 14, 1951 (16 F. R. 5660). Notice of the application in Docket No. G-1699 was published on June 16, 1951 (16 F. R. 5821). Notice of the application in Docket No. G-1749 was published on July 11, 1952 (17 F. R. 6233). Notice of the application in Docket No. G-1777 was published on September 18, 1951 (16 F. R. 9492).

On June 26, 1951, Allentown-Bethlehem filed petitions seeking leave to intervene in Docket Nos. G-1695 and G-1699. On August 24, 1951, Allentown-Bethlehem filed a petition seeking leave to intervene in Docket No. G-1749. On July 17, 1951, City Gas filed petitions seeking leave to intervene in Docket Nos. G-1695, G-1699, and G-1749, and on September 19, 1951, City Gas filed a petition seeking leave to intervene in Docket No. G-1777. On June 19, 1951, Manufacturers filed a petition seeking leave to intervene in Docket No. G-1694. Each of the foregoing petitions seeking leave to intervene is in support of the application in the proceeding in which said petition was filed. All of said petitions were dismissed without prejudice in the orders of the Commission issued on March 13, 1952, and said petitions were reinstated by order of the Commission issued on July 3, 1952. Concurrently with the adoption of this order, the Commission has adopted an order granting the aforesaid petitions seeking leave to intervene.

The Pennsylvania Public Utility Commission filed notices of intervention in Docket No. G-1694 on June 29, 1951, in Docket Nos. G-1695 and G-1699 on July 2, 1951, and in Docket No. G-1749 on October 31, 1951. Said Commission has advised this Commission that it has no objection to disposition of these proceedings under the shortened procedure provided by the Commission's rules.

The order reinstating the proceedings herein and consolidating said proceedings for purpose of hearing fixed July 23, 1952, as the final date for filing protests or petitions to intervene. Due notice of said order has been given, including publication in the FEDERAL REGISTER on July 10, 1952 (17 F. R. 6206). No protests or petitions have been received since said order was published.

Penn-Jersey has represented to the Commission that in the construction of the proposed pipeline a submarine crossing of the Delaware River is involved. Applicant states that at the present time the water in the river is comparatively

low, but that it will increase during the coming fall and winter. Applicant further states that each day's delay in disposition of this proceeding defers the time for commencement of construction and adds to the possibility that the cost of the crossing may be increased by high water to the point that a delay in construction for another year may become necessary. Applicant has furnished high and low elevations of the Delaware River at the proposed crossing for the years 1950, 1951, and 1952, which indicate that the month of October is the only remaining month in the year 1952 in which the water level is low enough to construct the proposed crossing without expenditure of very large sums of additional cash on account of the higher water to be expected in later months.

The Commission finds: It is reasonable and in the public interest, and good cause exists for fixing the date of hearing in the above-entitled consolidated proceedings less than 15 days after publication of this order in the FEDERAL REGISTER.

The Commission orders:

(A) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, a hearing be held on October 21, 1952, at 9:30 a. m., in the Hearing Room of the Federal Power Commission, 1800 Pennsylvania Avenue NW., Washington, D. C., concerning the matters involved and the issues presented by the applications filed in these proceedings: *Provided, however,* That the Commission may, after a noncontested hearing, forthwith dispose of the proceeding pursuant to the provisions of § 1.32 (b) of the Commission's rules of practice and procedure.

(B) Interested State commissions may participate as provided by §§ 1.8 and 1.37 (f) (18 CFR 1.8 and 1.37 (f)) of the said rules of practice and procedure.

Date of issuance: October 10, 1952.

By the Commission.

SECURITIES AND EXCHANGE COMMISSION

[File No. 1–2262]

SECURITIES INVESTMENT CO. OF ST. LOUIS

NOTICE OF APPLICATION TO WITHDRAW FROM LISTING AND REGISTRATION, AND OF OPPORTUNITY FOR HEARING

OCTOBER 9, 1952.

Securities Investment Company of St. Louis, pursuant to section 12 (d) of the Securities Exchange Act of 1934 and Rule X-12D2–1 (b) promulgated thereunder, has made application to withdraw its Cumulative Convertible Preferred Stock, $100 Par Value, and its Common Stock, $10 Par Value, from registration and listing on the Midwest Stock Exchange.

The reason stated in the application for withdrawing these securities from registration and listing is that General Contract Corporation on September 8, 1952, became the owner of 95 percent of the preferred stock of applicant and 97 percent of its common stock.

Upon receipt of a request, prior to November 7, 1952, from any interested person for a hearing in regard to terms to be imposed upon the delisting of these securities, the Commission will determine whether to set the matter down for hearing. Such request should state briefly the nature of the interest of the person requesting the hearing and the position he proposes to take at the hearing with respect to imposition of terms or conditions. In addition, any interested person may submit his views or any additional facts bearing on this application by means of a letter addressed to the Secretary of the Securities and Exchange Commission, Washington, D. C. If no one requests a hearing on this matter, this application will be determined by order of the Commission on the basis of the facts stated in the application, and other information contained in the official file of the Commission pertaining to the matter.

By the Commission.

[SEAL] ORVAL L. DUBOIS,
Secretary.

ELECTRIC BOND AND SHARE CO. ET AL

NOTICE OF FILING AND ORDER FOR HEARING CONCERNING APPLICATIONS FOR ALLOWANCES

OCTOBER 10, 1952.

The Commission having, on July 28, 1950, issued its Supplemental Findings and Opinion (Holding Company Act Release No. 9980), concerning a Plan of Electric Bond and Share Company ("Bond and Share") filed pursuant to section 11 (e) of the Public Utility Holding Company Act of 1935 ("act"), which Plan was designated by Bond and Share as "Plan II–B", which was a portion of certain related plans initially filed by Bond and Share on July 25, 1945, and subsequently amended and supplemented, and which Plan related to the payments to be made to the holders of former $6 Preferred Stock and $5 Preferred Stock of Bond and Share which had previously been retired pursuant to Plans I and II–A of Bond and Share; and

Said Findings and Opinion of the Commission dated July 28, 1950, having held that the $6 Preferred Stock of Bond and Share should receive an additional amount of $10 per share, together with compensation for delay in payment at the rate of 5.45 percent per annum, and that the $5 Preferred Stock should receive no further payment; an amendment having been filed by Bond and Share to Plan II–B on August 4, 1950, conforming said Plan to the determinations of the Commission as set forth in the Commission's Findings and Opinion dated July 28, 1950, and the Commission by order dated August 4, 1950 (Holding Company Act Release No. 10019), having approved Plan II–B as so amended, which order contained, among others, the following provisions:

It is further ordered, That jurisdiction be, and hereby is, reserved with respect to the reasonableness, appropriate allocation, and payment of all fees, expenses, and other remuneration in connection with Plan II–B, as amended.

The Commission having directed that applications for compensation for services or reimbursement for expenses in connection with said Plan be filed with the Commission, and certain applications for that purpose having been filed as hereinafter set forth;

Notice is hereby given that applications for the payment of compensation for services and reimbursement of expenses have been filed by the various parties and participants in said proceeding in the following respective amounts:

Name and capacity	Fees	Expenses	Total
Electric Bond & Share Co.:			
Simpson Thacher & Bartlett, counsel for company	$161,500.00	$13,806.94	$175,306.94
Drexel & Co., financial services, including expert testimony of Edward Hopkinson	45,000.00		45,000.00
Ebasco Services, Inc., financial studies, financial advice, and preparation of documents	84,019.16		84,019.16
Reis & Chandler, financial expert	27,500.00	314.30	27,814.30
The First Boston Corp., financial study	5,000.00		5,000.00
Stubenfield committee for preferred stock certificate holders:			
Percival E. Jackson, counsel for committee	300,000.00	5,942.21	305,942.21
Benjamin Graham, financial expert	13,500.00		13,500.00
William Stubenfield, chairman of committee	3,000.00		3,000.00
Frank Honigman and Eugene E. Ormsten, members of committee, jointly	2,500.00		2,500.00
Cornell preferred stockholders protective committee:			
Hawkins, Delafield & Wood, counsel for committee	150,000.00	[1] 6,037.90	156,037.90
Others:			
Debevoise, Plimpton & McLean, counsel for John Hancock Mutual Life Insurance Co., preferred certificate holder	12,000.00	506.69	12,506.69
Paul J. Kern, counsel for certain $5 preferred certificate holders	6,000.00		6,000.00

[1] Includes payment of $2,500 to Allen W. Kimber, expert witness.

It appearing to the Commission that it is appropriate in the public interest and in the interest of investors that a hearing be held with respect to the matters set forth in said applications:

It is ordered, That a hearing on said applications pursuant to sections 11 (e) and 18 of the act and the rules and regulations thereunder be held on November 18, 1952, at 10:00 a. m., e. s. t., at the offices of this Commission, 425 Second Street NW., Washington 25, D. C. On said date the hearing room clerk will advise as to the room in which such hearing will be held. Any person who is not already a party, or who has not been granted leave to participate herein, who desires to be heard or otherwise wishes to participate, shall file with the Secretary of this Commission, on or before November 12, 1952, a request relative thereto as provided in Rule XVII of the Commission's rules of practice.

It is further ordered, That Edward C. Johnson or any other officer or officers of the Commission designated by it for that purpose shall preside at such hearing. The officer or officers so designated to preside at such hearing are hereby authorized to exercise all powers granted to the Commission under section 18 (c) of the act and to a hearing officer under the Commission's rules of practice.

The Division of Public Utilities of the Commission having advised the Commission that it has made a preliminary examination of said applications and that on the basis thereof, the following matters and questions are presented for consideration without prejudice, however, to the presentation of additional matters and questions upon further examination.

(1) Whether the requested amounts for fees and expenses were incurred in rendering services which were necessary in connection with the reorganization plan and whether the requested amounts are reasonable.

(2) Whether there are any other factors apart from the nature and value of the services rendered and the capacity in which rendered, which would make any of the requests for compensation and reimbursement improper.

It is further ordered, That particular attention be directed at said hearing to the foregoing matters and questions.

It is further ordered, That any person who may wish to assert or claim any fees for services rendered, or reimbursement of expenses incurred, in connection with the foregoing proceedings, who has not already filed an application therefor, shall do so herein on or before November 1, 1952.

It is further ordered, That the Secretary of the Commission shall serve a copy of this order by registered mail, on the parties herein and those who have been given leave to participate in these proceedings and on the applicants herein, that notice of said hearing shall be given to all other persons by general release of this Commission, which shall be distributed to the press and mailed to the mailing list for releases issued under the Public Utility Holding Company Act of 1935, and by publication of this order in the FEDERAL REGISTER.

By the Commission.

[SEAL] ORVAL L. DUBOIS,
Secretary.

[F. R. Doc. 52–11222; Filed, Oct. 15, 1952; 8:49 a. m.]

[File No. 70–2937]

PHILADELPHIA CO. AND DUQUESNE LIGHT CO.

NOTICE OF FILING REGARDING SALE BY PARENT OF SHARES OF SUBSIDIARY'S COMMON STOCK AND SALE BY SUBSIDIARY OF SHARES OF ITS COMMON STOCK, ALL AT COMPETITIVE BIDDING, AND ORDER FOR HEARING

OCTOBER 10, 1952.

Notice is hereby given that a joint application-declaration, with an amendment thereto, has been filed with this Commission by Philadelphia Company ("Philadelphia"), a registered holding company and a subsidiary of Standard Gas and Electric Company ("Standard") and Standard Power and Light Corporation, both registered holding companies, and by Duquesne Light Company ("Duquesne"), a public utility subsidiary of Philadelphia. Applicants-declarants have designated sections 6, 7, 12 (d) and 12 (f) of the act and Rules U-44 and U-50, promulgated thereunder, as applicable to the proposed transactions which are summarized as follows:

Philadelphia proposes to sell, pursuant to the competitive bidding requirements of Rule U-50, 170,000 shares of common stock of Duquesne which Philadelphia acquired from Duquesne in March of 1952, for a cash consideration of $30 per share. (See Holding Company Act Release No. 11129). The net proceeds of the sale will be used by Philadelphia to repay its existing open account loan from Standard amounting to $2,300,000 and then to the reduction of Philadelphia's outstanding bank loans, presently aggregating $16,000,000.

Simultaneously with the above described sale by Philadelphia, Duquesne proposes, as part of the same offering, to issue and sell, pursuant to the competitive bidding requirements of Rule U-50, 80,000 shares of its common stock. The net proceeds of the sale will be used by Duquesne for construction purposes.

The applicants-declarants request that the ten-day period required by Rule U-50 to elapse between the time of inviting bids and the entering into of an agreement with respect to the sale of the common stock be shortened to six days.

The filing indicates that the issuance and sale by Duquesne of the 80,000 shares

of common stock are subject to the authorization of the Public Utility Commission of Pennsylvania.

The applicants-declarants request that this Commission make the necessary findings and recitals in accordance with Supplement R and section 1808 (f) of the Internal Revenue Code, as amended, and that the Commission's order herein become effective upon issuance.

It appearing to the Commission that it is appropriate in the public interest and in the interest of investors and consumers that a hearing be held with respect to the proposed transactions and that said joint application-declaration should not be granted and permitted to become effective except pursuant to the further order of this Commission:

It is ordered, That a hearing on said application-declaration, as amended, be held on November 12, 1952, at 10:00 a. m., at the offices of the Commission, 425 Second Street NW., Washington 25, D. C. On such date, the Hearing Room Clerk in Room 193 will advise as to the room in which such hearing will be held. Any person desiring to be heard or otherwise wishing to participate in the proceedings, is directed to file with the Secretary of the Commission on or before November 10, 1952, a written request relative thereto as provided by Rule XVII of the Commission's rules of practice.

It is further ordered, That Edward C. Johnson or any other officer or officers of the Commission designated by it for that purpose shall preside at the hearing in such matter. The officer so designated is hereby authorized to exercise all powers granted to the Commission under section 18 (c) of said act and to a hearing officer under the Commission's rules of practice.

The Division of Public Utilities of the Commission having advised the Commission that it has made a preliminary examination of the joint application-declaration, as amended, and that, upon the basis thereof, the following matters and questions are presented for consideration without prejudice to its specifying additional matters and questions upon further examination:

(1) Whether the proposed sale of Duquesne's common stock by Philadelphia meets the standards of section 12 (d) of the act;

(2) Whether the proposed payment by Philadelphia of the open account loan from Standard meets the standards of section 12 (f) of the act;

(3) Whether the issuance and sale of common stock by Duquesne meet the standards of sections 6 and 7 of the act;

(4) What terms and conditions, if any, with respect to the proposed transactions should be prescribed in the public interest or for the protection of investors and consumers;

(5) Generally, whether the proposed transactions comply with the applicable provisions of the act and the rules and regulations and orders promulgated or issued thereunder;

It is further ordered, That particular attention be directed at said hearing to the foregoing matters and questions.

It is further ordered, That the Secretary of the Commission shall serve notice of the aforesaid hearing by mailing copies of this notice and order by registered mail to Philadelphia, Duquesne, Standard, and the Public Utility Commission of Pennsylvania; that notice shall be given to all other persons by general release of this Commission which shall be distributed to the press and mailed to the persons on the mailing list of this Commission for releases under the act, and that further notice be given to all persons by publication of this notice and order in the FEDERAL REGISTER.

By the Commission.

NATIONAL ASSOCIATION OF SECURITIES DEALERS, INC. AND GEORGE T. ANDERSON

NOTICE OF TIME FOR FILING WRITTEN REQUEST FOR HEARING

At a regular session of the Securities and Exchange Commission held at its office in the city of Washington, D. C., on the 10th day of October 1952.

In the matter of the application of National Association of Securities Dealers, Inc., on behalf of a member firm for approval of the firm's continuance in membership in the Association with George T. Anderson, as a controlled person.

The National Association of Securities Dealers, Inc., a registered securities association (hereinafter referred to as the Association), has filed with this Commission, on behalf of a member, an application for approval of the firm's continuance in membership in the Association with George T. Anderson as an employee and controlled person thereof, pursuant to the provisions of section 15A (b) (4) of the Securities Exchange Act of 1934.

The application and exhibits attached thereto set forth, in substance, the following information:

1. George T. Anderson is presently or is to be employed by said member, a registered broker and dealer and a member of the Association in District No. 13, having its principal office in New York, New York.

2. The Commission, by order of July 27, 1950, revoked the broker-dealer registration of Junger, Anderson and Co., of which George T. Anderson was a partner, pursuant to section 15 (b) of the Securities Exchange Act of 1934. George T. Anderson has not engaged in the securities business since that time.

3. George T. Anderson, individually and as a partner of Junger, Anderson and Co., is permanently enjoined from engaging in and continuing certain practices in connection with the purchase and sale of securities.

4. The District Committee for District No. 13 and the Board of Governors of the Association have considered this application and have reviewed the prior proceedings relating to George T. Anderson. Upon consideration of all the facts, including the representations as to the type of activity to be engaged in by George T. Anderson as an employee and controlled person of said member and the extent of the supervision which said member will exercise over his activities, they have concluded that George T. Anderson should be permitted to engage in the securities business as an employee and controlled person of said member and that said member should be continued in membership in the Association. They are of the belief that the continuance of said member in membership in the Association with George T. Anderson as an employee and controlled person thereof would be consonant with the stated purposes and policies of section 15A of the Securities Exchange Act of 1934 and have recommended approval of this application.

Under the provisions of section 15A (b) (4) of the Securities Exchange Act of 1934, as amended, and section 2 of Article I of the Association's By-Laws, said member may not be continued in membership in the Association so long as George T. Anderson is employed by said member, except with the approval of the Securities and Exchange Commission based upon a finding that such approval is appropriate in the public interest.

Notice is hereby given that any interested person may informally present his views or any information relating to this matter by communicating with the Secretary of the Commission or with Peter T. Byrne, Administrator of the Commission's New York Regional Office, 42 Broadway, New York 4, New York, on or before November 7, 1952, and that within the same time any person desiring that a formal hearing be held may file with the Secretary of the Commission a written request to that effect, together with a brief statement of the nature of his interest in the proceeding and the position which he proposes to take. In the absence of such a request by any person having a bona fide interest in the proceedings, the Commission will either set the matter down for hearing on its own motion after appropriate notice or, if it should appear appropriate so to do, will determine the application on the basis of the record and without formal hearing.

This notice shall be served on said member and the association not less than fifteen (15) days prior to November 7, 1952, and published in the FEDERAL REGISTER in the manner prescribed by the Federal Register Act not later than fifteen (15) days prior to November 7, 1952.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

TITLE 16—COMMERCIAL PRACTICES

Chapter I—Federal Trade Commission

[Docket 5972]

PART 3—DIGEST OF CEASE AND DESIST ORDERS

UBIKO MILLING CO.

Subpart—*Discriminating in price under section 2, Clayton Act as amended—Price discrimination under 2 (a):* § 3.725 *Cumulative quantity discounts and schedules;* § 3.770 *Quantity rebates or discounts.* In the sale of animal feed products, including both concentrate and complete feeds, whether sold under the name of "Life Guard" or any other name or designation, in commerce, directly or indirectly discriminating in price between different competing purchasers of animal feed products, including both concentrate and complete feeds of like grade and quality, where the aforesaid products are sold for use, consumption or resale within the United States, by employing in any manner, or by any means, any arrangement or plan, regardless of designation, whereby allowances, discounts, rebates, refunds, compensation or consideration of any nature or description are granted or paid in any manner to competing dealer purchasers of such products when such allowances, discounts, rebates, refunds, compensation or consideration are compiled or computed at varied or different rates or percentages dependent upon the quantity or amount of the products purchased; prohibited.

(Sec. 6, 38 Stat. 722; 15 U. S. C. 46. Interprets or applies sec. 2, 38 Stat. 730, as amended; 15 U. S. C. 13) [Cease and desist order, Ubiko Milling Company, Cincinnati, Ohio, Docket 5972, August 6, 1952]

This proceeding was instituted by complaint which charged respondent with violation of subsection (a) of section 2 of the Clayton Act, as amended.

It was disposed of, as announced by the Commission's "Notice of acceptance of consent settlement and order to file report of compliance", dated August 6, 1952, through the consent settlement procedure provided in Rule V of the Commission's rules of practice as follows:

The consent settlement tendered by the parties in this proceeding, a copy of which is served herewith, was on August 6, 1952, accepted by the Commission, subject only to the condition that the respondent comply with the requirements of the following paragraph with respect to the filing of a report showing the manner and form in which it has complied with the order to cease and desist; and subject to such condition said consent settlement was ordered entered of record as the Commission's findings as to the facts,' conclusion,' and order in disposition of this proceeding.

It is accordingly ordered, That the respondent, Ubiko Milling Company, a corporation, shall within sixty (60) days after service upon it of this notice and order, file with the Commission a report

[1] Filed as part of the original document.

in writing setting forth in detail the manner and form in which it has complied with the order to cease and desist contained in the consent settlement entered herein.

Said order to cease and desist, thus entered of record, following the findings as to the facts and conclusion, reads as follows:

It is ordered, That the respondent, Ubiko Milling Company, a corporation, directly or indirectly, through any corporate or other device, through its officers, agents, representatives or employees, or by any other means or methods in the sale of animal feed products, including both concentrate and complete feeds, whether sold under the name of "Life Guard" or any other name or designation, in commerce, as "commerce" is defined in the aforesaid Clayton Act, do forthwith cease and desist from: Directly or indirectly discriminating in price between different competing purchasers of animal feed products, including both concentrate and complete feeds of like grade and quality, where the aforesaid products are sold for use, consumption or resale within the United States, by employing in any manner, or by any means, any arrangement or plan, regardless of designation, whereby allowances, discounts, rebates, refunds, compensation or consideration of any nature or description are granted or paid in any manner to competing dealer purchasers of such products when such allowances, discounts, rebates, refunds, compensation or consideration are compiled or computed at varied or different rates or percentages dependent upon the quantity or amount of the products purchased.

The foregoing consent settlement is hereby accepted by the Federal Trade Commission and ordered entered of record this 6th day of August 1952, subject only to the condition that the respondent shall, within sixty (60) days after service upon it of a copy of this consent settlement, file with the Commission a report in writing setting forth in detail the manner and form in which it has complied with the order to cease and desist contained in said consent settlement.

Issued: August 13, 1952.

By direction of the Commission.

[SEAL] WM. P. GLENDENING, JR.,
Acting Secretary.

[Docket 5973]

PART 3—DIGEST OF CEASE AND DESIST ORDERS

EARLY & DANIEL CO.

Subpart—*Discriminating in price under section 2, Clayton Act as amended—Price discrimination under 2 (a):* § 3.725 *Cumulative quantity discounts and schedules;* § 3.770 *Quantity rebates or discounts.* In the sale of animal feed products, whether sold under the name of "Tuxedo" or any other name or designation, in commerce, directly or indirectly discriminating in price between different competing purchasers of animal feed products of like grade and quality where the aforesaid products are sold for use, consumption or resale within the United States, by employing in any manner, or by any means, any arrangement or plan, regardless of designation, whereby allowances, discounts, rebates, refunds, compensation or consideration of any nature or description are granted or paid in any manner to competing dealer purchasers of such products when such allowances, discounts, rebates, refunds, compensation or consideration are compiled or computed at varied or different rates or percentages dependent upon the quantity or amount of the products purchased; prohibited.

(Sec. 6, 38 Stat. 722; 15 U. S. C. 46. Interprets or applies sec. 2, 38 Stat. 730, as amended; 15 U. S. C. 13) [Cease and desist order, Early & Daniel Co., Cincinnati, Ohio, August 6, 1952]

This proceeding was instituted by complaint which charged respondent with violation of subsection (a) of section 2 of the Clayton Act, as amended.

It was disposed of, as announced by the Commission's "Notice of acceptance of consent settlement and order to file report of compliance", dated August 6, 1952, through the consent settlement procedure provided in Rule V of the Commission's rules of practice as follows:

The consent settlement tendered by the parties in this proceeding, a copy of which in served herewith, was on August 6, 1952, accepted by the Commission, subject only to the condition that the respondent comply with the requirements of the following paragraph with respect to the filing of a report showing the manner and form in which it has complied with the order to cease and desist; and subject to such condition said consent settlement was ordered entered of record as the Commission's findings as to the facts,[1] conclusion,[1] and order in disposition of the proceeding.

It is accordingly ordered, That the respondent, Early & Daniel Co., a corporation, shall within sixty (60) days after service upon it of this notice and order, file with the Commission a report in writing setting forth in detail the manner and form in which it has complied with the order to cease and desist contained in the consent settlement entered herein.

Said order to cease and desist, thus entered of record, following the findings as to the facts and conclusion, reads as follows:

It is ordered, That the respondent, Early & Daniel Co., a corporation, directly or indirectly, through any corporate or other device, through its officers, agents, representatives or employees, or by any other means or methods in the sale of animal feed products, whether sold under the name of "Tuxedo" or any other name or designation, in commerce, as "Commerce" is defined in the aforesaid Clayton Act, do forthwith cease and desist from: Directly or indirectly discriminating in price between different competing purchasers of animal feed products of like grade and quality where the aforesaid products are sold for use, consumption or resale within the United States, by employing in any manner, or by any means, any arrangement or plan, regardless of designation, whereby allowances, discounts, rebates, refunds, compensation or consideration of any nature or description are granted or paid in any manner to competing dealer purchasers of such products when such allowances, discounts, rebates, refunds, compensation or consideration are compiled or computed at varied or different rates or percentages dependent upon the quantity or amount of the products purchased.

The foregoing consent settlement is hereby accepted by the Federal Trade Commission and ordered entered of record this 6th day of August 1952, subject only to the condition that the respondent shall, within sixty (60) days after service upon it of a copy of this consent settlement, file with the Commission a report in writing setting forth in detail the manner and form in which it has complied with the order to cease and desist contained in said consent settlement.

Issued: August 13, 1952.

By direction of the Commission.

[SEAL] WM. P. GLENDENING, JR.,
Acting Secretary.

[Docket 5946]

PART 3—DIGEST OF CEASE AND DESIST ORDERS

IRVING DREW CORP.

Subpart—*Advertising falsely or misleadingly:* § 3.170 *Qualities or properties of product or service.* Subpart—*Misbranding or mislabeling:* § 3.1290 *Qualities or properties.* Subpart—*Using misleading name—Goods:* § 3.2325 *Qualities or properties.* In connection with the offering for sale, sale, or distribution in commerce, of respondent's shoes designated "The Drew Arch Rest Shoe" and "Drew Kushion-Flex Shoe" or any other shoe of similar construction or performing similar functions irrespective of the designation applied thereto, (1) using the words "orthopedic" or "health" or any other word or term of similar meaning, alone or in combination with any other word or words, to designate, describe, or refer to respondent's shoes, or representing in any other manner that the wearing of respondent's shoes will cure, correct, or improve the diseases, disorders, or abnormalities of the feet of the individuals purchasing such shoes; (2) representing, directly or by implication, that the wearing of said shoes will assure balanced foot function or will establish or maintain the health of the feet or the general health; or, (3) representing, directly or by implication, that the wearing of respondent's "Kushion-Flex" shoes relieves tired, tender or aching feet, or the pain incident to bunions or callouses, or causes foot trouble to disappear; prohibited.

(Sec. 6, 38 Stat. 722; 15 U. S. C. 46. Interprets or applies sec. 5, 38 Stat. 719, as amended; 15 U. S. C. 45) [Cease and desist order, The Irving Drew Corporation, Lancaster, Ohio, Docket 5946, July 15, 1952]

This proceeding was heard by John Lewis, hearing examiner, upon the complaint of the Commission, respondent's answer, and a hearing, at which respondent failed to appear, and at which testimony and other evidence, duly recorded in the office of the Commission, were introduced before said examiner, theretofore duly designated by the Commission.

Thereafter the proceeding regularly came on for final consideration by said examiner on the complaint, the answer thereto, testimony and other evidence, proposed findings as to the facts and conclusions presented by counsel in support of the complaint, respondent having been advised of its right to file such proposed findings and conclusions and having failed to do so, and oral argument not having been requested; and said examiner, having duly considered the record in the matter, and having found that the proceeding was in the interest of the public, made his initial decision comprising certain findings as to the facts,[1] conclusion drawn therefrom,[1] and order to cease and desist.

No appeal having been filed from said initial decision of said hearing examiner as provided for in Rule XXII, nor any other action taken as thereby provided to prevent said initial decision becoming the decision of the Commission thirty days from service thereof upon the parties, said initial decision, including said order to cease and desist, accordingly, under the provisions of said Rule XXII became the decision of the Commission on July 15, 1952.

The said order to cease and desist is as follows:

It is ordered, That the respondent, the Irving Drew Corporation, a corporation, and its officers, representatives, agents, and employees, directly or through any corporate or other device, in connection with the offering for sale, sale, or distribution in commerce, as "commerce" is defined in the Federal Trade Commission Act, of respondent's shoes designated "The Drew Arch Rest Shoe" and "Drew Kushion-Flex Shoe" or any other shoe of similar construction or performing similar functions irrespective of the designation applied thereto, do forthwith cease and desist from:

1. Using the words "orthopedic" or "health" or any other word or term of similar meaning, alone or in combination with any other word or words, to designate, describe, or refer to respondent's shoes, or representing in any other manner that the wearing of respondent's shoes will cure, correct, or improve the diseases, disorders, or abnormalities of the feet of the individuals purchasing such shoes.

2. Representing, directly or by implication, that the wearing of said shoes will assure balanced foot function or will establish or maintain the health of the feet or the general health.

3. Representing, directly or by implication, that the wearing of respondent's "Kushion-Flex" shoes relieves tired, tender, or aching feet, or the pain incident to bunions or callouses, or causes foot troubles to disappear.

By "Decision of the Commission and order to file report of compliance", Docket 5946, July 15, 1952, which announced and decreed fruition of said initial decision, report of compliance was required as follows:

It is ordered, That the respondent herein shall, within sixty (60) days after service upon it of this order, file with the Commission a report in writing setting forth in detail the manner and form in which it has complied with the order to cease and desist.

Issued: July 15, 1952.

By the Commission.

[SEAL] D. C. DANIEL,
Secretary.

[Docket 5947]

PART 3—DIGEST OF CEASE AND DESIST ORDERS

DR. HISS SHOES, INC.

Subpart—*Advertising falsely or misleadingly:* § 3.170 *Qualities or properties of product or service;* § 3.205 *Scientific or other relevant facts.* Subpart—*Misbranding or mislabeling:* § 3.1290 *Qualities or properties;* § 3.1320 *Scientific or other relevant facts.* Subpart—*Using misleading name—Goods:* § 3.2325 *Qualities or properties.* In connection with the offering for sale, sale or distribution in commerce, of respondent's shoes designated "Dr. Hiss Balanced Shoes" or any other shoe of similar construction or performing similar functions irrespective of the designation applied thereto, representing, directly or by implication, (1) that a purchaser of respondent's shoes will receive benefits comparable to those derived from personal treatment or prescription of shoes at a competent foot clinic; (2) that the wearing of respondent's shoes will beneficially affect the distribution of body weight or result in better foot function, body balance, or posture; (3) that respondent's shoes will assure continued health in healthy feet or will improve foot health or the general health or will alleviate foot troubles or the discomforts thereof; (4) that the wearing of said shoes will eliminate pressure or tension or exercise the muscles of the feet; (5) that support for the feet is necessary unless such representation be limited to the categories of foot disorders in which support for the feet is required, or representing, directly or by implication, that the wearing of respondent's shoes will furnish the support needed in the individual case; or, (6) through the use of the term "cuboid balancer" to describe a shank in respondent's shoes, or by any other means, that the said shank will influence the position or action of the cuboid bones of the wearer of said shoes, or that the wearing of said device in its shoes will beneficially affect the functioning of the feet or give effective support thereto; or (7), using the word "orthopedic," alone or in combination with any other word or words, to describe or designate said shoes, or using any other word or words in any manner to represent, directly or by implication, that respondent's shoes will cure, correct, or improve deformities, diseases, or disorders of the feet; prohibited.

(Sec. 6, 38 Stat. 722; 15 U. S. C. 46. Interprets or applies sec. 5, 38 Stat. 719, as amended; 15 U. S. C. 45) [Cease and desist order, Dr. Hiss Shoes, Inc., Lancaster, Ohio, Docket 5947, July 15, 1952]

This proceeding was heard by John Lewis, hearing examiner, upon the complaint of the Commission, respondent's answer, and a hearing, at which respondent failed to appear, and at which testimony and other evidence, duly recorded in the office of the Commission, were introduced before said examiner, theretofore duly designated by the Commission.

Thereafter the proceeding regularly came on for final consideration by said examiner on the complaint, the answer thereto, testimony and other evidence, proposed findings as to the facts and conclusions presented by counsel in support of the complaint, respondent having been advised of its right to file such proposed findings and conclusions and having failed to do so, and oral argument not having been requested; and said examiner, having duly considered the record in the matter, and having found that the proceeding was in the interest of the public, made his initial decision comprising certain findings as to the facts,[1] conclusion drawn therefrom,[1] and order to cease and desist.

No appeal having been filed from said initial decision of said hearing examiner as provided for in Rule XXII, nor any other action taken as thereby provided to prevent said initial decision becoming the decision of the Commission thirty days from service thereof upon the parties, said initial decision, including said order to cease and desist, accordingly, under the provisions of said Rule XXII became the decision of the Commission on July 15, 1952.

The said order to cease and desist is as follows:

It is ordered, That the respondent, Dr. Hiss Shoes, Inc., a corporation, and its officers, representatives, agents, and employees, directly or through any corporate or other device, in connection with the offering for sale, sale or distribution in commerce, as "commerce" is defined in the Federal Trade Commission Act, of respondent's shoes designated "Dr. Hiss Balanced Shoes" or any other shoe of similar construction or performing similar functions irrespective of the designation applied thereto, do forthwith cease and desist from:

1. Representing, directly or by implication, that a purchaser of respondent's shoes will receive benefits comparable to those derived from personal treatment or prescription of shoes at a competent foot clinic.

[1] Filed as part of the original document.

[1] Filed as part of the original document.

2. Representing, directly or by implication that the wearing of respondent's shoes will beneficially affect the distribution of body weight or result in better foot function, body balance, or posture.

3. Representing, directly or by implication, that respondent's shoes will assure continued health in healthy feet or will improve foot health or the general health or will alleviate foot troubles or the discomforts thereof.

4. Representing, directly or by implication, that the wearing of said shoes will eliminate pressure or tension or exercise the muscles of the feet.

5. Representing, directly or by implication, that support for the feet is necessary unless such representation be limited to the categories of foot disorders in which support for the feet is required, or representing, directly or by implication, that the wearing of respondent's shoes will furnish the support needed in the individual case.

6. Representing, directly or by implication, through the use of the term "cuboid balancer" to describe a shank in respondent's shoes, or by any other means, that the said shank will influence the position or action of the cuboid bones of the wearer of said shoes, or that the wearing of said device in its shoes will beneficially affect the functioning of the feet or give effective support thereto.

7. Using the word "orthopedic," alone or in combination with any other word or words, to describe or designate said shoes, or using any other word or words in any manner to represent, directly or by implication, that respondent's shoes will cure, correct, or improve deformities, diseases, or disorders of the feet.

By "Decision of the Commission and order to file report of compliance", Docket 5947, July 15, 1952, which announced and decreed fruition of said initial decision, report of compliance was required as follows:

It is ordered, That the respondent herein shall, within sixty (60) days after service upon it of this order, file with the Commission a report in writing setting forth in detail the manner and form in which it has complied with the order to cease and desist.

Issued: July 15, 1952.

By the Commission.

[Docket 5944]

PART 3—DIGEST OF CEASE AND DESIST ORDERS

FISHER & DE RITIS

Subpart—*Misbranding or mislabeling:* § 3.1185 *Composition.* Subpart—*Neglecting, unfairly or deceptively, to make material disclosure:* § 3.1845 *Composition;* § 3.1890 *Safety.* In connection with the offering for sale, sale and distribution in commerce, of sweaters or of any other garments made of the material known as brushed rayon with a raised fiber surface or of any similar material, (1) representing directly or by implication that said garments are made of camel's hair or any other type of wool; (2) offering for sale or selling any garments composed in whole or in part of rayon without affirmatively and clearly disclosing thereon such rayon content; or, (3) offering for sale or selling garments made of a highly inflammable material without affirmatively and clearly disclosing thereon that said garments are highly inflammable and are dangerous and unsafe to be worn as articles of clothing; prohibited.

(Sec. 6, 38 Stat. 722; 15 U. S. C. 46. Interprets or applies sec. 5, 38 Stat. 719, as amended; 15 U. S. C. 45) [Cease and desist order, Albert H. Fisher et al. d. b. a. Fisher & DeRitis, Philadelphia, Pa., Docket 5944, July 17, 1952.]

In the Matter of Albert H. Fisher and Vincent DeRitis Trading and Doing Business Under the Name of Fisher & DeRitis

This proceeding was heard by Everett F. Haycraft, hearing examiner, upon the complaint of the Commission, respondents' answer, and a hearing at which testimony and other evidence, duly recorded and filed in the office of the Commission, in support of the allegations of the complaint were introduced before said examiner, theretofore duly designated by the Commission, the introduction of testimony and other evidence by the respondents having been waived.

Subsequently, following the filing by said examiner of his initial decision, and the service thereof upon the parties, counsel in support of the allegations of the complaint moved the Commission to order the proceeding reopened and remanded to the examiner for the taking of additional evidence, and the Commission placed the case on its own docket for review, amended the complaint, vacated and set aside said initial decision and remanded the case to the examiner for further proceedings in conformity with its rules of practice.

Thereafter, a stipulation as to the facts was entered into, subject to the approval of said examiner, whereby it was agreed that the evidence taken under the original complaint should be considered as evidence under the complaint as amended; that a statement of facts made a part thereof should be made a part of the record and be taken as facts in lieu of additional evidence in the proceedings; and that the examiner might proceed upon said statement and the other evidence in the record to make his initial decision, stating his findings as to the facts and including inferences which he might draw from said stipulation and the other evidence, and his conclusion based thereon, and enter his order disposing of the proceeding without the filing of proposed findings and conclusions or the presentation of oral argument.

Thereafter said proceeding regularly came on for final consideration by said examiner upon said amended complaint and stipulation, which also provided that if the proceeding came before the Commission upon appeal from said initial decision or by review upon its own motion, it might set aside the stipulation and remand the case to the examiner for further proceedings under the amended complaint; and said examiner, having duly considered the record, and having found that the proceeding was in the interest of the public, made his initial decision comprising certain findings as to the fact,[1] conclusion drawn therefrom,[1] and order to cease and desist.

No appeal having been filed from said initial decision of said hearing examiner as provided for in Rule XXII, nor any other action taken as thereby provided to prevent said initial decision becoming the decision of the Commission thirty days from service thereof upon the parties, said initial decision, including said order to cease and desist, accordingly, under the provisions of said Rule XXII became the decision of the Commission on July 17, 1952.

The said order to cease and desist is as follows:

It is ordered, That the respondents, Albert H. Fisher and Vincent DeRitis, individually and trading and doing business under the firm name of Fisher & DeRitis, or under any other name or names, and their respective representatives, agents and employees, directly or through any corporate or other device, in connection with the offering for sale, sale and distribution in commerce, as "commerce" is defined in the Federal Trade Commission Act, of sweaters or of any other garments made of the material known as brushed rayon with a raised fiber surface or of any similar material, do forthwith cease and desist from:

(1) Representing directly or by implication that said garments are made of camel's hair or any other type of wool;

(2) Offering for sale or selling any garments composed in whole or in part of rayon without affirmatively and clearly disclosing thereon such rayon content;

(3) Offering for sale or selling garments made of a highly inflammable material without affirmatively and clearly disclosing thereon that said garments are highly inflammable and are dangerous and unsafe to be worn as articles of clothing.

By "Decision of the Commission and order to file report of compliance", Docket 5944, July 17, 1952, which announced and decreed fruition of said initial decision, report of compliance was required as follows:

It is ordered, That the respondents herein shall within sixty (60) days after service upon them of this order, file with the Commission a report in writing setting forth in detail the manner and form in which they have complied with the order to cease and desist.

Issued: July 17, 1952.

[1] Filed as part of the original document.

TITLE 39—POSTAL SERVICE

Chapter I—Post Office Department

PART 96—AIR MAIL SERVICE

PRIORITY FOR MAIL

In Part 96, Air Mail Service, amend § 96.47 *Priority for mail* to read as follows:

§ 96.47 *Priority for mail.* (a) (1) The Post Office Department requires that air carriers whose certificate of public convenience and necessity authorizes the transportation of mail will transport the normal mail for a particular day of the week from each station served. No other traffic will have priority over the normal mail load. If conditions are such that it may be necessary on occasion to carry additional fuel on a particular flight the carrier will take this into consideration when booking other traffic for that flight. No part of the normal mail load will be displaced by such additional fuel. "Normal mail load" means the average weight of the mail available for a particular dispatch on the same day of the week for the five previous weeks. Mail diverted to a flight because of unusual conditions will not be considered in arriving at the average.

(2) Mail in excess of normal will be transported to the exclusion of all other traffic, except revenue passengers with space confirmed prior to knowledge that additional mail would be available. If a carrier accepts mail in excess of the normal mail load he thereby obligates himself to see that the mail is expedited and under no circumstances delayed in arrival at destination over the service available by a subsequent flight. Under no circumstances will mail aboard a plane be reduced below normal to accommodate local boarding passengers.

(b) Refusals and removals of mail by an air carrier, except as provided in paragraph (a) (2) of this section, may result in diversion of mail to another carrier, imposition of fines and penalties as provided for by section 901 (a) of the Civil Aeronautics Act of 1938, as amended, or both.

(c) Air carriers are required to provide necessary and adequate facilities and service for the expeditious and safe handling of mails between planes and between plane and points of delivery and receipt of mails at airports.

(d) In unloading, loading, transfer of mail to connecting planes, and delivery of mail to the designated postal representative, mail shall be given preference over all other cargo, including baggage.

(e) Delays in unloading, loading, delivery, and receipt of mail, failures to make scheduled transfers of mail between planes of the same carrier or to flights of other carriers, or failures to make every reasonable effort to transport the mail on the flight for which tendered will subject the carrier to fines and penalties as provided for under section 901 (a) of the Civil Aeronautics Act of 1938, as amended.

This amendment shall become effective upon publication in the FEDERAL REGISTER.

(R. S. 161, 396; secs. 304, 309, 42 Stat. 24, 25; sec. 405 (d), 52 Stat. 995, as amended; 5 U. S. C. 22, 369; 49 U. S. C. 485)

TITLE 46—SHIPPING

Chapter I—Coast Guard, Department of the Treasury

Subchapter N—Explosives or Other Dangerous Articles or Substances and Combustible Liquids on Board Vessels

[CGFR 52-50]

PART 146—TRANSPORTATION OR STORAGE OF EXPLOSIVES OR OTHER DANGEROUS ARTICLES OR SUBSTANCES AND COMBUSTIBLE LIQUIDS ON BOARD VESSELS

SUBPART—GENERAL REGULATIONS

ASSIGNMENT AND CERTIFICATION BY NATIONAL CARGO BUREAU, INC.

The purpose of the following new regulation is to recognize and utilize the services of the National Cargo Bureau, Inc., a non-profit organization incorporated under the laws of the State of New York, with principal offices in New York, New York, and with authorized surveyors or representatives in the principal ports of the United States, as one of the organizations deemed helpful in administering the provisions of the Dangerous Cargo Act (R. S. 4472, as amended; 46 U. S. C. 170) and the regulations promulgated thereunder, as provided by law. The President by a proclamation dated September 10, 1952, proclaimed that the International Convention for the Safety of Life at Sea, 1948, was duly ratified and shall come into force and effect on and after November 19, 1952, and that this Convention, with each and every article and clause thereof, shall be observed and fulfilled with good faith by the United States of America and by the citizens of the United States of America and all other persons subject to the jurisdiction thereof. As a contracting Government the United States assumes obligations with respect to the carriage of dangerous cargoes under Chapter VI of this Convention. The President in Executive Order 10173, as amended by Executive Orders 10277 and 10352 (15 F. R. 7005, 7007, 7008; 16 F. R. 7537, 7538; 17 F. R. 4007), declared that the security of the United States was endangered necessitating additional measures to be taken under the Magnuson Act (64 Stat. 427, 428, 50 U. S. C. 191), regarding supervision and control of explosives or other dangerous cargo on vessels and waterfront facilities. On December 16, 1950, the President issued Proclamation No. 2914, proclaiming the existence of a national emergency. Since this new regulation provides alternate means for obtaining prima facie evidence of compliance with the requirements of law and regulation, thereby facilitating the administration and enforcement of the requirements above mentioned under emergency conditions presently existing, it is hereby found that compliance with the notice of proposed rule making, public rule making procedure thereon, and effective date requirements of the Administrative Procedure Act and R. S. 4472, as amended, is impracticable and contrary to the public interest.

By virtue of the authority vested in me as Commandant, United States Coast Guard, by Treasury Department Order No. 120, dated July 31, 1950 (15 F. R. 6521), to promulgate regulations in accordance with the statutes cited with the regulations below, the following new § 146.02-6a is prescribed and added to Part 146 which shall become effective on and after November 1, 1952:

§ 146.02-6a *Assignment and certification.* (a) The National Cargo Bureau, Inc., is authorized to assist the United States Coast Guard in administering the provisions of the Dangerous Cargo Act (R. S. 4472, as amended, 46 U. S. C. 170) and the regulations in this subchapter with respect to:

(1) Inspection of vessels for suitability for loading dangerous cargo;

(2) Examination of stowage of dangerous cargo;

(3) Making recommendations as to stowage requirements of dangerous cargo; and

(4) Issuance of certificates of loading setting forth that the stowage of danger-

ous cargo is in accordance with the regulations in this subchapter.

(b) Certificates of loading of the National Cargo Bureau, Inc., may be accepted as prima facie evidence of compliance with the Dangerous Cargo Act (R. S. 4472, as amended, 46 U. S. C. 170) and the regulations in this subchapter.

(R. S. 4405, as amended, 4462, as amended, 4472, as amended; 46 U. S. C. 375, 416, 170. Interprets or applies sec. 5, 55 Stat. 244, 245, as amended; 50 U. S. C. App. 1275)

Dated: October 9, 1952.

[SEAL] A. C. RICHMOND,
Rear Admiral, U. S. Coast Guard,
Acting Commandant.

[F. R. Doc. 52-11283; Filed, Oct. 16, 1952; 8:56 a. m.]

TITLE 32A—NATIONAL DEFENSE, APPENDIX

Chapter III—Office of Price Stabilization, Economic Stabilization Agency

[Ceiling Price Regulation 175]

CPR 175—DOUGLAS FIR AND WESTERN HEMLOCK DOORS

Pursuant to the Defense Production Act of 1950, as amended, Executive Order 10161, and Economic Stabilization Agency General Order No. 2, this Ceiling Price Regulation 175 is hereby issued.

STATEMENT OF CONSIDERATIONS

This regulation establishes specific dollars-and-cents ceiling prices at the manufacturing level for standard sizes and grades of stock doors, door bars, and bead stock produced west of the Cascade Mountains in the States of Washington and Oregon. Design net prices are provided to cover standard patterns of doors, while appropriate additions are included to cover other than standard items and services.

The doors covered by this regulation are produced from the softwood or evergreen trees of the Pacific Northwest, the most important species used being Douglas fir, the Western hemlocks, Sitka spruce, Noble fir, and White fir. The industry, most commonly referred to as the Douglas Fir Door Industry, gets its name from the species of lumber most commonly used in the production of doors.

The annual output of the industry is valued at approximately $50,000,000 produced chiefly by 16 firms. About 50 percent of the firms are considered large in that they employ over 200 employees each; 30 percent are of medium size with 100 to 200 employees each; and 20 percent are relatively small with less than 100 employees each. The majority of the plants are nonintegrated, although there are a few plants which are considered integrated to the extent that they produce materials such as plywood, used in the manufacture of doors.

This regulation establishes ceiling prices for (1) House Doors, Side Lights, and Garage Doors which are graded in accordance with Commercial Standard CS 73–51 of the National Bureau of Standards, (2) Factory-Fitted Entrance Doors which are graded in accordance with Commercial Standard CS 91–41 of the National Bureau of Standards, and (3) Hollow Core or Airflow Flush Doors which are of specifications equivalent to the minimum specifications set forth in the "Official Fir Door Industry Grading Rules for Flush Doors" adopted by the Fir Door Institute.

Ceiling prices are set at the mill level on an f. o. b. mill basis. Base discounts are used for different species and grades of stock house doors and provide a method for computing prices on Transit and Non-Transit shipments. Prices are net for other types of doors. The regulation also provides tables of additions to f. o. b. ceiling prices for sales made on a delivered basis. Historically the standard base price lists and freight rate tables were established in the early days of the industry. Subsequent revisions followed.

Stated ceiling prices for stock house doors and sidelights cover sales to purchasers of a class which, in accordance with historic trade practices, receives the largest discount. However, the seller may continue to sell to a purchaser of a different class to whom sales have customarily been made at a smaller discount, but any such sale must maintain the same discount differential which was in effect for different classes of purchasers during the period December 1, 1950, through February 24, 1951. A three-month period was selected for the purpose in order to obtain a base period long enough to provide adequate data with respect to sales to the different classes of purchaser.

The ceiling prices include appropriate charges which are provided primarily to offset additional costs resulting from extras ordered by the purchaser or specified variations from stated standards, such as doors longer or wider than listed, variations from standard sizes of parts, stock quantities less than a specified number, divided lights, astragals, resin or toxic dipping, and other extras. Similarly, service charges are provided for special cars and bracing.

Ceiling prices for items not specifically covered in the regulation will be determined by the Director of Price Stabilization upon application filed by the seller.

This regulation will supplant individual ceiling prices determined under the General Ceiling Price Regulation. The ceiling prices are approximately at the level prevailing during the period of January 25, 1951 through February 24, 1951. This level is not inflationary and yet should be high enough to insure production adequate for the needs of the defense mobilization program.

FINDINGS OF THE DIRECTOR OF PRICE STABILIZATION

In the judgment of the Director of Price Stabilization the ceiling prices established by this regulation are generally fair and equitable and are necessary to effectuate the purpose of Title IV of the Defense Production Act of 1950, as amended.

So far as practical in the formulation of this regulation, the Director of Price Stabilization has given due consideration to the national effort to achieve maximum production in furtherance of the objectives of the Defense Production Act of 1950, as amended; to prices prevailing during the period from May 24, 1950, to June 24, 1950, inclusive; to those prevailing during the period January 25 through February 24, 1951, as well as to the level of prices prevailing just before the issuance of this regulation; and to all relevant factors of general applicability.

In formulating this regulation, there has been consultation with industry representatives, including trade association representatives, and consideration has been given to their recommendations. This included three meetings with the Fir Door Industry Advisory Committee.

Every effort has been made to conform this regulation to business practices existing with respect to the production, sale and distribution of the doors covered by this regulation. Insofar as any provisions of this regulation may operate to compel changes in those business practices, such provisions are found by the Director of Price Stabilization to be necessary to prevent circumvention or evasion of this regulation.

REGULATORY PROVISIONS

Sec.
1. What this regulation does.
2. Which regulation is superseded.
3. Geographical applicability.
4. F. o. b. mill ceiling prices for Douglas fir, Sitka spruce, Western hemlock, White fir and Noble fir stock house doors.
5. Delivered ceiling prices for Douglas fir, Sitka spruce, Western hemlock, White fir and Noble fir stock house doors.
6. Ceiling prices for Douglas fir bar and bead stock.
7. F. o. b. mill ceiling prices for Douglas fir garage doors.
8. Delivered ceiling prices for Douglas fir garage doors.
9. F. o. b. mill ceiling prices for "Factory-Fitted Douglas Fir Entrance Doors."
10. Delivered ceiling prices for "Factory-Fitted Douglas Fir Entrance Doors."
11. F. o. b. mill ceiling prices for Rotary Cut Douglas fir hollow core flush doors.
12. Delivered ceiling prices for Rotary Cut Douglas fir hollow core flush doors.
13. Delivered sales; charges for special cars and bracing.
14. Discounts for cash.
15. Ceiling prices for items not specifically priced.
16. Modification of proposed ceiling prices by Director of Price Stabilization.
17. Invoices.
18. Petitions for amendment.
19. Adjustable pricing.
20. Records.
21. Interpretations.
22. Prohibitions and violations.
23. Evasions.
24. Definitions.

AUTHORITY: Sections 1 to 24 issued under sec. 704, 64 Stat. 816, as amended; 50 U. S. C. App. Sup. 2154. Interpret or apply Title IV, 64 Stat. 803, as amended; 50 U. S. C. App. Sup. 2101–2110, E. O. 10161, Sept. 9, 1950, 15 F. R. 6105; 3 CFR, 1950 Supp.

SECTION 1. *What this regulation does.* This regulation establishes manufacturers' dollars-and-cents ceiling prices for standard grades of stock doors, including veneered flush type hollow core doors, produced from Douglas fir (pseudotsuga taxifolia), the Western hemlocks (Tsuga heterophylla and Tsuga mertensiana), Sitka spruce (Pices stichensis), Noble fir (Abies procera), and White fir (Abies concoler) lumber and plywood. This regulation also establishes ceiling prices for door bars and bead stock produced from these species.

SEC. 2. *Which regulation is superseded.* The General Ceiling Price Regulation is superseded in respect to all transactions covered by this regulation.

SEC. 3. *Geographical applicability.* Every manufacturer's sale for delivery (f. o. b. or on a delivered basis) in the 48 States of the United States or in the District of Columbia is subject to this regulation.

SEC. 4. *F. O. B. mill ceiling prices for Douglas fir, Sitka spruce, Western hemlock, White fir and Noble fir stock house doors—(a) General explanation.* (1) Your ceiling prices, f. o. b. mill, to purchasers of the class receiving your largest discount during the period December 1, 1950, through February 24, 1951, hereafter called the base period, for stock house doors manufactured in accordance with the standards of the United States Department of Commerce, National Bureau of Standards, published in Commercial Standard CS 73–51 (Old Growth Douglas fir, Sitka spruce, and Western hemlock standard stock doors), Fifth Edition, effective for new production from August 1, 1951, shall be computed by applying the transit or nontransit base discounts set forth in paragraph (b) to the base list prices set forth in paragraph (d), and by adding the appropriate net extras set forth in paragraph (f). Paragraph (c) provides for a modification of the transit or nontransit base discounts when the stock doors subject to this section are sold to purchasers of a class, or classes, who received a smaller discount during the base period. Paragraph (e) provides for a number of adjustments to the base list prices.

(2) In applying the base discounts set forth in paragraph (b) of this section if you are entitled to a transit privilege under existing railroad tariff regulations, which permit you to credit a portion of the inbound freight charges of the raw material to the outbound freight charges on the finished product, you use transit base discounts. If, however, you are not entitled to apply the transit privilege to the particular sale or shipment under existing railroad tariff regulations, you use the nontransit base discounts.

(b) *Base discounts.* (1) The following are the base discounts for use in computing f. o. b. mill ceiling prices to purchasers of the class receiving the longest discount during the base period:

(i) *Douglas fir stock house doors:*

Door grades	Transit	Nontransit
	Percent	*Percent*
A grade	20	18
B grade	23	21
C grade	26	24
BF grade	26	24
Millrun 1⅜" only	23	21
Storm doors	23	21

(ii) *Western hemlock, Sitka spruce, White fir, and Noble fir stock house doors:*

Door grades	Transit	Nontransit
	Percent	*Percent*
A grade	22	20
B grade	25	23
C grade	28	26
BF grade	28	26
Millrun 1⅜" only	25	23
Storm doors	25	23

(2) The following additions are applicable to subparagraph (1) of this paragraph:

No. 1 sidelights "A" grade: Same as base discount.
French and rim doors: 5 points longer than base discount.
For 1¾" stock doors: Shorten base discount 6 points.

(c) *Class of purchaser variation, modification of base discounts.* In determining the ceiling prices of stock house doors subject to this section on sales to a purchaser of a class or classes which received a shorter discount during the base period than that given to the class that received your longest discount, you must maintain the same discount differential which you had in effect for different classes of purchasers during the base period. To do so, you shall adjust the base discounts set forth in paragraph (b) of this section by adding or subtracting the exact point differential between classes of purchasers that you maintained during the base period.

Example. (1) Assume that during the base period you gave a purchaser in Class A, the class which received your largest base period transit discount, a 20 percent transit base discount; and you gave a Class B purchaser a smaller base period transit discount of 18 percent. Further, assume that paragraph (b) establishes a transit base discount of 18 percent for the Class A purchaser, viz, two points shorter than he received during the base period. Therefore, the transit base discount to the Class B purchaser will be two points shorter than he received during the base period (18 minus 2), or 16 percent.

(2) Assume that during the base period you gave a purchaser in Class A, the class which received your largest base period discount, a 20 percent transit base discount, and a Class B purchaser a smaller base transit discount of 18 percent. Further, assume that paragraph (b) establishes a transit base discount of 22 percent for the Class A purchaser, viz,, two points larger than he received during the base period. Therefore, the transit base discount to the Class B purchaser will be two points larger than he received during the base period (18 plus 2), or 20 percent.

(d) *Base list prices for stock doors—(1) Standard stock house door base list:*

Size	Thickness		
	1⅜ inches	1¾ inches	1⅜ inches
2-0 x 6-0	$6.95	$8.40	$5.90
2-4 x 6-0	7.15	8.90	6.25
2-6 x 6-0	7.25	9.30	6.45
2-8 x 6-0	7.35	9.55	6.65
3-0 x 6-0	7.95	10.75	7.20
2-4 x 6-4	7.35	9.15	6.45
2-0 x 6-6	7.25	8.75	6.15
2-4 x 6-6	7.50	9.35	6.55
2-6 x 6-6	7.60	9.75	6.75
3-0 x 6-6	8.35	11.25	7.50
2-8 x 6-6	7.70	10.00	6.95
2-0 x 6-8	7.35	8.95	6.25
2-4 x 6-8	7.60	9.50	6.65
2-6 x 6-8	7.70	9.90	6.85
2-8 x 6-8	7.80	10.15	7.05
2-10 x 6-8	8.15	11.00	7.35
3-0 x 6-8	8.50	11.50	7.65
2-0 x 6-10	7.90	9.60	6.75
2-4 x 6-10	8.10	10.10	7.10
2-6 x 6-10	8.25	10.60	7.35
2-8 x 6-10	8.35	10.85	7.50
2-10 x 6-10	8.70	11.75	7.85
3-0 x 6-10	9.05	12.20	8.15
2-0 x 7-0	7.95	9.75	6.85
2-4 x 7-0	8.20	10.25	7.20
2-6 x 7-0	8.35	10.75	7.45
2-8 x 7-0	8.45	11.00	7.65
2-10 x 7-0	8.80	11.90	7.90
3-0 x 7-0	9.20	12.40	8.30
2-0 x 7-6	8.85	11.50	----
2-8 x 7-6	9.25	12.00	----
2-10 x 7-6	9.65	13.00	----
3-0 x 7-6	10.00	13.50	----
2-6 x 8-0	9.20	12.00	----
2-8 x 8-0	9.65	12.55	----
3-0 x 8-0	10.45	14.10	----
4-0 x 8-0	13.60	18.35	----

NOTE: For 1⅛" sash doors, use 1⅜" list. All storm doors are priced from 1⅜" list.

(2) *Standard sidelight base list, (A) grade only:*

Size	Open list	
	1⅜ inches	1¾ inches
1-0 x 6-8	$4.20	$5.20
1-0 x 6-10	4.45	5.55
1-0 x 7-0	4.50	5.60
1-2 x 6-8	4.40	5.50
1-2 x 6-10	4.60	5.75
1-2 x 7-0	4.65	5.80
1-4 x 6-8	4.50	5.70
1-4 x 6-10	4.75	6.05
1-4 x 7-0	4.85	6.10
1-6 x 6-8	4.65	5.95
1-6 x 6-10	4.95	6.25
1-6 x 7-0	5.00	6.30

(e) *Adjustments to base list price.* You may adjust the base list prices set forth in paragraph (d) of this section in accordance with the following additions for the specified services and conditions:

(1) Sizes not listed and intermediate sizes: Use same base list price as the next larger base list price, as reproduced in paragraph (d) of this section.

(2) List extras added to base list prices: Round out to nearest 5¢.

(3) Doors wider than listed: Use widest list price of same height and add for each additional 4 inches or part thereof; 10 percent of the standard house door base list price.

(4) Doors longer than listed: Use longest list of same width and add for each additional 6 inches or part thereof: 10 percent of the house door base list price.

(f) *Net extras.* The following are net extras which may be added in computing f. o. b. mill ceiling prices under this section:

(1) *Design extras:*

HOUSE DOORS

Design No.	Net extra per door	
	Flat panel	Raised panel
F 3	None	(1)
F 3 M	None	(1)
F 3 W	None	(1)
F 13	None	(1)
F 13 M	None	(1)
F 13 W	None	(1)
F 33	None	(1)
F 133	None	(1)

(2) *Species extras:*

Species	Net extra per door	
	Flat panel	Raised panel
Douglas fir	None	(1)
Western hemlock	None	(1)
Sitka spruce	None	(1)
White fir	None	(1)
Noble fir	None	(1)

(3) *Door bar extras:*

Door bars	Net extra per door
Douglas fir	None
Western hemlock	None
Sitka spruce	None
White fir	None
Noble fir	None

(4) *Bead stock extras:*

Bead stock	Net extra per door
Douglas fir	None
Western hemlock	None
Sitka spruce	None
White fir	None
Noble fir	None

(5) *Garage door extras:*

Garage doors	Net extra per door
Douglas fir	None
Western hemlock	None
Sitka spruce	None
White fir	None
Noble fir	None

(6) *Factory-Fitted Entrance Door extras:*

Factory-Fitted Entrance Doors	Net extra per door
Douglas fir	None
Western hemlock	None
Sitka spruce	None
White fir	None
Noble fir	None

(7) *Rotary Cut Hollow Core Flush Door extras:*

Rotary Cut Hollow Core Flush Doors	Net extra per door
Douglas fir	None
Western hemlock	None
Sitka spruce	None
White fir	None
Noble fir	None

(8) *Airflow Flush Door extras:*

Airflow Flush Doors	Net extra per door
Douglas fir	None
Western hemlock	None
Sitka spruce	None
White fir	None
Noble fir	None

(g) *Net extras for other than standard items and services.* Net extras for other than standard items and services shall be determined by the Director of Price Stabilization upon application filed by the seller.

SEC. 5. *Delivered ceiling prices for Douglas fir, Sitka spruce, Western hemlock, White fir and Noble fir stock house doors.* (a) Your ceiling prices for delivered sales of stock house doors shall be computed by adding to your f. o. b. mill ceiling prices the charges for transportation, handling, and packing, as follows:

(1) Your actual charges for transportation, handling, and packing, if you are entitled to a transit privilege under existing railroad tariff regulations, which permit you to credit a portion of the inbound freight charges of the raw material to the outbound freight charges on the finished product.

(2) Your actual charges for transportation, handling, and packing, if you are not entitled to apply the transit privilege to the particular sale or shipment under existing railroad tariff regulations.

(3) Your charges for transportation, handling, and packing, if you do not actually pay freight charges, shall be computed by applying to your f. o. b. mill ceiling prices the applicable percentage set forth in the following table:

Destination	Percentage
Alaska	15
Arizona	10
California	5
Colorado	10
Hawaii	15
Idaho	5
Montana	10
Nevada	10
New Mexico	10
Oregon	5
Utah	10
Washington	5
Wyoming	10

(b) Your ceiling prices for delivered sales of stock house doors to destinations not listed in the table in paragraph (a) (3) of this section shall be computed by applying to your f. o. b. mill ceiling prices the percentage set forth in the table for the nearest destination.

SEC. 6. *F. o. b. mill ceiling prices for Douglas fir bar and bead stock.* (a) Your ceiling prices, f. o. b. mill, for Douglas fir door bars and bead stock shall be computed by applying the transit or nontransit base discounts set forth in paragraph (b) to the base list prices set forth in paragraph (d), and by adding the appropriate net extras set forth in paragraph (f). Paragraph (c) provides for a modification of the transit or nontransit base discounts when the stock doors subject to this section are sold to purchasers of a class, or classes, who received a smaller discount during the base period. Paragraph (e) provides for a number of adjustments to the base list prices.

(b) *Base discounts.* (1) The following are the base discounts for use in computing f. o. b. mill ceiling prices to purchasers of the class receiving the longest discount during the base period:

Door grades	Transit	Nontransit
	Percent	*Percent*
A grade	20	18
B grade	23	21
C grade	26	24
BF grade	26	24
Millrun 1⅜" only	23	21
Storm doors	23	21

(2) The following additions are applicable to subparagraph (1) of this paragraph:

No. 1 sidelights "A" grade: Same as base discount.
French and rim doors: 5 points longer than base discount.
For 1¾" stock doors: Shorten base discount 6 points.

(c) *Class of purchaser variation, modification of base discounts.* In determining the ceiling prices of stock house doors subject to this section on sales to a purchaser of a class or classes which received a shorter discount during the base period than that given to the class that received your longest discount, you must maintain the same discount differential which you had in effect for different classes of purchasers during the base period. To do so, you shall adjust the base discounts set forth in paragraph (b) of this section by adding or subtracting the exact point differential between classes of purchasers that you maintained during the base period.

Example. (1) Assume that during the base period you gave a purchaser in Class A, the class which received your largest base period transit discount, a 20 percent transit base discount; and you gave a Class B purchaser a smaller base period transit discount of 18 percent. Further, assume that paragraph (b) establishes a transit base discount of 18 percent for the Class A purchaser, viz, two points shorter than he received during the base period. Therefore, the transit base discount to the Class B purchaser will be two points shorter than he received during the base period (18 minus 2), or 16 percent.

(2) Assume that during the base period you gave a purchaser in Class A, the class which received your largest base period discount, a 20 percent transit base discount, and a Class B purchaser a smaller base transit discount of 18 percent. Further, assume that paragraph (b) establishes a transit base discount of 22 percent for the Class A purchaser, viz,, two points larger than he received during the base period. Therefore, the transit base discount to the Class B purchaser will be two points larger than he received during the base period (18 plus 2), or 20 percent.

(d) *Base list prices for stock doors—(1) Standard stock house door base list:*

Size	Thickness		
	1⅜ inches	1¾ inches	1⅜ inches
2-0 x 6-0	$6.95	$8.40	$5.90
2-4 x 6-0	7.15	8.90	6.25
2-6 x 6-0	7.25	9.30	6.45
2-8 x 6-0	7.35	9.55	6.65
3-0 x 6-0	7.95	10.75	7.20
2-4 x 6-4	7.35	9.15	6.45
2-0 x 6-6	7.25	8.75	6.15
2-4 x 6-6	7.50	9.35	6.55
2-6 x 6-6	7.60	9.75	6.75
3-0 x 6-6	8.35	11.25	7.50
2-8 x 6-6	7.70	10.00	6.95
2-0 x 6-8	7.35	8.95	6.25
2-4 x 6-8	7.60	9.50	6.65
2-6 x 6-8	7.70	9.90	6.85
2-8 x 6-8	7.80	10.15	7.05
2-10 x 6-8	8.15	11.00	7.35
3-0 x 6-8	8.50	11.50	7.65
2-0 x 6-10	7.90	9.60	6.75
2-4 x 6-10	8.10	10.10	7.10
2-6 x 6-10	8.25	10.60	7.35
2-8 x 6-10	8.35	10.85	7.50
2-10 x 6-10	8.70	11.75	7.85
3-0 x 6-10	9.05	12.20	8.15
2-0 x 7-0	7.95	9.75	6.85
2-4 x 7-0	8.20	10.25	7.20
2-6 x 7-0	8.35	10.75	7.45
2-8 x 7-0	8.45	11.00	7.65
2-10 x 7-0	8.80	11.90	7.90
3-0 x 7-0	9.20	12.40	8.30
2-0 x 7-6	8.85	11.50	----
2-8 x 7-6	9.25	12.00	----
2-10 x 7-6	9.65	13.00	----
3-0 x 7-6	10.00	13.50	----
2-6 x 8-0	9.20	12.00	----

3-0 x 8-0	10.45	14.10	----
4-0 x 8-0	13.60	18.35	----

NOTE: For 1⅛" sash doors, use 1⅜" list. All storm doors are priced from 1⅜" list.

(2) *Standard sidelight base list, (A) grade only:*

Size	Open list	
	1⅜ inches	1¾ inches
1-0 x 6-8	$4.20	$5.20
1-0 x 6-10	4.45	5.55
1-0 x 7-0	4.50	5.60
1-2 x 6-8	4.40	5.50
1-2 x 6-10	4.60	5.75
1-2 x 7-0	4.65	5.80
1-4 x 6-8	4.50	5.70
1-4 x 6-10	4.75	6.05
1-4 x 7-0	4.85	6.10
1-6 x 6-8	4.65	5.95
1-6 x 6-10	4.95	6.25
1-6 x 7-0	5.00	6.30

(e) *Adjustments to base list price.* You may adjust the base list prices set forth in paragraph (d) of this section in accordance with the following additions for the specified services and conditions:

(1) Sizes not listed and intermediate sizes: Use same base list price as the next larger base list price, as reproduced in paragraph (d) of this section.

(2) List extras added to base list prices: Round out to nearest 5¢.

(3) Doors wider than listed: Use widest list price of same height and add for each additional 4 inches or part thereof; 10 percent of the standard house door base list price.

(4) Doors longer than listed: Use longest list of same width and add for each additional 6 inches or part thereof: 10 percent of the house door base list price.

(f) *Net extras.* The following are net extras which may be added in computing f. o. b. mill ceiling prices under this section:

(1) *Design extras:*

HOUSE DOORS

Design No.	Net extra per door	
	Flat panel	Raised panel
F 3	None	(1)
F 3 M	None	(1)
F 3 W	None	(1)
F 13	None	(1)
F 13 M	None	(1)
F 13 W	None	(1)
F 33	None	(1)
F 133	None	(1)

(2) *Species extras:*

Species	Net extra per door	
	Flat panel	Raised panel
Douglas fir	None	(1)
Western hemlock	None	(1)
Sitka spruce	None	(1)
White fir	None	(1)
Noble fir	None	(1)

(3) *Door bar extras:*

Door bars	Net extra per door
Douglas fir	None
Western hemlock	None
Sitka spruce	None
White fir	None
Noble fir	None

(4) *Bead stock extras:*

Bead stock	Net extra per door
Douglas fir	None
Western hemlock	None

Douglas fir	None
Western hemlock	None
Sitka spruce	None
White fir	None
Noble fir	None

(8) *Airflow Flush Door extras:*

Airflow Flush Doors	Net extra per door
Douglas fir	None
Western hemlock	None
Sitka spruce	None
White fir	None
Noble fir	None

(g) *Net extras for other than standard items and services.* Net extras for other than standard items and services shall be determined by the Director of Price Stabilization upon application filed by the seller.

SEC. 7. *F. o. b. mill ceiling prices for Douglas fir garage doors.* (a) Your ceiling prices, f. o. b. mill, for Douglas fir garage doors shall be computed by applying the transit or nontransit base discounts set forth in paragraph (b) to the base list prices set forth in paragraph (d), and by adding the appropriate net extras set forth in paragraph (f). Paragraph (c) provides for a modification of the transit or nontransit base discounts when the stock doors subject to this section are sold to purchasers of a class, or classes, who received a smaller discount during the base period. Paragraph (e) provides for a number of adjustments to the base list prices.

(b) *Base discounts.* (1) The following are the base discounts for use in computing f. o. b. mill ceiling prices to purchasers of the class receiving the longest discount during the base period:

Door grades	Transit	Nontransit
	Percent	*Percent*
A grade	20	18
B grade	23	21
C grade	26	24
BF grade	26	24
Millrun 1⅜" only	23	21
Storm doors	23	21

(2) The following additions are applicable to subparagraph (1) of this paragraph:

No. 1 sidelights "A" grade: Same as base discount.
French and rim doors: 5 points longer than base discount.
For 1¾" stock doors: Shorten base discount 6 points.

(c) *Class of purchaser variation, modification of base discounts.* In determining the ceiling prices of stock house doors subject to this section on sales to a purchaser of a class or classes which received a shorter discount during the base period than that given to the class that received your longest discount, you must maintain the same discount differential which you had in effect for different classes of purchasers during the base period. To do so, you shall adjust the base discounts set forth in paragraph (b) of this section by adding or subtracting the exact point differential between classes of purchasers that you maintained during the base period.

Example. (1) Assume that during the base period you gave a purchaser in Class A, the class which received your largest base period transit discount, a 20 percent transit base discount; and you gave a Class B purchaser a smaller base period transit discount of 18 percent. Further, assume that paragraph (b) establishes a transit base discount of 18 percent for the Class A purchaser, viz, two points shorter than he received during the base period. Therefore, the transit base discount to the Class B purchaser will be two points shorter than he received during the base period (18 minus 2), or 16 percent.

(2) Assume that during the base period you gave a purchaser in Class A, the class which received your largest base period discount, a 20 percent transit base discount, and a Class B purchaser a smaller base transit discount of 18 percent. Further, assume that paragraph (b) establishes a transit base discount of 22 percent for the Class A purchaser, viz,, two points larger than he received during the base period. Therefore, the transit base discount to the Class B purchaser will be two points larger than he received during the base period (18 plus 2), or 20 percent.

(d) *Base list prices for stock doors—(1) Standard stock house door base list:*

Size	Thickness		
	1⅜ inches	1¾ inches	1⅜ inches
2-0 x 6-0	$6.95	$8.40	$5.90

(2) *Stock quantities.* Less than 25 doors 1⅜" thick or 15 doors 1¾" thick of a size and kind: Add $0.50 per door for 1⅜" and $1.00 per door for 1¾" to the ceiling price as established in paragraph (a) of this section.

(3) *Wider than standard stiles and rails:*

Stiles and top rail over 4⅜₁₆" to 5⅜": Add $0.40 net per door.

Stiles and top rail over 5⅜" to 6⅜": Add $1.00 net per door.

Bottom rail over 9⅜" to 11⅜": Add $0.10 net per door.

Lock rails or intermediate rails: for each 1" or part thereof wider than standard: Add $0.10 net per member.

(4) *Divided lights in any one light stock door when not listed in paragraph (f) (1) of this section.* With standard beads and bars: Add $0.10 net per light.

(5) *Sticking other than standard.* Square sticking add $0.10 net per door.

(6) *Thicker than standard laminated (flat) panels:*

Over ¼" to ⅜"—3 ply panels: Add $0.70 net per door.

Over ⅜" to ½"—5 ply panels: Add $1.00 net per door.

(7) *For exterior panels.* Add $0.25 net per door.

(8) *Water tables and trim:*

Plain (one) member water table: Add $0.50 net per door.

Water table with blocks or dentil: Add $0.75 net per door.

Planting on water tables (one member): Add $0.20 net per door.

Planting on water tables (with blocks or dentil): Add $0.30 net per door.

(9) *Astragals:*

For 1⅜" to 7–0': Add $0.85 net per astragal.

For 1¾" to 7–0': Add $0.95 net per astragal.

(For longer than 7–0' pro-rate accordingly.)

(10) *Rabbeting house doors.* Plain rabbeting: Add $0.25 net per door.

(11) *Preparing doors for full length sunken mirror:*

One panel: Add $0.40 net per door.

Two or three panels: Add $1.50 net per door.

(12) *Dutch doors:*

Cut through lock rail: Add $1.00 net per door.

Cut through lock rail and rabbeted: Add $2.00 net per door.

(13) *Removable panels.* Add $0.20 net per panel.

(14) *Pre-fit doors:*

Prefitting to book size: Add $0.25 net per door.

Prefitting to height only: Add $0.20 net per door.

(15) *Resin sealing or toxic dipping entire panel door.* Add $0.30 net per door.

(16) *Machining for door locks and latches:*

Mortising for standard type tubular lock and recessing for face plates: Add $0.30 net per door.

Mortising for standard type recess lock and recessing for face plate: Add $0.40 net per door.

Mortising for strike plate (for pair of doors only): Add $0.30 net per door. Boring for knob: Add $0.10 net per door.

(17) *Boring for keyhole.* Add $0.10 net per door.

Boring for standard type night latch: Add $0.20 net per door.

Boring any additional holes: Add $0.10 net each.

(18) *Dapping for hinge butts:*

Round corner: Add $0.10 net per hinge.

Square corner: Add $0.15 net per hinge.

SEC. 5. *Delivered ceiling prices for Douglas fir, Sitka spruce, Western hemlock, White fir and Noble fir stock house doors.* (a) When house doors produced from Douglas fir, Sitka spruce, Western hemlock, White fir and Noble fir lumber are sold on a delivered basis, regardless of how delivery is made, the delivered ceiling prices shall be computed in the same manner as is provided in Section 4 for computing f. o. b. mill ceiling prices, except that the appropriate base discount shall be shortened for the applicable freight rates in effect at time of shipment as follows:

Rate per hundred pounds	Shorten base discount
Up to $0.093	½ point.
$0.094 to $0.187	1 point.
$0.188 to $0.280	1½ points.
$0.281 to $0.374	2 points.
$0.375 to $0.467	2½ points.
$0.468 to $0.561	3 points.
$0.562 to $0.654	3½ points.
$0.655 to $0.748	4 points.
$0.749 to $0.841	4½ points.
$0.842 to $0.935	5 points.
$0.936 to $1.028	5½ points.
$1.029 to $1.121	6 points.
$1.122 to $1.225	6½ points.
$1.226 to $1.308	7 points.
$1.309 to $1.402	7½ points.
$1.403 to $1.495	8 points.
$1.496 to $1.589	8½ points.
$1.59 to $1.682	9 points.
$1.683 to $1.776	9½ points.
$1.777 to $1.869	10 points.
$1.870 to $1.963	10½ points.
$1.964 to $2.056	11 points.
$2.057 to $2.150	11½ points.

SEC. 6. *Ceiling prices for Douglas fir bar and bead stock.* (a) The ceiling prices for sales of one thousand lineal feet or more of No. 1 Douglas fir bar and bead stock, string tied, whether f. o. b. mill or on a delivered basis, shall be the following net prices:

	Price per C lineal feet
1⅜" bars, ½" between glass	$5.65
1¾" bars, ½" between glass	6.40
Standard glass beads	1.50

(b) The ceiling prices per hundred lineal feet set forth in paragraph (a) of this section shall be adjusted in accordance with the following additions for the specified services and conditions:

(1) Orders for 500 or more to 999 lineal feet of a size and kind. Add 10 percent to the net prices per hundred lineal feet shown in paragraph (a).

(2) Orders for less than 500 lineal feet of a size and kind. Add 20 percent to the net prices per hundred lineal feet shown in paragraph (a).

SEC. 7. *F. o. b. mill ceiling prices for Douglas fir garage doors.* The ceiling prices, f. o. b. mill, for Douglas fir garage doors manufactured in accordance with the standards of the United States Department of Commerce, National Bureau of Standards, published in Commercial Standard CS 73–51 (Old Growth Douglas fir, Sitka spruce, and Western hemlock standard stock doors), Fifth Edition, effective for new production from August 1, 1951, shall be the following net prices:

Flat panel, 1¾"	8'–0"×7'–0"	8'–0"×7'–6"	8'–0"×8'–0"
#193 per set of 3	$25.00	$26.00	$27.00
#93 per pair	24.00	25.00	26.00

NOTES

1. For raised panels: Add $2.50 per pair or set.

2. Pairs or sets wider than 8'–0": Add $4.50 net per pair or set for each foot or fraction thereof over 8'–0".

3. Less than 25 pairs or sets of garage doors of a size and kind: Add $2.50.

SEC. 8. *Delivered ceiling prices for Douglas fir garage doors.* If the sale of Douglas fir garage doors is made on a delivered basis, regardless of how delivery is made, your delivered ceiling prices shall be the f. o. b. mill ceiling prices set forth in section 7 plus the applicable addition set forth below determined according to the freight rates in effect at time of shipment:

Rail freight rate to the point of delivery	Addition per pair or set of 1¾-inch doors
Up to $0.093	$0.25
$0.094 to $0.187	.50
$0.188 to $0.28	.60
$0.281 to $0.374	.75
$0.375 to $0.467	.75
$0.468 to $0.561	1.00
$0.562 to $0.654	1.25
$0.655 to $0.748	1.35
$0.749 to $0.841	1.50
$0.842 to $0.935	1.75
$0.936 to $1.028	1.75
$1.029 to $1.121	2.00
$1.122 to $1.225	2.25
$1.226 to $1.308	2.50
$1.309 to $1.402	2.60
$1.403 to $1.495	2.75
$1.496 to $1.589	3.00
$1.59 to $1.682	3.15
$1.683 to $1.776	3.40
$1.777 to $1.869	3.65
$1.870 to $1.963	3.75
$1.964 to $2.056	3.50
$2.057 to $2.150	4.05

SEC. 9. *F. o. b. mill ceiling prices for "Factory-Fitted Douglas Fir Entrance Doors".* (a) The ceiling prices, f. o. b. mill for "Factory-Fitted Douglas Fir Entrance Doors" manufactured in accordance with the standards of the United States Department of Commerce, National Bureau of Standards, published in Commercial Standard CS 91–41 (Factory-Fitted Douglas Fir Entrance Doors), effective for new production from February 10, 1941, shall be following net prices:

Design No.	1¾" thick: Solid wide sticking 2 sides: 3-0×6-8	3-0×7-0	Raised moulding 1 side, solid wide sticking 1 side: 3-0×6-8	3-0×7-0
2000	$15.75	$16.50	$18.04	$18.34
2005	19.00	19.75	21.50	21.80
2010	17.00	17.75	18.60	18.89
2015	18.50	19.25	19.48	19.77
2020	23.25	24.00	20.49	20.78
2035 (Ovolo sticking only)	18.60	19.00		
2040	26.25	27.00	27.64	27.93
2045	21.50	22.25	23.28	23.57
2050	19.05	19.80	20.46	20.75
2055	21.35	22.10	22.82	23.11
2060	19.25	20.00	19.09	19.38
2065	22.88	23.17	25.52	25.81
2070	16.25	17.00	16.52	16.81
2075	20.78	21.07	23.94	24.23
2080	16.61	16.90	17.96	18.25
2085	27.60	28.10	31.19	31.38
2090	19.50	20.00	23.02	23.02
2095	21.75	22.50	20.00	20.29
2100	16.55	17.10	17.74	18.03
2105 (Ovolo sticking only)	22.50	23.25		
2110	18.50	20.25	19.02	19.32
2115	16.50	17.25	18.63	18.92
2120	19.00	19.75	20.58	20.88
2125	19.85	20.14	22.11	22.41
2130	15.75	16.50	18.04	18.34

(b) The ceiling prices set forth in paragraph (a) of this section shall be subject to the following mandatory deduction: Grille omitted from design number 2045: Deduct $1.75 net per door.

(c) The ceiling prices set forth in paragraph (a) of this section shall be adjusted in accordance with the following additions for the specified services and conditions:

(1) Doors narrower than 3'–0" wide: Same price as for 3'–0" wide.

(2) Grille furnished for design numbers 2050, 2055, 2075, 2085, 2095, and 2110: Add $2.25 net per door.

(3) Less than five of a size and kind: Add 25% of the ceiling price set forth in paragraph (a).

SEC. 10. *Delivered ceiling prices for "Factory-Fitted Douglas Fir Entrance Doors".* If the sale of "Factory-Fitted Douglas Fir Entrance Doors" is made on a delivered basis, regardless of how delivery is made, your delivered ceiling prices shall be the f. o. b. mill ceiling prices set forth in section 9 plus the applicable addition set forth below determined according to the freight rates in effect at the time of shipment:

Rail freight rate to the point of delivery	Addition per 1¾" door: 3-0×6-8	3-0×7-0
Primary market	$0.25	$0.25
Other than primary market:		
Up to $0.561	.45	.48
$0.562 to $0.654	.52	.55
$0.655 to $0.748	.59	.63
$0.749 to $0.841	.67	.71
$0.842 to $0.935	.74	.79
$0.936 to $1.028	.82	.87
$1.029 to $1.121	.90	.95
$1.122 to $1.225	.98	1.03
$1.226 to $1.308	1.05	1.11
$1.309 to $1.402	1.12	1.19
$1.403 to $1.495	1.20	1.27
$1.496 to $1.589	1.27	1.35
$1.590 to $1.682	1.35	1.43
$1.683 to $1.776	1.42	1.51
$1.777 to $1.869	1.50	1.59
$1.870 to $1.963	1.60	1.69
$1.964 to $2.056	1.68	1.79
$2.057 to $2.150	1.78	1.89

SEC. 11. *F. o. b. mill ceiling prices for Rotary Cut Douglas fir hollow core flush doors.* The ceiling prices f. o. b. mill for rotary cut Douglas fir hollow core flush doors of specifications equivalent to the minimum specifications set forth in the Official Fir Door Industry Grading Rules for Flush Doors, adopted July 17, 1951 by the Fir Door Institute, shall be the following net prices:

Size	1⅜" thick
2-0 x 6-8	$6.25
2-4 x 6-8	7.35
2-6 x 6-8	7.45
2-8 x 6-8	7.55
2-10 x 6-8	8.25
3-0 x 6-8	8.35

NOTES

1. Doors less than 2'0" in width: Same price as 2'0".

2. Doors less than 6'8" in height: Same price as 6'8".

3. Doors 1¾" thick: Add $1.35 per door.

4. For doors 7'0" high: Add $.50 per door for same width.

5. For exterior panels: Add $.75 per door.

6. Stock quantities: For less than 20, 1¾" of a size and kind: Add 20% of the ceiling price; for less than 10, 1⅜" of a size and kind: Add 20% of the ceiling price, as established in this section.

SEC. 12. *Delivered ceiling prices for Rotary Cut Douglas fir hollow core flush doors.* (a) If the sale of hollow core flush doors is made on a delivered basis, regardless of how delivery is made, your delivered ceiling prices shall be the f. o. b. mill prices set forth in Section 11 plus the applicable addition set forth below determined according to the freight rate, in effect at the time of shipment:

Rate	Per 1⅜" door	Per 1¾" door
Up to $0.30	$0.10	$0.10
$0.301 to $0.40	.15	.25
$0.401 to $0.65	.25	.35
$0.651 to $0.75	.30	.40
$0.751 to $0.84	.33	.43
$0.841 to $0.94	.36	.46
$0.941 to $1.03	.39	.49
$1.031 to $1.12	.43	.53
$1.121 to $1.22	.46	.56
$1.221 to $1.31	.50	.60
$1.311 to $1.40	.53	.63
$1.401 to $1.49	.56	.66
$1.491 to $1.62	.59	.69
$1.621 to $1.75	.65	.75
$1.751 to $1.90	.70	.80
$1.901 to $2.05	.75	.85
$2.051 to $2.15	.80	.90

SEC. 13. *Delivered sales-charges for special cars and bracing.* On delivered sales you may make the following additions to the otherwise applicable ceiling prices:

(a) On railroad cars containing orders for more than one lot, you may add $10.00 per lot to cover cost of segregating.

(b) Where bracing is required to permit partial unloading of a railroad car you may add a service charge which may not exceed the actual cost of bracing, including extra freight cost.

SEC. 14. *Discount for cash.* (a) If the buyer pays cash, your ceiling prices determined under other provisions of this regulation are reduced by the amount of the discount which, during the period

UNIVERSITY OF MICHIGAN LIBRARIES

from January 25, 1951, through February 24, 1951, you allowed a purchaser of the same class for the payment of cash within the same period of time.

(b) If you were not in business between January 25, 1951, and February 24, 1951, your ceiling prices determined under other provisions of this regulation are reduced by 2 percent for cash payment within 10 days from date of shipment for f. o. b. mill sales, and within 5 days from date of arrival at the point of destination for delivered sales.

SEC. 15. *Ceiling prices for items not specifically priced*—(a) *Application.* If you cannot ascertain a ceiling price for items subject to this regulation under any other provisions of this regulation, as, for example, should you wish to sell items with special workings, grades, specifications, thicknesses, services, or other extras not specifically mentioned in this regulation, you must file an application, signed by an authoritative person, with the Office of Price Stabilization, Forest Products Division, Washington 25, D. C., by registered mail, return receipt requested for approval of a ceiling price. Your application must contain the following:

(1) Your trade name and address.

(2) As complete a description as possible of the item for which the application is filed. This should include the species, grade, thickness, measurements of the item, together with a detailed description of the workings, specifications, services, or other extras involved.

(3) Your proposed ceiling price, f. o. b. mill or delivered price, together with a statement indicating why you believe it is in line with the level of ceiling prices established under this regulation.

(4) Your f. o. b. mill or delivered ceiling prices immediately prior to the effective date of this regulation for your class of purchaser receiving your longest discount and for your class of purchaser receiving your shortest discount, both for the item in your application and for the most comparable item for which a specific ceiling price is established in this regulation. Explain the difference between the ceiling price requested and the ceiling price of the most comparable item either in terms of established price differentials, list and applicable transit or non-transit base discounts, or by furnishing a detailed analysis of the costs or cost comparisons of manufacturing the respective item.

(b) *Quotation or proposed prices.* After an application has been filed under this section, and before action by the Director of Price Stabilization, you may sell your item at a ceiling price no higher than the ceiling price proposed in your application: *Provided*, That you agree to and later, refund to the buyer, the amount, if any, by which your proposed ceiling price exceeds the ceiling price established by the Director of Price Stabilization.

(c) *Action by the Director of Price Stabilization.* (1) After receipt of an application made under this section, the Director of Price Stabilization will approve, modify or disapprove your proposed ceiling price, will request additional information about it, or will establish a different ceiling price for the item that is the subject of your application.

(2) If the Director does not notify you to the contrary or request additional information from you within 20 days after the receipt of your application, or within 15 days after the receipt of requested additional information, your proposed ceiling price shall be deemed to have been approved, subject to non-retroactive disapproval or modification at a later time.

SEC. 16. *Modification of proposed ceiling prices by Director of Price Stabilization.* The Director of Price Stabilization may at any time disapprove or reduce ceiling prices proposed under this regulation so as to bring them into line with the level of ceiling prices otherwise established by this regulation.

SEC. 17. *Invoices.* (a) On all sales of items covered by this regulation, you must submit an invoice to the buyer which shows the following information:

(1) Names and addresses of seller and buyer;

(2) Date of sale or purchase;

(3) The price charged for each item, together with the quantity involved; and

(4) A description of the item, including the species, grade, thickness, and measurements. Any working, specification, extra, or service which bears upon the price charged for your commodity must be separately set forth on the invoice, but the invoice need not show separately the charges for such items.

(b) For sales made on an f. o. b. basis, in addition to the information required by paragraph (a) of this section, your invoice must show the f. o. b. price.

(c) For sales made on a delivered basis, in addition to the information required by paragraph (a), your invoice must show:

(1) The delivered price;

(2) The point of origin and destination of shipment; and

(3) The applicable rail or truck rate; otherwise the amount added for transportation, or points applied to base discount for transportation.

SEC. 18. *Petitions for amendment.* If you wish to have this regulation amended, you may file a petition for amendment in accordance with the provisions of Price Procedural Regulation 1, revised.

SEC. 19. *Adjustable pricing.* Nothing in this regulation prohibits you from making a contract or offer to sell at (a) the ceiling price in effect at the time of delivery of (b) the lower of a fixed price or the ceiling price in effect at the time of delivery. You may not, however, deliver or agree to deliver at a price to be adjusted upward in accordance with any increase in ceiling prices after delivery.

SEC. 20. *Records*—(a) *Current records.* Every person who sells and every person who in the regular course of trade or business, buys items covered by this regulation, shall make and keep for inspection by the Director of Price Stabilization, for a period of two years after each sale, accurate records or invoices of each sale or purchase. The records must show the following:

(1) Date of purchase or sale;

(2) Name and address of buyer and seller;

(3) The prices charged or paid, including all additions, extras and discounts;

(4) A description of the item sold, including the species, grade, thickness, measurements, specifications, extras and services, with the quantity thereof;

(5) Origin and destination of shipment;

(6) Means of transportation used.

The retention by a buyer of an invoice furnished by a seller which includes the factual information required to be made a matter of record by this paragraph, shall be considered as compliance with the provisions of this paragraph.

(b) *Existing records.* You shall also continue to preserve, for the applicable periods indicated in section 16 of the General Ceiling Price Regulation, all records which you made and kept under the provisions of section 16 of the General Ceiling Price Regulation with respect to sales and purchases of the items covered by this regulation.

SEC. 21. *Interpretations.* If you wish an official interpretation of this regulation, you should write to the District Counsel of your local OPS District Office. Any action taken by you in reliance upon, and in conformity with a written official interpretation will constitute action in good faith pursuant to this regulation. Further information on obtaining official interpretations is contained in Price Procedural Regulation 1, Revised.

SEC. 22. *Prohibitions and violations.* (a) You shall not do any act prohibited or omit to do any act required by this regulation, nor shall you offer, solicit, attempt, or agree to do or omit to do any such acts. Specifically, but not in limitation of the above, you shall not, regardless of any contract or other obligation, sell and no person in the regular course of trade or business shall buy from you at a price higher than the ceiling prices established by this regulation, and you and buyers from you shall keep, make, and preserve true and accurate records and reports required by this regulation. Prices lower than the ceiling prices may be charged, paid, or offered.

(b) If you violate any provisions of this regulation, you are subject to criminal penalties, enforcement actions, and actions for damages.

(c) If any person subject to this regulation fails to prepare or keep any record or file any report required by this regulation in connection with the establishment of this ceiling price, or if any person subject to this regulation fails to establish a ceiling price or apply to the Office of Price Stabilization for the establishment of a ceiling price, if he is required to do so, the Director of Price Stabilization may issue an order fixing his ceiling prices. Any ceiling price fixed in this manner will be in line with ceiling prices generally established by this regulation. The order fixing the ceiling price may apply to all deliveries or transfers completed prior to the date of issuance of the order. The issuance of such an order will not relieve the seller of his obligation to comply with the requirements of this regulation or of the various penalties for failure to do so.

SEC. 23. *Evasions.* Any means or devices which result in obtaining directly or indirectly a higher price than is permitted by this regulation, or in concealing or falsely representing information in records which this regulation requires to be kept, is a violation of this regulation. This prohibition includes, but is not limited to, means or devices making use of commissions, services, cross sales, transportation arrangements, premiums, discounts, special privileges, up-grading, tie-in agreements, and trade understandings, as well as the omission from records of true data and the inclusion in records of false data.

SEC. 24. *Definitions.* As used in this regulation, the terms in this section have the following meanings:

Director of Price Stabilization. This term extends to any official (including officials of regional or local offices) to whom the Director of Price Stabilization, by order, delegates a function, power, or authority referred to in this regulation.

Person. This term includes any individual, corporation, partnership, association, or any other organized group of persons, or the legal successor or representative of the foregoing, and the United States and any other Government or their political subdivisions or agencies.

Purchaser of the same class. The meaning of this term is determined by reference to your own practice of setting different prices for sales to different purchasers or groups of purchasers. The practice may, but need not be, based on the characteristic or distributive level of the buyer, for example, railroads, wholesalers, contractors, utilities, municipalities, government agencies. It may, but need not, be based on the location of the purchaser or the quantity of the item purchased by him. It may, but need not, be based on differing terms or conditions of sale or delivery. If you have followed the practice of giving an individual customer a price differing from that charged others, that customer is a separate class of purchaser.

Records. This term includes books of account, sales lists, sales slips, orders, vouchers, contracts, receipts, invoices, bills of lading, and other papers and documents.

Sell. This term includes sell, supply, dispose, barter, trade, exchange, lease, transfer, deliver, and contracts and offers to do any of the foregoing. The terms "buy" and "purchase" shall be construed in corollary terms.

You. The pronoun "you" indicates any manufacturer who sells items subject to this regulation.

Effective date. This regulation is effective October 21, 1952.

NOTE: The reporting and record-keeping requirements of this regulation have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

JOSEPH H. FREEHILL,
Acting Director of Price Stabilization.

OCTOBER 16, 1952.

[F. R. Doc. 52-11389; Filed, Oct. 16, 1952; 4:00 p. m.]

[General Ceiling Price Regulation, Collation 4]

GENERAL CEILING PRICE REGULATION

COLL. 4—INCLUDING AMENDMENTS 1–36

The General Ceiling Price Regulation is republished to incorporate the text of Amendments 1 through 36. The General Ceiling Price Regulation was issued January 26, 1951 (16 F. R. 808). Statements of Consideration for the General Ceiling Price Regulation, and for Amendments 1–36, inclusive, as previously published, are applicable to this republication. The effective dates of the amendments are shown in a note preceding the first section of the regulation.

Sec.

1. What this regulation does.
2. Applicability, effective date and prohibitions.
3. Ceiling prices for all sellers for commodities or services sold in base period.
4. Manufacturers' ceiling prices for new commodities falling within categories dealt in during the base period.
5. Wholesalers' and retailers' ceiling prices for new commodities falling within categories dealt in during base period.
6. Ceiling prices for commodities in new categories; for new services; and for new sellers.
7. Sellers who cannot price under other sections.
8. Modification of proposed ceiling prices by Director of Price Stabilization.
9. Customary price differentials.
10. Exporters and importers.
11. "Parity" adjustments in ceiling prices.
12. Group of retail sellers under common control.
13. Highest price line limitation for manufacturers of wearing apparel and consumer durable goods.

Amendment 34, September 15, 1952, 17 F. R. 8188.
Amendment 35, September 15, 1952, 17 F. R. 8188.
Amendment 36, October 11, 1952, 17 F. R. 8953.

SECTION 1. *What this regulation does.* The purpose of this regulation is to establish ceiling prices for all commodities and services (except those specifically exempt) upon the basis of prices in effect during the period from December 19, 1950 to January 25, 1951, inclusive. This period is referred to as the "base period." With respect to those food, agricultural and related commodities exempt under the provisions of section 14 (s), however, the applicable "base period" used after removal of the exemption to establish the ceiling price under section 3 of this regulation shall be the most recent five-week period preceding the date the Director of Price Stabilization deletes the commodity from the list of agricultural commodities in section 11 (a).

[Section 1 amended by Amdts. 7 and 13]

SEC. 2. *Applicability, effective date and prohibitions*—(a) *Applicability.* The provisions of this regulation are applicable to the United States, its Territories and possessions and the District of Columbia.

(b) *Effective date.* This regulation is effective immediately.

(c) *Prohibitions.* After the date of this order, regardless of any contract or other obligation, you shall not sell, and you shall not buy in the regular course of business or trade, any commodity or service at a price exceeding the ceiling price established by this regulation.

SEC. 3. *General ceiling prices*—(a) *Ceiling prices for all sellers for commodities or services sold in base period.* Your ceiling price for sale of a commodity or service is the highest price at which you delivered it during the base period to a purchaser of the same class. If you did not deliver the commodity or service during the base period, your ceiling price is the highest price

UNIVERSITY OF MICHIGAN LIBRARIES

at which you offered it for base period delivery to a purchaser of the same class. The offer must have been made in writing and communicated to a substantial number of customers, but in the case of a retailer may have been made by display. If you are a manufacturer or a wholesaler, you cannot, unless permitted by paragraph (b) of this section, use a price as your ceiling price to a class of purchaser unless you made at least 10 percent by dollar volume of your total deliveries of the commodity during the base period to that class of purchaser at that price or at a higher price.

[Paragraph (a) amended by Amdt. 25]

(b) *General increase by manufacturers and wholesalers.* If you are a manufacturer or wholesaler of a commodity, you may apply the following provisions in determining your ceiling prices.

(1) *General increases to all of a class of purchasers.* If, before or during the base period, you announced in writing and put into effect a price increase for a class of purchasers by making some deliveries to that class at the higher price and no deliveries at a lower price (except pursuant to written firm commitments made before the price increase), the increased price becomes your ceiling price for that class of purchaser, even though less than 10 percent of your base period deliveries to that class were made at the higher price.

(2) *General increases to several classes of purchasers.* If, before or during the base period, you announced in writing, and communicated to the trade or a substantial number of customers in your customary way, a general increase of prices for base period delivery to more than one class of purchasers and if you made deliveries which, under the preceding paragraphs of this section, established the increased price or prices as the ceilings to all purchasers of one or more classes and if you made no deliveries to the other classes (except pursuant to written firm commitments made before the price increase), then the announced increased prices are your ceiling prices for all classes of purchasers for whom increases were announced.

(3) *General increases or general increases and decreases on several items.* If, before or during the base period, you announced in writing price increases or price increases and decreases on a list of commodities, and if,

(i) You made deliveries which, under the preceding paragraphs of this section, established the increased price or prices as the ceilings to all classes of purchasers of one or more of the commodities covered by the price list, or

(ii) After the effective date of the announcement and before January 26, 1951, you made deliveries of one or more of the commodities on the list at the decreased price or prices and none of the commodities on which price decreases were announced were delivered at higher prices (except pursuant to written firm commitments made before the price decreases were announced),

and if the commodities, if any, which you delivered as provided in (i) above, together with the commodities, if any, which you delivered as provided in (ii) above, accounted during the year 1950 for at least 30 percent of your dollar sales of the commodities covered by the price list, then the price list prices are your ceiling prices for all the items on the list.

[Subparagraph (3) amended by Amdt. 25]

[Section 3 amended by Amdts. 2 and 5.]

NOTE: Ceiling prices revised by Amdts. 2 or 5 became effective March 7, 1951.

SEC. 4. *Manufacturers' ceiling prices for new commodities falling within categories dealt in during the base period.* (a) If you are a manufacturer of a commodity which you did not deliver or offer for delivery during the base period but which falls within a "category" in which you dealt during the base period, determine your ceiling price by applying to your current unit direct cost the percentage markup you are currently receiving on a "comparison commodity."

Your current unit direct cost for the commodity being priced and for the comparison commodity shall consist of the total unit direct labor and direct material cost for each. The comparison commodity must be in the same category as the commodity being priced; must be a commodity for which your ceiling price was determined under section 3; and must be of the commodities in that category with lower current unit direct costs, the one most nearly like the commodity being priced. If there is no commodity in the category having a lower current unit direct cost, your comparison commodity is the one with the same or higher current unit direct cost which is most nearly like the commodity being priced. If you are no longer manufacturing any commodities which meet the above standards for a comparison commodity, the commodity which you dealt in during the base period, in the same category, which is most nearly like the commodity being priced, is your comparison commodity, but the current unit direct cost of the base period commodity must be computed by using current material prices and wage rates.

(b) To determine your ceiling price you ascertain the percentage markup for the comparison commodity by comparing its current unit direct cost with its ceiling price. You determine your ceiling price on the new commodity by applying this markup to your current unit direct cost for the new commodity. The ceiling price so determined remains your ceiling price on all subsequent sales, except as provided in section 11 of this regulation.

[Paragraph (b) amended by Amdt. 20]

(c) Category means a group of commodities which are normally classed together in your industry for purposes of production, accounting, or sales. You are required by section 16 of this regulation to prepare a list of your categories and in applying the pricing provisions of this section, you should refer to this list. You might, for example, have a category such as one of the following: glass containers; fractional horsepower motors; brass mill products; millwork; print cloth yarn fabrics; screw machine products; ball bearings; textile machinery; women's and misses' blouses; house and barn paints; motor oils.

SEC. 5. *Wholesalers' and retailers' ceiling prices for new commodities falling within categories dealt in during base period.* (a) If you are a wholesaler or retailer and wish to determine a ceiling price for a commodity which you did not deliver or offer for delivery during the base period, but which falls within a "category" in which you dealt during the base period, you determine your ceiling price by applying to your net invoice cost the percentage markup you are currently receiving on a "comparison commodity."

The comparison commodity must be in the same category as the commodity being priced; must be a commodity for which your ceiling price was determined under section 3; and must be, of the commodities in that category with lower costs, the one most nearly like the commodity being priced. If you have no commodity in the category with a cost below that of the commodity being priced, your comparison commodity is the one with the same or higher cost which is most nearly like the commodity being priced.) The percentage markup of the comparison commodity must be determined with reference to your most recent net invoice cost for that commodity. The ceiling price so determined remains your ceiling price for all subsequent sales of that commodity, except as provided in section 11 of this regulation.

[Paragraph (a) amended by Amdt. 20]

(b) Category means a line of merchandise, a merchandise department, or a group of commodities which are normally classed together in your trade for selling, buying, merchandising or accounting. You are required by section 16 of this regulation to prepare a list of your categories and in applying the pricing provisions of this section you should refer to this list. You might, for example, have a category such as one of the following: men's clothing; men's furnishings; infants' wear; canned fruits; cosmetics and toiletries; frozen foods; notions; musical instruments; women's coats and suits; cotton piece goods; major household appliances; women's house dresses; office furniture; hand tools.

SEC. 6. *Ceiling prices for commodities in new categories; for new services; and for new sellers.* (a) If you are a manufacturer and are pricing a commodity which is in a different category from any dealt in by you during the base period, your ceiling price is the same as the ceiling price of your most closely competitive seller of the same class selling the same commodity or, lacking the same, a substantially similar commodity to the same class of purchaser.

If you are a wholesaler or retailer and are pricing a commodity which is in a different category from any dealt in by you during the base period, or if you are selling a service which cannot be priced under section 3 of this regulation, your ceiling price is the same as the ceiling price of your most closely competitive seller of the same class selling the same commodity or service to the same class of purchaser.

Once you have determined your ceiling prices under this section you may not redetermine them, except as provided in sections 11 and 20 of this regulation. Before selling any commodity or service for which you have determined a ceiling price under this section, you must file the report required by paragraph (b) and, in addition, you must observe the following requirements:

[Introductory Paragraphs of Section 6 (a) amended by Amdts. 20, 23, 24 and 36]

(1) *If you are a manufacturer,* you may not sell the commodity until ten days after mailing your report; thereafter you may sell the commodity at your proposed ceiling price unless and until notified by the Director of Price Stabilization that your proposed ceiling price has been disapproved or that more information is required.

(2) *If you are a wholesaler,* you may not sell the commodity until thirty days after mailing the report; thereafter you may sell the commodity at your proposed ceiling prices unless and until you are notified by the Director of Price Stabilization that your proposed ceiling price has been disapproved or that more information is required.

(3) *If you are a retailer or are selling a service,* you must prepare and maintain for the commodities or services being priced under this section the records required of you under section 16. You may begin sales of the new commodities and services as soon as you have prepared these records and mailed the required report and may continue to sell them unless and until notified by the Director of Price Stabilization that your ceiling prices have been disapproved or that more information is required. If, as a retailer, you fell that because of the large number of new commodities which you propose to sell, an item by item price comparison would be too burdensome, you may apply to the Director of Price Stabilization for an alternative method of establishing ceiling prices. Your application should contain the information required in paragraph (b) together with a complete statement of the formula proposed and your reasons demonstrating that it will result, on the average, in ceiling prices no higher than those of your most closely competitive sellers. In such a case you may not begin sales of any commodity with reference to which the application has been made until the Director of Price Stabilization has fixed a method for establishing your ceiling prices.

[Subparagraph (3) amended by Amdt. 36]

(b) *Required report if you are pricing under this section.* You should file your report with the OPS District Office for the district in which your place of business is located except as follows: (1) If you are a manufacturer and your gross sales of your manufactured commodities for your last complete fiscal year amounted to $250,000 or more, or if you are a new manufacturer who has not completed a fiscal year, but you expect your gross sales of your manufactured commodities to reach $250,000 during your first fiscal year, you should file your report with the Director of Price Stabilization, Washington 25, D. C., and (2) Reports for a group of retail sellers determining uniform ceiling prices under section 12 should be filed in the OPS District Office for the district in which the central office of the group is located, or, if all sellers in the group are not located in the same OPS region, with the Director of Price Stabilization, Washington 25, D. C.

Your report should state the name and address of your company; the new categories in which the commodities fall and the most comparable categories dealt in by you during the base period; the name, address and type of business of your most closely competitive seller of the same class; a description of the commodity he sells and the differences, if any, in specifications of his commodity from the one you are pricing; your reasons for selecting him as your most closely competitive seller; a statement of your customary price differentials; and, if you are starting a new business, a statement whether you or the principal owner of your business are now or during the past twelve months have been engaged in any capacity in the same or a similar business at any other establishment, and if so, the trade name and address of each such establishment. Your report should also include the following:

[Paragraph (b) amended by Amdts. 4 and 36]

(1) *If you are a manufacturer:* Your proposed ceiling price and the specifications of the commodity you are pricing; the manufacturing processes involved; your unit direct costs; and the types of customers to whom you will be selling.

(2) *If you are a wholesaler:* Your proposed ceiling price and your net invoice cost of the commodity being priced; the names and addresses of your sources of supply, the function performed by them (e. g., manufacturing, distributing, etc.), and the types of purchasers to whom they customarily sell; the types of customers to whom you plan to sell; and a statement showing that your proposed ceiling price will not exceed the ceiling price your customers paid to their customary sources of supply.

(3) *If you are selling a service:* Your proposed ceiling price and a description of the most comparable service delivered by you during the base period showing your present direct labor and materials costs and ceiling price for it.

SEC. 7. *Sellers who cannot price under other sections.* If you claim that you are unable to determine your ceiling price for a commodity or service under any of the foregoing provisions of this regulation (which, in the opinion of the Director of Price Stabilization, provides adequate pricing instructions for virtually all transactions), you may apply in writing for the establishment of a ceiling price. This application shall contain an explanation of why you are unable to determine your ceiling price under any other provision of this regulation; all pertinent information describing the commodity or service; and the nature of your business; your proposed ceiling price and the method used by you to determine it; and the reason you believe the proposed price is in line with the level of ceiling prices otherwise established by this regulation. You may not sell the commodity or service until the Director of Price Stabilization, in writing, notifies you of your ceiling price.

You should file your application with the OPS District Office for the district in which your place of business is located except as follows: (1) If you are a manufacturer and your gross sales of your manufactured commodities for your last complete fiscal year amounted to $250,000 or more, or if you are a new manufacturer who has not completed a fiscal year, but you expect your gross sales of your manufactured commodities to reach $250,000 during your first fiscal year, you should file your application with the Director of Price Stabilization, Washington 25, D. C., and (2) Applications for a group of retail sellers determining uniform ceiling prices under section 12 should be filed in the OPS District Office for the district in which the central office of the group is located, or, if all sellers in the group are not located in the same OPS region, with the Director of Price Stabilization, Washington 25, D. C.

[Section 7 amended by Amdt. 36]

SEC. 8. *Modification of proposed ceiling prices by Director of Price Stabilization.* The Director of Price Stabilization may at any time disapprove or revise ceiling prices reported or proposed under this regulation so as to bring them into line with the level of ceiling prices otherwise established by this regulation.

SEC. 9. *Customary price differentials.* Your ceiling prices, when determined, shall reflect your customary price differentials, including discounts, allowances, premiums and extras, based upon differences in classes or location of purchasers, or in terms and conditions of sale or delivery.

SEC. 10. *Exporters and importers*—(a) *Exporters.* Sales by persons exporting commodities from the United States (or its territories and possessions) are subject to the provisions of this regulation. If the ceiling price is determined by the seller for domestic purchasers, it may be adjusted pursuant to section 9 to take account of the seller's customary differentials for export sales.

(b) *Importers.* Sales made within the territorial jurisdiction of the United States, its territories and possessions, of commodities imported by the sellers from other countries are subject to the provisions of this regulation.

(c) *Special provision for importers with existing purchase commitments.* (1) If you resell a commodity which you import in substantially the same form (except for services normally performed by importers such as sorting or packaging), or sell that commodity after simple processing operations by you, such as wool scouring or coffee roasting, you may adjust a ceiling price determined under section 3 for any such commodity which is delivered to you pursuant to a contract dated on or before January 26, 1951, to offset an increase in landed cost since the base period. The

amount of the permitted increase is the dollar and cents amount by which your current landed cost per unit exceeds your highest base period landed cost for the commodity.

(2) If you are adjusting your ceiling prices under this section for any of the commodities listed below, you must within ten days after your first sale at the new price, file with the Director of Price Stabilization, Washington 25, D. C., a report showing your base period price, current foreign invoice price and total landed costs of commodities repriced. This paragraph applies to importers of the following kinds of commodities: Non-ferrous metals; ferro-alloys; minerals; raw agricultural products; textile fibres and fabrics; chemicals; metal scrap, crude and semi-finished steel; lumber and pulp.

(3) The landed cost means the foreign invoice price plus the following expenses actually incurred: (i) transportation costs; (ii) customs duties or import taxes; (iii) other commodity taxes; (iv) dock charges; (v) clearance; (vi) insurance; (vii) letter of credit expenses; and (viii) any customary buying commission to a purchasing agent outside the continental United States.

SEC. 11. *"Parity" adjustments in ceiling prices*—(a) *Commodities covered by this section.* This section applies to the following listed agricultural commodities, to the following listed commodities produced in the territories and possessions of the United States, and to products processed from any one or more of them.

[Paragraph (a) amended by Amdt. 20]

Listed Commodities

Field crops:
- Barley
- Beans, dry edible
- Buckwheat
- Corn
- Flaxseed
- Hay
- Oats
- Peanuts
- Peas, dry field
- Rye
- Sorghums for grain
- Wheat

Livestock and livestock products:
- Butterfat
- Chickens
- Eggs
- Milk, wholesale
- Turkeys
- Beeswax

Sugar crops:
- Maple sirup
- Maple sugar
- Sorghum sirup
- Sugar beets
- Sugarcane sirup
- Sugarcane

Fruits:
- Apples
  - For fresh consumption
  - For canning
  - For drying
- Apricots
  - For fresh consumption
  - For canning
  - Dried
- Avocados
- Blackberries
- Boysenberries
- Cherries

Fruits—Continued
- Cherries—Continued
  - Sweet
  - Sour
- Cranberries
- Dates
- Figs
  - For fresh consumption
  - For canning
- Grapefruit
- Grapes, excluding raisins dried
- Lemons
- Limes
- Loganberries
- Olives
  - For canning
  - Crushed for oil
- Oranges and tangerines
- Peaches
  - For fresh consumption
  - For canning
    - Clingstone
    - Freestone
  - Dried
- Pears
  - For fresh consumption
  - For canning
  - Dried
- Pineapples, Florida
- Plums
  - For fresh consumption
  - For canning
- Raspberries, black
- Raspberries, red
- Strawberries
  - For fresh consumption
- Youngsberries

Tree-nuts:
- Almonds
- Filberts
- Pecans
- Walnuts

Tobacco:
- Burley, type 31
- Cigar filler and binder, types 42–44, 46, 51–55.
- Cigar wrapper, type 61
- Cigar wrapper, type 62
- Dark air-cured, types 35–36
- Fire cured, types 21–24
- Flue-cured, types 11, 14
- Maryland, type 32
- Pa. seedleaf, type 41
- Sun cured, type 37

Vegetables:
- Artichokes
- Asparagus
  - For fresh consumption
- Beans, Lima
- Beans, Snap
- Beets
- Cabbage
- Cantaloupe
- Carrots
- Cauliflower
- Celery
- Corn, sweet
- Cucumbers
  - For fresh consumption
- Eggplant
- Garlic
- Kale
- Lettuce
- Onions
- Peas, green
- Peppers, green
- Pimientos
- Shallots
- Spinach
- Sweet Potatoes
- Tomatoes
- Watermelon

Miscellaneous:
- Popcorn
- Honey
- Hops
- Peppermint oil
- Spearmint oil
- Tung nuts

[Potatoes deleted from above list by Amdt. 31]

(b) *Processors and Manufacturers.* This section applies to you only if:

(1) You sell a product which you process from one or more of the listed commodities (or from a product processed from them), and you are not, as to that processing operation, a manufacturer covered by the Manufacturers' General Ceiling Price Regulation (Ceiling Price Regulation 22), and

(2) The cost to you of a current customary purchase of the listed commodity (or the product processed therefrom) exceeds the highest price you incurred or paid during the base period. In such case you may increase the ceiling price as determined under section 3 of this regulation, for your product by the dollar-and-cent difference per unit between the highest price incurred or paid by you for a customary purchase during the base period and the cost to you of the most recent customary purchase. (If the ceiling price was determined under either section 4, 6, or 7 of this regulation, you figure your increase under paragraph (d) (2) below).

If you have previously increased the ceiling price for your product, you may increase your present ceiling price for the product by the dollar-and-cent difference per unit between the price upon which your last previous increase was based and the cost to you of the most recent customary purchase.

Example: You are a processor of evaporated milk, a product processed from a listed commodity.

The highest price paid by you for a customary purchase of manufacturing milk in the base period was $3.80 per cwt. The cost to you of the most recent purchase is $4.00 per cwt.—a difference of 20 cents or 2/10 cent per lb.

If you use 94 lbs. of milk to produce a case of evaporated milk, you are entitled to increase your maximum price per case by 18.8 cents per case (94 x 2/10 cent).

If, subsequent to this adjustment, the price you pay for a customary purchase of manufacturing milk should increase to $4.10—a further increase of $0.10 per cwt. or 1/10 cent per lb.—you may add an additional 9.4 cents to your maximum price per case (94 x 1/10 cent).

(3) (i) If (1) you are a producer-processor, and (2) you cannot otherwise determine your ceiling price under subsection (b) (2) above because you do not customarily purchase any amount of a listed commodity from independent producers wholly unaffiliated with you, you may, for purposes of subsection (b) (2), use as your costs the prices (with adjustment for difference in delivery costs) paid for a customary purchase by your nearest competitor. Such competitor must be one who receives delivery of the same quality of the commodity as you do, in the same quantities (baskets, tons, carloads, etc.), at firm prices for processing.

(ii) If (1) you are a processor who purchases the listed commodity under "open" price or deferred payment contracts, which relate the price you pay the producer to facts unknown both at the time the raw commodity is delivered to you, and at the time of sale of the processed product, and (2) you cannot otherwise determine your ceiling price under subsection (b) (2) above because you do not customarily purchase any amount of a listed commodity at prices finally determined at the time of sale, you may, for purposes of subsection (b) (2), use as your costs the prices (with adjustment for differences in delivery costs) paid for a customary purchase by your nearest competitor. Such competitor must be one who receives delivery of the same quality of the commodity as you do, in the same quantities (bushels, tons, carloads, etc.), at firm prices for processing.

(iii) If (*a*) you are a producer-owned cooperative processor, and (*b*) you cannot otherwise determine your ceiling price under paragraph (b) (2) of this section because you do not customarily purchase any amount of a listed agricultural commodity from independent producers wholly unaffiliated with you, you may increase your ceiling price (as determined under the other sections of this regulation) for products processed from such commodities if the entire dollar-and-cent increase in total gross sales revenue derived from that increase in your ceiling price is passed back to producer-members within 120 days after the close of the pool or the end of each normal accounting period. A "pool" is an arrangement whereby producers contribute quantities of a commodity which are disposed of and the proceeds are distributed to the producers in proportion to their contributions. The "close of the pool" is the date on which the disposal of all of the commodities in the pool has been completed. The amount so passed back must be in addition to the full amount you would normally have passed back to producers had you sold the processed product at the ceiling price determined under the other sections of this regulation.

[Subdivision (iii) amended by Amdt. 28]

(c) *Distributors.* This section applies to you only if:

(1) You buy and resell in substantially the same form one or more of the listed commodities or a product processed from them, and

(2) The cost to you of a current customary purchase of that commodity or product exceeds the highest price you incurred or paid for it during the base period.

In such case you may increase your ceiling price, as determined under section 3 of this regulation, for the commodity or product by the dollar-and-cent difference per unit between the highest price incurred or paid by you for a customary purchase during the base period and the cost to you of the most recent customary purchase. (If your ceiling price was determined under either section 5, 6 or 7 of this regulation, you figure your increase under paragraph (d) (2) below.)

If you have previously increased your ceiling price for the commodity or product, you may increase your present ceiling price for that commodity or product by the dollar-and-cent difference per unit between the price upon which your last previous increase was based and the cost to you of the most recent customary purchase.

(d) *Method for computing "parity" adjustments where no customary purchase was made during the base period or where a ceiling price was determined under sections 4, 5, 6 or 7.* (1) If you cannot figure your increase under paragraphs (b) and (c) above because you made no customary purchase during the base period, then the highest price you paid or incurred during the most recent five-week period prior to the base period in which you made a customary purchase shall be your highest price within the meaning of section 11 (b) (2) and 11 (c) (2).

(2) If your ceiling price was determined under either section 4, 5, 6 or 7, then the highest price you paid or incurred during the most recent five-week period prior to the "date of calculation" (as defined below) of your ceiling price in which you made a customary purchase shall be your highest price within the meaning of section 11 (b) (2) and 11 (c) (2).

If your ceiling price was determined under section 6 or section 7, and you made no customary purchase prior to the "date of calculation", the price you paid or incurred for your first customary purchase made between the "date of calculation" and the date you first offered your product for immediate delivery shall be your highest price within the meaning of section 11 (b) (2) and 11 (c) (2).

If your ceiling price is determined under either section 4 or 5, the "date of calculation" of your ceiling price is the date upon which you first offer the commodity or product for delivery. If your ceiling price is determined under either section 6 or 7, the "date of calculation" of your ceiling price is the date upon which you mail the report or application provided for in those sections.

(e) *Method for computing "parity" adjustments where prices have been based customarily on commodity exchange quotations.* In case any of the above listed commodities or products processed from them are traded regularly upon a recognized commodity exchange that maintains daily records of transactions or quotations, and if it has been both your own practice and the general practice of your industry to figure selling prices on the basis of commodity exchange quotations, the increase per unit you are entitled to add under subsections (b) and (c) shall be the difference in dollars and cents between (1) the quotation upon which your ceiling price under this regulation was based, and (2) the comparable current quotation.

(f) *Notice of "Parity" Adjustment Increases.* (1) If you are a processor or a manufacturer to whom the provisions of section 11 (b) (2) are applicable, you may not increase your ceiling price for such commodity until you first notify, as specified in this paragraph, the District Director of the Office of Price Stabilization in whose district you have your processing plant. However, if the records required in section 16, pertaining to the commodities produced in that processing plant, are not maintained in the district where the processing plant is located, you may notify the District Director in whose district those records are maintained. Your notice shall be sent by registered mail and contain the following information:

(i) Name and address of the processing plant which incurs the increased cost for the listed commodity or product processed therefrom;

(ii) A description of the commodity you are selling;

(iii) Name and address of each selling unit which sells the commodity and your existing ceiling price at each such selling unit;

(iv) The highest price you paid or incurred, during the base period or during the periods provided for in paragraph (d) of this section, for a customary purchase (or, if applicable, the commodity exchange quotation) of the commodity or product referred to under subdivision (i) of this subparagraph and processed at that plant; or, if you have previously increased your ceiling price, then the price upon which you based your existing ceiling price;

(v) The new cost or new commodity exchange quotation, whichever is applicable;

(vi) The increased ceiling price at each selling unit listed in subdivision (iii) of this subparagraph.

In the case of increased cost of ingredients, furnish the figures substantiating the conversion of your increase in cost to the increase in the ceiling price of the commodity.

[Subparagraph (1) amended by Amdts. 30 and 35]

(2) If you are either a producer-processor pricing under section 11 (b) (3) (i), or a processor operating under "open" price or deferred payment contracts and pricing under section 11 (b) (3) (ii), you may not increase your ceiling price for such commodity until you first notify the District Director of the Office of Price Stabilization in whose district you have your processing plant. However, if the records required in section 16, pertaining to the commodities produced in that processing plant, are not maintained in the district where the processing plant is located, you may notify the District Director in whose district those records are maintained. Your notice shall be sent by registered mail and contain the following information:

[Above paragraph amended by Amdts. 30 and 35]

(i) The name and address of your nearest competitor selected pursuant to Section 11 (b) (3) (i) or Section 11 (b) (3) (ii);

(ii) The highest price paid for the listed commodity in the base period by your nearest competitor, or his ceiling price (determined before application of this Section 11), or your dollar-and-cent per unit margin in the base period (determined by taking your ceiling price, as determined under this regulation before application of Section 11, and subtracting from it the highest per unit price paid by your nearest competitor for a customary purchase in the base period).

NATIONAL ARCHIVES

(iii) The current price paid for a customary purchase of the listed commodity by your nearest competitor.

(iv) Your ceiling price, as determined under this regulation, before application of this Section 11.

(v) The increased ceiling price.

In the case of increased cost of ingredients, furnish the figures substantiating the conversion of your increase in cost to the increase in the ceiling price.

(3) If you are a cooperative-processor pricing under section 11 (b) (3) (iii), you may increase your ceiling price without first giving any notice, but must, within 120 days after the close of the "pool" or the end of each normal accounting period during which you increased your ceiling price, notify the District Director of the Office of Price Stabilization in whose district you have your processing plant. However, if the records required in section 16, pertaining to the commodities produced in that processing plant, are not maintained in the district where the processing plant is located, you may notify the District Director in whose district those records are maintained. Your notice shall be sent by registered mail and contain the following information:

[Above paragraph amended by Amdts. 28, 30 and 35]

(i) The amount retained by you per unit of the processed commodity sold in the last normal accounting period before February 1, 1951.

(ii) The amount passed back to producers per unit of the processed commodity sold in the last normal accounting period before February 1, 1951.

(iii) The amount retained by you per unit of the processed commodity sold in the most recent normal accounting period.

(iv) The amount passed back to producers per unit of the processed commodity sold in the most recent normal accounting period.

(4) Notwithstanding the other provisions of paragraph (f), the Director of the Office of Price Stabilization may, in writing, require you to file your notices of "parity" adjustment increases with the National Office of the Office of Price Stabilization, Washington, D. C.

[Subparagraph (4) added by Amdt. 35]

(g) *Effect of Notification of "Parity" Adjustment.* Upon mailing the notification required in paragraph (f) above, you may charge the new ceiling price. If, in the judgment of the Director of Price Stabilization, the increase is deemed unreasonable, excessive or otherwise improper, he may disapprove the price and restore the old ceiling price or establish a new ceiling price and may apply it retroactively.

(h) *Effect of removal from list of commodities.* This section shall cease to apply to a listed agricultural commodity if, after consultation with the Secretary of Agriculture, the Director of Price Stabilization determines that the requirements of the Defense Production Act of 1950, as amended, are satisfied as to such commodity, and, at such time, this section shall also cease to apply to the same listed commodity produced in the territories and possessions of the United States. The ceiling price for the seller of any product processed from any such commodity shall thereafter be determined under the provisions of this regulation, except that, if such ceiling price is determined under section 3, the "base period" shall be the most recent five-week period preceding the date the Director of Price Stabilization deletes the commodity from the list. Such ceiling prices shall become effective on the date determined by the Director.

Notwithstanding anything contained in this subparagraph (h) to the contrary, the ceiling price for fluid milk, which is sold and bought pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended, or any marketing agreement, license or order, or provision thereof or amendment thereto, shall be no less than the price determined pursuant to that Act, and, for purposes of such sales and purchases only, fluid milk shall be deemed to remain on the list of commodities.

(i) *Goat's milk.* Processors and distributors of goat's milk or of products processed from goat's milk may adjust their ceiling prices for these commodities in accordance with section 11 (a) through (g) as if goat's milk were a adjust ceiling prices may be withdrawn listed commodity. This permission to by the Director of Price Stabilization at any time.

[Section 11 amended by Amdts. 1, 7, 10, 13, 14, 15, 17, 20, 27, 28, 30 and 35]

SEC. 12. *Group of retail sellers under common control.* A group of retail sellers under common ownership or control which had an established practice of centrally determining uniform prices during the base period for some or all of their categories of commodities or services may treat the entire group of retail sellers as one seller for the purpose of (a) computing ceiling prices for the commodities or services for which this practice existed and (b) complying with the record-keeping, reporting and filing provisions of this regulation.

The ceiling prices shall be the uniform centrally determined prices. Records shall be centrally kept, listing the names and addresses of all retail sellers of this group. If a group of retail sellers determines ceiling prices under this section, each retail outlet which is a member of the group must continue to abide by the ceiling prices under this section. The permission granted by this section may be withdrawn by the Director of Price Stabilization from any group of retail sellers upon consideration of the price records maintained by such group and such reports as he may require.

SEC. 13. *Highest price line limitation for manufacturers of wearing apparel and consumer durable goods*—(a) *Manufacturers with base period sales.* If you manufacture certain wearing apparel or consumer durable goods falling within a list of categories which will be issued shortly you may not, after the effective date prescribed in the supplementary order, sell a commodity in any such category at a price higher than your ceiling price determined under section 3 for a commodity in that category.

Example: Your base period ceiling prices for women's rayon dresses were $5.75, $6.75 and $8.75. You will not be permitted to sell any women's dresses at a price in excess of $8.75.

(b) *Manufacturers without base period sales.* If you did not deliver during the base period, or offer in writing for delivery during the base period, any commodity in a particular category listed, you must apply to the Director of Price Stabilization, Washington 25, D. C., for a highest price line limitation for the category which you wish to sell.

SEC. 14. *Exemptions and exceptions.* This regulation does not apply to the following:

(a) Prices or rentals for real property;

(b) Rates or fees charged for professional services;

(c) Prices or rentals for:

(1) Materials furnished for publication by any press association or feature service;

(2) Books, magazines, motion pictures, periodicals, or newspapers, other than as waste or scrap;

(d) Rates charged by any person in the business of operating or publishing a newspaper, periodical, or magazine, or operating a radio-broadcasting or television station, a motion picture or other theatre enterprise, or outdoor advertising facilities;

(e) Rates charged by any person in the business of selling or underwriting insurance;

(f) Rates charged by any common carrier or other public utility;

(g) Margin requirements on any commodity exchange;

(h) Sales of bonds, stocks, and other evidences of indebtedness representing monetary obligation is only;

[Paragraph (h) amended by Amdt. 4]

(i) Sales of stamps and coins, precious stones, paintings, other objects of art, and commodities made prior to 1850;

(j) Sales of used personal or household effects by a private owner;

(k) Sales and deliveries at a bona fide auction of used household or personal effects, except that this exception shall not apply to any sale at auction conducted in, by, or for a retail or wholesale establishment regularly engaged in the business of selling such commodities other than by auction.

(l) Indian and Eskimo handicraft objects which are produced by the manual skill of American Indians, Alaskan Indians or Eskimos.

(m) Sales and deliveries of damaged commodities by insurance companies, transportation companies, or agents of the United States Government or by any other person engaged in reconditioning and selling damaged commodities received, in direct connection with the adjustment of losses, from insurance companies, transportation companies, or agents of the United States Government; *Provided*, That such person is engaged principally and primarily in such business and is not engaged in selling new or second-hand commodities for his own account.

(n) (1) Sales or deliveries of commodities made or produced by a seller whose gross sales of such commodities did not exceed $25,000, in his last complete fiscal year prior to July 1, 1952, for all units under his ownership and control.

(2) Sales or deliveries of commodities made or produced by a seller who did not complete a fiscal year prior to July 1, 1952 whose gross sales of such commodities are not expected to exceed $25,000 in his first complete fiscal year for all units under his ownership and control.

(3) In the event that the gross sales for all units under the ownership and control of a seller exempt under the preceding subparagraphs (1) and (2) of this paragraph reach $25,000 during the seller's first fiscal year ending after July 1, 1952, the exemption under this paragraph ceases immediately.

(4) The preceding subparagraphs of this general exemption do not apply to sales or deliveries by producers of saw logs, pulpwood, wooden mine materials, ties, poles and piling, and related forest products.

[Paragraph (n) amended by Amdts. 19 and 33]

(o) Services the rates of which are regulated by the Department of Agriculture under the Stockyards and Packers Act.

(p) Sales of abandoned or confiscated property by Government agencies or pursuant to a court decree.

(q) Sales of commodities or services the ceiling prices of which are now or subsequently established by other regulations or orders of the Director of Price Stabilization or by voluntary agreements approved in accordance with the provisions of Section 708 of the Defense Production Act of 1950.

(r) Sales of military and strategic commodities but only to the extent specified by supplementary regulations or orders which will be issued defining the scope of this exemption.

(s) The following food, agricultural and related commodities (including any that may be imported):

(1) (i) The following commodities only when sold by the producers thereof: eggs, dry edible beans and peas, and popcorn.

(ii) In addition, any other agricultural commodity in its raw or natural state, or if the commodity is not customarily sold by producers generally in its raw or natural state, in the first form or state beyond the raw or natural state in which it is customarily sold by producers generally.

(iii) The exemption established in (i) and (ii) above shall apply to the same commodities produced in the territories and possessions of the United States.

(iv) The exemption established by this subparagraph (1) in (i), (ii) and (iii) shall not apply to sales, other than by producers, of any agricultural commodity (or the same commodity produced in the territories and possessions of the United States), not now listed in section 11 (a) or hereafter deleted from the section 11 (a) list. The ceiling price for sales, other than by producers, of any commodity hereafter deleted from the section 11 (a) list shall, after such deletion, be determined under the provisions of this regulation, except that, if such ceiling price is determined under section 3, the "base period" shall be the most recent five-week period preceding the date the Director of Price Stabilization deleted the commodity from the list. Such ceiling prices shall become effective on the date determined by the Director.

[Subparagraph (1) amended by Amdts. 1, 7, 13, 14 and 20]

(2) Any commodity grown and processed on the farm when sold by the farmer if the total of such sales and deliveries does not exceed $200 in any one calendar month.

(3) Raw wool when sold by the producer and mohair when sold by the producer.

[Subparagraph (3) amended by Amdt. 13]

(4) Cotton when sold by the producer of that commodity.

(5) American-Egyptian cotton and extra long staple cotton grown outside the United States.

NOTE: Contracts for the sale of extra long staple cotton grown outside the United States executed on or after February 11, 1951, shall not be deemed in violation of the General Ceiling Price Regulation.

[Subparagraph (5) amended by Amdt. 9]

(6) All live animals.

(7) All fresh fruits, including berries and tree nuts, and all fresh vegetables.

[Subparagraph (7) amended by Amdt. 13]

(8) Fresh fish, seafood and game, and frozen fish and shellfish.

[Subparagraph (8) amended by Amdt. 11]

(9) Seeds including hay, pasture, legume and covercrop seeds and other seeds.

(10) Crude pine gum when sold by the producer.

[Subparagraph (10) amended by Amdt. 1]

(11) The following oil seeds or nuts, their oils and fatty acids or combinations of these oils so long as the oils remain in a form customarily designated by the trade as "oil":

Babassu kernels.	Ouricury kernels.
Babassu oil.	Ouricury oil.
Cacao butter.	Palm oil.
Cashew nut shell liquid.	Palm kernels.
Castor beans.	Palm kernel oil.
Castor oil.	Perilla seeds.
Cod oil.	Perilla seed oil.
Cohune kernels.	Poppyseed.
Cohune oil.	Poppyseed oil.
Coquito kernels.	Rapeseed, rapeseed oil.
Coquito oil.	Rubberseed.
Copra.	Rubberseed oil.
Cocoanut oil.	Sesame seed.
Hemp seed.	Sesame oil.
Hemp seed oil.	Shark oil.
Kapok seed.	Sperm oil.
Kapok seed oil.	Sunflower seed.
Muru-muru kernels.	Sunflower seed oil.
Muru-muru oil.	Tucum kernels.
Olticica oil.	Tucum oil.
Olive oil, edible, sulphur and other inedible.	Tung oil.
	Whale oil.

[Subparagraph (11) amended by Amdt. 1]

(12) Flue cured tobacco, types 11 to 14, when sold by the producer.

(13) Cotton seed when sold by the producer.

(14) Dried figs, raisins and prunes when sold by the producer.

(15) Broom corn when sold by the producer.

(16) Sugarcane, and sugar and liquid sugar (as defined in the Sugar Act of 1948).

[Subparagraphs (12), (13), (14), (15), (16) added by Amdt. 1]

(17) Cut greens when used for decorative purposes, such as ferns and the boughs and leaves of trees and shrubs; nursery stock; Christmas trees; vegetable plants; and natural flowers and floral products, such as cut flowers, flowering plants, foliage plants, and bulbs for planting purposes.

[Subparagraph (17) added by Amdt. 8; amended by Amdts. 16 and 21]

(18) All domestically produced and imported geese, guineas, squabs, pigeons, quail, partridges, pheasants, rabbits and hares, whether in processed or unprocessed form, and at all levels of purchase and sale.

[Subparagraph (18) added by Amdt. 12; amended by Amdt. 22]

(19) Holiday fruit cake, that is, fruit cake which: (1) Contains not less than 50 percent by weight of fruits and nuts in relation to the total weight of the fruit cake mix; and which (2) is packaged by the manufacturer in a wrapper or container which indicates that such fruit cake is packaged expressly for sale during the Thanksgiving or Christmas season or both.

[Subparagraph (19) added by Amdt. 18]

(20) All raw and unprocessed chicken and turkey feathers and fibre, and all raw and unprocessed new, or unprocessed second-hand, goose or duck feathers and down.

[Subparagraph (20) added by Amdt. 22]

(21) Goat's milk when sold by the producer.

[Subparagraph (21) added by Amdt. 27]

(t) (1) Sales by any person other than an agency or instrumentality of the United States Government, of his used supplies or equipment not acquired or produced by him for the purpose of sale, provided that a used item may not be sold at a price higher than the ceiling price of that item when new for sales to the same class of purchaser. If the seller cannot determine the ceiling price for the item when new, he may not charge for the used item any amount in excess of his cost of acquisition for that item.

(2) This exemption does not apply to used rails or trackwork, demolition projects, scrap or waste materials, or to any commodity which is now or hereafter specifically covered by any supplementary regulation to the General Ceiling Price Regulation or any numbered ceiling price regulation.

[Paragraph (t) added by Amdt. 26; Subparagraph (2) amended by Amdts. 29 and 34]

SEC. 15. *Amendments, protests and interpretations.* The Director of Price Stabilization may issue supplementary regulations modifying or implementing this regulation as he deems appropriate. Price Procedural Regulation No. 1 sets forth the circumstances and the manner in which you may obtain an official interpretation of this regulation; file a protest; or petition for an amendment. If the Director of Price Stabilization determines that adjustments are necessary to prevent or correct hardships or inequities and can be put into effect consistently with the objectives of the Defense Production Act of 1950, he will issue appropriate amendments or supplementary regulations providing for such adjustments.

SEC. 16. *Records.* This section tells you what records you must preserve and what additional records you must prepare.

(a) *Base period records.* (1) You must preserve and keep available for examination by the Director of Price Stabilization those records in your possession showing the prices charged by you for the commodities or services which you delivered or offered to deliver during the base period, and also sufficient records to establish the latest net cost incurred by you prior to the end of the base period in purchasing the commodities (if you are a wholesaler or retailer).

(2) In addition, on or before March 22, 1951, you must prepare and preserve a statement showing the categories of commodities in which you made deliveries and offers for delivery during the base period; or if you sold services you must prepare and preserve a statement listing the services which you delivered or offered to deliver during the base period.

[Subparagraph (2) amended by Amdts. 3 and 5]

(3) On or before March 22, 1951, you must also prepare and preserve a ceiling price list, showing the commodities in each category (listing each model, type, style, and kind), or the services, delivered or offered for delivery by you during the base period together with a description or identification of each such commodity or service and a statement of the ceiling price. Your ceiling price list may refer to an attached price list or catalogue. If you are a retailer you may satisfy the requirement of this paragraph (3) by recording on your purchase invoices, covering the commodities (including every model, type, style, and kind) delivered or offered for delivery by you during the base period, the price at which you sold, or offered the commodities for delivery, during the base period.

[Subparagraph (3) amended by Amdts. 3 and 5]

(4) You must also prepare and preserve a statement of your customary price differentials for terms and conditions of sale and classes of purchasers, which you had in effect during the base period.

(5) If you operate a restaurant, you are required to preserve all menus used by you during the last ten days of the base period and all menus hereafter used by you.

(b) *Current records.* If you sell commodities or services covered by this regulation you must prepare and keep available for examination by the Director of Price Stabilization for a period of two years, records of the kind which you customarily keep showing the prices which you charge for the commodities or services. In addition, you must prepare and preserve records indicating clearly the basis upon which you have determined the ceiling price for any commodities or services not delivered by you or offered for delivery during the base period. If you are a retailer you are required to preserve your purchase invoices and to record thereon both your initial selling price and the section of this regulation under which you have determined your ceiling price.

(c) In certain situations, other sections of this regulation require additional records to be prepared or submitted.

SEC. 17. *Sales slips and receipts.* Any seller who has customarily given a purchaser a sales slip, receipt, or similar evidence of purchase shall continue to do so. Upon request from a purchaser any seller, regardless of previous custom, shall give the purchaser a receipt showing the date, the name and address of the seller, the name of each commodity or service sold, and the price received for it.

SEC. 18. *Evasion.* Any practice which results in obtaining indirectly a higher price than is permitted by this regulation is a violation of this regulation. Such practices include, but are not limited to devices making use of commissions, services, cross sales, transportation arrangements, premiums, discounts, special privileges, tie-in agreements and trade understandings.

SEC. 19. *Transfers of business or stock in trade.* If the business, assets or stock in trade of any business are sold or otherwise transferred after January 26, 1951, and the transferee carries on the business, or continues to deal in the same type of commodities or services, in an establishment separate from any other establishment previously owned or operated by him, the maximum prices of the transferee shall be the same as those to which his transferor would have been subject if no such transfer had taken place, and his obligation to keep records sufficient to verify such prices shall be the same. The transferor shall either preserve and make available, or turn over, to the transferee all records of transactions prior to the transfer which are necessary to enable the transferee to comply with the record provisions of this regulation.

SEC. 20. *Excise, sales or similar taxes—*

(a) *Tax paid as such by manufacturer, wholesaler or retailer, where the tax is separately stated and collected.* In addition to your ceiling price, you may collect the amount of any excise, sales or similar tax paid by you as such if, during the base period you stated and collected such tax separately from your selling price. In the case of an increase in any excise, sales or similar tax or any new such tax, which is not effective until after January 26, 1951, you may, in addition to your ceiling price, state separately and collect the amount of such increase or new tax actually paid as such by you, if not prohibited by the tax law. You must in all such cases state separately the amount of the tax.

(b) *Tax paid as such by wholesaler or retailer, where the tax is not separately stated.* If you are a wholesaler or a retailer, and after January 26, 1951, the amount of any excise, sales or similar tax paid as such by you and included in your ceiling price is reduced or eliminated, you must reduce your ceiling price to reflect the appropriate amount of such reduction or elimination. If after January 26, 1951, any such tax is increased or any such tax is newly imposed, you may increase your ceiling price to reflect the appropriate amount of such increase or new tax, and you may include the amount in your selling price, if not prohibited by the tax law.

(c) *If you are a manufacturer and the tax is included in your selling price.* If you are a manufacturer (except a manufacturer of tobacco products), and after January 26, 1951, the amount of any excise, sales or similar tax which is included in your ceiling price is reduced or eliminated, you must reduce your ceiling price to reflect the appropriate amount of such reduction or elimination. If you are a manufacturer (including a manufacturer of tobacco products), and after January 26, 1951, any such tax is increased, you may increase your ceiling price to reflect the appropriate amount of the increase paid as such by you, if the former amount of such tax was included in your ceiling price. In the case of any new excise, sales or similar tax which is not effective until after January 26, 1951, you may increase your ceiling price to reflect the appropriate amount of such new tax paid as such by you. Ceiling prices redetermined under this paragraph replace your former ceiling prices for all purposes of this regulation including use under section 4 of this regulation to determine the ceiling price of a new commodity. If you have otherwise complied with the reporting requirements of this regulation, no new report need be filed of a ceiling price redetermined under this paragraph.

(d) *Where net cost includes changed or new excise tax.* If you are a wholesaler or retailer and the net invoice cost of a commodity purchased by you for resale is changed by reason of the imposition or elimination of or increase or decrease in a manufacturer's excise tax, you recalculate your ceiling price under Supplementary Regulation 29, except for those commodities covered by paragraph (e) of this section.

(e) *Commodities for which only exact change in excise tax may be reflected in ceiling price.* If you are a wholesaler or retailer of the following commodities:

(1) Malt beverages,

(2) Tobacco products,

(3) Photographic apparatus, film and equipment (except private brands),

you may increase your ceiling price by the exact amount of any increase in or new manufacturer's excise tax reflected on the invoice to you; and except for tobacco products you must decrease your ceiling price by the exact amount of the decrease in or elimination of any such tax reflected on the invoice to you. Except for malt beverages and tobacco products, you must in all such cases on sales to sellers for resale state separately the amount of the tax.

(f) *Rounding taxes.* If a change occurs in an excise, sales or similar tax paid by you, or if the net invoice cost paid by you for a commodity purchased by you for resale changes by reason of the imposition of or increase in a manufacturer's excise tax, and your resulting cost per unit of the commodity you sell is not a round amount, you shall reflect any fraction of a cent as follows:

(1) On sales of one unit of that commodity, at one time to one purchaser, you shall drop the fraction of a cent if less than a half cent and increase the fraction to the nearest higher cent if a half cent or more.

(2) On sales of more than one unit of that commodity at one time to one purchaser, you shall multiply the exact amount of the tax change (including any fraction) per unit you sell by the number of the units you sell at that time to that purchaser, and shall drop any resulting fraction of a cent if less than a half cent and increase any resulting fraction of a cent to the nearest higher cent if a half cent or more.

Example: Your increased tax on a case of beer containing 24 bottles is 7.2 cents, so your increased cost per bottle is 7.2 cents divided by 24 bottles, or $\frac{3}{10}$ cent. If you sell one bottle of beer, your tax increase is less than $\frac{1}{2}$ cent and therefore you may not increase your ceiling price. If you sell three bottles of beer, your tax increase is 3 times $\frac{3}{10}$ cent and therefore you may increase your ceiling price for all three bottles of beer sold at one time to one purchaser by 1 cent.

(g) *Special rule for mail order establishments.* If you operate a mail order establishment you are not required to observe the pricing rules of this section as to any mail order sales of commodities covered by any of your catalogs, booklets, circulars, flyers or other forms of printed price lists which were printed before November 1, 1951. Your ceiling prices for such sales continue to be those established pursuant to the other sections of this regulation for so long as the printed price lists remain in effect except that:

(1) You may recalculate your ceiling prices for any commodity on which there is a new manufacturer's excise tax as soon as that tax is reflected in the net invoice cost of the commodity to you, and

(2) You may recalculate your ceiling prices for any commodity in the following groups of commodities when an increase in a manufacturer's excise tax is reflected in the net invoice cost of the commodity to you if you also recalculate your ceiling prices for the commodities in the group on which a decrease in or elimination of the manufacturer's excise tax is reflected in the net invoice cost of the commodity to you:

(i) Photographic apparatus, film and equipment.

(ii) Sporting goods.

[Section 20 amended by Amdt. 23]

SEC. 21. *Penalties.* Persons violating any provision of this regulation are subject to the criminal penalties, civil enforcement actions, and suits for treble damages provided for by the Defense Production Act of 1950.

SEC. 22. *Definitions and explanations.* This General Ceiling Price Regulation and the terms which appear in it shall be construed in the following manner, unless otherwise clearly required by the context:

Business establishment. This term refers to the physical location of the store, shop or other place of business in which commodities are manufactured or sold or at or from which commodities or services are supplied.

Class of purchaser or purchaser of same class. This term refers to the practice adopted by a seller in setting different prices for sales to different purchasers or kinds of purchasers (for example, manufacturer, wholesaler, shopper, retailer, Government agency, public institutions or individual consumer) or for purchasers located in different areas or for purchasers of different quantities or grades or under different terms or conditions of sale or delivery.

Commodity. This term includes commodities, materials, articles, products, supplies, components, and processes.

Delivered. A commodity shall be deemed to have been delivered during a specified period if during that period it was received by the purchaser or by any carrier, including a carrier owned or controlled by the seller, for shipment to the purchaser. A service shall be deemed to have been delivered or supplied during the specified period if during the period it was completed or in process.

Director of Price Stabilization. This term extends to any official (including officials of regional or local offices) to whom the Director of Price Stabilization by order delegates the function, power or authority referred to in this regulation.

Exporter. This term means any person selling a commodity priced under this regulation either directly or through an agent and delivering or shipping to a place outside the United States, its territories and possessions.

Importer. This term means the person by whom a commodity is imported and who first sells it after importation.

Imported. A commodity is imported which is transported from a place outside to a place inside the United States, its territories or possessions, for sale within such area.

Manufacturer. This term refers to any person who is engaged in business other than as a wholesaler or retailer.

Most closely competitive seller of the same class. Your most closely competitive seller of the same class is the seller with whom you are in most direct competition even though he may perform a different function with respect to the commodity or service (e. g., if you are a wholesaler of a commodity, your most closely competitive seller may be a manufacturer; or, if you are a retail supplier of a service, your most closely competitive seller may be a wholesaler). You are in direct competition with another seller who sells the same types of commodities or services to the same classes of purchaser in similar quantities, on similar terms and, if you are selling a commodity, you supply approximately the same amount of service.

Net invoice cost. This term refers to your invoice cost less any discount or allowance you took or could have taken. It does not include separately stated charges such as freight, taxes, etc., except that manufacturers' excise taxes other than those on commodities listed in section 20 (e) may be included.

[Above paragraph amended by Amdt. 23]

Offering price. The price at which a commodity or service was offered means the price quoted in the seller's price list, or if he had no price list, the price which he regularly quoted in any other manner. This regulation requires that an offer for sale other than at retail must have been in writing. For sales of commodities at retail the offer must have been made at the immediate point of sale (e. g., the shelves or counters). The term offering price does not include a price intended to withhold a commodity or service from the market or a price offered as a bargaining price by a seller who usually sells at a price lower than his asking price.

Person. This term includes any individual, corporation, partnership, association or any other organized group of persons, or legal successors or representatives of the foregoing, and the United States or any other government or their political subdivisions or agencies.

Records. This term means books of account, sales lists, sales slips, orders, vouchers, contracts, receipts, invoices, bills of lading, and other papers and documents.

Restaurant. This term refers to any establishment in which meals, food items, or beverages are sold and served primarily for consumption on or about the premises (hotels, soda fountains, boarding houses, lunch wagons, etc., are included).

Sale at retail and retailer. Sale at retail means a sale to an ultimate consumer other than an industrial or commercial user. In addition, for determining the applicable ceiling price under this regulation, any sale of fertilizer to the ultimate user by a person who acquired it for resale shall be considered a sale at retail. A seller who in the regular course of business makes sales at retail is a retailer.

[Above definition amended by Amdt. 32]

Sale at wholesale and wholesaler. Sale at wholesale means a sale by a person who buys a commodity and resells it, without substantially changing its form, or who supplies a service, to an industrial or commercial user, or to any person other than the ultimate consumer. However, for determining the applicable ceiling price under this regulation, any sale of fertilizer to the ultimate user by a person who acquired it for resale shall be considered a sale at retail. A seller who in the regular course of

business makes sales at wholesale is a wholesaler.

[Above definition amended by Amdt. 32]

Sell. This term includes sell, supply (with respect to either commodities or services), dispose, barter, exchange, lease, transfer, deliver, and contracts and offers to do any of the foregoing. The terms buy and purchase shall be construed accordingly. Nothing in this regulation shall be construed to prohibit the making of a contract or offer to sell a commodity or service at (a) the ceiling price in effect at the time of delivery or (b) the lower of a fixed price or the ceiling price in effect at the time of delivery.

Seller. This term includes the seller of any commodity or service. Where a seller makes sales or supplies services through more than one selling unit (other than salesmen making sales at uniform price) each such separate place of business shall be deemed to be a separate seller.

Service. This term includes any service rendered or supplied, otherwise than as an employee.

Unit direct cost. This term means labor and material costs which enter directly into the product. It does not include factory overhead, or indirect manufacturing expenses, administrative, general or selling expenses.

You. The pronoun you as used in this regulation indicates the person subject to the regulation.

Calculations of ceiling prices involving fractions. Fractions of a cent remaining after the total price for a quantity sold has been calculated shall be dropped if less than a half cent and increased to the nearest higher cent if a half cent or more.

[Sec. 22 amended by Amdts. 2, 6 and 7]

NOTE. The record keeping and reporting requirements of this regulation have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

TIGHE E. WOODS,
Director of Price Stabilization.
By JOSEPH L. DWYER,
Recording Secretary.

[General Overriding Regulation 5, Revision 1, Amdt. 8]

GOR 5—EXEMPTIONS AND SUSPENSIONS OF CERTAIN CONSUMER DURABLE GOODS AND RELATED COMMODITIES

EXTENSION OF EFFECTIVE DATE OF RECONTROL OF CERTAIN PARTS

Pursuant to the Defense Production Act of 1950, as amended, Executive Order 10161, and Economic Stabilization General Order No. 2, this amendment to General Overriding Regulation 5, Revision 1, is hereby issued:

STATEMENT OF CONSIDERATIONS

Amendment 7 to General Overriding Regulation 5, Revision 1, was issued October 15, 1952, revoking the earlier suspension from price controls of radio, television and phonograph parts. The action was based on information available to the agency that the suspension of parts impaired effective price controls on other products still subject to price ceilings and on radio and television repair services, selling at ceiling and not intended to be suspended from price controls. The revocation was made effective on the date of issuance. It now appears that for a variety of reasons the industry needs more time to adjust itself to the reimposition of controls. Consequently, to make sure that sellers of radio, television and phonograph parts will have ample time to make any adjustments in their operations that might be necessary to comply with the regulations now applicable, this amendment is being issued postponing the date on which controls will be reimposed to October 27, 1952.

In the formulation of this amendment, there has been consultation with industry representatives, including trade association representatives, to the extent practicable, and consideration has been given to their recommendations.

AMENDATORY PROVISIONS

General Overriding Regulation 5, Revision 1, is hereby amended in the following respects:

Section 200 is amended by changing the date in the first sentence from "October 15, 1952" to "October 27, 1952" and by inserting after the section heading and before the first sentence the following: "The application of any ceiling price regulation heretofore issued to sales of radio, television and phonograph parts and television antennae, boosters and accessories shall be suspended until October 27, 1952."

As amended, the section reads as follows:

SEC. 200. *Radio, television and phonograph parts.* The application of any ceiling price regulation heretofore issued to sales of radio, television and phonograph parts and television antennae, boosters and accessories shall be suspended until October 27, 1952. On and after October 27, 1952, regardless of any contract or other obligation, you shall not sell, and you shall not buy in the regular course of business or trade, any radio, television or phonograph part, except a cabinet, at a price exceeding its ceiling price under the regulation applicable to such part. Notwithstanding the foregoing provision, however, if the part is one which you first sold or offered for sale after August 28, 1952, you may sell it until November 15, 1952, at a price not to exceed the highest price at which you delivered it between August 29, 1952 and October 15, 1952 or, if the part was not delivered during this period, the highest price at which you offered it for delivery during this period to a purchaser of the same class. All terms used in this section have the same meaning as in the regulation which establishes your ceiling prices for radio, television and phonograph parts.

(Sec. 704, 64 Stat. 816, as amended; 50 U. S. C. App. Sup. 2154)

Effective date. This amendment is effective as of October 15, 1952.

TIGHE E. WOODS,
Director of Price Stabilization.

OCTOBER 16, 1952.

Chapter XVI—Selective Service System

[Amdt. 42]

PART 1670—RECORDS ADMINISTRATION IN FEDERAL RECORDS DEPOTS

SUPPLYING INFORMATION FROM RECORDS

The Selective Service Regulations are hereby amended as follows:

1. Subparagraphs (1), (3), and (4) of paragraph (b) of § 1670.31 are amended to read as follows:

§ 1670.31 *Supplying information to Federal agencies and officials.* * * *

(b) * * *

(1) *Veterans' Administration.* The Veterans' Administration may obtain such information upon the request of (i) the Administrator, (ii) the Deputy Administrator, (iii) the Assistant Administrator for Contact and Administrative Services, (iv) the Director of Administrative Operations Service (Washington), (v) the Director of Administrative Service, (vi) a Manager of a District Office, (vii) a Director, Claims Service, District Office, or (viii) a Manager or an Adjudication Officer of a Regional Office or Center having Regional Office activities.

* * * * *

(3) *Department of the Army.* The Department of the Army may obtain such information upon the request of (i) the Administrative Assistant to the Secretary of the Army, (ii) the Executive Officer or the Secretary-Recorder of the Army Discharge Review Board, Washington, D. C., (iii) the Assistant Secretary-Recorder of the Army Discharge Review Board, St. Louis, Missouri, (iv) the Chairman of the Army Board on Correction of Military Records, (v) the Chief, Security Group, Intelligence Division, General Staff, United States Army, (vi) Personnel of the Counter Intelligence Corps, United States Army, (vii) the Adjutant General, (viii) the Commanding Officer, Demobilized Personnel Records Branch, (ix) the Chief, Repatriation Records Branch, Office of the Quartermaster General, (x) the Chief, Personnel Branch, National Guard Bureau, (xi) the Adjutant General, Headquarters, First Army, (xii) the Executive Officer, Military Personnel Procurement Division, Headquarters, Second Army, (xiii) the Records Administrator, Headquarters, Third Army, (xiv) the Adjutant General, Headquarters, Fourth Army, (xv) the Selective Service Liaison Officer, Headquarters, Fifth Army, (xvi) the Adjutant General, Headquarters, Sixth Army, (xvii) the Adjutant General, Headquarters, Military District of Washington, (xviii) the Executive Officer, Army Finance Center, (xix) an Agent of the Criminal Investigation Division, Office of the Provost Marshal General, (xx) a Provost Marshal or an Agent of the Criminal Investigation Division of the Military District of Washington or of the First, Second, Third, Fourth, Fifth or Sixth Army, or (xxi) the Adjutant General, U. S. Army Pacific.

(4) *Department of Labor.* The Department of Labor may obtain such information upon the request of (i) the Secretary of Labor, (ii) the Director, the Liaison Officer, a Field Representative, or an Assistant Field Representative, Bureau of Veterans' Reemployment Rights, or (iii) the Director, the Medical Director, a Deputy Director, the Chief Investigator, an Investigator, or a Deputy Commissioner in Charge of a Compensation District in the Field, Bureau of Employees' Compensation.

2. Subparagraphs (14), (20), (27), (29), (33), and (38) of paragraph (b) of § 1670.32 are amended to read as follows:

§ 1670.32 *Supplying information to officials and agencies of States, the District of Columbia, Territories and possessions of the United States.* * * *

(b) * * *

(14) *State of Illinois.* The officials of the State of Illinois and its subdivisions authorized to obtain such information are (i) the Adjutant General, (ii) the Commissioner of Placement and Unemployment Compensation, (iii) the Director, the Deputy Directors, and the Secretary, Illinois Service Recognition Board, (iv) the Administrator and the Assistant Administrators, Illinois Veterans' Commission, (v) the Director, the Assistant Director, and the Superintendent and the Assistant Superintendent of the Division of Veterans' Service, Department of Public Welfare, (vi) the Director and the Assistant Director, Department of Public Safety, (vii) the Executive Secretary and the County Superintendents, Public Aid Commission, (viii) the Chief Probation Officer, Adult Probation Department, Cook County, (ix) the Director, the Supervisor of the Central Administrative Office, and the District Office Supervisors, Cook County Bureau of Public Welfare, (x) the Commissioners, Chicago Welfare Commission, and (xi) the Chief and the Assistant Chief, Bureau of Missing Persons, Chicago Police Department.

* * * * *

(20) *State of Maine.* The officials of the State of Maine authorized to obtain such information are (i) the Adjutant General, (ii) the Chairman, Unemployment Compensation Commission, (iii) the State Director and the Administrator, Veterans' Assistance Program, (iv) the Attorney General and the Assistant Attorneys General, and (v) the Director of the Division of General Relief, Department of Health and Welfare.

* * * * *

(27) *State of Montana.* The officials of the State of Montana authorized to obtain such information are (i) the Adjutant General, (ii) the Chairman and the Deputy Chairman, Unemployment Compensation Commission, (iii) the State Service Officer and Service Officers, Veterans' Welfare Commission, (iv) the Director, the Supervisor of Guidance Training, and Placement and Rehabilitation Agents, Bureau of Vocational Rehabilitation, (v) the Director of the Department of Public Welfare, and (vi) the Director, the Attorney, the Chief of Claims, the Chief of Next-of-Kin Section, the Chief of the Regular Claims Section, and the Chief Auditor, Adjusted Compensation Division.

* * * * *

(29) *State of Nevada.* The officials of the State of Nevada authorized to obtain such information are (i) the Adjutant General, (ii) the Executive Director, Employment Security Department, and (iii) the State Director for Welfare, State Welfare Department.

* * * * *

(33) *State of New York.* The officials of the State of New York and its subdivisions authorized to obtain such information are (i) the Adjutant General, (ii) the Assistant Adjutant General, (iii) the Executive Officer of the Adjutant General's Office, (iv) the Executive Director and the Chief Investigator, Division of Placement and Unemployment Insurance, (v) the Commissioner and the Parole District Supervisors, Division of Parole, (vi) the State Director, the Deputy State Director, the Director of Research Training, the Counsel to the Division, the Special Counsel, New York City, the Area Veteran Director, Albany, the Area Veteran Director, Buffalo, and the Area Veteran Director, New York City, Division of Veterans' Affairs, (vii) the Director, Bureau of Research, Division of Housing, (viii) the Chief Inspector, Division of State Police, (ix) the Deputy Commissioner in Charge of the Division of the Treasury and the Bonus Claims Administrative Supervisor, Division of the Treasury, Department of Taxation and Finance, (x) the Deputy Commissioner for Welfare and Medical Care, Department of Social Welfare, (xi) the Assistant Commissioner, Department of Mental Hygiene, (xii) the First Deputy Industrial Commissioner and the Associate Personnel Administrator, Department of Labor, (xiii) the Senior Civil Service Investigator, State Civil Service Commission, (xiv) the County Commissioners of Welfare and the Deputy County Commissioners of Welfare, Department of Public Welfare, (xv) the Commissioners and the Investigators, New York State Crime Commission, (xvi) the Commissioner, the Deputy Commissioner, the Assistant Commissioners, and the District Health Officers, Department of Health, (xvii) the District Attorney, New York County, (xviii) the Chief Investigator and the Investigators, Office of the District Attorney, New York County, (xix) the District Attorney and the Chief Assistant to the District Attorney, Queens County, (xx) the Investigator, Abandonment Bureau, Office of the District Attorney, Queens County, (xxi) the District Attorney, the Assistant District Attorney in Charge of the Homicide Division, and the Assistant District Attorney in Charge of Abandonments, Kings County, (xxii) the Acting Chief Clerk, Office of the District Attorney, Kings County, (xxiii) the District Attorney, Bronx County, (xxiv) the District Attorney, Richmond County, (xxv) the Deputy Directors, the Assistant Deputy Directors, the Director of the Bureau of Child Welfare, the Assistant Director of the Division of Children's Placement Service, the Director of the Division of Foster Home Care, the Director of the Division of Day Care, and the Director of the Department of Welfare Youth Board Project, New York City Department of Welfare, (xxvi) the Commissioner, New York City Department of Hospitals, (xxvii) the Corporation Counsel, the Acting Corporation Counsel, and the Chief Clerk, New York City Department of Law, (xxviii) the Special Assistant Corporation Counsel In Charge, and the Chief Examiner of the City of New York Law Department, Torts-Trial Division, New York City Transit System, (xxix) the Chief, Bureau of Investigation, New York City Civil Service Commission, (xxx) the Chief Inspector, the Chief of Detectives, and the Commanding Officer of the Police Academy, New York City Police Department, (xxxi) the Executive Director of Veterans' Activities, Manhattan, and the Executive Director of Veterans' Activities, Brooklyn, New York City Veterans' Service Centers, and (xxxii) the Chief of Personnel, New York City Housing Authority.

* * * * *

(38) *State of Oregon.* The officials of the State of Oregon authorized to obtain such information are (i) the Adjutant General, (ii) the Assistant Adjutant General, (iii) the Executive Officer, the Personnel Adjutant, and the Assistant

Personnel Adjutant of the Military Department, (iv) the Administrator, Unemployment Compensation Commission, (v) the Director, State Department of Veterans' Affairs, and (vi) the Supervisor, the Attorney, the Chief of Claims, the Chief of the Next-of-Kin Section, the Chief of the Irregular Claims Section, and the Chief Auditor, Bonus Division, State Department of Veterans' Affairs.

(Secs. 6, 7, 61 Stat. 32; sec. 10, 62 Stat. 618, as amended; 50 U. S. C. App. 326, 327, 460)

The foregoing amendment to the Selective Service Regulations shall be effective immediately upon the filing hereof with the Division of the Federal Register.

[SEAL] LEWIS B. HERSHEY,
Director of Selective Service.

OCTOBER 10, 1952.

[F. R. Doc. 52-11269; Filed, Oct. 16, 1952; 8:48 a. m.]

TITLE 50—WILDLIFE

Chapter I—Fish and Wildlife Service, Department of the Interior

Subchapter F—Alaska Commercial Fisheries

PART 116—SOUTHEASTERN ALASKA AREA FISHERIES OTHER THAN SALMON

OPENING DATE; EXCEPTIONS

Basis and purpose. On the basis of information developed by field representatives of the Fish and Wildlife Service and to test the availability of herring for a winter fishery in the extreme southern portion of Southeastern Alaska, it has been determined that a limited season in that area will not endanger the stocks.

As the following regulation is a relaxation of existing regulations applicable to herring fishing in Alaska (regulations for the protection of the commercial fisheries of Alaska), notice and public procedure thereon are not required (60 Stat. 237; 5 U. S. C. 1001, et seq.).

Therefore, effective immediately, Part 116—Southeastern Alaska Area Fisheries Other Than Salmon, is amended in text in § 116.3 *Opening date; exceptions*, by adding the following proviso to the first sentence: "*Provided*, That no quota herring shall be taken from the waters of Tongass Narrows.", and by adding the following sentence at the end of the text: "These restrictions shall not apply south of 55 degrees north latitude in the period from October 15 to February 28, inclusive."

(Sec. 1, 43 Stat. 464, as amended; 48 U. S. C. 221)

J. L. KASK,
Acting Director.

OCTOBER 13, 1952.

[F. R. Doc. 52-11253; Filed, Oct. 16, 1952; 8:45 a. m.]

PROPOSED RULE MAKING

DEPARTMENT OF AGRICULTURE

Production and Marketing Administration

[7 CFR Part 29]

OFFICIAL STANDARD GRADES FOR BURLEY TOBACCO

NOTICE OF PROPOSED RULE MAKING

Notice is hereby given that the United States Department of Agriculture is considering the revision, as herein proposed, of the Official Standard Grades for Burley Tobacco, pursuant to the authority contained in The Tobacco Inspection Act, approved August 23, 1935 (49 Stat. 732; 7 U. S. C. 511 et seq.). This revision, if made effective, will supersede the present standard grades for Burley tobacco promulgated on November 25, 1936 (1 F. R. 2040) and amended January 18, 1938 (3 F. R. 189).

All persons who desire to submit written data, views, or arguments for consideration in connection with the proposed revision should file same, in duplicate, with the Chief, Standards and Technical Research Division, Tobacco Branch, Production and Marketing Administration, United States Department of Agriculture, Washington 25, D. C., not later than 10 days after publication hereof in the FEDERAL REGISTER.

The proposed revision is as follows:

OFFICIAL STANDARD GRADES FOR BURLEY TOBACCO (U. S. TYPE 31)

LEAF GRADES (B-GROUP)

§ 29.401 *General specifications.* All grades of the B group must be clean, sound, medium to heavy body, and must not exceed the tolerances specified with respect to waste and other injury. General tolerance, 20 percent undersized leaves.

GRADE DESCRIPTION, SPECIFICATIONS, AND TOLERANCES

U. S. Grade	
B1F	Choice Quality Leaf in Tan Color. Very smooth, very good texture, oily, ripe, firm, medium to fairly fleshly body, strong, fairly spready, open weave, light color shade, very clear finish, blending fibers, uniform, over 20" long. Tolerance, 5 percent injury.
B1R	Choice Quality Leaf in Red Color. Very oily, fairly fleshly to heavy body, otherwise same as B1F.
B2F	Fine Quality Leaf in Tan Color. Smooth, good texture, oily, ripe, firm, medium to fairly fleshy body, strong, normal width, open weave, fairly light color shade, clear finish, emerging fibers, harmonizing, over 20" long. Tolerance 10 percent injury.
B2R	Fine Quality Leaf in Red Color. Very oily, fairly fleshy to heavy body, otherwise same as B2F.
B3F	Good Quality Leaf in Tan Color. Fairly smooth, fair texture, oily, ripe, firm, medium to fairly fleshy body, fairly strong, normal width, fairly open weave, true color shade, fairly clear finish, similar, over 18" long. Tolerance, 15 percent injury.
B3R	Good Quality Leaf in Red Color. Very oily, fairly fleshy to heavy body, otherwise same as B3F.
B3M	Good Quality Mixed Leaf. Average quality of B3 or better.
B3G	Good Quality Green Leaf. Quality of B3, except oil, maturity, and porosity.
B4F	Fair Quality Leaf in Tan Color. Unrough, fairly oily, fairly ripe, fairly firm, medium to fairly fleshy body, normal strength, not stringy, fairly true color shade, dull finish, unmixed, over 15" long. Tolerance, 20 percent total injury of which not over 5 percent may be waste or other badly injured tobacco.
B4R	Fair Quality Leaf in Red Color. Oily, fairly fleshy to heavy body, otherwise same as B4F.

GRADE DESCRIPTION, SPECIFICATIONS, AND TOLERANCES—continued

U. S. Grade	
B4D	Fair Quality Leaf in Dun or Dull Red Color. Medium to heavy body, dusky color shade, otherwise quality of B4F.
B4M	Fair Quality Mixed Leaf. Average Quality of B4.
B4G	Fair Quality Green Leaf. Quality of B4, except oil and maturity.
B5F	Low Quality Leaf in Tan Color. Fairly ripe, medium to fairly fleshy body, not tender, dusky color shade, cloudy to dingy finish, unmixed, over 16" long. Tolerance, 30 percent total injury of which not over 10 percent may be waste or other badly injured tobacco.
B5R	Low Quality Leaf in Red Color. Fairly fleshy to heavy body, otherwise same as B5F.
B5D	Low Quality Leaf in Dun or Dull Red Color. Medium to heavy body, otherwise quality of B5F.
B5M	Low Quality Mixed Leaf. Average quality of B5.
B5G	Low Quality Green Leaf. Quality of B5, except maturity.

LUGS OR CUTTERS (C-GROUP)

§ 29.402 *General specifications.* All grades of the C group must be clean, sound, thin to medium body, lean to low in oil, and must not exceed the tolerances specified with respect to waste and other injury. General tolerance, 20 percent undersized leaves.

GRADE DESCRIPTION, SPECIFICATIONS, AND TOLERANCES

U. S. Grade	
C1L	Choice Quality Cutters in Straw Color. Silky, fine texture, lean, very ripe, firm, thin body, strong, broad, very open weave, very light color shade, very bright finish, blending fibers, uniform, over 20" long. Tolerance, 5 percent injury.
C1F	Choice Quality Cutters in Tan Color. Fairly lean, fairly thin to medium body, otherwise same as C1L.

GRADE DESCRIPTION, SPECIFICATIONS, AND TOLERANCES—continued

U. S. Grade	
C2L	Fine Quality Cutters in Straw Color. Very smooth, very good texture, lean, very ripe, firm, thin body, fairly strong, spready, open weave, light color shade, very clear finish, blending fibers, harmonizing, over 20" long. Tolerance, 10 percent injury.
C2F	Fine Quality Cutters in Tan Color. Fairly lean, fairly thin to medium body, otherwise same as C2L.
C3L	Good Quality Cutters in Straw Color. Smooth, good texture, lean, very ripe, fairly firm, thin body, normal strength, fairly spready, open weave, fairly light color shade, clear finish, emerging fibers, similar, over 18" long. Tolerance, 15 percent injury.
C3F	Good Quality Cutters in Tan Color. Fairly lean, fairly thin to medium body, otherwise same as C3L.
C3R	Good Quality Cutters in Red Color. Low in oil, fairly thin to medium body, otherwise same as C3L.
C4L	Fair Quality Cutters in Straw Color. Fairly smooth, fair texture, lean, ripe, not flimsy, thin body, normal strength, normal width, fairly open weave, true color shade, fairly clear finish, unmixed. Tolerance, 20 percent total injury of which not over 5 percent may be waste or other badly injured tobacco.
C4F	Fair Quality Cutters in Tan Color. Fairly lean, fairly thin to medium body, otherwise same as C4L.
C4R	Fair Quality Cutters in Red Color. Low in oil, fairly thin to medium body, otherwise same as C4L.
C4M	Fair Quality Mixed Cutters. Average quality of C4 or better.
C4G	Fair Quality Green Cutters. Quality of C4, except maturity and porosity.
C5L	Low Quality Cutters in Straw Color. Unrough, lean, fairly ripe, not flimsy, thin body, not weak or narrow, fairly open weave, fairly true color shade, dull to cloudy finish, unmixed. Tolerance, 30 percent total injury of which not over 10 percent may be waste or other badly injured tobacco.
C5F	Low Quality Cutters in Tan Color. Fairly lean, fairly thin to medium body, otherwise same as C5L.
C5R	Low Quality Cutters in Red Color. Low in oil, fairly thin to medium body, otherwise same as C5L.
C5M	Low Quality Mixed Cutters. Average quality of C5 or better.
C5G	Low Quality Green Cutters. Quality of C5, except maturity and porosity.

GRANULATORS OR FLYINGS (X-GROUP)

§ 29.403 *General specifications.* All grades of the X group must be clean, sound, tissuey to fairly thin body, porous, very lean and low in oil, and must not exceed the tolerances specified with respect to waste.

GRADE DESCRIPTION, SPECIFICATIONS, AND TOLERANCES

U. S. Grade	
X1L	Choice Quality Flyings in Straw Color. Smooth, very lean, mellow, fairly firm, tissuey body, not weak, normal width, very open weave, pale color shade, clear finish, blending fibers, harmonizing. Tolerance, 5 percent waste.

GRADE DESCRIPTION, SPECIFICATIONS, AND TOLERANCES—continued

U. S. Grade	
X1F	Choice Quality Flyings in Tan Color. Lean, very thin body, otherwise same as X1L.
X2L	Fine Quality Flyings in Straw Color. Smooth, very lean, mellow, not flimsy, tissuey body, not weak or narrow, open weave, light color shade, fairly clear finish, emerging fibers, similar. Tolerance, 10 percent waste.
X2F	Fine Quality Flyings in Tan Color. Lean, very thin body, otherwise same as X2L.
X3L	Good Quality Flyings in Straw Color. Fairly smooth, very lean, ripe to mellow, not flimsy, tissuey body, not tender or stringy, porous, true color shade, dull finish, unmingled. Tolerance, 20 percent waste.
X3F	Good Quality Flyings in Tan Color. Lean, very thin body, otherwise same as X3L.
X3R	Good Quality Flyings in Red Color. Fairly lean, fairly thin body, otherwise same as X3L.
X4L	Fair Quality Flyings in Straw Color. Unrough, very lean, fairly ripe to mellow, tissuey body, very porous, fairly dusky color shade, cloudy finish, unmixed. Tolerance, 30 percent waste.
X4F	Fair Quality Flyings in Tan Color. Lean, very thin body, otherwise same as X4L.
X4R	Fair Quality Flyings in Red Color. Fairly lean, fairly thin body, otherwise same as X4L.
X4M	Fair Quality Mixed Flyings. Average quality of X4 or better.
X4G	Fair Quality Green Flyings. Quality of X4, except maturity and porosity.
X5L	Low Quality Flyings in Straw Color. Very lean, fairly ripe to overripe, tissuey body, very porous, dusky color shade, dingy finish, unmixed. Tolerance, 40 percent waste.
X5F	Low Quality Flyings in Tan Color. Lean, very thin body, otherwise same as X5L.
X5R	Low Quality Flyings in Red Color. Fairly lean, fairly thin body, otherwise same as X5L.
X5M	Low Quality Mixed Flyings. Average quality of X5.
X5G	Low Quality Green Flyings. Quality of X5, except maturity and porosity.

MIXED GROUP GRADES (M-GROUP)

§ 29.404 *General specifications.* All grades of the M group must be clean and sound. The specifications for the M group grades shall apply in relation to the type as a whole and in the sense that "general color" and "general quality" are defined. Thus, "tobacco having the general quality of C3 or better," may include, in case of a relatively thin crop, tobacco which would grade B2F if separated from the general mixture. Based on the general quality and color of the type, the F colored grades shall consist chiefly of tobacco which is relatively very thin to medium in body and relatively light or tannish in color, and the R colored grades shall consist chiefly of tobacco which is relatively medium to heavy in body and relatively dark or reddish in color. General tolerance, 20 percent of light thin green in the F colored grades and 20 percent of green in the R colored grades.

GRADE DESCRIPTION AND SPECIFICATIONS

U. S. Grade	
M3F	Good Quality Mixed Group of Relatively Light General Color. Shall consist chiefly of tobacco having the general quality of C3, X3, or better, and the minor portion shall consist of tobacco having the general quality of B3, T3, or better.
M3R	Good Quality Mixed Group of Relatively Dark General Color. Shall consist chiefly of tobacco having the general quality of B3, T3, or better, and the minor portion shall consist of tobacco having the general quality of C3, X3, or better.
M4F	Fair Quality Mixed Group of Relatively Light General Color. Shall consist chiefly of tobacco having the general quality of C4, X4, or better, and the minor portion shall consist of tobacco having the general quality of B4, T4, or better.
M4R	Fair Quality Mixed Group of Relatively Dark General Color. Shall consist chiefly of tobacco having the general quality of B4, T4, or better, and the minor portion shall consist of tobacco having the general quality of C4, X4, or better.
M5F	Low Quality Mixed Group of Relatively Light General Color. Shall consist chiefly of tobacco having the general quality of C5, X5, or better, and the minor portion shall consist of tobacco having the general quality of B5, T5, or better.
M5R	Low Quality Mixed Group of Relatively Dark General Color. Shall consist chiefly of tobacco having the general quality of B5, T5, or better, and the minor portion shall consist of tobacco having the general quality of C5, X5, or better.

SPECIAL GROUPS (N, W, AND S GROUPS); SPECIFICATIONS

§ 29.405 *U. S. Grade N.* Nondescript, as defined in this part.

§ 29.406 *U. S. Grade W.* Web or Strip Blend, as defined in this part.

§ 29.407 *U. S. Grade S.* Scrap, as defined in this part.

DEFINITIONS

§ 29.408 *Terms defined.* For the purposes of §§ 29.401 to 29.495, the terms appearing in §§ 29.409 to 29.481 shall be construed as explained therein.

§ 29.409 *Aircured.* Tobacco cured under natural atmospheric conditions without the use of fire, except for the purpose of preventing pole-burn in damp weather. Subjecting tobacco to excessive artificial heat in the curing process influences its physical characteristics and chemical composition to such an extent that it cannot be designated as a true aircured tobacco. Burley tobacco which has been subjected to excessive heat in the curing process is classified as an "offtype" of Burley.

§ 29.410 *Airdried.* The condition of unfermented tobacco as customarily prepared for storage under natural atmospheric conditions.

§ 29.411 *Body.* The thickness and density of leaf or weight per unit of surface.

§ 29.412 *Botched.* The grade of any tobacco, not defined as nested or offtype,

which does not reasonably conform to the common and accepted practices of preparing tobacco for market in the type district, including: (a) Extreme mixtures which cannot be classified in the grades of the M group, such as very poor quality or nondescript tobacco intermingled with good quality tobacco, badly injured tobacco intermingled with tobacco which is not materially injured, mixed group tobacco which contains green in excess of the tolerances specified, et cetera; (b) tobacco which clearly and obviously contains an abnormal quantity of foreign matter such as strings, rubber bands, sand, muddy or extremely dirty leaves; (c) tobacco prepared in a disorderly or tangled manner, such as not being packed reasonably straight in layers or flakes with the butts of the leaves or the heads of the bundles in the same direction; and (d) tobacco tied with abnormally large or long heads so that it cannot be properly redried in the customary manner.

§ 29.413 *Chief.* The Chief of the Standards and Technical Research Division, Tobacco Branch, Production and Marketing Administration.

§ 29.414 *Class.* A major division of tobacco based on characteristics caused by varieties, soils, and climatic conditions, and the method of cultivation, harvesting, and curing.

§ 29.415 *Clean.* Normally free of dirt and other foreign matter.

§ 29.416 *Color.* A subdivision of a group based on the relative hues, saturations, and brilliances common to the group and on certain elements of quality, such as body and maturity, which are closely related to color.

§ 29.417 *Condition.* The state of tobacco in storage, or in relation to its preparation for storage, with reference to its manner or preparation or its degree of fermentation, such as Undried, Airdried, Steamdried (Redried), Sweating, Sweated, and Resweated.

§ 29.418 *Crude.* (a) Any very immature leaf of which one-fifth or more of its surface has a positive green color; or (b) any lot of tobacco containing 30 percent or more crude leaves.

§ 29.419 *Cured.* Tobacco thoroughly dried of its sap by either natural or artificial processes.

§ 29.420 *Cutters or Lugs (C).* A group of tobacco which, compared with the general characteristics of the type, is relatively lean to low in oil, thin to medium body, and spready; which has an open weave and a very light to fairly true color shade; which has sufficient tensile strength and solidity to be stemable into whole strips; and which is not injured sufficiently to materially reduce the strip yield.

§ 29.421 *Damaged.* The effect of mold, must, rot, black-rot, or other fungous or bacterial diseases which attack tobacco in its cured state, including tobacco having the odor of mold, must, or rot.

§ 29.422 *Decayed.* Any tobacco which is damaged to the extent of 20 percent or more.

§ 29.423 *Dun or Dull Red (D).* Tobacco which is chiefly composed of leaves having a very dull or dingy finish and a very dusky or dark shade of brown color and which is not crude, green, or mixed.

§ 29.424 *Flyings or Granulators (X).* A group of tobacco which, compared with the general characteristics of the type, is relatively nonelastic, very lean or low in oil, tissuey to fairly thin in body and which has a very open to porous weave, a pale to dusky color shade, and low tensile strength and solidity. Flyings normally do not have sufficient strength, body, or solidity, or contain too much injury and waste to be stemable into whole strips.

§ 29.425 *Foreign matter.* Any substance or material extraneous to tobacco, including dirt, sand, stalks, suckers, straw, strings, et cetera.

§ 29.426 *Form.* The stage of preparation of tobacco, such as Unstemmed and Stemmed.

§ 29.427 *General color.* The color of any tobacco considered in relation to a type as a whole as distinguished from the restricted use of the term "color" as a subdivision of a group. General colors are basically related to body and other over-all characteristics of the type.

§ 29.428 *General quality.* The quality of any tobacco considered in relation to a type as a whole as distinguished from the restricted use of the term "quality" as a subdivision of a group. The group divisions of a type are based upon certain quality characteristics of the type as a whole, while the restricted use of quality as a subdivision of a group is limited to the relative qualities appearing in a particular group.

§ 29.429 *Grade.* A subdivision of a type according to group and quality, and according to color when it is of sufficient importance to be treated as a separate factor.

§ 29.430 *Green (G).* (a) Any leaf of which one-fifth or more of its surface is predominantly green in color; or (b) any lot of tobacco containing 20 percent or more green leaves; or (c) any lot of tobacco which is not crude but which contains 20 percent of green and crude combined.

§ 29.431 *Greenish (V).* (a) Any leaf of which one-fifth or more of its surface has a decided greenish tinge or cast; or (b) any lot of tobacco containing 30 percent or more greenish leaves; or (c) any lot of tobacco which is not green but which contains 30 percent of green and greenish leaves combined.

§ 29.432 *Group.* A division of a type covering several closely related grades based on the general quality of the tobacco, including body, the percentage of injury, and other characteristics.

§ 29.433 *Injury.* Hurt or impairment from any cause except damage. Injured tobacco shall include dead, burnt, hail-cut, or ragged tobacco; or tobacco that has been torn or broken, frozen or frosted, sunburned or scalded, scorched or fire-killed, bulk-burnt or steam-burnt, pole-burnt or house-burnt, bleached or bruised; or tobacco containing deformed leaves; or tobacco hurt by insects; or tobacco affected by wild-fire, rust, frog-eye, mosaic, frenching, sand-drown, or other similar diseases.

§ 29.434 *Leaf (B).* A group of tobacco which, compared with the general characteristics of the type, is relatively medium to very heavy in body. Leaf is basically characterized by a medium to very heavy body as compared with Cutters (Lugs) and Flyings. Three kinds of leaf are generally recognized, namely: Smoking-leaf, Heavy-leaf, and Tips.

§ 29.435 *Leaf-scrap.* Unstemmed scrap, which is a by-product from handling unstemmed tobacco consisting of loose and tangled whole or broken leaves.

§ 29.436 *Lot.* A pile, basket, bulk, bale, case, hogshead, tierce, or other definite unit.

§ 29.437 *Major.* The principal or leading kind of tobacco of which a lot consists; or the kind of tobacco which constitutes the largest percentage of a lot.

§ 29.438 *Mixed (M-color).* A moderate mixture of fairly closely related grades, including: (a) Any tobacco of the same group of which 30 percent or more is distinctly different in quality or color, or (b) any tobacco of which the major or principal kind is of one group but which contains 30 percent or more tobacco of a closely related group which is not distinctly different in general quality or color.

§ 29.439 *Mixed group (M-group).* Any extreme mixture, not defined as nondescript, containing tobacco of two or more distinctly different groups, including: (a) Any lot of tobacco which has not been sorted (graded) in the customary and commonly accepted manner and which consists of tobacco of two or more distinctly different groups, or (b) any lot containing tobacco which is extremely different in body, general quality, or general color.

§ 29.440 *Nested.* The grade of any tobacco which has been loaded, packed, or arranged in such a manner as to conceal foreign matter or tobacco of inferior grade, quality, or condition. Specifically, the grade "Nested" shall include: (a) Any lot of tobacco which contains damaged, injured, tangled, or other inferior tobacco, or an abnormal quantity of sand or other foreign matter, which cannot be readily detected upon inspection due to the way the lot is packed or arranged; (b) any lot of tied tobacco which contains foreign matter in the inner portions of the hands, or which contains foreign matter in the heads under the tie leaves; (c) any lot of tied tobacco in which the leaves on the outside of the hands are so placed or arranged as to conceal from view relatively inferior quality leaves on the inside of the hands, or which contains wet tobacco or tobacco of relatively lower quality in the heads under the tie leaves; (d) any lot of tobacco consisting of distinctly different grades, qualities, or conditions which is stacked or arranged in layers with the same kinds together so that the tobacco in the lower layer or layers is distinctly inferior in grade, quality, or condition from the tobacco in the top or upper layers.

§ 29.441 *Nondescript (N).* Except as may be designated by a special factor, nondescript shall include: (a) Any tobacco which does not meet the minimum specifications of the lowest grade of any other group; (b) any wet, semicured, or unsound tobacco; (c) any tobacco which has wasted or contains waste to the extent of 40 percent or more; or (d) any tobacco defined as botched, crude, decayed, offtype, or nested.

§ 29.442 *Offtype.* The grade of any tobacco which cannot be properly classified in any other grade of the type due to its distinctly different characteristics; or any tobacco which for any reason is distinctly foreign to the grades of an established type. Specifically, the grade "Offtype" shall cover any kind of tobacco which is not ordinarily sold on the markets at which it is offered for inspection and shall include any smutty or smoked tobacco, tobacco containing or showing the residue from insecticides, tobacco having the odor of insecticides or any odor foreign to the type, or tobacco showing the effects of excessive heat (coking), smoke, or fumes from open fires.

§ 29.443 *Order (case).* The state of tobacco with respect to its moisture content.

§ 29.444 *Package.* A hogshead, tierce, case, bale, or other securely enclosed parcel or bundle.

§ 29.445 *Packing.* A lot of tobacco consisting of a certain number of packages submitted for sampling or inspection as one definite unit and represented to contain the same grade and kind of tobacco and having a common identification number or mark on each package.

§ 29.446 *Quality.* A division of group, forming the second factor of a grade, based upon the relative degree of one or more of the elements of quality in tobacco, construed in relation to a specific group as a whole.

§ 29.447 *Raw.* Freshly harvested tobacco, or tobacco as it appears between the time of harvesting and the beginning of the curing process.

§ 29.448 *Resweated.* The condition of tobacco which has passed through a second fermentation under abnormally high temperatures, or refermented with a relatively high percentage of moisture, including tobacco which has been dipped or reconditioned after its first fermentation and put through a forced or artificial sweat.

§ 29.449 *Scrap.* A by-product from handling tobacco in both the unstemmed and stemmed forms, consisting chiefly of loose, untied, and unstemmed leaves or the web portions of leaves, which accumulate in warehouses, packing and conditioning plants, and stemmeries; or tobacco which has been reduced to scrap by any process.

§ 29.450 *Semicured.* Tobacco in the process of being cured, or tobacco which is partially, but not thoroughly cured, including tobacco which contains fat-stems, wet-butts, swell-stems, or stems which have not been thoroughly dried in the curing process.

§ 29.451 *Side.* Any distinct characteristic of tobacco; or a certain phase of quality, color, or length as compared with some other phase of quality, color, or length.

§ 29.452 *Smoking-leaf (H).* A subgroup of Leaf: Composed of relatively thin, non-elastic, very ripe, grainy, and porous leaves; being relatively low in oil; and characterized by a somewhat duller finish than the corresponding colors of the leaf group.

§ 29.453 *Sound.* Free of damage.

§ 29.454 *Special Factor.* A symbol or term authorized to be used with specified grades to designate a certain side or characteristic of importance, varying from or not covered by the specifications of the grades.

§ 29.455 *Steamdried.* The condition of unfermented tobacco as customarily prepared for storage by means of a redrying machine or other steam-conditioning equipment.

§ 29.456 *Stem.* A midrib of a tobacco leaf.

§ 29.457 *Stemmed.* A form of tobacco from which the stems or midribs have been removed, which may consist of either strips or web-scrap.

§ 29.458 *Stems.* A tobacco byproduct composed of the midribs of tobacco leaves.

§ 29.459 *Strips.* (a) The two whole sides of a tobacco leaf from which the stem has been removed; or (b) a lot of tobacco composed of strips.

§ 29.460 *Subgrade.* Any grade modified by a special factor or subgroup symbol.

§ 29.461 *Subgroup.* A group formed by the substitution of a different group symbol to denote a modification of the specifications or to indicate a certain side or characteristic of the tobacco.

§ 29.462 *Sweated.* The condition of tobacco which has passed through one or more fermentations natural to tobacco packed with a normal percentage of moisture.

§ 29.463 *Sweating.* The condition of tobacco in the process of fermentation.

§ 29.464 *Tips (T).* A subgroup of Leaf tobacco of which 20 percent or more of its leaves are under 16" in length. Tips normally consist of relatively narrow, sharp pointed, and heavy bodied leaves, under 16" long, which grow on the top or upper part of the plant but may consist of any short leaf tobacco having the characteristics of tips.

§ 29.465 *Tobacco.* Tobacco as it appears between the time it is cured and stripped from the stalk, or primed and cured, and the time it enters into the different manufacturing processes. The acts of stemming, sweating, and conditioning are not regarded as manufacturing processes. Tobacco, as used in this part, does not include any raw tobacco or manufactured products.

§ 29.466 *Tobacco products.* Products manufactured from tobacco which are subject to internal revenue taxes, including: Cigarettes, cigars, and smoking, chewing, and snuff tobaccos.

§ 29.467 *Type.* A division of a class of tobacco having certain common characteristics and closely related grades. Tobacco which has the same characteristics and corresponding qualities, colors, and lengths, shall be treated as one type, regardless of any factors of historical or geographical nature which cannot be determined by an examination of the tobacco.

§ 29.468 *Type 31.* That type of Light Aircured Tobacco, U. S. Class 3a, commonly known as Burley or Burley Aircured, and produced principally in Kentucky, southern Ohio and Indiana, western West Virginia, central and eastern Tennessee, and sections of Virginia, North Carolina, and Missouri, including any Burley which is not a true aircured tobacco, such as the "Offtype" grade of Burley tobacco.

§ 29.469 *Under-size.* Tobacco which is shorter than the minimum size established for a particular group or grade of a type.

§ 29.470 *Undried.* The condition of unfermented tobacco which has not been airdried or steamdried.

§ 29.471 *Uniformity.* One of the elements of quality in tobacco having reference to the consistency of a lot of tobacco, as ordinarily sorted and prepared for market, with respect to other elements of quality or color. The following are the specifications for the several degrees of uniformity showing for each degree the percentage of a lot that may contain a minor portion of a closely related group, or tobacco of the same group which is distinctly different in quality or color from the major or principal kind of which a lot consists: (a) Alike or very uniform, less than 5 percent; (b) Uniform, less than 10 percent; (c) Harmonizing or fairly uniform, less than 15 percent; (d) Similar, less than 20 percent; (e) Unmingled, less than 25 percent; (f) Unmixed, less than 30 percent; and (g) Mixed, 30 percent or more. Mixed group tobacco shall be construed as not having any degree of uniformity.

§ 29.472 *Unsound (U).* Damaged under 20 percent.

§ 29.473 *Unstemmed.* A form of tobacco from which the stems or midribs have not been removed, including both whole-leaf and leaf-scrap.

§ 29.474 *Variegated (K).* Having a diversity of contrasting colors or tints, other than green, within a leaf; or leaves which are in part distinctly mottled, bleached, or stained; or leaves which in part have been badly discolored in the curing process; or leaves which do not blend with the normal colors of straw, tan, red, or dull red established for the type. Any lot of tobacco containing 30 percent or more of such leaves is classified as variegated.

§ 29.475 *Waste.* That portion or portions of the web of tobacco leaves which has been lost or rendered unserviceable for use in tobacco products, including:

(a) Portions which have decomposed or largely decomposed by field diseases, field firing, pole-burning, or bulk-burning; and (b) portions which are dead, lifeless, and do not have sufficient strength or stability to hold together in the normal manufacturing process or due to excessive injury of any kind.

§ 29.476 *Web.* (a) That portion of a tobacco leaf expanded from the midrib, as distinguished from the stem or midrib, or that portion of a tobacco leaf from which the midrib has been removed; or (b) a lot of tobacco consisting of the web of tobacco leaves, or any unmanufactured tobacco, except scrap, which does not contain stems.

§ 29.477 *Web or Strip Blend (W).* A group of tobacco consisting of the web or strips of closely related grades which have been systematically and uniformly blended together in the stemming process.

§ 29.478 *Web-scrap.* Stemmed scrap or stemless scrap which is a byproduct from stemming tobacco or handling strips, consisting chiefly of portions of strips; or a lot of tobacco from which the stems have been removed by thrashing or other means which breaks the web or sides of the leaves into small pieces.

§ 29.479 *Web-yield.* The weight of clean web which is normally serviceable and useable in reputable tobacco products expressed as the percent of the original unstemmed weight.

§ 29.480 *Wet (W).* Any sound tobacco containing excessive moisture to the extent that it is in an unsafe or doubtful keeping state for the condition or purpose the tobacco is to be used, handled, or stored. Wet shall apply to any semicured or other tobacco which is not damaged, but which is likely to damage on account of excessive moisture if treated in the customary manner or unless unusual precaution is taken.

§ 29.481 *Yield.* The potential quantity or percentage of a given product which can be produced, per unit, from a lot or packing of tobacco.

RULES

§ 29.482 *Rules.* The application of §§ 29.401 to 29.481 shall be in accordance with the rules appearing in §§ 29.483 to 29.495.

§ 29.483 *Rule 1.* Each grade shall be treated as a subdivision of a particular type and when the grade is stated in an inspection certificate, the type shall also be stated.

§ 29.484 *Rule 2.* The determination of grade shall be based upon a thorough examination of a lot of tobacco or an official sample of the lot.

§ 29.485 *Rule 3.* In determining the grade of a lot of tobacco, the lot as a whole shall be considered, and minor irregularities which do not affect over one percent of the tobacco shall be overlooked.

§ 29.486 *Rule 4.* In drawing an official sample from a hogshead or other package of tobacco, three or more breaks shall be made at such points and in such manner as the inspector or sampler may find necessary to determine the kinds of tobacco and the percentage of each kind contained in the lot. One break shall be made not more than 12 inches from the top of the package and one, not more than 12 inches from the bottom of the package and all breaks shall be made so that the tobacco contained in the center of the package is visible to the sampler. Tobacco shall be drawn from at least three of the breaks so made and, from these draws, a representative sample of not less than six hands shall be selected. The sample shall include tobacco of each different quality, color, length, and kind found in the lot in proportion to the quantities of each contained in the lot.

§ 29.487 *Rule 5.* Tobacco damaged under 20 percent shall be classed as unsound and treated as a subgrade by placing the special factor letter "U" after the grade mark. For example: A lot of unsound tobacco which otherwise meets the specifications of B4F shall be graded B4F–U.

§ 29.488 *Rule 6.* When a lot of tobacco, unmixed in color, is on the marginal line between two colors so that there is a question as to which is the predominant color, it shall be placed in the color with which the tobacco best corresponds with respect to body and maturity.

§ 29.489 *Rule 7.* Any lot of tobacco shall be regarded as meeting the specifications of a certain grade when the tobacco is not lower in any degree of quality than that stated in the specifications of such grade. The degree of uniformity specified for a particular grade governs the percentage of a lot which must meet the specifications with respect to other degrees of quality.

§ 29.490 *Rule 8.* Any lot of tobacco which clearly and fully meets the specifications of two or more grades shall be placed in the highest one of such grades; but any lot of tobacco which is on the marginal line between two or more grades so that the grade cannot be determined by applying other rules, shall be placed in the lowest grade in question.

§ 29.491 *Rule 9.* The grade assigned to any lot of tobacco shall be a true representation of the tobacco at the time of inspection and certification thereof.

§ 29.492 *Rule 10.* If, at any time, it is found that a lot of tobacco does not comply with the description and specifications of the grade previously assigned, it shall not thereafter be represented as being of such grade.

§ 29.493 *Rule 11.* Any special factor symbol, approved for the purpose by the Chief of the Standards and Technical Research Division, Tobacco Branch, P. M. A., may be used after a grade mark to show a peculiar side or characteristic of the tobacco. The Chief is authorized to establish, from time to time, grade subdivisions of the special groups of N, W, and S. Interpretations on the application of these standards, the use of specifications, and the meaning of terms shall be in accordance with determinations or clarifications made by the Chief. The use of any grade may be restricted by the Chief, during any marketing season, when he finds that the grade is not needed or appears in insufficient volume to justify making the grade.

§ 29.494 *Rule 12.* Any Leaf in F or R colors of the B3, B4, or B5 qualities, and any Leaf in D or G colors of B4 or B5 qualities, which is under 16" long shall be made a subgroup by substituting the letter "T" for the group letter "B" in the grade symbol.

§ 29.495 *Rule 13.* All qualities of Leaf in F and R colors which have the characteristics of Smoking-leaf may be made a subgroup by substituting the letter "H" for the group letter "B" in the grade symbol.

(49 Stat. 732; 7 U. S. C. 511 et seq.)

Issued at Washington, D. C., this 15th day of October, 1952.

[SEAL] GEORGE A. DICE,
Acting Assistant Administrator, Production and Marketing Administration.

[7 CFR Part 52]

U. S. STANDARDS FOR GRADES OF CANNED MUSHROOMS [1]

NOTICE OF PROPOSED RULE MAKING

Notice is hereby given that the United States Department of Agriculture is considering the revision, as herein proposed, of United States Standards for Grades of Canned Mushrooms, pursuant to the authority contained in the Agricultural Marketing Act of 1946 (60 Stat. 1087; 7 U. S. C. 1621, et seq.) and the Department of Agriculture Appropriation Act, 1953 (Pub. Law 451; 82d Cong., approved July 5, 1952). This revision, if made effective, will be the third issue by the Department of grade standards for this product.

All persons who desire to submit written data, views, or arguments for consideration in connection with the proposed revision should file same, in duplicate, with the Chief, Processed Products Standardization and Inspection Division, Fruit and Vegetable Branch, Production and Marketing Administration, United States Department of Agriculture, Washington 25, D. C., not later than 30 days after publication hereof in the FEDERAL REGISTER.

The proposed revision is as follows:

§ 52.452 *Canned mushrooms.* "Canned mushrooms" means canned mushrooms as defined in the definitions and standards of identity for canned vegetables (21 CFR, Cum. Supp. 52.990, as amended 17 F. R. 3176) issued pursuant to the Federal Food, Drug, and Cosmetic Act.

(a) *Color of canned mushrooms.* (1) White or cream.

(2) Brown.

(b) *Styles of canned mushrooms.* (1) "Whole" or "whole mushrooms" means canned mushrooms consisting of the caps with the veils closed and with stems attached.

(2) "Button" or "button mushrooms" means canned mushrooms consisting of the caps with veils closed and with stems removed immediately below the veil.

(3) "Sliced whole" or "sliced whole mushrooms" means canned mushrooms consisting of slices of whole mushrooms which have been sliced parallel to the longitudinal axis.

(4) "Sliced button" or "sliced buttons" means canned mushrooms consisting of slices of buttons which have been sliced at right angles to the diameter of the cap.

(5) "Stems and pieces" means cut or broken portions of caps and stems.

(6) "Unit" means an individual mushroom or portion of a mushroom in canned mushrooms.

(c) *Grades of canned mushrooms.* (1) "U. S. Grade A" or "U. S. Fancy" is the quality of canned mushrooms that possess similar varietal characteristics; that possess a normal flavor and odor; that possess a good color; that are practically free from defects; that possess a good character; that are uniform in size and shape; and that for those factors which are scored in accordance with the scoring system outlined in this section the total score is not less than 85 points: *Provided*, That the canned mushrooms may be fairly uniform in size and shape if the total score is not less than 85 points.

(2) "U. S. Grade C" or "U. S. Standard" is the quality of canned mushrooms that possess similar varietal characteristics; that possess a normal flavor and odor; that possess a fairly good color; that are fairly free from defects; that possess a fairly good character; that are fairly uniform in size and shape; and that score not less than 70 points when scored in accordance with the scoring system outlined in this section.

(3) "Substandard" is the quality of canned mushrooms that fail to meet the requirements of U. S. Grade C or U. S. Standard.

(d) *Sizes of mushrooms in whole and button mushrooms.* (1) No. 0 (Midget) mushrooms will pass through a round opening ½ inch in diameter.

(2) No. 1 (Tiny) mushrooms will pass through a round opening 5/8 inch in diameter but will not pass through a round opening ½ inch in diameter.

(3) No. 2 (Small) mushrooms will pass through a round opening 7/8 inch in diameter but will not pass through a round opening 5/8 inch in diameter.

(4) No. 3 (Medium) mushrooms will pass through a round opening 1⅛ inches in diameter but will not pass through a round opening 7/8 inch in diameter.

(5) No. 4 (Large) mushrooms will pass through a round opening 1⅜ inches in diameter but will not pass through a round opening 1⅛ inches in diameter.

(6) No. 5 (Extra Large) mushrooms are those too large to pass through a round opening 1⅜ inches in diameter.

(e) *Fill of container for canned mushrooms.* The standard for fill of container for canned mushrooms is not incorporated in the grades of the finished product, since fill of container, as such, is not a factor of quality for the purpose of these grades. The standard of fill of containers is not less than 56 percent of the water capacity of the container if such capacity is less than 11.0 ounces avoirdupois; not less than 59 percent of the water capacity of the container if such capacity is 11.0 ounces or more but less than 25 ounces avoirdupois; and not less than 62 percent of the water capacity of the container if such capacity is 25 ounces avoirdupois or more. Canned mushrooms which do not meet this requirement are "below standard in fill."

(f) *Minimum drained weight.* The minimum drained weights in Table No. I of this paragraph are not incorporated in the grades of the finished product since drained weight, as such, is not a factor of quality for the purpose of these grades. The drained weight of canned mushrooms is determined by emptying the contents of the container upon a United States Standard No. 8 circular sieve of proper diameter so as to distribute the product evenly, inclining the sieve slightly to facilitate drainage, and allowing to drain for two minutes. The drained weight is the weight of the sieve and mushrooms less the weight of the dry sieve. A sieve 8 inches in diameter is used for No. 2½ size cans (401" x 411") and smaller and a sieve 12 inches in diameter is used for containers larger than the No. 2½ size can.

TABLE NO. 1—MINIMUM DRAINED WEIGHTS, IN OUNCES, OF CANNED MUSHROOMS

Container designation	Over-all dimensions		Weight of drained mushrooms, ounces (avoirdupois)
	Diameter (inches)	Height (inches)	
2 Z mushroom (202 x 204)	2 1/4	2 1/4	2
6 Z (202 x 308)	2 1/4	3 1/2	3 1/4
4 Z mushroom (211 x 212)	2 1 1/16	2 3/4	4
8 Z tall (211 x 304)	2 1 3/16	3 3/4	4 3/4
8-ounce glass			4 3/4
No. 1 picnic (211 x 400)	2 1 3/16	4	6
8 Z mushroom (300 x 400)	3	4	8
No. 300 (300 x 407)	3	4 7/16	9
No. 1 tall (301 x 411)	3 1/16	4 13/16	9 3/4
No. 303 (303 x 406)	3 1/16	4 1/16	10
No. 303 glass			10
No. 2 (307 x 409)	3 1/16	4 9/16	12
Jumbo (307 x 510)	3 1/16	5 9/16	16
No. 10 (603 x 700)	6 1/16	7	68

(g) *Ascertaining the grade.* (1) The grade of canned mushrooms is ascertained by considering in conjunction with the requirements of the respective grade the respective ratings for the factors of color, uniformity of size and symmetry, absence of defects, and tenderness.

(2) The relative importance of each factor which is scored is expressed numerically on the scale of 100. The maximum number of points that may be given each such factor is:

Factors:	Points
(i) Color	30
(ii) Uniformity of size and shape	20
(iii) Absence of defects	30
(iv) Character	20
Total score	100

(3) "Normal flavor and odor" means that the product is free from objectionable flavors and objectionable odors of any kind.

(h) *Ascertaining the rating for the factors which are scored.* The essential variations within each factor which is scored are so described that the value may be ascertained for each factor and expressed numerically. The numerical range within each factor which is scored is inclusive (for example, "17 to 20 points" means 17, 18, 19, or 20 points).

(1) *Color.* (i) Canned mushrooms that possess a good color may be given a score of 26 to 30 points. "Good color" means that the canned mushrooms possess a color that is practically uniform, bright, and typical of canned mushrooms produced from mushrooms of similar varietal characteristics and meet the following additional requirements for the respective color:

(*a*) *"White" or "cream."* The color of the surface of the cap of the individual mushroom or portion of mushroom of white or cream varieties is not lighter in color than Plate 10, F–2, and is not darker in color than Plate 11, I–5, as illustrated in Maerz and Paul's Dictionary of Color.[2]

(*b*) *"Brown."* The color of the surface of the cap of the individual mushroom or portion of mushroom of brown varieties is not lighter in color than Plate 11, J–6, and is not darker than Plate 13, K–7, as illustrated in Maerz and Paul's Dictionary of Color.[2]

(ii) Canned mushrooms that possess a fairly good color may be given a score of 22 to 25 points. Canned mushrooms that fall into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly good color" means that the canned mushrooms possess a color that is typical of canned mushrooms produced from mushrooms of similar varietal characteristics and that the product may be dull but not to the extent that the appearance is seriously affected and meet the following additional requirements for the respective colors:

(*a*) *"White" or "cream."* The color of the surface of the cap of the individual mushroom or portion of mushroom of white or cream varieties may be lighter in color than Plate 10, F–2, but not excessively white, and may be slightly darker in color than Plate 11, I–5: *Provided*, That the gills of none of the units are darker than Plate 14, K–8, as illustrated in Maerz and Paul's Dictionary of Color.[2]

(*b*) *"Brown."* The color of the surface of the cap of the individual mushroom or portion of mushroom of brown varieties may be lighter in color than Plate 11, J–6, but not excessively light, and may be darker in color than Plate 13, K–7: *Provided*, That the gills of none of the units are darker than Plate 14, K–8, as illustrated in Maerz and Paul's Dictionary of Color.[2]

(iii) Canned mushrooms that fail to meet the requirements of subdivision (ii) of this subparagraph may be given a score of 0 to 21 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

(2) *Uniformity of size and shape.* (i) Canned mushrooms that are practically uniform in size and shape may be given

[1] The requirements of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act.

[2] First Edition.

a score of 17 to 20 points. "Practically uniform in size and shape" has the following meanings with respect to the various styles of canned mushrooms:

(a) *Whole mushrooms.* The stems are cut transversely and the diameter of the largest cap does not exceed the diameter of the smallest cap by more than ⅛ inch. The units shall be practically uniform in shape.

(b) *Button mushrooms.* The stems are cut transversely so that the distance from the top of the cap to the end of the stem does not exceed the diameter of the cap, and the diameter of the largest cap does not exceed the diameter of the smallest cap by more than ⅛ inch. The units shall be practically uniform in shape.

(c) *Sliced whole mushrooms.* The length of the longest center slice does not exceed the length of the shortest center slice by more than ⅜ inch and the presence of irregular shaped units does not materially affect the appearance of the product.

(d) *Sliced buttons.* The length of the longest center slice does not exceed the length of the shortest center slice by more than ⅜ inch and the presence of irregular shaped units does not materially affect the appearance of the product.

(e) *Stems and pieces.* Stems and pieces may be irregular in size and shape: *Provided,* That the presence of very small pieces does not materially affect the appearance of the product.

(ii) If the canned mushrooms are fairly uniform in size and shape a score of 13 to 16 points may be given. "Fairly uniform in size and shape" has the following meanings with respect to the various styles of canned mushrooms:

(a) *Whole mushrooms.* The stems are cut transversely and the diameter of the largest cap does not exceed the diameter of the smallest cap by more than ¼ inch. The units shall be fairly uniform in shape.

(b) *Button mushrooms.* The stems are cut transversely so that not more than 10 percent, by count, of the mushrooms have stems of such length that the distance from the tip of the cap to the end of the stem exceeds the diameter of the cap, and the diameter of the largest cap does not exceed the diameter of the smallest cap by more than ¼ inch. The units shall be fairly uniform in shape.

(c) *Sliced whole mushrooms.* The length of the longest center slice does not exceed the length of the shortest center slice by more than ⅝ inch and the presence of irregular shaped units does not seriously affect the appearance of the product.

(d) *Sliced buttons.* The length of the longest center slice does not exceed the length of the shortest center slice by more than ⅝ inch and the presence of irregular shaped units does not seriously affect the appearance of the product.

(e) *Stems and pieces.* Stems and pieces may be irregular in size and shape.

(iii) Canned mushrooms that fail to meet the requirements of subdivision (ii) of this subparagraph may be given a score of 0 to 12 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

(3) *Absence of defects.* (i) The factor of absence of defects refers to the degree of freedom from units which are damaged or seriously damaged.

(a) "Damaged" means damaged by discoloration, pathological injury, insect injury, mechanical injury, or damaged by other means to such an extent that the appearance or eating quality of the unit is materially affected. (Knife marks resulting from the preparation of sliced whole or sliced button mushrooms are not considered mechanical injury.)

(b) "Seriously damaged" means damaged to such an extent that the appearance or eating quality of the unit is seriously affected.

(ii) Canned mushrooms that are practically free from defects may be given a score of 25 to 30 points. "Practically free from defects" means that there may be present not more than 5 percent, by weight, of damaged or seriously damaged units: *Provided,* That not more than 1 percent, by weight, of all the units, or 1 unit, whichever is greater, may be seriously damaged units.

(iii) If the canned mushrooms are fairly free from defects, a score of 22 to 24 points may be given. Canned mushrooms that fall into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly free from defects" means that there may be present not more than 20 percent, by weight, of damaged or seriously damaged units: *Provided,* That not more than 2 percent, by weight, of all the units, or 2 units, whichever is greater, may be seriously damaged units.

(iv) Canned mushrooms that fail to meet the requirements of subdivision (iii) of this subparagraph may be given a score of 0 to 21 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

(4) *Character.* (i) The factor of character refers to the tenderness and texture of the canned mushrooms and the development of the cap.

(a) "Closed veil" means that the membrane which extends from the inner edge of the cap to the stem practically covers the gills.

(ii) Canned mushrooms that possess a good character may be given a score of 17 to 20 points. "Good character" means that the units are intact, practically all are tender and free from fibrous or rubbery units, and that with respect to whole and button mushrooms at least 95 percent, by weight, of all the units possess closed veils.

(iii) If the canned mushrooms have a fairly good character a score of 13 to 16 points may be given. Canned mushrooms that fall into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly good character" means that the units are reasonably intact, may be fairly tender and reasonably free from fibrous or rubbery units, and that with respect to whole and button mushrooms at least 90 percent, by weight, of all the units possess closed veils.

(iv) Canned mushrooms that fail to meet the requirements of subdivision (iii) of this subparagraph may be given a score of 0 to 12 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

(i) *Tolerance for certification of officially drawn samples.* (1) When certifying samples that have been officially drawn and which represent a specific lot of canned mushrooms, the grade for such lot will be determined by averaging the total scores of all containers, if:

(i) Not more than one-sixth of the containers comprising the sample fails to meet all the requirements of the indicated grade by reason of a limiting rule, the average score of all containers in the sample for the factor, subject to such limiting rule, must be within the range for the grade indicated;

(ii) None of the containers comprising the sample falls more than 4 points below the minimum score for the grade indicated by the average of the total scores; and

(iii) All containers comprising the sample meet all applicable standards of quality promulgated under the Federal Food, Drug, and Cosmetic Act and in effect at the time of the aforesaid certification.

(j) *Score sheet for canned mushrooms.*

Issued at Washington, D. C., this 13th day of October 1952.

[SEAL] GEORGE A. DICE,
Acting Assistant Administrator, Production and Marketing Administration.

[F. R. Doc. 52-11285; Filed, Oct. 16, 1952; 8:57 a. m.]

[7 CFR Part 963]

[Docket Nos. AO-233 and AO-233 RO-1]

HANDLING OF MILK IN THE STARK COUNTY, OHIO, MARKETING AREA

DECISION WITH RESPECT TO A PROPOSED MARKETING AGREEMENT AND A PROPOSED ORDER

Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and marketing orders (7 CFR Part 900), a public hearing was conducted at Canton, Ohio, on September 17–21, 1951 and on February 11–12, 1952, pursuant to notices thereof which were issued on August 29, 1951 (16 F. R. 8909) and on January 14, 1952 (17 F. R. 880).

Upon the basis of the evidence introduced at the hearing and the record thereof the Assistant Administrator, Production and Marketing Administration, on July 24, 1952, filed with the Hearing Clerk, United States Department of Agriculture, his recommended decision and opportunity to file written exceptions thereto, which was published in the FEDERAL REGISTER on July 29, 1952 (17 F. R. 6907).

The material issues of record related to:

1. Whether the handling of milk in the market is in the current of interstate commerce or directly burdens, obstructs or affects interstate commerce in milk or its products;

2. Whether marketing conditions justify the issuance of a marketing agreement or order; and

3. If an order is issued what its provisions should be with respect to:

(a) The scope of regulation;

(b) The classification of milk;

(c) The level of class prices and the method of determining such prices;

(d) The method to be used in distributing proceeds to producers; and

(e) Administrative provisions.

Findings and conclusions. The following findings and conclusions on the material issues are based upon evidence in the record.

Nature of commerce. The handling of milk produced for sale within the Stark County, Ohio, marketing area and the products thereof is in the current of interstate commerce or directly burdens, obstructs, or affects interstate commerce in milk or milk products.

The production area for the Stark County marketing area overlaps the production areas for the Pittsburgh, Pennsylvania, the Wheeling, West Virginia, and the Cleveland, Ohio, markets to the extent that in the overlapping areas the farms on which milk is produced for the Stark County market are interspersed with farms supplying Pittsburgh, Wheeling and Cleveland. Some shifting of dairy farmers between the Stark County market and these other markets occurs from time to time. The handling of milk in the Cleveland, Ohio, marketing area is regulated by an order issued by the Secretary of Agriculture. Milk for the Stark County marketing area is therefore purchased in direct competition with milk for other markets in which the handling of milk is in the current of interstate commerce.

Milk manufacturing plants at which cheese and condensed milk products and other milk products are manufactured are scattered throughout the production area for the Stark County marketing area. Farms on which milk is produced for the Stark County market are interspersed quite generally with farms supplying milk to these manufacturing plants. At times dairy farmers supplying milk to these manufacturing plants become producers of milk for fluid consumption in the Stark County marketing area. Thus milk for the Stark County marketing area is purchased in direct competition with milk for these manufacturing plants. Some of the products manufactured at these plants actually move in interstate commerce. All of these manufactured products, whether or not they actually move in interstate commerce, are sold in direct competition with similar products that are in interstate commerce, and thus directly burden, obstruct, or affect interstate commerce in such products. Large quantities of the reserve supply of milk for the Stark County market move to these manufacturing plants where such milk is intermingled with other milk at these plants and is manufactured into milk products which move in interstate commerce or directly burden, obstruct, or affect interstate commerce in such products.

Large quantities of milk products which either move in interstate commerce or directly burden, obstruct, or affect interstate commerce in such products are consumed in the Stark County marketing area.

It is concluded that the handling of milk produced for sale within the Stark County, Ohio, marketing area and the products thereof is in the current of interstate commerce or directly burdens, obstructs, or affects interstate commerce in milk or milk products.

Market conditions. The issuance of an order to regulate the handling of milk in the Stark County, Ohio, marketing area, with terms and conditions hereinafter concluded to be appropriate, will tend to effectuate the declared policy of the Agricultural Marketing Agreement Act of 1937, as amended.

A large proportion of the milk produced for the Stark County, Ohio, marketing area is marketed by a cooperative association which serves as marketing agent for its members. Milk sold by this cooperative association to milk distributors is priced according to its use so that all milk distributors who obtain their supplies through the cooperative association pay the same price for milk similarly used. Returns for all milk sold in this manner are pooled and a uniform price which is paid to all members of the cooperative association is determined.

A smaller but significant proportion of the milk produced for the Stark County, Ohio, marketing area is sold by the producers directly to the milk distributor. Since the individual producer who serves as his own selling agent usually has little bargaining power, the terms of these sales are often established to a considerable extent by the milk distributor purchasing the milk. Prices paid for milk sold by these individual producers are usually based on the uniform price received by members of the cooperative association without regard to the use of such milk. If a milk distributor who buys his milk in this manner uses a larger proportion of his milk in higher classes than the milk distributors who purchase their milk through the cooperative association, he is buying his milk at some competitive advantage, and unless this advantage is dissipated at some other stage in his operation, he is in a position to increase his sales of Class I milk at the expense of sales by distributors who purchase from the cooperative. The more he captures sales from other distributors the greater his ability to continue this price reduction. This phenomenon is a potential source of market disorder and instability. This potentiality has materialized to some extent in certain portions of the marketing area. To counteract the competitive disadvantage which milk distributors obtaining supplies through the cooperative association have experienced from the so-called "flat price" buyers, the cooperative has sold milk to its own distributors at reduced prices for sale in areas where the effects of "flat price" buying were especially prevalent.

There is some indication that the proportion of the total market requirements which is purchased through the cooperative association is declining. As this proportion declines the incentive for handlers purchasing milk through the cooperative association to seek supplies directly from producers is likely to increase.

The present arrangements for verification of the utilization of milk are inadequate for the most successful operation of a use classification plan of selling milk. Milk sold to milk distributors through the cooperative association is subject to verification only if it is used in certain products. No utilization can be completely verified except through the balancing of total receipts and total utilization as revealed by audit. A marketing order will provide for thorough verification of all receipts and utilization of milk.

Producers and coperative associations can do much toward balancing market supply with market requirements if current, complete, and accurate market-wide information is available. Such information has not been available, but would be publicly available pursuant to the marketing order proposed herein.

A check weighing and testing service for all producers to assure them that they are paid the full value for the amount and quality of milk which they sell is provided for in the proposed order. This service is currently being rendered by the cooperative association for its

members but no such service is generally available for producers who are not members of the cooperative association.

Undoubtedly the prices prevailing in the Cleveland market where the handling of milk is regulated by a marketing order have some influence on prices in the Stark County market; however, this influence has not been great enough to prevent a decline in the last few years in prices received by producers supplying the Stark County market in relation to prices received by producers supplying the Cleveland market. This decline in prices has affected the regular market supply to the extent that this supply which has usually been adequate had to be supplemented in the past fall and winter with milk from outside sources.

These existing conditions contribute or tend to contribute to disorder and instability in the marketing of milk produced for sale in the Stark County, Ohio, marketing area, and the issuance of an order regulating the handling of milk in this area, with terms and conditions hereinafter concluded to be appropriate, will tend to correct such conditions and will thus tend to effectuate the declared policy of the Agricultural Marketing Agreement Act of 1937, as amended.

Scope of regulation. The regulations contained in an order regulating the handling of milk in the Stark County, Ohio, marketing area should be applicable to all "handlers" who operate "routes" in the "marketing area." The regulations should be somewhat different depending upon whether a handler operates a "pool plant" or a "nonpool plant," and whether a handler's supplies of milk are "producer milk" or "other source milk." "Producer-handlers" should be exempt from certain of the regulations. The returns for all milk subject to the order should be distributed among all "producers."

Handlers. All persons who sell or distribute any Class I milk (as hereinafter defined) in the marketing area should be handlers. Since the regulations contained in an order are applicable only to handlers, the regulations cannot be applied completely and uniformly unless they apply to all persons engaged in selling or distributing milk. Failure to apply the regulations completely and uniformly could place some persons engaged in milk handling at a competitive advantage or disadvantage in relation to others. The regulations should be applicable to those persons who sell or distribute Class I milk because Class I milk comprises those products which to a large extent must be made from locally approved milk and for which the prices herein concluded to be appropriate are intended to maintain an adequate supply of milk. A person who is a handler under a Stark County marketing order should be a handler only with respect to the milk received at a milk handling plant (hereinafter referred to as a "plant") from which milk is sold or distributed in the marketing area and with respect to milk which is usually received at such a plant from producers (as hereinafter defined) but which such handler causes to be diverted temporarily from producers' farms to a nonpool plant as hereinafter defined. Such diversions may be made from time to time when supplies at a plant are seasonally heavy or when short term surpluses develop at the plant.

A cooperative association should be a handler with respect to milk which is usually delivered to a pool plant (as hereinafter defined) but which the cooperative association causes to be diverted from the farms of producers to a nonpool plant for short periods of time. The cooperative association in the market is permitted by its contract with its members to make such diversions of milk. Since such diversions would be made at the instance of the cooperative association, such association should be a handler with respect to such milk and should perform the functions required in the order to be performed by a handler with respect to such milk.

Route. Any sale or delivery of Class I milk by a handler to any person other than a handler should be considered as a route. This would include sales from a plant or a store operated by a handler or deliveries to homes or to stores or other establishments operated by a person other than a handler. It would also include sales to persons (sometimes referred to as "brokers" or "jobbers" or "peddlers") who do not operate a plant but purchase packaged milk or other products from a handler and deliver such milk or other products to other persons.

Marketing Area. The Stark County, Ohio, marketing area should include all of the territory within (a) Stark County with the exceptions of Paris and Sugar Creek Townships and Sections 6 and 7 of Lake Township;

(b) Sections 25, 26, 27, 34, 35, and 36 of Green Township in Summit County;

(c) Lots 1, 2, 9, 10, 11, 12, 19, 20, 21, 22, 29, 30, 31, 32, 39, and 40 of Suffield Township in Portage County;

(d) Lots 5, 6, 7, 8, 9, 10, 15, 16, 17, 18, 19, 20, 25, 26, 27, 28, 29, 30, 35, 36, 37, 38, 39, and 40 of Randolph Township in Portage County;

(e) Smith Township in Mahoning County with the exception of Great Lot 35;

(f) Knox Township in Columbiana County; and

(g) Sections 1, 2, 3, 10, 11, and 12 in Sugar Creek Township of Wayne County.

Located within Stark County are three major cities—Alliance, Canton, and Massillon. Milk for these three cities is obtained from the same general supply area. Milk distributors who distribute a large portion of the milk in these cities purchase their milk supplies through the present pooling arrangement. Milk distributors located in Canton sell some milk in Massillon and milk distributors located in Massillon sell some milk in Canton. Canton milk distributors sometimes transfer milk in bulk to Alliance milk distributors. The health regulations of the three cities are similar to the extent that producers qualified to produce milk under the regulations of one city can usually qualify under the regulation of either of the other two cities without any change in production methods or equipment. From time to time producers delivering milk to a milk distributor in one of the cities shift to a milk distributor in another of the cities.

Canton, which is much larger than either Alliance or Massillon, has a population of about 117,000. Thickly populated suburban areas surround Canton. The population of metropolitan Canton is about 140,000 to 145,000. Alliance and Massillon are also surrounded by thickly populated suburban areas.

Not all plants from which milk is distributed in the cities are located within the city limits. Milk distributors distributing milk in the cities also distribute milk extensively in the suburban areas where they compete with a number of dairy stores from which no milk is distributed in the cities; however, some of these dairy stores are located near enough to the boundaries of the cities so that consumers residing within the boundaries of the cities can easily purchase milk from the stores. Milk producers who from time to time are disqualified by the appropriate health authority to deliver milk to a milk distributor in one of the cities often become a part of the milk supply for one of these dairy stores. On the basis of these market conditions it is concluded that all three of the cities should be included in the marketing area and that the marketing area should extend beyond the boundaries of the cities.

Proposals were made to include in the marketing area all of Stark County, the southern portions of Franklin and Green Townships in Summit County, the southern portions of Suffield and Randolph Townships in Portage County, all of Smith Township in Mahoning County, Knox and West Townships in Columbiana County, the part of the village of Minerva which is in Carroll County, and all of Sugar Creek Township in Wayne County. This area includes substantially all of the territory in which milk is distributed by milk dealers who purchase their milk supplies through the present pooling arrangement.

The southern portions of Franklin and Green Townships in Summit County and Suffield and Randolph Townships in Portage County are mostly rural territory. A few villages are located therein. Except for small areas in the southeast corner of Green Township and in the southeast corner of Suffield Township and the southwest corner of Randolph Township comprising the Sections and Lots enumerated above, it appears that a substantial portion of the milk sold in this territory is distributed by milk dealers primarily associated with the Akron market. These Akron dealers also sell a substantial portion of the milk sold in the village of Uniontown, which is located in Sections 6 and 7 of Lake Township in Stark County. It is therefore concluded that the Sections of Green Township and the Lots of Suffield and Randolph Townships enumerated above, which are primarily served by Stark County milk dealers, should be a part of the marketing area, and that Sections 6 and 7 in Lake Township in Stark County should not be a part of the marketing area.

The recommended decision proposed that Section 3 of Jackson Township in Stark County be excluded from the marketing area in order to exempt from regulation a milk distributor whose plant is located therein and whose milk distribution comprises only deliveries to schools in Green Township of Summit County and sales from a plant store. A large portion of this milk distributor's deliveries to schools in Green Township are within the portion of Green Township to be included in the marketing area. Thus the reasons for excluding Section 3 of Jackson Township from the marketing area are largely dissipated by including a portion of Green Township in the marketing area. It is therefore concluded that Section 3 of Jackson Township in Stark County should be included in the marketing area.

The eastern boundary of Alliance coincides with a portion of the western boundary of Smith Township in Mahoning County. Part of the suburban area surrounding Alliance is located in Smith Township. One milk distributor whose plant is located at Beloit, which is in Smith Township, has about two-thirds of his sales in Alliance. Two milk distributors whose plants are located in Alliance have distribution routes extending into Smith Township and into Knox Township in Columbiana County. The routes of these three milk distributors are intermingled.

Located in Great Lot 35 of Smith Township is one milk handling plant. This plant is primarily engaged in supplying milk to the Pittsburgh, Pennsylvania, market. A small portion of the milk received at this plant is packaged and is distributed through a plant store. Exclusion of Great Lot 35 from the marketing area will exempt the operator of this plant from regulation under the order as long as he makes no sales or deliveries of milk within the marketing area. Inclusion of the operator of this plant under the regulation of an order for the Stark County marketing area would present administrative problems of regulating under an order a plant whose milk supply is primarily associated with another market. Exemption of the operator of this plant from regulation under an order should not have any perceptibly adverse effect upon the competitive relationship of milk distributors who are subject to the order. If the operator of this plant should extend his sales or deliveries of milk into any part of the marketing area, he would then become subject to the order.

It is concluded that Smith Township of Mahoning County, with the exception of Great Lot 35, and Knox Township of Columbiana County should be included in the marketing area.

Paris and Sugar Creek Townships of Stark County should not be included in the marketing area. Located in each of these townships is a plant at which most of the milk received is manufactured into milk products. Milk is not distributed from either of these plants into any part of the marketing area herein concluded to be appropriate. Some milk is distributed in Sugar Creek Township by milk distributors who are located outside of any of the territory proposed for inclusion in the marketing area and whose primary business is outside of any of that territory.

West Township of Columbiana County and the portion of the village of Minerva which is in Carroll County should not be a part of the marketing area. A milk distributor whose plant is located within this territory makes no sales or deliveries of milk in the marketing area herein proposed.

The marketing area should include Sections 1, 2, 3, 10, 11 and 12 in Sugar Creek Township of Wayne County. This includes the village of Dalton and the territory lying between Dalton and the Stark County boundary. Dalton is served by Massillon milk distributors and by at least two other milk distributors located outside the proposed marketing area. The Massillon distributors deliver somewhat over half of the milk sold in Dalton. They also distribute milk in the territory between Massillon and Dalton. One of the distributors who is located outside the proposed marketing area and who sells milk in Dalton also sells substantial quantities of milk in other parts of Sugar Creek Township. He is the only milk distributor who sells milk in certain parts of the township. It is concluded that all of Sugar Creek Township of Wayne County with the exceptions of Sections 1, 2, 3, 10, 11, and 12 should be excluded from the marketing area.

Pool plant, nonpool plant, producer milk, and other source milk. All milk distribution plants located within the marketing area, except those which may have a very small volume of distribution, are engaged to a considerable extent in distributing milk within the marketing area. All such plants should be pool plants. Any plant which is located outside of the marketing area and from which 10 percent or more of its total disposition of Class I milk is in the marketing area should also be a pool plant, except any plant which may have a very small volume of distribution in the marketing area. A plant with this proportion of its Class I disposition in the marketing area is engaged to a considerable extent in distributing milk within the marketing area and the handler operating such plant should be subject to the regulations imposed by the order on operators of pool plants.

Any plant located either within or outside the marketing area should not be a pool plant if the total disposition of Class I milk on a route in the marketing area from such plant is less than 18,000 pounds per month. This limitation is necessary and desirable to prevent any plant which is primarily engaged in manufacturing milk products from being subject to the order.

In computing the total disposition of Class I milk which is in the marketing area, any Class I milk disposed of on a route which is partially within the marketing area should all be considered as having been disposed of within the marketing area. The administrative problems involved in attempting to divide a route into disposition within and outside the marketing area and to verify such division are such as to make such division not feasible.

Any plant which is not a pool plant should be a nonpool plant.

Since the period to be used for classification and pricing is a calendar month, the status of a plant as either a pool plant or a nonpool plant should be determined on a monthly basis.

Producer milk should include all milk received by a handler at a pool plant from dairy farmers. Other source milk should comprise all milk and milk products received by a handler from any source other than producers or pool plants. Pursuant to these two definitions milk received by a handler from a pool plant would be neither producer milk nor other source milk.

Since it is the primary purpose of the order herein proposed to regulate the handling of milk only within the marketing area, it is desirable to limit its applicability to such handling of milk to the extent that it is administratively feasible to do so and at the same time have complete and uniform regulation of all milk handling within the marketing area. To carry out this purpose it is appropriate to impose one type of regulation on handlers operating pool plants and another type on handlers operating nonpool plants.

Handlers operating pool plants should be required to report to the market administrator the receipts of all milk and milk products at his plant and all disposition of milk and milk products from such plant. All milk and milk products received at a pool plant should be classified in the classes hereinafter established and all producer milk received at a pool plant should be paid for by the handler operating the pool plant at class prices hereinafter established. Handlers operating pool plants should also submit to the market administrator a producer pay-roll showing receipts of milk for each producer and the amount paid each producer.

Complete and uniform regulation of all milk handling in the marketing area can be assured by applying the regulations here proposed for pool plants to nonpool plants also; however, since a nonpool plant may have a large proportion of its total distribution of milk outside the marketing area in areas where no regulations such as those imposed by this order are applicable, an operator of a nonpool plant might be placed at a considerable competitive disadvantage if he were subject to the pricing and payment provisions of an order while his major competitors were not subject to such regulation. On the other hand failure to prescribe any regulations for a nonpool plant could result in unregulated milk being sold in the marketing area at lower prices than regulated handlers could sell milk. It is this same type of disorderly marketing conditions which is sought to be corrected by this order.

Regulations to be imposed against handlers operating nonpool plants should comprise only such regulations as are necessary to remove any competitive advantage with respect to Class I milk in the marketing area which such handlers might enjoy in relation to handlers operating pool plants. Handlers operating nonpool plants should make a payment on all Class I milk disposed of on routes extending into the marketing area in an amount sufficient to insure that the net cost of their milk supplies including these payments is no less than the Class I price. In order for the market administrator to be able to verify adequately the volume of Class I milk which a handler operating a nonpool plant distributes on routes extending into the marketing area, the handler should be required to report total receipts and disposition of milk and milk products at his nonpool plant and to permit verification by the market administrator of such receipts and disposition.

Provision should be made so that a handler operating a nonpool plant can avoid the payments described above by obtaining supplies of milk from a pool plant to meet his sales in the marketing area.

Payments similar to those described above to be made on Class I milk disposed of from nonpool plants on routes extending into the marketing area should also be made on any other source milk at a pool plant which is classified as Class I milk. Failure to require such payments would mean incomplete regulation and could have a similar result to failure to regulate nonpool plants operating routes in the marketing area. It is not administratively feasible to regulate other source milk received at a pool plant to the same extent that producer milk is regulated. Both handlers and producers proposed that such payments be required only if the receipts of other source milk in relation to receipt of producer milk exceed prescribed limits. Such limitation on these payments could result in handlers regularly relying on supplies of other source milk up to the prescribed limit, and thereby to the extent allowed producer milk would be displaced in Class I by other source milk, which may be available (as described hereinafter) at a less than the Class I price. This would be deleterious to the ends sought by this regulation. The prices established by this order should be high enough to assure an adequate supply of producer milk for the market. However, with other source milk available at less than the Class I price, handlers would tend to substitute such milk in place of producer milk. In order to assure complete regulation, discourage replacement of producer milk with other source milk, and eliminate any competitive advantage which might otherwise accrue to handlers using other source milk, payments sufficient to insure that the minimum price of other source milk will be uniform with the Class I price should be made on all other source milk received at a pool plant and classified as Class I milk.

Other source milk may be obtained from plants subject to another order or from plants not subject to any order, and these plants not subject to any order may primarily be either fluid milk plants or manufacturing plants. Nonpool plants may obtain other source milk directly from dairy farmers. The health regulations applicable to plants in the marketing area which do not hold permits from health authorities of Alliance, Canton, or Massillon are such that a handler could probably use a small portion of high quality manufacturing milk in his fluid operation. Alliance, Canton, and Massillon health authorities have in times of extreme milk shortages permitted handlers to obtain supplemental supplies from primarily manufacturing plants. The possibility that a handler may obtain supplies of manufacturing milk without the approval of the proper health authorities is always present.

There are several milk manufacturing plants in or near Stark County which are possible sources of other source milk. Some are near enough that little if any transportation cost would be involved in obtaining milk from them. A cooperative association in the market operates one such plant. In view of these conditions handlers at times may obtain other source milk which is similar in quality to manufacturing milk.

The prices paid to dairy farmers for milk by operators of manufacturing plants in Ohio and by other fluid milk dealers for surplus milk have been approximately equal to the price which would have resulted in recent years from the Class II pricing provisions herein proposed. Hence other source milk may be available to handlers in the marketing area as Class I milk for which only a price comparable to the Class II price was paid. It is concluded that a payment on all Class I other source milk at a pool plant and on all Class I other source milk distributed on routes extending into the marketing area from a nonpool plant is necessary to insure that no unregulated other source milk is available for sale as Class I milk in the marketing area for which the minimum prices to dairy farmers producing such milk was less than the price applicable to Class I producer milk regulated by this order. The amount of such payment on other source milk obtained from a plant subject to another milk marketing order should be any amount by which the value of such milk at the price at which such milk was required to be paid pursuant to the other order is less than the value of such milk at the Class I price prescribed in this order. The amount of such payment on all other source milk other than that subject to another order should be the difference between the value of such milk at the Class I price and the value of such milk at the Class II price. Payments in these amounts are necessary to assure that handlers distributing Class I other source milk in the marketing area have minimum prices for their milk supplies uniform with handlers using producer milk.

It is recognized that all handlers who handle other source milk which would be subject to the payments herein described may not obtain supplies of other source milk at or near the Class II price at all times. However, in view of the conclusion that other source milk may be available at about that price, its use computing the payment is appropriate. Even if using the actual cost of other source milk could be justified economically, it is not administratively feasible to attempt to determine the actual costs to each handler of each different lot of other source milk which he purchases as a basis for computing the amount of payment.

It is appropriate to impose these payments against the person who is engaged in distributing milk in the marketing area. To require the payments to be made by the operator of a nonpool plant from which the handler distributing milk in the marketing area obtains other source milk would require the extension of regulation to include additional handlers. Furthermore, the operator of a nonpool plant whose only connection with the Stark County market is to sell other source milk to a handler will have no direct control over the handling of the milk after the handler takes title to it, and the manner in which milk is handled in the handlers plant can affect the amount of payment on other source milk.

Payments made by handlers on other source milk should become a part of the producer-settlement fund (hereinafter described) and be distributed among all producers supplying the market. The term "producer" as hereinafter defined includes those dairy farmers who regularly supply milk for the marketing area. Any other source milk used for this purpose would likely displace producer milk.

Producer-handler. Persons who are engaged in producing milk and distributing only milk of their own production should be subject to the order only to the extent that they be required to submit reports to the market administrator as he may require them and to maintain and make available to the market administrator accounts, records, and facilities so that the market administrator may verify that such persons are producer-handlers. The classification provisions of the proposed order provide that any milk, skim milk, or cream transferred from a pool plant to a producer-handler will be Class I. Since producer-handlers dispose of most of their milk in the higher value outlets and will not be required to share (pool) these high value outlets with producers, any supplemental supplies of milk which they obtain from pool plants will likely be used in these high value outlets and should be classified as Class I milk. Pursuant to the proposed order any milk which a pool plant receives from a producer-handler would be other source milk and would therefore be allocated to the lowest class of utilization at the pool plant after the allocation of shrinkage, products received and disposed of in like form, and frozen cream. If any milk received at a pool plant from a producer-handler is allocated to Class I milk, then such milk would be subject to the payments described above on Class I other source milk by the handler operating the pool plant.

As indicated above, a producer-handler may receive milk from a pool plant and still maintain his status as a producer-handler. However, if such a milk distributor receives other source milk, he should lose his status as a producer-handler and become a handler. This is necessary, for the reasons discussed above in connection with other source milk, to assure complete regulation and to remove any competitive advantage which might accrue from using other source milk. Thus a producer-handler in order to maintain his status as such may obtain milk from only two sources—his own production or pool plants.

Producer. All dairy farmers who deliver milk directly to a pool plant should be producers; any dairy farmers who have been regularly delivering milk to a pool plant, but whose milk is diverted from the farm to a nonpool plant by either a cooperative association or the handler operating the pool plant to which they regularly delivered should also be producers. Such diversions, which are sometimes made when seasonal or short term surpluses develop and need to be moved to a nonpool plant, eliminate the receiving of milk at the pool plant and the transporting of it from the pool plant to the nonpool plant by routing the milk directly from farms to nonpool plants.

Classification. All milk and milk products received by a handler should be classified on the basis of the form in which or the purpose for which it is used as either Class I milk or Class II milk. Since skim milk and butterfat are not used in the same proportions in most products as they appear in milk or milk products received by a handler, skim milk and butterfat should be classified separately according to their separate uses. For milk products received or disposed of by a handler which cannot be accurately tested for skim milk and butterfat content and for condensed products from which water has been removed, the amount of skim milk and butterfat which was actually used to produce such products or, if such information is not available, standard factors of skim milk and butterfat used to produce such products shall be employed to determine the receipts or disposition of skim milk and butterfat in such products.

Class I milk should comprise all skim milk and butterfat (1) disposed of in the form of milk, skim milk, buttermilk, flavored milk, flavored milk drinks, cream (including sour cream), any mixture of cream and milk or skim milk, or concentrated milk disposed of for fluid consumption, except milk, skim milk, or cream disposed of in bulk to another milk plant and classified as Class II in accordance with the conditions of transfer described below, milk, skim milk, or cream disposed of in bulk during any of the months of March through August to a manufacturer of candy, soup, or bakery products who does not dispose of any milk in fluid form, frozen cream placed in storage, or skim milk dumped or fed to livestock; and (2) all shrinkage of skim milk or butterfat in producer milk which is in excess of the amount of such shrinkage permitted to be classified as Class II milk.

All milk, skim milk, buttermilk, flavored milk, flavored milk drinks, cream (including sour cream), and any mixtures of cream and milk or skim milk which is distributed within the cities of Alliance, Canton, and Massillon must be made from milk of the same quality and from milk which is produced pursuant to the health regulations of the respective cities. Since a very substantial majority of these products which are distributed within the marketing area are subject to the health regulations of these three cities, classification of milk on the basis of the health regulations of these cities is appropriate.

Concentrated milk has not yet been distributed in the marketing area, but it has been distributed in certain Ohio cities. Proper classification of this product at this time will prevent any problems concerning its classification if at some future date a handler decides to start distributing it. Concentrated milk must be made from milk of similar quality to milk used in other products for fluid consumption which would be classified in Class I. Products commonly known as evaporated milk or condensed milk and which are either packed in hermetically sealed cans or are used in the manufacture of other milk products should not be considered as concentrated milk and should not be classified in Class I unless they are used in the manufacture of milk products which are in Class I.

All milk, skim milk, and cream which is received and for which the handler cannot establish utilization should be classified as Class I milk except for allowable shrinkage in Class II. Any other classification of such milk, skim milk, or cream could result in (1) some advantage to handlers who fail to keep adequate records of utilization, (2) lack of equality among handlers in the prices they pay for milk for the same use, and (3) failure of producers to receive full value of their milk on the basis of its use.

A handler can avoid classification on this basis by maintaining complete records of utilization.

All skim milk and butterfat disposed of by a handler in the form of products other than products which would indicate a Class I classification should be Class II milk. These Class II products should include, but should not be limited to, ice cream, imitation ice cream, and other frozen desserts and mixes for such products (liquid or powdered); eggnog; butter; butter oil; cheese, including cottage cheese; condensed milk or skim milk (plain or sweetened); evaporated milk; casein; nonfat dry milk solids; dry whole milk; condensed or dry buttermilk; whey; powdered malted milk; lactose; yogurt; or aerated products.

Cream which is placed in storage and frozen should be classified in Class II. Cream is stored to a considerable extent in the months of heavy milk production for use primarily in ice cream in the months of short production.

Any skim milk which is dumped or fed to livestock or disposed of for livestock feeding should be classified as Class II milk if the market administrator can verify such dumpage or feeding or disposition for feeding.

Shrinkage at a plant should be determined by subtracting from the total receipts of skim milk and butterfat at such plant the total disposition of skim milk and butterfat, respectively, from such plant. If the receipts at the plant included both producer milk and other source milk the total shrinkage should be prorated between producer milk and other source milk. None of the shrinkage should be assigned to milk received from another pool plant because the shrinkage on such milk should be allowed to the handler operating such other pool plant. Shrinkage on milk diverted from farms to a pool plant other than the plant to which such milk is usually delivered should be allowed at the plant at which it is actually first received. No shrinkage should be allowed on milk diverted from a pool plant to a nonpool plant.

A plant which is operated in a reasonably efficient manner and for which complete and accurate records of receipts and utilization are maintained should have a total shrinkage of well under two percent of its total receipts. It is concluded that any shrinkage assigned to producer milk which is not more than two percent of total receipts of producer milk should be classified as Class II milk, and any shrinkage which is in excess of two percent of such receipts should be classified as Class I milk. All shrinkage assigned to other source milk should be classified as Class II milk.

Milk, skim milk, or cream transferred from a pool plant to another plant, except a producer-handler's plant, should be classified either as Class I milk or on the basis of utilization at the receiving plant and an agreement between the buyer and seller. Transfers of milk, skim milk or cream to another pool plant or to a nonpool plant operating a route in the marketing area should be classified as Class II if both handlers indicate to the market administrator in their monthly reports their desire for such classification and if sufficient Class II utilization is available after the prior allocation of shrinkage, products received and disposed of in like form, frozen cream, and other source milk as described below. Otherwise such transfers should be Class I milk. Transfers to any other nonpool plant shall be classified on a similar basis except that in addition to the conditions described above which are necessary for Class II classification, Class II classification of milk transferred to a nonpool plant should be permitted only if the milk received at the nonpool plant from dairy farmers constituting the regular source of milk for such nonpool plant is equal to or greater than the total Class I disposition from such plant. If such receipts from dairy farmers are less than total Class I disposition, transferred milk should be classified as Class I milk to the extent of the difference and any remaining transferred milk should be Class II milk.

Transfers to producer-handlers are discussed elsewhere in this decision. Milk which is usually received at a pool plant but which is diverted directly from farmers to a nonpool plant should be classified as though it had been transferred from the pool plant to the nonpool plant.

When the total classification of all milk received at a plant has been determined, it is necessary to determine which of the milk so classified was producer milk and which was other source milk if both types of milk were received. A sequence of allocating skim milk and butterfat received in various forms and from various sources to the utilizations of skim milk and butterfat, respectively, is prescribed.

Skim milk and butterfat in shrinkage which is prorated to producer milk as previously described should be first allocated to the appropriate class. Since skim milk and butterfat received in the form of products other than milk, skim milk, or cream may to a considerable extent be disposed of in the same form without further processing, skim milk and butterfat received in such forms should be allocated to skim milk and butterfat disposed of in like forms. This procedure, which makes it unnecessary for the handler to show or the market administrator to verify that products received were actually disposed of without further processing, is adequate for purposes of allocation. If the volume of such products received is greater or less than the volume of like products disposed of, the difference will be allocated in subsequent steps of allocation.

Handlers proposed that certain products received by handlers in packaged form and disposed of in the same form without further processing be exempt from the provisions of the order. Pursuant to the allocation here proposed any such products which are Class II products and are other source milk will be subject to the order only to the extent that the handler shall report and classify such receipts and disposition and permit verification of the classification of such receipts and utilization by the market administrator. However, any such products which are Class I and are other source milk will be subject to the order not only to the extent described above for such Class II products, but will also be subject to the payments described earlier in this decision on Class I other source milk.

Next skim milk and butterfat contained in frozen cream removed from storage or received from another handler should be allocated to skim milk and butterfat disposed of in the form of ice cream (or similar frozen desserts or mixes for such products). The primary use of frozen cream is for ice cream; therefore, this allocation is appropriate. Since frozen cream is not usually used as the exclusive source of butterfat for ice cream but is usually blended with fresh cream, ice cream disposed of should always contain more butterfat than was contained in frozen cream removed from storage or received. This method of allocation should seldom if ever result in frozen cream being allocated to Class I milk.

Next butterfat and skim milk contained in other source milk should be allocated to skim milk and butterfat in series beginning with Class II. Since the payments discussed earlier in this decision on Class I other source milk will be different on other source milk obtained from plants subject to another milk marketing order than on other source milk from other sources, it is necessary for the allocation procedure to provide for a situation in which both of these types of other source milk are received at a plant at which classification is being determined. Other source milk other than that received from plants subject to another order should first be allocated to skim milk and butterfat in series beginning with Class II. Then remaining other source milk (that received from plants subject to another order) should be allocated to skim milk and butterfat in series beginning with any remaining Class II milk. This sequence of allocation of the two types of other source milk should tend to minimize payments on other source milk since the payments on other source milk obtained from a plant subject to another order will generally be less than the payments on other source milk from other sources.

Handlers proposed that if in any of the months of October through January receipts of milk from producers are less than 120 percent of the total volume of Class I milk during such month, then other source milk should be allocated to Class I milk to the extent of the difference between receipts from producers and 120 percent of Class I milk. Such allocation procedure should not be adopted. The possibility was pointed out earlier in this decision that handlers may be able to obtain other source milk for use in Class I at a price below the Class I price. In view of this possibility the allocation procedure proposed by handlers, which allocates other source milk to Class I while some producer milk is being allocated to Class II, would offer an incentive to handlers to maintain supplies of producer milk at a level barely adequate in September and February and to rely on supplemental supplies of other source milk in October through January.

Next skim milk and butterfat classified pursuant to the transfer conditions described above should be allocated to the classes in which it is classified. The remaining amounts of Class I milk and Class II milk should be the amounts of producer milk, exclusive of shrinkage, in each class. Add to these remaining amounts such amounts of shrinkage in producer milk and the results should be the classification of producer milk including shrinkage. If the total of all Class I and Class II milk in producer milk so computed exceeds the amount of producer milk reported to have been received at the plant for which the computation is being made, such excess (hereinafter referred to as overrun), should be allocated to the lowest class remaining, and the remaining amounts show the classification of producer milk. Any overrun at a pool plant should be paid for by the handler operating the plant at the price for the class to which such overrun was allocated. Payment for such overrun is appropriate because such overrun could be a result of underweighing or undertesting producers' milk or of failing to maintain complete and accurate records of the receipts and utilization of producer milk.

Since uniform prices to be paid producers are to be calculated monthly, the procedures described above for classifying milk should be carried out with respect to all milk received during each month.

Class prices. Class I prices should be established at a level which in conjunction with the Class II price hereinafter concluded to be appropriate will result in returns to producers high enough to maintain an adequate but not excessive supply of milk to meet the requirements of the market.

Pricing formulas which cause prices to change automatically with changes in market conditions are in general use in pricing milk sold in fluid milk markets. Such a pricing formula is desirable for pricing Class I milk in the Stark County market and should cause prices to change in response to (1) changes in the basic value of milk, and (2) changes in local market conditions which affect market supply or market demand.

Milk produced for a fluid milk market has a basic value equivalent to its value for use in the manufacture of dairy products. Reserve supplies of milk which are a necessary part of an adequate supply for a fluid market are disposed of in the manufacture of dairy products. Changes in this basic value generally reflect changes in costs of producing milk, alternative opportunities for resources used in milk production and the cost of shifting to alternative enterprises, the general level of prices, and many other factors which affect milk production.

Evaporated milk represents an important outlet for milk manufactured into dairy products. Prices paid to farmers for milk delivered to several different groups of plants engaged primarily in the manufacture of evaporated milk are available. One such group of plants for which prices are available at an early date in the following month is the one which comprises 18 different locations in Wisconsin and Michigan and which is used in other marketing orders in Ohio and throughout the mid-west. Movements in prices paid at these 18 locations are generally representative of movements in prices paid by other plants manufacturing evaporated milk and in the basic manufacturing value of milk. The average of the prices paid at these 18 locations should be used in determining the basic value of milk.

Handlers contended that prices paid for milk at these 18 locations should not be used to measure the basic manufacturing value of milk because milk from these locations has in time of extreme milk shortages been used as supplemental supplies for fluid milk markets. The fact that milk purchased at these locations is used primarily for maufacture into evaporated milk and is purchased in direct competition with other manufactures of evaporated milk and other milk products indicates that prices paid at these locations are a good measure of the manufacturing value of milk.

Other dairy products which represent important outlets for milk are cheese, butter, and nonfat dry milk solids. The prices of these products (and the prices paid for milk by manufacturers of these products) and the prices paid at the 18 locations mentioned above for milk used primarily in the manufacture of evaporated milk usually change in close relationship to each other; however, from time to time these prices depart from their usual relationship. Milk distributors purchasing milk for fluid distribution usually must compete with the most favorable manufacturing uses, particularly in a market such as Stark County where milk for use in several different manufactured products is obtained from the market supply area. It is therefore concluded that the basic value of milk would best be measured by using as alternatives the average price paid at the 18 locations mentioned above and values based on certain combinations of cheese, butter, and nonfat dry milk solids prices. No good series of prices paid for milk by manufacturers of cheese, butter, or nonfat dry milk solids is available soon enough to be used for this purpose.

A formula which was used a few years ago somewhat as a guide by manufacturers of evaporated milk for determining the price they paid for milk was based on the prices of butter and cheese. To determine the value of a quantity of cheese containing approximately the same quantity of butterfat as a pound of butter, the cheese price was multiplied by 2.4. The value of a pound of butter and the value of an equivalent amount of butterfat in cheese were then weighted on the basis of the volume of production of those products in a past period, and an average value determined. This value was then multiplied by 1.3 to approximate a value for a pound of butterfat and the skim milk in whole milk associated with a pound of butterfat. Multiplying this value by 3.5 would give a value for milk containing 3.5 percent of butterfat. This formula should be used as an alternative for determining the basic value of milk.

Another alternative formula based on the prices of butter and nonfat dry milk solids is used quite generally in marketing orders in Ohio. In such a formula the price of butter is used to reflect the value of butterfat in milk and the price of nonfat dry milk solids is used to reflect the value of skim milk. In order to keep the level of the value of milk computed pursuant to this formula in line with the levels computed pursuant to the other alternative formulas, 3 and 5.5 cents should be deducted from the prices of butter and nonfat dry milk solids, respectively. The amount remaining after deducting 3 cents from the butter price should be multiplied by 1.2 to convert to the approximate equivalent of the value of a pound of butterfat and by 3.5 to arrive at the value of butterfat contained in a hundred weight of milk containing 3.5 percent of butterfat. The amount remaining after deducting 5.5 cents from the price of nonfat dry milk solids should be multiplied by 8.2 to convert to the approximate equivalent of the value of skim milk contained in a hundredweight of milk containing 3.5 percent of butterfat.

The relationship between prices for the Stark County market and for other markets in Ohio with marketing orders, particularly Cleveland, should remain constant unless local market conditions indicate need for a change. In order to assure this relationship the basic formula price for Stark County should be the same as for Cleveland. (The Cleveland basic formula price is identical or similar to the basic formula price in other Ohio marketing orders.) Accordingly, the basic formula price should be the highest value resulting from the three alternative formulas described above, and the prices for butter, cheese, and nonfat dry milk solids to be used in the above formulas should be obtained from the same sources as those which are used in the Cleveland marketing order. These are, for butter, the average of the daily wholesale selling prices of Grade A or 92-score bulk creamery butter at Chicago; for cheese, the average of the prices for "Cheddars" on the Wisconsin Cheese Exchange; and for nonfat dry milk solids, the average of the prices for spray and roller process nonfat dry milk solids in barrels for human consumption, f. o. b. manufacturing plants in the Chicago area for the period of the 26th day of the month preceding the month for which prices are being computed through the 25th day of the month for which prices are being computed. The butter and cheese prices would be simple averages of the prices for each trading day in the month for which prices are being computed.

To the basic formula price computed as explained above must be added amounts which will result in a level of prices herein concluded to be necessary and a desirable seasonal pattern of prices. Important considerations in establishing prices for Stark County are prices paid for milk in markets which compete with Stark County for supplies. The production areas for Akron, Cleveland, and Youngstown, Ohio, Pittsburgh, Pennsylvania, and Wheeling, West Virginia, all overlap the Stark County production area. Receiving stations for Cleveland and for Pittsburgh are located within the Stark County production area and these two markets compete to a larger extent than the other markets named above for supplies with Stark County. Since the Cleveland market is a strong competitor for supplies with the Stark County market and since a marketing order issued by the Secretary of Agriculture regulates milk handling in Cleveland, prices established for the Stark County market should be in close relationship with prices paid in the Cleveland market.

Analysis of the prices which have been received by Cleveland producers in the areas where the Stark County and Cleveland supply areas overlap indicates that addition of the following amounts to the basic formula price should under usual conditions result in prices to producers supplying the Stark County market comparable with prices received by producers supplying the Cleveland market.

September, October, November, December, January, and February	$1.70
March, April, July, and August	1.30
May and June	.90

This schedule will result in a considerably wider seasonal variation in prices received by producers supplying the Stark County market than has existed in recent years. This should be an incentive for producers to produce more milk in the fall and winter months and less milk in the spring and summer months. Such a shift in production would be highly desirable.

Plants which distribute milk within the boundaries of the cities of Alliance, Canton, and Massillon must comply with the regulations issued by the health authorities of the respective cities and must obtain their milk supplies from sources approved by such health authorities. Milk distributed from plants which distribute milk only in the portions of the marketing area outside of these three cities must comply with less stringent quality standards imposed by State laws and regulations. In the administration of these State laws and regulations monthly inspection of the milk from each producer as it arrives at the plant is required. Farms of producers are inspected by a State inspector upon complaints that milk being produced on such farms is not meeting the quality standards. A large portion of these producers could qualify to produce milk in compliance with the regulations of the health authorities of Alliance, Canton or Massillon by making minor changes in their production facilities and by exercising greater care. It is concluded that the difference in quality between milk produced pursuant to the Alliance, Canton, and Massillon health regulations and milk produced for distribution in the portions of the marketing area outside of the boundaries of these three cities is sufficient to necessitate a price differential to reflect this difference in quality, and that Class I prices for milk which is not produced pursuant to the health regulations of any of these three cities should be 25 cents lower than the Class I prices described above.

At times local conditions may warrant a relationship between Stark County prices and prices in markets which compete with Stark County for supplies different from the relationship which would result from Class I prices computed by adding to the basic formula price the amounts described above. If with Class I prices so computed the market supply is either insufficient or excessive in relation to market demand (including the necessary margin of reserve), then the Class I price should be adjusted—upward if supplies are insufficient and downward if supplies are excessive.

Producers and handlers agreed that market supplies were adequate but not excessive in any month in which receipts of milk from producers are equal to 120 percent of market requirements for in-

spected milk, or inversely, in any month in which market requirements for inspected milk are about 83 percent of receipts from producers. The record indicates that the market was adequately supplied in November 1950 when milk disposed of in the form of milk and cream (which is roughly comparable with Class I milk as defined herein) by pooling milk distributors was about 85 percent of receipts from producers. It is concluded that the market will be adequately supplied in any month in which the total volume of Class I milk is equal to 85 percent of receipts from producers.

November is usually the month in which receipts from producers are lowest in relation to market requirements. If the market is to be adequately supplied in November, receipts from producers must be greater in relation to market requirements in other months of the year. On the basis of the seasonal variation which occurred in receipts from producers and in the volume of milk disposed of in the form of milk and cream by pooling milk dealers during the three years 1949–1951, it is concluded that if the relationship between market supplies and market requirements in November is to be such that the total volume of Class I milk is equal to 85 percent of receipts from producers, then a similar relationship during the other months of the year should be about as follows:

January	78	July	66
February	77	August	68
March	73	September	73
April	69	October	78
May	60	November	85
June	62	December	83

If the seasonal variation in this relationship were the same each year and followed the seasonal pattern above, then any departure in the relationship from the standard relationship shown above would indicate a trend in the relationship and should be justification for a change in prices; however, the seasonal variation is not the same from year to year, and a review of market statistics indicates that in the past many of the departures in the relationship between market supply and demand from the standard relationship shown above were due to these differences in seasonal variation and were not indications of a trend in the relationship. Therefore, if this relationship is to be used to measure trends in the relationship between market supply and demand as a basis for adjusting prices, then some method must be found of distinguishing between changes in the relationship which reflect trends and those which do not. A twofold method which has been used in other marketing orders for this purpose and which appears to be suitable and appropriate for use in this marketing order involves (1) using a two month period to compute relationships between market supply and demand, and (2) making price adjustments only after the relationship during such a two month period has changed by a prescribed amount.

It is concluded herein that the Class I price for each month should be announced on the 5th day of the next month. At that time the most recent two months for which information on receipts and classification of milk are available are the two months immediately preceding the month for which a price is being computed. It is concluded that these two months should be used to measure the current relationship between market supply and market demand. Total receipts from producers indicate market supply, and the total volume of milk classified as Class I indicates market demand since Class I includes generally those products required by health regulations to be made from locally approved milk. The standard relationship between receipts from producers and the volume of Class I milk—that is, the relationship which in view of a normal seasonal pattern is considered to represent an adequate but not excessive supply of milk in relation to market demand—for each two month period of a year and the month during which such relationship would be used for computing prices are as follows:

Two-month period	Standard relationship	Month for which prices are computed
January–February	78	March.
February–March	75	April.
March–April	71	May.
April–May	64	June.
May–June	61	July.
June–July	64	August.
July–August	67	September.
August–September	70	October.
September–October	76	November.
October–November	82	December.
November–December	84	January.
December–January	80	February.

Statistical analysis to determine the amount of price change which should be associated with a given departure in current relationship between market supply and demand from the standard relationship indicates that an average price change of 3 cents for each one point of departure in the percentage relationship would have resulted in keeping prices in good alignment with changes in market supply and demand in recent years. It should continue to do so. However, price changes occasioned in this manner should not be permitted to narrow or reduce the seasonal variation in Class I prices concluded herein to be desirable unless a marked change in the relationship between market supply and market demand occurs. To accomplish this purpose it is concluded that (1) in the months of shortest supply, October, November and December, Class I prices should be increased 4 cents for each point that the current relationship between market supply and demand exceeds the standard relationship and decreased 2 cents for each point that the current relationship is below the standard relationship; (2) in the months of greatest supplies, April, May, June, and July, Class I prices should be increased 2 cents for each point that the current relationship exceeds the standard relationship and decreased 4 cents for each point that the current relationship is below the standard relationship, and (3) in the other months of the year Class I prices should be changed 3 cents in the same direction for each point that the current relationship departs from the standard relationship.

It was concluded above that the Class I price should be changed in response to a change in the relationship between market supply and market demand only after the change had reached a prescribed amount. This can be accomplished by establishing brackets of deviations from the standard relationship. These brackets and the amount of price adjustment applicable to each bracket, using the rates described above, should be as follows:

Deviation from standard relationship	Price adjustment		
	Jan., Feb., Mar., Aug., and Sept.	Apr., May, June, and July	Oct., Nov., and Dec.
+12 or over	+38	+25	+50
+9 or +10	+28	+19	+38
+6 or +7	+20	+13	+26
+3 or +4	+10	+7	+14
+1 or −1	0	0	0
−3 or −4	−10	−14	−7
−6 or −7	−20	−26	−13
−9 or −10	−28	−38	−19
−12 or −13	−38	−50	−25
−15 or −16	−38	−50	−31
−18 or −19	−38	−50	−37
−21 or −22	−38	−50	−43
−24 or under	−38	−50	−50

(Deviations from the standard utilization percentage are computed by algebraically subtracting the current relationship from the standard relationship.) In case a deviation falls between brackets, the adjustment is determined by the adjacent bracket which is the same as or nearest to the bracket used in the previous month. Any market conditions which develop that might warrant price adjustments greater than the maximum adjustments provided for in the above table should be considered at a hearing.

Concern was expressed in some of the exceptions that the supply-demand adjustment as described above might not be appropriate because both supplies and sales which would be subject to the order are somewhat greater than the supplies and sales used as a basis for computing the supply-demand adjustment. Such concern may be well founded, and the propriety of the proposed supply-demand adjustment can best be judged by observing what its results would be. Since it has been concluded above that the Class I prices established in any order regulating milk handling in Stark County should be closely related to the Cleveland Class I price, and in order to permit observation for a few months of how the proposed supply-demand adjustment would operate, it is concluded that for each month from the effective date of any Stark County order through July 1953 the Class I price in such Stark County order should be the Cleveland Class I price less 15 cents. Deduction of the 15 cents is necessary to reflect the Cleveland location adjustment or the higher hauling rates to Cleveland in the areas where the Stark County and Cleveland supply areas overlap. If during the first few months it becomes apparent that the supply-demand adjustment is not well adopted to market conditions, then a hearing can be held and the defects corrected before the supply-demand adjustment becomes operative.

Class I milk disposed of outside the marketing area should be priced at the same price as Class I milk disposed of in the marketing area. Handlers proposed that the price for packaged milk sold by handlers f. o. b. their plant to purchasers who disposed of the milk more than 8 miles outside of the boundaries of the marketing area be 25 cents less than the regular Class I price. They contended that these outlets could not be retained at the full Class I price and that unless these outlets were available milk presently disposed to such outlets would have to be used in Class II and would become a burden to the market. This should not be the case. If these outlets are lost the market requirements for milk are reduced accordingly and the Class I price should be reduced enough to restore the proper balance between market supply and demand. The pricing formula proposed above should have this result. The pricing of Class I milk sold outside of the marketing area at a price lower than the regular Class I price would mean that the sales outside of the market are not making their share of the contribution toward the maintenance of a market supply sufficient to satisfy all the needs of the market plus the outside sales. No conditions were shown to exist which would justify this sort of pricing. The maintenance of a supply sufficient to meet the requirements for Class I sales within the marketing area and for Class I sales in certain areas outside of the marketing area, as long as such outside sales are priced at least as high as milk sold within the marketing area, may be in the direction of more efficient distribution of milk and thus be in the public interest.

Handlers insisted that if cream is classified in Class I, the price for cream should be 45 cents less than the regular Class I price. Their main reasons for this position related to the costs of processing and distributing cream and their desire to retain a certain relationship between prices of milk and cream. The prices which handlers who have been purchasing milk through the present pooling arrangement paid for milk used in cream in 1951 ranged from 30 to 45 cents below the price paid for milk distributed as fluid milk and averaged 39 cents for the year. Pursuant to the present pooling plan the price paid for milk used as cream applies to a volume of milk containing 3.5 percent of butterfat which contains an amount of butterfat equivalent to the amount of butterfat contained in the cream—that is, the price applies to the butterfat and skim milk contained in the milk used to produce cream, not just to the butterfat and skim milk contained in the cream as would be the case pursuant to the proposed order. Although the exact effect of this difference cannot be calculated from data in the record, it is estimated on the basis of what data are in the record that this difference amounts to from 5 to 10 cents per hundredweight in the cost of milk for cream. On the basis of these figures it appears that handlers have been paying not 45 cents per hundredweight less as they propose, for milk used for cream than for milk disposed of as fluid milk, but perhaps 30 to 35 cents less when the basis of pricing is made comparable to that in the proposed order.

The fact that processing and distributing costs on cream are higher than on milk does not constitute justification for establishing prices for milk disposed of in the form of cream at a lower level than prices for milk disposed of as fluid milk.

The Class II price should be the same as the basis formula price.

The Class II price should be high enough to discourage handlers from developing supplies of producer milk primarily for use in Class II products and should be low enough that handlers will continue to accept from producers on a year-round basis enough milk to meet the market requirements (including necessary reserves).

Ice cream has been one of the more important outlets for the reserve supplies of milk in the Stark County market. In the portions of the marketing area which have local health regulations relating to milk products (Alliance, Canton and Massillon) the quality of milk used to produce ice cream and cottage cheese must be somewhat higher than the quality of milk usually used in the production of other manufactured products such as evaporated milk, cheese, butter, and nonfat dry milk solids. At the basic formula price ice cream and cottage cheese should continue to provide large outlets for reserve supplies of milk. In recent years the proposed basic formula price would not have been substantially different from the price which handlers actually paid for milk used in the products proposed to be included in Class II.

Located within the production area are a large number of plants engaged in manufacturing evaporated milk, cheese, or butter. Some of the reserve supplies of milk may have to be disposed of to these plants from time to time. As the basic formula price changes in relation to the prices of butter or cheese or the prices paid for milk by plants engaged in the manufacture of evaporated milk, the relationship between the prices paid for milk by these manufacturing plants may change as between plants making different products. Handlers can dispose of reserve supplies of milk to the plants which are currently paying the highest prices. Some of these plants have been paying prices equivalent to the proposed basic formula price.

Since it is concluded in this decision that butterfat and skim milk should be accounted for separately for classification purposes, Class I and Class II prices should be broken down into prices for skim milk and prices for butterfat. The only elements used in the pricing formula which indicate values primarily for butterfat and for skim milk are the prices of butter and the prices of nonfat dry milk solids, respectively. Changes in the prices of these products are considered to accurately represent changes in the value of butterfat and skim milk. It is concluded that Class I and Class II prices should be broken down into prices for butterfat and skim milk in the same relationship that the value based on the price of butter and the value based on the price of nonfat dry milk solids contribute to the total value resulting from the formula based on butter and nonfat dry milk solids prices which is one of the alternatives used in computing the basic formula price.

Distributing proceeds to producers. The amounts paid by all handlers for producer milk and for Class I other source milk should be combined into one total and distributed among all producers on the basis of the volume of milk delivered. This is commonly known as a market-wide pooling arrangement. Producers supplying milk to a pool plant for which the handler operating such plant does not hold a permit from the health authorities of either of the cities of Alliance, Canton, or Massillon should share proportionately with other producers in Class I and Class II utilization, but since Class I producer milk at such plants is priced at 25 cents below other Class I producer milk, this lower Class I price should be reflected in the returns to such producers. For example, when 60 percent of all producer milk in the market is Class I milk, producers supplying milk to such plants would receive 15 cents less than other producers; and when 100 percent of all producer milk in the market is Class I milk, producers supplying such plants would receive 25 cents less. This difference is necessary to reflect differences in the quality of milk. Thus two uniform prices will be announced for each month—one to be paid to producers delivering to pool plants for which the health authorities of Alliance, Canton, or Massillon have issued permits, and one to be paid to producers delivering to other pool plants.

A large portion of the Stark County market has been operating under a market-wide pooling arrangement for many years. Prices paid to producers not included in the pooling arrangement have been based generally on the uniform price resulting from the operation of the pooling arrangement. Thus there has been little variation in the prices received by individual producers. Use of an individual handler pooling arrangement and the inherent variation in prices received by producers delivering to different handlers could cause uneconomic shifts of producers among handlers.

Certain handlers have been carrying larger proportions of the market reserve supplies than others and through concentration of these supplies have afforded economies in manufacturing them into dairy products. Under a market-wide pooling arrangement these reserves may remain unequally distributed among handlers while the lower returns realized from them are distributed equally among all producers.

The cooperative association proposed a certain type of base plan to be used in distributing proceeds to producers. This plan was also intended to offer some incentive for producers to reduce the seasonal variation in their production. The proposed plan would admittedly cause only a small proportion of the producers—those with the widest seasonal variation in production—to receive a lower price than other producers, and the amount which prices to such producers would be reduced would be

small. The benefits which might accrue from the proposed plan do not appear to be commensurate with the problems involved in effectuating it. These problems include the administrative job of computing and announcing bases or quotas and provision for fixing bases for a farmer who did not deliver milk during the base-making period. The seasonal variation proposed in the Class I prices should provide the necessary incentive for producers to reduce their seasonal variation in production.

Handlers should make payments to each producer for milk delivered by such producer at the appropriate uniform price. Payments due any producer for milk should be paid by the handler to a cooperative association if the cooperative association makes a written request for such payments and if the producer has given the cooperative association written authorization, in the form of a contract or in any other form, to collect such payments. In making such payments for producer milk to a cooperative association the handler making such payments should also at the same time furnish the cooperative association with a statement showing the name of each producer for whom payment is being made to the cooperative association, the volume and average butterfat content of milk delivered by each such producer, and the amount of and reasons for any deductions which the handler withheld from the amount payable to each producer. This statement is necessary so the cooperative association can make proper distribution of the money it collects among the producers for whom it collects. Handlers opposed paying a cooperative association for milk delivered by producers, primarily on the basis that it would abrogate one of their most important means of contact with producers. Producers choose by becoming members of a cooperative association to conduct their business with handlers through the cooperative association. It would appear that the contact which a handler enjoys with producers through paying them directly for milk could be maintained, even if the payments for milk are made to a cooperative association, if the handler would send each producer a statement showing the amount of milk received from such producer and the amount of payment being made to the cooperative association. Handlers generally will honor requests from producers to pay amounts due to a producer for milk, or any part thereof, to any person whom the producer directs. This requirement that handlers pay cooperative associations which producers have authorized to collect for them is, in effect, a request by producers that money due them be paid to a cooperative association.

The contract in effect between the cooperative association and its members authorizes the cooperative association to collect for milk sold by its members, and this proposed arrangement will permit that to be done pursuant to the order.

Since all producers are to receive the same price for milk (except for the quality and butterfat differentials), and since the amount which the order requires a particular handler to pay for his milk may be more or less than the amount he is required to pay to producers or cooperative associations, some method of equalizing these amounts is necessary. A producer-settlement fund should be established for this purpose. All handlers who are required to pay more for their milk than they are required to pay to producers or cooperative associations should pay the difference into the producer-settlement fund, and all handlers who are required to pay more to producers or cooperative associations than they are required to pay for their milk should receive the difference from the producer-settlement fund. Amounts paid into and out of the producer-settlement fund for this purpose will be equal, except for minor differences that may result from rounding off uniform prices. In order to permit this rounding off of prices and to permit payments to be made to any handler which audit by the market administrator reveals is due such handler from the producer-settlement fund, a reserve should be held in the producer-settlement fund at all times. The amount of the reserve contemplated in the proposed order should be sufficient for these purposes. This reserve would be adjusted each month.

Payments made by handlers on Class I other source milk should be distributed among all producers by including them in the producer-settlement fund. Any payments made by handlers to adjust for errors in prior classification and payments should also be included in the producer-settlement fund.

If at any time the balance in the producer-settlement fund is insufficient to cover payments due to all handlers from the producer-settlement fund, payments to such handlers should be reduced uniformly per hundredweight of milk. Such handlers in making payments to producers may then reduce payments to producers by an equivalent amount per hundredweight. Amounts remaining due such handlers from the producer-settlement fund should be paid as soon as the balance in the fund is sufficient, and handlers should then complete payments to producers. In order to reduce the possibility of this occurring, milk received by any handler who has not made payments required of him into the producer-settlement fund should be eliminated in the computation of the uniform price in subsequent months until such handler has completed all delinquent payments.

The uniform prices should be computed for milk containing 3.5 percent of butterfat. This follows past market practice. In distributing proceeds to producers a differential should be established for milk containing more or less than 3.5 percent of butterfat.

Producers and handlers both proposed that the butterfat differential be computed by dividing the price of butter by 10 and rounding to the next highest half cent. This butterfat differential has been used in the market for several years in paying producers whose milk is sold through the present pooling arrangement. It is somewhat less than the producer butterfat differential computed pursuant to the Cleveland order; however in the last 10 years the average butterfat content of milk received from producers has remained relatively constant—annual average butterfat content ranged from 3.77 to 3.81 percent. Since the average butterfat content of milk is near the basic test (3.5) and has remained relatively constant in recent years while the proposed butterfat differential has been in use, its use in the order is appropriate.

Administrative provisions. Certain terms are necessary in the order to provide for the proper administration of the regulations imposed by the order or to clarify or effectuate other provisions of the order.

Definitions. In addition to the definitions, discussed earlier in this decision, which define the scope of regulation of this order, certain other definitions are desirable in the interest of brevity and to assure that each usage of the term implies the same meaning.

"Act" should be defined as the Agricultural Marketing Agreement Act of 1937 which contains the statutory authority pursuant to which this order is being proposed.

"Secretary" should be defined as the Secretary of Agriculture of the United States or any other officer or employee of the United States who may be authorized to perform duties which he presently performs.

"Person" should be defined as any individual, partnership, corporation, association, or any other business unit. This definition is similar to the definition for "person" contained in the act.

"Department of Agriculture" should be defined as the United States Department or Agriculture or such other federal agency authorized to report the prices used in computing class prices in this order. This term is used in the order only in connection with these price reporting functions.

"Cooperative association" should be defined as any association of producers which the Secretary determines is qualified under the "Capper-Volstead Act", has full authority in the sale of milk of its members, is engaged in marketing milk or milk products for its members, and has all of its activities under the control of its members.

Market administrator. This order should establish an agency to administer its provisions. This agency should be headed by a market administrator who should be a person selected by the Secretary of Agriculture. The order should specify the powers of the market administrator and they should comprise all the powers authorized in the act for such agency. The market administrator should perform the following duties and such other duties as are necessary to administer the terms and provisions of the order: (1) Obtain a bond for himself and his employees who handle funds conditioned upon the faithful performance of duties; (2) employ an adequate staff to carry out his duties; (3) disburse the funds collected pursuant to the order for that purpose to pay all expenses incurred in administering the order; (4) maintain records of the operations of the agency and submit such records to the Secretary of Agriculture as requested; (5) publicly announce (unless otherwise directed) the names of any handler who has not made reports or payments as required; (6) audit handlers reports and payments by inspecting records which the order requires them to maintain and make available; and (7) publicly announce prices computed pursuant to the order.

The market administrator should also announce monthly the name of each handler who receives milk from producers and the percentages of such milk which was classified as Class I milk and as Class II milk. This information will be useful to producers and cooperative associations in allocating milk among handlers and should be useful to handlers whose supplies are either insufficient or excessive for their own needs in obtaining supplemental supplies or disposing of excess supplies.

Records and facilities, retention of records, and termination of obligations. Handlers and producer handlers should maintain and make available to the market administrator accounts and records of their operations which will verify or correct all information reported to the market administrator and all payments made pursuant to the order. These records should be retained for a three year period, and if within that period no need has arisen for further retention of such records they need not be retained longer. However if within such three year period transactions recorded by such records become connected with a court action or a proceeding under section 8c (15) (A) of the act, such records should upon written notification by the market administrator be retained until further notification by the market administrator irrespective of the three year period.

Any obligations imposed by this order should terminate after the expiration of a period of two years.

In the absence of a termination of obligations within some prescribed time, any time the application of a certain provision of the order is changed by administrative interpretation or by litigation or for any other reason in such a manner that obligations imposed by the order are changed, the market administrator may feel compelled to reaudit and recompute obligations on the basis of the changed application with respect to all milk to which the former application of the provision was made. This could extend back over several years. It is extremely difficult for handlers or the market administrator to adequately protect themselves against this sort of contingency. The termination of obligations as herein proposed will mean the handlers and the market administrator will be free from this contingency after the expiration of two years. Except in cases of court actions or proceedings under section 8c (15) (A) of the act, all verification or corrections of classification and all charges or credits resulting therefrom should be completed by the end of the two year period. Verification of classification cannot be made by the market administrator unless handlers make their accounts and records and facilities available to the market administrator as required by the order. If a handler refuses to make such accounts or records or facilities available to the market administrator the two year period after which obligations will be terminated should not begin to run until such accounts or records or facilities are made available. Obligations with respect to any transaction involving fraud or willful concealment of facts material to the obligation on the part of the person against whom the obligation is imposed by the order should not be terminated as herein proposed.

Expenses of administration. As his share of the expenses of administering this order each handler should pay not in excess of 3 cents per hundredweight with respect to (1) all producer milk received, (2) all other source milk received at a pool plant which was classified as Class I milk and (3) all other source milk at a nonpool plant operating a route in the marketing area which was classified as Class I milk and was subject to the payments described earlier in this decision. The market administrator must verify receipts and utilization of all such milk; therefore all such milk should be subject to the expenses of administration. Experience in other markets indicates that 3 cents per hundredweight with respect to all such milk should yield sufficient money to cover expenses of administration. If payment of expenses of administration at the rate of 3 cents per hundredweight yields more money than is needed, provision is made that the Secretary can prescribe a lesser rate of payment from time to time.

Marketing services. It was pointed out earlier in this decision that market-wide information concerning market supply and requirements would be useful to producers and cooperative associations in helping them maintain their production in line with market requirements. Costs involved in distributing information to producers and cooperative associations should be borne by the producers or their associations.

The cooperative association in the market has been providing marketing services to its members which include the verification of weights and tests of milk delivered by each member. The provision for such services to be rendered for producers, for whom a cooperative association does not perform such services will assure each producer that he is receiving his just proportion of the total proceeds of the market. Costs of these services should also be borne by producers.

On the basis of the costs of providing these services in other markets, and in view of the fact that handlers plants in the Stark County marketing area may be somewhat more scattered than in some markets and some may have only a few producers, it is concluded that a deduction of 6 cents per hundredweight of milk delivered by each producer should be adequate to cover these costs. Provision is made that the Secretary may reduce this deduction if experience indicates a lesser deduction will provide adequate funds. If a cooperative association is actually performing these services for producers, then in lieu of the 6 cent deduction such deduction as is authorized by such producers should be made from the amounts due producers for whom the cooperative association is performing such services and should be paid to the cooperative association.

Time schedule. Dates must be prescribed for announcing prices, filing reports and making payments. The following time schedules should allow all interested persons adequate time to perform each function. (These time limits apply to the indicated day of the month following the month for which computations are being made.)

Day of the month	Function
5th	Announcement of class prices by market administrator.
8th	Submission of monthly report of receipts and utilization by handlers.
13th	Announcement of uniform price and names of handlers who received producer milk and notification to handlers of the value of their producer milk by market administrator.
14th	Payment by handlers of amounts due to producer-settlement fund and for expenses of administration.
16th	Payments by handlers to cooperative associations and by market administrator out of producer-settlement fund.
18th	Payments by handlers to producers.

Effective time, suspension, termination, agents and separability of provisions. An order should contain provisions which (1) indicate that such order shall be effective on the date set by the Secretary and shall remain in effect until suspended or terminated; (2) require the Secretary to suspend or terminate the order or any portion thereof when such order or portion thereof no longer effectuates the policy of the act; (3) continue obligations existing at the time of suspension or termination of the order or provisions thereof until such obligations are met; (4) require liquidation of the agency administering the order upon suspension of the order; (5) authorize the Secretary to designate an agent in connection with any provision of the order; and (6) specify that the invalidation of any provision of the order with respect to any person or circumstances shall not affect the application of such provision or any other provisions of the order to other persons or circumstances.

General findings. (a) The proposed marketing agreement and order, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act;

(b) The parity prices of milk as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds and other economic conditions which affect market supply of and demand for milk, in the marketing area and the minimum prices specified in the proposed marketing agreement and order are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(c) The proposed marketing agreement and order will regulate the handling of milk in the same manner as, and will be applicable only to persons in the respective classes of industrial and commercial activity specified in a proposed

marketing agreement and order upon which a hearing has been held.

Rulings. All of the rulings contained in the recommended decision are ratified and affirmed.

Exceptions to the recommended decision were filed by Stark County Milk Producers Association, Inc.; Stark County Milk Dealers Committee; North Canton Dairies, Inc.; Chestnut Ridge Dairy; Akron Pure Milk Company; Ashland Sanitary Dairy; and Smith Dairy Products Company. Certain of the exceptions relating to the definition of the marketing area, the definition of a producer-handler, classification, class prices, and the time schedule have been considered in the findings and conclusions and the marketing agreement and order of this decision.

Exception was taken to the conclusion that any plant from which less than 18,000 pounds of Class I milk per month is distributed in the marketing area should not be a pool plant. The reason given in support of this exception was that a large number of plants selling less than 18,000 pounds of Class I milk per month in the marketing area might be established and offer unfair competition to operators of pool plants. This danger does not exist because although such plants would be nonpool plants their operators would be handlers and would be subject to the regulations to be imposed on handlers operating nonpool plants. These regulations will prevent this type of nonpool plant or any other nonpool plant from having any competitive advantage over pool plants.

Exception was taken to the pricing of milk used in the manufacture of ice cream. It was suggested that such milk be classified but left unpriced. The classification and pricing of milk for ice cream was designed so that the price fixed in the order for milk used for ice cream would be competitive with prices paid for milk and milk products by manufacturers of ice cream who are not subject to the order. The exception is denied.

In support of an exception to the price fixed for milk disposed of in the form of cream it was contended that cream brokers and jobbers not subject to the order could sell cream at lower prices than handlers. Exceptor apparently has failed to realize that any person who distributes cream in the marketing area is a handler and therefore becomes subject to the order.

Exception was taken to the standard relationship between volume of producer milk and Class I milk which is to be used in computing the supply-demand adjustment to the Class I price. This exception was based to some extent on the contention that statistics in the record showing milk and cream sales were used to approximate the volume of Class I milk when according to the classification set forth in the proposed order flavored milk and milk drinks and buttermilk would also be classified as Class I milk. The cream sales figures as shown in the record were the volumes of milk containing 3.5 percent of butterfat which would have been required to yield the volume of butterfat contained in cream sales. The cream sales volumes which will be classified as Class I pursuant to the proposed order will be the actual volumes of cream sold and the skim milk resulting from the separation of such cream will be classified on the basis of its utilization. Evidence in the record indicates that the volume of flavored milk and milk drinks and buttermilk may approximately equal the volume of skim milk remaining after the separation and standardization of cream sales. Therefore, in using the statistics in the record showing milk and cream sales to approximate Class I sales consideration was given to the fact that pursuant to the proposed order flavored milk and milk drinks and buttermilk would be in Class I.

Exceptions were taken to certain other findings and conclusions and provisions of the proposed order. All of the exceptions not specifically ruled on are hereby denied for the reasons set forth in support of the findings and conclusions or order provisions to which the exception referred.

Order that a referendum be conducted among producers. Pursuant to section 8c (19) of the Agricultural Marketing Agreement Act of 1937, as amended [7 U. S. C. 608c (19)], it is hereby directed that a referendum be conducted among the producers (as defined in the proposed order regulating the handling of milk in the Stark County, Ohio, marketing area) who during July 1952 were engaged in the production of milk for sale in the marketing area specified in the aforesaid order to determine whether such producers favor the issuance of such order.

The month of July 1952 is hereby determined to be the representative period for the conduct of such referendum.

Mr. A. T. Radigan is hereby designated as agent to conduct such referendum in accordance with the procedure for the conduct of referenda to determine producer approval of milk marketing orders as published in the Federal Register on August 10, 1950 (15 F. R. 5177).

Marketing agreement and order. Annexed hereto and made a part hereof are two documents entitled respectively "Marketing Agreement Regulating the Handling of Milk in the Stark County, Ohio, Marketing Area," and "Order Regulating the Handling of Milk in the Stark County, Ohio, Marketing Area," which have been decided upon as the detailed and appropriate means of effectuating the foregoing conclusions. These documents shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and orders have been met.

It is hereby ordered, That all of this decision, except the attached marketing agreement, be published in the FEDERAL REGISTER and that the findings and conclusions and general findings and the order regulating the handling of milk in the Stark County, Ohio, marketing area to be so published as a part of this decision shall include the full text of such findings and conclusions and general findings and order, respectively. The regulatory provisions of said marketing agreement are identical with those contained in the order which will be published with this decision.

This decision filed at Washington, D. C., this 13th day of October, 1952.

CHARLES F. BRANNAN,
Secretary of Agriculture.

Order[1] Regulating the Handling of Milk in the Stark County, Ohio, Marketing Area

Sec.

963.0 Findings and determinations.

DEFINITIONS

963.1 Act.
963.2 Secretary.
963.3 Marketing area.
963.4 Handler.
963.5 Pool plant.
963.6 Nonpool plant.
963.7 Producer.
963.8 Producer milk.
963.9 Other source milk.
963.10 Producer-handler.
963.11 Route.
963.12 Person.
963.13 Department of Agriculture.
963.14 Cooperative Association.

MARKET ADMINISTRATOR

963.20 Designation.
963.21 Powers.
963.22 Duties.

REPORTS, RECORDS, AND FACILITIES

963.30 Monthly reports of receipts and utilization.
963.31 Other reports.
963.32 Records and facilities.
963.33 Retention of records.

CLASSIFICATION

963.40 Skim milk and butterfat to be classified.
963.41 Classes of utilization.
963.42 Shrinkage.
963.43 Responsibility of handlers and reclassification of milk.
963.44 Transfers.
963.45 Computation of skim milk and butterfat in each class.
963.46 Allocation of skim milk and butterfat.

MINIMUM PRICES

963.50 Basic formula price.
963.51 Class I milk prices.
963.52 Class II milk prices.

DETERMINATION OF UNIFORM PRICE

963.60 Value of producer milk.
963.61 Computation of uniform prices.
963.62 Notification.

PAYMENTS FOR MILK

963.70 Payments to producers or cooperative associations.
963.71 Producer-settlement fund.
963.72 Payments to the producer-settlement fund.
963.73 Payments out of the producer-settlement fund.
963.74 Producer butterfat differential.
963.75 Expenses of administration.
963.76 Marketing services.
963.77 Errors in payments.
963.78 Termination of obligations.

EFFECTIVE TIME, SUSPENSION, OR TERMINATION

963.80 Effective time.
963.81 Suspension or termination.
963.82 Continuing obligations.
963.83 Liquidation.

[1] This order shall not become effective unless and until the requirements of sec. 900.14 of the rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and orders have been met.

MISCELLANEOUS PROVISIONS

963.90 Agent.
963.91 Separability of provisions.

AUTHORITY: §§ 963.0 through 963.91 issued under sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup. 608c.

§ 963.0 *Findings and determinations—(a) Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 *et seq.*), and the applicable rules of practice and procedure, as amended, governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon a proposed marketing agreement and order regulating the handling of milk in the Stark County, Ohio, marketing area.

Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act;

(2) The parity prices of milk produced for sale in the said marketing area as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds and other economic conditions which affect market supplies of and demand for such milk, and the minimum prices specified in the order are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk and be in the public interest;

(3) The said order regulates the handling of milk in the same manner as and is applicable only to persons in the respective classes of industrial and commercial activity specified in a marketing agreement upon which a hearing has been held.

(4) All milk and milk products handled by handlers, as defined in this order, are in the current of interstate commerce or directly burden, obstruct, or affect interstate commerce in milk or its products; and

(5) The necessary expenses of the market administrator for the maintenance and functioning of such agency will require the payment by each handler as his pro-rata share of such expenses 3 cents per hundredweight or such lesser amount as the Secretary may prescribe with respect to (i) all receipts of producer milk (including such handler's own production), (ii) all other source milk received at a pool plant and classified as Class I, and (iii) all other source milk on which payment is made pursuant to § 963.72 (b).

Order Relative to Handling

It is therefore ordered that on and after the effective date hereof the handling of milk in the Stark County, Ohio, marketing area shall be in conformity to and in compliance with the following terms and conditions:

DEFINITIONS

§ 963.1 *Act.* "Act" means Public Act No. 10, 73d Congress, as amended, and as reenacted and amended by the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C., 601 et seq.).

§ 963.2 *Secretary.* "Secretary" means the Secretary of Agriculture of the United States or any other officer or employees of the United States authorized to exercise the powers and to perform the duties of the said Secretary of Agriculture.

§ 963.3 *Marketing area.* "Stark County, Ohio, marketing area," hereinafter referred to as "marketing area," means all territory geographically located within (a) Stark County, Ohio, except (1) Paris Township, (2) Sugar Creek Township, and (3) Sections 6 and 7 of Lake Township; (b) Smith Township of Mahoning County, Ohio, except Great Lot 35 thereof; (c) Knox Township of Columbiana County, Ohio; (d) Sections 1, 2, 3, 10, 11, and 12 in Sugar Creek Township of Wayne County, Ohio; (e) Sections 25, 26, 27, 34, 35, and 36 in Green Township of Summit County; (f) Lots 1, 2, 9, 10, 11, 12, 19, 20, 21, 22, 29, 30, 31, 32, 39, and 40 in Suffield Township of Portage County; and (g) Lots 5, 6, 7, 8, 9, 10, 15, 16, 17, 18, 19, 20, 25, 26, 27, 28, 29, 30, 35, 36, 37, 38, 39, and 40 in Randolph Township of Portage County

§ 963.4 *Handler.* Any person, other than a producer-handler, who operates a milk handling plant (hereinafter referred to as a "plant") shall be a "handler" with respect to all skim milk and butterfat received at such plant or caused to be diverted from producers' farms to a nonpool plant by such person in any month in which a route(s) is operated wholly or partially within the marketing area from such plant. Any cooperative association shall be a "handler" with respect to the milk of any producer which it causes to be diverted from producers' farms to a nonpool plant for the account of such cooperative association.

§ 963.5 *Pool plant.* A plant, except a plant of a producer-handler, shall be a "pool plant" in any month in which a route(s) is operated wholly or partially within the marketing area from such plant if such plant is (a) located in the marketing area; or (b) located outside the marketing area and 10 percent or more of the total combined amount of skim milk and butterfat in Class I milk at such plant is disposed of on a route(s) operated wholly or partially within the marketing area: *Provided,* That a plant located either in or outside the marketing area shall not be a pool plant in any month in which the total combined amount of skim milk and butterfat in Class I milk at such plant which is disposed of on a route(s) operated wholly or partially within the marketing area is less than 18,000 pounds.

§ 963.6 *Nonpool plant.* A plant other than a plant operated by a producer-handler shall be a "nonpool plant" in any month in which it is not a pool plant.

§ 963.7 *Producer.* "Producer" means any person, other than a producer-handler, with respect to milk produced by him which milk is moved directly from his farm to a pool plant or is diverted by the operator of the pool plant or by a cooperative association to a nonpool plant.

§ 963.8 *Producer milk.* "Producer milk" means skim milk and butterfat contained in milk received from producers.

§ 963.9 *Other source milk.* "Other source milk" means all skim milk and butterfat contained in milk, skim milk, or cream, or used to produce all other milk products received from all sources other than producers and pool plants.

§ 963.10 *Producer - handler.* "Producer-handler" means any person (a) who produces milk; (b) receives no producer milk or other source milk; and (c) operates a plant from which a route(s) is operated wholly or partially within the marketing area.

§ 963.11 *Route.* "Route" means a sale or delivery (including a sale from a plant or a store) of Class I milk to a wholesale or retail stop(s), including the sale or consignment of such products by a handler to wholesale or retail outlets owned, leased, or controlled, directly or indirectly, by such handler.

§ 963.12 *Person.* "Person" means any individual, partnership, corporation, association, or any other business unit.

§ 963.13 *Department of Agriculture.* "Department of Agriculture" means the United States Department of Agriculture or such other Federal agency authorized to perform the price reporting functions specified in § 963.50.

§ 963.14 *Cooperative association.* "Cooperative association" means any cooperative marketing association of producers which the Secretary determines after application by the association; (a) to be qualified under the provisions of the act of Congress of February 18, 1922, as amended, known as the "Capper-Volstead Act"; (b) to have full authority in the sale of milk of its members and to be engaged in making collective sales or marketing milk or its products for its members; and (c) to have all of its activities under the control of its members.

MARKET ADMINISTRATOR

§ 963.20 *Designation.* The agency for the administration of this subpart shall be a market administrator who shall be a person selected by the Secretary. Such person shall be entitled to such compensation as may be determined by, and shall be subject to removal at the discretion of, the Secretary.

§ 963.21 *Powers.* The market administrator shall have the power to:

(a) Administer all of the terms and provisions of this subpart;

(b) Make rules and regulations to effectuate the terms and provisions of this subpart;

(c) Receive, investigate, and report to the Secretary complaints of violations of this subpart; and

(d) Recommend to the Secretary amendments to this subpart.

§ 963.22 *Duties.* The market administrator shall perform all duties necessary to administer the terms and provisions of this subpart, including but not limited to the following:

(a) Within 30 days following the date on which he enters upon his duties or such lesser period as may be prescribed by the Secretary, execute and deliver to the Secretary a bond, effective as of the date on which he enters upon his duties as market administrator and conditioned upon the faithful performance of such duties, in an amount and with surety thereon satisfactory to the Secretary;

(b) Employ and fix the compensation of such persons as may be necessary to enable him to administer the terms and provisions of this subpart;

(c) Pay out of the funds provided by § 963.75, (1) the costs of his bond and of the bonds of those of his employees who handle funds entrusted to the market administrator, (2) his own compensation, and (3) all other expenses, except those incurred under § 963.76, necessarily incurred by him in the maintenance and functioning of his office in the performance of his duties;

(d) Keep such books and records as will clearly reflect the transactions provided for in this subpart and upon request by the Secretary surrender the same to his successor or to such other person as the Secretary may designate;

(e) Publicly announce unless otherwise directed by the Secretary by posting in a conspicuous place in his office and by such other means as he deems appropriate the name of any person who, within 10 days after the day upon which he is required to perform such acts, has not made reports pursuant to §§ 963.30 or 963.31 or payments pursuant to §§ 963.70, 963.72, 963.74, 963.75, 963.76, or 963.77;

(f) Submit his books and records to examination and furnish such information and verified reports as may be requested by the Secretary;

(g) Audit all reports and payments by each handler by inspection of such handler's records and of the records of any other person upon whose utilization the classification of skim milk and butterfat for such handler depends; and

(h) Publicly announce by posting in a conspicuous place in his office and by such other means as he deems appropriate:

(1) On or before the 5th day of each month the minimum class prices for skim milk and butterfat for the preceding month as computed pursuant to §§ 963.51 and 963.52;

(2) On or before the 13th day of each month the uniform prices for the preceding month computed pursuant to § 963.61, the butterfat differential for the preceding month computed pursuant to § 963.74, and the name of each handler who received producer milk during the preceding month and the percentages of such milk which was classified as Class I milk and as Class II milk.

REPORTS, RECORDS, AND FACILITIES

§ 963.30 *Monthly reports of receipts and utilization.* On or before the 8th day of each month each handler shall report to the market administrator in the detail and on forms prescribed by the market administrator; (a) the quantities of butterfat and the quantities of skim milk contained in all milk, skim milk, or cream and used to produce all milk products received from all sources during the preceding month; (b) the quantities of butterfat and the quantities of skim milk contained in all frozen cream which were formerly classified pursuant to § 963.41 (b) (2) and which were removed from storage or received during the preceding month; (c) the quantities of all milk or milk products and the quantities of skim milk and butterfat contained in or used to produce such milk or milk products moved from such handlers plant during the preceding month or on hand at such plant at the end of the preceding month; and (d) such other information with respect to such receipts and utilization as the market administrator may request.

§ 963.31 *Other reports.* Other reports shall be submitted to the market administrator as follows:

(a) Each producer-handler shall make reports at such time and in such manner as the market administrator may request.

(b) On or before the 25th day of each month each handler who operated a pool plant at which producer milk was received in the preceding month shall submit such handler's producer payroll for the preceding month which shall show (1) the total pounds and the butterfat content of milk received from each producer, (2) the amount and date of payment to each producer or cooperative association pursuant to § 963.70, and (3) the nature and amount of each deduction or charge made by the handler.

§ 963.32 *Records and facilities.* Each handler and producer-handler shall maintain and make available to the market administrator or to his representative during the usual hours of business such accounts and records of any of his operations including those of nonpool plants to which any producer milk is diverted and such facilities as in the opinion of the market administrator are necessary to verify or to establish the correct data with respect to: (a) The receipts of skim milk and butterfat contained in or used to produce all producer milk and other source milk received by such handler or producer-handler; (b) the removal from storage or the receipts of all frozen cream and the quantities of butterfat and skim milk contained in such frozen cream; (c) the disposition and inventories of milk and milk products and the quantities of skim milk and butterfat contained in or used to produce such milk and milk products; (d) the weights, samples, and tests for butterfat and other contents of (1) all producer milk and other source milk received by such handler or producer-handler, and (2) all milk and milk products disposed of or in inventories held by such handler or producer-handler; and (e) all payments required to be made by such handler pursuant to §§ 963.70, 963.72, 963.74, 963.75, 963.76 and 963.77.

§ 963.33 *Retention of records.* All books and records required under this subpart to be made available to the market administrator shall be retained by the handler or producer-handler for a period of three years to begin at the end of the calendar month to which such books and records pertain: *Provided,* That if within such three-year period the market administrator notifies the handler or producer-handler in writing that the retention of such books and records or of specified books and records is necessary in connection with a proceeding under section 8c (15) (A) of the act or a court action specified in such notice the handler or producer-handler shall retain such books and records or specified books and records until further written notification from the market administrator. In either case the market administrator shall give further written notification to the handler or producer-handler promptly upon the termination of the litigation or when the records are no longer necessary in connection therewith.

CLASSIFICATION

§ 963.40 *Skim milk and butterfat to be classified.* Skim milk and butterfat contained in milk, skim milk, and cream or used to produce milk products received during each month from all sources by each handler shall be classified pursuant to §§ 963.41 through 963.46.

§ 963.41 *Classes of utilization.* Subject to the conditions set forth in § 963.43 and § 963.44 skim milk and butterfat shall be classified separately as follows:

(a) Class I milk shall be all skim milk including reconstituted skim milk and all butterfat:

(1) Moved from a plant during the month or on hand at a plant at the end of the month in the form of milk, skim milk, buttermilk, flavored milk, flavored milk drinks, cream including sour cream, or any mixture of cream and milk or skim milk, except skim milk and butterfat which is classified as Class II milk pursuant to paragraph (b) (1), (2), or (3) of this section;

(2) Used to produce concentrated milk for fluid consumption which was moved from a plant during the month or was on hand at a plant at the end of the month; or

(3) In shrinkage of producer milk as computed pursuant to § 963.42 (b) which is in excess of such shrinkage classified as Class II milk pursuant to paragraph (b) (4) of this section.

(b) Class II milk shall be all skim milk including reconstituted skim milk and all butterfat;

(1) Contained in skim milk which is dumped or fed to livestock by the handler or is moved from a plant and disposed of to farmers or livestock feeders for livestock feeding;

(2) Contained in cream which was moved from a plant during the month to a cold storage warehouse in the form of frozen cream or in the form of cream to be frozen, or which was on hand at a plant at the end of the month in the form of frozen cream;

(3) In shrinkage of skim milk and butterfat contained in producer milk in amounts equal to either the amounts of skim milk and butterfat, respectively, computed pursuant to § 963.42 (b) or amounts equal to 2 percent of the skim milk and butterfat, respectively, contained in producer milk, whichever amounts are smaller;

(4) In shrinkage of skim milk and butterfat contained in other source milk as computed pursuant to § 963.42 (b); or

(5) Used to produce or contained in ice cream, imitation ice cream, and other frozen desserts and mixes for such products (liquid or powdered); eggnog; butter; butter oil; cheese, including cottage cheese; bulk condensed skim milk or whole milk (sweetened or unsweetened); evaporated or condensed milk (or skim milk) in hermetically sealed cans; casein; nonfat dry milk solids; dry whole milk; condensed or dry buttermilk; whey; powdered malted milk; lactose; yogurt; aerated products; or any other products other than those specified in paragraph (a) of this section which products are moved from a plant during the month or are on hand at a plant at the end of the month.

§ 963.42 *Shrinkage.* Shrinkage of skim milk and butterfat contained in producer milk and in other source milk shall be computed each month as follows:

(a) Combine into separate totals for skim milk and butterfat all skim milk and butterfat contained in all milk, skim milk, and cream or used to produce all milk products received during the month from all sources, and deduct therefrom all skim milk and butterfat, respectively, contained in or used to produce all milk, skim milk, cream, and all milk products moved from a plant during the month or on hand at a plant at the end of the month: *Provided,* That producer milk transferred or diverted by a handler from his pool plant to another pool plant without first having been received for purposes of weighing in the transferring or diverting handlers pool plant shall be included in the receipts at the pool plant to which such milk was transferred or diverted for the purpose of computing shrinkage and shall be excluded from the receipts at the transferring or diverting handler's pool plant for such purpose.

(b) Prorate the total shrinkage of skim milk and butterfat computed pursuant to paragraph (a) of this section to skim milk and butterfat, respectively, contained in or used to produce all producer milk and all other source milk.

§ 963.43 *Responsibility of handlers and reclassification of milk.* All skim milk and butterfat contained in producer milk and in other source milk received by a handler shall be classified as Class I milk unless the handler proves to the market administrator that such skim milk and butterfat or a portion thereof should be classified as Class II milk. Any skim milk or butterfat which is classified in one class shall be reclassified to the other class if subsequent to the original classification such skim milk or butterfat is handled in such a manner as to justify its reclassification.

§ 963.44 *Transfers.* Skim milk or butterfat transferred (including skim milk and butterfat in milk which was diverted) from a pool plant in the form of milk, skim milk or cream to:

(a) Another pool plant or a nonpool plant from which a route is operated wholly or partially within the marketing area shall be classified as Class I milk unless utilization in Class II is indicated by the operators of both plants in their reports filed pursuant to § 963.30 for the month during which such transfer was made. If the two operators indicate a Class II utilization of all or part of the transferred skim milk and butterfat and the pounds of skim milk or butterfat remaining in Class II milk after the allocation of skim milk and butterfat in other source milk pursuant to § 963.46 (e) for the plant to which such transfer was made are greater than the pounds of skim milk and butterfat, respectively, so mutually indicated to be classified as Class II milk, then all such skim milk or butterfat transferred shall be classified as Class II milk. If the pounds of skim milk or butterfat remaining in Class II milk after the allocation of skim milk and butterfat in other source milk pursuant to § 963.46 (e) for the plant to which such transfer was made are less than the pounds of skim milk or butterfat, respectively, so mutually indicated to be classified as Class II milk, then an amount of such transferred skim milk or butterfat, respectively, equal to the pounds remaining in Class II in the plant to which such transfer was made shall be classified as Class II milk and the remainder of such skim milk or butterfat so transferred shall be classified as Class I milk.

(b) To a producer-handler shall be classified as Class I milk.

(c) To a nonpool plant from which no route is operated within the marketing area shall be classified as Class I milk unless utilization in Class II is mutually indicated in writing to the market administrator by the operators of both plants on or before the 8th day of the month following that within which such transfer was made and the operator of the nonpool plant maintains books and records showing the utilization of all skim milk and butterfat received at his plant and makes such books and records available to the market administrator, upon his request, for the verification of such utilization. If the above conditions are met the market administrator shall classify all skim milk and butterfat received at the nonpool plant and the skim and butterfat so transferred shall be allocated in series beginning with any skim milk and butterfat, respectively, remaining in Class I milk after allocating skim milk and butterfat in milk received from dairy farmers who the market administrator determines constitute the regular source of milk for Class I uses at such plant in series beginning with Class I milk.

§ 963.45 *Computation of skim milk and butterfat in each class.* For each month the market administrator shall correct for mathematical and for other obvious errors the report submitted by each handler pursuant to § 963.30 and shall compute separately the pounds of skim milk and butterfat in each class.

§ 963.46 *Allocation of skim milk and butterfat.* Skim milk and butterfat to be classified pursuant to § 963.40 shall be separately allocated to skim milk and butterfat classified pursuant to §§ 963.41 through 963.44 in sequence as follows:

(a) Plant shrinkage of skim milk and butterfat contained in producer milk as computed pursuant to § 963.42 (b) shall be allocated to skim milk and butterfat, respectively, classified pursuant to § 963.41 (a) (3) and (b) (4).

(b) Skim milk and butterfat contained in or used to produce products other than milk, skim milk, or cream received in such form shall be allocated to skim milk and butterfat contained in or used to produce products moved from a plant during the month or on hand at a plant at the end of the month in like form.

(c) Skim milk and butterfat contained in any frozen cream which was classified in a previous month as Class II milk pursuant to § 963.41 (b) (2) and which was removed from storage or received from another handler during the month for which classification is being determined shall be allocated to skim milk and butterfat used to produce ice cream or other frozen desserts or mixes for such ice cream or other frozen desserts moved from a plant during such month or on hand at a plant at the end of such month.

(d) Remaining skim milk and butterfat contained in or used to produce other source milk other than that received from a plant at which the handling of milk is fully subject to the pricing and payment provisions of another marketing agreement or order issued pursuant to the act shall be allocated to remaining skim milk and butterfat, respectively, in Class II milk, and if such remaining skim milk or butterfat contained in or used to produce such other source milk exceeds the remaining skim milk or butterfat, respectively, in Class II milk, such excess of skim milk or butterfat shall be allocated to skim milk or butterfat, respectively, in Class I milk.

(e) Remaining skim milk and butterfat contained in or used to produce other source milk received from a plant at which the handling of milk is fully subject to the pricing and payment provisions of another marketing agreement or order issued pursuant to the Act shall be allocated to remaining skim milk and butterfat, respectively, in Class II milk, and if such remaining skim milk or butterfat contained in or used to produce such other source milk exceeds the remaining skim milk or butterfat, respectively, in Class II milk, such excess of skim milk or butterfat shall be allocated the skim milk and butterfat in Class I milk.

(f) Skim milk and butterfat transferred and classified pursuant to § 963.44 shall be allocated to skim milk and butterfat, respectively, pursuant to such classification.

(g) Add to the remaining skim milk and butterfat in each class the skim milk and butterfat, respectively, allocated pursuant to paragraph (a) of this section.

(h) If the then remaining skim milk or butterfat in all classes exceeds the skim milk or butterfat contained in producer milk received by such handler, subtract such excess of skim milk or butterfat from remaining skim milk or butterfat, respectively, in Class II milk, and if the remaining skim milk or butterfat

in Class II milk is less than such excess of skim milk or butterfat, respectively, subtract the difference of skim milk or butterfat from remaining skim milk or butterfat, respectively, in Class I milk. The resulting volumes of skim milk and butterfat in each class are the volumes of skim milk and butterfat in producer milk in each class.

MINIMUM PRICES

§ 963.50 *Basic formula price.* The basic formula price per hundredweight of milk to be used in determining the Class I and Class II milk price pursuant to § 963.51 and § 963.52 shall be the highest of the prices per hundredweight of milk of 3.5 percent butterfat content computed by the market administrator pursuant to paragraphs (a), (b) and (c) of this section.

(a) The average of the basic (or field) prices ascertained to have been paid or to be paid per hundredweight for milk of 3.5 percent butterfat content received from farmers during the month at the following plants or places for which prices have been reported to the market administrator or to the Department of Agriculture by the companies indicated below:

Present Operator and Location

Borden Co., Black Creek, Wis.
Borden Co., Greenville, Wis.
Borden Co., Mount Pleasant, Mich.
Borden Co., New London, Wis.
Borden Co., Orfordville, Wis.
Carnation Co., Berlin, Wis.
Carnation Co., Jefferson, Wis.
Carnation Co., Chilton, Wis.
Carnation Co., Oconomowoc, Wis.
Carnation Co., Richland Center, Wis.
Carnation Co., Sparta, Mich.
Pet Milk Co., Coopersville, Mich.
Pet Milk Co., Hudson, Mich.
Pet Milk Co., Bellsville, Wis.
Pet Milk Co., New Glarus, Wis.
Pet Milk Co., Wayland, Mich.
White House Milk Co., Manitowoc, Wis.
White House Milk Co., West Bend, Wis.

(b) The price resulting from the following computation:

(1) Multiply by 6 the simple average as computed by the market administrator, of the daily wholesale selling prices (using the midpoint of any price range as one price) of Grade A (92-score) bulk creamery butter per pound at Chicago as reported by the Department of Agriculture during the month for which prices are being computed;

(2) Add an amount equal to 2.4 times the simple average as published by the Department of Agriculture of the prices determined per pound of "Cheddars" on the Wisconsin Cheese Exchange at Plymouth, Wisconsin, for the trading days that fall within the month; and

(3) Divide by 7 and to the resulting amount add 30 percent; and then multiply by 3.5.

(c) The price computed by adding together the plus amounts pursuant to subparagraphs (1) and (2) of this paragraph:

(1) From the average price of butter as computed in paragraph (b) (1) of this section, subtract 3 cents, add 20 percent of the resulting amount, and then multiply by 3.5.

(2) From the simple average as computed by the market administrator, of the weighted averages of the carlot prices per pound for nonfat dry milk solids, spray, and roller process, respectively, for human consumption, f. o. b. manufacturing plants in the Chicago area, as published for the period from the 26th day of the immediately preceding month through the 25th day of the month for which prices are being computed by the Department of Agriculture, deduct 5.5 cents, and multiply by 8.2.

§ 963.51 *Class I milk prices.* The minimum prices per hundredweight to be paid by each handler for butterfat and skim milk in producer milk received by such handler during the month which is classified as Class I milk shall be computed by the market administrator as follows:

Provided, That in each month from the effective date of this section through July 1953 the price per hundredweight for producer milk received by a handler at a pool plant for which the handler holds a permit from the health authorities of either of the cities of Alliance, Canton, or Massillon, Ohio, and classified as Class I milk shall be the Class I price for such month as computed pursuant to § 975.61 (a), exclusive of the proviso contained therein, of the order, as amended, regulating the handling of milk in the Cleveland, Ohio, marketing area (7 CFR, Part 975) less 15 cents, and the price for producer milk received by a handler at a pool plant for which the handler does not hold a permit from the health authorities of either of the cities of Alliance, Canton, or Massillon, Ohio, and classified as Class I milk shall be such Cleveland Class I less 40 cents.

(a) Add to the basic formula price the following amount for the month indicated:

Month	*Amount*
May and June	$0.90
March, April, July, and August	1.30
All others	1.70

Provided, That in computing the price to be paid by any handler for butterfat and skim milk contained in producer milk which was received by such handler during the month at a pool plant for which the handler does not hold a permit from the health authorities of either of the cities of Alliance, Canton, or Massillon, Ohio, and which is classified as Class I milk, the amounts to be added to the basic formula price pursuant to this paragraph shall be 25 cents less in each month than the amounts indicated above.

(b) Add or subtract from the result computed pursuant to paragraph (a) of this section a "supply-demand adjustment" computed as follows:

(1) Compute a "current utilization percentage" by dividing the total volume of producer milk and other source milk received by all handlers in the first and second months preceding the month for which a price is being computed which was classified as Class I milk pursuant to §§ 963.41 (a), 963.43, and 963.44 by the total volume of producer milk received by all handlers during the same months, multiplying the result by 100, and rounding to the nearest whole number;

(2) Compute a "net utilization percentage" by subtracting from the current utilization percentage computed pursuant to subparagraph (1) of this paragraph the appropriate "standard utilization percentage" shown below:

Month for which a price is being computed:	*Standard utilization percentage*
January	84
February	80
March	78
April	75
May	71
June	64
July	61
August	64
September	67
October	70
November	76
December	82

(3) The amount of the supply-demand adjustment shall be as follows:

[Cents per hundredweight]

If the net utilization percentage is—	Supply-demand adjustment for specified month is—		
	Jan., Feb., Mar., Aug., and Sept.	Apr., May, June, and July	Oct., Nov., and Dec.
+12 or over	+38	+25	+50
+9 or +10	+28	+19	+38
+6 or +7	+20	+13	+26
+3 or +4	+10	+7	+14
+1 to −1	0	0	0
−3 or −4	−10	−14	−7
−6 or −7	−20	−26	−13
−9 or −10	−28	−38	−19
−12 or −13	−38	−50	−25
−15 or −16	−38	−50	−31
−18 or −19	−38	−50	−37
−21 or −22	−38	−50	−43
−24 or under	−38	−50	−50

When the net utilization percentage does not fall within one of the above tabulated brackets, the supply-demand adjustment shall be determined by the adjacent bracket which is the same as or nearest to the bracket used in the previous month. If in the first month this supply-demand adjustment is in effect the net utilization percentage does not fall within one of the above tabulated brackets the supply-demand adjustment shall be determined by the adjacent bracket which would result in the higher supply-demand adjustment.

(c) Divide the price computed pursuant to § 963.50 (c) into the amount computed pursuant to § 963.50 (c) (1).

(d) Multiply the price computed pursuant to paragraphs (a) and (b) of this section by the result obtained pursuant to paragraph (c) of this section.

(e) Divide the result obtained pursuant to paragraph (d) of this section by 0.035. This result shall be the price per hundredweight of butterfat classified as Class I milk.

(f) From the price computed pursuant to paragraph (a) and (b) of this section, subtract the amount computed pursuant to paragraph (d) of this section, and divide the remainder by 0.965. The result shall be the price per hundredweight of skim milk classified as Class I milk.

§ 963.52 *Class II milk prices.* The minimum prices per hundredweight to be paid by each handler for butterfat and skim milk in producer milk received by such handler during the month which is classified as Class II milk shall be computed by the market administrator as follows:

(a) Multiply the basic formula price computed pursuant to § 963.50 by the result obtained pursuant to § 963.51 (c).

(b) Divide the result obtained pursuant to paragraph (a) of this section by 0.035. The result shall be the price per hundredweight of butterfat classified as Class II milk.

(c) From the basic formula price computed pursuant to § 963.50 subtract the amount computed pursuant to paragraph (a) of this section, and divide the remainder by 0.965. The result shall be the price per hundredweight of skim milk classified as Class II milk.

DETERMINATION OF UNIFORM PRICE

§ 963.60 *Value of producer milk.* The value of producer milk received by each handler during the month shall be computed by the market administrator by multiplying the hundredweight of skim milk and butterfat in each class as computed pursuant to § 963.46 by the applicable class prices and adding together the resulting amounts: *Provided,* That if after the allocation of skim milk and butterfat pursuant to paragraphs (a) through (g) of § 963.46 the remaining amount of skim milk or butterfat exceeds the amount of skim milk or butterfat, respectively, in producer milk received by such handler, there shall be added to the value of the producer milk received by such handler a further amount computed by multiplying the hundredweight of skim milk or butterfat as subtracted pursuant to § 963.46 (h) by the applicable class price.

§ 963.61 *Computation of uniform prices.* For each month the market administrator shall compute a uniform price per hundredweight of milk containing 3.5 percent of butterfat to be paid to producers delivering milk to any pool plant for which the handler operating such plant holds a permit for such plant from the health authorities of either of the cities of Alliance, Canton, or Massillon, Ohio and a uniform price to be paid per hundredweight of milk containing 3.5 percent of butterfat to producers delivering to any pool plant for which the handler operating such plants does not hold a permit for such plant from any of such health authorities as follows:

(a) Combine into one total the value of producer milk for each handler as computed pursuant to § 963.60 for all handlers who reported pursuant to § 963.30 for such month, except those in default in payments required pursuant to § 963.72 for the preceding month;

(b) Add the total amount of all payments made pursuant to § 963.72 (b), (c), and (d);

(c) Add any amounts paid into the producer-settlement fund and subtract any amounts paid out of the producer-settlement fund pursuant to § 963.77;

(d) Add an amount representing not less than one-half of the unobligated balance in the producer-settlement fund exclusive of the amounts added or subtracted pursuant to paragraphs (b) and (c) of this section;

(e) Subtract, if the weighted average butterfat test of all producer milk represented by the amounts included under paragraph (a) of this section is greater than 3.5 percent, or add, if the weighted average butterfat test of such milk is less than 3.5 percent, an amount computed by multiplying the total pounds of butterfat represented by the difference of such weighted average butterfat test from 3.5 percent, by the butterfat differential computed pursuant to § 963.74 multiplied by 10;

(f) Subtract an amount computed by multiplying by 25 cents the hundredweight of producer milk which was (1) received during the month for which uniform prices are being computed at all pool plants for which the handler operating such plant holds a permit for such plant from the health authorities of either of the cities of Alliance, Canton, or Massillon, Ohio, and (2) classified as Class I milk;

(g) Divide the resulting amount by the total hundredweight of producer milk received by all handlers during the month for which uniform prices are being computed;

(h) Subtract not less than 4 cents nor more than 5 cents, and the result shall be the uniform price to be paid per hundredweight of milk containing 3.5 percent of butterfat to producers who delivered milk during the month for which uniform prices are being computed to pool plant for which the handler operating such plant does not hold a permit for such plant from the health authorities of either of the cities of Alliance, Canton, or Massillon, Ohio;

(i) Divide the amount subtracted pursuant to paragraph (f) of this section by the hundredweight of producer milk received during the month for which uniform prices are being computed at all pool plants for which the handler operating such pool plants hold permits for such plants from the health authorities of either of the cities of Alliance, Canton, or Massillon, Ohio;

(j) Add the amount computed pursuant to paragraph (i) of this section to the amount computed pursuant to paragraph (g) of this section; and

(k) Subtract not less than 4 cents nor more than 5 cents, and the result shall be the uniform price to be paid per hundredweight of milk containing 3.5 percent of butterfat to producers who delivered milk during the month for which uniform prices are being computed to any pool plant for which the handler operating such plant holds a permit for such plant from the health authorities of either of the cities of Alliance, Canton, or Massillon, Ohio.

§ 963.62 *Notification.* On or before the 13th day of each month the market administrator shall notify each handler who submitted a report for the preceding month pursuant to § 963.30 of:

(a) The classification pursuant to § 963.46 of skim milk and butterfat contained in producer milk received by such handler during the preceding month and the value of such milk computed pursuant to § 963.60;

(b) The uniform prices for the preceding month computed pursuant to § 963.61; and

(c) The amount due such handler pursuant to § 963.73 and the amount to be paid by such handler pursuant to §§ 963.72, 963.75, and 963.76.

PAYMENTS FOR MILK

§ 963.70 *Payments to producers or cooperative associations.* Subject to §§ 963.74 and 963.76, each handler who is not a cooperative association shall make payments to producers or cooperative associations pursuant to either paragraph (a) or (b) of this section:

(a) On or before the 16th day of each month such handler shall pay to a cooperative association which requests such payment for producer milk received in the preceding month from producers who have given such cooperative association written authorization to collect payment for their milk a total amount not less than the sum of the individual amounts otherwise payable to such producers pursuant to paragraph (b) of this section. In making such payments to a cooperative association, the payments shall be accompanied with a statement showing the name of each producer for whose milk payment is being made to the cooperative association, the volume and average butterfat content of milk received from each such producer, and the amount of and reason for any deductions which the handler has withheld from the amount due such producer.

(b) On or before the 18th day of each month such handler shall pay each producer (other than those for who a cooperative association collects pursuant to paragraph (a) of this section) for milk received from him during the preceding month at not less than the appropriate uniform price computed pursuant to § 963.61 (h) or (k) for such month, adjusted by the butterfat differential computed pursuant to § 963.74 for such month, and less any deductions authorized by such producer: *Provided,* That if the payments made to a handler pursuant to § 963.73 have been reduced pursuant to the proviso contained therein, such handler may reduce payments to producers or cooperative associations by the same amount per hundredweight of milk and such handler shall complete payments to producers or cooperative associations as required by this section or before the next date for making payments pursuant to this section following the date upon which such handler receives payment in full for amounts due him pursuant to § 963.73.

§ 963.71 *Producer-settlement fund.* The market administrator shall establish and maintain a separate fund known as the "producer-settlement fund" into which he shall deposit all payments made pursuant to §§ 963.72 and 963.77 and out of which he shall make all payments pursuant to §§ 963.73 and 963.77.

§ 963.72 *Payments to the producer-settlement fund.* On or before the 14th day of each month handlers shall make payments to the market administrator as follows:

(a) If the value of producer milk received by a handler in the preceding month as computed pursuant to § 963.60 exceeds the amount which such handler is required to pay to all producers pursuant to § 963.70, such handler shall pay the difference between the two amounts.

(b) Any handler who during the preceding month operated a nonpool plant from which a route extending into the marketing area was operated shall pay an amount computed by determining the value at the Class I price which would be applicable at such plant if it were a pool plant of all Class I milk disposed of on routes operated wholly or partially within the marketing area during the preceding month and by deducting from such value the value of such milk at the Class II price: *Provided*, That if such handler received at his nonpool plant during the preceding month skim milk and butterfat from a pool plant which was classified as Class I milk pursuant to § 963.44 (c) a payment shall be made pursuant to this section only if the volume of Class I milk so disposed of on routes operated wholly or partially within the marketing area is in excess of the volume of Class I milk received from a pool plant and shall be computed only on such excess.

(c) Any handler who during the preceding month operated a pool plant shall pay an amount computed by determining the value of other source milk which was received during the preceding month and allocated to Class I milk pursuant to § 963.46 (d) at the Class I price applicable to such plant and by deducting from such value the value of such milk at the Class II price.

(d) Any handler who received other source milk in the preceding month which was allocated to Class I milk pursuant to § 963.46 (e) shall pay any amount by which the value of such milk at the Class I price applicable to the plant at which such other source milk was received exceeded the value of such milk computed pursuant to the other marketing agreement or order.

§ 963.73 *Payments out of the producer-settlement fund.* On or before the 16th day of each month, the market administrator shall pay to each handler any amount by which the sum required to be paid by such handler for the preceding month pursuant to § 963.70 is greater than the total value of the milk of such handler computed pursuant to § 963.60 for such preceding month, less any unpaid obligations of the handler to the market administrator pursuant to § 963.72: *Provided*, That if the balance in the producer-settlement fund is insufficient to make payments to all handlers pursuant to this paragraph, the market administrator shall reduce such payments by a uniform amount per hundredweight of milk and shall complete such payments as soon as the necessary funds become available.

§ 963.74 *Producer butterfat differential.* In making payments pursuant to § 963.70 the uniform prices shall be adjusted for each one-tenth of one percent of butterfat content in the milk of each producer above or below 3.5 percent, as the case may be, by a butterfat differential (computed to the next high half-cent) computed as follows: Divide the average price of butter as computed pursuant to § 963.50 (b) (1) by 10 and, if the result is not an even whole or half cent, round to the next higher whole or half cent.

§ 963.75 *Expense of administration.* As his pro rata share of the expense incurred pursuant to § 963.22 (c), each handler shall pay the market administrator on or before the 14th day of each month 3 cents per hundredweight or such lesser amount as the Secretary may from time to time prescribe with respect to (a) all receipts within the preceding month of producer milk (including such handler's own production), (b) all other source milk received at a pool plant in the preceding month and classified as Class I, and (c) all other source milk on which payment is made pursuant to § 963.72 (b).

§ 963.76 *Marketing services.* In making payments to producers or cooperative associations pursuant to § 963.70 a handler shall make deductions and dispose of amounts so deducted as follows:

(a) Except as set forth in paragraph (b) of this section a handler shall deduct 6 cents per hundredweight, or such lesser amount as the Secretary may from time to time prescribe, with respect to all producer milk for which payment is being made pursuant to § 963.70 and shall pay the total amount of such deductions to the market administrator on or before the 16th day after the end of the month in which such producer milk was received. Such amount shall be expended by the market administrator to verify weights and tests of milk of producers and to provide producers with market information, such services to be performed by the market administrator or by an agent engaged by and responsible to him.

(b) In the case of producers for whom a cooperative association is actually performing the services described in paragraph (a) of this section, as determined by the market administrator, a handler shall make, in lieu of the deductions specified in paragraph (a) of this section, such deductions from payments required pursuant to § 963.70 (b) for producer milk received in the preceding month as may be authorized by such producers, and pay such deductions on or before the 16th day after the end of the month in which such producer milk was received to the cooperative association rendering such services.

§ 963.77 *Errors in payments.* Whenever audit by the market administrator of any handler's reports, books, records or accounts discloses errors or whenever skim milk or butterfat is reclassified pursuant to § 963.43 resulting in moneys due (a) the market administrator from such handler, or such handler from the market administrator or (b) any producer or cooperative association from such handler pursuant to § 963.70 the market administrator shall promptly notify such handler of any such amount due, and payment thereof shall be made on or before the next date for making payment set forth in the provision under which such error occurred, following the 5th day after such notice. In computing amounts due pursuant to this section Class prices, the appropriate uniform price, the butterfat differential, the rate of administration assessment pursuant to § 963.75, and the rate of marketing service deduction pursuant to § 963.76 which were applicable in the month for which the original calculations of amounts due were made shall be used.

§ 963.78 *Termination of obligation.* (a) The obligation of any handler to pay money required to be paid under the terms of this order shall, except as provided in paragraphs (b) and (c) of this section, terminate two years after the last day of the calendar month during which the market administrator receives the handler's report of utilization of the milk involved in such obligation, unless within such two-year period the market administrator notifies the handler in writing that such money is due and payable. Service of such notice shall be complete upon mailing to the handler's last known address, and it shall contain but need not be limited to, the following information:

(1) The amount of the obligation;

(2) The month(s) during which the milk, with respect to which the obligation exists, was received or handled; and

(3) If the obligation is payable to one or more producers or to a cooperative association, the name of such producers or association, or if the obligation is payable to the market administrator, the account for which it is to be paid.

(b) If a handler fails or refuses, with respect to any obligation under this subpart, to make available to the market administrator or his representatives all books or records required by this subpart to be made available, the market administrator may, within the two-year period provided for in paragraph (a) of this section notify the handler in writing of such failure or refusal. If the market administrator so notifies a handler, the said two-year period with respect to such obligation shall not begin to run until the first day of the calendar month following the month during which such books and records pertaining to such obligation are made available to the market administrator or his representatives.

(c) Notwithstanding the provisions of paragraphs (a) and (b) of this section, a handler's obligation under this subpart to pay money shall not be terminated with respect to any transaction involving fraud or willful concealment of a fact, material to the obligation, on the part of the handler against whom the obligation is sought to be imposed.

(d) Any obligation on the part of the market administrator to pay a handler any money which such handler claims to be due him under the terms of this subpart shall terminate two years after the end of the calendar month during which milk involved in the claim was received if any underpayment is claimed, or two years after the end of the calendar month during which the payment (including deduction or set-off by the market administrator) was made by the handler if a refund on such payment is claimed, unless such handler, within that applicable period of time, files pursuant to section 8c (15) (A) of the act, a petition claiming such money.

EFFECTIVE TIME, SUSPENSION OR TERMINATION

§ 963.80 *Effective time.* The provisions of this subpart, or any amendment to this subpart, shall become effective at such time as the Secretary may declare and shall continue in force until suspended or terminated. The provisions of this section shall apply to any obligation under this subpart for the payment of money.

§ 963.81 *Suspension or termination.* Whenever the Secretary finds this subpart or any provision of this subpart obstructs or does not tend to effectuate the declared policy of the act, he shall terminate or suspend the operation of this order or any such provision of this subpart.

§ 963.82 *Continuing obligations.* If, upon the suspension or termination of any or all provisions of this subpart there are any obligations thereunder the final accrual or ascertainment of which requires further acts by any person (including the market administrator), such further acts shall be performed notwithstanding such suspension or termination.

§ 963.83 *Liquidation.* Upon the suspension of the provisions of the subpart, except this section, the market administrator, or such other liquidation agent as the Secretary may designate, shall, if so directed by the Secretary, liquidate the business of the market administrator's office, dispose of all property in his possession or control, including accounts receivable, and execute and deliver all assignments or other instruments necessary or appropriate to effectuate any such disposition. If a liquidating agent is so designated all assets, books, and records of the market administrator shall be transferred promptly to such liquidation agent. If, upon such liquidation, the funds on hand exceed the amounts required to pay outstanding obligations of the office of the market administrator and to pay necessary expenses of liquidation and distribution, such excess shall be distributed to contributing handlers and producers in an equitable manner.

MISCELLANEOUS PROVISIONS

§ 963.90 *Agent.* The Secretary may, by designation in writing, name any officer or employee of the United States to act as his agent or representative in connection with any of the provisions of this subpart.

§ 963.91 *Separability of provisions.* If any provision of this subpart, or its application to any person or circumstances, is held invalid the application of such provisions, and the remaining provisions of this subpart, to other persons or circumstances shall not be affected thereby.

[7 CFR Part 989]

HANDLING OF RAISINS PRODUCED FROM RAISIN VARIETY GRAPES GROWN IN CALIFORNIA

ESTABLISHING FREE, RESERVE AND SURPLUS PERCENTAGES FOR 1952–53 CROP YEAR

Notice is hereby given that there is being considered a proposed rule to establish free tonnage percentages, reserve tonnage percentages, and surplus tonnage percentages, as hereinafter set forth, in connection with raisins produced from raisin variety grapes grown in California and acquired by handlers during the 1952–53 crop year. These percentages are proposed after consideration of the recommendation submitted by the Raisin Administrative Committee and other information available to the Secretary, in accordance with the applicable provisions of Marketing Agreement No. 109 and Order No. 89 (17 F. R. 1255, 1555), regulating the handling of raisins produced from raisin variety grapes grown in California, effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.).

Consideration will be given to any data, views, or arguments pertaining thereto which are filed in triplicate with the Director, Fruit and Vegetable Branch, Production and Marketing Administration, United States Department of Agriculture, Washington 25, D. C., and received not later than the close of business on the tenth day after the date of the publication of this notice in the FEDERAL REGISTER, except that, if said tenth day after publication should fall on a legal holiday, Saturday, or Sunday, such submission must be received by the Director not later than the close of business on the next following business day.

The proposed rule is as follows:

§ 989.206 *Free, reserve, and surplus tonnage regulation for the 1952–53 crop year.* (a) The percentages of each varietal type of raisins acquired by handlers during the crop year beginning August 15, 1952, and ending August 14, 1953, which shall be free tonnage, reserve tonnage, and surplus tonnage, respectively, are as follows: (1) Natural (sun-dried) Thompson Seedless raisins: Free tonnage percentage, 54 percent; reserve tonnage percentage, 19 percent; and surplus tonnage percentage, 27 percent; (2) natural (sun-dried) Muscat raisins: Free tonnage percentage, 60 percent; reserve tonnage percentage, 40 percent; and surplus tonnage percentage, zero percent; (3) natural (sun-dried) Sultana raisins: Free tonnage percentage, 70 percent; reserve tonnage percentage, 30 percent; and surplus tonnage percentage, zero percent; (4) natural (sun-dried) Zante Currant raisins: Free tonnage percentage, 75 percent; reserve tonnage percentage, 25 percent; and surplus tonnage percentage, zero percent; (5) artificially dehydrated Sultana raisins: Free tonnage percentage, 70 percent; reserve tonnage percentage, 30 percent; and surplus tonnage percentage, zero percent; (6) artificially dehydrated Zante Currant raisins: Free tonnage percentage, 70 percent; reserve tonnage percentage, 30 percent; and surplus tonnage percentage, zero percent; (7) Layer Muscat raisins: Free tonnage percentage, 60 percent; reserve tonnage percentage, 40 percent; and surplus tonnage percentage, zero percent; (8) Golden Bleached raisins: Free tonnage percentage, 70 percent; reserve tonnage percentage, 30 percent; and surplus tonnage percentage, zero percent; (9) Sulfur Bleached raisins: Free tonnage percentage, 70 percent; reserve tonnage percentage, 30 percent; and surplus tonnage percentage, zero percent; (10) Soda Dipped raisins: Free tonnage percentage, 70 percent; reserve tonnage percentage, 30 percent; and surplus tonnage percentage, zero percent; and (11) Valencia raisins: Free tonnage percentage, 70 percent; reserve tonnage percentage, 30 percent; and surplus tonnage percentage, zero percent.

(b) The percentages cited in paragraph (a) of this section are predicated on the following preliminary estimates of production: Natural (sun-dried) Thompson Seedless raisins, 250,000 tons; natural (sun-dried) and Layer Muscat raisins, 17,000 tons; natural (sun-dried) Sultana raisins, 2,500 tons; natural (sun-dried) Zante Currant raisins, 3,500 tons; Golden Bleached raisins, 20,000 tons; Valencia raisins, 1,000 tons; all other varietal types of raisins, 1,000 tons; and total, all varietal types, 295,000 tons. Percentages for each varietal type of raisins would be designated in the final rule on the basis of presently available information and any additional information, including any later estimates of production, which may be available at the time of such designation. It does not appear from data currently available that average returns to California producers of 1952 crop raisins will exceed the price level specified in section 2 (1) of the act.

Issued at Washington, D. C., this 13th day of October 1952.

[SEAL] S. R. SMITH,
Director,
Fruit and Vegetable Branch.

ATOMIC ENERGY COMMISSION

[10 CFR Part 50]

CONTROL OF FACILITIES FOR THE PRODUCTION OF FISSIONABLE MATERIAL

DEFINITIONS; ELECTRONUCLEAR MACHINES

Pursuant to the Atomic Energy Act of 1946 as amended (Pub. Law 585, 79th Cong.; 60 Stat. 755ff) and to section 4 (a) of the Administrative Procedure Act of 1946 as amended (Pub. Law 404, 79th Cong.), notice is hereby given that an amendment to Title 10, Chapter I, Part 50, Code of Federal Regulations, entitled "Control of Facilities for the Production of Fissionable Material" will be issued by the Atomic Energy Commission, to be effective December 1, 1952.

It is proposed that this amendment will read substantially as follows:

Part 50 is hereby amended in the following respect only:

The following § 50.2 (f) is added reading as follows:

§ 50.2 *Definitions.* • • •

(f) The term "electronuclear machines" does not include X-ray generators.

Interested parties are to be given an opportunity to submit their views and other relevant information with respect to the proposed amendment in writing to the United States Atomic Energy Commission, Division of Construction and Supply, at Sixteenth Street and Constitution Avenue NW., Washington 25, D. C., within thirty (30) days from the date of publication of this notice of intention in the daily issue of the FEDERAL REGISTER.

Dated at Washington, D. C., this 8th day of October 1952.

WALTER J. WILLIAMS,
Deputy General Manager.

SECURITIES AND EXCHANGE COMMISSION

[17 CFR Part 240]

GENERAL RULES AND REGULATIONS UNDER SECURITIES EXCHANGE ACT OF 1934; SOLICITATION OF PROXIES

INFORMATION TO BE FURNISHED SECURITY HOLDERS

Notice is hereby given that the Securities and Exchange Commission has under consideration the following proposal for the amendment of its proxy rules under the Securities Exchange Act of 1934.

Rule X-14A-3 requires that security holders be furnished an annual report prior to or concurrently with the solicitation of proxies for any annual meeting involving the election of directors. It is proposed to amend this rule so as to provide that where one or more fiscal quarters have elapsed before the meeting is held, security holders shall also be furnished a report covering such quarter or quarters. The purpose of this proposed amendment is, of course, to provide security holders with reasonably up-to-date information in those cases where a considerable period of time elapsed between the end of the fiscal year covered by the annual report and the date of the annual meeting. The text of the rule as so amended would read as follows:

§ 240.14a-3 *Information to be furnished security holders.* (a) No solicitation subject to this section shall be made unless each person solicited is concurrently furnished or has previously been furnished with a written proxy statement containing the information specified in Schedule 14A.

(b) If the solicitation is made on behalf of the management of the issuer and relates to an annual meeting of security holders at which directors are to be elected, each proxy statement furnished pursuant to paragraph (a) of this section shall be accompanied or preceded by an annual report to such security holders containing such financial statements for the last fiscal year as will, in the opinion of the management, adequately reflect the financial position and operations of the issuer. If the meeting is to be held more than 60 days after the close of any one or more quarters of the succeeding fiscal year, a report for such quarter or quarters shall also be transmitted to security holders not later than the date the quarterly report on Form 9-K is required to be filed for such quarter or the latest of such quarters and shall include such financial statements as will reflect operations and changes in surplus during the period. Such annual or other reports, including financial statements, may be in any form deemed suitable by the management.

(c) Paragraph (b) of this section shall not apply to solicitations made on behalf of the management before the financial statements to be contained in the annual report to security holders are available if solicitations are being made at the time in opposition to the management and if the management's proxy statement includes an undertaking in bold-face type to furnish such annual report to all persons solicited, at least twenty days before the date of the meeting.

(d) Three copies of each annual or other report sent to security holders pursuant to this section shall be mailed to the Commission, solely for its information, not later than the date on which such report is first sent or given to security holders or the date on which preliminary copies of solicitation material are filed with the Commission pursuant to § 240.14a-6 (a) (Rule X-14A-6 (a)), whichever date is later. Such reports are not deemed to be "soliciting material" or to be "filed" with the Commission or otherwise subject to this section or to the liabilities of section 18 of the act, except to the extent that the issuer specifically requests that they be treated as a part of the proxy soliciting material or incorporates them in the proxy statement by reference.

All interested persons are invited to submit data, views and comments on the above mentioned proposal in writing to the Securities and Exchange Commission, 425 Second Street NW., Washington 25, D. C., on or before November 10, 1952.

By the Commission.

[SEAL] ORVAL L. DUBOIS,
Secretary.

OCTOBER 10, 1952.

NOTICES

DEPARTMENT OF THE TREASURY

Bureau of Customs

[482.2]

CORK PARTS OF ARTIFICIAL BAIT

TARIFF CLASSIFICATION

OCTOBER 10, 1952.

The Bureau by its letter to the collector of customs at Philadelphia, Pennsylvania, dated October 10, 1952, ruled that cork parts of artificial bait were properly classifiable as parts of artificial bait under paragraph 1535, Tariff Act of 1930, with duty at the rate of 45 percent ad valorem.

This decision will be effective as to such or similar merchandise entered for consumption or withdrawn from warehouse for consumption after 90 days after the date of publication of an abstract thereof in a forthcoming issue of the weekly Treasury Decisions.

[SEAL] FRANK DOW,
Commissioner of Customs.

Office of the Secretary

[Treasury Department Order No. 150-9]

BUREAU OF INTERNAL REVENUE REORGANIZATION

ABOLITION AND ESTABLISHMENT OF CERTAIN OFFICES

Bureau of Internal Revenue reorganization. Abolition of offices of Collectors and Deputy Collectors of Iowa, Minnesota, Nebraska, North Dakota, and South Dakota Collection Districts; establishment of offices of District Commissioner and Directors of Internal Revenue.

By virtue of the authority vested in me as Secretary of the Treasury by Reorganization Plan No. 26 of 1950 and Reorganization Plan No. 1 of 1952, it is ordered as follows:

1. *Abolition of existing offices.* The abolition of the offices of Collector of Internal Revenue and Deputy Collector for the Iowa, Minnesota, Nebraska, North Dakota and South Dakota Collection Districts shall become effective as of 12 o'clock midnight, October 19, 1952.

2. *Establishment of District Commissioner.* Effective as of 12:01 a. m., October 20, 1952, there is hereby established an office of District Commissioner of Internal Revenue, which shall be known as the St. Paul District, and which shall be comprised of the States of Iowa, Minnesota, Nebraska, North Dakota, and South Dakota.

3. *Location of headquarters.* The headquarters office shall be located in the City of St. Paul, Minnesota.

4. *Establishment of Offices of Director of Internal Revenue.* Effective as of 12:01 a. m., October 20, 1952, there are hereby created the following offices within the St. Paul District:

(a) Director of Internal Revenue for the Collection District of Iowa (as presently constituted). The headquarters of such office shall be located in Des Moines, Iowa, and the office shall have the operating title of Director of Internal Revenue, Des Moines.

(b) Director of Internal Revenue for the Collection District of Minnesota (as presently constituted). The headquarters of such office shall be located in St. Paul, Minnesota, and the office shall have the operating title of Director of Internal Revenue, St. Paul.

(c) Director of Internal Revenue for the Collection District of Nebraska (as presently constituted). The headquarters of such office shall be located in Omaha, Nebraska, and the office shall have the operating title of Director of Internal Revenue, Omaha.

(d) Director of Internal Revenue for the Collection District of North Dakota (as presently constituted). The headquarters of such office shall be located in Fargo, North Dakota, and the office shall have the operating title of Director of Internal Revenue, Fargo.

(e) Director of Internal Revenue for the Collection District of South Dakota (as presently constituted). The headquarters of such office shall be located in Aberdeen, South Dakota, and the office shall have the operating title of Director of Internal Revenue, Aberdeen.

Dated: October 8, 1952.

[SEAL] JOHN W. SNYDER,
Secretary of the Treasury.

Bureau of Reclamation

NEWLANDS PROJECT, NEVADA

ORDER OF REVOCATION

JUNE 19, 1952.

Pursuant to the authority delegated by Departmental Order No. 2515 of April 7, 1949 (14 F. R. 1937), I hereby revoke Departmental Order of February 25, 1952, reserving lands for community center purposes, insofar as said order affects the following described land: *Provided, however,* That such revocation shall not affect the withdrawal of any other land by said order or affect any other orders withdrawing or reserving the land hereinafter described:

MOUNT DIABLO MERIDIAN, NEVADA

T. 18 N., R. 29 E., Sec. 18, NE¼SE¼SE¼.

The above area aggregates 10 acres.

ALFRED R. GOLZE,
Acting Assistant Commissioner.

I concur. The records of the Bureau of Land Management will be noted accordingly.

The land described herein remains withdrawn for reclamation purposes.

WILLIAM PINCUS,
Assistant Director,
Bureau of Land Management.

Office of the Secretary

[Order 2706]

COLUMBIA BASIN PROJECT, WASHINGTON

ESTABLISHMENT OF DATE ON OR BEFORE WHICH LANDOWNERS IN CERTAIN IRRIGATION BLOCKS SHALL HAVE THE PRIVILEGE OF EXECUTING RECORDABLE CONTRACTS

OCTOBER 10, 1952.

SECTION 1. *Purpose.* The purpose of this order is to establish a date on or before which the owners of land in certain irrigation blocks on the Columbia Basin Project may execute recordable contracts with the United States pursuant to the Columbia Basin Project Act (57 Stat. 14; 16 U. S. C. 835 et seq.), as amended by the Act of September 26, 1950 (64 Stat. 1037; 16 U. S. C. 835a), and Chapter 275, Laws of Washington, 1943, as amended by Chapter 200, Laws of Washington, 1951.

SEC. 2. *Date.* The date on or before which the owners of land in Irrigation Blocks 12, 15, 43, 74, and 75 on the Columbia Basin Project shall have the privilege of executing recordable contracts is hereby fixed as March 31, 1953. Such recordable contracts will be executed on behalf of the United States only after compliance has been had with the provisions set forth in 43 CFR Part 405.

VERNON D. NORTHROP,
Acting Secretary of the Interior.

DEPARTMENT OF COMMERCE

Office of International Trade

[Case No. 138]

NORMAN C. F. YUEN

ORDER DENYING LICENSE PRIVILEGES

In the matter of Norman C. F. Yuen, 1470 Thomas Avenue, San Francisco, Calif., respondent; Case No. 138.

This proceeding was begun by the issuance of a charging letter, dated June 16, 1952, wherein the Director, Investigation Staff, Office of International Trade, charged one Norman C. F. Yuen of 1470 Thomas Avenue, San Francisco, California, with having violated the Export Control Act of 1949, as amended, and the regulations promulgated thereunder.

It was commenced after detection of the facts following a routine check by Customs officials of packages intended for export which are mailed in local post offices.

Yuen was duly informed of his right to answer the charges, to be represented by counsel, and to have an oral hearing. Having been so informed, he elected to have this proceeding submitted to the Compliance Commissioner pursuant to regulations, § 382.10, 17 F. R. 6342, upon the evidence in the files and his various statements to and correspondence with members of the Customs Bureau and the Investigation Staff, and at the same time consented that an order, containing the terms hereinafter set forth, be made. Yuen's letter of consent, the correspondence, and all evidence in the case were duly submitted to the Compliance Commissioner, who has reported the facts of the case with his recommendation to the Assistant Director for Export Supply.

After reviewing the whole record and carefully considering the evidence and the report of the Compliance Commissioner, I hereby make the following findings of fact:

(1) Norman Yuen is engaged in the export business at 1470 Thomas Avenue, San Francisco, California, and has been engaged in said business since about 1945.

(2) Under date of March 9, 1951, he submitted to the Office of International Trade an application for export license to ship ten dozen ladies' metal compacts to a consignee in Hong Kong, which application was rejected.

(3) Thereafter, in the month of May 1951, for the purpose of circumventing the rejection of said application and accomplishing the export of the articles for which export license had been denied, he deposited four packages of said compacts in the mails, in a local post office in San Francisco, California, which packages were addressed to individual consignees, who were related in some manner to the consignee mentioned in the application for export license, and attempted to ship them under General License, valuing each package at $25.00 or less and marking two of them, "Gift, No Export License Required." All packages involved in this proceeding were described as containing ladies' compacts.

(4) The value of the contents of each of said packages was more than $25.00; one of the packages contained a dozen ladies' combs in addition to compacts; none of them was in fact a gift, the intention having been that, if delivered, they were to be turned over to the consignee named in the license application which had been rejected; and none of the packages was properly exportable under general license.

It is therefore concluded that Yuen knowingly made false representations and concealed material facts in order to effectuate the export of the commodities mentioned and that he thereby violated the Export Control Act of 1949, as amended, and regulations promulgated thereunder, § 381.1 (b) (1) and (2), 15 F. R. 2730 (now 17 F. R. 6339).

In his report, the Compliance Commissioner has weighed the deliberate nature of Yuen's attempted circumvention of the rejection of his application for export license and his attempt to pervert the purpose of the general license procedure for small parcels and gifts against various mitigating factors, and has recommended that the proposed consent suspension be adopted as the order of this Agency.

I find, after reviewing the entire record, the proposal for a consent order, and the report and the recommendation of the Compliance Commissioner, that the provisions hereinafter set forth are fair and reasonable, and that they are necessary and proper to achieve effective enforcement of the law. *It is now, therefore, ordered:*

A. Respondent, Norman C. F. Yuen, is hereby denied and declared ineligible to exercise the privileges of exporting, receiving, or otherwise participating in the exportation of any commodity from the United States to any foreign destination, including Canada, for a period of six (6) months from the date of this order. This denial of export privileges includes and prohibits participation, directly or indirectly, in any manner or capacity, (1) as a party, or as a representative of a party, to any exportation under validated or general export licenses; and (2) in the financing, forwarding, transporting, or other servicing of exports from the United States pursuant to any validated or general export licenses.

B. This denial of export privileges extends not only to respondent Norman C. F. Yuen but also to any person, firm, corporation, or business organization with which he may be now or during the period of suspension related by ownership, position of responsibility, or control in the conduct of trade involving exports from the United States, or services connected therewith.

C. No person, firm, corporation, or other business organization shall knowingly apply for or obtain any license, shipper's export declaration, bill of lading, or other export control document relating to any exportation from the United States, to or for Norman C. F. Yuen, or any person, firm, corporation, or other business organization within the scope of Part B hereof, without prior disclosure of such facts to, and specific authorization from, the Office of International Trade.

Dated: October 14, 1952.

JOHN C. BORTON,
Assistant Director
for Export Supply.

ECONOMIC STABILIZATION AGENCY

Office of Salary Stabilization

[Administrative Order No. 4]

REGIONAL DIRECTORS

DESIGNATION AS COMPETENT AUTHORITY TO DEFINE SCOPE AND PURPOSE AND TO ISSUE INSPECTION AUTHORIZATIONS

By virtue of the authority vested in me as Chairman of the Salary Stabilization Board and the Head of the Office of Salary Stabilization by General Order No. 8, Revised, of the Economic Stabilization Administrator (16 F. R. 9828), as amended (16 F. R. 13015; 17 F. R. 7195), this administrative order is issued:

Those officers and employees of the Office of Salary Stabilization occupying or acting in the position of Regional Director are each hereby designated and constituted as competent authority under section 2 of Salary Procedural Regulation 2, Revised, to define the scope and purpose of investigations, inspections and inquiries within their respective areas, and to issue inspection authorizations in connection with any investigation or proceeding within their respective areas relating to enforcement of the Defense Production Act of 1950, as amended, and the regulations, orders and determinations issued thereunder, subject to the limitations set forth in section 2 of Salary Procedural Regulation 2, Revised, and to such rules, supervision, direction and control as the Chairman of the Salary Stabilization Board and their respective supervisors in the Office of Salary Stabilization may deem necessary or expedient.

Nothing in this order shall be interpreted as limiting the designation of competent authority previously made in Office of Salary Stabilization Administrative Order No. 2, and nothing in this order shall be construed as granting to Regional Directors the authority to issue subpoenas.

JUSTIN MILLER,
Chairman, Salary Stabilization
Board Head, Office of Salary
Stabilization.

SECURITIES AND EXCHANGE COMMISSION

[File No. 70-2878]

AMERICAN GAS AND ELECTRIC CO.

ORDER RELEASING JURISDICTION OVER LEGAL FEES AND EXPENSES

OCTOBER 13, 1952.

American Gas and Electric Company, a registered holding company, having filed a declaration, as amended, pursuant to sections 6 (a) and 7 of the Public Utility Holding Company Act of 1935 ("act"), and Rule U-50 promulgated thereunder, wherein it proposed to issue and sell $20,000,000 principal amount of sinking fund debentures due 1977 and 170,000 shares of $10 par value common stock; and

The Commission having, by order dated June 19, 1952, permitted said declaration, as amended, to become effective subject to the reservation of jurisdiction with respect to the fees and expenses to be paid all counsel; and

It appearing that Simpson, Thacher & Bartlett, counsel for declarant, has requested a fee of $20,000 and reimbursement of expenses not in excess of $350, and that Winthrop, Stimson, Putnam & Roberts, independent counsel for prospective purchasers of the debentures and common stock has requested a fee of $10,000; and

It appearing that the aforesaid fees and expenses are not unreasonable and that jurisdiction thereover should be released:

It is hereby ordered, That the jurisdiction heretofore reserved with respect to the fees and expenses to be paid counsel for the declarant and independent counsel for prospective underwriters be, and the same hereby is, released.

By the Commission.

[SEAL] ORVAL L. DUBOIS,
Secretary.

[File No. 70-2922]

CENTRAL INDIANA GAS CO.

ORDER GRANTING APPLICATION REGARDING PROPOSED PRIVATE SALE OF BONDS

OCTOBER 13, 1952.

Central Indiana Gas Company ("Central Indiana"), an operating gas utility subsidiary of Central Public Utility Corporation ("Central Public"), a registered holding company, having filed an application, and two amendments thereto, pursuant to the act with respect to the following proposed transactions:

Central Indiana proposes to issue $1,000,000 principal amount of First Mortgage Bonds, 3½ percent Series due 1977, to be dated October 1, 1952, and to mature October 1, 1977. These bonds are to be issued under and secured by the Indenture of Mortgage and Deed of Trust dated September 1, 1942, as last supplemented and modified by a Supplemental Indenture, dated May 1, 1946, and to be further supplemented by the Third Supplemental Indenture, to be dated October 1, 1952, between Central Indiana and City National Bank and Trust Company of Chicago, Illinois, Trustee. Central Indiana proposes to sell said bonds to Reliance Life Insurance Company of Pittsburgh, Pennsylvania at 100 percent of the par value thereof plus accrued interest from October 1, 1952, to the date of sale.

It is represented in the filing that the proceeds from the sale of these bonds will be used to discharge $345,000 principal amount of outstanding notes of Central Indiana held by the Chase National Bank of the City of New York, New York and that the balance of the proceeds is to be used to reimburse the treasury of Central Indiana for construction expenditures heretofore made by that company.

The filing contains a copy of an order adopted and published by the Public Service Commission of the State of Indiana, the state in which Central Indiana is organized and conducts its business, authorizing the issuance and sale of the new bonds.

The filing also contains revised estimates of fees and expenses totaling $13,500, including $2,500 each for company counsel, purchaser's counsel, and a financial adviser, who also acted as a finder of the purchaser.

Notice of the filing of this application having been duly given in the form and manner prescribed by Rule U-23 promulgated pursuant to the act, and the

Commission not having received a request for a hearing and not having ordered a hearing thereon; and

The Commission finding with respect to said application, as amended, that all the applicable statutory standards have been satisfied and further finding that the fees and expenses are not unreasonable provided they do not exceed the amounts estimated and deeming it appropriate in the public interest and in the interest of investors and consumers that said application, as amended, be granted forthwith:

It is ordered, Pursuant to Rule U-23 and the applicable provisions of the act, that the application, as amended, be, and the same hereby is, granted forthwith, subject to the terms and conditions prescribed in Rule U-24.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

[F. R. Doc. 52-11273; Filed, Oct. 16, 1952; 8:49 a. m.]

[File No. 70-2935]

CONSOLIDATED NATURAL GAS CO.

ORDER PERMITTING DECLARATION TO BECOME EFFECTIVE WITH RESPECT TO NON-INTEREST BEARING LOANS TO SUBSIDIARIES

OCTOBER 13, 1952.

Consolidated Natural Gas Company ("Consolidated"), a registered holding company, having filed a declaration pursuant to section 12 (b) of the Public Utility Holding Company Act of 1935 ("act") and Rule U-45 promulgated thereunder, with respect to the following proposed transactions:

Consolidated proposes to make short-term open account extensions of credit, without interest, to four of its subsidiaries, in the following amounts:

Hope Natural Gas Co.	$3,000,000
The East Ohio Gas Co.	1,000,000
The Peoples Natural Gas Co.	2,000,000
New York State Natural Gas Corp.	1,500,000
	7,500,000

Such extensions of credit will be made from time to time as required by the subsidiaries during the balance of 1952 to replenish their cash used in the building up of inventories of gas in underground storage to meet wintertime demands of customers. It is expected that the subsidiaries will repay to Consolidated the amounts of money so advanced during the early part of 1953 as the requisite cash is produced from sales during the winter months.

Due notice having been given of the filing of the declaration and a hearing not having been requested of or ordered by the Commission, and the Commission finding that the applicable provisions of the act and rules promulgated thereunder are satisfied and that no adverse findings are necessary, and deeming it appropriate in the public interest and the interest of investors and consumers that said declaration be permitted to become effective:

It is ordered, Pursuant to Rule R-23 and the applicable provisions of said act, that said declaration be, and hereby is, permitted to become effective forthwith, subject to the terms and conditions prescribed in Rule U-24 of the general rules and regulations promulgated under the act.

By the Commission.

INTERSTATE COMMERCE COMMISSION

[4th Sec. Application 27459]

FEEDING GRAINS BETWEEN POINTS IN THE WEST AND MIDWEST

APPLICATION FOR RELIEF

OCTOBER 14, 1952.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: L. E. Kipp, Agent, for carriers parties to schedules listed below.

Commodities involved: Corn (not pop corn) and the products thereof, dry, uncooked, viz.; chaff, clippings, etc., and sorghum grains, carloads.

From: Points in Colorado, Iowa, Kansas, Missouri, and Nebraska.

To: Points in Colorado, Idaho, Utah, and Wyoming.

Grounds for relief: Rail and motor competition, circuitous routes, and to apply over short tariff routes rates constructed on the basis of the short line distance formula.

Schedules filed containing proposed rates: D & RGW RR. tariff I. C. C. No. 918, Supp. 12, UP RR. tariff I. C. C. No. 5219, Supp. 22.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission, Division 2.

ANHYDROUS AMMONIA FROM POINTS IN OHIO, WEST VIRGINIA AND MICHIGAN TO WISCONSIN

APPLICATION FOR RELIEF

OCTOBER 14, 1952.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: L. C. Schuldt, Agent, for carriers parties to his tariff I. C. C. No. 4370.

Commodities involved: Anhydrous ammonia, carloads.

From: South Point, Ohio, Belle, W. Va., Midland and Wyandotte, Mich.

To: Madison and Merrimac, Wis.

Grounds for relief: Competition with rail carriers and circuitous routes.

Schedules filed containing proposed rates: L. C. Schuldt's tariff I. C. C. No. 4370, Supp. 43.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. GRAIN BETWEEN POINTS IN OKLAHOMA

APPLICATION FOR RELIEF

OCTOBER 14, 1952.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: F. C. Kratzmeir, Agent, for The Atchison, Topeka and Santa Fe Railway Company and the Chicago, Rock Island and Pacific Railroad Company.

Commodities involved: Grain, grain products, and related articles, carloads.

Between: Points in Oklahoma.

Grounds for relief: Competition with rail carriers, circuitous routes, and to apply over short tariff routes rates constructed on the basis of the short line distance formula.

Schedules filed containing proposed rates: F. C. Kratzmeir, Agent, I. C. C. No. 3826, Supp. 13.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. [Orange Reg. 223]

PART 933—ORANGES, GRAPEFRUIT, AND TANGERINES GROWN IN FLORIDA

LIMITATION OF SHIPMENTS

§ 933.591 *Orange Regulation 223*—(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 33, as amended (7 CFR Part 933), regulating the handling of oranges, grapefruit, and tangerines grown in the State of Florida, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended, and upon the basis of the recommendations of the committees established under the aforesaid amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of shipments of oranges, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule making procedure, and postpone the effective date of this section until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) because the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient; a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions of this section effective not later than October 20, 1952. Shipments of oranges, grown in the State of Florida, are presently subject to regulation by grades and sizes, pursuant to the amended marketing agreement and order, and will so continue until October 20, 1952; the recommendation and supporting information for continued regulation subsequent to October 19 was promptly submitted to the Department after an open meeting of the Growers Administrative Committee on October 14; such meeting was held to consider recommendations for regulation, after giving due notice of such meeting, and interested persons were afforded an opportunity to submit their views at this meeting; the provisions of this section, including the effective time of this section, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such oranges; it is necessary, in order to effectuate the declared policy of the act, to make this section effective during the period hereinafter set forth so as to provide for the continued regulation of the handling of oranges; and compliance with this section will not require any special preparation on the part of the persons subject thereto which cannot be completed by the effective time of this section.

(b) *Order.* (1) During the period beginning at 12:01 a. m., e. s. t., October 20, 1952, and ending at 12:01 a. m., e. s. t., November 3, 1952, no handler shall ship:

(i) Any oranges, except Temple oranges, grown in the State of Florida which do not grade at least U. S. No. 1 Russet; or

(ii) Any oranges, except Temple oranges, grown in the State of Florida, which are of a size smaller than 2 $^{10}/_{16}$ inches in diameter, measured midway at a right angle to a straight line running from the stem to the blossom end of the fruit, except that a tolerance of 10 percent, by count, of oranges smaller than such minimum size shall be permitted, which tolerance shall be applied in accordance with the provisions for the application of tolerances, specified in the revised United States Standards for Florida Oranges (§ 51.302 of this title; 17 F. R. 7879): *Provided,* That in determin-

[Grapefruit Reg. 168]

PART 933—ORANGES, GRAPEFRUIT, AND TANGERINES GROWN IN FLORIDA

LIMITATION OF SHIPMENTS

§ 933.592 *Grapefruit Regulation 168*—(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 33, as amended (7 CFR Part 933), regulating the handling of oranges, grapefruit, and tangerines grown in the State of Florida, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended, and upon the basis of the recommendations of the committees established under the aforesaid amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of shipments of grapefruit, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule making procedure, and postpone the effective date of this section until 30 days after publication in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) because the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient; a reasonable time is permitted under the circumstances, for preparation for such effective time; and good cause exists for making the provisions of this section effective not later than October 20, 1952. Shipments of grapefruit, grown in the State of Florida, are presently subject to regulation by grades and sizes, pursuant to the amended marketing agreement and order, and will so continue until October 20, 1952; the recommendation and supporting information for continued regulation subsequent to October 19, 1952, was promptly submitted to the Department after an open meeting of the Growers Administrative Committee on October 14; such meeting was held to consider recommendations for regulation, after giving due notice of such meeting, and interested persons were afforded an opportunity to submit their views at this meeting, the provisions of this section, including the effective time of this section, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such grapefruit; it is necessary, in order to effectuate the declared policy of the act, to make this section effective during the period hereinafter set forth so as to provide for the continued regulation of the handling of grapefruit; and compliance with this section will not require any special preparation on the part of persons subject thereto which cannot be completed by the effective time of this section.

(b) *Order.* (1) During the period beginning at 12:01 a. m., e. s. t., October 20, 1952, and ending at 12:01 a. m., e. s. t., November 3, 1952, no handler shall ship:

(i) Any grapefruit of any variety, grown in the State of Florida, which do not grade at least U. S. No. 2;

(ii) Any seeded grapefruit, other than pink grapefruit, grown in the State of Florida, which are of a size smaller than a size that will pack 70 grapefruit, packed in accordance with the requirements of a standard pack, in a standard nailed box;

(iii) Any pink seeded grapefruit, grown in the State of Florida, which are of a size smaller than a size that will pack 80 grapefruit, packed in accordance with the requirements of a standard pack, in a standard nailed box; or

(iv) Any seedless grapefruit, grown in the State of Florida, which are of a size smaller than a size that will pack 96 grapefruit, packed in accordance with the requirements of a standard pack, in a standard nailed box.

(2) As used in this section, "handler," "variety," and "ship" shall have the same meaning as when used in said amended marketing agreement and order; and "U. S. No. 2," "standard pack," and "standard nailed box" shall have the same meaning as when used in the revised United States Standards for Florida Grapefruit (§ 51.193 of this title; 17 F. R. 7408).

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup. 608c)

Done at Washington, D. C., this 15th day of October 1952.

[SEAL] M. W. BAKER,
Acting Director, Fruit and Vegetable Branch, Production and Marketing Administration.

PART 953—LEMONS GROWN IN CALIFORNIA AND ARIZONA

[Lemon Reg. 457]

LIMITATION OF SHIPMENTS

§ 953.564 *Lemon Regulation 457*—(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 53, as amended (7 CFR Part 953; 14 F. R. 3612), regulating the handling of lemons grown in the State of California or in the State of Arizona, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and upon the basis of the recommendation and information submitted by the Lemon Administrative Committee, established under the said

amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of the quantity of such lemons which may be handled, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this section until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) because the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient, and a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions of this section effective as hereinafter set forth. Shipments of lemons, grown in the State of California or in the State of Arizona, are currently subject to regulation pursuant to said amended marketing agreement and order; the recommendation and supporting information for regulation during the period specified in this section was promptly submitted to the Department after an open meeting of the Lemon Administrative Committee on October 15, 1952; such meeting was held, after giving due notice thereof to consider recommendations for regulation, and interested persons were afforded an opportunity to submit their views at this meeting; the provisions of this section, including its effective time, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such lemons; it is necessary, in order to effectuate the declared policy of the act, to make this section effective during the period hereinafter specified; and compliance with this section will not require any special preparation on the part of persons subject thereto which cannot be completed by the effective time thereof.

(b) *Order.* (1) The quantity of lemons grown in the State of California or in the State of Arizona which may be handled during the period beginning at 12:01 a. m., P. s. t., October 19, 1952, and ending at 12:01 a. m., P. s. t., October 26, 1952, is hereby fixed as follows:

(i) District 1: Unlimited movement;

(ii) District 2: 225 carloads;

(iii) District 3: Unlimited movement.

(2) The prorate base of each handler who has made application therefor, as provided in the said amended marketing agreement and order, is hereby fixed in accordance with the prorate base schedule which is attached hereto and made a part hereof by this reference.

(3) As used in this section, "handled," "handler," "carloads," "prorate base," "District 1," "District 2" and "District 3," shall have the same meaning as when used in the said amended marketing agreement and order.

(48 Stat. 31, as amended; 7 U. S. C. 601)

Done at Washington, D. C., this 16th day of October 1952.

[SEAL] S. R. SMITH,
Director, Fruit and Vegetable Branch, Production and Marketing Administration.

TITLE 26—INTERNAL REVENUE

Chapter I—Bureau of Internal Revenue, Department of the Treasury

Subchapter B—Estate and Gift Taxes

[T. D. 5940; Regs. 105]

PART 81—REGULATIONS RELATING TO ESTATE TAX

TREATMENT OF U. S. BONDS HELD BY CERTAIN NONRESIDENT ALIENS

In order to conform Regulations 105 (26 CFR Part 81) to section 604 (a) of the Revenue Act of 1951, approved October 20, 1951, such regulations are hereby amended as follows:

PARAGRAPH 1. There is inserted immediately preceding § 81.49 the following:

SEC. 604. ESTATE AND GIFT TAX TREATMENT OF UNITED STATES BONDS HELD BY CERTAIN NONRESIDENT ALIENS (REVENUE ACT OF 1951, APPROVED OCTOBER 20, 1951)

(a) *Estate tax.* Effective with respect to estates of decedents dying after February 10, 1939, section 861 (relating to the computation of the net estate of a decedent nonresident not a citizen of the United States) is hereby amended by adding at the end thereof the following new subsection:

(c) *United States bonds.* For the purposes of subsection (a), the value of the gross estate (determined as provided in section 811) of a decedent who was not engaged in business in the United States at the time of his death—

(1) Shall not include obligations issued by the United States prior to March 1, 1941; and

(2) Shall include obligations issued by the United States on or after March 1, 1941, but only if the decedent died after the date of the enactment of the Revenue Act of 1951.

PAR. 2. Section 81.13 is amended as follows:

(A) By inserting immediately after "taxation, are" in the first sentence of paragraph (e) the word "generally", and

(B) By deleting the second sentence of said paragraph (e) and inserting in lieu thereof the following: "However, section 861 (c), as added by 604 (a) of the Revenue Act of 1951, provides that, in case of a decedent who was a nonresident not a citizen of the United States and not engaged in business in the United States at the time of his death, the value of the gross estate shall not include obligations issued by the United States prior to March 1, 1941. Section 861 (c) further provides that the gross estate of such a decedent shall include obligations issued by the United States on or after March 1, 1941, but only if the decedent died after October 20, 1951, the date of the Revenue Act of 1951."

PAR. 3. Section 81.49 is amended by inserting immediately following the second sentence thereof the following: "For inclusion in the gross estate of obligations of the United States in the case of nonresidents who are not citizens of and not engaged in business in the United States, see § 81.13."

Because of the technical nature of the amendments made herein, it is found that it is unnecessary to issue this Treasury decision with notice and public procedure thereon under section 4 (a) of the Administrative Procedure Act, approved June 11, 1946, or subject to the effective date limitation of section 4 (c) of said act.

(53 Stat. 467; 26 U. S. C. 3791)

[SEAL] JOHN B. DUNLAP,
Commissioner of Internal Revenue.

Approved: October 14, 1952.

THOMAS J. LYNCH,
Acting Secretary of the Treasury.

[F. R. Doc. 52-11335, Filed, Oct. 17, 1952; 8:53 a. m.]

Subchapter C—Miscellaneous Excise Taxes

[T. D. 5939; Regs. 59]

PART 323—SPECIAL TAXES WITH RESPECT TO COIN-OPERATED AMUSEMENT AND GAMING DEVICES, BOWLING ALLEYS, BILLIARD TABLES, AND POOL TABLES

EXEMPTION FROM THE TAX ON BOWLING ALLEYS, BILLIARD TABLES, OR POOL TABLES, USED EXCLUSIVELY BY MEMBERS OF THE ARMED FORCES

In order to conform Regulations 59 (26 CFR Part 323), relating to special taxes with respect to coin-operated amusement and gaming devices, bowling alleys, billiard tables and pool tables, to Public Law 576, approved July 17, 1952 (82d Cong., 2d Sess.), such regulations are hereby amended as follows:

PARAGRAPH 1. Immediately preceding § 323.30, there is inserted the following:

PUBLIC LAW 576 (82D CONG., 2D SESS.), APPROVED JULY 17, 1952

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 3268 (a) of the Internal Revenue Code (relating to tax on bowling alleys and billiard and pool tables) is hereby amended by adding at the end thereof the following new sentence: "The tax imposed under this section shall not apply for any period beginning after June 30, 1952, with respect to any bowling alley, billiard table, or pool table maintained exclusively for the use of members of the Armed Forces on any property owned, reserved, or used by, or otherwise acquired for the use of, the United States if no charge is made for their use."

* * * * *

PAR. 2. Section 323.31, as amended by Treasury Decision 5827, approved January 16, 1951, is further amended by adding at the end thereof the following: "On and after July 1, 1952, no liability to such special tax is incurred with respect to any bowling alley, billiard table, or pool table maintained exclusively for the use of members of the Armed Forces on any property owned, reserved, or used by, or otherwise acquired for the use of, the United States if no charge is made for their use. The term "Armed Forces" includes all regular and reserve components of the uniformed services which are subject to the jurisdiction of the Secretary of Defense, the Secretary of the Army, the Secretary of the Navy, or the Secretary of the Air Force. The term also includes the Coast Guard."

Because the purpose of this Treasury decision is merely to conform the regulations to the exemption granted in the case of bowling alleys, billiard or pool tables maintained exclusively for members of the Armed Forces on property owned, reserved, used, or otherwise acquired by the United States, it is unnecessary to issue the decision with notice and public procedure thereon under section 4 (a) of the Administrative Procedure Act, approved June 11, 1946, or subject to the effective date limitation of section 4 (c) of said act.

(53 Stat. 467; 26 U. S. C. 3791)

[SEAL] JOHN B. DUNLAP,
Commissioner of Internal Revenue.

Approved: October 14, 1952.

THOMAS J. LYNCH,
Acting Secretary of the Treasury.

Subchapter D—Employment Taxes

[T. D. 5938; Regs. 116]

PART 405—COLLECTION OF INCOME TAX AT SOURCE ON WAGES

MISCELLANEOUS AMENDMENTS

On July 25, 1952, notice of proposed rule making amending Regulations 116 (26 CFR Part 405) to require corrected Forms W-2 in certain cases, and for other purposes, was published in the FEDERAL REGISTER (17 F. R. 6824). After consideration of all relevant matter presented by interested persons regarding the proposed amendments, the amendments set forth below are hereby adopted.

PARAGRAPH 1. Section 405.501 (b), as amended by Treasury Decision 5828, approved January 22, 1951, is further amended to read as follows:

(b) *Wages paid after December 31, 1950.* (1) With respect to wages paid on or after January 1, 1951, every person required to deduct and withhold from an employee a tax under section 1622, or who would have been required to deduct and withhold a tax under section 1622 if the employee had claimed no more than one withholding exemption, shall furnish to each such employee, in respect of the remuneration paid by such person to such employee during the calendar year, the original and duplicate of a statement on Form W-2 showing the following: (i) The name and address of such person, (ii) the name and address of the employee, and, if wages as defined in section 1426 (a) have been paid, his social security account number, (iii) the total amount of wages as defined in section 1621 (a), (iv) the total amount deducted and withheld as tax under section 1622, (v) the total amount of wages as defined in section 1426 (a), and (vi) the total amount of employee tax under section 1400 deducted and withheld (increased by any adjustment in the calendar year for overcollection, or decreased by any adjustment in such year for undercollection, of such tax during any prior year).

(2) For example, if the table method of withholding is used, a withholding statement must be furnished each employee whose wages during any payroll period are equal to or in excess of the smallest wage for which tax must be withheld from employees claiming one exemption. If the percentage computation method is used, a withholding statement must be furnished each employee whose wages during any payroll period are in excess of one withholding exemption for such payroll period as shown in the percentage method withholding table contained in section 1622 (b) (1).

(3) If (i) the amount of employee tax under section 1400 deducted and withheld in the calendar year from the wages as defined in section 1426 (a) paid during such year was less or greater than the tax imposed by section 1400 on such wages by reason of the adjustment in such year of an overcollection or undercollection of the tax in any prior year, or (ii) regardless of the reason for the error or the method of its correction, the amount of wages as defined in section 1426 (a) or tax under section 1400 entered on a statement furnished to the employee for a prior year was incorrect, a corrected statement for such prior year reflecting the adjustment or the correct data shall be furnished to the employee.

(4) Likewise, a corrected statement on Form W-2 shall be furnished the employee with respect to a prior calendar year (i) if the amount of wages as defined in section 1621 (a) entered on a statement furnished to the employee for such prior year is incorrect, or (ii) if the amount deducted and withheld as tax under section 1622 is less or greater than the amount entered on the statement furnished the employee for such prior year.

(5) The statement on Form W-2 for the calendar year and the corrected statement for any prior year shall be furnished to the employee on or before January 31 of the year succeeding such calendar year, or, if his employment is terminated before the close of such calendar year, on the day on which the last payment of wages is made.

(6) See the applicable regulations under the Federal Insurance Contributions Act for the requirement as to the furnishing of a statement in cases where such statement is required solely by reason of the tax under section 1400 of such act. Also see such regulations with respect to adjustments of that tax.

PAR. 2. Section 405.601, as amended by Treasury Decision 5828, is further amended as follows:

(A) By changing the third sentence of paragraph (a) to read as follows: "For the purpose of the preceding sentence, the timeliness of the deposit will be determined by the date of the en-

dorsement by a designated commercial bank or by a Federal Reserve bank made on the reverse side of Form 450."

(B) By striking "or if the employer has no principal place of business in the United States" from the next to last sentence of paragraph (a) and inserting in lieu thereof the following: "or, if the employer has no principal place of business in a collection district of the United States,".

(Secs. 1429, 3791, 53 Stat. 178, 467; 26 U. S. C. 1429, 3791. Interprets or applies sec. 1627, 57 Stat. 138; 26 U. S. C. 1627)

[SEAL] JOHN B. DUNLAP,
Commissioner of Internal Revenue.

Approved: October 14, 1952.

THOMAS J. LYNCH,
Acting Secretary of the Treasury.

TITLE 15—COMMERCE AND FOREIGN TRADE

Chapter III—Bureau of Foreign and Domestic Commerce, Department of Commerce

Subchapter C—Office of International Trade

[6th Gen. Rev. of Export Regs., Amdt. 16[1]]

PART 373—LICENSING POLICIES AND RELATED SPECIAL PROVISIONS

PART 382—DENIAL OR SUSPENSION OF EXPORT PRIVILEGES

MISCELLANEOUS AMENDMENTS

1. Section 373.29 *Special provisions for certain totally allocated commodities*, paragraph (a) *Commodities included* is amended in the following particulars:

a. The following entries are deleted therefrom:

Commodity[1]	Relevant NPA Order	Required NPAF Form
Tungsten, pure	M-81	114
Molybdenum, pure	M-81	114

[1] Commodities covered are described in detail in the applicable NPA order.

b. The following entry is added thereto:

Commodity[1]	Relevant NPA Order	Required NPAF Form
Thiokol	M-45	45

[1] Commodities covered are described in detail in the applicable NPA order.

2. Section 373.51 *Supplement 1; time schedules for submission of applications for licenses to export certain Positive List commodities* is amended in the following particulars:

For the Fourth Quarter, 1952, the entries and related submission dates set forth below are amended to read as follows:

Dept. of Commerce Schedule B No.	Commodity	Submission dates, fourth quarter 1952
664529 915590	Cast cobalt-chromium dental alloys Dental alloys and amalgams containing cobalt	Oct. 1-Oct. 31, 1952.

3. Section 382.51 *Table of compliance orders currently in effect denying export privileges*, paragraph (b) *Table of compliance orders* is amended in the following particulars:

a. The following entries are added:

Name and address	Effective date of order	Expiration date of order	Export privileges affected	Federal Register citation
Andre, Mary Gonzalez, 640 Riverside Dr., New York, N. Y.	9-12-52	12-15-53	General and validated licenses, all commodities, any destination; also exports to Canada.	17 F. R. 8398, 9-18-52.
Andre Trading Co., 640 Riverside Dr., New York, N. Y.	9-12-52	12-15-53	do	17 F. R. 8398, 9-18-52.
Andre, M. G., Inc., 640 Riverside Dr., New York, N. Y.	9-12-52	12-15-53	do	17 F. R. 8398, 9-18-52.
Boston Trading Co., 640 Riverside Dr., New York, N. Y.	9-12-52	12-15-53	do	17 F. R. 8398, 9-18-52.
Brelan Material Corp., 38 Rock St., Jersey City, N. J.	9-12-52	12-15-53	do	17 F. R. 8398, 9-18-52.
British Mercantile Co., Ltd., 640 Riverside Dr., New York, N. Y.	9-12-52	12-15-53	do	17 F. R. 8398, 9-18-52.
Chem Export, Ltd., 47 Lindegaardsvej, Charlottenlund, Denmark.	3-31-52	3-31-53	General and validated licenses, all commodities, any destination; also exports to Canada. (Company related to Albert Nyegaard, which see.)	17 F. R. 2937, 4-4-52.
Chemexport Ltd., 47 Lindegaardsvej, Charlottenlund, Denmark.	3-31-52	3-31-53	do	17 F. R. 2937, 4-4-52.
Considine, Julia, Room 608, 90 Broad St., New York, N. Y.	9-10-52	11-13-52	General and validated licenses, all commodities, any destination; also exports to Canada.	17 F. R. 8551, 9-25-52.
Davern Sales Corp., 1472 Broadway, New York, N. Y.	9-12-52	12-15-53	do	17 F. R. 8398, 9-18-52.
Gonzalez, M., 640 Riverside Dr., New York, N. Y.	9-12-52	12-15-53	do	17 F. R. 8398, 9-18-52.
Gonzalez, Mary, 640 Riverside Dr., New York, N. Y.	9-12-52	12-15-53	do	17 F. R. 8398, 9-18-52.
Kaplan, Simon, Room 608, 90 Broad St., New York, N. Y.	9-10-52	11-13-52	do	17 F. R. 8551, 9-25-52.
Lubar, Andre, 640 Riverside Dr., New York, N. Y.	9-12-52	12-15-53	do	17 F. R. 8398, 9-18-52.
Lubar, Mary, 640 Riverside Dr., New York, N. Y.	9-12-52	12-15-53	do	17 F. R. 8398, 9-18-52.
Lubar, M. G., 640 Riverside Dr., New York, N. Y.	9-12-52	12-15-53	do	17 F. R. 8398, 9-18-52.
Lubar, Mary Gonzalez, 640 Riverside Dr., New York, N. Y.	9-12-52	12-15-53	do	17 F. R. 8398, 9-18-52.
Lubar, Melvin C., Mrs., 640 Riverside Dr., New York, N. Y.	9-12-52	12-15-53	do	17 F. R. 8398, 9-18-52.
Lubar, Melvin C., 640 Riverside Dr., New York, N. Y.	9-12-52	12-15-53	do	17 F. R. 8398, 9-18-52.
Materials Inspection Co., 880 West 180th St., New York, N. Y.	9-12-52	12-15-53	do	17 F. R. 8398, 9-18-52.
Moto-Hall, 12 rue du Caporal Grebert, Casablanca, French Morocco, and 10 rue Francesco de Vitoria, Tangier.	6-4-51	6-15-53	General and validated licenses, all commodities, any destination. (Company related to Adolph Fromer, which see.)	16 F. R. 6001, 6-23-51.
Schmerer, Leonard, Room 608, 90 Broad St., New York, N. Y.	9-10-52	12-13-54	General and validated licenses, all commodities, any destination; also exports to Canada.	17 F. R. 8551, 9-25-52.
Schmerer, Leonard, & Co., Room 608, 90 Broad St., New York, N. Y.	9-10-52	12-13-54	do	17 F. R. 8551, 9-25-52.
Sherman International, Ltd., Room 608, 90 Broad St., New York, N. Y.	9-10-52	12-13-54	do	17 F. R. 8551, 9-25-52.
Silverberg, David M., 880 West 180th St., New York, N. Y.	9-12-52	12-15-53	do	17 F. R. 8398, 9-18-52.

6. The following corrected entry is substituted for the entry presently shown:

Name and address	Effective date of order	Expiration date of order	Export privileges affected	Federal Register citation
Edelman, M. H.[1], 405 Lexington Ave., New York, N. Y.	8-15-51	8-14-53	General and validated licenses, all commodities, any destination.	16 F. R. 8297, 8-21-51.

[1] Shown on table as: Edelman, M. H., Manning, Maxwell, & Moore, Inc., 405 Lexington Ave., New York, N. Y.

This amendment shall become effective as of October 9, 1952.

[6th Gen. Rev. of Export Regs., Amdt. P. L. 12[1]]

PART 399—POSITIVE LIST OF COMMODITIES AND RELATED MATTERS

MISCELLANEOUS AMENDMENTS

Section 399.1 *Appendix A—Positive List of Commodities* is amended in the following particulars:

1. The following revisions are made in commodity descriptions. These revisions include changes in general license GLV dollar-value limit and processing code where indicated:

Dept. of Commerce Schedule B No.	Commodity	Unit	Processing code and related commodity group	GLV dollar value limits	Validated license required
601150	Tin-plated scrap (not detinned) except tin cans, old, crushed (report detinned or rusted scrap in 601040 and 601090).[2] Shipping containers for oil, gas, and other liquids and solids (all metals) (report storage tanks in 618967 and 618971): Filled shipping containers, of the following types only: 1. Pressure type containers (all sizes) capable of withstanding internal pressures over 300 pounds per square inch.[3] 2. Containers, including pressure type, with a capacity of 5 or more gallons, fabricated of, or lined with any corrosion-resistant materials.[4] (Report only quantity and value of such containers under 619011 and 619012; include weight of containers with gross weight of their contents, but specify net weight of containers separately.) (Filled metal shipping containers which are not of the types listed above should not be separately reported, but their weight and value should be included with the gross weight and value of their contents):	S. ton	STEE	100	RO
619011	Gas cylinders [5]	No.	STEE	†100	RO
619012	Milk cans [6]	No.	CONT	†500	RO
619012	Other [7]	No.	STEE	†100	RO
619021	Unfilled (see §§ 371.18, 373.2): Gas Cylinders of the following types only: (a) capable of withstanding internal pressures over 300 pounds per square inch; or (b) with a capacity of 5 or more gallons, fabricated of, or lined with, any corrosion-resistant materials as defined in the "General Notes to Appendix A." [8] [9] [10]	Lb.	STEE	100	RO
619022	Other unfilled shipping containers: Milk cans with a capacity of 5 or more gallons, fabricated of, or lined with, any corrosion-resistant materials, as defined in the "General Notes To Appendix A." [8] [9]	Lb.	CONT	500	RO
619022	Other unfilled steel shipping containers of the following types only: (a) capable of withstanding internal pressures over 300 pounds per square inch; or (b) with a capacity of 5 or more gallons, fabricated of, or lined with, any corrosion-resistant materials as defined in the "General Notes to Appendix A." [8] [9] [10]	Lb.	STEE	100	RO
619022	Other unfilled shipping containers of metal other than steel.[7]	Lb.	NONF	100	RO

† Applicable to containers only and not to contents.

[2] The above entry is substituted for the entry presently on the Positive List under Schedule B No. 601150. The effect of this revision is to change the processing code from TNPL to STEE; and to reduce the GLV dollar-value limit from $1,000 to $100. The commodities covered by this Positive List entry are subject to the IC/DV procedure (see § 373.34) and are subject to the dollar-limit (DL) restrictions (see § 374.2).

[3] The pressure rating stamped on a metal drum or container is the pressure for which the drum or container is designed. Most pressure containers have a 5-to-1 safety factor and are capable of withstanding up to five times the stamped pressure rating. (Any shipping container which does not have a pressure rating stamped thereon is not a pressure container.)

[4] Corrosion-resistant materials are defined in the "General Notes to Appendix A." § 399.1.

[5] These seven entries are substituted for the seven entries presently on the Positive List under Schedule B Nos. 619011, 619012, 619021 and 619022. The effect of this amendment is to revise the heading to conform with changes announced by the Bureau of the Census in F. B. B-1, issued July 22, 1952; to revise the footnote referring to pressure containers; and to revise the commodity descriptions in order to reflect the following changes pertaining to milk cans: (a) processing code from STEE to CONT, (b) GLV dollar-limit value from $100 to $500, and (c) to omit the letters "A" and "D," thereby indicating that exportations of milk cans are not subject to IC/DV procedure or evidence of availability requirements.

[6] The commodities included in this Positive List entry are subject to (1) IC/DV procedure (see § 373.34), (2) dollar-limit (DL) restrictions (see § 374.2), and (3) evidence of availability requirements (see § 373.16).

[7] The commodities included in this Positive List entry are subject to dollar-limit (DL) restrictions (see § 374.2).

[8] The commodities included in this Positive List entry are subject to (1) IC/DV procedure (see § 373.34), and (2) evidence of availability requirements (see § 373.16).

This part of the amendment shall become effective as of 12:01 a. m., October 16, 1952.

2. The letter "A" is inserted in the column headed "Commodity Lists" opposite the commodities listed below to indicate that they are subject to the IC/DV procedure (see § 373.34 of this subchapter):

Dept. of Commerce Schedule B No.	Commodity
796186	Railway signals and specially fabricated attachments and parts, n. e. c. (specify by name).

This part of the amendment shall become effective as of November 24, 1952.

3. The letter "B" is inserted in the column headed "Commodity Lists" opposite the commodities listed below to indicate that they are subject to the dollar-limit (DL) restrictions (see § 374.2 of this subchapter):

Dept. of Commerce Schedule B No.	Commodity
839000	Other industrial chemicals: Copper sulfate (including basic and tribasic copper sulfate).

This part of the amendment shall become effective as of November 8, 1952.

4. The unit of quantity "Lb." set forth in the column headed "Unit" opposite the commodities listed below is amended to read "Bag".

Dept. of Commerce Schedule B No.	Commodity
105500	Paddy or rough rice, for seed (bag of 100 pounds).
105500	Paddy or rough rice, except for seed (bag of 100 pounds).
105710	Milled rice, containing more than 25 percent whole kernels (bag of 100 pounds) (specify approximate percentage whole kernels).
105730	Milled rice, containing not more than 25 percent whole kernels (bag of 100 pounds) (specify approximate percentage whole kernels).

Shipments of any commodities whose GLV dollar-value limits are reduced as a result of changes set forth in this amendment which were on dock, on lighter, laden aboard an exporting carrier, or in transit to a port of exit pursuant to actual orders for export prior to 12:01 a. m., October 16, 1952, may be exported under the previous general license provisions up to and including November 8, 1952. Any such shipment not laden aboard the exporting carrier on or before November 8, 1952, requires a validated license for export.

(Sec. 3, 63 Stat. 7; 65 Stat. 43; 50 U. S. C. App. Sup. 2023. E. O. 9630, Sept. 27, 1945, 10 F. R. 12245, 3 CFR 1945 Supp.; E. O. 9919, Jan. 3, 1948, 13 F. R. 59, 3 CFR 1948 Supp.)

LORING K. MACY,
Director,
Office of International Trade.

[F. R. Doc. 52-11296; Filed, Oct. 17, 1952; 8:47 a. m.]

[9] Parts 1, 2 and 3 of this amendment were published in Current Export Bulletin No. 680, dated October 9, 1952; Part 4 was published in Current Export Bulletin No. 679, dated September 18, 1952.

TITLE 32—NATIONAL DEFENSE

Chapter VI—Department of the Navy

Subchapter F—Islands Under Navy Jurisdiction

PART 760—AMERICAN SAMOA NAVAL DEFENSIVE SEA AREAS AND NAVAL AIRSPACE RESERVATIONS

REVOCATION

1. The following part of Subchapter F, Chapter VI, Department of the Navy, Title 32, National Defense, Code of Federal Regulations, is hereby revoked:

Part 760, *American Samoa Naval Defensive Sea Areas and Naval Airspace Reservations* (comprising §§ 760.1 to 760.7, inclusive).

(44 Stat. 570; 49 U. S. C. 174, E. O. 10341, April 8, 1952, 17 F. R. 3143)

Dated: October 10, 1952.

FRANCIS P. WHITEHAIR,
Acting Secretary of the Navy.

TITLE 32A—NATIONAL DEFENSE, APPENDIX

Chapter III—Office of Price Stabilization, Economic Stabilization Agency

[Ceiling Price Regulation 5, Amdt. 11]

CPR 5—IRON AND STEEL SCRAP

SPECIFICATION TOLERANCES

Pursuant to the Defense Production Act of 1950, as amended, Executive Order 10161, and Economic Stabilization Agency General Order No. 2, this Amendment to Ceiling Price Regulation 5 is hereby issued.

STATEMENT OF CONSIDERATIONS

Since its issuance, Ceiling Price Regulation 5 has contained specifications for each grade of iron or steel scrap, in addition to certain general limitations applying to all grades, prohibiting the inclusion of nonferrous metals or foreign material. In establishing the specifications for each grade after industry consultation, every attempt was made to conform as nearly as possible to customary industry practice. Insofar as such uniform specifications may differ somewhat from individual grading practices of some consumers and dealers, such uniformity is necessary to prevent circumvention or evasion of the regulation and insure an efficient and proper application of the schedule.

However, in spite of the precision and definity with which each grade is described in CPR 5, OPS recognizes that because of the very nature of iron and steel scrap, exact and literal adherence to these specifications is sometimes very difficult. Since the efficient handling and preparation of scrap has become almost entirely a mechanical operation, the degree of manual sorting necessary to remove every single oversized piece or all foreign material would be difficult to accomplish and would have a tendency to impede unnecessarily the flow of scrap to the furnaces. Thus while one 10-foot piece of pipe could easily be detected and removed before loading No. 1 heavy melting steel, several pieces which were a few inches too big might go unnoticed in the customary scrap handling process.

In view of the difficulty of literal compliance with the specifications in every scrap shipment even where there has been careful inspection, the industry, dealers and consumers alike, have petitioned the OPS for an amendment to permit some form of commercial tolerance.

From what has already been stated, it can be seen that specific tolerances similar to those which are published by the American Iron and Steel Institute for new prime iron and steel products would be inappropriate for a commodity such as scrap. Furthermore, any such specific tolerance in dimensions would soon become the minimum specification to be observed rather than the maximum limitation.

Some segments of the industry have suggested the adoption of a simple clause permitting the shipper and purchaser to apply "customary commercial tolerance" to the current specifications. This recommendation necessarily had to be rejected in view of the fact that there never has existed in the industry any such standard as a "customary commercial tolerance." In the absence of such a regulation as CPR 5, each consumer determined according to his own individual requirements what scrap he wishes to accept. It is customary for all purchase contracts of iron and steel scrap to contain the proviso that such scrap must be "suitable and acceptable to the consumer". The superintendent of the furnaces, either in his own discretion or on orders from his superiors, will determine what is suitable and acceptable, taking into consideration their melting practices, the steel to be produced from the melt, the reliability of the shipper and source of the scrap and the availability of scrap and pig iron in the market. To permit such a variable self-determined standard to be applied to the specifications in CPR 5, would result in permitting consuming mills and foundries with the laxest grading practices and the most generous tolerance policies to garner a disproportionately large share of the available scrap supply. Such a result would obviously be irreconcilable with the purposes of price stabilization and the aims of the Defense Production Act and make allocations of scrap by the National Production Authority virtually impossible.

The tolerance provision, which is added to the specifications by this amendment, simply recognizes that some minor deviation from the precise specifications may be permitted under certain circumstances. However, where any shipment of iron or steel scrap fails to meet the exact specifications set forth in CPR 5, the burden will be on the parties charged with the deviation to prove that the off-grade material was of a negligible amount and failed only to a minor extent to meet the specifications and that its inclusion was accidental and unavoidable in the customary preparation and handling of the particular grade. What constitutes customary preparation and handling of the grade will be determined from general industry practice and not necessarily from the shipper's own method of preparation. Thus, it may neither serve as a defense for the intentional violator nor as a refuge for the careless scrap preparer. The Office of Enforcement of the OPS has necessarily applied this type of practical approach in enforcing the regulation and therefore this amendment does not represent a departure from past practice.

In the judgment of the Director of Price Stabilization the ceiling prices established by this regulation are generally fair and equitable and are necessary to effectuate the purposes of Title IV of the Defense Production Act of 1950, as amended.

So far as practicable the Director of Price Stabilization gave due consideration to the national effort to achieve maximum production in the furtherance of the objectives of the Defense Production Act of 1950, as amended, and to relevant factors of general applicability.

In the formulation of this amendment there has been consultation with industry representatives, including trade association representatives, to the extent practicable under the circumstances, and consideration has been given to their recommendations.

AMENDATORY PROVISIONS

Ceiling Price Regulation 5 is amended in the following respects:

1. Paragraphs (a), (b) and (c) of Section 23 are hereby redesignated as paragraphs (b), (c) and (d) respectively.

2. Section 23 is amended by deleting the introductory paragraph and adding the following new paragraph (a):

SEC. 23. *Steel grades of dealer and industrial origin.* (a) The specifications set forth in this section and sections 24 and 25 are subject to the following general provisions:

(1) All grades must be free of dirt, nonferrous metals or foreign material of any kind and free of excessive rust and corrosion. The term "free of dirt, nonferrous metals or foreign material of any kind" shall not preclude the accidental inclusion of negligible amounts where it can be shown that this negligible amount is unavoidable in the customary preparation and handling of the particular grade involved.

(2) The inclusion, in a shipment of a particular grade of iron or steel scrap, of a negligible amount of metallic material which exceeds to a minor extent the applicable size limitations or which fails to meet to a minor extent the applicable requirements as to quality or kind of material shall not change the classification of the shipment: *Provided*, That it can be shown that the inclusion of such off-grade material is unavoidable in the customary preparation and handling of the grade involved.

(3) Wherever the term "free of alloys" is used in the following specifications it shall mean that any alloys contained in the steel are residual and have not been added for the purpose of making an alloy steel. Steel scrap will be considered free of alloys where the residual alloying elements do not exceed the following amounts:

	Percent
Nickel	0.45
Chromium	.20
Molybdenum	.10
Manganese	1.65

and where the combined residuals other than the manganese do not exceed a total of 0.60 percent.

Effective date. This amendment shall become effective October 22, 1952.

(Sec. 704, 64 Stat. 816, as amended; 50 U. S. C. App. Sup. 2154)

TIGHE E. WOODS,
Director of Price Stabilization.

OCTOBER 17, 1952.

[F. R. Doc. 52-11422; Filed, Oct. 17, 1952; 11:31 a. m.]

[Ceiling Price Regulation 30, Amdt. 38]

CPR 30—MACHINERY AND RELATED MANUFACTURED GOODS

EXEMPTION FOR MANUFACTURERS WHOSE GROSS SALES DO NOT EXCEED $25,000

Pursuant to the Defense Production Act of 1950, as amended, Executive Order 10161, and Economic Stabilization Agency General Order No. 2, this amendment to Ceiling Price Regulation 30 is hereby issued.

STATEMENT OF CONSIDERATIONS

This amendment exempts small manufacturers from the coverage of Ceiling Price Regulation 30. Any manufacturer whose gross sales of commodities manufactured by him did not exceed $25,000 in his last complete fiscal year ending prior to July 1, 1952, for all manufacturing units under his ownership and control is exempted. The exemption is also extended to any new manufacturer who has not completed a fiscal year, but who expects his gross sales during his first complete fiscal year not to exceed $25,000 for all manufacturing units under his ownership and control. In any event, the exemption ceases if sales reach $25,000 during the seller's first complete fiscal year ending after July 1, 1952. The reasons for this exemption are essentially the same as those contained in the Statement of Considerations to Amendment 33 to the General Ceiling Price Regulation and Amendment 54 to Ceiling Price Regulation 22. The reason for amending Ceiling Price Regulation 30 in a comparable manner is that a small manufacturer of commodities covered by Ceiling Price Regulation 30 who used the regulation to determine his ceiling prices may not subsequently elect to revert to the General Ceiling Price Regulation, and it would be inequitable to thus deny him the exemption. This amendment, of itself, would only exempt affected manufacturers from the coverage of CPR 30. However, Amendment 33 to the GCPR similarly exempts manufacturers covered by the GCPR. Therefore, this amendment in conjunction with Amendment 33 to the GCPR exempts these manufacturers from all price control at this time.

In view of the nature of this amendment, special circumstances have rendered consultation with industry representatives, including trade association representatives, impracticable.

AMENDATORY PROVISIONS

Ceiling Price Regulation 30 is amended by adding Appendix E to read as follows:

APPENDIX E

GENERAL EXEMPTIONS

(a) Manufacturers whose gross sales do not exceed $25,000.

(1) This regulation does not apply to sales or deliveries of commodities manufactured or produced by a manufacturer whose gross sales of such commodities did not exceed $25,000 in his last complete fiscal year ending prior to July 1, 1952, for all manufacturing units under his ownership and control.

(2) This regulation does not apply to sales or deliveries of commodities manufactured or produced by a manufacturer who did not complete a fiscal year prior to July 1, 1952, and whose gross sales of such commodities are not expected to exceed $25,000 in his first complete fiscal year for all manufacturing units under his ownership and control.

(3) In the event that the gross sales for all manufacturing units under the ownership and control of a manufacturer exempt under the preceding subparagraphs (1) and (2) of this paragraph reach $25,000 during the manufacturer's first fiscal year ending after July 1, 1952, the exemption under this paragraph ceases immediately.

(Sec. 704, 64 Stat. 816, as amended; 50 U. S. C. App. Sup. 2154)

Effective date. This amendment is effective October 17, 1952.

TIGHE E. WOODS,
Director of Price Stabilization.

OCTOBER 17, 1952.

[Ceiling Price Regulation 150, Amdt. 1]

CPR 150—MANUFACTURERS OF SMALL PNEUMATIC COMPRESSORS

EXEMPTION FOR MANUFACTURERS WHOSE GROSS SALES DO NOT EXCEED $25,000

Pursuant to the Defense Production Act of 1950, as amended, Executive Order 10161, and Economic Stabilization Agency General Order No. 2, this amendment to Ceiling Price Regulation 150 is hereby issued.

STATEMENT OF CONSIDERATIONS

This amendment exempts small manufacturers of small pneumatic compressors from the coverage of Ceiling Price Regulation 150. Any manufacturer whose gross sales of commodities manufactured by him did not exceed $25,000 in his last complete fiscal year prior to July 1, 1952, for all manufacturing units under his ownership and control is exempted. The exemption is also extended to any new manufacturer who has not completed a fiscal year but who expects his gross sales during his first complete fiscal year not to exceed $25,000 for all manufacturing units under his ownership and control. In any event, the exemption ceases if sales reach $25,000 during the seller's first complete fiscal year ending after July 1, 1952. The reasons for this action are essentially the same as those contained in the statement of considerations to Amendment 33 to the General Ceiling Price Regulation.

This amendment of itself would only exempt affected manufacturers from the coverage of CPR 150. However, Amendment 33 to the GCPR similarly exempts manufacturers covered by the GCPR. Therefore, this amendment in conjunction with Amendment 33 to the GCPR exempts these manufacturers from all price control at this time.

In view of the nature of this amendment, special circumstances have rendered consultation with industry representatives, including trade association representatives, impracticable.

AMENDATORY PROVISIONS

Ceiling Price Regulation 150 is amended in the following respects:

1. Section 1 (b) is amended to read as follows:

(b) *Persons covered.* This regulation applies to you only if you are the manufacturer of a small pneumatic compressor as described in paragraph (a) of this section, and you are located in the United States, its territories or possessions, or the District of Columbia, and you do not come within the exemptions set forth in subparagraph (1) or (2) of this paragraph. This regulation supersedes all ceiling price regulations, as well as regulations supplementary thereto, previously issued by the Office of Price Stabilization insofar as transactions covered by this regulation are concerned.

(1) This regulation does not apply to sales or deliveries of commodities manufactured or produced by a seller whose gross sales of such commodities did not exceed $25,000 in his last complete fiscal year prior to July 1, 1952, for all manufacturing units under his ownership and control.

(2) This regulation does not apply to sales or deliveries of commodities manufactured or produced by a seller who did not complete a fiscal year prior to July 1, 1952, whose gross sales of such commodities are not expected to exceed $25,000 in his first complete fiscal year for all manufacturing units under his ownership and control.

(3) In the event that the gross sales for all manufacturing units under the ownership and control of a seller exempt under the preceding subparagraphs (1) and (2) of this paragraph reach $25,000 during the seller's first fiscal year ending after July 1, 1952, the exemption under this paragraph ceases immediately.

(Sec. 704, 64 Stat. 816, as amended; 50 U. S. C. App. Sup. 2154)

Effective date. This amendment is effective October 17, 1952.

TIGHE E. WOODS,
Director of Price Stabilization.

OCTOBER 17, 1952.

[F. R. Doc. 52-11424; Filed, Oct. 17, 1952; 11:32 a. m.]

[General Overriding Regulation 2, Revision 1, Interpretation 1]

GOR 2—SALES TO THE UNITED STATES, ITS AGENTS AND SUPPLIERS

INT. 1—LIABILITY OF GOVERNMENT OFFICIALS AND EMPLOYEES

Some questions have arisen in connection with section 73 of General Overriding Regulation 2, Revision 1, relating to the legal liability of Government officials and employees under the Defense Production Act of 1950, as amended. Since this section must be read in conjunction with the applicable provisions of the act, the following interpretation

is issued combining those provisions of the act and section 73.

Section 73 of GOR 2, Revision 1, reads as follows:

SEC. 73. *Prohibitions.* On and after the effective date of this General Overriding Regulation 2, Revision 1, no Government agency or official or employee thereof and no person subject to this regulation shall do any act prohibited or omit to do any act required by this regulation and shall not offer, solicit, attempt, or agree to do or not to do any such facts. Specifically (but not in limitation of the above) no such agency, official, employee or person shall sell, and no person in the regular course of trade or business (including any such agency or official or employee thereof) shall buy at a price higher than the ceiling price, and all such persons shall make the reports required by this regulation. Violations of any provisions of this general overriding regulation are subject to applicable criminal penalties, enforcement action, and action for damages.

Section 405 (a) of the Defense Production Act of 1950, as amended, makes it unlawful, regardless of any obligation, for any person to sell or deliver, or in the regular course of business or trade to buy or receive, any material or service, or otherwise to do or omit to do any act, in violation of any regulation, order, or requirement issued under those sections of the act relating to price and wage stabilization. Thus, any violation of any price regulation, order, or requirement issued by the Office of Price Stabilization is unlawful, and, as provided in section 409 (a) and (c), may result in an order enjoining such violation or enforcing compliance with the regulation, and in certain cases may subject the seller to an action for damages. In such cases, it need not be shown that the violation was "willful", although the fact that the violation was neither willful nor the result of failure to take practicable precautions against the occurrence of the violation is taken into consideration in determining the amount of damages.

However, section 409 (b) of the act provides for criminal penalties only where the violation is willful. Accordingly, Government officials and employees are subject to criminal penalties under section 73 of GOR 2, Revision 1, only if they are guilty of a willful violation of that regulation. Similarly, they are subject to criminal penalties under other OPS regulations only if the violations are willful.

(Sec. 704, 64 Stat. 816, as amended; 50 U. S. C. App. Sup. 2154)

HERBERT N. MALETZ,
Chief Counsel,
Office of Price Stabilization.

OCTOBER 16, 1952.

[F. R. Doc. 52-11390; Filed, Oct. 16, 1952; 4:06 p. m.]

[General Overriding Regulation 34, Amdt. 2]

GOR 34—EXEMPTION OF CERTAIN LUMBER AND WOOD PRODUCTS

EXEMPTION OF AROMATIC RED CEDAR LUMBER, CERTAIN CIGAR BOXES, PERSIMMON SHUTTLE BLOCKS, PERSIMMON GOLF BLOCKS, AND PERSIMMON ROUGH TURNED GOLF HEADS

Pursuant to the Defense Production Act of 1950, as amended, Executive Order 10161 and Economic Stabilization General Order No. 2, this Amendment 2 to General Overriding Regulation 34 is hereby issued.

STATEMENT OF CONSIDERATIONS

This Amendment 2 to General Overriding Regulation 34 exempts from price control the following items: Primary producers' sales of aromatic red cedar lumber; wood and combined wood and paper cigar boxes; and persimmon shuttle blocks, golf blocks, and rough turned golf heads.

The items hereby exempted are relatively unimportant factors in business and living costs. The decision to exempt these items was made principally because the burden of maintaining price controls over them outweighs their importance to the stabilization program.

Aromatic red cedar lumber is exempted from price control only at the primary producer level because existing regulatory provisions applicable to resellers are adequate to stabilize margins at the subsequent levels. Cigar boxes covered by this amendment, which include those made of wood or of wood and paper combined, but not those made entirely of paper, are exempted at all selling levels because of the difficult problem of developing and administering fair and equitable ceilings for this industry with existing Office of Price Stabilization staff and resources.

Persimmon shuttle blocks, golf blocks, and rough turned golf heads are exempted at all levels because of the very small volume of business involved. Persimmon shuttle blocks (for textile machine shuttles), persimmon golf blocks, and persimmon rough turned golf heads are produced by a few firms whose aggregate annual output is small. Exemption of persimmon golf blocks and rough turned golf heads affects but a minor segment of the economy because of the luxury nature of the end-product.

The aromatic red cedar industry consists of a very limited number of small producers whose output is a specialty item used mostly in the manufacture of red cedar linings for closets, chests and wardrobes. Production of aromatic red cedar lumber is small in amount and volume, and the exemption of this item will have no discernible effect on other lumber prices.

Exemption of wooden or part-wooden cigar boxes is unimportant to the economy because of the small quantity currently produced and because, due largely to widespread use of other types of containers, boxes are but a small element of cost in the retail price of packaged cigars.

In formulating this amendment the Director of Price Stabilization has consulted extensively with industry representatives, including trade association representatives, and has given full consideration to their recommendations. In his opinion the exemptions provided by this amendment will not defeat or impair the objectives of the Defense Production Act of 1950, as amended.

AMENDATORY PROVISIONS

General Overriding Regulation 34 is amended as follows:

1. Section 2 is amended by adding five new paragraphs to read as follows:

(h) Primary producers' sales of aromatic red cedar (Juniperus virginiana) lumber.

(i) Cigar boxes made from wood or from wood and paper combined, except cigar boxes the sales of which are subject to Ceiling Price Regulation 84.

(j) Persimmon (Diospyros sp.) shuttle blocks.

(k) Persimmon (Diospyros sp.) golf blocks.

(l) Persimmon (Diospyros sp.) rough turned golf heads.

2. Section 3 is amended by adding three new paragraphs to read as follows:

(h) As used in paragraph (j) of section 2, a "shuttle block" is the wooden material approximating the size and rough shape of a shuttle, from which a shuttle may be made. A "shuttle" is a device used in textile looms, which aids in the weaving of cloth by carrying the weft thread or filling to and fro between the warp threads or chain.

(i) As used in paragraph (k) of section 2, a "golf block" is the wooden material approximating the size and rough shape of a golf head, from which a rough turned golf head may be made.

(j) As used in paragraph (l) of section 2, a "rough turned golf head" is the wooden part of a head for a golf club, which has been turned and shaped on a lathe, but which has not been finally machined and assembled into a finished golf head.

(Sec. 704, 64 Stat. 816, as amended; 50 U. S. C. App. Sup. 2154)

Effective date. This amendment is effective October 17, 1952.

TIGHE E. WOODS,
Director of Price Stabilization.

OCTOBER 17, 1952.

Chapter IV—Salary and Wage Stabilization, Economic Stabilization Agency

Subchapter B—Wage Stabilization Board

[General Wage Regulation 22]

GWR 22—PAYMENTS AND RECEIPT OF WAGES OF $1.00 PER HOUR OR LESS

Pursuant to the Defense Production Act of 1950, as amended (Pub. Law 774, 81st Cong., Pub. Law 96, and Pub. Law 429, 82d Cong.), Executive Order 10161 (15 F. R. 6105), Executive Order 10377 (17 F. R. 6891), and Executive Order 10390 (17 F. R. 7995), and General Order No. 16, Economic Stabilization Administrator (17 F. R. 6925), the Wage Stabilization Board has formulated and recommended to the Economic Stabilization Administrator, for promulgation, this general regulation with respect to the payment and receipt of wages at a rate of $1.00 per hour or less.

STATEMENT OF CONSIDERATIONS

Section 402 (d) (2) of the Defense Production Act of 1950, as amended in 1952, provides that "No regulation or order shall be issued or remain in effect under this title which prohibits the payment or receipt of hourly wages at a rate of $1.00 per hour or less." It is the purpose of this regulation to effectuate and implement the purposes of this amendment. The Wage Stabilization Board has studied the effects of the amendment upon existing pay practices, and also upon existing wage stabilization regulations and policies.

The major problem considered is the treatment of adjustments made to persons paid on other than an hourly basis (e. g. salaried employees, employees paid on a piece, per unit, incentive, mileage or other such rate basis, and employees paid on a commission basis). Fairness and equity entitle such employees to the benefits of the new statutory provision. Accordingly, the regulation provides that adjustments may be made to such employees, within specified limits, without prior Board approval. These provisions are designed to permit the continuation of normal pay practices insofar as basic stabilization principles permit.

This regulation also explains the relationship of adjustments of rates up to $1.00 to current wage stabilization regulations. It provides that increases in rates up to $1.00 per hour after June 30, 1952, do not have to be charged against the allowable fund for future increases under General Wage Regulation 6. The Board believes that this provision is consistent with the intent of Congress. Similarly, a method has been provided whereby merit or length of service increases may be made to employees earning below $1.00 per hour without regard to the fund available for such increases.

In view of the foregoing considerations, it is the unanimous judgment of the Wage Stabilization Board that this regulation, based on Resolution 107 of the Board, will effectuate and implement the purposes of the Defense Production Act of 1950, as amended. The Board has accordingly recommended that the Administrator promulgate this Resolution No. 107 by appropriate regulation.

The Administrator concurs in the judgment of the Wage Stabilization Board and hereby promulgates this regulation. Due consideration has been given to the standards and procedures of Titles IV and VII of the Defense Production Act, as amended.

REGULATORY PROVISIONS

Sec.
1. General policy.
2. Application to employees paid on other than an hourly basis.
3. Increases in rates above $1.00 per hour.
4. Relationship to wage stabilization regulations.

AUTHORITY: Sections 1 to 4 issued under sec. 704, 64 Stat. 816, as amended; 50 U. S. C. App. Sup. 2154. Interpret or apply Title IV, 64 Stat. 803, as amended; 50 U. S. C. App. Sup. 2101–2110; E. O. 10161, 15 F. R. 6105; 3 CFR 1950 Supp.; E. O. 10377, 17 F. R. 6891, E. O. 10390, 17 F. R. 7995.

SECTION 1. *General policy.* Any employee whose average straight-time hourly earnings are less than $1.00 may receive adjustments up to $1.00 without prior Board approval in the manner hereinafter provided.

SEC. 2. *Application to employees paid on other than an hourly basis.* The policy expressed in section 1 above may be applied to employees paid in whole or in part on other than an hourly basis without prior Board approval in accordance with the following:

(a) A salaried employee who works a regularly scheduled workweek may receive an increase to a salary which does not exceed $1.00 per hour for such regularly scheduled workweek.

(b) A salaried worker who does not work a regularly scheduled workweek may receive adjustments by either of the following methods:

(1) Supplementary side payments which will bring his average straight-time hourly earnings for each particular pay period up to $1.00; or

(2) A fixed permanent adjustment in his salary so that under the new salary expected straight-time earnings will not exceed $1.00 per hour. "Expected straight-time hourly earnings" shall be calculated by dividing the new salary by the average number of hours worked per pay period during a representative period of not less than thirteen weeks.

(c) Employees paid on a piece, per unit, incentive, mileage, trip or other such rate (other than a commission rate) basis may receive adjustments by either of the following methods:

(1) Supplementary side payments which will bring individual average straight-time hourly earnings up to $1.00 for each particular pay period, or for such period as is currently used in determining make-up or guarantee payments; or

(2) Any such rate may be so adjusted that the normal expected straight-time earnings thereof are not more than $1.00 per hour, in which event no supplementary side payments may be made to employees to whom such adjusted rate is applicable.

(d) An hourly rate up to $1.00 may be paid when employees normally paid on a piece, per unit, incentive, mileage, trip or other such rate basis are paid on an hourly basis. (E. g., down-time, off standard rate for abnormal conditions, lost time, etc.)

(e) An employee paid on a commission basis may receive additional compensation in the form of supplementary side payments to increase his average straight-time hourly earnings up to $1.00. His average straight-time hourly earnings shall be determined on a weekly basis, or in accordance with past practice.

SEC. 3. *Increases in rates above $1.00 per hour.* All petitions for adjustments of rates above $1.00 per hour to maintain pre-existing differentials affected by increases granted under this Resolution, shall be filed with the Regional Office of the Wage Stabilization Board and will be forwarded to the National Office for processing.

SEC. 4. *Relationship to wage stabilization regulations.*—(a) *General Wage Regulation 5, Revised.* In administering the fund for merit or length of service increases under section 2, General Wage Regulation 5, Revised, the employer—or employer and union—at their option may, as an alternative to the method set forth in General Wage Regulation 5, Revised, grant merit or length of service increases which do not raise the rates of employees receiving such increases above $1.00 per hour without charging them against the allowable fund. In that event all employees earning less than $1.00 per hour must be excluded from the "group" for the purpose of calculating the total fund available for such increases.

(b) *General Wage Regulation 6.* Increases up to $1.00 per hour made after June 30, 1952, do not have to be charged against the allowable amount available for future increases under General Wage Regulation 6.

(c) *General Wage Regulation 8, Revised.* Cost of living adjustments permitted under General Wage Regulation 8, Revised, must be calculated on the basis of the average straight-time earnings of the unit, including the rates below $1.00 per hour; it being understood, however, that rates less than $1.00 per hour may be increased up to $1.00 per hour before computing the amount allowable under General Wage Regulation 8, Revised.

Dated: October 15, 1952.

ROGER L. PUTNAM,
Economic Stabilization Administrator.

[F. R. Doc. 52-11356; Filed, Oct. 17, 1952; 8:59 a. m.]

[General Wage Regulation 22, Interpretations]

INTERPRETATIONS OF GENERAL WAGE REGULATION 22

QUESTIONS AND ANSWERS ON GENERAL WAGE REGULATION 22

1. Q. An employee earns 90 cents per hour. It is proposed to increase his rate to 95 cents, and also to increase the number of paid holidays from four to six, at an estimated cost of 1 cent. Is this increase in paid holidays permissible under General Wage Regulation 22, without prior Board approval?

A. No; only the 5 cents per hour increase is permissible without Board approval. Adjustments in fringe benefits—and bonuses, health and welfare, and pensions and profit-sharing plans are not covered by General Wage Regulation 22. Increases in such items may only be made in accordance with the appropriate regulations dealing with such payments.

2. Q. An employee is paid 90 cents per hour. In addition the total cost of fringe benefits, health and welfare, and pension programs is 10 cents per hour.

May the hourly rate of the employee be raised to $1.00 under General Wage Regulation 22?

A. Yes. The cost of such other types of compensation is not part of the average straight-time hourly earnings under General Wage Regulation 22.

3. Q. A salaried employee works a regularly scheduled workweek of 40 hours for a salary of $35.00. May his salary be increased to $40.00 without prior Board approval?

A. Yes.

4. Q. An employee works a regularly scheduled workweek of 44 hours for a salary of $41.40, including 40 hours of straight-time pay at 90 cents per hour and 4 hours of overtime at $1.35 per hour. May the salary be increased so as to reflect a rate of $1.00 per hour for the straight-time component of the salary based upon a 40-hour week?

A. Yes. In the situation described, the salary may be increased to $40.00 for a 40-hour week. The total compensation for a regularly scheduled 44-hour week, therefore, would be $46.00.

5. Q. A salaried employee who does not work a regularly scheduled workweek has worked an average of 45 hours per week during the preceding 13-week period. May his salary be increased to $45.00 per week without Board approval under General Wage Regulation 22?

A. Yes. However, if the salary is so increased, the employee may not subsequently receive supplementary payments under section 2 (b) (i) for weeks in which he works in excess of 45 hours.

6. Q. Job A is on a piece rate system. Average earnings for the employees on this job under normal conditions have been 91 cents per hour; individual employees earning between 80 cents and $1.10. Is it permissible to raise the piece rates for the job by 10 percent under section 2 (c) (ii) of General Wage Regulation 22?

A. Yes. The piece rates applicable to this job may be increased by 10 percent since under normal conditions expected earnings would be $1.00 per hour. However, individual employees whose average straight-time earnings are less than $1.00 after the increase may not receive supplementary side payments up to $1.00 under the terms of section 2 (c) (i).

7. Q. Under current pay practice a pieceworker is entitled to make-up pay for any day in which his average straight-time hourly earnings fall below 90 cents. May this guarantee of 90 cents per hour be increased to $1.00 per hour under General Wage Regulation 22?

A. Yes. If make-up pay is currently computed on a daily basis, the supplementary payments permitted by section 2 (c) (i) may be calculated on such basis.

8. Q. Must an employer deduct merit or length of service increases granted to employees paid at a rate below $1.00 per hour from the fund available for such increases under the past practice and six per cent options of section 2, General Wage Regulation 5, Revised?

A. In administering the fund for merit or length of service increases under section 2, General Wage Regulation 5, Revised, the employer—or employer and union—has two options:

1. It is permissible to grant merit or length of service increases which do not raise the rate of an employee above $1.00 per hour without charging them against the allowable fund. In that event employees earning below $1.00 per hour must be excluded from the "group" for the purpose of calculating the total fund available; or,

2. It is permissible to continue to calculate the total fund for merit or length of service increases on the basis of the payroll of all of the employees in the "group" including those earning below $1.00 per hour. But in that event, all merit or length of service increases, including those which do not bring an employee's rate above $1.00 per hour, must be charged against the fund for the group.

9. Q. Between January 15, 1950, and June 30, 1952, general increases were granted under General Wage Regulation 6 to employees being paid at rates below $1.00. In calculating the amount of future increases permissible under General Wage Regulation 6, must these increases be deducted as general increases?

A. Yes. Only adjustments which increase rates up to $1.00 made after June 30, 1952, do not have to be offset under General Wage Regulation 6.

10. Q. An appropriate employee unit contains employees paid above and below $1.00 per hour. It is now proposed to grant an across-the-board increase under section 4, General Wage Regulation 8, Revised, to all employees in the unit. Are the employees earning below $1.00 per hour included in the unit for the purpose of determining the allowable amount of increase?

A. Yes. All employees in the unit, including those earning less than $1.00 per hour, must be included in the unit for the purpose of determining current average straight-time hourly earnings under section 4, General Wage Regulation 8, Revised. (Also see Q–A 11.)

11. Q. It is proposed to grant increases to employees up to $1.00 per hour in accordance with the terms of General Wage Regulation 22, and at the same time to grant all employees in the unit a cost-of-living increase in a uniform amount under section 4, General Wage Regulation 8, Revised. How are current average straight-time earnings calculated for the purpose of determining the allowable adjustment under section 4, General Wage Regulation 8, Revised?

A. The appropriate percentage is applied to the current average straight-time hourly earnings of all employees in the unit, including the increases simultaneously being granted to those paid below $1.00 under General Wage Regulation 22.

(Sec. 704, 64 Stat. 816, as amended; 50 U. S. C. App. Sup. 2154)

ARCHIBALD COX,
Chairman,
Wage Stabilization Board.

Chapter VI—National Production Authority, Department of Commerce

[NPA Order M–11, as amended October 17, 1952]

M–11—COPPER AND COPPER-BASE ALLOYS

This order, as amended, is found necessary and appropriate to promote the national defense and is issued pursuant to the authority granted by the Defense Production Act of 1950, as amended. In the formulation of this order, as originally issued, and in the formulation of certain of its amendments, there was consultation with industry representatives, including trade association representatives, and consideration was given to their recommendations. In the formulation of this order as now amended, however, consultation with industry representatives has been rendered impracticable due to the necessity for immediate action and because the order affects a large number of different trades and industries.

EXPLANATORY

NPA Order M–11 as last amended January 23, 1952, is further amended by:

1. Revising the list of materials excluded from the definition of "brass mill products."

2. Revising paragraphs (b), (c), and (d) of section 4 and adding a paragraph to section 4 which is designated (e).

3. Inserting a new section 9 which sets forth the procedure by which a copper controlled material producer acquires production materials (other than copper raw materials), and by renumbering the subsequent sections accordingly.

REGULATORY PROVISIONS

Sec.
1. What this order does.
2. Definitions.
3. Opening of books.
4. Acceptance of orders.
5. Rejection of authorized controlled material orders.
6. Prohibition on shipment.
7. Limitations on acceptance of orders.
8. Authorization and directives.
9. How a copper controlled material producer obtains production materials.
10. Relation to other NPA orders and regulations.
11. Records and reports.
12. Request for adjustment or exception.
13. Communications.
14. Violations.

AUTHORITY: Sections 1 to 14 issued under sec. 704, 64 Stat. 816, Pub Law 429, 82d Cong.; 50 U. S. C. App. Sup. 2154. Interpret or apply sec. 101, 64 Stat. 799, Pub. Law 429, 82d Cong.; 50 U. S. C. App. Sup. 2071; sec. 101, E. O. 10161, Sept. 9, 1950, 15 F. R. 6105; 3 CFR, 1950 Supp.; sec. 2, E. O. 10200, Jan. 3, 1951, 16 F. R. 61; 3 CFR, 1951 Supp.; secs. 402, 405, E. O. 10281, Aug. 28, 1951, 16 F. R. 8789; 3 CFR, 1951 Supp.

SECTION 1. *What this order does.* This order applies particularly to producers, sellers, and owners of unalloyed copper and copper-base alloy ingot, and to producers of brass mill products, copper wire mill products, powder mill products, foundry copper products, and foundry copper-base alloy products. It provides rules for placing, accepting, and scheduling orders for copper controlled materials, and places limitations on the acceptance of orders for copper raw materials and the required acceptance of orders by a copper controlled material producer from another such producer. The purpose is to make possible the maximum production of copper and copper-base alloy controlled materials by reducing to a minimum the disruption of normal distribution. It supplements CMP Regulations Nos. 1, 3, and 4, but only those provisions of such regulations which are inconsistent with this order are superseded and all the other provisions of those regulations continue to apply to the copper industry.

SEC. 2. *Definitions.* As used in this order:

(a) "Person" means any individual, corporation, partnership, association, or other organized group of persons, and includes any agency of the United States Government or any other government.

(b) "NPA" means the National Production Authority.

(c) "Copper controlled material" means brass mill products, copper wire mill products, powder mill products, or foundry copper products or copper-base alloy products, as defined in this order.

(d) "Copper controlled material producer" means any person who produces a copper controlled material.

(e) "Authorized controlled material order" means any delivery order for any controlled material (as distinct from a product containing controlled material) which is placed pursuant to an allotment as provided in section 19 of CMP Regulation No. 1, or which is specifically designated to be such an order by any regulation or order of NPA.

(f) "Unalloyed copper" means electrolytic copper, fire-refined copper, and all unalloyed copper in any form, including scrap.

(g) "Copper-base alloy" means any alloy in the composition of which the percentage of copper metal equals or exceeds 40 percent by weight of the metallic content of the alloy. It includes fired or demilitarized cartridge cases and artillery cases and all copper-base alloy in any form, including scrap. It does not include alloyed gold produced in accordance with U. S. Commercial Standard CS67–38.

(h) "Brass mill products" means copper and copper-base alloys in the following forms: sheet, plate, and strip in flat lengths or coils; rod, bar, shapes, and wire (except copper wire mill products); anodes, rolled, forged, or sheared from cathodes; and seamless tube and pipe. Straightening, threading, chamfering, and cutting to width or length, and reduction in gage, do not constitute changes in form of brass mill products except as determined by NPA. The following related products which have been produced by a change in form of brass mill products are not included in the definition of brass mill products:

Circles.
Discs (except brass military ammunition discs after June 30, 1952).
Cups (except brass military ammunition cups after June 30, 1952).
Blanks and segments.
Forgings (except anodes).
Welding rod, 3 feet or less in length.
Rotating bands.
Tube and nipples—welded, brazed, or mechanically seamed.
Formed flashings.
Engravers' copper.

Allotments for the purpose of producing such related products shall be in terms of the estimated weight of the brass mill product from which such related product is made.

(i) "Copper wire mill products" means uninsulated or insulated wire and cable, whatever the outer protective coverings may be, made from copper or copper-base alloy, and also copper-clad steel wire containing over 20 percent copper by weight regardless of end use. All copper wire mill products should be measured in terms of pounds of copper content.

(j) "Powder mill products" means copper or copper-base alloy in the form of granular or flake powder.

(k) "Foundry copper products and copper-base alloy products" means cast copper and copper-base alloy shapes or forms suitable for ultimate use without remelting, rolling, drawing, extruding, or forging. (The process of casting includes the removal of gates, risers, and sprues, and sandblasting, tumbling, and dipping, but does not include any further machining or processing. For centrifugal casting the process includes the removal of the rough cut in the inner or outer diameter, or both, before delivery to a customer. Castings include anodes cast in a foundry or by an ingot maker.)

SEC. 3. *Opening of books.* Each copper controlled material producer shall open his order books for the purpose of accepting purchase orders for the second calendar quarter of 1952 and each calendar quarter thereafter not later than 90 days prior to the first day of the quarter. A copper controlled material producer may open his order books for the purpose of accepting purchase orders for any calendar quarter as long in advance of such quarter as he may choose, but when his order books are open, he shall accept orders as provided in section 4 of this order.

SEC. 4. *Acceptance of orders.* (a) A copper controlled material producer shall accept only authorized controlled material orders and orders which he is required to accept pursuant to NPA directives. A copper controlled material producer shall schedule the order for shipment within the requested month or as close to the required shipment date as is practicable considering the need for maximum production. If he does not accept and schedule the order for shipment within the requested month or a subsequent month in the same calendar quarter, he shall reject and return the order as provided in section 5 (b) of this order.

(b) A copper controlled material producer shall accept authorized controlled material orders until his order books are filled for a particular month, and pursuant to and in accordance with appropriate NPA orders, regulations, or production directives. However, each copper controlled material producer shall have the option of determining which authorized controlled material orders, or portions thereof, he will accept and schedule for delivery without regard to dates of receipt of such orders: *Provided, however,* That no copper controlled material producer shall reject any authorized controlled material orders bearing a program identification consisting of the letter A, B, C, or E, and one digit (including the program identification B–5 where it appears as a suffix), or the program identification Z–2, unless his order books are filled for a particular month.

(c) Within the 15-day period immediately preceding the beginning of lead time, a copper controlled material producer shall accept and schedule for production all authorized controlled material orders offered to him until his order books for a particular product are filled for that product. During such 15-day period such orders shall be scheduled for production with precedence given to the orders received first.

(d) A copper controlled material producer's books shall be deemed filled for a particular product for a particular month when he has accepted orders up to the total quantity of his scheduled production of the product involved for that month.

(e) In any case where a copper controlled material producer is of the opinion that the filling of an order which he is required to accept pursuant to this section would substantially reduce his over-all production owing to the large or small size of the order, unusual specifications or otherwise, he shall notify the Copper Division of NPA setting forth the pertinent facts. NPA may direct the person who has tendered the order that the order be placed with another supplier or take such other action as may be appropriate.

SEC. 5. *Rejection of authorized controlled material orders.* (a) Producers of copper controlled materials need not accept an authorized controlled material order which is received less than the number of days prior to the first day of the month in which shipment is requested, as set forth in Schedule III of CMP Regulation No. 1, or for less than the minimum mill quantities set forth in Schedule IV of CMP Regulation No. 1, unless specifically directed to accept the order by NPA.

(b) A copper controlled material producer shall accept or reject and return all purchase orders tendered to him promptly after receipt of such orders. Upon such acceptance or rejection he shall immediately notify the person who tendered the same of such acceptance or rejection in writing or by telegram. For the purpose of the first sentence of this section the word "promptly" shall be deemed to mean as quickly as possible, but in no event later than 13 consecutive calendar days after receipt. For the purpose of the first sentence of this paragraph receipt of an order shall not be deemed to have occurred until the order is received at the place where the producer usually acknowledges and schedules such orders. This provision is intended to give those persons whose orders have been rejected an oppor-

transferred to the Commandant, United States Coast Guard by Reorganization Plan No. 26 of 1950, effective July 31, 1950, the functions formerly vested in the Commandant, United States Coast Guard were transferred to the Secretary of the Treasury with certain specific exceptions. The Secretary of the Treasury by an order dated July 31, 1950 (15 F. R. 6521), delegated to the Commandant the functions formerly performed by him under Reorganization Plan No. 3 of 1946.

§ 50.01–10 *Purpose of regulations.* The purpose of the regulations in this subchapter is to set forth uniform minimum requirements for marine engineering in accordance with the intent of Title 52 of the Revised Statutes and acts amendatory thereof or supplemental thereto, as well as to implement various International Conventions for Safety of Life at Sea and other treaties which affect the merchant marine. The regulations are necessary to carry out the provisions of law affecting inspected vessels and such regulations have the force of law.

§ 50.01–15 *Application of regulations.* (a) The regulations in this subchapter contain specifications and requirements for materials, design, construction, installation, and inspection of machinery, boilers, unfired pressure vessels, safety valves and appurtenances, including piping systems, upon the strength and efficiency of which safety of life is dependent.

(b) The regulations in this subchapter apply to installations contracted for or built on or after July 1, 1935. The regulations in Subchapter G (Marine Engineering Installations Contracted for Prior to July 1, 1935) of this chapter apply only to installations contracted for or built prior to July 1, 1935.

(c) The regulations in this subchapter are not retroactive in effect, except as provided in paragraph (d) of this section or if specifically provided for in the regulation at the time it is amended or added. The regulations amended or added subsequent to July 1, 1935, are applicable to installations contracted for or built on or after the effective date of such regulations. For the purpose of recalculating the maximum allowable pressure of boilers, unfired pressure vessels and piping under the provisions of § 61.20–15 (f), the formulas found in this subchapter may be used for boilers, unfired pressure vessels and piping: *Provided*, That such recalculation shall not permit a higher pressure than that originally allowed by the regulations in effect at the time such work was contracted for or built.

(d) Where existing vessels are reboilered, the mountings and attachments, including feed and blow-off valves and fittings, shall be renewed in accordance with regulations in this subchapter, in effect at the time such work is contracted for or built. The steam piping shall be gaged and examined by the Officer in Charge, Marine Inspection, and if found to be of the thickness required at the time the piping was installed it may be continued in use so long as the Officer in Charge, Marine Inspection, is of the opinion that the piping may be safely continued in use. Changes in specifications of articles of equipment shall not apply to such articles which have been passed as satisfactory until replacement shall become necessary.

§ 50.10–1 *Commandant.* The term "Commandant" means the Commandant of the Coast Guard.

§ 50.10–5 *Coast Guard District Commander.* The term "Coast Guard District Commander" means an officer of the Coast Guard designated as such by the Commandant to command all Coast Guard activities within his district, which include the inspections, enforcement, and administration of Title 52, Revised Statutes, and acts amendatory thereof or supplemental thereto, and rules and regulations thereunder.

§ 50.10–10 *Officer in Charge, Marine Inspection.* The term "Officer in Charge, Marine Inspection," means any person from the civilian or military branch of the Coast Guard designated as such by the Commandant and who under the superintendence and direction of the Coast Guard District Commander is in charge of an inspection district for the performance of duties with respect to the inspections, enforcement, and administration of Title 52, Revised Statutes, and acts amendatory thereof or supplemental thereto, and rules and regulations thereunder.

§ 50.10–15 *Marine inspector or inspector.* The terms "marine inspector" or "inspector" mean any person from the civilian or military branch of the Coast Guard assigned under the superintendence and direction of an Officer in Charge, Marine Inspection, or any other person as may be designated for the performance of duties with respect to the inspections, enforcement, and the administration of Title 52, R. S., and acts amendatory thereof or suplemental thereto, and rules and regulations thereunder.

§ 50.10–20 *Requirements.* The term "requirements" refers to process of manufacture, characteristic, physical and chemical properties, tests, workmanship, and finish of materials.

§ 50.10–25 *Headquarters.* The term "headquarters" means the Office of the Commandant, United States Coast Guard, Washington 25, D. C.

PART 52—CONSTRUCTION

SUBPART 52.01—PROCEDURE AND GENERAL REQUIREMENTS

1. Sections 52.01–20 and 52.01–25 are amended to read as follows:

§ 52.01–20 *Appeals.* In case the design is disapproved by the Officer in Charge, Marine Inspection, the manufacturer may appeal within 30 days, to the Coast Guard District Commander of the district, and should the Coast Guard District Commander sustain the Officer in Charge, Marine Inspection, the manufacturer may, within 30 days, further appeal to the Commandant. The decision of the Commandant shall be final.

52.01–25 *Certifications and affidavits of manufacturers.* (a) In requesting inspection of a new boiler or pressure vessel subject to inspection by the Coast Guard, the manufacturer shall file with the Officer in Charge, Marine Inspection, a certification of a data report in triplicate on Form CG 2935 for boilers or Form CG 2936 for unfired pressure vessels. (See § 61.45–5 or § 61.45–10 of this subchapter.)

(b) Manufacturers of class B materials, such as pipe, valves, flanges, fittings, traps, separators, castings, forgings, etc., or appliances, proposed for use on vessels subject to inspection by the Coast Guard, shall file at Headquarters affidavits duly executed on Form CG 935A certifying that such materials or appliances will be manufactured in accordance with the regulations in this subchapter. (See § 61.45–15 of this subchapter.)

(R. S. 4405, as amended, 4462, as amended; 46 U. S. C. 375, 416. Interpret or apply R. S. 4399, 4400, 4417, 4417a, 4418, 4421, 4426–4431, 4433, 4434, 4453, as amended, sec. 14, 29 Stat. 690, 41 Stat. 305, 49 Stat. 1544, sec. 17, 54 Stat. 166, sec. 3, 54 Stat. 346, sec. 2, 54 Stat. 1028, sec. 5, 55 Stat. 244, 245, as amended; 46 U. S. C. 361, 362, 391, 391a, 392, 399, 404–409, 411, 412, 435, 489, 366, 363, 367, 526p, 1333, 463a, 50 U. S. C. App. 1275)

2. Section 52.01–45 *Inspection of boilers under construction* is canceled.

(R. S. 4405, as amended, 4462, as amended; 46 U. S. C. 375, 416)

3. Section 52.01–55 is amended to read as follows:

§ 52.01–55 *Request for increase of pressure.* (a) When a maximum allowable pressure has been established for a boiler, an increase in pressure shall not be authorized unless the boiler design, piping system and machinery meet the requirements of this subchapter for the pressure requested. An increase in maximum allowable pressure shall be granted only by the Commandant upon presentation of data or drawings proving that the requested increase in pressure is justified.

(b) When existing boilers are replaced by new boilers designed to operate at pressures in excess of the pressure allowed by the certificate of inspection, an increase in pressure shall not be authorized unless the boiler design, piping systems and machinery meet the requirements of this subchapter for the maximum pressure requested. An increase in maximum allowable pressure shall be granted only by the Commandant upon presentation of data or drawings proving that the boiler, piping system and machinery will operate safely at the desired maximum pressure of the system.

(R. S. 4405, as amended, 4462, as amended; 46 U. S. C. 375, 416. Interpret or apply R. S. 4399, 4400, 4417, 4417a, 4418, 4421, 4426–4431, 4433, 4434, 4453, as amended, sec. 14, 29 Stat. 690, 41 Stat. 305, 49 Stat. 1544, sec. 17, 54 Stat. 166, sec. 3, 54 Stat. 346, sec. 2, 54 Stat. 1028, sec. 5, 55 Stat. 244, 245, as amended; 46 U. S. C. 361, 362, 391, 391a, 392, 399, 404–409, 411, 412, 435, 489, 366, 363, 367, 526p, 1333, 463a, 50 U. S. C. App. 1275.)

4. Section 52.01–65 *Repairs, replacements, or alterations* is canceled.

(R. S. 4405, as amended, 4462, as amended; 46 U. S. C. 375, 416)

self-authorization privilege is given to all operators of telephone systems comprising less than 15,000 instruments, and larger operators are permitted to self-authorize for small operating construction projects. These changes appear in section 3.

3. Changes are made in sections 3, 4, 6, and 7 for purposes of clarity and of consistency with other NPA orders and regulations.

AUTHORITY: Sections 1 to 11 issued under sec. 704, 64 Stat. 816, Pub. Law 429, 82d Cong.; 50 U. S. C. App. Sup. 2154. Interpret or apply sec. 101, 64 Stat. 799, Pub. Law 429, 82d Cong.; 50 U. S. C. App. Sup. 2071; sec. 101, E. O. 10161, Sept. 9, 1950, 15 F. R. 6105; 3 CFR, 1950 Supp.; sec. 2, E. O. 10200, Jan. 3, 1951, 16 F. R. 61; 3 CFR, 1951 Supp.; secs. 402, 405, E. O. 10281, Aug. 28, 1951, 16 F. R. 8789; 3 CFR, 1951 Supp.

SECTION 1. *What this order does.* This order provides rules for the procurement and use of materials for MRO and operating construction by the operators of the communications systems covered by it.

SEC. 2. *Definitions.* As used in this order:

(a) "Person" means any individual, partnership, corporation, association, or other organized group, and includes any business enterprise, Government agency, or institution.

(b) "Operator" means any person to the extent engaged in rendering communications service on a revenue basis within the United States, its territories and possessions.

(c) "Communications service" means the transmission of messages by wire or radio, excluding radio broadcasting, television broadcasting, and amateur radio.

(d) "Material" means any raw, in-process, or manufactured commodity, equipment, component, accessory, part, assembly, or product of any kind.

(e) "Maintenance" means the minimum upkeep necessary to continue any plant, facility, or equipment in sound working condition.

(f) "Repair" means the restoration of any plant, facility, or equipment to sound working condition when it has been rendered unsafe or unfit for service by wear and tear, damage, failure of parts, or the like. Neither "maintenance" nor "repair" includes the replacement of any plant, facility, or equipment, or the improvement of any plant, facility, or equipment by replacing material which is still in sound working condition with materials of a new or different kind, quality, or design.

(g) "Operating supplies" means any material which is essential to and consumed in the operation of communications service by an operator and used for purposes other than maintenance, repair, operating construction, or other capital additions.

(h) "MRO" means maintenance, repair, and operating supplies.

(i) "Operating construction" means the erection of any building, structure, or project used or useful in rendering communications service, or addition or extension thereto, or alteration thereof, through the incorporation-in-place on the site of materials which are to be an integral and permanent part of the building, structure, or project, whether such building, structure, or project is owned by an operator or is leased or to be leased to him and where the leased building is or is to be exclusively used or useful in rendering communications service.

(j) "Inventory" shall include all items of new and/or salvaged material and supplies on hand, whether held for current or future use or for sale as junk, until physically incorporated into plant by way of maintenance, repair, construction, or otherwise, and without regard to whether or not such items of material are carried in operator's accounting records under "Materials and Supplies Account," exclusive nevertheless of:

(1) Any material of a superseded type reserved by an operator in segregated stocks for reuse, as a practical measure of conservation to meet probable future operating contingencies;

(2) Any material ordered for use in construction, made to particular specifications, and reasonably usable only in the specific project for which it is made;

(3) Segregated stocks maintained by an operator as reasonably necessary for repair of major breakdowns due to explosion, fire, sabotage, act of the public enemy, flood, storm, or similar catastrophe.

(k) "Material of a superseded type" means equipment no longer manufactured or carried by a manufacturer as a regular item for sale to operators except for repair and maintenance of, or for additions to, existing installations. It does not mean equipment drawn from superseded stock to replenish current working inventories.

(l) "Controlled material" means steel, copper, and aluminum, in the forms and shapes indicated in Schedule I of CMP Regulation No. 1, as from time to time amended.

(m) "Single project" means all items entering into construction as part of a single plan, whether or not installed or completed at the same time. No project shall be divided for the purpose of bringing it or any part of it within this definition.

(n) "Authorized controlled material order" means an order so defined in CMP Regulation No. 1, as from time to time amended.

(o) "NPA" means the National Production Authority.

(p) The definitions of this order shall be applicable notwithstanding any conflict with any prescribed system of accounting.

SEC. 3. *Self-authorization*—(a) (1) *Small operators (less than 5,000 stations).* Any operator, as herein defined, of a telephone system comprising less than 5,000 telephone instruments in service is hereby assigned the right to place authorized controlled material orders for all controlled materials required by him for delivery on or before March 31, 1953, (i) for MRO and (ii) for operating construction projects in which the cost to him of materials for any single project does not exceed $25,000: *Provided*, That the operating construction does not require in excess of the following quantities of controlled materials in any one project in any calendar quarter:

5 tons of carbon steel (not to include more than 2 tons of structural shapes, but no wide-flange beam sections or columns).
1,000 pounds of copper and copper-base alloys.
2,000 pounds of aluminum.
No alloy steel or stainless steel.

(2) *Small operators (less than 15,000 stations).* Any operator, as herein defined, of a telephone system comprising less than 15,000 telephone instruments in service is hereby assigned the right to place authorized controlled material orders for all controlled materials required by him for delivery in the month of April 1953, (i) for MRO and (ii) for operating construction projects in which the cost to him of materials for any one project does not exceed $25,000: *Provided*, That the operating construction does not require in excess of the following quantities of controlled materials in any one project in any calendar quarter:

5 tons of carbon steel (not to include more than 2 tons of structural shapes, but no wide-flange beam sections or columns).
1,000 pounds of copper and copper-base alloys.
2,000 pounds of aluminum.
No alloy steel or stainless steel.

(b) *Self-authorization—MRO.* Every operator of a telephone system comprising less than 15,000 telephone instruments in service is hereby assigned the right to place authorized controlled material orders for all controlled materials required by him for delivery on or after May 1, 1953, for MRO.

(c) *Self-authorization — operating construction.* Every operator, regardless of size, is hereby assigned the right to place authorized controlled material orders for delivery on or after May 1, 1953, for all controlled materials required by him for operating construction projects provided that he does not require in excess of the following quantities of controlled materials for any one project in any one quarter:

25 tons of carbon steel and alloy steel, including all types of structural shapes (not to include more than 2½ tons of alloy steel and no stainless steel).
5,000 pounds of copper and copper-base alloys.
4,000 pounds of aluminum.

(d) *Form of orders.* Each operator who places authorized controlled material orders in accordance with this section shall do so without making application to NPA and without receiving an allotment for that portion of his controlled material orders placed in accordance with this paragraph. In placing authorized controlled material orders in accordance with this paragraph,

he shall use the allotment number "U–1" and shall show the quarter during which delivery is required: As for example, "U–1 2Q53".

(e) *Assignment of rating.* Each operator to whom the provisions of this section apply may also order materials other than controlled materials which he may require for the MRO and operating construction covered by this section, and is hereby assigned the right to apply to such orders a DO rating in connection with the allotment number; that is, "DO–U–1". The date or dates on which delivery is required must also be specified on each delivery order.

(f) *Limitations on use of ratings.* After April 30, 1953, a DO rating authorized pursuant to this section shall not be used for any entire single operating construction project in dollar amounts in excess of $100,000 for building equipment and building materials (other than controlled materials), and $200,000 for equipment and machinery. On or before April 30, 1953, the limitations of paragraph (a) of this section apply. A DO rating authorized pursuant to this section shall not be used in connection with operating construction to obtain office machinery, office equipment, furniture, or appliances: *Provided, however,* That this prohibition shall not apply to machinery and equipment specially designed for communications-system use such as automatic message accounting machines.

SEC. 4. *Applications for allotments.* (a) Any operator, except to the extent that he is governed by the provisions of section 3 of this order, may hereafter file with NPA on Form NPAF–117 an application for an authorized program and for a quarterly allotment of such controlled materials as he may require for MRO and operating construction. The initial application for each quarter shall be filed with NPA not later than 120 days prior to the beginning of the quarter for which application is made, unless NPA shall designate a later date.

(b) In approving an application wholly or in part, NPA will specify the controlled materials allotted to the applicant for delivery in the calendar quarter during which the allotment is valid, and will authorize a program for MRO and operating construction. This authorized program shall be deemed to be an authorized construction schedule for the purposes of Revised CMP Regulation No. 6, and the use of the schedule and the related allotment, the use of ratings in connection with operating construction, and the placing and form of delivery orders, shall be governed by all provisions of that regulation not inconsistent with this order.

(c) Every operator who applies for an allotment pursuant to this order shall, to the extent that his application is granted, use the allotment number "U–2" to obtain controlled materials and shall show, on each authorized controlled material order, the quarter for which his allotment is valid, such as "U–2 2Q53." He may also order materials other than controlled materials which are necessary to fulfill his authorized program, and is hereby assigned the right to apply to such orders a DO rating in connection with the allotment number; that is, "DO–U–2." The date or dates on which delivery is required must also be specified on each delivery order. A DO rating authorized pursuant to this section shall not be used in connection with operating construction to obtain office machinery or office equipment: *Provided, however,* That this prohibition shall not apply to machinery or equipment specially designed for communications-system use such as automatic message accounting machines.

(d) An operator who manufactures a Class A, Class B, or any other product not for sale but solely for his own use as MRO, or as a minor capital addition, may obtain the products and materials required for such production by using, within the limitations of this order, the allotment symbol or rating provided for in this order.

(e) No operator shall use any allotment number or rating for the purposes of this order except as provided in this order.

SEC. 5. *Emergency excess of allotment.* (a) In the event of any major service breakdown caused by extraordinary cause such as explosion, fire, sabotage, act of the public enemy, flood, storm, or similar catastrophe, an operator may use the "U-2" allotment number to obtain materials in excess of his allotment to the extent necessary to reestablish service by the use of no greater amount of materials than those rendered unfit for service. In so doing he shall place the word "(emergency)" after the allotment number on his order, and within 10 calendar days after the placing of such order, he shall report the placing of such order to NPA on Form NPAF–117 which shall be accompanied by a statement of the reasons therefor, justifying the use of the emergency rating.

SEC. 6. *Form of certification.* A delivery order placed in accordance with this order must contain, in addition to a DO rating as authorized or an allotment number as authorized, a certification in the following form:

Certified under Revised CMP Regulation No. 6 and NPA Order M–77

which shall be signed as provided in NPA Reg. 2. This certification shall constitute a representation to the supplier and to NPA that the purchaser is authorized to place a delivery order under the provisions of Revised CMP Regulation No. 6 and under this order to obtain the products or materials covered by the delivery order.

SEC. 7. *Effect on other orders.* This order supersedes as to operators, the provisions of other NPA orders governing the civilian use of controlled materials. The provisions of this order supersede as to operators those of CMP Regulation No. 5, except that nothing in this order shall be deemed to permit the use of a rating or allotment number to obtain any of the items listed in Schedule I or II of CMP Regulation No. 5 as from time to time amended. The provisions of this order supersede as to operators those of Revised CMP Regulation No. 6 except as otherwise provided in this order. They do not supersede any NPA order or regulation insofar as it provides that ratings shall not be effective to obtain particular products or materials. The inventory limitations of any NPA orders and regulations as from time to time amended shall apply to operators, but in applying such limitations the definition of "inventory" contained in this order shall be used.

SEC. 8. *Request for adjustment or exception.* Any person affected by any provision of this order may file a request for adjustment or exception upon the ground that such provision works an undue or exceptional hardship upon him not suffered generally by others in the same trade or industry, or that its enforcement against him would not be in the interest of the national defense or in the public interest. In examining requests for adjustment or exception claiming that the public interest is prejudiced by the application of any provision of this order, consideration will be given to the requirements of the public health and safety, civilian defense, and dislocation of labor and resulting unemployment that would impair the defense program. Each request shall be in writing, by letter in triplicate, and shall set forth all pertinent facts, the nature of the relief sought, and the justification therefor.

SEC 9. *Records and reports.* (a) Each person participating in any transaction covered by this order shall make and preserve, for at least 3 years thereafter, accurate and complete records of receipts, deliveries, inventories, production, and use, in sufficient detail to permit the determination, after audit, whether each transaction complies with the provisions of this order. This order does not specify any particular accounting method and does not require alteration of the system of records customarily used, provided such records supply an adequate basis for audit. Records may be retained in the form of microfilm or other photographic copies instead of the originals by those persons who, at the time such microfilm or other photographic records are made, maintain such copies of records in the regular and usual course of business.

(b) All records required by this order shall be made available for inspection and audit by duly authorized representatives of the National Production Authority, at the usual place of business where maintained.

(c) Persons subject to this order shall make such records and submit such reports to the National Production Authority as it shall require, subject to the terms of the Federal Reports Act of 1942 (5 U. S. C. 139–139F).

SEC. 10. *Communications.* All communications concerning this order shall be addressed to the National Production Authority, Washington 25, D. C., Ref: NPA Order M–77.

SEC. 11. *Violations.* Any person who wilfully violates any provision of this order, or any other order or regulation of NPA, or who wilfully furnishes false information or conceals any material fact in the course of operation under this order, is guilty of a crime and upon conviction may be punished by fine or imprisonment or both. In addition, administrative action may be taken against any such person to suspend his privilege of making or receiving further deliveries of materials or using facilities under priority or allocation control and to deprive him of further priorities assistance.

NOTE: All reporting and record-keeping requirements of this order have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

This order as amended shall take effect October 17, 1952.

NATIONAL PRODUCTION AUTHORITY,
By GEORGE W. AUXIER,
Executive Secretary.

TITLE 42—PUBLIC HEALTH

Chapter I—Public Health Service, Federal Security Agency

PART 32—MEDICAL CARE FOR SEAMEN AND CERTAIN OTHER PERSONS

EVIDENCE OF ELIGIBILITY FOR CARE AS AN AMERICAN SEAMAN

Notice of proposed rule making and public rule making proceedings have been omitted in the issuance of the following amendment of § 32.14 of this part. Notice and rule making proceedings have been found to be unnecessary because the sole purpose of the amendment is to revise and make less burdensome procedures relating to proof of eligibility.

1. Section 32.14 (a) is amended to read as follows:

§ 32.14 *Evidence of eligibility.* (a) As evidence of his eligibility an applicant must present a properly executed master's certificate or a continuous discharge book or a certificate of discharge showing that he has been employed on a registered, enrolled, or licensed vessel of the United States. The certificate of the owner or accredited commercial agent of a vessel as to the facts of the employment of any seaman on said vessel may be accepted in lieu of the master's certificate where the latter is not procurable. When an applicant cannot furnish any of the foregoing documents, his certification as to the facts of his most recent (including his last) employment as a seaman, stating names of vessels and dates of service, may be accepted as evidence in support of his eligibility. Documentary evidence of eligibility, excepting continuous discharge books and certificates of discharge, shall be filed at the station where application is granted. Where continuous discharge books and certificates of discharge are submitted as evidence of eligibility, the pertinent information shall be abstracted therefrom, certified by the officer accepting the application, and filed at the station.

(Sec. 215, 58 Stat. 690; 42 U. S. C. 216. Interprets or applies sec. 322, 58 Stat. 696, as amended; 42 U. S. C. 249)

2. The foregoing amendment shall be effective on publication in the FEDERAL REGISTER.

[SEAL] W. PALMER DEARING,
Acting Surgeon General.

Approved: October 15, 1952.

JOHN L. THURSTON,
Acting Federal Security Administrator.

PROPOSED RULE MAKING

DEPARTMENT OF THE TREASURY

Bureau of Internal Revenue

[26 CFR Part 29]

INCOME TAX; TAXABLE YEARS ENDING AFTER DECEMBER 31, 1941

NOTICE OF PROPOSED RULE MAKING

Notice is hereby given, pursuant to the Administrative Procedure Act, approved June 11, 1946, that the regulations set forth below in tentative form are proposed to be prescribed by the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury. Prior to the final adoption of such regulations consideration will be given to any data, views, or arguments pertaining thereto which are submitted in writing in duplicate to the Commissioner of Internal Revenue, Washington 25, D. C., within the period of 30 days from the date of publication of this notice in the FEDERAL REGISTER. The proposed regulations are to be issued under the authority contained in section 62 of the Internal Revenue Code (53 Stat. 32; 26 U. S. C. 62).

[SEAL] JOHN B. DUNLAP,
Commissioner of Internal Revenue.

In order to conform Regulations 111 (26 CFR, Part 29) to section 215 of the Revenue Act of 1950, approved September 23, 1950, section 304 (e) of the Excess Profits Tax Act of 1950, approved January 3, 1951, and sections 330 and 344 of the Revenue Act of 1951, approved October 20, 1951, such regulations are amended as follows:

PARAGRAPH 1. There is inserted immediately preceding § 29.122–1 the following:

SEC. 215. NET OPERATING LOSS DEDUCTIONS (REVENUE ACT OF 1950, APPROVED SEPTEMBER 23, 1950)

(a) *Allowance of five-year carry-over.* Section 122 (b) (relating to the amount of carry-backs and carry-overs) is hereby amended to read as follows:

(b) *Amount of carry-back and carry-over*—(1) *Net operating loss carry-back*—(A) *Loss for taxable year beginning before 1950.* If for any taxable year beginning after December 31, 1941, and before January 1, 1950, the taxpayer has a net operating loss, such net operating loss shall be a net operating loss carry-back for each of the two preceding taxable years except that the carry-back in the case of the first preceding taxable year shall be the excess, if any, of the amount of such net operating loss over the net income for the second preceding taxable year computed—

(I) With the exceptions, additions, and limitations provided in subsection (d) (1), (2), (4), and (6), and

(II) By determining the net operating loss deduction for such second preceding taxable year without regard to such net operating loss and without regard to any reduction specified in subsection (c).

"(B) *Loss for taxable year beginning after 1949.* If for any taxable year beginning after December 31, 1949, the taxpayer has a net operating loss, such net operating loss shall be a net operating loss carry-back for the preceding taxable year.

(2) *Net operating loss carry-over*—(A) *Loss for taxable year beginning before 1950.* If for any taxable year beginning before January 1, 1950, the taxpayer has a net operating loss, such net operating loss shall be a net operating loss carry-over for each of the two succeeding taxable years, except that the carry-over in the case of the second succeeding taxable year shall be the excess, if any, of the amount of such net operating loss over the net income for the intervening taxable year computed—

(I) With the exceptions, additions, and limitations provided in subsection (d) (1), (2), (4), and (6), and

(II) By determining the net operating loss deduction for such intervening taxable year without regard to such net operating loss, without regard to any net operating loss carry-back, and without regard to any reduction specified in subsection (c).

For the purposes of the preceding sentence, the net operating loss for any taxable year beginning after December 31, 1941, shall be reduced by the sum of the net income for each of the two preceding taxable years computed—

(III) With the exceptions, additions, and limitations provided in subsection (d) (1), (2), (4), and (6), and

(IV) By determining the net operating loss deduction without regard to such net operating loss or to the net operating loss for the succeeding taxable year, and without regard to any reduction specified in subsection (c).

(B) *Loss for taxable year beginning after 1949.* If for any taxable year beginning after December 31, 1949, the taxpayer has a net operating loss, such net operating loss shall be a net operating loss carry-over for each of the five succeeding taxable years, except that the carry-over in the case of each such succeeding taxable year (other than the first succeeding taxable year) shall be the excess, if any, of the amount of such net operating loss over the sum of the net income for each of the intervening years computed—

(I) With the exceptions, additions, and limitations provided in subsection (d) (1), (2), (4), and (6), and

(II) By determining the net operating loss deduction for each intervening taxable year, without regard to such net operating loss or to the net operating loss for any succeeding taxable year and without regard to any reduction specified in subsection (c).

For the purpose of the preceding sentence, the net operating loss for any taxable year beginning after December 31, 1949, shall be reduced by the amount, if any, of the net income for the preceding taxable year computed—

(I) With the exceptions, additions, and limitations provided in subsection (d) (1), (2), (4), and (6), and

(ii) By determining the net operating loss deduction for such preceding taxable year without regard to such net operating loss and without regard to any reduction specified in subsection (c).

(b) *Effective date of subsection (a).* The amendment made by subsection (a) shall be applicable in computing the net operating loss deduction for taxable years beginning after December 31, 1947.

SEC. 304. TECHNICAL AMENDMENTS (EXCESS PROFITS TAX ACT OF 1950, APPROVED JANUARY 3, 1951).

* * * * *

(e) Section 122 (d) (6) of such (Internal Revenue) code (relating to the computation of the net operating loss deduction) shall not apply with respect to any taxable year ending after June 30, 1950.

* * * * *

(g) The amendments made by this section shall be applicable with respect to taxable years ending after June 30, 1950.

SEC. 330. NET OPERATING LOSS CARRY-OVER (REVENUE ACT OF 1951, APPROVED OCTOBER 20, 1951).

(a) *Loss for taxable year beginning before 1948.* So much of subparagraph (A) of section 122 (b) (2) (relating to the amount of carry-overs) as precedes "the taxpayer" is hereby amended to read as follows:

(A) *Loss for taxable year beginning before 1948.* Except as provided in subparagraph (D), if for any taxable year beginning before January 1, 1948.

(b) *Allowance of three-year loss carry-over from taxable years 1948–1949.* Section 122 (b) (2) (relating to the amount of carry-over) is hereby amended by adding after subparagraph (B) the following new subparagraphs:

(C) *Loss for taxable year beginning after December 31, 1947, and before January 1, 1950.* If for any taxable year beginning after December 31, 1947, and before January 1, 1950, the taxpayer has a net operating loss, such net operating loss shall be a net operating loss carry-over for each of the three succeeding taxable years, except that the carry-over in the case of each such succeeding taxable year (other than the first succeeding taxable year) shall be the excess, if any, of the amount of such net operating loss over the sum of the net income for each of the intervening years computed—

(i) With the exceptions, additions, and limitations provided in subsection (d) (1), (2), (4), and (6), and

(ii) By determining the net operating loss deduction for each intervening taxable year without regard to such net operating loss or to the net operating loss for any succeeding taxable year and without regard to any reduction specified in subsection (c).

For the purpose of the preceding sentence, the net operating loss for any taxable year beginning after December 31, 1946, shall be reduced by the sum of the net income for each of the two preceding taxable years computed—

(iii) With the exceptions, additions, and limitations provided in subsection (d) (1), (2), (4), and (6), and

(iv) By determining the net operating loss deduction without regard to such net operating loss or to the net operating loss for the succeeding taxable year, and without regard to any reduction specified in subsection (c).

(D) *Loss for taxable year beginning after December 31, 1946, and before January 1, 1948, in the case of a corporation which commenced business after December 31, 1945.* If for any taxable year beginning after December 31, 1946, and before January 1, 1948, a corporation which commenced business after December 31, 1945, has a net operating loss, such net operating loss shall be a net operating loss carry-over for each of the three succeeding taxable years, except that the carry-over in the case of each such succeeding taxable year (other than the first succeeding taxable year) shall be the excess, if any, of the amount of such net operating loss over the sum of the net income for each of the intervening years computed—

(i) With the exceptions, additions, and limitations provided in subsection (d) (1), (2), (4), and (6), and

(ii) By determining the net operating loss deduction for each intervening taxable year without regard to such net operating loss or to the net operating loss for any succeeding taxable year and without regard to any reduction specified in subsection (c).

For the purpose of the preceding sentence, the net operating loss for any taxable year beginning after December 31, 1946, shall be reduced by the sum of the net income for each of the two preceding taxable years computed—

(iii) With the exceptions, additions, and limitations provided in subsection (d) (1), (2), (4), and (6), and

(iv) By determining the net operating loss deduction without regard to such net operating loss or to the net operating loss for the succeeding taxable year, and without regard to any reduction specified in subsection (c).

SEC. 344. NONBUSINESS CASUALTY LOSSES (REVENUE ACT OF 1951, APPROVED OCTOBER 20, 1951).

(a) *Removal of limitation.* Section 122 (d) (5) (relating to net operating loss deduction) is hereby amended by inserting at the end thereof the following new sentence: "This paragraph shall not apply with respect to deductions allowable for losses sustained after December 31, 1950, in respect of property, if the losses arise from fire, storm, shipwreck, or other casualty, or from theft."

(b) *Effective date.* The amendment made by this section shall be applicable in computing the net operating loss deduction for taxable years ending after December 31, 1948.

PAR. 2. Section 29.122–1 (a) is amended as follows:

(A) By striking the second and third sentences of subparagraph (2), and inserting in lieu thereof the following new sentence: "See § 29.122–4 for the taxable years from which a net operating loss may be carried over or carried back to the current taxable year."

(B) By striking the last two sentences of subparagraph (2) thereof, which read as follows: "Therefore, the net operating loss carry-overs to a taxable year beginning on or after January 1, 1942, are the net operating loss for the first preceding taxable year and so much of the net operating loss for the second preceding taxable year as has not been absorbed by the net income (computed under section 122), if any, for the first preceding taxable year, and the net operating loss carry-backs to such a taxable year are the net operating loss for the second succeeding taxable year and so much of the net operating loss for the first succeeding taxable year as has not been absorbed by the net income (computed under section 122), if any, for the first preceding taxable year. If either of the taxable years preceding the taxable year for which the deduction is allowed began on or after January 1, 1942, the net operating loss for such preceding taxable year is first reduced to the extent it has been absorbed by the net income (computed under section 122), if any, for the taxable years to which such loss has been carried back."

(C) By striking subparagraph (3) and inserting in lieu thereof the following new subparagraph (3).

(3) A fractional part of a year which is a taxable year under section 48 (a) is a preceding or a succeeding taxable year for the purpose of determining under section 122 the first, second, etc., preceding or succeeding taxable year.

PAR. 3. Section 29.122–1 (b) is amended by striking the second sentence and inserting in lieu thereof the following new sentence: "The first step is the computation of the net operating loss, if any, for any preceding or succeeding taxable year from which a net operating loss may be carried forward or carried back to the current taxable year."

PAR. 4. Section 29.122–2 is amended by inserting at the end of paragraph (e) thereof, which paragraph begins "(e) For taxable years beginning after December 31, 1941", the following new sentence: "This deduction is not allowed for any taxable year ending after June 30, 1950; for example, the deduction is not allowed for any taxable year ending after June 30, 1950, in the case of a taxpayer which makes its return on the basis of cash receipts and disbursements and which pays such excess profits tax during such taxable year."

PAR. 5. Section 29.122–3 (a) is amended by adding at the end of subparagraph (7) thereof the following new sentence: "For the purpose of computing the net operating loss deduction for any taxable year ending after December 31, 1948, any deduction allowable for a loss sustained after December 31, 1950, in respect of property, if the loss arises from fire, storm, shipwreck, or other casualty, or from theft, shall not be considered to be an ordinary nonbusiness deduction but shall be treated as a deduction attributable to the operation of a trade or business regularly carried on by the taxpayer."

PAR. 6. Section 29.122–4 (a) is amended to read as follows:

(a) *In general.* (1) The aggregate of any net operating loss carry-overs and any net operating loss carry-backs to a taxable year shall be the basis of the net operating loss deduction. In order to compute such deduction the taxpayer must first determine the part of any net operating losses for any preceding or succeeding taxable years which are carry-overs or carry-backs to the current taxable year.

(2) The number of taxable years to which a net operating loss may be carried back and carried over are as follows (subject to the two exceptions set forth below):

Net operating loss for a taxable year beginning: After and before		May be carried back to the following preceding taxable years	May be carried over to the following succeeding taxable years
Dec. 31, 1938	Jan. 1, 1942	None	2
Dec. 31, 1941	Jan. 1, 1948	2	2
Dec. 31, 1947	Jan. 1, 1950	2	3
Dec. 31, 1949		1	5

The first exception referred to above is that a net operating loss may not be carried back to any taxable year beginning prior to January 1, 1941. The second exception referred to above is that in the case of a corporation which commenced business after December 31, 1945, the net operating loss for any taxable year beginning after December 31, 1946, and before January 1, 1948, may be carried over to the three succeeding taxable years in lieu of the two succeeding taxable years shown above. The date the corporation commenced business shall be determined for the purpose of this exception under the rules provided in the regulations promulgated under section 445, relating to the computation of the average base period net income in the case of new corporations. See § 40.445–1 of this subchapter (Regulations 130).

(3) The amount which is carried back or carried over to any taxable year is the net operating loss to the extent it was not absorbed in the computation of the net income for other taxable years, preceding such taxable year, to which it was carried back or carried over. For the purpose of determining the net income for a taxable year which so absorbs the net operating loss that is carried back or carried over, the various net operating loss carry-overs and carry-backs to such taxable year are considered to be applied in reduction of the net income for such taxable year in the order of the taxable years from which such losses are carried over or carried back, beginning with the loss for the earliest taxable year.

PAR. 7. Section 29.122–4 (b) is amended to read as follows:

(b) *Portion of net operating loss which is a carry-over or a carry-back to the current taxable year.* A net operating loss must first be carried to the earliest of the several taxable years to which such loss is allowable as a carry-back or a carry-over, and is then to be carried to the next earliest of such several taxable years, etc. See paragraph (a) of this section for the taxable years to which a net operating loss incurred in any particular taxable year may be carried back or carried over. The entire net operating loss may be carried to such earliest year. The portion of the loss which may be carried to any taxable year subsequent to such earliest year is the excess of such net operating loss over the aggregate of the net income, if any (computed as provided in paragraph (c) of this section), for those of such several taxable years which precede the taxable year to which such net operating loss is allowable as a carry-back or a carry-over.

Example. A taxpayer on the calendar year basis has net operating losses for 1940 and 1948. The entire net operating loss for 1940 may be carried over to 1941, and the amount of the carry-over to 1942 is the excess of that loss over the net income (computed as provided in paragraph (c) of this section) for 1941. Similarly, the entire net operating loss for 1948 may be carried back to 1946, the amount of the carry-back to 1947 is the excess of that loss over the net income (computed as provided in paragraph (c) of this section) for 1946, and the amount of the carry-over to 1949, 1950, and 1951, is the excess of that loss over the aggregate of the net income (computed as provided in paragraph (c) of this section) for 1946 and 1947, for 1946, 1947, and 1949, and for 1946, 1947, 1949, and 1950, respectively.

PAR. 8. Section 29.122–4 (c), as amended by Treasury Decision 5600, approved February 2, 1948, is further amended by striking subparagraph (1) and the example thereunder and inserting in lieu thereof the following:

(1) The net operating loss deduction for such taxable year is computed (i) by taking into account only such net operating losses otherwise allowable as carry-overs or carry-backs to such taxable year as were sustained in taxable years preceding the taxable year in which the taxpayer sustained the net operating loss from which the net income is to be deducted, and (ii) if the taxable year to which the net operating loss is to be carried begins after December 31, 1947, by disregarding the adjustment provided in section 122 (c) and § 29.122–5 (relating to the conversion of the aggregate of the net operating loss carry-overs and carry-backs to the taxable year into the net operating loss deduction).

Example. The taxpayer files its income tax returns on the basis of the calendar year. In computing the net operating loss deduction for 1945, the taxpayer has a carry-over from 1943 of $9,000, a carry-over from 1944 of $6,000, a carry-back from 1946 of $18,000, and a carry-back from 1947 of $14,000, or an aggregate of $47,000 in carry-overs and carry-backs which is the basis for the deduction. The adjustment under section 122 (c) for the purpose of computing the net operating loss deduction for 1945 is $2,500. In computing the net income for 1945 which is deducted from the net operating loss for 1946 or 1947, as the case may be, for the purpose of determining the amount of such loss which may be carried back or carried over, the net operating loss deduction for 1945 is computed as follows:

For the purpose of determining the carry-over or carry-back— From	To	The net income for 1945 is computed with the following net operating loss deduction—
1946	1947	$12,500, that is, the aggregate of the $9,000 carry-over from 1943 and the $6,000 carry-over from 1944, less the $2,500 adjustment required by sec. 122 (c).
1946	1948	$15,000, that is, the aggregate of the $9,000 carry-over from 1943 and the $6,000 carry-over from 1944. The adjustment required by sec. 122 (c) is disregarded since the taxable year, 1948, to which the net operating loss is to be carried begins after Dec. 31, 1947.
1947	1948 or 1949	$30,500, that is, the $9,000 carry-over from 1943, the $6,000 carry-over from 1944, and the $18,000 carry-back from 1946, less the $2,500 adjustment required by sec. 122 (c).
1947	1948 or 1949	$33,000, that is, the aggregate of the $9,000 carry-over from 1943, the $6,000 carry-over from 1944, and the $18,000 carry-back from 1946. The adjustment required by sec. 122 (d) is disregarded.

[Regs. 111, 130]

INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1941; EXCESS PROFITS TAX; TAXABLE YEARS ENDING AFTER JUNE 30, 1950

NOTICE OF PROPOSED RULE MAKING

Notice is hereby given, pursuant to the Administrative Procedure Act, approved June 11, 1946, that the regulations set forth below in tentative form are proposed to be prescribed by the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury. Prior to the final adoption of such regulations, consideration will be given to any data, views, or arguments pertaining thereto which are submitted in writing in duplicate to the Commissioner of Internal Revenue, Washington 25, D. C., within the period of 30 days from the date of publication of this notice in the FEDERAL REGISTER. The proposed regulations are to be issued under the authority contained in sections 62 and 3791 of the Internal Revenue Code (53 Stat. 32, 467; 26 U. S. C. 62, 3791).

[SEAL] JOHN B. DUNLAP,
Commissioner of Internal Revenue.

In order to conform Regulations 111 (26 CFR Part 29) to section 131 of the Revenue Act of 1950, approved September 23, 1950, section 203 of the Excess Profits Tax Act of 1950, approved January 3, 1951, and section 131 (a) and (c) of the Revenue Act of 1951, approved October 20, 1951, and in order to conform Regulations 130 (26 CFR Part 40) to section 131 (b) of the Revenue Act of 1951, such regulations are amended as follows:

PARAGRAPH 1. Section 29.47–1, as amended by Treasury Decision 5517, approved June 12, 1946, is further amended by adding at the end of the section the following undesignated paragraph:

Any reference in the regulations in this part to a taxable year which is the calendar year (see, for example, the regulations under sections 11–15, inclusive, and 108) means a taxable year of 12 months beginning on January 1 and ending on December 31. The term does not include a taxable year of less than 12 months, even though the taxpayer may have customarily made his returns on the basis of a calendar year.

PAR. 2. There is inserted immediately preceding § 29.108–1 the following:

SEC. 131. FISCAL YEAR TAXPAYERS (REVENUE ACT OF 1950, APPROVED SEPTEMBER 23, 1950).

(a) *Amendment of section 108.* Section 108 is hereby amended by striking out subsection (e) and inserting in lieu thereof the following new subsections:

(e) *Certain taxable years of individuals beginning before October 1, 1950, and ending after September 30, 1950.* In the case of a taxable year (other than one beginning on January 1, 1950, and ending on December 31, 1950) of a taxpayer other than a corporation beginning before October 1, 1950, and ending after September 30, 1950, the tax imposed by sections 11, 12, and 400 shall be an amount equal to the sum of—

(1) That portion of a tentative tax, computed under the provisions of sections 11 (b), 12 (b) (2), 12 (c) (2), and 12 (d), or Table III of section 400, applicable to such taxable year, which the number of calendar months in such taxable year prior to October 1, 1950, bears to the total number of calendar months in such taxable year, plus

(2) That portion of a tentative tax, computed under the provisions of sections 11 (a), 12 (b) (1), 12 (d), and 12 (f), or Table I of section 400, as if such provisions were applicable to such taxable year, which the number of calendar months in such taxable year after September 30, 1950, bears to the total number of calendar months in such taxable year.

For the purposes of this subsection, a calendar month only part of which falls within the taxable year (A) shall be disregarded if less than 15 days of such month are included in such taxable year, and (B) shall be included as a calendar month within the taxable year if more than 14 days of such month fall within the taxable year.

(f) *Certain taxable years of corporations beginning before July 1, 1950, and ending after June 30, 1950.* In the case of a taxable year (other than one beginning on January 1, 1950, and ending on December 31, 1950) of a corporation beginning before July 1, 1950, and ending after June 30, 1950, the tax imposed by sections 13, 14, and 15 shall be an amount equal to the sum of—

(1) that portion of a tentative tax, computed under the provisions of sections 13 (b) (3), 14, and 15 (b) (3), applicable to such taxable year, which the number of days in such taxable year prior to July 1, 1950, bears to the total number of days in such taxable year, plus

(2) that portion of a tentative tax, computed under the provisions of sections 13 (b) (1) and 15 (b) (1), as if such provisions (and the provisions of sections 26 (b) (2) (A), 26 (h) (1) (B), and 26 (i) (1)) were applicable to such taxable year, which the number of days in such taxable year after June 30, 1950, bears to the total number of days in such taxable year.

(g) *Special classes of taxpayers.* This section shall not apply to an insurance company subject to Supplement G or an investment company subject to Supplement Q.

(b) *Effective date.* The amendment made by subsection (a) in striking out subsection (e) of section 108 of the Internal Revenue Code shall not apply in the case of any taxable year described in subsections (a), (b), or (c) of such section.

SEC. 203. FISCAL YEAR TAXPAYERS (EXCESS PROFITS TAX ACT OF 1950, APPROVED JANUARY 3, 1951).

Section 108 (f) (2) of the Internal Revenue Code (relating to computation of tax of a fiscal year beginning before July 1, 1950, and ending after June 30, 1950) is hereby amended by adding at the end thereof the following new sentence: "For the purposes of this paragraph, the provisions of sections 15 (b) (1), 26 (b) (1), and 26 (i) (1) shall be applied without regard to the amendments made to such provisions by Title II [secs. 201, 202, and 203] of the Excess Profits Tax Act of 1950."

SEC. 131. FISCAL YEAR TAXPAYERS (REVENUE ACT OF 1951, APPROVED OCTOBER 20, 1951).

(a) *Amendment of section 108.* Section 108 is hereby amended by striking out paragraph (2) of subsection (f) and inserting in lieu thereof the following:

(2) That portion of a tentative tax consisting of—

(A) A tentative normal tax of 25 per centum of the normal-tax net income, plus

(B) A tentative surtax of 20 per centum of the surtax net income in excess of $25,000, which the number of days in such taxable year after June 30, 1950, and before April 1, 1951, bears to the total number of days in such taxable year, plus (if the taxable year ends after March 31, 1951)

(3) That portion of a tentative tax consisting of—

(A) A tentative normal tax of 30 per centum of the normal-tax net income, plus

(B) A tentative surtax of 20 per centum of the surtax net income in excess of $25,000, which the number of days in such taxable year after March 31, 1951, bears to the total number of days in such taxable year.

In computing for the purposes of paragraph (2) the normal-tax net income and the corporation surtax net income, the credits provided in section 26 applicable to taxable years beginning on July 1, 1950, shall be allowed in the manner and to the extent provided in sections 13 and 15 applicable to years beginning on such date, except that such credits shall be applied without regard to the amendments made to section 26 by title II (inc. sec. 202) of the Excess Profits Tax Act of 1950. In computing for the purposes of paragraph (3) the normal-tax net income and the corporation surtax net income, the credits provided in section 26 applicable to taxable years beginning on April 1, 1951, shall be allowed in the manner and to the extent provided in sections 13 and 15 applicable to years beginning on such date.

(g) *Certain taxable years of corporations beginning after June 30, 1950, and before April 1, 1951.* In the case of a taxable year (other than one beginning on January 1, 1951, and ending on December 31, 1951) of a corporation beginning after June 30, 1950, and before April 1, 1951, and ending after March 31, 1951, the tax imposed by sections 13 and 15 shall be an amount equal to the sum of—

(1) That portion of a tentative tax, computed under the provisions of sections 13 and 15 applicable to such taxable year, which the number of days in such taxable year prior to April 1, 1951, bears to the total number of days in such taxable year, plus

(2) That portion of a tentative tax, computed under the provisions of sections 13 and 15 applicable to years beginning on April 1, 1951, as if such provisions were applicable to such taxable year, which the number of days in such taxable year after March 31, 1951, bears to the total number of days in such taxable year.

(h) *Certain taxable years of individuals beginning before November 1, 1951, and ending after October 31, 1951.* In the case of a taxable year (other than one beginning on January 1, 1951, and ending on December 31, 1951) of a taxpayer, other than a corporation, beginning before November 1, 1951, and ending after October 31, 1951, the tax imposed by sections 11 and 12, section 400, or section 421 (a) (2), shall be an amount equal to the sum of—

(1) That portion of tentative tax, computed under the provisions of sections 11 and 12, section 400, or section 421 (a) (2), applicable to such year, which the number of calendar months in such taxable year prior to November 1, 1951, bears to the total number of calendar months in such taxable year, plus

(2) That portion of a tentative tax, computed under the provisions of sections 11 and 12, section 400, or section 421 (a) (2), applicable to years beginning on November 1, 1951, as if such provisions (other than the provisions relating to head of household) were applicable to such taxable year, which the number of calendar months in such taxable year after October 31, 1951, bears to the total number of calendar months in such taxable year.

This subsection shall not apply in the case of a trust described in section 421 (b) (2) if the taxable year of such trust began before January 1, 1951.

(i) *Definition of calendar month.* For the purposes of this section, a calendar month only part of which falls within a taxable year (1) shall be disregarded if less than 15 days of such month are included in such taxable year, and (2) shall be included as a calendar month within the taxable year if more than 14 days of such month fall within the taxable year.

(j) *Taxable years of individuals beginning in 1953 and ending in 1954.* In the case of a taxable year of a taxpayer, other than a corporation, beginning before January 1, 1954, and ending after December 31, 1953, the tax imposed by sections 11 and 12, section 400, or section 421 (a) (2), shall be an amount equal to the sum of—

(1) That portion of a tentative tax, computed under the provisions of sections 11 and 12, section 400, or section 421 (a) (2), applicable to years beginning on January 1, 1953, which the number of calendar months in such taxable year prior to January 1, 1954, bears to the total number of calendar months in such taxable year, plus

(2) That portion of a tentative tax, computed under the provisions of sections 11 and 12, section 400, or section 421 (a) (2), applicable to years beginning on January 1, 1954, as if such provisions were applicable to such taxable year, which the number of calendar months in such taxable year after December 31, 1953, bears to the total number of calendar months in such taxable year.

(k) *Taxable years of corporations beginning before April 1, 1954, and ending after March 31, 1954.* In the case of a taxable year of a corporation beginning before April 1, 1954, and ending after March 31, 1954, the tax imposed by sections 13 and 15, or section 421 (a) (1), shall be an amount equal to the sum of—

(1) That portion of a tentative tax, computed under the provisions of sections 13 and 15, or section 421 (a) (1), applicable to years beginning on January 1, 1953, which the number of days in such taxable year prior to April 1, 1954, bears to the total number of days in such taxable year, plus

(2) That portion of a tentative tax, computed under the provisions of sections 13 and 15, or section 421 (a) (1), applicable to years beginning on April 1, 1954, as if such provisions were applicable to such taxable year, which the number of days in such taxable year after March 31, 1954, bears to the total number of days in such taxable year.

* * * * * *

(c) *Technical amendments.* (1) Section 108 (e) (2) is hereby amended by inserting after "section 400," the following: "applicable to years beginning on October 1, 1950,".

(2) Section 108 (g) is hereby amended by striking out "(g)" and inserting in lieu thereof "(1)".

PAR. 3. There are inserted immediately after § 29.108–3, as added by Treasury Decision 5687, approved February 16, 1949, the following new sections:

§ 29.108–4 *Computation of tax of individuals for taxable years beginning before October 1, 1950, and ending after September 30, 1950 (other than the calendar year 1950)*—(a) *General rule.* For a taxable year beginning before October 1, 1950, and ending after September 30, 1950 (other than the calendar year 1950), the normal tax, surtax, and optional tax imposed by sections 11, 12, and 400 upon taxpayers other than corporations shall be computed under section 108 (e), as amended by the Revenue Acts of 1950 and 1951. The tax shall be an amount equal to the sum of:

(1) That portion of a tentative tax under section 108 (e) (1), computed under the provisions of sections 11 (b), 12 (b) (2), 12 (c) (2), and 12 (d), or Table III of section 400, applicable to

taxable years beginning on September 1, 1950, which the number of calendar months prior to October 1, 1950, in the taxable year of the taxpayer bears to the total number of calendar months in such taxable year, and

(2) That portion of a tentative tax under section 108 (e) (2), computed under the provisions of sections 11 (a), 12 (b) (1), 12 (d), and 12 (f), or Table I of section 400, applicable to taxable years beginning on October 1, 1950, which the number of calendar months after September 30, 1950, in the taxable year of the taxpayer bears to the total number of calendar months in such taxable year.

For the purpose of section 108 (e) and this section, a calendar month only part of which falls within the taxable year (i) shall be disregarded if less than 15 days of such month are included in such taxable year, and (ii) shall be included as a calendar month within the taxable year if more than 14 days of such month fall within the taxable year.

(b) *Estates, trusts, and nonresident alien individuals.* The provisions of section 108 (e) apply to estates, trusts, and nonresident alien individuals subject to tax under sections 11 and 12.

(c) *Short taxable years.* The provisions of section 108 (e) apply to a taxable year beginning before October 1, 1950, and ending after September 30, 1950 (other than the calendar year 1950), whether or not such taxable year is one of less than 12 months. In the case of a taxpayer who is subject to the provisions of section 108 (e) and who because of a change in accounting period has a taxable year of less than 12 months, the net income shall be placed on an annual basis under the provisions of section 47 (c) (1) for the purpose of both tentative tax computations under section 108 (e), or shall be computed under the exception in section 47 (c) (2) for the purpose of both such tentative tax computations. Regardless of the method adopted, the amounts of the tentative normal tax and surtax so computed upon the basis of 12 months' income shall be properly reduced under section 47 (c) in order to determine the tentative taxes under section 108 (e). However, in the case of a taxpayer who is subject to the provisions of section 108 (e) and who because of any reason other than a change in accounting period has a taxable year of less than 12 months, the net income shall not be placed on an annual basis under section 47 (c) (1) and shall not be computed under the exception in section 47 (c) (2).

(d) *Alternative tax under section 117 (c).* In any case in which a taxpayer subject to the provisions of section 108 (e) has an excess of net long-term capital gains over net short-term capital losses, the alternative tax under section 117 (c) shall be an amount equal to the sum of the proper portions of the tentative taxes determined under section 108 (e), by computing each such tentative tax pursuant to the alternative tax computation provided in section 117 (c), regardless of whether either tentative tax so computed on the alternative basis is larger or smaller than the tentative tax computed without regard to section 117 (c),

(e) *Certain joint returns.* If a joint return of a husband and wife is filed under the provisions of section 51 (b) (3), if the husband and wife have different taxable years solely because of the death of either spouse, and if the taxable year of the surviving spouse covered by such joint return is a period which began before October 1, 1950, and ended after September 30, 1950 (other than the calendar year 1950), the number of calendar months to be taken into account for the purpose of computing the portions of the tentative tax under section 108 (e) (1) and (2) shall be the number of calendar months prior to October 1, 1950, in the taxable year of the surviving spouse, the number of calendar months after September 30, 1950, in the taxable year of the surviving spouse, and the total number of calendar months in the taxable year of the surviving spouse.

(f) *Credits against tax.* In the case of a taxpayer subject to the provisions of section 108 (e), any credit against the tax otherwise imposed by sections 11, 12, and 400, such as the credit for taxes paid to a foreign country or possession of the United States under section 131, shall be deducted from, and any limitation in such credit shall be based upon, the tax computed under section 108 (e). However, in those instances in which an individual taxpayer computes a tentative tax under section 108 (e) by taking into account the optional standard deduction under section 23 (aa), the following credits shall not be allowed: All credits under section 131 with respect to taxes of foreign countries and possessions, and all credits with respect to taxes withheld at the source under section 143 (a), relating to interest on tax-free covenant bonds.

§ 29.108–5 *Computation of tax of corporations for taxable years beginning before July 1, 1950, and ending after June 30, 1950 (other than the calendar year 1950)*—(a) *In general.* For a taxable year beginning before July 1, 1950, and ending after June 30, 1950 (other than the calendar year 1950), the normal tax and surtax imposed by sections 13, 14, and 15 upon corporations shall be computed under section 108 (f), as added by the Revenue Act of 1950 and as amended by the Excess Profits Tax Act of 1950 and the Revenue Act of 1951.

(b) *Taxable years beginning before July 1, 1950, and ending after June 30, 1950, and before April 1, 1951.* For a taxable year beginning before July 1, 1950, and ending after June 30, 1950, and before April 1, 1951 (other than the calendar year 1950), the normal tax and surtax of a corporation shall be an amount equal to the sum of:

(1) That portion of a tentative tax under section 108 (f) (1), computed under the provisions of sections 13 (b) (3), 14, and 15 (b) (3), applicable to such taxable year, which the number of days in such taxable year prior to July 1, 1950, bears to the total number of days in such taxable year, plus

(2) That portion of a tentative tax under section 108 (f) (2) consisting of:

(i) A tentative normal tax of 25 percent of the normal-tax net income, plus

(ii) A tentative surtax of 20 percent of the surtax net income in excess of $25,000,

which the number of days after June 30, 1950, in the taxable year of the taxpayer bears to the total number of days in such taxable year.

(c) *Taxable years beginning before July 1, 1950, and ending after March 31, 1951.* For a taxable year beginning before July 1, 1950, and ending after March 31, 1951, the normal tax and surtax of a corporation shall be an amount equal to the sum of:

(1) That portion of a tentative tax under section 108 (f) (1), computed under the provisions of sections 13 (b) (3), 14, and 15 (b) (3), applicable to taxable years beginning on June 1, 1950 (for applicable rates, see (d) of this section), which the number of days prior to July 1, 1950, in the taxable year of the taxpayer bears to the total number of days in such taxable year, and

(2) That portion of a tentative tax under section 108 (f) (2) consisting of:

(i) A tentative normal tax of 25 percent of the normal-tax net income, plus

(ii) A tentative surtax of 20 percent of the surtax net income in excess of $25,000,

which the number of days after June 30, 1950, and before April 1, 1951, in the taxable year of the taxpayer bears to the total number of days in such taxable year, and

(3) That portion of a tentative tax under section 108 (f) (3) consisting of:

(i) A tentative normal tax of 30 percent of the normal-tax net income, plus

(ii) A tentative surtax of 20 percent of the surtax net income in excess of $25,000,

which the number of days after March 31, 1951, in the taxable year of the taxpayer bears to the total number of days in such taxable year.

(d) *Rates applicable under section 108 (f) (1)*—(1) *Normal tax.* The tentative normal tax under section 108 (f) (1) of a corporation, other than a foreign corporation, is computed upon its normal-tax net income at the rates prescribed by section 13 or 14, which are as follows:

(i) If the normal-tax net income is not in excess of $5,000, 15 percent of the amount thereof;

(ii) If the normal-tax net income is in excess of $5,000 but not in excess of $20,000, $750 plus 17 percent of the amount of such income in excess of $5,000;

(iii) If the normal-tax net income is in excess of $20,000 but not in excess of $25,000, $3,300 plus 19 percent of such income in excess of $20,000;

(iv) If the normal-tax net income is in excess of $25,000 but not in excess of $50,000, $4,250 plus 31 percent of such income in excess of $25,000; or

(v) If the normal-tax net income is in excess of $50,000, 24 percent of the entire amount thereof.

The tentative normal tax under section 108 (f) (1) of a foreign corporation en-

gaged in trade or business within the United States is computed upon its normal-tax net income at the rate of 24 percent as prescribed by section 14.

(2) *Surtax.* The tentative surtax under section 108 (f) (1) of a corporation, other than a foreign corporation not engaged in trade or business within the United States, is computed upon its corporation surtax net income at the rates prescribed by section 15, which are as follows:

(i) If the corporation surtax net income is not in excess of $25,000, 6 percent of the amount thereof;

(ii) If the corporation surtax net income is in excess of $25,000 but not in excess of $50,000, $1,500 plus 22 percent of the amount of such income in excess of $25,000; or

(iii) If the corporation surtax net income is in excess of $50,000, 14 percent of the entire amount thereof.

(e) *Computation of normal-tax net income and corporation surtax net income in special cases*—(1) *In general.* In computing the tentative taxes under section 108 (f) (1), (2), and (3), the amount of the net income and the amount of the adjusted net income of the corporation are not recomputed and remain unchanged. However, the credits provided in section 26 (b), (h), and (i) may differ in computing the several tentative taxes. Thus, in the case of a Western Hemisphere trade corporation, or a public utility corporation which has paid dividends on its preferred stock with respect to which the credit for dividends paid provided in section 26 (h) is allowable, or any corporation which has received dividends on the preferred stock of a domestic public utility corporation with respect to which the credit provided in section 26 (h) is allowable to the distributing corporation, the amount of the normal-tax net income and the amount of the corporation surtax net income for one tentative tax computation differ from such amounts for any other tentative tax computation. Moreover, in the case of any corporation which has a taxable year ending after March 31, 1951, and which has received dividends on the stock of a foreign corporation with respect to which the credit provided in section 26 (b) (3) is allowable, the amount of the normal-tax net income and the amount of the corporation surtax net income for the third tentative tax computation differ from such amounts for the first and second tentative tax computations. See subparagraphs (2), (3), (4), and (5) of this paragraph.

(2) *Western Hemisphere trade corporations.* In the case of a Western Hemisphere trade corporation, its tentative tax under section 108 (f) (1) is computed only on its normal-tax net income, since a Western Hemisphere trade corporation is not subject to surtax under the law applicable (without regard to section 108) to a taxable year beginning on June 1, 1950, and the credit provided in section 26 (i) is not applicable in determining its normal-tax net income for the purpose of the computation of the first tentative tax. The normal-tax net income and corporation surtax net income of a Western Hemisphere trade corporation are determined, for the purpose of the tentative tax computation under section 108 (f) (2), with the allowance of the 31-percent credit provided in section 26 (i) applicable to a taxable year beginning on July 1, 1950, without regard to the amendment of section 26 (i) made by the Excess Profits Tax Act of 1950, and, for the purpose of the tentative tax computation under section 108 (f) (3), with the allowance of the 27-percent credit provided in section 26 (i) applicable to a taxable year beginning on April 1, 1951.

(3) *Public utilities paying dividends on preferred stock.* In the case of a public utility corporation which has paid dividends on its preferred stock with respect to which the credit for dividends paid provided in section 26 (h) is allowable, its normal-tax net income is determined, for the purpose of the tentative tax computation under section 108 (f) (1), without regard to the credit provided in section 26 (h), and its corporation surtax net income is determined, for such purpose, with the allowance of the credit provided in section 26 (h) applicable to a taxable year beginning on June 1, 1950. The normal-tax net income and corporation surtax net income of such a public utility corporation are determined, for the purpose of the tentative tax computation under section 108 (f) (2), with the allowance of the 31-percent credit provided in section 26 (h) applicable to a taxable year beginning on July 1, 1950, without regard to the amendment of section 26 (h) made by the Excess Profits Tax Act of 1950, and, for the purpose of the tentative tax computation under section 108 (f) (3), with the allowance of the 27-percent credit provided in section 26 (h) applicable to a taxable year beginning on April 1, 1951.

(4) *Corporations receiving dividends on preferred stock of public utility.* In the case of any corporation which has received dividends on the preferred stock of a domestic public utility corporation with respect to which the credit provided in section 26 (h) is allowable to the distributing corporation, its normal-tax net income is determined, for the purpose of the tentative tax computation under section 108 (f) (1), with the allowance of the 85-percent credit provided in section 26 (b) with respect to such dividends received, and its corporation surtax net income is determined, for such purpose, without regard to any credit provided in section 26 (b) with respect to such dividends received. The normal-tax net income and corporation surtax net income of such a corporation are determined for the purpose of the tentative tax computation under section 108 (f) (2), with the allowance of the the 59-percent credit provided in section 26 (b) (2) with respect to such dividends received, and, for the purpose of the tentative tax computation under section 108 (f) (3), with the allowance of the 62-percent credit provided in section 26 (b) (2) with respect to such dividends received.

(5) *Corporations receiving dividends from foreign corporation.* In the case of any corporation which has a taxable year ending after March 31, 1951, and which has received dividends on the stock of a foreign corporation with respect to which the credit provided in section 26 (b) (3) is allowable, its normal-tax net income and corporation surtax net income are determined, for the purpose of the tentative tax computations under section 108 (f) (1) and (2), without regard to the credit provided in section 26 (b) (3), and, for the purpose of the tentative tax computation under section 108 (f) (3), with the allowance of the credit provided in section 26 (b) (3).

(f) *Classes of corporations excluded from operation of section 108 (f).* The provisions of section 108 (f) do not apply to an insurance company subject to Supplement G, a regulated investment company subject to Supplement Q, or a foreign corporation not engaged in trade or business within the United States.

(g) *Short taxable years.* The provisions of section 108 (f) apply to a taxable year beginning before July 1, 1950, and ending after June 30, 1950 (other than the calendar year 1950), whether or not such taxable year is one of less than 12 months. In the case of a taxpayer which is subject to the provisions of section 108 (f) and which because of a change in accounting period has a taxable year of less than 12 months, the net income shall be placed on an annual basis under the provisions of section 47 (c) (1) for the purpose of both tentative tax computations under section 108 (f), or shall be computed under the exception in section 47 (c) (2) for the purpose of both such tentative tax computations. Regardless of the method adopted, the amounts of the tentative normal tax and surtax so computed upon the basis of 12 months' income shall be properly reduced under section 47 (c) in order to determine the tentative taxes under section 108 (f). However, in the case of a taxpayer which is subject to the provisions of section 108 (f) and which because of any reason other than a change in accounting period has a taxable year of less than 12 months, the net income for the purpose of section 108 (f) shall not be placed on an annual basis under section 47 (c) (1) and shall not be computed under the exception in section 47 (c) (2).

(h) *Alternative tax under section 117 (c).* In any case in which a taxpayer subject to the provisions of section 108 (f) has an excess of net long-term capital gains over net short-term capital losses, the alternative tax under section 117 (c) shall be an amount equal to the sum of the proper portions of the tentative taxes determined under section 108 (f), by computing each such tentative tax pursuant to the alternative tax computation provided in section 117 (c), regardless of whether either tentative tax so computed on the alternative basis is larger or smaller than the tentative tax computed without regard to section 117 (c).

(i) *Credits against tax.* In the case of a taxpayer subject to the provisions of section 108 (f), any credit against the tax otherwise imposed by sections 13, 14, and 15, such as the credit for taxes paid to a foreign country or possession of the United States under section 131, shall be deducted from, and any limitation in such credit shall be based upon, the tax computed under section 108 (f).

(j) *Examples.* This section may be illustrated by the following examples:

Example (1). The A Corporation, a domestic corporation (which is neither a public utility referred to in section 26 (h) nor a Western Hemisphere trade corporation referred to in section 26 (i)), makes its income tax returns on the basis of a fiscal year ending May 31. For the fiscal year which began June 1, 1950, and ended May 31, 1951, the A Corporation had net income of $100,000, which did not include any interest on United States obligations or dividends on stock of foreign corporations. The net income includes cash dividends received from a domestic corporation other than a public utility (allowable as a credit under section 26 (b) (1)) in the amount of $10,000, and cash dividends received from a domestic public utility corporation on its preferred stock (with respect to which a credit is allowable to the public utility under section 26 (h)) in the amount of $5,000. The normal tax and surtax of the A Corporation for its fiscal year ended May 31, 1951, are $22,771.50 and $12,713.21, respectively, computed as follows:

(i) *Computation of tentative taxes provided in section 108 (f) (1).*

NORMAL TAX

1. Net income		$100,000.00
2. Less credit under sec. 26 (b) (1) for dividends received from domestic corporations (85 percent of $15,000)		12,750.00
3. Normal-tax net income		87,250.00
4. Normal tax (24 percent of item 3)		20,940.00

SURTAX

5. Net income		100,000.00
6. Less credit under sec. 26 (b) (1) for dividends received from domestic corporation other than dividends with respect to which credit is allowable under sec. 26 (h) (85 percent of $10,000)		8,500.00
7. Corporation surtax net income		91,500.00
8. Surtax (14 percent of item 7)		12,810.00

(ii) *Computation of tentative taxes provided in section 108 (f) (2).*

NORMAL TAX AND SURTAX

9. Net income		$100,000.00
10. Less credit under sec. 26 (b) (1) for dividends received from domestic corporation other than dividends with respect to which credit is allowable under sec. 26 (h) (85 percent of $10,000)	$8,500.00	
11. Less credit under sec. 26 (b) (2) for dividends received with respect to which credit is allowable under sec. 26 (h) (59 percent of $5,000)	2,950.00	
		11,450.00
12. Normal-tax net income and corporation surtax net income		88,550.00
13. Normal tax (25 percent of item 12)		22,137.50
14. Surtax (20 percent of $63,550, the excess of $88,550 over $25,000)		12,710.00

(iii) *Computation of tentative taxes provided in section 108 (f) (3).*

NORMAL TAX AND SURTAX

15. Net income		$100,000.00
16. Less credit under sec. 26 (b) (1) (85 percent of $10,000)	$8,500.00	
17. Less credit under sec. 26 (b) (2) (62 percent of $5,000)	3,100.00	
		11,600.00
18. Normal-tax net income and corporation surtax net income		88,400.00
19. Normal tax (30 percent of item 18)		26,520.00
20. Surtax (20 percent of $63,400, the excess of $88,400 over $25,000)		12,680.00

(iv) *Computation of normal tax and surtax for fiscal year ended May 31, 1951.*

21. Number of days in taxable year prior to July 1, 1950	30
22. Number of days in taxable year after June 30, 1950, and before Apr. 1, 1951	274
23. Number of days in taxable year after Mar. 31, 1951	61
24. Total number of days in taxable year	365

NORMAL TAX

25. Tentative normal tax computed in (i)	$20,940.00	
26. 30/365ths of $20,940		$1,721.10
27. Tentative normal tax computed in (ii)	$22,137.50	
28. 274/365ths of $22,137.50		16,618.29
29. Tentative normal tax computed in (iii)	$26,520.00	
30. 61/365ths of $26,520		4,432.11
31. Total normal tax		22,771.50

SURTAX

32. Tentative surtax computed in (i)	$12,810.00	
33. 30/365ths of $12,810		$1,052.88
34. Tentative surtax computed in (ii)	$12,710.00	
35. 274/365ths of $12,710		9,541.21
36. Tentative surtax computed in (iii)	$12,680.00	
37. 61/365ths of $12,680		2,119.12
38. Total surtax		12,713.21

Example (2). The facts are the same as in example (1), above, except that the taxable year is the fiscal year which began April 1, 1950, and ended March 31, 1951. The normal tax and surtax of the A Corporation for such fiscal year are computed only under paragraphs (1) and (2) of section 108 (f), since paragraph (3) of such section is not applicable to a taxable year which ended before April 1, 1951. Its normal tax and surtax for the fiscal year ended March 31, 1951, are $21,838.95 and $12,734.94, respectively. The tentative normal tax and tentative surtax under section 108 (f) (1) and (2) are computed as set forth in (i) and (ii) of example (1). The normal tax and surtax of the A Corporation are further computed as follows:

1. Number of days in taxable year prior to July 1, 1950	91
2. Number of days in taxable year after June 30, 1950	274
3. Total number of days in taxable year	365

NORMAL TAX

4. Tentative normal tax as computed in (i) of example (1)	$20,940.00	
5. 91/365ths of $20,940		$5,220.66
6. Tentative normal tax as computed in (ii) of example (1)	$22,137.50	
7. 274/365ths of $22,137.50		16,618.29
8. Total normal tax		21,838.95

SURTAX

9. Tentative surtax as computed in (i) of example (1)	$12,810.00	
10. 91/365ths of $12,810		$3,193.73
11. Tentative surtax as computed in (ii) of example (1)	$12,710.00	
12. 274/365ths of $12,710		9,541.21
13. Total surtax		12,734.94

§ 29.108–6 *Computation of tax of corporations for taxable years beginning after June 30, 1950, and before April 1, 1951, and ending after March 31, 1951 (other than the calendar year 1951)*—(a) *General rule.* For a taxable year beginning after June 30, 1950, and before April 1, 1951, and ending after March 31, 1951 (other than the calendar year 1951), the normal tax and surtax imposed by sections 13 and 15 upon corporations shall be computed under section 108 (g), as added by the Revenue Act of 1950 and as amended by the Revenue Act of 1951. The tax shall be an amount equal to the sum of:

(1) That portion of a tentative tax under section 108 (g) (1), computed under the provisions of sections 13 (b) (1) and 15 (b) (1), applicable to taxable years beginning on July 1, 1950, which the number of days prior to April 1, 1951, in the taxable year of the taxpayer bears to the total number of days in such taxable year, and

(2) That portion of a tentative tax under section 108 (g) (2), computed under the provisions of section 13 (b) (2) and 15 (b), applicable to taxable years beginning on April 1, 1951, which the number of days after March 31, 1951, in the taxable year of the taxpayer bears to the total number of days in such taxable year.

The tentative normal taxes under section 108 (g) (1) and (2) of a corporation are computed upon its normal-tax net income at the rates of 25 percent and 30 percent, respectively. The tentative surtaxes under section 108 (g) (1) and (2) of a corporation are computed upon its corporation surtax net income in excess of $25,000 at the rate of 22 percent.

(b) *Computation of normal-tax net income and corporation surtax net income in special cases*—(1) *In general.* In computing the tentative taxes under section 108 (g) (1) and (2), the amount of the net income and the amount of the adjusted net income of the corporation are not recomputed and remain unchanged. However, the credits provided in section 26 (b), (h), and (i) may differ in computing the several tentative taxes. Thus, in the case of a Western Hemisphere trade corporation, or a public utility corporation which has paid dividends on its preferred stock with respect to which the credit for dividends paid provided in section 26 (h) is allowable, or any corporation which has received dividends on the preferred stock of a domestic public utility corporation with respect to which the credit provided in section 26 (h) is allowable to the distributing corporation, or any corporation which has received dividends on the stock of a foreign corporation with respect to which the credit provided in section 26 (b) (3) is allowable, the amount of the normal-tax net income and the amount of the corporation surtax net income for the first tentative tax computation differ from such amounts for the second tentative tax computation. See subparagraphs (2), (3), (4), and (5) of this paragraph.

(2) *Western Hemisphere trade corporations.* In the case of a Western Hemisphere trade corporation, its normal-tax net income and corporation surtax net income are determined, for the purpose of the tentative tax computation under section 108 (g) (1), with the allowance of the 30-percent credit provided in section 26 (i) applicable to a taxable year beginning on July 1, 1950, and, for the purpose of the tentative tax computation under section 108 (g) (2), with the allowance of the 27-percent credit provided in section 26 (i) applicable to a taxable year beginning on April 1, 1951.

(3) *Public utilities paying dividends on preferred stock.* In the case of a public utility corporation which has paid dividends on its preferred stock with respect to which the credit for dividends paid provided in section 26 (h) is allowable, its normal-tax net income and corporation surtax net income are determined, for the purpose of the tentative tax computation under section 108 (g) (1), with the allowance of the 85-percent credit provided in section 26 (b) with respect to such dividends received, and its corporation surtax net income is determined, for such purpose, without regard to any credit provided in section 26 (b) with respect to such dividends received. The normal-tax net income and corporation surtax net income of such a corporation are determined for the purpose of the tentative tax computation under section 108 (g) (2), with the allowance of the 59-percent credit provided in section 26 (b) (2) with respect to such dividends received, and, for the purpose of the tentative tax computation under section 108 (g) (3), with the allowance of the 62-percent credit provided in section 26 (b) (2) with respect to such dividends received.

(g) (2), with the allowance of the 27-percent credit provided in section 26 (h) applicable to a taxable year beginning on April 1, 1951.

(4) *Corporations receiving dividends on preferred stock of public utility.* In the case of any corporation which has received dividends on the preferred stock of a domestic public utility corporation with respect to which the credit provided in section 26 (h) is allowable to the distributing corporation, its normal-tax net income and corporation surtax net income are determined, for the purpose of the tentative tax computation under section 108 (g) (1), with the allowance of the 59-percent credit provided in section 26 (b) (2) with respect to such dividends received, and, for the purpose of the tentative tax computation under section 108 (g) (2), with the allowance of the 62-percent credit provided in section 26 (b) (2) with respect to such dividends received.

(5) *Corporations receiving dividends from foreign corporation.* In the case of any corporation which has received dividends on the stock of a foreign corporation with respect to which the credit provided in section 26 (b) (3) is allowable, its normal-tax net income and corporation surtax net income are determined, for the purpose of the tentative tax computation under secton 108 (g) (1), without regard to the credit provided in section 26 (b) (3), and, for the purpose of the tentative tax computation under section 108 (g) (2), with the allowance of the credit provided in section 26 (b) (3).

(c) *Classes of corporations excluded from operation of section 108 (g).* The provisions of section 108 (g) do not apply to an insurance company subject to Supplement G, a regulated investment company subject to Supplement Q, or a foreign corporation not engaged in trade or business within the United States.

(d) *Short taxable years.* The provisions of section 108 (g) apply to a taxable year beginning after June 30, 1950, and before April 1, 1951, and ending after March 31, 1951 (other than the calendar year 1951), whether or not such taxable year is one of less than 12 months. In the case of a taxpayer which is subject to the provisions of section 108 (g) and which because of a change in accounting period has a taxable year of less than 12 months, the net income shall be placed on an annual basis under the provisions of section 47 (c) (1) for the purpose of both tentative tax computations under section 108 (g), or shall be computed under the exception in section 47 (c) (2) for the purpose of both such tentative tax computations. Regardless of the method adopted, the amounts of the tentative normal tax and surtax so computed upon the basis of 12 months' income shall be properly reduced under section 47 (c) in order to determine the tentative taxes under section 108 (g). However, in the case of a taxpayer which is subject to the provisions of section 108 (g) and which because of any reason other than a change in accounting period has a taxable year of less than 12 months, the net income for the purpose of section 108 (g) shall not be placed on an annual basis under section 47 (c) (1) and shall not be computed under the exception in section 47 (c) (2).

(e) *Alternative tax under section 117 (c).* In any case in which a taxpayer subject to the provisions of section 108 (g) has an excess of net long-term capital gains over net short-term capital losses, the alternative tax under section 117 (c) shall be an amount equal to the sum of the proper portions of the tentative taxes determined under section 108 (g), by computing each such tentative tax pursuant to the alternative tax computation provided in section 117 (c), regardless of whether either tentative tax so computed on the alternative basis is larger or smaller than the tentative tax computed without regard to section 117 (c).

(f) *Credits against tax.* In the case of a taxpayer subject to the provisions of section 108 (g), any credit against the tax otherwise imposed by sections 13 and 15, such as the credit for taxes paid to a foreign country or possession of the United States under section 131, shall be deducted from, and any limitation in such credit shall be based upon, the tax computed under section 108 (g).

(g) *Example.* This section may be illustrated by the following example:

Example. The A Corporation, a domestic corporation (which is neither a public utility referred to in section 26 (h) nor a Western Hemisphere trade corporation referred to in section 26 (i)), makes its income tax returns on the basis of a fiscal year ending June 30. For the fiscal year which began July 1, 1950, and ended June 30, 1951, the A Corporation had net income of $100,000, which did not include any interest on United States obligations or dividends on stock of foreign corporations. The net income includes cash dividends received from a domestic corporation other than a public utility (allowable as a credit under section 26 (b) (1)) in the amount of $10,000, and cash dividends received from a domestic public utility corporation on its preferred stock (with respect to which a credit is alowable to the public utility under section 26 (h)) in the amount of $5,000. The normal tax and surtax of the A Corporation for its fiscal year ended June 30, 1951, are $23,230.13 and $13,972.78, respectively, computed as follows:

(i) *Computation of tentative taxes provided in section 108 (g) (1).*

NORMAL TAX AND SURTAX

1. Net income		$100,000.00
2. Less credit under sec. 26 (b) (1) for dividends received from domestic corporation other than dividends with respect to which credit is allowable under sec. 26 (h) (85 percent of $10,000)	$8,500.00	
3. Less credit under section 26 (b) (2) for dividends received with respect to which credit is allowable under sec. 26 (h) (59 percent of $5,000)	2,950.00	11,450.00
4. Normal-tax net income and corporation surtax net income		88,550.00
5. Normal tax (25 percent of item 4)		22,137.50
6. Surtax (22 percent of $63,550, the excess of $88,550 over $25,000)		13,981.00

(ii) *Computation of tentative taxes provided in section 108 (g) (2).*

NORMAL TAX AND SURTAX

7. Net income		$100,000.00
8. Less credit under sec. 26 (b) (1) (85 percent of $10,000)	$8,500.00	
9. Less credit under sec. 26 (b) (2) (62 percent of $5,000)	3,100.00	11,600.00

NORMAL TAX AND SURTAX—Continued

10. Normal-tax net income and and corporation surtax net income		$88,400.00
11. Normal tax (30 percent of item 10)		26,520.00
12. Surtax (22 percent of $63,400, the excess of $88,400 over $25,000)		13,948.00

(iii) *Computation of normal tax and surtax for fiscal year ended June 30, 1951.*

13. Number of days in taxable year prior to Apr. 1, 1951		274
14. Number of days in taxable year after Mar. 31, 1951		91
15. Total number of days in taxable year		365

NORMAL TAX

16. Tentative normal tax computed in (i)	$22,137.50	
17. 274/365ths of $22,137.50		$16,618.29
18. Tentative normal tax computed in (ii)	$26,520.00	
19. 91/365ths of $26,520		6,611.84
20. Total normal tax		23,230.13

SURTAX

21. Tentative surtax computed in (i)	$13,981.00	
22. 274/365ths of $13,981		$10,495.33
23. Tentative surtax computed in (ii)	$13,948.00	
24. 91/365ths of $13,948		3,477.45
25. Total surtax		13,972.78

§ 29.108–7 *Computation of tax of individuals for taxable years beginning before November 1, 1951, and ending after October 31, 1951 (other than the calendar year 1951).*—(a) *General rule.* For a taxable year beginning before November 1, 1951, and ending after October 31, 1951 (other than the calendar year 1951), the normal tax, surtax, optional tax, and Supplement U normal tax and surtax imposed by sections 11, 12, 400, and 421 (a) (2) upon taxpayers other than corporations shall be computed under section 108 (h), as added by the Revenue Act of 1951. The tax shall be an amount equal to the sum of:

(1) That portion of a tentative tax under section 108 (h) (1), computed under the provisions of sections 11 and 12, section 400, or section 421 (a) (2), applicable to taxable years beginning on October 1, 1951, which the number of calendar months prior to November 1, 1951, in the taxable year of the taxpayer bears to the total number of calendar months in such taxable year, and

(2) That portion of a tentative tax under section 108 (h) (2), computed under the provisions of sections 11 and 12, section 400, or section 421 (a) (2), other than the provisions of such sections relating to a head of a household, applicable to taxable years beginning on November 1, 1951, which the number of calendar months after October 31, 1951, in the taxable year of the taxpayer bears to the total number of calendar months in such taxable year.

For the purpose of section 108 (h) and this section, a calendar month only part of which falls within the taxable year (i) shall be disregarded if less than 15 days of such month are included in such taxable year, and (ii) shall be included as a calendar month within the taxable year if more than 14 days of such month fall within the taxable year.

(b) *Estates, trusts, and nonresident alien individuals.* The provisions of section 108 (h) apply to estates, trusts, and nonresident alien individuals subject to tax under sections 11 and 12 and to trusts described in section 421 (b) (2) which are subject to tax under section 421 (a) (2). However, the provisions of section 108 (h) do not apply to a trust described in section 421 (b) (2) in the case of a taxable year of such trust which began before January 1, 1951.

(c) *Short taxable years.* The provisions of section 108 (h) apply to a taxable year beginning before November 1, 1951, and ending after October 31, 1951 (other than the calendar year 1951), whether or not such taxable year is one of less than 12 months. In the case of a taxpayer who is subject to the provisions of section 108 (h) and who because of a change in accounting period has a taxable year of less than 12 months, the net income shall be placed on an annual basis under the provisions of section 47 (c) (1) for the purpose of both tentative tax computations under section 108 (h), or shall be computed under the exception in section 47 (c) (2) for the purpose of both such tentative tax computations. Regardless of the method adopted, the amounts of the tentative normal tax and surtax so computed upon the basis of 12 months' income shall be properly reduced under section 47 (c) in order to determine the tentative taxes under section 108 (h). However, in the case of a taxpayer who is subject to the provisions of section 108 (h) and who because of any reason other than a change in accounting period has a taxable year of less than 12 months, the net income shall not be placed on an annual basis under section 47 (c) (1) and shall not be computed under the exception in section 47 (c) (2).

(d) *Alternative tax under section 117 (c).* In any case in which a taxpayer subject to the provisions of section 108 (h) has an excess of net long-term capital gains over net short-term capital losses, the alternative tax under section 117 (c) shall be an amount equal to the sum of the proper portions of the tentative taxes determined under section 108 (h), by computing each such tentative tax pursuant to the alternative tax computation provided in section 117 (c), regardless of whether either tentative tax so computed on the alternative basis is larger or smaller than the tentative tax computed without regard to section 117 (c).

(e) *Certain joint returns.* If a joint return of a husband and wife is filed under the provisions of section 51 (b) (3), if the husband and wife have different taxable years solely because of the death of either spouse, and if the taxable year of the surviving spouse covered by such joint return is a period which began before November 1, 1951, and ended after October 31, 1951 (other than the calendar year 1951), the number of calendar months to be taken into account for the purpose of computing the portions of the tentative tax under section 108 (h) (1) and (2) shall be the number of calendar months prior to November 1, 1951, in the taxable year of the surviving spouse, the number of calendar months after October 31, 1951, in the taxable year of the surviving spouse, and the total number of calendar months in the taxable year of the surviving spouse.

(f) *Credits against tax.* In the case of a taxpayer subject to the provisions of section 108 (h), any credit against the tax otherwise imposed by sections 11, 12, 400, and 421 (a) (2), such as the credit for taxes paid to a foreign country or possession of the United States under section 131, shall be deducted from, and any limitation in such credit shall be based upon, the tax computed under section 108 (h). However, in those instances in which an individual taxpayer computes a tentative tax under section 108 (h) by taking into account the optional standard deduction under section 23 (aa), the following credits shall not be allowed: All credits under section 131 with respect to taxes of foreign countries and possessions, and all credits with respect to taxes withheld at the source under section 143 (a), relating to interest on tax-free covenant bonds.

§ 29.108–8 *Computation of tax of individuals for taxable years beginning in 1953 and ending in 1954.*—(a) *General rule.* For a taxable year beginning in 1953 and ending in 1954, the normal tax, surtax, optional tax, and Supplement U normal tax and surtax, imposed by sections 11, 12, 400, and 421 (a) (2) upon taxpayers other than corporations, shall be computed under section 108 (j), as added by the Revenue Act of 1951. The tax shall be an amount equal to the sum of:

(1) That portion of a tentative tax under section 108 (j) (1), computed under the provisions of sections 11 and 12, section 400, or section 421 (a) (2), applicable to taxable years beginning on January 1, 1953, which the number of calendar months prior to January 1, 1954, in the taxable year of the taxpayer bears to the total number of calendar months in such taxable year, and

(2) That portion of a tentative tax under section 108 (j) (2), computed under the provisions of sections 11 and 12, section 400, or section 421 (a) (2), applicable to taxable years beginning on January 1, 1954, which the number of calendar months after December 31, 1953, in the taxable year of the taxpayer bears to the total number of calendar months in such taxable year.

For the purpose of section 108 (j) and this section, a calendar month only part of which falls within the taxable year (i) shall be disregarded if less than 15 days of such month are included in such taxable year, and (ii) shall be included as a calendar month within the taxable year if more than 14 days of such month fall within the taxable year.

(b) *Estates, trusts, and nonresident alien individuals.* The provisions of section 108 (j) apply to estates, trusts, and nonresident alien individuals subject to tax under sections 11 and 12 and to trusts described in section 421 (b) (2) which are subject to tax under section 421 (a) (2).

(c) *Short taxable years.* The provisions of section 108 (j) apply to a taxable year beginning in 1953 and ending in 1954, whether or not such taxable year is one of less than 12 months. In the case of a taxpayer who is subject to the provisions of section 108 (j) and who because of a change in accounting period has a taxable year of less than 12 months, the net income shall be placed on an annual basis under the provisions of section 47 (c) (1) for the purpose of both tentative tax computations under section 108 (j), or shall be computed under the exception in section 47 (c) (2) for the purpose of both such tentative tax computations. Regardless of the method adopted, the amounts of the tentative normal tax and surtax so computed upon the basis of 12 months' income shall be properly reduced under section 47 (c) in order to determine the tentative taxes under section 108 (j). However, in the case of a taxpayer who is subject to the provisions of section 108 (j) and who because of any reason other than a change in accounting period has a taxable year of less than 12 months, the net income shall not be placed on an annual basis under section 47 (c) (1) and shall not be computed under the exception in section 47 (c) (2).

(d) *Alternative tax under section 117 (c).* In any case in which a taxpayer subject to the provisions of section 108 (j) has an excess of net long-term capital gains over net short-term capital losses, the alternative tax under section 117 (c) shall be an amount equal to the sum of the proper portions of the tentative taxes determined under section 108 (j), by computing each such tentative tax pursuant to the alternative tax computation provided in section 117 (c), regardless of whether either tentative tax so computed on the alternative basis is larger or smaller than the tentative tax computed without regard to section 117 (c).

(e) *Certain joint returns.* If a joint return of a husband and wife is filed under the provisions of section 51 (b) (3), if the husband and wife have different taxable years solely because of the death of either spouse, and if the taxable year of the surviving spouse covered by such joint return is a period which begins in 1953 and ends in 1954, the number of calendar months to be taken into account for the purpose of computing the portions of the tentative tax under section 108 (j) (1) and (2) shall be the number of calendar months prior to January 1, 1954, in the taxable year of the surviving spouse, the number of calendar months after December 31, 1953, in the taxable year of the surviving spouse, and the total number of calendar months in the taxable year of the surviving spouse.

(f) *Credits against tax.* In the case of a taxpayer subject to the provisions of section 108 (j), any credit against the tax otherwise imposed by sections 11, 12, 400, and 421 (a) (2), such as the credit for taxes paid to a foreign country or possession of the United States under section 131, shall be deducted from, and any limitation in such credit shall be based upon, the tax computed under section 108 (j). However, in those instances in which an individual taxpayer computes a tentative tax under

section 108 (j) by taking into account the optional standard deduction under section 23 (aa), the following credits shall not be allowed: All credits under section 131 with respect to taxes of foreign countries and possessions, and all credits with respect to taxes withheld at the source under section 143 (a), relating to interest on tax-free covenant bonds.

§ 29.108–9 *Computation of tax of corporations for taxable years beginning before April 1, 1954, and ending after March 31, 1954*—(a) *General rule.* For a taxable year beginning before April 1, 1954, and ending after March 31, 1954 (including the calendar year 1954), the normal tax, surtax, and Supplement U normal tax and surtax imposed by sections 13, 15, and 421 (a) (1) upon corporations shall be computed under section 108 (k), as added by the Revenue Act of 1951. The tax shall be an amount equal to the sum of:

(1) That portion of a tentative tax under section 108 (k) (1), computed under the provisions of sections 13 (b) (2) and 15 (b), or section 421 (a) (1), applicable to taxable years beginning on January 1, 1953, which the number of days prior to April 1, 1954, in the taxable year of the taxpayer bears to the total number of days in such taxable year, and

(2) That portion of a tentative tax under section 108 (k) (2), computed under the provisions of sections 13 (b) (3) and 15 (b), or section 421 (a) (1), applicable to taxable years beginning on April 1, 1954, which the number of days after March 31, 1954, in the taxable year of the taxpayer bears to the total number of days in such taxable year.

The tentative normal taxes under section 108 (k) (1) and (2) of a corporation are computed at the rates of 30 percent and 25 percent, respectively, upon its normal-tax net income or upon its Supplement U net income, in the case of a corporation subject to tax under Supplement U. The tentative surtaxes under section 108 (k) (1) and (2) of a corporation are computed upon its corporation surtax net income or Supplement U net income, as the case may be, in excess of $25,000 at the rate of 22 percent.

(b) *Computation of normal-tax net income and corporation surtax net income in special cases*—(1) *In general.* In computing the tentative taxes under section 108 (k) (1) and (2), the amount of the net income and the amount of the adjusted net income of the corporation are not recomputed and remain unchanged. However, the credits provided in section 26 (b), (h), and (i) may differ in computing the several tentative taxes. Thus, in the case of a Western Hemisphere trade corporation, or a public utility corporation which has paid dividends on its preferred stock with respect to which the credit for dividends paid provided in section 26 (h) is allowable, or any corporation which has received dividends on the preferred stock of a domestic public utility corporation with respect to which the credit provided in section 26 (h) is allowable to the distributing corporation, the amount of the normal-tax net income and the amount of the corporation surtax net income for the first tentative tax computation differ from such amounts for the second tentative tax computation. See subparagraphs (2), (3), and (4) of this paragraph.

(2) *Western Hemisphere trade corporations.* In the case of a Western Hemisphere trade corporation, its normal-tax net income and corporation surtax net income are determined, for the purpose of the tentative tax computation under section 108 (k) (1), with the allowance of the 27-percent credit provided in section 26 (i) applicable to a taxable year beginning on January 1, 1953, and, for the purpose of the tentative tax computation under section 108 (k) (2), with the allowance of the 30-percent credit provided in section 26 (i) applicable to a taxable year beginning on April 1, 1954.

(3) *Public utilities paying dividends on preferred stock.* In the case of a public utility corporation which has paid dividends on its preferred stock with respect to which the credit for dividends paid provided in section 26 (h) is allowable, its normal-tax net income and corporation surtax net income are determined, for the purpose of the tentative tax computation under section 108 (k) (1), with the allowance of the 27-percent credit provided in section 26 (h) applicable to a taxable year beginning on January 1, 1953, and, for the purpose of the tentative tax computation under section 108 (k) (2), with the allowance of the 30-percent credit provided in section 26 (h) applicable to a taxable year beginning on April 1, 1954.

(4) *Corporations receiving dividends on preferred stock of public utility.* In the case of any corporation which has received dividends on the preferred stock of a domestic public utility corporation with respect to which the credit provided in section 26 (h) is allowable to the distributing corporation, its normal-tax net income and corporation surtax net income are determined, for the purpose of the tentative tax computation under section 108 (k) (1), with the allowance of the 62-percent credit provided in section 26 (b) (2) with respect to such dividends received, and, for the purpose of the tentative tax computation under section 108 (k) (2), with the allowance of the 59-percent credit provided in section 26 (b) (2) with respect to such dividends received.

(c) *Classes of corporations excluded from operation of section 108 (k).* The provisions of section 108 (k) do not apply to an insurance company subject to Supplement G, a regulated investment company subject to Supplement Q, or a foreign corporation not engaged in trade or business within the United States other than such a corporation subject to Supplement U.

(d) *Short taxable years.* The provisions of section 108 (k) apply to a taxable year beginning before April 1, 1954, and ending after March 31, 1954, whether or not such taxable year is one of less than 12 months. In the case of a taxpayer which is subject to the provisions of section 108 (k) and which because of a change in accounting period has a taxable year of less than 12 months, the net income shall be placed on an annual basis under the provisions of section 47 (c) (1) for the purpose of both tentative tax computations under section 108 (k), or shall be computed under the exception in section 47 (c) (2) for the purpose of both such tentative tax computations. Regardless of the method adopted, the amounts of the tentative normal tax and surtax so computed upon the basis of 12 months' income shall be properly reduced under section 47 (c) in order to determine the tentative taxes under section 108 (k). However, in the case of a taxpayer which is subject to the provisions of section 108 (k) and which because of any reason other than a change in accounting period has a taxable year of less than 12 months, the net income for the purpose of section 108 (k) shall not be placed on an annual basis under section 47 (c) (1) and shall not be computed under the exception in section 47 (c) (2).

(e) *Alternative tax under section 117 (c).* In any case in which a taxpayer subject to the provisions of section 108 (k) has an excess of net long-term capital gains over net short-term capital losses, the alternative tax under section 117 (c) shall be an amount equal to the sum of the proper portions of the tentative taxes determined under section 108 (k), by computing each such tentative tax pursuant to the alternative tax computation provided in section 117 (c), regardless of whether either tentative tax so computed on the alternative basis is larger or smaller than the tentative tax computed without regard to section 117 (c).

(f) *Credits against tax.* In the case of a taxpayer subject to the provisions of section 108 (k), any credit against the tax otherwise imposed by sections 13, 15, and 421 (a) (1), such as the credit for taxes paid to a foreign country or possession of the United States under section 131, shall be deducted from, and any limitation in such credit shall be based upon, the tax computed under section 108 (k).

(g) *Example.* This section may be illustrated by the following example:

Example. The A Corporation, a domestic corporation (which is neither a public utility referred to in section 26 (h) nor a Western Hemisphere trade corporation referred to in section 26 (i), and which is not subject to tax under Supplement U), makes its income tax returns on the basis of the calendar year. For the calendar year 1954, the A Corporation has net income of $100,000, which does not include any interest on United States obligations or dividends on stock of foreign corporations. The net income includes cash dividends received from a domestic corporation other than a public utility (allowable as a credit under section 26 (b) (1)) in the amount of $10,000, and cash dividends received from a domestic public utility corporation on its preferred stock (with respect to which a credit is allowable to the public utility under section 26 (h)) in the amount of $5,000. The normal tax and surtax of the A Corporation for the calendar year 1954 are $23,218.12 and $13,972.86, respectively, computed as follows:

(i) *Computation of tentative taxes provided in section 108 (k) (1).*

NORMAL TAX AND SURTAX

1. Net income		$100,000.00
2. Less credit under sec. 26 (b) (1) for dividends received from domestic corporation other than dividends with respect to which credit is allowable under sec. 26 (h) (85 percent of $10,000)	$8,500.00	
3. Less credit under sec. 26 (b) (2) for dividends received with respect to which credit is allowable under sec. 26 (h) (62 percent of $5,000)	3,100.00	
		11,600.00
4. Normal-tax net income and corporation surtax net income		88,400.00
5. Normal tax (30 percent of item 4)		26,520.00
6. Surtax (22 percent of $63,400, the excess of $88,400 over $25,000)		13,948.00

(ii) *Computation of tentative taxes provided in section 108 (k) (2).*

NORMAL TAX AND SURTAX

7. Net income		$100,000.00
8. Less credit under sec. 26 (b) (1) (85 percent of $10,000)	$8,500.00	
9. Less credit under sec. 26 (b) (2) (59 percent of $5,000)	2,950.00	
		11,450.00
10. Normal-tax net income and corporation surtax net income		88,550.00
11. Normal tax (25 percent of item 10)		22,137.50
12. Surtax (22 percent of $63,550, the excess of $88,550 over $25,000)		13,981.00

(iii) *Computation of normal tax and surtax for calendar year 1954.*

13. Number of days in taxable year prior to Apr. 1, 1954		90
14. Number of days in taxable year after Mar. 31, 1954		275
15. Total number of days in taxable year		365

NORMAL TAX

16. Tentative normal tax computed in (i)	$26,520.00	
17. 90/365ths of $26,520		6,539.18
18. Tentative normal tax computed in (ii)	$22,137.50	
19. 275/365ths of $22,137.50		16,678.94
20. Total normal tax		23,218.12

SURTAX

21. Tentative surtax computed in (i)	$13,948.00	
22. 90/365ths of $13,948		3,439.23
23. Tentative surtax computed in (ii)	$13,981.00	
24. 275/365ths of $13,981		10,533.63
25. Total surtax		13,972.86

PAR. 4. There is inserted immediately preceding § 40.430–1 the following:

SEC. 131. FISCAL YEAR TAXPAYERS (REVENUE ACT OF 1951, APPROVED OCTOBER 20, 1951).

* * * * * * *

(b) *Computation of excess profits tax.* Subsection (b) of section 430 (relating to computation of excess profits tax in the case of certain taxable years) is hereby amended to read as follows:

(b) *Certain taxable years beginning before 1951*—(1) *Taxable years ending before April 1, 1951.* In the case of a taxable year beginning before July 1, 1950, and ending after June 30, 1950, and before April 1, 1951, the tax imposed by subsection (a) shall be an amount equal to that portion of a tentative tax computed under the provisions of subsection (a) applicable to taxable years ending on December 31, 1950, which the number of days in such taxable year after June 30, 1950, bears to the total number of days in such taxable year.

(2) *Taxable years ending after March 31, 1951.* In the case of a taxable year (other than a taxable year beginning on January 1, 1951, and ending on December 31, 1951) beginning before April 1, 1951, and ending after March 31, 1951, the tax imposed by subsection (a) shall be an amount equal to the sum of—

(A) That portion of a tentative tax, computed under the provisions of subsection (a) applicable to taxable years ending on December 31, 1950, which the number of days in such taxable year after June 30, 1950, and before April 1, 1951, bears to the total number of days in such taxable year, plus

(B) That portion of a tentative tax, computed under the provisions of subsection (a) applicable to taxable years beginning on April 1, 1951, which the number of days in such taxable year after March 31, 1951, bears to the total number of days in such taxable year.

* * * * * * *

PAR. 5. Section 40.430–2 (b) is amended to read as follows:

(b) *Taxable years beginning before April 1, 1951 (other than the calendar year 1951)*—(1) *Taxable years beginning before July 1, 1950, and ending after June 30, 1950, and before April 1, 1951.* In the case of any taxable year which begins before July 1, 1950, and ends after June 30, 1950, and before April 1, 1951 (including the calendar year 1950), the excess profits tax will be an amount which is proportionate to the part of the year falling after June 30, 1950. The tax will be an amount equal to that portion of a tentative tax, computed under the provisions of section 430 (a) and paragraph (a) of this section applicable to the taxable year, which the number of days in the taxable year after June 30, 1950, bears to the total number of days in such year. Thus, in the case of the calendar year 1950, the tax will be 184/365ths of the tentative tax computed under paragraphs (a) (1) (i) and (ii) and (a) (2) of this section. In computing the tentative tax under section 430 (b) (1) and this paragraph for a taxable year other than the calendar year 1950, the tax which would be imposed under sections 13, 14, and 15 shall, for the purposes of section 430 (a) (2) (A) and of (a) (1) (ii) of this section, be determined subject to the provisions of section 108 (f) (1) and (2), relating to fiscal year taxpayers, and subject to the provisions of section 141 (c), relating to consolidated returns, if applicable.

(2) *Taxable years beginning before April 1, 1951, and ending after March 31, 1951 (other than the calendar year 1951).* In the case of any taxable year which begins before April 1, 1951, and ends after March 31, 1951 (other than the calendar year 1951), the excess profits tax will be an amount equal to the sum of:

(i) That portion of a tentative tax, computed under the provisions of section 430 (a) and paragraph (a) of this section applicable to taxable years ending before April 1, 1951, which the number of days in the taxable year after June 30, 1950, and before April 1, 1951, bears to the total number of days in such year, and

(ii) That portion of a tentative tax, computed under the provisions of section 430 (a) and paragraph (a) of this section applicable to taxable years beginning on April 1, 1951, which the number of days in the taxable year after March 31, 1951, bears to the total number of days in such taxable year.

In computing the tentative tax under section 430 (b) (2) (A) and subdivision (i) of this subparagraph, the tax which would be imposed under sections 13, 14, and 15 shall, for purposes of section 430 (a) (2) (A) and of paragraph (a) (1) (ii) of this section, be determined subject to the provisions of section 108 (f) or (g), whichever is applicable to the taxable year, and subject to the provisions of section 141 (c), relating to consolidated returns, if applicable.

[F. R. Doc. 52–11338; Filed, Oct. 17, 1952; 8:54 a. m.]

[26 CFR Part 40]

EXCESS PROFITS TAX; TAXABLE YEARS ENDING AFTER JUNE 30, 1950

NOTICE OF PROPOSED RULE MAKING

Notice is hereby given, pursuant to the Administrative Procedure Act, approved June 11, 1946, that the regulations set forth in tentative form below are proposed to be prescribed by the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury. Prior to the final adoption of such regulations, consideration will be given to any data, views, or arguments pertaining thereto which are submitted in writing in duplicate to the Commissioner of Internal Revenue, Washington 25, D. C., within the period of 30 days from the date of publication of this notice in the FEDERAL REGISTER. The proposed regulations are to be issued under the authority contained in section 62 of the Internal Revenue Code (53 Stat. 32; 26 U. S. C. 62).

[SEAL] JOHN B. DUNLAP,
Commissioner of Internal Revenue.

In order to conform Part I of Regulations 130 (26 CFR Part 40) to sections 325, 502 through 512, 520, 522, and 602 of the Revenue Act of 1951, approved October 20, 1951, such regulations are amended as follows:

PARAGRAPH 1. There is inserted immediately preceding § 40.433 (a)–1 the following:

SEC. 502. PAYMENTS FROM FOREIGN SOURCES FOR TECHNICAL ASSISTANCE, ETC. (TITLE V, REVENUE ACT OF 1951, APPROVED OCTOBER 20, 1951).

(a) *Amendment of section 433 (a) (1).* Section 433 (a) (1) (relating to excess profits net income for taxable years ending after June 30, 1950) is hereby amended by adding at the end thereof the following new subparagraph:

(R) *Payments from foreign sources for technical assistance, etc.* In the case of a domestic corporation which renders to a related foreign corporation technical assistance, engineering services, scientific assistance, or similar services (such services or assistance being related to the production or improvement of products of the type manufactured by such domestic corporation), there shall be excluded the renumeration for such services or assistance if such remuneration constitutes income derived from sources without the United States. Any deductions in connection with or properly allocable to the rendering of such services or assistance shall not be allowed. For the purpose of this subparagraph, a foreign corporation shall be considered to be a "related foreign corporation" if the domestic corporation at the time it renders such serv-

ices or assistance owns 10 per centum or more of the outstanding stock of such foreign corporation.

• • • • •

SEC. 503. ELECTION WITH RESPECT TO CERTAIN INADMISSIBLE ASSETS (TITLE V, REVENUE ACT OF 1951, APPROVED OCTOBER 20, 1951).

• • • • •

(b) *Amendment of section 433 (a) (1).* Section 433 (a) (relating to adjustments in excess profits net income for the taxable year) is hereby amended by adding the following new subparagraph at the end thereof:

(S) *Interest on certain government obligations.* For adjustment in the case of a taxpayer making an election provided in section 440 (c), relating to dealers in certain Government obligations, see section 440 (c).

• • • • •

SEC. 523. EFFECTIVE DATE OF TITLE V (TITLE V, REVENUE ACT OF 1951, APPROVED OCTOBER 20, 1951).

• • • the amendements made by this title (including sections 502 and 508) shall be applicable only with respect to taxable years ending after June 30, 1950.

PAR. 2. Section 40.433 (a)–2. as amended by Treasury Decision 5885, approved February 21, 1952, is further amended by adding at the end thereof the following new paragraphs (r) and (s):

(r) (1) Section 433 (a) (1) (R) provides that there shall be excluded, in computing excess profits net income, any income accrued or received by a domestic corporation which constitutes remuneration to such domestic corporation for the rendering of technical assistance, engineering services, scientific assistance, or similar services to a related foreign corporation. The services or assistance rendered by the domestic corporation must be related to the production or improvement of products of the type manufactured by the domestic corporation. The remuneration, in addition, must constitute income from sources without the United States. Any deductions which are connected with or properly allocable to the rendering of such services or assistance shall not be allowed in computing excess profits net income.

(2) Any remuneration accrued or received by a domestic corporation shall not be excluded, however, in the case of a domestic corporation whose principal business consists of the furnishing of technical assistance or services. The term "related foreign corporation", for the purpose of section 433 (a) (1) (R) and of subparagraph (1) of this paragraph means a foreign corporation 10 percent or more in value of the outstanding stock of which is owned by the domestic corporation at the time the domestic corporation renders such services or assistance. The determination whether any remuneration constitutes income derived from sources without the United States shall be made in accordance with the provisions and principles of section 119 and the regulations thereunder.

(3) There shall not be excluded under section 433 (a) (1) (R) and subparagraph (1) of this subparagraph any income which in substance represents payments for the use of assets, royalties for the use of patents, fees for the use of copyrights or other licenses, or other similar payments. The income to be excluded shall be the income derived from imparting technical or management knowledge or skill for the production or improvement of certain products, but shall not include any income derived from the license or sale of the right to produce a product or to use a certain method of production. Thus, there may be excluded remuneration received by the domestic corporation for the services of an engineer to instruct the personnel of the related foreign corporation or to establish or improve production techniques, and for the equipment used by such engineer in connection with the rendering of such services, but there shall not be excluded any income received for the use of equipment to produce the products of the related foreign corporation. If the remuneration of the domestic corporation consists of elements of more than one type of income, only that part of the remuneration which is clearly identified as being attributable to the activities described in section 433 (a) (1) (R) shall be excluded in computing excess profits net income.

(s) For adjustment in the case of a taxpayer making the election provided in section 440 (c), relating to dealers in certain Government obligations, see section 440 (c) and § 40.440–1 (g) (2).

PAR. 3. There is inserted immediately preceding § 40.433 (b)–1 the following:

SEC. 325. TAX TREATMENT OF COAL ROYALTIES (REVENUE ACT OF 1951, APPROVED OCTOBER 20, 1951).

• • • • •

(e) *Conforming amendments.* (1) Section 433 (relating to computation of excess profits net income) is hereby amended by inserting at the end thereof the following new subsection:

(d) *Gain or loss upon certain disposals of coal in base period.* For the purpose of subsection (b), the excess profits net income shall be computed as if the provisions of section 117 (j) and (k) (2) which relate to disposals of coal were a part of the law applicable to the taxable year for which excess profits net income is computed.

• • • • •

(3) The amendments made by this subsection shall be applicable in computing the tax under subchapter D of chapter 1 for taxable years ending after December 31, 1950.

• • • • •

SEC. 502. PAYMENTS FROM FOREIGN SOURCES FOR TECHNICAL ASSISTANCE, ETC. (TITLE V, REVENUE ACT OF 1951, APPROVED OCTOBER 20, 1951).

• • • • •

(b) *Amendment of section 433 (b).* Section 433 (b) (relating to taxable years in base period) is hereby amended by adding at the end thereof the following new paragraph:

(16) *Payments from foreign sources for technical assistance, etc.* In the case of a domestic corporation which rendered to a related foreign corporation technical assistance, engineering services, scientific assistance, or similar services (such services or assistance being related to the production or improvement of products of the type manufactured by such domestic corporation), there shall be excluded the remuneration for such services or assistance if such remuneration constituted income derived from sources without the United States. Any deductions in connection with or properly allocable to the rendering of such services or assistance shall not be allowed. For the purpose of this paragraph, a foreign corporation shall be considered to be a "related foreign corporation" if the domestic corporation at the time it rendered such services or assistance owned 10 per centum or more of the outstanding stock of such foreign corporation.

SEC. 508. ELECTION WITH RESPECT TO CERTAIN INADMISSIBLE ASSETS (TITLE V, REVENUE ACT OF 1951, APPROVED OCTOBER 20, 1951).

• • • • •

(c) *Amendment of section 433 (b).* Section 433 (b) (relating to adjustments in excess profits net income for taxable years in base period) is hereby amended by adding at the end thereof the following new paragraph:

(17) *Interest on certain government obligations.* For adjustment in the case of a taxpayer making an election provided in section 440 (c), relating to dealers in certain Government obligations, see section 440 (c).

SEC. 523. EFFECTIVE DATE OF TITLE V (TITLE V, REVENUE ACT OF 1951, APPROVED OCTOBER 20, 1951).

• • • the amendments made by this title (including sections 502 and 508) shall be applicable only with respect to taxable years ending after June 30, 1950.

PAR. 4. Section 40.433 (b)–2 is amended by striking from the second sentence of paragraph (a) of such section "and (8) the adjustment to income in the case of life insurance companies." and by inserting in lieu thereof the following: "(8) the adjustment to income in the case of life insurance companies, (9) the adjustment for payments from foreign sources for technical assistance, etc., and (10) the adjustment for interest on certain Government obligations (see § 40.440–1 (g) (2)). For the purpose of computing the tax for taxable years ending after December 31, 1950, excess profits net income shall be computed as if the provisions of section 117 (j) and (k) (2) which relate to disposals of coal were a part of the law applicable to the taxable year for which the excess profits net income is being computed."

PAR. 5. There is inserted immediately preceding § 40.435–1 the following:

SEC. 503. AVERAGE BASE PERIOD NET INCOME IN CASE OF CERTAIN FISCAL YEAR TAXPAYERS (TITLE V, REVENUE ACT OF 1951, APPROVED OCTOBER 20, 1951).

Section 435 (d) (relating to the general average method for the computation of average base period net income) is hereby amended by adding at the end thereof the following: "For the purpose of the computations under this subsection in the case of a taxpayer whose first taxable year under this subchapter is a taxable year which either began before January 1, 1950, or was preceded by a taxable year beginning before January 1, 1950, and ending after March 31, 1950, there shall be substituted for the base period of the taxpayer the period of 48 consecutive months ending March 31, 1950, if such substitution produces a lesser tax under this subchapter for the taxable year for which the tax is being computed. In computing the average base period net income for such substituted period, the excess profits net income for January, February, and March of 1950 shall be computed by use of the 'weighted excess profits net income', as defined in section 435 (e) (2) (E), for the taxable year in which such months fall."

SEC. 504. AVERAGE BASE PERIOD NET INCOME—ALTERNATIVE BASED ON GROWTH IN CASE OF NEW CORPORATIONS (TITLE V, REVENUE ACT OF 1951, APPROVED OCTOBER 20, 1951).

(a) *General rule.* Section 435 (e) (1) (relating to the alternative based on growth) is hereby amended by striking out the phrase "the beginning of its base period" and inserting in lieu thereof the following: "the end of its base period."

• • • • •

SEC. 505. AVERAGE BASE PERIOD NET INCOME—ALTERNATIVE BASED ON GROWTH (TITLE V, REVENUE ACT OF 1951, APPROVED OCTOBER 20, 1951).

Section 435 (e) (2) (G) (relating to the alternative based on growth) is hereby amended by striking out the word "only".

SEC. 506. ADJUSTMENTS FOR CHANGES IN INADMISSIBLE ASSETS IN CASE OF BANKS (TITLE V, REVENUE ACT OF 1951, APPROVED OCTOBER 20, 1951).

(a) *Amendment of section 435 (g).* Section 435 (g) (relating to net capital addition or reduction) is hereby amended by redesignating paragraph (8) as paragraph (11) and by adding after paragraph (7) the following new paragraph:

(8) *Adjustments for changes in inadmissible assets in case of banks. In the case of a bank (as defined in section 104).* (A) If the increase in total assets for the taxable year exceeds the net capital addition computed without regard to the adjustment under paragraph (1) for an increase in inadmissible assets, then the net capital addition for the taxable year shall not be less than the excess of—

(i) The amount determined under the first sentence of paragraph (1) over

(ii) An amount which bears the same ratio to the increase in inadmissible assets for the taxable year, determined under paragraph (5), as the amount computed under such first sentence bears to the increase in total assets for the taxable year.

(B) If the decrease in total assets for the taxable year exceeds the net capital reduction computed without regard to the adjustment under paragraph (2) for a decrease in inadmissible assets, then the net capital reduction for the taxable year shall not be less than the excess of—

(i) The amount determined under the first sentence of paragraph (2) over

(ii) An amount which bears the same ratio to the decrease in inadmissible assets for the taxable year, determined under paragraph (5), as the amount computed under such first sentence bears to the decrease in total assets for the taxable year.

For the purpose of this paragraph, the increase or decrease in total assets for the taxable year shall be computed in the same manner as the increase or decrease in inadmissible assets for the taxable year is computed under paragraph (5), except that such computations shall be made with respect to all assets, whether admissible or inadmissible assets as defined in section 440."

• • • • •

(c) *Amendment of section 435 (f).* Section 435 (f) (relating to capital additions in base period) is hereby amended as follows:

(1) By inserting immediately after the word "reduced" in paragraph (1) thereof the following: "(but not below zero)".

(2) By adding at the end of paragraph (1) thereof the following: "For special rule in the case of banks, see paragraph (6)."

(3) By renumberinng paragraph (6) as paragraph (7), and by adding immediately after paragraph (5) the following new paragraph:

(6) *Yearly base period capital of banks.* In the case of a bank (as defined in section 104), the yearly base period capital for any taxable year shall be determined as follows:

(A) A tentative yearly base period capital shall be computed under paragraph (1) without regard to paragraph (1) (A).

(B) The tentative yearly base period capital so determined shall be reduced by the amount determined under section 440 (b) (relating to inadmissible assets). For the purpose of this subparagraph, the computation under section 440 (b) shall include only the daily amounts (described in such section) for the first day of such taxable year.

(d) *Effective date of subsection (c) (3).* The amendment made by subsection (c) (3) (adding a new paragraph (6) to section 435 (f)) shall be applicable with respect to taxable years beginning on or after the date of the enactment of this act, and, at the election of the taxpayer made in accordance with regulations prescribed by the Secretary, shall be applicable to all taxable years ending after June 30, 1950.

SEC. 507. DECREASE IN INADMISSIBLE ASSETS (TITLE V, REVENUE ACT OF 1951, APPROVED OCTOBER 20, 1951).

Section 435 (g) (relating to net capital addition or reduction) is hereby amended as follows:

(a) By adding at the end of paragraph (1) thereof the following: "For further adjustment with respect to the amount determined under the preceding provisions of this paragraph, see paragraph (9)."

(b) By adding immediately after paragraph (8), as added by section 506 of this act, the following new paragraphs:

(9) *Decrease in inadmissible assets.* (A) Except as otherwise provided in subparagraph (B) (relating to banks), the excess of the amount computed under paragraph (2) (A) or (B), whichever is applicable to the taxpayer (whether or not any amount is determined under the first sentence of paragraph (2)), over the amount, if any, computed under the first sentence of paragraph (2) shall be considered the net capital addition for the taxable year or shall be added to the net capital addition otherwise determined under paragraph (1), as the case may be. The amount of the excess so determined shall be subject to the exceptions and limitations provided in paragraph (10).

(B) In the case of a bank (as defined in section 104), the computation under subparagraph (A) shall be made by substituting for the amount computed under paragraph (2) (A) or (B) whichever of the following amounts is the lesser:

(i) An amount which bears the same ratio to the decrease in inadmissible assets as the sum of the equity capital (as defined in section 437 (c)) and the daily borrowed capital (as defined in section 439 (b)), each determined as of the first day of the first taxable year ending after June 30, 1950, bears to the total assets as of the beginning of such day;

(ii) If paragraph (8) (B) is applicable, the amount computed under paragraph (8) (B) (ii).

(10) *Exceptions and limitations for the purpose of paragraph (9).* For the purpose of paragraph (9)—

(A) The adjustment to the decrease in inadmissible assets required under subparagraph (B) of paragraph (2) shall not be greater than 25 per centum of the excess of the net capital reduction computed under the first sentence of paragraph (2) (and computed without regard to the percentage limitations in paragraph (4) (C) and (E)) over the net capital reduction computed under such sentence without regard to paragraph (4) (C) and (E).

(B) The amount determined under paragraph (9) shall not be greater than the excess of the increase in operating assets for the taxable year over the net capital addition (determined without regard to paragraph (9) and determined without regard to the limitation to 75 per centum provided in paragraph (3) (C) and paragraph (4) (C) and (E)). For the purpose of the preceding sentence, the increase in operating assets for the taxable year shall be determined in the same manner as the increase in inadmissible assets for the taxable year is determined under paragraph (5). For the purpose of such determination, the term "operating assets" means—

(i) Property used in the taxpayer's trade or business within the meaning of section 117 (j) (1) except that such property need not be held more than six months, and

(ii) Stock in trade or other property of a kind which would properly be includible in the inventory of the taxpayer if owned at the close of the taxable year, and property held by the taxpayer primarily for sale to customers in the ordinary course of the taxpayer's trade or business,

except any such assets which constitute inadmissible assets, stock, securities, or intangible property (such intangible property not being limited to the property described in section 441 (i)).

(C) The amount determined under paragraph (9) shall be subject to reduction to the extent that the Secretary determines that the increase in operating assets is a result, directly or indirectly, of an increase in indebtedness of the taxpayer (other than indebtedness which constitutes borrowed capital).

SEC. 509. ALTERNATIVE AVERAGE BASE PERIOD NET INCOME (TITLE V, REVENUE ACT OF 1951, APPROVED OCTOBER 20, 1951).

• • • • •

(b) *Technical amendments.* (1) Section 435 (f) (3) (relating to capital addition in the base period) is hereby amended by inserting immediately after the words "under section 442 (c) (1)", wherever appearing therein, the following: "or under section 442 (h)".

• • • • •

SEC. 523. EFFECTIVE DATE OF TITLE V (TITLE V, REVENUE ACT OF 1951, APPROVED OCTOBER 20, 1951).

Except as otherwise provided in section 506 (d), the amendments made by this title [sections 501 through 523] shall be applicable only with respect to taxable years ending after June 30, 1950.

SEC. 602. EXCESS PROFITS CREDIT BASED ON INCOME (REVENUE ACT OF 1951, APPROVED OCTOBER 20, 1951).

(a) *Percentage of average base period net income taken into account*—(1) *In general.* Paragraph (1) (A), and paragraph (2), of section 435 (a) (relating to excess profits credit based on income) are each amended by striking out "85 per centum" and inserting in lieu thereof "83 per centum".

(2) *Taxable years beginning before July 1, 1951, and ending after June 30, 1951.* Section 435 (a) is hereby amended by adding at the end thereof the following new paragraphs:

(4) *Calendar year 1951.* In the case of a taxable year beginning on January 1, 1951, and ending on December 31, 1951, there shall be used, for the purposes of paragraph (1) (A) and paragraph (2), in lieu of 85 per centum of the average base period net income, an amount equal to 84 per centum of the average base period net income.

(5) *Taxable years (other than calendar year 1951) beginning before July 1, 1951, and ending after June 30, 1951.* In the case of any taxable year (other than a taxable year described in paragraph (4)) beginning before July 1, 1951, and ending after June 30, 1951, there shall be used, for the purposes of paragraph (1) (A) and paragraph (2), in lieu of 85 per centum of the average base period net income, an amount equal to the sum of—

(A) That portion of an amount equal to 85 per centum of the average base period net income which the number of days in such taxable year prior to July 1, 1951, bears to the total number of days in such taxable year, plus

(B) That portion of an amount equal to 83 per centum of the average base period net income which the number of days in such taxable year after June 30, 1951, bears to the total number of days in such taxable year.

(b) *Effective date.* The amendments made by subsection (a) shall be applicable only

with respect to taxable years ending after June 30, 1951.

PAR. 6. Section 40.435–1 is amended as follows:

(A) By changing paragraph (a) of such section to read as follows:

(a) *Introductory.* (1) In order for a corporation to determine for any particular taxable year the amount of its excess profits credit based on income, it is necessary first to compute the amount of the average base period net income. The first item in determining the excess profits credit based on income is an amount equal to a percentage of such average base period net income. See subparagraph (2) of this paragraph and section 435 (a) for the percentage applicable to the taxable year for which the credit is being computed. Two methods are provided in section 435 for determining the average base period net income: (i) The general average method set forth in section 435 (d) and in paragraph (d) of this section, and (ii) the alternative method set forth in section 435 (e) applicable to certain taxpayers whose growth entitles them to the benefits of a method provided in such section, if such method results in a lesser excess profits tax.

(2) With respect to the particular taxable years indicated, the following percentages of average base period net income shall be taken into account as the first item in determining the amount of the excess profits credit based on income:

(i) 85 percent in the case of a taxable year ending after June 30, 1950, and not ending after June 30, 1951.

(ii) 84 percent in the case of a taxable year which is the calendar year 1951.

(iii) 83 percent in the case of a taxable year beginning after June 30, 1951.

(iv) In the case of any taxable year (other than a taxable year which is the calendar year 1951) beginning before July 1, 1951, and ending after June 30, 1951, there shall be used an amount equal to the sum of:

(*a*) That portion of an amount equal to 85 percent of the average base period net income which the number of days in such taxable year prior to July 1, 1951, bears to the total number of days in such taxable year, plus

(*b*) That portion of an amount equal to 83 percent of the average base period net income which the number of days in such taxable year after June 30, 1951, bears to the total number of days in such taxable year.

(B) By changing paragraph (d) of such section to read as follows:

(d) *Computation under general average method.* (1) The following steps are required for the computation of the average base period net income under the general average method:

(i) The excess profits net income is determined for each month during which the taxpayer was in existence during the base period. This amount is determined for any month during any part of which the taxpayer was in existence by dividing the excess profits net income (computed in accordance with the provisions of section 433 (b)) for the taxable year in which such month falls by the number of full calendar months in such taxable year. In no case shall the excess profits net income for any month be less than zero. The excess profits net income for any month during no part of which the taxpayer was in existence shall be zero.

(ii) The 36 months which produce the highest aggregate excess profits net income are selected under either of two methods: (*a*) The 12 consecutive months having the lowest aggregate excess profits net income may be eliminated; or (*b*) the 36 consecutive months having the highest aggregate excess profits net income may be retained.

(iii) The excess profits net income for each of the 36 months selected under subdivision (ii) of this subparagraph is aggregated.

(iv) The aggregate amount computed under subdivision (iii) of this subparagraph is divided by 3.

(2) A taxpayer which had a taxable year beginning in 1949 and ending after March 31, 1950, may compute an average base period net income under the general average method described in subparagraph (1) of this paragraph either for its base period as defined in section 435 (b) and in (b) of this section or for a substituted period consisting of 48 consecutive months ending March 31, 1950, whichever period produces the lesser excess profits tax for the taxable year. In computing the average base period net income for such substituted period, the excess profits net income for January, February, and March of 1950 shall be a "weighted excess profits net income", as defined in section 435 (e) (2) (E) and in § 40.435–5 (b), for the taxable year in which such months fall.

(3) A taxpayer having a taxable year beginning in 1949 and ending after March 31, 1950, shall indicate on Schedule EP–2 (Form 1120) which period is used in the computation of its average base period net income. A taxpayer may use the substituted 48-month period for the purpose of determining its unused excess profits credit adjustment as defined in section 432 (b) but shall use the base period as defined in section 435 (b) and in paragraph (b) of this section for the purpose of any other computation under Subchapter D of this chapter. For example, the base period and not the substituted 48-month period shall be used for the purpose of any reference in section 442 to 435 (d).

PAR. 7. Section 40.435–4 is amended as follows:

(A) By striking out the phrase "the beginning of its base period" wherever appearing therein (such phrase appearing in the first sentence of paragraphs (a), (b) and (c) of such section) and inserting in lieu thereof the following: "the end of its base period".

(B) By inserting at the end of such section the following paragraph (d):

(d) *Corporations commencing business during base period.* In the case of a corporation which commenced business during its base period, total payroll, gross receipts, net sales, and excess profits net income, for any portion of its base period during which it was not in existence, will be taken into account under section 435 (e) at zero. A corporation not in existence on the first day of its base period would, unless it is a member of an affiliated group for its first taxable year ending after June 30, 1950, automatically satisfy the total assets requirement of section 435 (e) (1) (A) (i) and of paragraph (b) of this section since its total assets as of the first day of its base period would be zero.

PAR. 8. Section 40.435–5 is amended by striking from paragraph (a) (7) thereof the phrase "and does not qualify under the general requirements for the alternative based on growth (see § 40.435–4 (b))".

PAR. 9. Section 40.435–6 is amended as follows:

(A) By adding at the end of paragraph (a) of such section the following subparagraph (5):

(5) For special rules applicable in the case of a bank, see paragraph (e) of this section and section 435 (f) (6).

(B) By inserting in the third sentence of paragraph (b) (1) of such section immediately after the words "Such sum shall be reduced" the following: "(but not below zero)".

(C) By inserting at the end of paragraph (d) of such section the following paragraph (d) (3) and paragraph (e):

(3) If the taxpayer computes an average base period net income by reference to section 442 (h), the rules stated in subdivisions (i) through (iii) of subparagraph (2) of this paragraph without regard to the 110 percent qualification therein, shall be applicable in determining the base period capital addition.

(e) *Yearly base period capital of banks.* (1) For the purpose of computing the tax for taxable years beginning on or after October 20, 1951, the adjustment to the yearly base period capital for inadmissible assets in the case of a bank, as defined in section 104, must be made under section 435 (f) (6) which provides a proportionate adjustment with respect to such assets. The yearly base period capital shall be determined under such section as follows:

(i) A tentative yearly base period capital shall be computed under section 435 (f) (1), without any reduction under section 435 (f) (1) (A) for inadmissible assets.

(ii) The amount determined under subdivision (i) of this subparagraph shall be reduced by an amount which bears the same ratio to the amount determined under subdivision (i) of this subparagraph as the ratio which the total of the inadmissible assets bears to the total of admissible and inadmissible assets, each such total being determined only by reference to the daily amounts of admissible and inadmissible assets for the first day of the taxable year for which yearly base period capital is determined. See section 440 (b) and § 40.440–1.

(2) A taxpayer using the adjustment for inadmissible assets provided in section 435 (f) (6) shall so indicate on Schedule EP–2 (A) (Form 1120) and shall file with, and as a part of, its return a schedule showing the computation of its base period capital addition pursuant to such section. In the case of a taxpayer making the election described in subparagraph (3) of this paragraph such schedule shall be filed for all taxable years beginning before October 20, 1951, and shall be filed with the election.

(3) If the taxpayer elects by a statement attached to its return for a taxable year beginning before October 20, 1951, the adjustment for inadmissible assets under section 435 (f) (6) shall be applicable in the computation of its excess profits tax for all taxable years beginning before October 20, 1951. In the case of a taxpayer electing to use such adjustment for a taxable year beginning before October 20, 1951, for which a return has been filed, such election shall be made in writing and shall be filed with and as a part of an amended return, or, if made in connection with a claim for credit or refund, with and as a part of such claim. An election once made shall be irrevocable and shall apply to the computation of the tax for all taxable years beginning before October 20, 1951. In such case, section 435 (f) (6) is applicable in computing the yearly base period capital of each taxable year involved in determining the base period capital addition.

PAR. 10. Section 40.435–7 is amended as follows:

(A) By redesignating subparagraph (5) in paragraph (a) of such section as subparagraph (6) and by adding after subparagraph (4) thereof the following subparagraph (5):

(5) For special rules for changes in inadmissible assets in the case of banks, see section 435 (g) (8) and paragraph (f) of this section.

(B) By inserting at the end of paragraph (b) of such section the following subparagraph (4):

(4) For further adjustment with respect to the amount of the net capital addition, as determined above, by reason of a decrease in inadmissible assets, see section 435 (g) (9) and paragraph (g) of this section.

(C) By adding at the end of such section the following paragraphs (f) and (g):

(f) *Adjustment for changes in inadmissible assets in the case of banks.* (1) In the case of a bank, as defined in section 104, a limitation on the adjustment to the net capital addition for an increase in inadmissible assets is required under section 435 (g) (8) (A). This limitation shall be applicable where the increase in total assets for the taxable year (as determined under subparagraph (3) of this paragraph) exceeds the net capital addition computed without regard to any adjustments for an increase in inadmissible assets. In such a case, the amount of the adjustment for inadmissible assets shall not be greater than an amount which bears the same ratio to the increase in inadmissible assets for the taxable year as the amount of the net capital addition, computed without adjustment for such increase, bears to the increase in total assets for the taxable year.

(2) In the case of a bank, a limitation on the net capital reduction for a decrease in inadmissible assets is required under section 435 (g) (8) (B). This limitation shall be applicable where the decrease in total assets for the taxable year (as determined under subparagraph (3) of this paragraph) exceeds the net capital reduction for such year computed without regard to any adjustments for a decrease in inadmissible assets. In such a case, the amount of the adjustment for inadmissible assets shall not be greater than an amount which bears the same ratio to the decrease in inadmissible assets for the taxable year as the amount of the net capital reduction, computed without adjustment for such decrease, bears to the decrease in total assets for the taxable year.

(3) For the purpose of subparagraphs (1) and (2) of this paragraph, total assets shall include all assets, whether admissible or inadmissible assets as defined in section 440, and total assets as of any time shall be determined in accordance with the rules for determining assets set forth in § 40.437–5 (b). An increase or decrease in inadmissible assets for the taxable year shall be determined under section 435 (g) (5). See paragraphs (d) and (e) of this section. An increase or decrease in total assets shall also be determined under section 435 (g) (5) as if that section had reference to all assets held by the taxpayer, whether admissible or inadmissible assets as defined in section 440.

(4) A taxpayer required to apply the limitation on the adjustment for changes in inadmissible assets provided in section 435 (g) (8) shall so indicate on Schedule EP–2 (B) (Form 1120) and shall attach thereto a separate schedule showing the computations under such section.

(g) *Decrease in inadmissible assets*—(1) *In general.* A net capital addition for the taxable year may be allowed, or the amount otherwise determined under section 435 (g) (1) and under paragraph (d) of this section may be increased, in certain cases described in section 435 (g) (9) where a decrease in inadmissible assets (in excess of the net capital reduction, if any) is accompanied by a corresponding increase in operating assets. For this purpose, an increase in operating assets is taken into account only to the extent that it exceeds the net capital addition as adjusted under section 435 (g) (10) (B). The term "operating assets" means (i) property used in the taxpayer's trade or business within the meaning of section 117 (j) (1) determined without regard to any holding period specified in such section, and (ii) stock in trade or other property of a kind which would properly be includible in the inventory of the taxpayer if owned at the close of the taxable year, and property held by the taxpayer primarily for sale to customers in the ordinary course of the taxpayer's trade or business. Such term does not include cash, inadmissible assets, stock, securities, or intangible property, whether or not such intangible property is described in section 441 (i). Section 435 (g) (9) sets forth two rules for the computation of the addition to the income credit under such section, one of which is applicable in the case of a taxpayer other than a bank, as defined in section 104, and the other of which is applicable in the case of such a bank.

(2) *Taxpayers other than banks.* In the case of a taxpayer other than a bank (as defined in section 104), the following steps are required under section 435 (g) (9) and (10) in order to determine the amount of the net capital addition for the taxable year, or the amount to be added to the net capital addition determined under section 435 (g) (1), as the case may be:

(i) There is determined the excess of the total of the inadmissible assets, as defined in section 440 (b), for the first day of the taxpayer's first taxable year ending after June 30, 1950, over the total of the daily amounts attributable to the inadmissible assets for the taxable year, divided by the number of days in such year.

(ii) There is determined the excess, if any, divided by the number of days in the taxable year, of the aggregate of the daily capital reduction for each day of the taxable year over the aggregate of the daily capital addition for each day of the taxable year. See paragraphs (b) and (c) of this section.

(iii) The excess of the amount computed under subdivision (i) of this subparagraph over the amount, if any, computed under subdivision (ii) of this subparagraph is determined. Where the amount computed under subdivision (i) of this subparagraph exceeds the amount, if any, computed under subdivision (ii) of this subparagraph without regard to section 435 (g) (4) (C) and (E), relating to a decrease in borrowed capital and to an increase in loans to members of a controlled group of corporations of which the taxpayer is a member, the amount computed under subdivision (i) of this subparagraph may be reduced. In such a case the amount computed under subdivision (i) of this subparagraph shall be reduced by 25 percent of the excess, if any, of—

(*a*) An amount computed under subdivision (ii) of this subparagraph by using 100 percent, in lieu of 75 percent, of the amounts determined under section 435 (g) (4) (C) and (E), over

(*b*) An amount computed under subdivision (ii) of this subparagraph without regard to section 435 (g) (4) (C) or (E).

(iv) There is determined the excess of the total of the daily amounts attributable to operating assets for the taxable year, divided by the number of days in such year, over the total amount of such assets for the first day of the taxpayer's first taxable year ending after June 30, 1950. For this purpose the adjusted basis of such assets for determining gain upon sale or exchange shall be used.

(v) The net capital addition, if any, under section 435 (g) (1) is recomputed without regard to the percentage limitations under section 435 (g) (3) (C), relating to an increase in borrowed capital, and under section 435 (g) (4) (C) and (E), relating to a decrease in borrowed capital and to an increase in loans to members of a controlled group of corpo-

rations of which the taxpayer is a member.

(vi) The amount to be added to the net capital addition, or the amount which shall be considered the net capital addition, as the case may be, is whichever of the following amounts is the lesser—

(*a*) The amount determined under subdivision (iii) of this subparagraph, or

(*b*) The excess of the amount determined under subdivision (iv) of this subparagraph over the amount determined under subdivision (v) of this subparagraph.

(3) *Special rule in the case of a bank.* In the case of a bank (as defined in section 104), the adjustment for a decrease in inadmissible assets shall be determined as provided in subparagraph (2) of this paragraph except that in lieu of the amount computed under subparagraph (2) (i) of this paragraph there shall be substituted whichever of the following amounts is the lesser (and such amounts shall not be adjusted under the second and third sentences of subparagraph (2) (iii) of this paragraph):

(i) An amount which bears the same ratio to the amount determined under subparagraph (2) (i) of this paragraph as the sum of the equity capital, as defined in section 437 (c), and the daily borrowed capital, as defined in section 439 (b), each determined as of the first day of the first taxable year ending after June 30, 1950, bears to the total assets (determined as provided in section 435 (g) (8)) as of the beginning of such day, or

(ii) If the decrease in total assets for the taxable year exceeds the net capital reduction, computed without regard to adjustments for a decrease in inadmissible assets, the amount computed under section 435 (g) (8) (B) (ii). See paragraph (f) (2) of this section.

(4) *Special rules applicable to the section 435 (g) (9) adjustment.* The adjustment to the net capital addition for a decrease in inadmissible assets provided in section 435 (g) (9) shall be subject to reduction in any case in which the Commissioner determines that the increase in operating assets is the direct or indirect result of an increase in indebtedness of the taxpayer, other than indebtedness which constitutes borrowed capital as defined in section 439 (b). This limitation may be applied, for example, in a case where the addition to operating assets is accompanied by increased open account indebtedness to a member of a controlled group, as defined in section 435 (g) (6). A taxpayer computing a net capital addition by reference to section 435 (g) (9) shall attach to Schedule EP–2 (B) (Form 1120) a schedule showing the computation under such section and shall include a statement of its operating assets.

PAR. 11. There is inserted immediately preceding § 40.438–1 the following:

SEC. 506. ADJUSTMENTS FOR CHANGES IN INADMISSIBLE ASSETS IN CASE OF BANKS (TITLE V, REVENUE ACT OF 1951, APPROVED OCTOBER 20, 1951).

* * * * *

(b) *Amendment of section 438.* Section 438 (relating to new capital credit changes) is hereby amended by adding after subsection (f) the following new subsection:

(g) *Adjustments for inadmissible assets in case of banks.* In the case of a bank (as defined in section 104), if the increase in total assets for the taxable year (determined in the manner provided in the last sentence of section 435 (g) (8)) exceeds the net new capital addition computed without regard to the adjustment under subsection (b) for an increase in inadmissible assets, then the net new capital addition for the taxable year shall not be less than the excess of the amount determined under the first sentence of subsection (b) over an amount which bears the same ratio to the increase in inadmissible assets for the taxable year, determined under section 435 (g) (5), as the amount computed under such first sentence bears to such increase in total assets for the taxable year.

* * * * *

SEC. 523. EFFECTIVE DATE OF TITLE V (TITLE V, REVENUE ACT OF 1951, APPROVED OCTOBER 20, 1951).

* * * the amendments made by this title (including section 506 (b)) shall be applicable only with respect to taxable years ending after June 30, 1950.

PAR. 12. Section 40.438–4 is amended as follows:

(A) By adding at the end of paragraph (a) of such section the following sentence: "For special rules for changes in inadmissible assets in the case of banks, see section 438 (g) and paragraph (c) of this section."

(B) By adding at the end of such section the following paragraph(s):

(c) *Adjustments for inadmissible assets in the case of banks.* (1) In the case of a bank, as defined in section 104, a limitation on the adjustment to the net new capital addition for an increase in inadmissible assets is required under section 438 (g). This limitation shall be applicable where the increase in total assets (as determined under subparagraph (2) of this paragraph) for the taxable year exceeds the net new capital addition for such year computed without regard to adjustments for an increase in inadmissible assets. In such a case, the amount of the adjustment for inadmissible assets shall not be greater than an amount which bears the same ratio to the increase in inadmissible assets for the taxable year as the amount of the net new capital addition, computed without regard to any adjustment for inadmissible assets, bears to the increase in total assets for the taxable year.

(2) For the purpose of subparagraph (1) of this paragraph, total assets shall include all assets, whether admissible or inadmissible assets as defined in section 440, and total assets as of any time shall be determined in accordance with the rules for determining assets set forth in § 40.437–5 (b). An increase or decrease in inadmissible assets for the taxable year shall be determined under section 435 (g) (5). See paragraphs (d) and (e) of § 40.435–7. An increase or decrease in total assets shall also be determined under section 435 (g) (5) as if that section had reference to all assets held by the taxpayer, whether admissible or inadmissible assets as defined in section 440.

(3) A taxpayer required to apply the limitation on the adjustment for changes in inadmissible assets provided in section 438 (g) shall so indicate on Schedule EP–4 (Form 1120) and shall attach thereto a separate schedule showing the computations under such section.

PAR. 13. There is inserted immediately preceding § 40.440–1 the following:

SEC. 325. TAX TREATMENT OF COAL ROYALTIES (REVENUE ACT OF 1951, APPROVED OCTOBER 20, 1951).

* * * * *

(e) *Conforming amendments.*

* * * * *

(2) Section 440 (a) (1) (relating to definition of "inadmissible assets") is hereby amended by striking out "and" at the end of subparagraph (A); by striking out the period at the end of subparagraph (B) and inserting in lieu thereof "; and"; and by adding at the end thereof the following new subparagraph:

(C) The economic interest referred to in the provisions of section 117 (k) (2) relating to coal if the taxpayer is subject to such provisions with respect to the income from such coal.

(3) The amendments made by this subsection shall be applicable in computing the tax under subchapter D of chapter 1 for taxable years ending after December 31, 1950.

* * *

SEC. 506. ELECTION WITH RESPECT TO CERTAIN INADMISSIBLE ASSETS (TITLE V, REVENUE ACT OF 1951, APPROVED OCTOBER 20, 1951).

(a) *Amendment of section 440.* Section 440 (relating to admissible and inadmissible assets) is hereby amended by adding at the end thereof the following new subsection:

(c) *Treatment of Government obligations as admissible assets.* If the taxpayer elects for any taxable year, in accordance with regulations prescribed by the Secretary, to increase its excess profits net income by an amount equal to the amount by which the interest received or accrued during the taxable year on Government obligations exceeds the sum of—

(1) The amount of interest paid or accrued during such year which is not allowed as a deduction under section 23 (b), and

(2) The amount of the adjustments required for the taxable year under section 22 (o) (relating to adjustment for certain bond premiums), but not in excess of the amount of interest received or accrued during the taxable year on Government obligations to which such section is applicable,

then for the taxable year for which the election is made the term "admissible assets" shall include Government obligations, and the term "inadmissible assets" shall not include Government obligations. For the purpose of applying section 435 to the taxable year for which the election is made, Government obligations shall not be considered "inadmissible assets" in determining original inadmissible assets or yearly base period capital. As used in this subsection the term "Government obligations" means obligations described in section 22 (b) (4) any part of the interest from which is excludible from gross income or allowable as a credit against net income; but such term shall include only such obligations as in the hands of the taxpayer are property described in section 117 (a) (1) (A). For the purpose of determining the excess profits credit for a taxable year for which the election is made, the excess profits net income under section 433 (b) for any taxable year shall include the amount by which the interest received or accrued during such taxable year on Government obligations exceeds the amount of interest paid or accrued during such year which is not allowed as a deduction under section 23 (b) and, if the taxable year ends after June 30, 1950, the amount with respect to such year described in paragraph (2).

* * * * *

SEC. 523. EFFECTIVE DATE OF TITLE V (TITLE V, REVENUE ACT OF 1951, APPROVED OCTOBER 20, 1951).

* * * the amendments made by this title (including section 508) shall be applicable only with respect to taxable years ending after June 30, 1950.

PAR. 14. Section 40.440–1 is amended as follows:

(A) By inserting at the end of paragraph (a) of such section the following sentence: "For the election in certain cases to treat Government obligations as admissible assets, see section 440 (c) and paragraph (g) of this section."

(B) By striking the first sentence from paragraph (b) of such section and by inserting in lieu thereof the following sentence: "The term 'inadmissible assets' means (1) stock in all corporations, domestic or foreign, except stock in a foreign personal holding company, and except stock which is not a capital asset (such as stock held primarily for sale to customers by a dealer in securities), (2) all obligations described in section 22 (b) (4), any part of the interest from which is excludible from gross income or allowable as a credit against net income, and (3) for the purpose of computing the tax for taxable years ending after December 31, 1950, the economic interest referred to in section 117 (k) (2), relating to coal, if the taxpayer is subject to the provisions of such section with respect to the income from such coal."

(C) By striking from paragraph (c) of such section "section 436 (a) (1) and section 448 (b) (3)" and by inserting in lieu thereof the following: "section 435 (f) (6), section 436 (a) (1), and section 448 (b) (3)".

(D) By striking the last sentence of paragraph (f) of such section and inserting in lieu thereof the following sentence: "The amount so determined is the amount of the reduction referred to in section 436 (a) (1) or section 448 (b) (3), as the case may be. Section 440 (b) similarly applies in determining the amount of the reduction referred to in section 435 (f) (6), except that for such purpose only the daily amounts of admissible and inadmissible assets for the first day of the taxable year are used."

(E) By adding at the end of such section the following paragraph (g):

(g) (1) Section 440 (c) provides that, if the taxpayer makes the election described in that section, its Government obligations described in section 22 (b) (4) to which the election is applicable, any part of the interest from which is excludible from gross income or allowable as a credit against net income, shall be treated as admissible assets. The election under section 440 (c) is applicable to such Government obligations as are not capital assets in the taxpayer's hands and as are stock in trade or other property of a kind which would properly be included in the inventory of the taxpayer if on hand at the close of the taxable year, or property held by the taxpayer primarily for sale to customers in the ordinary course of its trade or business. In the case of such election, the term "admissible assets" shall include such Government obligations and the term "inadmissible assets" shall not include such obligations. For this purpose, the term "obligations described in section 22 (b) (4)" includes obligations, the discount on which, if issued at a discount, would be treated as interest described in section 22 (b) (4). An election under section 440 (c) shall be made in the manner described in subparagraph (4) of this paragraph.

(2) In the case of a taxpayer making the election under section 440 (c) for any taxable year, the excess profits net income shall be increased by an amount equal to the amount by which the interest received or accrued during the taxable year on the Government obligations to which the election is applicable (see subparagraph (1) of this paragraph) exceeds the sum of:

(i) The amount of interest paid or accrued during such year which is not allowed as a deduction under section 23 (b) and which is properly allocable to the Government obligations to which the election is applicable, and

(ii) The amount of the adjustments required for the taxable year under section 22 (o) (relating to adjustment for certain bond premiums) with respect to the Government obligations to which the election is applicable, but not in excess of the amount of interest received or accrued during the taxable year on such Government obligations.

(3) For the purpose of applying section 435 to the taxable year for which the election is made, the Government obligations to which such election is applicable shall not be considered inadmissible assets in determining yearly base period capital under section 435 (f) (1) or in determining original inadmissible assets under section 435 (g) (5). See §§ 40.435–6 and 40.435–7. For the purpose of determining the excess profits credit for a taxable year for which the election under section 440 (c) is made, the excess profits net income computed under section 433 (b) for any taxable year shall be increased by the excess of the amount of interest received or accrued on such obligations during such taxable year reduced (but not below zero) by the amount of interest paid or accrued during such taxable year which is not allowed as a deduction under section 23 (b) and which is properly allocable to such obligations. In the case of a taxable year ending after June 30, 1950, such interest shall further be reduced by the amount of the adjustment required under section 22 (o) (relating to the adjustment for certain bond premiums with respect to such obligations), but not by an amount greater than the amount of interest received or accrued during the taxable year on such obligations. For the purpose of determining the amount of interest received or accrued with respect to any taxable year, the term "interest" includes, in the case of obligations issued at a discount, so much of such discount as (for the purpose of determining gain upon sale or disposition) is treated as interest in the hands of the taxpayer for the taxable year.

(4) The election pursuant to section 440 (c) shall be made in a statement attached to Schedule EP (Form 1120) accompanying the income tax return for such year or by the use of figures on such schedule which clearly reflect the election. Such election must be made for each taxable year for which the benefits of section 440 (c) are claimed. If the taxpayer has failed so to elect or desires to change its election, such election or change in election may, subject to the approval of the Commissioner, be made by the taxpayer filing with the Commissioner of Internal Revenue, Washington 25, D. C., within the period of limitations for the filing of claims for credit or refund with respect to the year or years involved, a notice of its election or change in election accompanied by a recomputation of its excess profits tax for such year. If the recomputation results in an overpayment for such year, the taxpayer should file a claim for credit or refund on Form 843 in accordance with the provisions of section 322.

PAR. 15. There is inserted immediately preceding § 40.442–1 the following:

SEC. 509. ALTERNATIVE AVERAGE BASE PERIOD NET INCOME (TITLE V, REVENUE ACT OF 1951, APPROVED OCTOBER 20, 1951).

(a) *Amendment of section 442.* Section 442 (relating to abnormalities during the base period) is hereby amended as follows:

(1) By inserting at the end of subsection (a) thereof the following: "If such taxpayer is also entitled to the benefits of subsection (h), the taxpayer's average base period net income determined under this section shall be the amount computed under subsection (c) or (d), whichever is applicable to the taxpayer, or the amount computed under subsection (h), whichever results in the lesser tax under this subchapter for the taxable year. In the case of any other taxpayer entitled to the benefits of subsection (h), the taxpayer's average base period net income determined under this section shall be the amount computed under subsection (h)."

(2) By striking out "determined under this section" in subsections (c) and (d) thereof each place it occurs and inserting in lieu thereof the following: "computed under this subsection".

(3) By inserting after "subsection (c) (2)" in subsection (e) (1) thereof the following: "and subsection (h)".

(4) By redesignating subsections (h) and (i) thereof as (i) and (j), respectively, and by inserting after subsection (g) thereof the following new subsection:

(h) *Alternative average base period net income*—(1) *Eligibility requirements.* A taxpayer which commenced business on or before the first day of its base period shall be entitled to the benefits of this subsection if—

(A) The aggregate excess profits net income (if any) for the 12 months selected under paragraph (2) (B) is less than 35 per centum of one-half of the aggregate excess profits net income for the 24 months remaining under such paragraph; and

(B) Normal production, output, or operation was interrupted or diminished because of the occurrence, within 12 months preceding (i) the first day of the 12-month period selected under paragraph (2) (B) (i), or (ii) the first day of any period of 6 or more consecutive months selected under paragraph (2) (B) (ii), of events unusual or peculiar in the experience of such taxpayer.

This subsection shall have no application unless the taxpayer has an aggregate excess profits net income for the 24 months remaining under paragraph (2) (B).

(2) *Computation.* If the taxpayer is entitled to the benefits of this subsection, its average base period net income computed under this subsection shall be computed as follows:

(A) By determining under subsection (b) the period subject to adjustment under this section. For the purposes of subparagraph (B) but not for the purposes of paragraph (1) (B) such period shall be considered a period of 36 consecutive months.

(B) By selecting from such period whichever of the following 12 months results in the higher remaining aggregate excess profits net income—

(i) The 12 consecutive months the elimination of which produces the highest remaining aggregate excess profits net income, or

(ii) The 12 months which remain after retaining the 24 consecutive months which produce the highest remaining aggregate excess profits net income.

(C) By computing for each of the 12 months selected under subparagraph (B) a substitute excess profits net income computed under subsection (e).

(D) By computing the sum of—

(i) The aggregate of the substitute excess profits net income, as determined under subparagraph (C), for the 12 months selected under subparagraph (B), but the amount computed under this clause shall not exceed one-half of the aggregate excess profits net income for the 24 months remaining under subparagraph (B), and

(ii) The aggregate of the excess profits net income for each of the 24 months remaining under subparagraph (B), computed in the manner provided by the second sentence of section 435 (d) (1).

(E) By dividing by three the amount ascertained under subparagraph (D).

(3) *Aggregate excess profits net income.* The "aggregate excess profits net income" for any period shall be computed for the purposes of this subsection in the same manner as under subsection (b).

* * * * *

SEC. 510. DEFINITION OF TOTAL ASSETS FOR PURPOSES OF SECTIONS 442–446 (TITLE V, REVENUE ACT OF 1951, APPROVED OCTOBER 20, 1951).

The first sentence of section 442 (f) (relating to definition of total assets) is hereby amended to read as follows: "For the purposes of this section, the taxpayer's total assets for any day shall be determined as of the end of such day and shall be an amount equal to the excess of—

"(1) The sum of the cash and the property (other than cash, inadmissible assets, and loans to members of a controlled group as defined in section 435 (f) (4)) held by the taxpayer in good faith for the purposes of the business, over

"(2) The amount of any indebtedness (other than borrowed capital as defined in section 439 (b) (1)) to a member of a controlled group (as defined in section 435 (g) (6)) which includes the taxpayer."

SEC. 523. EFFECTIVE DATE OF TITLE V (TITLE V, REVENUE ACT OF 1951, APPROVED OCTOBER 20, 1951).

* * * the amendments made by this title (including sections 509 and 510) shall be applicable only with respect to taxable years ending after June 30, 1950.

PAR. 16. Section 40.442–1 is amended to read as follows:

§ 40.442–1 *General rule.* If a taxpayer which commenced business on or before the first day of its base period establishes that it experienced certain abnormalities (described in § 40.442–2), then such taxpayer may be entitled to use the average base period net income computed under section 442 (c) or section 442 (d), whichever is applicable. If the taxpayer is also entitled to the benefits of section 442 (h), the taxpayer's average base period net income determined under section 442 shall be the amount computed under subsection (c) or (d) of such section, whichever is applicable to the taxpayer, or the amount computed under subsection (h) of such section, whichever results in the lowest excess profits tax for the taxable year. In the case of any other taxpayer entitled to the benefits of section 442 (h), the taxpayer's average base period net income determined under section 442 shall be the amount computed under subsection (h) of such section. See §§ 40.442–3 and 40.442–4 for methods of computation. Section 442 is applicable only if the taxpayer makes application therefor in accordance with section 447 (e). For rules governing the application of section 442 in the case of an acquiring corporation, see section 462 (d), and in the case of a component corporation, see section 461 (c).

PAR. 17. Section 40.442–3 is amended by changing the paragraph (d) (1) thereof to read in part as follows:

(d) *Definitions.* * * *

(1) The term "total assets" for any day means the excess, determined as of the end of such day, of:

(i) The sum of the cash and other property (other than inadmissible assets, as defined in section 440 (a) (1), and other than loans to members of a controlled group, as defined in section 435 (f) (4)) held by the taxpayer in good faith for purposes of the business, over

(ii) The amount of any indebtedness (other than borrowed capital, as defined in section 439 (b) (1)) to a member of a controlled group, as defined in section 435 (g) (6), which includes the taxpayer.

PAR. 18. There is inserted immediately after § 40.442–3 the following new § 40.442–4:

§ 40.442–4 *Alternative average base period net income*—(a) *In general.* Section 442 (h) provides that a taxpayer which commenced business on or before the first day of its base period may use a substitute excess profits net income for 12 months (as selected under subparagraph (1) of this paragraph) of the period subject to adjustment determined under § 40.442–3, that is, the 36 months in the base period selected as having the highest aggregate excess profits net income or the lowest aggregate deficit in excess profits net income. In order to determine its eligibility for the benefits of section 442 (h), a taxpayer must first select a period of 12 months, as shown in subparagraph (1) of this paragraph and then ascertain whether the requirements set forth in subparagraphs (2), (3), and (4) of this paragraph are met.

(1) After determining under section 442 (b) and § 40.442–3 (a) the 36-month period subject to adjustment, the 12-month period is selected by determining either (i) the 12 consecutive months the elimination of which produces the highest aggregate excess profits net income or the lowest aggregate deficit in excess profits net income for the remaining 24 months, or (ii) the 12 months which remain after eliminating the 24 consecutive months which produce the highest aggregate excess profits net income or the lowest aggregate deficit in excess profits net income. For the purpose of making this selection, the 36 months previously determined under section 442 (b) and § 40.442–3 (a) shall be considered a period of 36 consecutive months.

(2) The aggregate excess profits net income, if any, computed as provided in § 40.442–3 (a) (1) for the 12 months selected under subparagraph (1) of this paragraph must be less than 35 percent of one-half of the aggregate excess profits net income so computed for the 24 months remaining after such selection.

(3) There must not be an aggregate deficit in excess profits net income for the 24 months remaining in subparagraph (1) of this paragraph.

(4) The taxpayer must show that normal production, output, or operation was interrupted or diminished because of the occurrence of events unusual or peculiar in the experience of the taxpayer (see § 40.442–2 (a)), within 12 months preceding either—

(i) The first day of the 12-month period selected under subparagraph (1) of this paragraph if 12 consecutive months are selected under subparagraph (1) of this paragraph, or

(ii) If the 12 months selected under subparagraph (1) of this paragraph are not consecutive, the first day of any period of 6 or more consecutive months in such 12 months.

(b) *Computation.* If the taxpayer is entitled to the benefits of section 442 (h) under the rules of paragraph (a) of this section, its average base period net income under section 442 (h) shall be computed as follows:

(1) A substitute excess profits net income is determined for each of the 12 months selected under paragraph (a) (1) of this section. Such substitute excess profits net income is computed under section 442 (e) for each such month by determining the taxpayer's total assets (determined under section 442 (f) and under § 40.442–3 (d)) for the last day of the taxable year in which such month falls, or for the last day of the taxpayer's last taxable year ending before July 1, 1950, whichever day is earlier, and by multiplying such total assets by the appropriate industry base period yearly rate of return determined under section 447 for the base period year in which such month falls. See section 442 (e) (2) for special rules in case of fiscal years. Under section 442 (g), the appropriate industry classification under section 447 is the classification to which is attributable the largest amount of the taxpayer's gross receipts for the taxable year within which falls the last month for which a substitute excess profits net income is determined.

(2) The amount determined under subparagraph (1) of this paragraph is reduced by the total interest paid or incurred by the taxpayer for the 12 months beginning with the first day of the taxable year within which such month falls.

(3) The amount determined under subparagraph (1) of this paragraph and reduced under subparagraph (2) of this paragraph is divided by 12. The amount so computed is the substitute excess profits net income for the month.

(4) The sum of the following amounts is computed:

(i) The aggregate of the amounts determined under subparagraph (3) of this paragraph but such aggregate shall not exceed one-half of the aggregate excess profits net income computed in the manner provided in §40.442–3 (a) (1) for the 24 months remaining in paragraph (a) (1) of this section, and

(ii) The aggregate of the excess profits net income for each of the 24 months remaining in paragraph (a) (1) of this section, but computed by dividing the excess profits net income for the taxable year in which each such month falls by the number of full calendar months in such taxable year, and raising any deficits in excess profits net income to zero.

(5) The amount determined under subparagraph (4) of this paragraph is divided by 3.

(c) For special rules applicable to section 442 (h) and to this section, see § 40.442–3 (d) and (e).

PAR. 19. There is inserted immediately preceding § 40.443–1 the following:

SEC. 511. AVERAGE BASE PERIOD NET INCOME—CHANGE IN PRODUCTS OR SERVICES (TITLE V, REVENUE ACT OF 1951, APPROVED OCTOBER 20, 1951).

Section 443 (f) (relating to change in products or services) is hereby amended to read as follows:

(f) *Rules for application of section.* (1) The benefits of this section shall not be allowed unless the taxpayer makes application therefor in accordance with section 447 (e).

(2) If after the end of the base period of the taxpayer there was a substantial change in the products produced by the taxpayer, such change shall, for the purpose of subsection (a) (1), be considered to have occurred on the last day of its base period if the taxpayer prior to July 1, 1950, commenced the construction of the facilities for the production of such new product, and if such construction and the production of such new product is in furtherance of a course of action to which the taxpayer (or a corporation with which the taxpayer has the privilege under section 141 of filing a consolidated return for its first taxable year under this subchapter) was committed prior to the close of the base period by contract with another person, which contract granted a license, franchise, or similar right essential for the production of such new product.

SEC. 523. EFFECTIVE DATE OF TITLE V (TITLE V, REVENUE ACT OF 1951, APPROVED OCTOBER 20, 1951).

* * * the amendments made by this title (including section 511) shall be applicable only with respect to taxable years ending after June 30, 1950.

PAR. 20. Section 40.443–2 is amended by adding at the end thereof the following paragraph (d):

(d) *Commitment rule.* (1) If after the base period of the taxpayer there was a substantial change in the products produced by the taxpayer, such change shall, for the purpose of section 443 (a) (1) and § 40.443–1 (a) (1), be considered to have occurred on the last day of its base period if—

(i) The taxpayer prior to July 1, 1950, commenced construction of the facilities for the production of such new product, and

(ii) Such construction and the production of such new product is in furtherance of a course of action to which the taxpayer has the privilege under section 141 of filing a consolidated return for its first taxable year ending after June 30, 1950) was committed prior to the close of the base period by contract with another person, which contract granted a license, franchise, or similar right essential for the production of such new product.

(2) The contract referred to in subparagraph (1) (ii) of this paragraph must be in writing. It must have been executed prior to the end of the base period of the corporation to which the license, franchise, or similar right essential for the production of the new product were by its terms granted. The corporation granted such license, franchise, or similar right to produce the new product may have been either the taxpayer or any corporation with which the taxpayer has the privilege of filing a consolidated return for the taxpayer's first taxable year ending after June 30, 1950.

PAR. 21. There is inserted immediately preceding § 40.444–1 the following:

SEC. 520. INCREASE IN CAPACITY FOR PRODUCTION OR OPERATION (TITLE V, REVENUE ACT OF 1951, APPROVED OCTOBER 20, 1951).

Section 444 (f) (relating to increase in capacity for production or operation) is hereby amended to read as follows:

(f) *Rules for application of section.* (1) The benefits of this section shall not be allowed unless the taxpayer makes application therefor in accordance with section 447 (e).

(2) If, during its first taxable year ending after June 30, 1950, the taxpayer completed construction of (including the installation of the machinery or equipment for use in) a factory building or other manufacturing establishment, such factory building or other manufacturing establishment and such machinery or equipment shall, for the purpose of determining whether there is an increase in capacity under the provisions of subsection (b), be considered to have been added to its total facilities on the last day of its base period if—

(A) The taxpayer, prior to the end of its base period, had completed construction work representing more than 40 per centum of the total cost of construction of such factory building or other manufacturing establishment, and

(B) The completion of such factory building or other manufacturing establishment was in pursuance of a plan to which the taxpayer was committed prior to the end of its base period.

This paragraph shall not apply in determining the amount of the taxpayer's total assets for the purpose of subsection (c).

SEC. 523. EFFECTIVE DATE OF TITLE V (TITLE V, REVENUE ACT OF 1951, APPROVED OCTOBER 20 1951).

* * * the amendments made by this title (including section 520) shall be applicable only with respect to taxable years ending after June 30, 1950.

PAR. 22. Section 40.444–2 is amended by adding at the end thereof the following paragraph (c):

(c) *Commitment rule.* (1) If during its first taxable year ending after June 30, 1950, the taxpayer completed construction of (including installation of the machinery or equipment for use in) a factory building or other manufacturing establishment, then section 444 (b) (2) provides that such factory building or other manufacturing establishment and such machinery or equipment shall, for the purpose of determining whether there is an increase in capacity under the provisions of section 444 (b) and this section, be considered to have been added to its total facilities on the last day of its base period if:

(i) The taxpayer, prior to the end of its base period, had completed construction work representing more than 40 percent of the total cost of construction of such factory building or other manufacturing establishment, and

(ii) The completion of such factory building or other manufacturing establishment was in pursuance of a plan to which the taxpayer was committed prior to the end of its base period.

(2) Section 444 (f) (2) does not apply in determining the amount of the taxpayer's total assets for the purpose of § 444 (c) and § 40.444–3.

(3) Section 444 (f) (2) is applicable only in the case of a separate manufacturing plant, the construction of which (including installation of machinery and equipment for use therein) is completed by the taxpayer during its first taxable year ending after June 30, 1950. The section is not applicable, for example, to: additions made to plants in existence at the end of the taxpayer's base period; a factory or other manufacturing establishment acquired other than through construction, such as through purchase; machinery and equipment installed in a factory building or manufacturing establishment existing at the end of the taxpayer's base period.

(4) A legally binding form of commitment is not required; any substantial change in position prior to the end of the taxpayer's base period unequivocally establishing the intent of the taxpayer to complete the construction of such factory building or other manufacturing establishment after the end of its base period, will be taken as sufficient proof that the actual completion of the construction of such factory or other manufacturing establishment during the taxpayer's first taxable year ending after June 30, 1950, was in pursuance of a plan to which the taxpayer was committed prior to the end of its base period.

(5) For the purpose of section 444 (f) (2), the term "other manufacturing establishment" means a production structure, other than a factory building, such as an oil refinery.

PAR. 23. There is inserted immediately preceding § 40.445–1 the following:

SEC. 512. AVERAGE BASE PERIOD NET INCOME—NEW CORPORATION (TITLE V REVENUE ACT OF 1951, APPROVED OCTOBER 20, 1951).

Section 445 (c) (relating to total assets for first three years of new corporation) is

hereby amended by adding at the end thereof the following new sentence: "For the purpose of this subsection, the net capital addition or reduction shall be computed without regard to the limitation to 75 per centum provided in section 435 (g) (3) (C) and section 435 (g) (4) (C) and (E)."

SEC. 523. EFFECTIVE DATE OF TITLE V (TITLE V, NEW CORPORATION (TITLE V, REVENUE ACT OF 1951).

* * * the amendments made by this title (including section 512) shall be applicable only with respect to taxable years ending after June 30, 1950.

PAR. 24. Section 40.445–2 is amended by inserting at the end of paragraph (d) (1) thereof the following sentence: "For the purpose of this paragraph, the net capital addition or reduction shall be computed without regard to the limitation to 75 percent provided in section 435 (g) (3) (C), relating to an increase in borrowed capital, and section 435 (g) (4) (C) and (E), relating to a decrease in borrowed capital and an increase in loans to members of a controlled group of corporations of which the taxpayer is a member."

PAR. 25. There is inserted immediately preceding § 40.450–1 the following:

SEC. 522. STATEGIC MINERALS (TITLE V, REVENUE ACT OF 1951, APPROVED OCTOBER 20, 1951).

Section 450 (b) (1) (relating to corporations engaged in mining of strategic minerals) is hereby amended by inserting after "chromite," the following: "bauxite,".

SEC. 523. EFFECTIVE DATE OF TITLE V (TITLE V, REVENUE ACT OF 1951, APPROVED OCTOBER 20, 1951).

* * * the amendments made by this title (including section 522) shall be applicable only with respect to taxable years ending after June 30, 1950.

PAR. 26. Section 40.453–2 is amended as follows:

(A) By striking the second sentence from paragraph (c) (5) of such section and by inserting in lieu thereof the following: "The mineral units or timber units of a lessor for the taxable year shall be computed in the same manner as in the case of a producer, except that:

(i) In the case of a lessor of a timber block, and

(ii) In computing nontaxable income from exempt excess output for taxable years ending after December 31, 1950, in the case of a lessor of a coal property,

there shall not be included in the timber or coal units for such year any timber or coal which has been disposed of by the lessor and which is considered to have been sold under the provisions of section 117 (k) (2)."

(B) By adding at the end of paragraph (k) (1) of such section the following:

In computing nontaxable income from exempt excess output for taxable years ending after December 31, 1950, in the case of a lessor of a coal property the estimated recoverable units shall be determined without regard to coal which has been disposed of by the lessor and which is considered to have been sold under the provisions of section 117 (k) (2).

(C) By adding at the end of (m) (14) of such section the following: "In the case of a lessor of a timber block, and for taxable years ending after December 31, 1950, in the case of a lessor of a coal mining property, there shall not be included in the timber units or coal units to be used in the computation of unit net income any timber or coal which has been disposed of by the lessor and which is considered to have been sold under the provisions of section 117 (k) (2)."

DEPARTMENT OF AGRICULTURE

Production and Marketing Administration

[P. & S. Docket No. 402]

MARKET AGENCIES AT UNION STOCK YARDS, CHICAGO, ILL.

NOTICE OF PETITION FOR MODIFICATION OF RATE ORDER

Pursuant to the provisions of the Packers and Stockyards Act, 1921, as amended (7 U. S. C. 181 et seq.), an order was issued on November 8, 1951 (10 A. D. 1410), authorizing respondents to assess the rates and charges currently in effect. That order is due to expire on November 14, 1952, unless modified or extended before that date.

On September 15, 1952, respondents filed a petition requesting that the order of November 8, 1951, be continued in effect for a period of one year. On September 30, 1952, respondents amended their petition by requesting authority to cancel Item D–1, section D, Buying Service Charges, of their current schedule of rates and charges and to eliminate the word "slaughter" from Item D–2. If authorized, the modified section of respondents' schedule of rates and charges would read as follows:

SECTION D

BUYING SERVICE CHARGES

When live stock bought by the purchaser himself is paid for, billed out, or any assistance rendered by a member of The Chicago Live Stock Exchange, or his employee or employees, the transaction shall be deemed a service rendered and the regular buying charge assessed.

The modification, if authorized, will produce additional revenue for the respondent market agencies and increase the cost of marketing livestock. It appears, therefore, that this public notice of the filing of the petition, as amended, and its contents should be given in order that all interested persons may have an opportunity to be heard in the matter.

All interested persons who desire to be heard in the matter shall notify the Hearing Clerk, United States Department of Agriculture, Washington 25, D. C., within 15 days after the publication of this notice.

Done at Washington, D. C., this 13th day of October 1952.

[SEAL] AGNES B. CLARKE, *Hearing Clerk.*

SECURITIES AND EXCHANGE COMMISSION

[17 CFR Parts 240, 249]

GENERAL RULES AND REGULATIONS AND FORMS UNDER SECURITIES EXCHANGE ACT OF 1934

QUARTERLY REPORTS

Notice is hereby given that the Securities and Exchange Commission has under consideration a proposal to revise Form 9–K (§ 249.309), the form for quarterly reports, and §§ 240.13a–13 and 240.15d–13 (Rules X–13A–13 and X–15D–13), the rules relating to the filing of such reports, under the Securities Exchange Act of 1934.

The proposal would substitute for the present obligation of filing quarterly reports of gross sales and operating revenues a requirement for the filing after the close of each fiscal quarter of a report containing a profit and loss statement and a related statement of earned surplus for the quarter and for the current fiscal year through the close of such quarter. Such statements would be prepared in accordance with Regulation S–X (Part 210) but would not have to be certified, and it would not be necessary to file the schedules prescribed by that regulation. Provision would also be made to permit incorporation by reference to the extent practicable of notes to financial statements in annual reports filed pursuant to sections 13 and 15 (d) of the act and to incorporate by reference financial statements contained in any proxy statement or quarterly report to stockholders.

The rules relating to the filing of quarterly reports would be amended to provide that such reports need not be filed for the fourth or final quarter of any fiscal year. Those commercial and industrial companies in the promotional or development stage and those mining companies not in the production stage to which paragraph (b) or (c) of § 210.5a–01 (Rule 5A–01 of Regulation S–X) are applicable would not be required to file quarterly reports. To accomplish this, paragraphs (a) and (c) of § 240.13a–13 (Rule X–13A–13) and paragraphs (a) and (c) of § 240.15d–13 (Rule X–15D–13) would be amended in the following manner:

§ 240.13a–13 *Quarterly reports of other companies.* (a) Every issuer which has securities listed and registered on a national securities exchange and which is required to file annual reports on Form 10–K (§ 249.310 of this chapter) or U5S (§ 259.5s of this chapter) or to file a report on one of such forms as Part II of Form 16–K (§ 249.316 of this chapter), shall file quarterly reports on Form 9–K (§ 249.309 of this chapter). A quarterly report on that form shall be filed for each fiscal quarter ending after the close of the latest fiscal year for which financial statements were filed in the issuer's application for registration, except that no such report need be filed for the fourth or final quarter of any fiscal year.

* * * * *

(c) This section shall not apply to any bank, bank holding company, insurance company (other than title insurance companies), investment company, common carrier, public utility company, any company primarily engaged in the production and sale of a seasonal single-crop agricultural commodity, any commercial or industrial company in the promotional or development stage to which paragraph (b) of § 240.5a–01 (Rule 5A–01 of Article 5A of Regulation S–X) is applicable, or any mining company to which paragraph (c) of said § 240.5a–01 (Rule 5A–01) is applicable.

§ 240.15d–13 *Quarterly reports of other companies.* (a) Every issuer which is required to file annual reports on Form 10–K (§ 249.310 of this chapter) or U5S (§ 259.5s of this chapter) shall file quarterly reports on Form 9–K (§ 249.309 of this chapter). A quarterly report on that form shall be filed for each fiscal quarter ending after the close of the latest fiscal year for which financial statements were included in the issuer's registration statement, except that no such report need be filed for the fourth or final quarter of any fiscal year.

* * * * *

(c) This section does not apply to foreign governments or political subdivisions thereof; foreign private issuers other than Canadian, Cuban, Mexican or Philippine issuers; issuers of American certificates against foreign issues; or to any bank, bank holding company, insurance company (other than title insurance companies), investment company, common carrier, public utility company, any company primarily engaged in the production and sale of a seasonal single-crop agricultural commodity, any commercial or industrial company in the promotional or development stage to which paragraph (b) of § 240.5a–01 (Rule 5A–01 of Article 5A of Regulation S–X) is applicable, or any mining company to which paragraph (c) of said § 240.5a–01 (Rule 5A–01) is applicable.

A copy of the proposed Form 9–K is attached hereto.[1]

All interested persons are invited to submit data, views and comments on the above-mentioned proposal in writing to the Securities and Exchange Commission, 425 Second Street NW., Washington 25, D. C., on or before November 10, 1952.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

OCTOBER 10, 1952.

[F. R. Doc. 52–11314; Filed, Oct. 17, 1952; 8:50 a. m.]

NOTICES

DEPARTMENT OF THE INTERIOR

Bureau of Reclamation

CARLSBAD PROJECT, NEW MEXICO

ORDER OF REVOCATION

JULY 3, 1952.

Pursuant to the authority delegated by Departmental Order No. 2515 of April 7, 1949 (14 F. R. 1937), I hereby revoke Departmental Order of May 25, 1928, insofar as said order affects the following described lands: *Provided, however,* That such revocation shall not affect the withdrawal of any other lands by said order or affect any other orders withdrawing or reserving the lands hereinafter described:

EDDY COUNTY, NEW MEXICO

T. 21 S., R. 27 E., N. M. P. M.
Sec. 19, N½NW¼, SE¼NW¼, N½NE¼, SW¼NE¼.

The above aggregates approximately 240 acres.

G. W. LINEWEAVER, *Acting Commissioner.*

I concur. The records of the Bureau of Land Management will be noted accordingly.

The W½NW¼NW¼, N½NE¼, SW¼NE¼ sec. 19 are chiefly valuable for grazing. The remaining lands are covered by rubbish and contain two abandoned gravel pits. While any application that is filed will be considered on its merits, it is unlikely that any substantial part of the restored (or opened) lands will be classified for any use other than as shown.

This order shall not otherwise become effective to change the status of such lands until 10:00 a. m. on the 35th day after the date of this order. At that time the said lands shall, subject to valid existing rights and the provisions of existing withdrawals, become subject to application, petition, location, and selection as follows:

(a) *Ninety-one day period for preference-right filings.* For a period of 91 days, commencing at the hour and on the day specified above, the public lands affected by this order shall be subject only to (1) application under the homestead or the desert-land laws or the Small Tract Act of June 1, 1938, 52 Stat. 609 (43 U. S. C. 682a), as amended, by qualified veterans of World War II and other qualified persons entitled to preference under the act of September 27, 1944, 58 Stat. 747 (43 U. S. C. 279–284), as amended, subject to the requirements of applicable law, and (2) application under any applicable public-land law, based on prior existing valid settlement rights and preference rights conferred by existing laws or equitable claims subject to allowance and confirmation. Applications under subdivision (1) of this paragraph shall be subject to applications and claims of the classes described in subdivision (2) of this paragraph. All applications filed under this paragraph either at or before 10:00 a. m. on the 35th day after the date of this order shall be treated as though filed simultaneously at that time. All applications filed under this paragraph after 10:00 a. m. on the said 35th day shall be considered in the order of filing.

(b) *Date for non-preference-right filings.* Commencing at 10:00 a. m. on the 126th day after the date of this order, any lands remaining unappropriated shall become subject to such application, petition, location, selection, or other appropriation by the public generally as may be authorized by the public-land laws. All such applications filed either at or before 10:00 a. m. on the 126th day after the date of this order, shall be treated as though filed simultaneously at the hour specified on such 126th day. All applications filed thereafter shall be considered in the order of filing.

A veteran shall accompany his application with a complete photostatic, or other copy (both sides), of his certificate of honorable discharge, or of an official document of his branch of the service which shows clearly his honorable discharge as defined in § 181.35 of Title 43 of the Code of Federal Regulations, or constitutes evidence of other facts upon which the claim for preference is based and which shows clearly the period of service. Other persons claiming credit for service of veterans must furnish like proof in support of their claims. Persons asserting preference rights, through settlement or otherwise, and those having equitable claims, shall accompany their applications by duly corroborated statements in support thereof, setting forth in detail all facts relevant to their claims.

Applications for these lands, which shall be filed in Land and Survey Office, Santa Fe, New Mexico, shall be acted upon in accordance with the regulations contained in § 295.8 of Title 43 of the Code of Federal Regulations and Part 296 of that title, to the extent that such regulations are applicable. Applications under the homestead laws shall be governed by the regulations contained in Parts 166 to 170, inclusive, of Title 43 of the Code of Federal Regulations, and applications under the desert-land laws and the said Small Tract Act of June 1, 1938, shall be governed by the regulations contained in Parts 232 and 257, respectively, of that title.

Inquiries concerning these lands shall be addressed to the Manager, Land and Survey Office, Santa Fe, New Mexico.

WILLIAM PINCUS, *Assistant Director, Bureau of Land Management.*

OCTOBER 14, 1952.

Petroleum Administration for Defense

CONNECTICUT

NOTICE OF CERTIFICATION REGARDING RESTRICTION OF USE OF NATURAL GAS

Take notice that the Public Utilities Commission of the State of Connecticut has certified to the President that it has authority to restrict the use of natural gas and is exercising that authority to the extent necessary to accomplish the objectives of the Defense Production Act of 1950. As the result of the above-described certification, and pursuant to section 704 Defense Production Act of 1950, as amended, the restrictions imposed by section 3, PAD Order No. 2, August 14, 1951, 16 F. R. 8111, revised August 22, 1952, 17 F. R. 7786, are hereafter inapplicable in the State of Connecticut.

J. ED. WARREN,
Deputy Administrator, Petroleum Administration for Defense.

Civil Aeronautics Administration

[Amdt. 11]

ORGANIZATION AND FUNCTIONS

CHANGES IN FUNCTIONS AND ADDRESSES FOR AIR ROUTE TRAFFIC CONTROL CENTERS, AIRPORT TRAFFIC CONTROL TOWERS, INTERSTATE AIRWAY COMMUNICATIONS STATIONS AND OVERSEAS FOREIGN AERONAUTICAL COMMUNICATIONS STATIONS

In accordance with the public information requirements of the Administrative Procedure Act, the description of Organization and Functions of the Civil Aeronautics Administration is hereby amended. The purpose of this amendment is to publish changes as described in the caption.

Section 43 (e) (3) (i), third paragraph, is revised to read:

These centers are manned by Airways Operations Specialists (Air Route). These Specialists are responsible for the safe and orderly flow of air traffic being navigated under instrument flight conditions on the air routes within the control areas assigned to the center. Their principal functions are:

Section 43 (e) (3) (ii), *Region 1*, is amended by substituting "Boston Air Route Traffic Control Center, 287 Marginal Street, East Boston, Mass." for "Boston Air Route Traffic Control Center, Logan Airport, Boston, Mass."

Section 43 (e) (3) (ii), *Region 2*, is amended by (1) substituting "Jacksonville Air Route Traffic Control Center, Imeson Airport, Jacksonville, Fla." for "Jacksonville Air Route Traffic Control Center, Municipal Airport, Jacksonville, Fla."; (2) substituting "Memphis Air Route Traffic Control Center, 1503 Union Ave., Room 207, Memphis, Tenn.," for "Memphis Air Route Traffic Control Center, 1503 Union Ave., Room 203, Memphis, Tenn."; (3) substituting "San Juan Air Route Traffic Control Center, Isla Grande Airport, Santurce, P. R." for "San Juan Air Route Traffic Control Center, Isla Grande Airport, Santurce, P. R."

Section 43 (e) (3) (ii), *Region 4*, is amended by (1) substituting "Fort Worth Air Route Traffic Control Center, Building No. 3, CAA Reservation, Haslet Road, Fort Worth, Texas" for "Fort Worth Air Route Traffic Control Center, Majestic Building, 1101–1107 Commerce Street, Fort Worth, Texas"; (2) substituting "New Orleans Air Route Traffic Control Center, Administration Building, Municipal Airport, New Orleans, La." for "New Orleans Air Route Traffic Control Center, Federal Land Bank Building, 860 St. Charles Avenue, New Orleans 7, La."

Section 43 (e) (3) (ii), *Region 9*, is amended by deleting "Midway Island Air Route Traffic Control Center, Sand Island Airport, Midway Island."

Section 43 (e) (4) (i) is revised to read:

(i) *Functions.* Airport traffic control towers are operated by the Civil Aeronautics Administration at certain designated airports listed below. They are responsible for safe, orderly, and expeditious flow of air traffic in the vicinity of an airport, and movement of aircraft and vehicles on the airport.

The functions of a majority of these towers have been expanded to include the responsibility for controlling and providing separation between aircraft in the terminal area which are holding or arriving and departing under instrument flight rules. This is termed "Approach Control Service". At such locations, the responsibility for controlling instrument flight rule traffic has been delegated to the tower by an Air Route Traffic Control Center. The purpose of this delegation is to expedite arrivals and departures by means of direct voice communications between the pilot and the approach controller, and by use of special holding approach, and departure procedures.

These towers are manned by Airways Operations Specialists (Airport), who are responsible for the safe and orderly flow of air traffic in the vicinity of the airport. Their principal functions are:

To issue instructions to pilots for taxiing, take-off, approach for landing, and landing of aircraft.

To inform pilots regarding field and weather conditions, air navigational facilities, emergency landing areas, restrictions to flight, regulations, and other matters which may be of assistance to the pilot.

To relay messages between pilots, airline operations offices, Air Route Traffic Control Centers, Weather Bureau offices, Communications Stations and other appropriate agencies concerning the operation, dispatch, and control of aircraft.

To invoke emergency procedures when any emergency occurs or appears likely to occur to aircraft under tower control.

When equipped with airport surveillance and precision approach radar, to monitor aircraft arriving and departing from an airport on instruments, and, in an emergency or upon request, issuing ground controlled approach instructions (GCA) for a let-down.

At a number of locations, the operation of an Interstate Airway Communications Station as a separate unit is discontinued. Several of its functions are transferred to the control tower and the facility is established as a combined Tower/Station. These facilities provide the same service as described above and, in addition, the following functions are performed:

Maintains continuous multiple listening watches on designated aeronautical radio frequencies for the purpose of conducting communications with en route aircraft. Furnishes flight advisory and emergency services generally within a radius of 100 to 150 miles of the facility. Furnishes emergency navigation assistance to pilots unable to establish their position. Accepts and transmits flight plans and associated progress and arrival reports and alerts appropriate Search and Rescue organizations when flights are not successfully concluded. Broadcasts pertinent information relative to condition of landing areas, air navigation facilities, and aeronautical weather on scheduled and unscheduled basis as required. Monitors federally operated electronic and visual air navigation aids, receives reports of irregularities of non-federal aids, and publicizes operating irregularities when safety is impaired.

Section 43 (e) (4) (ii) is amended by deleting the "Note" and substituting the following:

NOTE: All towers and combined tower stations are authorized to exercise approach control except those locations marked by an asterisk (*). The symbol (≠) indicates a combined tower/station.

Section 43 (e) (4) (ii), *Region 1*, is amended by (1) deleting the asterisk (*) at all locations, (2) adding asterisk (*) to Baltimore, Md., Harbor Airport, (3) substituting Bedford, Mass., Hanscom Airport, for Bedford, Mass., Boston Bedford Airport, (4) adding ≠Binghamton, N. Y. Broome County Airport, (5) adding asterisk (*) to Bridgeport, Conn., Municipal Airport, (6) adding symbol (≠) to Harrisburg, Pa., State Airport, (7) adding symbol (≠) to Lynchburg, Va., Preston Glenn Airport, (8) adding asterisk (*) to Niagara Falls, N. Y., Municipal Airport, (9) adding symbol (≠) to Norfolk, Va., Municipal Airport, (10) adding Pittsburgh, Pa., Greater Pittsburgh Airport, (11) adding symbol (≠) to Portland, Maine, Municipal Airport, (12) deleting Presque Isle, Maine, Presque Isle Municipal Airport, (13) adding symbol (≠) to Roanoke, Va., Woodrum Field, (14) adding asterisk (*) to Teterboro, N. J., Teterboro Airport, (15) adding asterisk (*) to Westfield, Mass., Barnes Airport.

Section 43 (e) (4) (ii), *Region 2*, is amended by (1) deleting the asterisk (*) at all locations, (2) adding asterisk (*) to Asheville, N. C., Asheville-Hendersonville, Airport, (3) adding symbol (≠) to Augusta, Ga., Bush Field, (4) adding symbol (≠) to Chattanooga, Tenn., Lovell Field, (5) substituting ≠Columbia, S. C., Columbia Airport, for Columbia, S. C., Capital Airport, (6) adding symbol (≠) to Jackson, Miss., Hawkins Field, (7) substituting Orlando, Fla., Municipal Airport, for Orlando, Fla., Municipal No. 1 Airport, (8) substituting ≠Spartanburg, S. C., Memorial Airport, for Spartanburg, S. C., Municipal Airport, (9) substituting Tallahassee, Fla., Dale Mabry Field, for Tallahassee, Fla., Dale Mabry Airport, (10), adding symbol (≠) to Wilmington, N. C., New Hanover County Airport.

Section 43 (e) (4) (ii), *Region 3*, is amended by (1) deleting the asterisk (*) at all locations, (2) adding asterisk (*) to Akron, Ohio, Municipal Airport, (3) substituting Cincinnati, Ohio, Greater Cincinnati Airport, for Cincinnati, Ky., Greater Cincinnati Airport, (4) adding asterisk (*) to Detroit, Mich., Wayne County Airport, (5) adding ≠Duluth, Minn., Municipal Airport, (6) substituting Evansville, Ind., Dress Memorial Airport, for Evansville, Ind., Municipal Airport, (7) adding asterisk (*) to Louisville, Ky., Bowman Field, (8) adding symbol (≠) and asterisk (*) to Peoria, Ill., Greater Peoria Airport.

Section 43 (e) (4) (ii), *Region 4*, is amended by (1) deleting the asterisk (*) at all locations, (2) adding symbol (≠) to Abilene, Tex., Abilene Municipal No. 2 Airport, (3) deleting Big Spring, Tex., Municipal Airport, (4) adding symbol (≠) to Brownsville, Tex., Rio Grande International Airport, (5) adding symbol (≠) to Little Rock, Ark., Adams Field, (6) adding asterisk (*) to San Antonio, Tex., Stinson Field, (7) adding symbol (≠) to Shreveport, La., Municipal Airport, (8) adding symbol (≠) to Tulsa, Okla., Municipal Airport, (9) adding ≠Waco, Tex., Municipal Airport.

Section 43 (e) (4) (ii), *Region 5*, is amended by (1) deleting the asterisk (*) at all locations, (2) adding symbol (≠) to Colorado Springs, Colo., Peterson Field, (3) adding asterisk (*) to Kansas City, Kans., Fairfax Airport, (4) adding symbol (≠) to Lincoln, Nebr., Municipal Airport, (5) adding symbol (≠) to Topeka, Kans., Phillip Billard Field

Section 43 (e) (4) (ii), *Region 6*, is amended by (1) deleting the asterisk (*) at all locations, (2) adding asterisk (*) to Bakersfield, Calif., Kern County Airport, (3) adding asterisk (*) to Fresno, Calif., Fresno Air Terminal, (4) adding symbol (≠) to Las Vegas, Nev., McCarran Field, (5) deleting Ogden, Utah, Municipal Airport, (6) adding *Palmdale, Calif., Los Angeles County, Palmdale Airport, (7) adding symbol (≠) to Reno, Nev., United Airlines Airport, (8) adding asterisk (*) to Santa Monica, Calif., Santa Monica Municipal Airport, (9) substituting Van Nuys, Calif., San Fernando Valley Airport, for Los Angeles, Calif., San Fernando Valley Airport.

Section 43 (e) (4) (ii), *Region 7*, is amended by (1) deleting the asterisk (*) at all locations, (2) adding symbol (≠) and asterisk (*) to Helena, Mont., Municipal Airport, (3) adding symbol (≠) and asterisk (*) to Pocatello, Idaho, Phillips Field, (4) adding asterisk (*) to Salem, Ore., McNary Field, (5) adding asterisk (*) to Seattle, Wash., Boeing Field, (6) adding asterisk (*) to Yakima, Wash., Municipal Airport.

Section 43 (e) (4) (ii), *Region 8*, is amended by (1) deleting the asterisk (*) at all locations, (2) adding *Anchorage, Alaska, International Airport, (3) adding asterisk (*) to Fairbanks, Alaska, Weeks Field.

Section 43 (e) (4) (ii), *Region 9*, is amended by (1) deleting the asterisk (*) at all locations, (2) deleting Midway Island, San Island Field.

Section 43 (e) (5) (i), first paragraph, last sentence, is revised to read: "These stations are staffed by Airways Operations Specialists (Communications) whose principal functions are as follows:"

Section 43 (e) (5) (ii), *Region 1*, is amended by (1) substituting "Allentown, Pa., Allentown-Bethlehem-Eastern Airport" for "Allentown, Pa., Bethlehem-Easton Airport"; (2) substituting "Boston, Mass., 287 Marginal Street, East Boston, Mass." for "Boston, Mass., Immigration and Naturalization Building"; (3) deleting Harrisburg, Pa., State Airport; (4) deleting Lynchburg, Va., Preston Glenn Airport; (5) substituting "Martinsburg, W. Va., Municipal Airport" for "Martinsburg, W. Va., Blair County Airport", (6) substituting "Montpelier, Vt., Barre-Montpelier Airport" for "Montpelier, Vt., Barre Airport"; (7) deleting Norfolk, Va., Municipal Airport; (8) deleting Portland, Maine, Municipal Airport; (9) deleting Roanoke, Va., Woodrum Field; (10) deleting Westfield, Mass., Barnes Airport; (11) substituting "Wilkes-Barre, Pa., Wilkes-Barre-Scranton Airport" for "Wilkes-Barre, Pa., Scranton Airport."

Section 43 (e) (5) (ii), *Region 2*, is amended by (1) substituting "Asheville, N. C., Asheville-Hendersonville Airport" for "Asheville, N. C., Hendersonville Airport"; (2) deleting Augusta, Ga., Bush Airport; (3) substituting "Brunswick, Ga., McKinnon Airport" for "Brunswick, Ga., Malcom-McKinnon Airport"; (4) deleting Chattanooga, Tenn., Lovell Airport; (5) deleting Columbia, S. C., Municipal Airport; (6) adding Columbus, Ga., Muscogee County Airport; (7) substituting "Crestview, Fla., Sikes Field" for "Crestview, Fla., Municipal Airport"; (8) substituting "Fort Myers, Fla., Page Field" for "Fort Myers, Fla., Page Airport"; (9) deleting Jackson, Miss., Hawkins Airport; (10) substituting "LaGrange, Ga., Callaway Airport" for "LaGrange, Ga., Colloway Airport"; (11) substituting "Macon, Ga., Cochran Field" for "Macon, Ga., Municipal Airport"; (12) substituting "McComb, Miss., McComb-Pike County Airport" for "McComb, Miss., Pike County Airport"; (13) substituting "Melbourne, Fla., Melbourne-Eau Gallie Airport" for "Melbourne, Fla., Municipal Airport"; (14) substituting "Mobile, Ala., Bates Field" for "Mobile, Ala., Bates Airport"; (15) substituting "Nashville, Tenn., Berry Field" for "Nashville, Tenn., Berry Airport"; (16) substituting "New Bern, N. C., Simmons-Nott Airport" for "New Bern, N. C., Simons Airport"; (17) substituting "Orlando, Fla., Municipal Airport" for "Orlando, Fla., Municipal No. 1 Airport"; (18) substituting "Smithville, Tenn., Municipal Airport" for "Smithville, Tenn., CAA Intermediate Field"; (19) deleting Spartanburg, S. C., Municipal Airport; (20) substituting "Tallahassee, Fla., Dale Mabry Field" for "Tallahassee, Fla., Dale Mabry Airport"; (21) substituting "Tuscaloosa, Ala., Van de Graaf Airport" for "Tuscaloosa, Ala., Van de Gross Airport"; (22) deleting Wilmington, N. C., New Hanover Airport.

Section 43 (e) (5) (ii), *Region 3*, is amended by (1) substituting "Bradford, Ill., Bradford Airport" for "Bradford, Ill., CAA Intermediate Field"; (2) substituting "Corbin, Ky." for "Corbin, Ky., London-Corbin Airport"; (3) deleting Duluth, Minn., Municipal Airport; (4) deleting Effingham, Ill., CAA Intermediate Field; (5) substituting "Evansville, Ind., Dress Memorial Airport" for "Evansville, Ill., Municipal Airport"; (6) substituting "LaCrosse, Wis." for "LaCrosse, Wis., Municipal Airport"; (7) deleting Peoria, Ill., Municipal Airport; (8) substituting "Rockford, Ill., Greater Rockford Airport" for "Rockford, Ill., Machesney Airport"; (9) adding Vandalia, Ill., Vandalia Municipal Airport.

Section 43 (e) (5) (ii), *Region 4*, is amended by (1) deleting Abilene, Texas, Municipal No. 2 Airport; (2) deleting Big Spring, Texas, Municipal Airport; (3) deleting Brownsville, Texas, International Airport; (4) deleting Bryan, Texas, Bryan Air Force Base; (5) adding College Station, Texas, Easterwood Field; (6) deleting Hot Springs, New Mex., Municipal Airport; (7) deleting Little Rock, Ark., Adams Airport; (8) substituting "Otto, New Mex., CAA Intermediate Field" for "Otto, New Mex., International Field"; (9) deleting Shreveport, La., Municipal Airport; (10) adding Truth or Consequences, New Mex., Municipal Airport; (11) deleting Tulsa, Okla., Municipal Airport; (12) deleting Waco, Texas, Municipal Airport.

Section 43 (e) (5) (ii), *Region 5*, is amended by (1) deleting Anthony, Kansas, Municipal Airport; (2) deleting Atlantic, Iowa, Municipal Airport; (3) deleting Chillicothe, Mo., Municipal Airport; (4) deleting Colorado Springs, Colo., Peterson Field; (5) deleting Lincoln, Neb., Municipal Airport; (6) deleting Moorcroft, Wyo.; (7) substituting "Rapid City, S. Dak., Municipal Airport" for "Rapid City, S. Dak., U. S. Air Force Base"; (8) adding Rawlins, Wyo., Municipal Airport; (9) substituting "Salina, Kans., Municipal Airport" for "Salina, Kans., Smoky Hill Air Force Base"; (10) deleting Sinclair, Wyo., CAA Intermediate Field; (11) deleting Tarkio, Mo., Peterson Airport; (12) deleting Topeka, Kans., Phillip Billard Airport.

Section 43 (e) (5) (ii), *Region 6*, is amended by (1) substituting "Arcata, Calif., Arcata Airport" for "Arcata, Calif., Humboldt County Airport"; (2) substituting "Battle Mountain, Nev., Battle Mountain Airport" for "Battle Mountain, Nev., Municipal Airport"; (3) deleting Donner Summit, Calif., Donner Summit Mountain; (4) deleting Milford, Utah, Municipal Airport; (5) deleting Oceanside, Calif., Oceanside Airport; (6) substituting "Palmdale, Calif., Los Angeles County Palmdale Airport" for "Palmdale, Calif., Los Angeles County Airport"; (7) substituting "Paso Robles, Calif., Paso Robles-San Luis Obispo County Airport" for "Paso Robles, Calif., Sherwood Airport"; (8) substituting "Red Bluff, Calif., Municipal Airport" for "Red Bluff, Calif., Bidwell Air-

port"; (9) adding Tonopah, Nev., Municipal Airport; (10) substituting "Williams, Calif." for "Williams, Calif., CAA Intermediate Field."

Section 43 (e) (5) (ii) *Region 7*, is amended by (1) substituting "Cut Bank, Mont., Municipal Airport" for "Cutbank, Mont., Municipal Airport"; (2) deleting Everett, Wash., Paine Airport; (3) deleting Helena, Mont., Municipal Airport; (4) substituting "Lewistown, Mont., Municipal Airport" for "Lewiston, Mont., Municipal Airport"; (5) deleting Pocatello, Idaho, Phillips Airport; (6) deleting Strevell, Idaho, CAA Intermediate Field.

Section 43 (e) (5) (ii), *Region 8*, is amended by (1) deleting North Dutch Island, Alaska; (2) deleting Port Heiden, Alaska, CAA Intermediate Field.

Section 43 (e) (5) (ii), *Region 9*, is amended by (1) adding Lihue, Kauai, T. H., Lihue Airport; (2) deleting Port Allen, T. H., Port Allen Airport.

Section 43 (e) (6) (ii), *Region 8*, is amended by adding Kodiak, Alaska.

Section 43 (e) (6) (ii), *Region 9*, is amended by deleting Midway Island, Sand Island Field.

This amendment shall become effective upon publication in the FEDERAL REGISTER.

[SEAL] F. B. LEE,
Acting Administrator of Civil Aeronautics.

National Production Authority

[Suspension Order 36; Docket No. 36]

BUCKEYE ALUMINUM CO.

SUSPENSION ORDER

A hearing having been held in the above-entitled matter on the 12th day of September 1952 at Cleveland, Ohio, before Harrison W. Ewing, a hearing commissioner of the National Production Authority, on a statement of charges made by the General Counsel, National Production Authority, in accordance with the National Production Authority General Administrative Order 16–06 (16 F. R. 8628), and Implementation 1 to that order (16 F. R. 8799); and

The respondent, The Buckeye Aluminum Company, a corporation, having been duly apprised of the specific violation charged and the administrative action which may be taken thereon, and having been fully informed of the rules and procedures which govern the proceedings, and respondent having appeared by its attorneys, Robert Critchfield and John C. Johnston, Jr., of the firm of Critchfield, Critchfield,, Critchfield and Johnston, of Wooster, Ohio, and no answer having been filed on behalf of respondent to the statement of charges herein, and

A stipulation having been entered into between respondent and the National Production Authority on the 12th day of September 1952, which stipulation was offered and received in evidence at the hearing and together with other evidence in support of and in opposition to the statement of charges having been considered by the hearing commissioner, it is hereby determined:

Findings of fact. During the third quarter of 1951, the respondent, The Buckeye Aluminum Company, used in the manufacture of aluminum cooking and kitchen utensils, 384,331 pounds of aluminum, while lawfully entitled by the provisions of National Production Authority Order M–47A dated July 1, 1951 (16 F. R. 6029), Direction 2 to National Production Authority Order M–47A (16 F. R. 7456), and National Production Authority Order M–47A as amended August 2, 1951 (16 F. R. 7679), to use during said period not exceeding 313,323 pounds of aluminum, and thereby used 71,008 pounds of aluminum during said period in excess of its permitted use.

Conclusion. The respondent, The Buckeye Aluminum Company, violated section 4 (a) of National Production Authority Order M–47A dated July 1, 1951, and said order as amended August 2, 1951, by using, in the manufacture of cooking and kitchen utensils during the third calendar quarter of 1951, 71,008 pounds of aluminum in excess of the amount permitted by said order and amended order.

It is accordingly ordered, That all allocations and allotments of aluminum which respondent may have received or be entitled to receive, either by application using Form CMP–4B or by self-certification, for use during the fourth quarter, 1952, be reduced by 71,008 pounds during the period beginning October 1, 1952, and ending December 31, 1952.

Issued this 7th day of October 1952 at Cleveland, Ohio.

NATIONAL PRODUCTION AUTHORITY,
By HARRISON W. EWING,
Hearing Commissioner.

FEDERAL POWER COMMISSION

[Docket No. E–6458]

GULF STATES UTILITIES CO.

NOTICE OF APPLICATION

OCTOBER 14, 1952.

Take notice that on October 13, 1952, an application was filed with the Federal Power Commission, pursuant to section 204 of the Federal Power Act, by Gulf States Utilities Company, a corporation organized under the laws of the State of Texas and doing business in the States of Texas and Louisiana, with its principal business office at Beaumont, Texas, seeking an order authorizing the issuance of $10,000,000 Principal Amount of First Mortgage Bonds, -- percent Series due 1982. Said bonds are to be sold at competitive bidding, to be dated December 1, 1952, to be issued on or about December 2, 1952, and to be due December 1, 1982; all as more fully appears in the application on file with the Commission.

Any person desiring to be heard, or to make any protest with reference to said application should, on or before the 4th day of November 1952, file with the Federal Power Commission, Washington 25, D. C., a petition or protest in accordance with the Commission rules of practice and procedure. The application is on file with the Commission for public inspection.

[Docket No. G–2073]

PANHANDLE EASTERN PIPE LINE CO.

ORDER PROVIDING FOR HEARING

OCTOBER 9, 1952.

By order issued March 5, 1952,[1] the Commission, in accordance with the provisions of section 4 (e) of the Natural Gas Act, permitted Panhandle Eastern Pipe Line Company's[2] FPC Gas Tariff Original Volume No. 1 to become effective as of February 20, 1952, pending final determination of the rate proceeding In the Matter of Panhandle Eastern Pipe Line Company et al., Docket Nos. G–1116, et al.

Subsequent to February 20, 1952, information submitted to the Commission by Panhandle indicated that Panhandle was delivering to the East Ohio Gas Company and the Ohio Fuel Gas Company natural gas in excess of the applicable contract demands specified in Service Agreements between Panhandle and the two Ohio companies executed pursuant to Rate Schedule LS–1 as contained in Panhandle's FPC Gas Tariff Original Volume No. 1. Following correspondence between the Commission and Panhandle, the Commission by letter of July 17, 1952, requested Panhandle to advise the Commission concerning "the specific arrangements which were made (verbal or written) with respect to the deliveries in excess of contract demands to Ohio Fuel Gas Company and East Ohio Gas Company submitting copies of all letters, memoranda, etc., and stating why you considered such deliveries as qualifying for billing under section 6.1 (b)[3] of Rate Schedule LS–1, rather than under section 6.1 (c),"[4] and rather than under interruptible Rate Schedule I–1 of Panhandle's FPC Gas Tariff Original Volume No. 1.

[1] Order Making Tariff and Service Agreements Effective, Requiring the furnishing of Bond, Prescribing Service Obligations and Interim Billing Demands.

[2] Hereinafter referred to as "Panhandle."

[3] Section 6.1 (b) provides as follows: When seller maintains and operates flow control valves at the point or points of delivery to Buyer. In such case, Seller shall bill Buyer for the excess gas at 9.0 cents per Mcf of excess gas delivered in addition to the commodity charge computed under section 3 of this rate schedule.

[4] Section 6.1 (c) provides as follows:

When Buyer takes more than the Contract Demand during a daily period with respect to which the Seller's Load Dispatcher shall have first given its express telephonic consent, In each such case the Seller shall forthwith by letter or telegram to Buyer confirm the telephonic consent given, but failure of Seller to confirm such consent shall not void the consent given. The telephonic consent of Seller under this paragraph is limited to a daily period and a separate telephonic consent shall be required and shall first be given, with respect to each and every such daily period during any month in which gas is so taken. The Purpose of this provision is to permit the delivery and the taking of such excess quantities under force majeure conditions arising during any daily period calling for immediate action and when, in the sole discretion and judgment of Seller, it has the gas available which it may supply to Buyer during such daily period.

In response to the Commission's letter of July 17, 1952, Panhandle, on August 6, 1952, advised the Commission that, with respect to excess deliveries to the East Ohio Gas Company and the Ohio Fuel Gas Company, "there have been no written agreements, correspondence, or memoranda, etc. providing for such deliveries," and that verbal arrangements for deliveries by Panhandle to the two Ohio companies had been made between an executive of Panhandle and an executive of each of the two Ohio companies. In its response of August 6, 1952, Panhandle also maintained that if excess deliveries could properly be made and billed under section 6.1 (c) of Rate Schedule LS–1 then they could properly be made and billed under section 6.1 (b) of such Rate Schedule, and, further, that such excess deliveries could not be made under the Interruptible Rate Schedule I–1 and afford the flexibility necessary to Panhandle's pipeline operations.

By letter dated September 3, 1952, the Commission advised Panhandle, among other things as follows:

> By failing to execute such service agreements with, and to make the sales to, the foregoing customers under the applicable Rate Schedule I–1, you have acted in violation of the tariff on file with the Commission and the Natural Gas Act.
>
> You are directed therefore to correct these violations forthwith by filing appropriate service agreements under the applicable interruptible rate schedule with the foregoing customers by not later than September 20, 1952. The term of the service agreements shall commence on February 20, 1952, and end as agreed upon between the customers and Panhandle.
>
> In addition, all sales in the future of excess gas over any resale customer's applicable contract demand, except those definitely caused by temporary emergencies, shall be made in accordance with the applicable interruptible service rate schedules.

In response to the Commission's letter of September 3, 1952, Panhandle on September 10, 1952, responded and requested, among other things as follows:

> We again urge upon the Commission the point which we endeavored to make in our letter dated August 6, 1952, that section 6.1 (b) of the LS–1 Rate Schedule supplies the answer to the proposition that somewhere in our tariff must be found the flexibility necessary in the operation of a pipe line which will permit us to make sales of gas which may be available because of unpredictable variations in market demands (by reason of weather or other abnormal factors) without a commitment to make such gas available at all times on either firm or interruptible basis.
>
> We, therefore, ask that the Commission:
>
> (a) Reconsider its directive contained in its letter of September 3, 1952, and upon such reconsideration, find that the sales of gas to the East Ohio Gas Company and the Ohio Fuel Gas Company in question were properly made under section 6.1 (b) of Rate Schedule LS–1 contained in the tariff of Panhandle Eastern Pipe Line Company, or
>
> (b) Grant to Panhandle Eastern Pipe Line Company a full hearing on this subject, staying the effect of its directive contained in its letter of September 3, 1952, pending final determination of the matter after hearing, or
>
> (c) If such letter of September 3, 1952, be regarded as a final order subject to review under section 19 of the Natural Gas Act, grant to Panhandle Eastern Pipe Line Company a rehearing with respect to such order as provided by section 19 of the Natural Gas Act and a stay of its directive contained in its letter of September 3, 1952, pending final determination of the matter after hearing.

The provisions of section 6.1 of the Limited Service Rate Schedule LS–1 are similar to the provisions contained in section 6.1 of Rate Schedules G–1, G–2, G–3, and section 5.1 of Rate Schedules SG–1, SG–2 and SG–3 of Panhandle's FPC Gas Tariff Original Volume No. 1.

In view of the foregoing recitations the Commission finds:

(1) It is appropriate in the public interest to grant to Panhandle a public hearing, upon a date to be fixed by further order of the Commission, concerning the following matters to determine:

(a) Whether or not deliveries of natural gas in excess applicable contract demands may properly be made and billed by Panhandle to resale customers having service agreements under Rate Schedules LS–1, G–1, G–2, G–3, SG–1, SG–2 and SG–3 in accordance with section 6.1 (b) or section 5.1 (b) of such Rate Schedules as applicable when such deliveries are made under conditions similar to those existing at the time of deliveries of volumes in excess of contract demand to the East Ohio Gas Company and the Ohio Fuel Gas Company.

(b) Whether or not deliveries of volumes of in excess of contract demand under section 6.1 (b) or section 5.1 (b) of Rate Schedules LS–1, G–1, G–2, G–3, SG–1, SG–2 and SG–3 under conditions similar to those existing at the time of deliveries to the East Ohio Gas Company and the Ohio Fuel Gas Company constitute unjust, unreasonable, unduly discriminatory, or preferential service between localities, and constitute the making or granting of any undue preference or advantage to any person or subject any person to any undue prejudice or disadvantage.

(c) Whether or not section 6.1 of Rate Schedules LS–1, G–1, G–2, G–3, and section 5.1 of Rate Schedules SG–1, SG–2 and SG–3, and whether or not Rate Schedules I–1, I–2, and I–3 should be modified, revised or changed so that the Commission may prescribe just and reasonable service, classifications or practices hereafter to be observed and in force.

The Commission orders:

(A) Upon its own motion pursuant to the provisions of the Natural Gas Act, particularly section 5 thereof, a public hearing be held upon a date to be fixed by further order of the Commission concerning the matters involved and the issues presented in connection with the matters set forth in Finding 1 hereof.

(B) Interested State commissions may participate in the hearing as provided by §§ 1.8 and 1.37 (f) (18 CFR 1.8 and 1.37 (f)) of the Commission's rules of practice and procedure.

Date of issuance: October 14, 1952.

By the Commission.

[SEAL] LEON M. FUQUAY,
Secretary.

OFFICE OF DEFENSE MOBILIZATION

[CDHA 83]

FINDING AND DETERMINATION OF CRITICAL DEFENSE HOUSING AREAS UNDER THE DEFENSE HOUSING AND COMMUNITY FACILITIES AND SERVICES ACT OF 1951

OCTOBER 17, 1952.

Upon a review of the construction of new defense plants and installations, and the reactivation or expansion of operations of existing defense plants and installations, and the in-migration of defense workers or military personnel to carry out activities at such plants or installations and the availability of housing and community facilities and services for such defense workers and military personnel in the area set forth below, I find that all of the conditions set forth in section 101 (b) of the Defense Housing and Community Facilities and Services Act of 1951 (Pub. Law 139, 82d Cong., 1st Sess.) exist.

Accordingly, pursuant to section 101 of the Defense Housing and Community Facilities and Services Act of 1951 and by virtue of the authority vested in me by paragraph number 1 of Executive Order 10296 of October 2, 1951, I hereby determine that said area is a critical defense housing area.

Bedford, Massachusetts, Area. (The area consists of the cities of Waltham and Woburn, and the towns of Bedford, Billerica, Burlington, Carlisle, Concord, Lexington, Lincoln and Wilmington, all in Middlesex County, Massachusetts.)

This supersedes certification under Docket No. 330, dated March 6, 1952.

SECURITIES AND EXCHANGE COMMISSION

[File No. 54-178]

UNITED LIGHT AND RAILWAYS CO. AND CONTINENTAL GAS AND ELECTRIC CORP.

ORDER RELEASING JURISDICTION OVER CERTAIN FEES AND EXPENSES

OCTOBER 13, 1952.

The Commission having, by order dated January 10, 1950, approved a plan filed by the United Light and Railways Company ("Railways"), a registered holding company, and its subsidiary registered holding company, Continental Gas & Electric Corporation ("Continental"), pursuant to section 11 (e) of the Public Utility Holding Company Act of 1935 ("act"), which plan provided for the liquidation and dissolution of Railways and Continental, and said order having reserved jurisdiction in respect of the fees and expenses incurred and to be incurred in connection with the plan and its consummation; and

The Commission having, by order dated December 3, 1951, released jurisdiction over all requested fees and expenses, except the fees and expenses of applicants' counsel, in respect of which the reservation of jurisdiction was continued because the record as to such fees and expenses was incomplete; and

Counsel for applicants, Sidley, Austin, Burgess & Smith having filed an amended request asking for an allowance of $34,000 fees and $1,751.28 expenses for services rendered to March 1951, and the record in respect of such fees and expenses having been completed; and

It appearing that the fees and expenses requested are not unreasonable and are for necessary services in connection with said plan and the consummation of certain steps thereof; and the Commission deeming it appropriate to release the jurisdiction heretofore reserved in respect of such fees and expenses, but to continue the reservation of jurisdiction in respect of any further fees and expenses to be paid such counsel:

It is ordered, That the request of Sidley, Austin, Burgess & Smith, counsel for applicants, for an allowance of $34,000 fees and $1,751.28 expenses to cover services to March 1951, be granted, that the jurisdiction heretofore reserved in respect of such fees and expenses be, and it hereby is, released, and that the reservation of jurisdiction be continued in respect of any further fees and expenses to be requested.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

DEPARTMENT OF JUSTICE

Office of Alien Property

[Vesting Order 19030]

WILLIAM STUEDEMANN

In re: Estate of William Stuedemann, deceased. File No. D-28-11222; E. T. sec. 15595.

Under the authority of the Trading With the Enemy Act, as amended (50 U. S. C. App. and Supp. 1-40); Public Law 181, 82d Congress, 65 Stat. 451; Executive Order 9193, as amended by Executive Order 9567 (3 CFR 1943 Cum. Supp.; 3 CFR 1945 Supp.); Executive Order 9788 (3 CFR 1946 Supp.) and Executive Order 9989 (3 CFR 1948 Supp.), and pursuant to law, after investigation, it is hereby found:

1. That Karl Becker, Ludwig Murr, and William Murr, whose last known address is Germany, on or since December 11, 1941, and prior to January 1, 1947, were residents of Germany and are, and prior to January 1, 1947, were nationals of a designated enemy country (Germany);

2. That all right, title, interest and claim of any kind or character whatsoever of the persons identified in subparagraph 1 hereof in and to the estate of William Stuedemann, deceased, presently being administered by Otto G. Rentner, as Executor, acting under the judicial supervision of the Probate Court of Cook County, Illinois, File 155376, Docket 294, Page 160, is property which is, and prior to January 1, 1947, was payable or deliverable to, or claimed by the aforesaid nationals of a designated enemy country (Germany);

and it is hereby determined:

3. That the national interest of the United States requires that the persons identified in subparagraph 1 hereof be treated as persons who are and prior to January 1, 1947, were nationals of a designated enemy country (Germany).

All determinations and all action required by law, including appropriate consultation and certification, having been made and taken, and it being deemed necessary in the national interest,

There is hereby vested in the Attorney General of the United States the property described above, to be held, used, administered, liquidated, sold or otherwise dealt with in the interest of and for the benefit of the United States.

The terms "national" and "designated enemy country" as used herein shall have the meanings prescribed in section 10 of Executive Order 9193, as amended.

Executed at Washington, D. C., on October 14, 1952.

For the Attorney General.

[SEAL] ROWLAND F. KIRKS, *Assistant Attorney General, Director, Office of Alien Property.*

[Vesting Order 19031]

JOHN OTTO EWERS

In re: Bank account owned by John Otto Ewers. F-28-13126-E-1.

Under the authority of the Trading With the Enemy Act, as amended, (50 U. S. C. App. and Sup. 1-40); Public Law 181, 82d Congress, 65 Stat. 451; Executive Order 9193, as amended by Executive Order 9567 (3 CFR 1943 Cum. Supp.; 3 CFR 1945 Supp.); Executive Order 9788 (3 CFR 1946 Supp.) and Executive Order 9989 (3 CFR 1948 Supp.), and pursuant to law, after investigation, it is hereby found:

1. That John Otto Ewers, whose last known address is Husum, Germany, on or since December 11, 1941, and prior to January 1, 1947, was a resident of Germany and is, and prior to January 1, 1947, was, a national of a designated enemy country (Germany);

2. That the property described as follows: That certain debt or other obligation of The Bowery Savings Bank, 130 Broadway, New York 18, New York, arising out of a savings account No. 1,170,537, entitled "John O. Ewers," maintained at the aforesaid bank, and any and all rights to demand, enforce and collect the same,

is property which is and prior to January 1, 1947, was within the United States owned or controlled by, payable or deliverable to, held on behalf of or on account of, or owing to, or which is evidence of ownership or control by, John Otto Ewers, the aforesaid national of a designated enemy country (Germany);

and it is hereby determined:

3. That the national interest of the United States requires that the person identified in subparagraph 1 hereof, be treated as a person who is and prior to January 1, 1947, was a national of a designated enemy country (Germany).

All determinations and all action required by law, including appropriate consultation and certification, having been made and taken, and, it being deemed necessary in the national interest,

There is hereby vested in the Attorney General of the United States the property described above, to be held, used, administered, liquidated, sold or otherwise dealt with in the interest of and for the benefit of the United States.

The terms "national" and "designated enemy country" as used herein shall have the meanings prescribed in section 10 of Executive Order 9193, as amended.

Executed at Washington, D. C., on October 14, 1952.

For the Attorney General.

INTERSTATE COMMERCE COMMISSION

[4th Sec. Application 27463]

BITUMINOUS FINE COAL FROM POINTS IN ILLINOIS AND INDIANA TO FAIRMONT, MINN.

APPLICATION FOR RELIEF

OCTOBER 15, 1952.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: R. G. Raasch, Agent, for carriers parties to schedules listed below.

Commodities involved: Soft coal or bituminous fine coal, carloads.

From: Points in Illinois and Indiana.

To: Fairmont, Minn.

Grounds for relief: Competition with rail carriers, market competition, and additional routes.

Schedules filed containing proposed rates: C&IM RR. tariff I. C. C. No. B-336, Supp. 25. CB&Q RR. tariff I. C. C. No. 20331, Supp. 27. CI&L Ry. tariff I. C. C. No. 4798, Supp. 17. NYC RR. tariff I. C. C. No. 1306, Supp. 8.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission, Division 2.

[SEAL] GEORGE W. LAIRD,
Acting Secretary.

[F. R. Doc. 52-11300; Filed, Oct. 17, 1952; 8:48 a. m.]

[4th Sec. Application 27464]

SUPERPHOSPHATE FROM SOUTHERN TERRITORY TO WICHITA, KANS.

APPLICATION FOR RELIEF

OCTOBER 15, 1952.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: R. E. Boyle, Jr., Agent, for carriers parties to Agent C. A. Spaninger's tariff I. C. C. No. 1286.

Commodities involved: Superphosphate (acid phosphate), other than ammoniated, carloads.

From: Points in southern territory.

To: Wichita, Kans.

Grounds for relief: Competition with rail carriers, circuitous routes, and to apply rates constructed on the basis of the short line distance formula.

Schedules filed containing proposed rates: C. A. Spaninger, Agent, I. C. C. No. 1286, Supp. 2.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

PART II

FEDERAL REGISTER

THE NATIONAL ARCHIVES — LITTERA SCRIPTA MANET — 1934 — OF THE UNITED STATES

VOLUME 17 NUMBER 205

Washington, Saturday, October 18, 1952

TITLE 46—SHIPPING

Chapter I—Coast Guard, Department of the Treasury

[CGFR 52-43]

VESSEL INSPECTION

REVISION OF CHAPTER

Part II of this issue contains a revision of the vessel inspection regulations of the United States Coast Guard, Department of the Treasury.

The President by proclamation dated September 10, 1952, proclaimed that the International Convention for the Safety of Life at Sea, 1948, shall come into force and effect on and after November 19, 1952, and that this Convention, with each and every article and clause thereof, shall be observed and fulfilled with good faith by the United States of America and by the citizens of the United States of America and all other persons subject to the jurisdiction thereof. The requirements which apply to the operation of vessels engaged on international voyages will be in effect on and after November 19, 1952. It is recognized that the inspection and issuance of required certificates for all vessels on November 19, 1952, cannot be accomplished. Therefore, in order to have an orderly administration of the requirements of this Convention which deals with new equipment required or new certificates issued will have to be done during the year from November 19, 1952, to November 19, 1953. When the various vessels come up for their regular annual or initial inspection, the new requirements of the Convention will be applied insofar as they concern equipment or construction so that all vessels will be in compliance with the new requirements by November 19, 1953.

The requirements in Chapter I of 46 CFR implement and complement the 1948 Convention insofar as they apply to vessels engaged on international voyages. In connection with new equipment required by the regulations, it is not intended that penalties will be assessed for failure to have such equipment during the interim between November 19, 1952, and the date of the vessel's next annual inspection. In the revision of the regulations and their application to existing vessels, it is not intended that "major conversions" will be required to be made. The requirements while written primarily for new vessels, will be applied to existing vessels only insofar as it is practicable and reasonable. Where certain new items of equipment are required by the 1948 Convention which will not be available on November 19, 1952, it is not intended that a vessel shall be delayed in sailing because of the lack of this equipment, and in such cases an additional reasonable time will be given to comply with the requirements if such action will not materially affect the safety of the vessel. For existing vessels not engaged in international voyages the revision of the regulations by this document should not materially affect their operation.

On November 19, 1951, the fifteenth country deposited its ratification of the 1948 Convention for Safety of Life at Sea with the British Government. Therefore, the requirements contained in this Convention will come into force on November 19, 1952, insofar as the United States is concerned. The United States Coast Guard is one of the primary Governmental agencies concerned with the administration of this Convention and the Commandant is charged with promulgating necessary vessel inspection regulations to give force and effect to the Convention. In order to have the regulations published in such a manner that persons and organizations affected thereby will be able to understand the requirements applicable to them, as required by the Administrative Procedure Act, the style and format of the regulations in Chapter I, Title 46, CFR, are revised or rearranged so that regulations are grouped by types of vessels or by subjects. Because of the scope and extent of this revision, it was necessary to postpone the publishing of certain revised marine engineering regulations considered by the Merchant Marine Council at a public hearing held September 18, 1951.

The notices of proposed rule making and announcements of public hearings to be held by the Merchant Marine Council were published in the Federal Registers dated August 16, 1951 (16 F. R. 8136–8139), February 27, 1952 (17 F. R. 1727–1731), and June 24, 1952 (17 F. R. 5665–5673). The Merchant Marine Council held public hearings in Washington, D. C., on September 18, 1951, March 25, 1952, and July 22, 1952. All the comments, views, and data submitted either in writing or orally at the public hearings were considered and, where practicable, were incorporated into the regulations.

The purpose of the amendments to the regulations contained in this document is: (a) to provide new or revised requirements to implement or complement the 1948 Convention for Safety of Life at Sea; (b) to review and bring up to date the requirements for vessel inspection; (c) to revise the style and format of regulations to have a better presentation of requirements; and (d) to describe present practices and procedures more fully in order to provide a better arrangement and understanding of the requirements.

In revising and rearranging the regulations the requirements are set forth by general subjects or by types of vessels. In each subchapter there is set forth the application of the regulations. It was not necessary to amend or revise or renumber all the regulations in Chapter I. Therefore, those regulations which are not affected by this document have not been included. In order to understand the effect of the reorganization of material, Table I lists the revised subchapter and part titles for Chapter I. The comments describe the action taken.

TABLE I—SUBCHAPTER AND PART HEADINGS FOR CHAPTER I WITH COMMENTS—Continued

Part No.	Subchapter designation	Title	Action taken
55	F	Piping Systems, Pumps, Refrigeration Machinery, and Fuel Tanks.	Item VI of public hearing held Sept. 18, 1951 (16 F. R. 8137). Item XIII of public hearing held Mar. 25, 1952 (17 F. R. 1729). Vol. IV, Item XVI of public hearing held July 22, 1952 (17 F. R. 5671). Revision of part.
56	F	Arc Welding, Gas Welding, and Brazing.	Item VII of public hearing held Sept. 18, 1951 (16 F. R. 8138). Volume V, Item XXVII of public hearing held July 22, 1952 (17 F. R. 5671). Revision of various sections.
57	F	Main and Auxiliary Machinery.	Item VII of public hearing held Sept. 18, 1951 (16 F. R. 8138). Vol. V, Item XXVIII of public hearing held July 22, 1952 (17 F. R. 5671). Revision of part.
58	F	Repairs to Boilers, Unfired Pressure Vessels, and Appurtenances.	Do.
59	F	Independent Internal Combustion Engine Fuel Tanks.	Vol. V, Item XXVIII of public hearing held July 22, 1952 (17 F. R. 5671, 5672). Revision of part.
61	F	Installations, Tests, Inspections, Markings, and Official Forms.	Item VIII of public hearing held Sept. 18, 1951 (16 F. R. 8138). Volume V, Item XXVIII of public hearing held July 22, 1952 (17 F. R. 5671, 5672). Revision of various sections.
------	G	Marine Engineering, Installations Contracted for Prior to July 1, 1935.	Item XIV of public hearing held Mar. 25, 1952 (17 F. R. 1730). New part added.
66	G	General	Item XV of public hearing held Mar. 25, 1952 (17 F. R. 1730). New part added.
67	G	Construction	Item XVI of public hearing held Mar. 25, 1952 (17 F. R. 1730). New part added.
68	G	Piping Systems	Item XVII of public hearing held Mar. 25, 1952 (17 F. R. 1730). New part added.
69	G	Installations, Tests, Inspections, and Repairs.	Vol. IV, Item XIX of public hearing held July 22, 1952 (17 F. R. 5669-5668). Revision and rearrangement of applicable requirements (old Parts 76-83 canceled).
70	H	General Provisions	Vol. I, Item I of public hearing held July 22, 1952 (17 F. R. 5669). New part added.
71	H	Inspection and Certification	Vol. I, Item II of public hearing held July 22, 1952 (17 F. R. 5666). New part added.
72	H	Construction and Arrangement	Vol. I, Item III of public hearing held July 22, 1952 (17 F. R. 5666-5668). New part added.
73	H	Watertight Subdivision	Vol. I, Item IV of public hearing held July 22, 1952 (17 F. R. 5669). New part added.
74	H	Stability	Vol. I, Item V of public hearing held July 22, 1952 (17 F. R. 5667). New part added.
75	H	Lifesaving Equipment	Vol. I, Item VI of public hearing held July 22, 1952 (17 F. R. 5667). Revision of part.
76	H	Fire Protection Equipment	Vol. I, Item VII of public hearing held July 22, 1952 (17 F. R. 5667). New part added (text of old Part 76 canceled).
77	H	Vessel Control and Miscellaneous Systems and Equipment.	Vol. I, Item VIII of public hearing held July 22, 1952 (17 F. R. 5669). New part added (text of old Part 77 canceled).
78	H	Operations	Vol. I, Item IX of public hearing held July 22, 1952 (17 F. R. 5667). New part added (text of old Part 78 canceled).
------	I	Cargo and Miscellaneous Vessels	Vol. II, Items I-XVII of public hearing held July 22, 1952 (17 F. R. 5668, 5669). Revision of applicable requirements and rearrangement of material. (Old Parts 94-102 canceled).
90	I	General Provisions	Vol. II, Item X of public hearing held July 22, 1952 (17 F. R. 5668). New part added.
91	I	Inspection and certification	Vol. II, Item XI of public hearing held July 22, 1952 (17 F. R. 5668). New part added.
92	I	Construction and arrangement	Vol. II, Item XII of public hearing held July 22, 1952 (17 F. R. 5668). New part added.
93	I	Stability	Vol. II, Item XIII of public hearing held July 22, 1952 (17 F. R. 5668). New part added.
94	I	Lifesaving Equipment	Vol. II, Item XIV of public hearing held July 22, 1952 (17 F. R. 5668). New part added (text of old Part 94 canceled).
95	I	Fire Protection Equipment	Vol. II, Item XV of public hearing held July 22, 1952 (17 F. R. 5669). New part added (text of old Part 95 canceled).
96	I	Vessel Control and Miscellaneous Systems and Equipment.	Vol. II, Item XVI of public hearing held July 22, 1952 (17 F. R. 5669). New part added (text of old Part 96 canceled).

TABLE I—SUBCHAPTER AND PART HEADINGS FOR CHAPTER I WITH COMMENTS

Part No.	Subchapter designation	Title	Action taken
------	A	Procedures Applicable to the Public	Editorial revisions made to agree with revised regulations.
1	A	General Course and Methods	No change made.
2	A	Vessel Inspection	Part rewritten to agree with revised regulations.
3	A	Merchant Marine Personnel	Part editorially revised to agree with changes made in regulations.
4	A	Investigations and Hearings	No change made.
------	B	Merchant Marine Officers and Seamen	No change made in existing requirements.
------	B	Licensing of Officers and Motorboat Operators and Registration of Staff Officers.	No change made.
10	B	Certification of Seamen	Do.
12	B	Shipment and Discharge of Seamen	Do.
14	B	Allotments of Seamen	Do.
15	B	United States Shipping Commissioners	Part 134 editorially revised and renumbered.
16	B	Uninspected Vessels	Vol. III, Items XVIII-XX of public hearing held July 22, 1952 (17 F. R. 5670). These requirements apply to certain motor and uninspected vessels formerly published in Parts 24 to 28.
------	C	General Provisions	Item XVIII of public hearing held July 22, 1952. Part completely revised.
24	C	Requirements	Item XIX of public hearing held July 22, 1952. Part completely revised.
25	C	Operations	Item XX of public hearing held July 22, 1952. Part completely revised.
26	C	Tank Vessels	Requirements revised to implement the 1948 Convention for Safety of Life at Sea, as well as other changes necessary for revision of requirements. Items V-XI of public hearing held Mar. 25, 1952 (17 F. R. 1728, 1729).
------	D	General Provisions	Item VI of public hearing held Mar. 25, 1952. Minor revisions regarding application of requirements. Revision of part.
31	D	Inspection and Certification	Item VII of public hearing held Mar. 25, 1952. Item completely revised.
32	D	Special Equipment, Machinery, and Hull Requirements.	Item VIII of public hearing held Mar. 25, 1952. Item XXV of public hearing held July 22, 1952 (17 F. R. 5672). Revision of various sections.
33	D	Lifesaving Appliances	Item VIII of public hearing held Mar. 25, 1952. Revision of various sections.
34	D	Fire Fighting Equipment	Item IX of public hearing held Mar. 25, 1952. Revision of part.
35	D	Operations	Item X of public hearing held Mar. 25, 1952. Revision of various sections.
38	D	Liquefied Petroleum Gases	Item XI of public hearing held Mar. 25, 1952. Item XXV of public hearing held July 22, 1952 (17 F. R. 5671). Revision of various sections.
39	D	Inflammable or Combustible Liquids Having Lethal Characteristics.	No change made.
------	E	Load Lines	Editorial renumbering of requirements.
------	E	Foreign or Coastwise Voyage	Item XV of public hearing held Mar. 25, 1952 (17 F. R. 1730). Revision of various sections and editorial renumbering of part.
43	E	Variance for Steam Colliers, Tugs, Barges, and Self-Propelled Barges.	Editorial changes regarding applicability and authority for granting variances.
44	E	Merchant Vessels When Engaged in a Voyage on the Great Lakes.	Editorial renumbering of part.
45	E	Subdivision Load Lines for Passenger Vessels.	Vol. VII, Item XXXI of public hearing held July 22, 1952 (17 F. R. 5672). Revision of part.
46	E	Marine Engineering	Miscellaneous changes published Mar. 25, 1952, and Items XXII-XXIII of public hearing held Mar. 25, 1952. Miscellaneous changes and revisions of certain parts.
50	F	General Provisions	Item I of public hearing held Sept. 18, 1951 (16 F. R. 8139). Revision of part, republished in FEDERAL REGISTER of Dec. 21, 1951 (16 F. R. 7628-7633).
51	F	Materials	Item III of public hearing held Sept. 18, 1951 (16 F. R. 8137). Item XVIII of public hearing held July 22, 1952 (17 F. R. 5671). Miscellaneous changes.
52	F	Construction	Item IV of public hearing held Sept. 18, 1951 (16 F. R. 8137). Vol. V, Item XXVI of public hearing held July 22, 1952 (17 F. R. 5671). Revision of various sections.
53	F	Low Pressure Heating Boilers	Item V of public hearing held Sept. 18, 1951 (16 F. R. 8137). Vol. V, Item XXVI of public hearing held July 22, 1952 (17 F. R. 5671). Revision of various sections.
54	F	Unfired Pressure Vessels	Item VI of public hearing held Sept. 18, 1951 (16 F. R. 8137). Revision of various sections.

TABLE I—SUBCHAPTER AND PART HEADINGS FOR CHAPTER I WITH COMMENTS—Continued

Part No.	Subchapter designation	Title	Action taken
97	I	Operations	Vol. II, Item XVII of public hearing held July 22, 1952 (17 F. R. 5669). New part added (text of old Part 97 canceled).
------	J	Electrical Engineering	Vol. IV, Items XXI-XXIV of public hearing held July 22, 1952 (17 F. R. 5670, 5671). New regulations added (old Parts 112-120 canceled).
110	J	General Provisions	Vol. IV, Item XXI of public hearing held July 22, 1952 (17 F. R. 5670). New part added.
111	J	Electrical System, General Requirements	Vol. IV, Item XXII of public hearing held July 22, 1952 (17 F. R. 5670). New part added.
112	J	Emergency Lighting and Power System	Vol. IV, Item XXIII of public hearing held July 22, 1952 (17 F. R. 5670). New part added.
113	J	Communication and Alarm Systems and Equipment.	Vol. IV, Item XXIV of public hearing held July 22, 1952 (17 F. R. 5670). New part added (text of old Part 113 canceled).
------	K	Marine Investigations and Suspension and Revocation Proceedings.	Change in subchapter title. (Old Parts 131, 133, 134, 135, 140, 141 canceled.)
136	K	Marine Investigation Regulations	Editorial changes in various sections to agree with changes made in other parts of chapter.
137	K	Suspension and Revocation Proceedings	No change made.
------	L	Overtime Services	Do.
143	L	Extra Compensation for Overtime Services	Do.
------	M	Bulk Grain Cargo	New requirements added to implement the 1948 Convention for Safety of Life at Sea.
144	M	Loading and Stowage of Grain Cargoes	Vol. VI, Item XXX of agenda of public hearing held July 22, 1952 (17 F. R. 5672). New part added (text of old Part 144 canceled).
------	N	Explosives or Other Dangerous Articles or Substances and Combustible Liquids on Board Vessels.	No change made. (The text of various revisions published in separate FEDERAL REGISTER documents.)
146	N	Transportation or Storage of Explosives or Other Dangerous Articles or Substances, and Combustible Liquids on Board Vessels.	No change made.
147	N	Regulations Governing the Use of Dangerous Articles as Ships' Stores and Supplies on Board Vessels.	Do.
------	O	Regulations Applicable to Certain Vessels During Emergency.	Do.
154	O	Waivers of Navigation and Vessel Inspection Laws.	Do.
------	P	Manning of Vessels	Vol. VIII, Item XXXII of public hearing held July 22, 1952 (17 F. R. 5672). New subchapter containing manning requirements previously published in various sections and parts throughout chapter.
157	P	Manning Requirements	New part added. This part contains requirements previously published as Parts 131, 135, 140, 141 (the text of old Part 157 canceled).
------	Q	Specifications	Vol. V, Item XXIX of public hearing held July 22, 1952 (17 F. R. 5672). New specifications added.
160	Q	Lifesaving Equipment	No change made.
161	Q	Electrical Equipment	No change made.
162	Q	Engineering Equipment	New subparts (specifications) added.
163	Q	Construction	No change made.
164	Q	Materials	Do.
------	R	Nautical Schools	Editorial rearrangement of requirements and editorial changes to agree with other changes made in chapter.
166	R	Designation and Approval of Nautical School Ships.	Editorial rearrangement and renumbering of requirements. Minor changes made in regulations. New part added. (The text of old §§ 133.0 to 133.4 transferred to this part.)
167	R	Public Nautical School Ships	Editorial changes made to agree with other changes made in chapter.
168	R	Civilian Nautical School Ships	Editorial rearrangement and renumbering of requirements. (The text of old §§ 138.5 to 133.18 transferred to this part.)
------	S	Numbering Undocumented Vessels	Item XX of public hearing held Mar. 25, 1952 (17 F. R. 1731).
172	S	Numbering Requirements	New part added (text of old Part 29 revised, renumbered and transferred to this part).

In order to understand the transfer and rearrangement of requirements as applied to regulations previously published in Chapter I, the following changes were made:

Subchapter A—Procedures Applicable to the Public

No change made in the arrangement of material. Revisions were made in the text of Parts 2 and 3 to agree with changes made in other parts of this chapter.

Subchapter B—Merchant Marine Officers and Seamen

No change made in the arrangement of material. A new Part 16, regarding United States Shipping Commissioners, is added. The text of this part was previously published as Part 133 in Subchapter K.

Subchapter C—Motorboats, and Certain Vessels Propelled by Machinery Other Than by Steam More Than 65 Feet in Length

This subchapter, consisting of Parts 24 to 29, is canceled. The text of Parts 24 to 28 was revised so that it would apply only to uninspected vessels (primarily motorboats) and republished as Parts 24, 25, and 26. The text of Parts 24 to 28, applicable to passenger vessels, is transferred to a new Subchapter H. The text of Parts 24 to 28, applicable to cargo and miscellaneous vessels, is transferred to a new Subchapter I. The text of Parts 24 to 28, relating to marine engineering, is transferred to Subchapter F. The text of Part 29, regarding numbering of undocumented vessels, is revised and transferred to a new Part 172 in a new Subchapter S.

Subchapter D—Tank Vessels

No change made in the arrangement of material. Part 34, regarding fire-fighting equipment, is revised. Various sections in other parts are revised to implement the 1948 Convention for the Safety of Life at Sea, or to transfer requirements regarding marine engineering, or specifications to Subchapter F, or Subchapter Q, respectively.

Subchapter E—Load Lines

This subchapter, consisting of Parts 43 to 46, is completely renumbered and the text of Part 46, regarding subdivision of passenger vessels, revised. Certain requirements in Parts 43 to 46, dealing with marine engineering, were transferred to Subchapter F. Certain requirements, regarding stability and subdivision of passenger vessels, were transferred to Subchapter H. The changes made in Parts 43 to 45 are primarily editorial and agree with changes made in other parts of this chapter.

Subchapter F—Marine Engineering

This subchapter, consisting of Parts 50 to 58, is revised so that it will contain only the requirements applicable to marine engineering installations and equipment contracted for on or after July 1, 1935. Part 50 is completely revised and renumbered. Various sections in Parts 52 to 56 are revised. Part 57 is completely revised and requirements renumbered as Parts 57, 58, 59, and 61, in order to have a better presentation of requirements. The text of Part 58, as well as applicable requirements from Parts 50 to 57, which apply to marine engineering installations contracted for prior to July 1, 1935, are transferred to new Parts 66 to 69 in a new Subchapter G.

Subchapter G—Ocean and Coastwise; General Rules and Regulations

This subchapter, consisting of Parts 59 to 65, is canceled. The requirements applicable to passenger vessels are revised and transferred to a new Subchapter H. The requirements applicable to cargo and miscellaneous vessels are revised and transferred to a new Subchapter I. The requirements regarding marine engineering are revised and transferred to Subchapter F. The requirements regarding manning of vessels are revised and transferred to a new Subchapter P.

Subchapter H—Great Lakes; General Rules and Regulations

This subchapter, consisting of Parts 76 to 83, is canceled. The requirements applicable to passenger vessels are transferred to a new Subchapter H. The requirements applicable to cargo and miscellaneous vessels are transferred to a new Subchapter I. The requirements regarding marine engineering are transferred to Subchapter F. The requirements regarding manning of vessels are transferred to a new Subchapter P.

Subchapter I—Bays, Sounds, and Lakes Other Than the Great Lakes; General Rules and Regulations

This subchapter, consisting of Parts 94 to 102, is canceled. The requirements

applicable to passenger vessels are transferred to a new Subchapter H. The requirements applicable to cargo and miscellaneous vessels are transferred to a new Subchapter I. The requirements regarding marine engineering are transferred to Subchapter F. The requirements regarding manning of vessels are transferred to a new Subchapter P.

Subchapter J—Rivers; General Rules and Regulations

This subchapter, consisting of Parts 113 to 120, is canceled. The requirements applicable to passenger vessels are transferred to a new Subchapter H. The requirements applicable to cargo and miscellaneous vessels are transferred to a new Subchapter I. The requirements regarding marine engineering are transferred to Subchapter F. The requirements regarding manning of vessels are transferred to a new Subchapter P.

Subchapter K—Seamen

The title for this subchapter is changed to "Marine Investigations and Suspension and Revocation Proceedings" since only Parts 136 and 137 are retained in this subchapter. The text of Part 131, regarding hours of labor on shipboard, Part 135, regarding language test for seamen, Part 140, regarding able seamen, and Part 141, regarding manning of inspected vessels, is revised and transferred to a new Subchapter P. The text of Part 133, regarding designation and approval of nautical school ships; rules for conduct of school ships, is revised, rearranged, renumbered and transferred to Parts 166 and 168 in Subchapter R. The text of Part 134, regarding United States Shipping Commissioners, is rearranged, renumbered and transferred to Part 16 in Subchapter B.

Subchapter L—Overtime Services

No change is made in this subchapter which contains only Part 143.

Subchapter M—Construction or Material Alteration of Passenger Vessels of the United States of 100 Gross Tons and Over Propelled by Machinery

This subchapter, consisting of Part 144, is canceled. The requirements are revised, rearranged and transferred to Parts 72, 73, and 74 in a new Subchapter H, regarding passenger vessels.

Subchapter N—Explosives or Other Dangerous Articles or Substances and Combustible Liquids on Board Vessels

No change is made in this subchapter, consisting of Parts 146 and 147. The changes considered at the public hearing held March 25, 1952, will be published in a separate document.

Subchapter O—Regulations Applicable to Certain Vessels During Emergency

No change is made in this subchapter, consisting of Part 154.

Subchapter P—General Provisions

This subchapter, consisting of Part 137, is canceled. The text of Part 157, regarding enforcement, is revised and transferred to Part 2 in Subchapter A.

Subchapter Q—Specifications

No change is made in the arrangement of the material in this subchapter, consisting of Parts 160 to 164. New subparts regarding marine engineering equipment are added to Part 162.

Subchapter R—Nautical Schools

This subchapter, consisting of Part 167, is editorially revised to agree with changes made in other parts in this chapter. No change was made in the arrangement of material. The text of §§ 133.0 to 133.4, regarding designation and approval of nautical school ships, is revised, rearranged, renumbered and transferred to this subchapter as a new Part 166. The text of §§ 133.5 to 133.18, regarding civilian nautical school ships, is rearranged, renumbered, and transferred to this subchapter as a new Part 168.

Since the Government of the United States of America, together with the Governments of the other countries which have become parties to the 1948 Convention for the Safety of Life at Sea, undertakes to give effect to the provisions of the Convention, it is hereby found necessary that the regulations in this document shall become effective on and after November 19, 1952.

By virtue of the authority vested in me as Commandant, United States Coast Guard, by Treasury Department Order No. 120, dated July 31, 1950 (15 F. R. 6521), to promulgate regulations in accordance with the statutes cited with the regulations below, the following amendments to the regulations are prescribed which shall become effective on and after November 19, 1952:

Subchapter A—Procedures Applicable to the Public

PART 2—VESSEL INSPECTIONS

Part 2 is amended to read as follows:

SUBPART 2.01—INSPECTING AND CERTIFICATING OF VESSELS

Sec.
2.01–1 Applications for inspections.
2.01–5 Certificates of inspection.
2.01–10 Inspection requirements.
2.01–15 Vessel repairs.
2.01–20 Revocation of certificates of inspection.
2.01–25 International Convention for the Safety of Life at Sea, 1948.
2.01–50 Special permits.
2.01–60 Overtime compensation.
2.01–70 Appeals.

SUBPART 2.20—REPORTS AND FORMS

2.20–1 Forms.
2.20–40 Chief engineer's reports.
2.20–50 Repairs or alterations in lifesaving or fire prevention equipment.
2.20–60 Reports of casualties and accidents.

SUBPART 2.30—NUMBERING OF UNDOCUMENTED VESSELS

2.30–1 Numbering.
2.30–10 Application.
2.30–20 Certificate issued.

SUBPART 2.50—NAVIGATION AND VESSEL INSPECTION LAWS

Sec.
2.50–1 Waivers.
2.50–20 Reports and assessments of penalties for violation of laws or regulations.
2.50–25 Payment of penalty for violation of law or regulation.
2.50–30 Motorboat Act violations.

SUBPART 2.75—APPROVALS OF SAFETY EQUIPMENT, MATERIALS AND INSTALLATIONS, AND QUALIFICATIONS FOR CONSTRUCTION PERSONNEL

Sec.
2.75–1 Approvals.
2.75–10 Requirements and tests.
2.75–50 Withdrawals or terminations of approvals.
2.75–60 Certification of ship's stores and supplies.
2.75–70 Welders.

SUBPART 2.85—LOAD LINES

2.85–1 Assignment of load lines.

SUBPART 2.90—PLANS, DRAWINGS OR BLUEPRINTS

2.90–1 General requirements.

AUTHORITY: §§ 2.01–1 to 2.90–1 issued under R. S. 4405, as amended, 4462, as amended; 46 U. S. C. 375, 416.

SUBPART 2.01—INSPECTING AND CERTIFICATING OF VESSELS

§ 2.01–1 *Applications for inspections*—(a) *Application forms.* (1) Applications for the annual inspections of vessels required to be inspected by 46 U. S. C. 362, 363, 367, 391, 391a, 395, 404, 405, 1333, shall be made by the master, owner or agent on the following Coast Guard forms which are obtainable from the Officer in Charge, Marine Inspection, at any local Marine Inspection Office, U. S. Coast Guard:

833—Application for Inspection of Vessel.
986—Application for Inspection of Foreign Passenger Vessel.

(2) These applications require information on name and type of vessel, nature of employment and route in which to be operated, and place where and date when she may be inspected.

(b) *To whom submitted.* The completed forms shall be submitted to the Marine Inspection Office located in, or nearest, the port at which the inspection is to be made. The applicant will be advised in writing of the time when the inspection will be made.

(c) *New vessels.* Applications for inspection of new vessels shall be preceded by the submission of applicable drawings or prints in accordance with specific requirements in Subchapters D (Tank Vessels), E (Load Lines), F (Marine Engineering), H (Passenger Vessels), I (Cargo and Miscellaneous Vessels) and/or J (Electrical Engineering) of this chapter applicable to that particular type of vessel and/or type of service in which it is proposed to be operated.

§ 2.01–5 *Certificates of inspection*—(a) *Issuance of certificates.* Certificates issued upon completion of the inspection of a vessel and on condition that the vessel and her equipment are approved by the inspectors a certificate on one of the following Coast Guard forms will be issued by the Officer in Charge, Marine Inspection, as required by 46 U. S. C. 399:

(1) CG 841—Certificate of Inspection for Steam or Motor Vessels.
(2) CG 842—Certificate of Inspection for Tank Barges.
(3) CG 852—Certificate of Inspection for Sail Vessels and Barges Carrying Passengers for Hire.
(4) CG 854—Temporary Certificate of Inspection.

(5) CG 856—Certificate of Inspection for Seagoing Barges of 100 Gross Tons or Over.
(6) CG 987—Certificate of Inspection for Foreign Passenger Vessels.
(7) CG 989—Certificate of Examination of Foreign Passenger Vessel of Country Having Inspection Laws Approximating Those of the United States.
(8) A—Approval of Boilers and Machinery on Steam Propelled Motorboats.
(9) B—Inspection of Boilers on Steam Propelled Motorboats.

(b) *Description of certificate.* These certificates describe the vessel; the route over which she may travel; the minimum manning requirements; the safety equipment and appliances required to be carried on board; the total number of persons which may be carried; the condition of the vessel and her machinery; the names of the master and the owner. The duration of the certificates is for a period of 1 year after which they must be renewed by making application for inspection as provided for in § 2.01–1.

(c) *Amending certificates.* Where by reason of a change in the character of a vessel or in her route, equipment, etc., the vessel will not comply with the requirements of the certificate of inspection previously issued a certificate amending such certificate may be issued at the discretion of the Officer in Charge, Marine Inspection, to whom request is made, on Coast Guard Form 853, Certificate Amending Certificate of Inspection by Changing Character of Vessel, Route, Equipment, etc.

(d) *Compliance with new requirements.* Where it is found that a vessel cannot comply with any of the new requirements in this chapter effective on or after November 19, 1952, because the equipment is not available, or the installation cannot be made without undue delay to the vessel, or for similar reasons, the Commandant may permit a reasonable time to be granted to such vessel to comply with the requirements. Where such permission is given, it shall be noted on the certificate of inspection together with the time limit granted.

§ 2.01–10 *Inspection requirements.* (a) If during the inspection of a vessel made at the request of the master, owner, or agent, the vessel or her equipment is found not to conform to the requirements of law or regulations in this chapter, the requirements which must be met will be listed on Form CG 835, Notice of Merchant Marine Inspection Requirements, and given to the master of the vessel.

(b) The Coast Guard on its own initiative may examine or inspect or reinspect at anytime any vessel subject to Title 52 of the Revised Statutes (R. S. 4399–4500; 46 U. S. C. 170, 214–240, 361–498), and acts amendatory thereof or supplemental thereto. If during such examination, inspection, or reinspection, any failure to comply with any applicable requirement of law and/or applicable regulations in this chapter, or any defects or imperfections become apparent tending to render the navigation of the vessel unsafe, or that repairs have become necessary, the Coast Guard will so notify the master and state what is required.

§ 2.01–15 *Vessel repairs.* (a) The procedures to be followed in notifying the Coast Guard about vessel repairs varies according to the type of vessel and service in which engaged. The requirements by type of vessels are set forth in Subchapters D (Tank Vessels), E (Load Lines), H (Passenger Vessels), and I (Cargo and Miscellaneous Vessels) of this chapter. The additional requirements for repairs of certain equipment and installations are in Subchapters F (Marine Engineering) and J (Electrical Engineering) of this chapter.

(b) If repairs to a vessel are necessary, such vessel may be permitted to proceed to another port for repairs, if in the opinion of the inspector it can be done with safety. The permit is granted by the Officer in Charge, Marine Inspection, upon request in writing by the master or owner of the vessel and is issued on Coast Guard Form 948, Permit To Proceed to Another Port for Repairs. No repairs or alterations affecting safety of a vessel or her machinery shall be made unless applicable requirements in Subchapters D (Tank Vessels), E (Load Lines), F (Marine Engineering), H (Passenger Vessels), I (Cargo and Miscellaneous Vessels) and/or J (Electrical Engineering) of this chapter are met.

§ 2.01–20 *Revocation of certificates of inspection.* Under authority of 46 U. S. C. 435 the certificates of inspection referred to in § 2.01–5 may be revoked if the vessel is found at reinspections not to comply with the terms of the vessel's certificate of inspection.

§ 2.01–25 *International Convention for the Safety of Life at Sea, 1948.*—(a) *Certificates required.* (1) The International Convention for the Safety of Life at Sea, 1948, requires one or more of the following certificates to be carried on certain vessels engaged in international voyages:

(i) Safety certificate for passenger vessels.
(ii) Safety equipment certificate for cargo ships (including tank ships).
(iii) Safety radiotelephony certificate.
(iv) Safety radiotelegraphy certificate.
(v) Exemption certificate.

(2) The United States Coast Guard will issue the certificates listed in paragraph (a) of this section.

(b) *Applications.* (1) The application for the inspection of a passenger vessel is made on the appropriate form listed in § 2.01–1, or by letter, to the Officer in Charge, Marine Inspection, in or nearest the port at which the inspection is to be made and shall be signed by the master or agent of the vessel. Further details are set forth in Subchapter H (Passenger Vessels) of this chapter.

(2) The application for the inspection of a cargo vessel including a tank vessel is made on the appropriate form listed in § 2.01–1, or by letter to the Officer in Charge, Marine Inspection, in or nearest the port at which the inspection is to be made and shall be signed by the master or agent of the vessel. Further details are set forth in Subchapters D (Tank Vessels) or I (Cargo and Miscellaneous Vessels) of this chapter.

(3) The application for the inspection of a vessel other than passenger vessel concerning the issuance of a safety radiotelephony certificate or safety radiotelegraphy certificate is made by letter to the local office of the Federal Communications Commission, which agency is responsible for the inspection. The local inspector of the agency reports the results of the inspection to the Officer in Charge, Marine Inspection, who issues the certificate.

(c) *Certificates issued.* If a vessel meets the applicable requirements of the convention, it shall be issued one or more of the certificates listed in paragraph (a) of this section. These certificates describe the vessel or state the vessel is in compliance with the requirements of the convention.

(d) *Letter in lieu of a required certificate.* Where completion of the certification of any vessel cannot be effected prior to the sailing of the vessel on a foreign voyage, a letter in lieu of a certificate is issued by the Officer in Charge, Marine Inspection, on Coast Guard Form 969, explaining the failure of the ship to have on board the certificate required.

(e) *Exempted vessel.* A vessel may be exempted by the Commandant, U. S. Coast Guard, from complying with certain requirements of the convention upon request made in writing to him. In such case the exemptions are stated in the exemption certificate, which is issued by the Commandant through the appropriate Officer in Charge, Marine Inspection.

(f) *Foreign flag vessels.* At the request of the government of a country in which is registered a vessel engaged in international voyages, such a vessel may be issued the applicable certificate or certificates listed in paragraph (a) of this section by the Coast Guard. The certificate will be issued only after inspection has been made of the vessel and the vessel is found to comply with the requirements of the convention.

§ 2.01–50 *Special permits*—(a) *Passengers or persons in addition to crew.* Special permits may be issued to certain vessels subject to inspection to carry persons in addition to those allowed by the certificates of inspection. Under authority of 46 U. S. C. 453 a passenger vessel may be permitted to engage in excursions and carry additional numbers of passengers. Application for the permit is made by the master, owner, or agent of the vessel to the Officer in Charge, Marine Inspection, on Coast Guard Form 950, Application for Excursion Permit. If, after inspection, permission is granted, it is given on Coast Guard Form 949, Permission to Carry Excursion Party. The permit describes the vessel, the route over which and the period during which the excursions may be made, and the safety equipment required for the additional persons indicated.

(b) *Persons other than crew on towing, oyster, or fishing steamers.* Steam towing, oyster dredging, and fishing vessels may be permitted to carry persons in addition to their crews under authority of 46 U. S. C. 458 by the District Commander. Application for such a permit is made by the master or agent of the

vessel to the Coast Guard District Commander on Form CG 955, Application for Towing, Oyster and Fishing Steamers to Carry Persons Other Than the Crew, which form is obtainable from the Coast Guard District Commander. If the application is approved the permit is issued by the Coast Guard District Commander on Form CG 957, Permit to Towing, Oyster and Fishing Steamers to Carry Persons Other Than the Crew. The master, owner, or agent of any of the above vessels carrying persons in addition to the crew is required to report to the District Commander that he has on board the vessel life preservers in addition to those required for the crew to accommodate the additional persons carried. This report is made on Form CG 956, Affidavit of Master or Owner of Towing, Oyster or Fishing Steamer That Life Preservers Are on Board, which may be obtained from any Coast Guard District Commander. The permit describes the vessel, the number of persons which may be carried in addition to her crew, and the number of life preservers provided.

§ 2.01–60 *Overtime compensation*—(a) *General.* Extra compensation for overtime services performed by inspectors of vessels and their assistants, shipping commissioners and their deputies and assistants who may be required to remain on duty between the hours of 5:00 p. m. and 8:00 a. m. or on Sundays or holidays to perform services in connection with the inspection of vessels or their equipment, supplying or signing on or discharging crews of vessels is authorized by 46 U. S. C. 382b and regulations in Part 143 of this chapter, together with the method of computing such extra compensation.

(b) *Application and certification of time.* Application for the performance of such overtime services and certification of services performed is made by the master, owner, or agent of a vessel to the Officer in Charge, Marine Inspection, on Form CG 830, Application for and Certificate of Overtime Service.

(c) *Collection.* The bill for the collection of the overtime compensation is submitted by the Officer in Charge, Marine Inspection, to the master, owner, or agent on whose vessel overtime services are performed on Form CG 832, Bill for Collection Overtime Services. Payment is made to the Collector of Customs of the port designated.

§ 2.01–70 *Appeals*—(a) *General.* Any person aggrieved by any decision or action of the Officer in Charge, Marine Inspection, may appeal therefrom to the Coast Guard District Commander of the district in which the action or decision was made. A further appeal may be made to the Commandant, U. S. Coast Guard, from the decision of the District Commander.

(b) *Time limits.* (1) Appeals from decisions of the inspectors or the Officer in Charge, Marine Inspection, to the Coast Guard District Commander, shall be made in writing within 30 days after the decisions or actions appealed from shall have been rendered or taken. Such appeals shall set forth the requirements appealed from and the reasons why the decision or action should be set aside or revised.

(2) Appeals from the decisions of the Coast Guard District Commander to the Commandant shall be made in writing within 30 days after the decisions appealed from shall have been rendered.

(c) *Decision on appeals.* Pending the determination of the appeal, the decision of the Officer in Charge, Marine Inspection, shall remain in effect. The decision of the Commandant is final.

SUBPART 2.20—REPORTS AND FORMS

§ 2.20–1 *Forms.* (a) Statutes and regulations require that certain forms be posted on vessels referred to in the statutes and regulations. The titles of the forms indicate the contents of the forms. They may be obtained from any Marine Inspection Office. The Coast Guard Forms and the statutes or regulations which require that they be posted are listed in this section.

(b) *CG 803.* Pilot Rules for Certain Inland Waters of the Atlantic and Pacific Coasts and of the Coast of the Gulf of Mexico, required by 33 U. S. C. 157, and 33 CFR 80.13 (b).

(c) *CG 804a.* Rules for Lights for Certain Classes of Vessels Navigating the Harbors, Rivers, and Other Inland Waters except the Great Lakes and their Connecting Tributary Waters as far East as Montreal and the Red River of the North and Rivers Emptying into the Gulf of Mexico, required by 33 U. S. C. 157.

(d) *CG 805.* Pilot Rules for Western Rivers, required by 46 U. S. C. 381, and 33 CFR 95.23.

(e) *CG 807.* Pilot Rules for the Great Lakes and their Connecting and Tributary Waters. 33 U. S. C. 243, 33 CFR 90.15 (b).

(f) *CG 811.* Instructions for the use of the Gun and Rocket Apparatus for Saving Life from Shipwreck as Practiced by the United States Coast Guard, required by §§ 35.10–10, 78.53, or 97.43 of this chapter.

(g) *CG 802.* Persons Allowed in Pilothouse and on Navigation Bridge, required by §§ 78.10, and 97.10 of this chapter.

(h) *CG 809A.* Station Bills, Drills and Reports of Masters, required by § 78.17–50 (f) of this chapter.

(i) *CG 809B.* Station Bills, Drills and Reports of Masters, required by §§ 35.10–1, or 97.15–35 (d) of this chapter.

(j) *CG 810.* Duties of Mates of Inland Steamers Carrying Passengers, required by § 157.35–5 of this chapter.

§ 2.20–40 *Chief engineer's reports.* (a) Repairs to boilers and pressure vessels. The chief engineer is required to report any repairs to boilers or unfired pressure vessels in accordance with §§ 33.25–5, 78.33–1, and 97.30–1 of this chapter.

(b) The chief engineer of any vessel is required to report any accident to a boiler, unfired pressure vessel, or machinery tending to render the further use of the item unsafe until repairs are made by §§ 35.25–5, 78.33–5, and 97.30–5 of this chapter.

(c) The chief [illegible] the installation of [illegible] the Officer in Charge, Marine Inspection, on Form CG–[illegible] § 61.45–20 of this chapter.

§ 2.20–50 *Repairs or alterations in lifesaving or fire prevention equipment.* No repairs or alterations shall be made to any lifesaving or fire detecting or fire extinguishing equipment except in an emergency without advance notice to the Officer in Charge, Marine Inspection. See §§ 33.01–20, 34.01–5, 78.33–10, and 97.30–10 of this chapter.

§ 2.20–60 *Reports of casualties and accidents*—(a) *General.* Reports of casualties or accidents occurring on or to vessels is required by 33 U. S. C. 361 or 46 U. S. C. 239 and the regulations supplementary thereto in §§ 35.50, 78.07, 97.07, and 136.05 of this chapter. A written notice is required from the master, owner, or agent of a vessel of the United States to the Officer in Charge, Marine Inspection, at or nearest the port where the casualty or accident occurred as soon as possible after the casualty or accident. A report is required whenever any vessel is involved in a casualty or accident involving loss of life, material loss of property, serious injury to any person, damage affecting the seaworthiness or efficiency of a vessel, stranding or grounding, or an aid to navigation under the jurisdiction of the Coast Guard.

(b) *Accidents.* The officer in charge of a vessel reports accidents on Form CG–924E, Report of Personal Accident Not Involving Death, whenever an accident occurs to passengers, members of the crew, and other persons who may be injured on board a vessel and incapacitated for a period in excess of 72 hours. This Form CG–924E if filed promptly will be accepted as the written notice required by the other regulations in this chapter.

(c) *Casualties.* The officer in charge of a vessel reports on Form CG–2692, Report of Marine Casualty (or Accident), when accidents or casualties involve death, damage affecting seaworthiness of a vessel, stranding or grounding, or material property damage in excess of $1,500. This Form CG–2692 will be accepted as the written notice required if submitted promptly.

(d) *Information required.* The written notice, as well as the reports, require a description of the vessel or vessels involved, names of owner and master, location, nature and probable cause of casualty or accident, the nature and extent of injury to persons, and the damage to property. The Forms CG–924E and CG–2692 may be obtained from any local marine inspection office.

(e) *Casualty involving aids to navigation.* The officer in charge of a vessel which collides with a lightship, buoy, or other aid to navigation under the jurisdiction of the Coast Guard, or is connected with any such collision is required to report the casualty or accident to the nearest Officer in Charge, Marine Inspection. See §§ 35.15–1, 78.07–20, 97.07–20, and 136.05–20 of this chapter.

CROSS REFERENCE: For investigations or hearings on marine casualties see Parts 4, 136, and 137 of this chapter.

SUBPART 2.30—NUMBERING OF UNDOCUMENTED VESSELS

§ 2.30–1 *Numbering.* The owner(s) of every undocumented vessel described in 46 U. S. C. 288 must obtain a certificate of award of number which number must be painted or attached to each bow of the vessel. The procedures to be followed in applying for such certificate; on transfer, loss, or destruction of the vessel; and on change of residence of owner from one Coast Guard or customs district to another are set forth in Part 172 of this chapter.

§ 2.30–10 *Application.* Application for a certificate for a vessel not previously numbered is made on Form CG 1512, Application for Number for Undocumented Motor Vessel, by the owner to the District Commander of the district in which the vessel is owned or to the Officer in Charge, Marine Inspection. The form is obtained at the office of the Coast Guard District Commander or Officer in Charge, Marine Inspection. The application lists the name and address of owner and description of the vessel and the engine and must be submitted together with evidence of ownership of the vessel. The purchaser(s) of a vessel already numbered shall execute the application on the back of Form CG 1513, Certificate of Award of Number to an Undocumented Vessel.

§ 2.30–20 *Certificate issued.* Upon complying with the necessary requirements as to prima facie evidence of ownership, Form CG 1513, Certificate of Award of Number to an Undocumented Vessel, is issued by the Coast Guard District Commander or Officer in Charge, Marine Inspection.

SUBPART 2.50—NAVIGATION AND VESSEL INSPECTION LAWS

§ 2.50–1 *Waivers*—(a) *Authority for and limitations on issuance.* Compliance with certain of the navigation and vessel inspection laws may be waived by the Commandant under authority of the act of December 27, 1950 (Public Law 891), and the delegation of waiver authority contained in Department of the Treasury Order CGFR 51–1, dated January 23, 1951 (16 F. R. 731), in any case where such waiver is deemed necessary in the interest of national defense.

(b) *Policy.* It is the policy of the Coast Guard, in the current administration of the laws and regulations relating to navigation and vessel inspection, to further the interests of national defense by simplifying the procedure involved therein, eliminating all causes of delay in the sailing of vessels, and by bringing about a proper balance between the factors of safety at sea and the national defense. While it is not the policy of the Coast Guard to countenance willful violations of the laws and regulations or negligence in meeting the requirements thereof, neither is it contemplated that masters who exercise all reasonable efforts to comply with the requirements in effect be cited for violations on technical grounds.

(c) *Waivers issued.* The waivers having general applicability are published in Part 154 of this chapter, as well as in 33 CFR Part 19.

(d) *Specific individual waivers.* (1) Applications for waivers affecting only one vessel in any one order under the provisions of § 154.01 of this chapter are made on Form CG–2633, Application for Waiver Order. The application shall state the name of the vessel, her employment, the requirements of law or regulations, waiver of which is requested, the reasons why waiver is necessary, and shall be signed by the master, owner, or agent of the vessel, or by the representative of any interested Government agency. The application shall be made to the Coast Guard District Commander or to his designated representative at the port or place where the vessel is located. In any port or place of the Canal Zone or in any foreign port or place the application shall be made to the designated representative of the Commandant at such port or place or if the Coast Guard has not established facilities in such port or place to the nearest designated representative of the Commandant at a port or place where such facilities have been established.

(2) If the request is granted the waiver order will describe the vessel, the requirements of law or regulations waived, the conditions to which the waiver is subject, and the period of time for which the waiver is effective.

(e) *General waivers.* Applications for waivers having general applicability should be addressed to the Commandant (M), U. S. Coast Guard, Washington, D. C. Only the Commandant is authorized to issue general waivers which affect more than one vessel in one order.

§ 2.50–20 *Reports and assessments of penalties for violation of laws or regulations.* (a) Reports of violation of navigation and vessel inspection laws and regulations in this chapter as well as in 33 CFR Parts 80 to 100, inclusive, administered and enforced by the Coast Guard are reported by Coast Guard personnel detecting them to the Coast Guard District Commander of the district in which the violations occurred. The alleged offender will be informed of the nature of the violations. Form CG 2767, Notice of Report of Violation, normally will be used.

(b) If a violation of law or regulation involves a civil penalty, the alleged offender will be informed of his right to apply for relief from the imposition of penalties. He may, if he so desires, appear in person before the Coast Guard District Commander or his designated representative. The written application is made to the Coast Guard District Commander and may be made on Form CG 2767A, Application for Relief from Penalties for Violation of Navigation and Vessel Inspection Laws and Regulations. If the application for relief is granted, the case is closed; if denied, the full or mitigated penalty is assessed and notice given to the offender on Form CG 2767B, Assessment of Penalties for Violation of the Navigation and Vessel Insection Laws and Regulations, and Conditional Mitigation of Penalties. This notice may provide for a reduction in the penalty on condition that the lesser penalty be paid within 30 days of the date of the notice.

(c) The offender will be given instructions for making an appeal to the Commandant from the actions of the Coast Guard District Commander if the amount of such penalty assessed exceeds $50. The decision of the Coast Guard District Commander in a case where the penalty is $50 or less is final.

(d) If payment of the assessed penalty or mitigated penalty is not made within 30 days of the date of the notice, or if appeal is not made, action to collect the full penalty is taken. If no application for relief is submitted, assessment of penalty is made on Form CG 2767C, Assessment of Penalties for Violation of Navigation and Vessel Inspection Laws and Regulations, and the offender is advised that court action by the United States Attorney will be recommended if payment of the penalty or penalties is not made within 30 days.

§ 2.50–25 *Payment of penalty for violation of law or regulation.* (a) The payment of any penalty is acknowledged on Coast Guard Form CG 2767E, Disbursing Officers' Receipt (Navigation Fine).

(b) If the penalty paid is determined by the Commandant to have been illegally, improperly, or excessively imposed, and the money has already been covered into the United States Treasury, the application for a refund may be made on Form CG 1086, Claim for Navigation Fine Exacted in Excess or in Error, which should be mailed to the appropriate Coast Guard District Commander for transmission to the Commandant. Such application must be made by the payor within one year of the date of payment of the penalty. If the penalty paid is determined by the Commandant to have been illegally, improperly, or excessively imposed and the money has not been covered into the United States Treasury, the Coast Guard upon application will refund the penalty or that portion considered to be in excess of the proper amount.

§ 2.50–30 *Motorboat Act violations.* The procedures described in §§ 2.50–20 and 2.50–25 are followed in the assessment of penalties for violations of the Act of June 7, 1918, regarding numbering of undocumented vessels and the Motorboat Act of April 25, 1940 (46 U. S. C. 288, 526–526t), and the applicable regulations in Parts 24–26, 70–78, 90–97, and 172 of this chapter.

SUBPART 2.75—APPROVALS OF SAFETY EQUIPMENT, MATERIALS AND INSTALLATIONS, AND QUALIFICATIONS FOR CONSTRUCTION PERSONNEL

§ 2.75–1 *Approvals.* (a) The Commandant is required by law or regulations in this chapter to approve certain installations and items of safety equipment before they may be installed or used on merchant vessels subject to inspection or on certain other vessels and motorboats.

(b) The items required to be approved by the Commandant are published in the FEDERAL REGISTER and in a pamphlet CG 190, Equipment Lists for Merchant Vessels.

(c) The approval of equipment granted a manufacturer cannot be transferred to another person, company, or

corporation, without specific approval from the Commandant.

§ 2.75–10 *Requirements and tests.* (a) The requirements and tests which the items are required to meet are in Parts 160–164 of this chapter, or are contained in specifications, copies of which may be obtained from the Commandant. If the requirements are met a certificate of approval for a term of 5 years is issued on Coast Guard Form 10030, Certificate of Approval, or are approved by letter by the Commandant. Notice of such approval is published in the FEDERAL REGISTER.

(b) These items which do not meet the requirements are returned to the applicants who are informed in what respects they failed to meet the requirements.

(c) Applications for approval shall be made to the Commandant and there shall be submitted with the application the items for which approval is desired or the appropriate plans and specifications.

(d) After approval is granted, manufacturers of certain items are required to submit an affidavit that the manufactured item will comply with the applicable rules and specifications. The affidavit is made on one of the following appropriate Coast Guard forms:

(1) CG 935—Affidavit of Manufacturer of Marine Boilers. (Submitted to the Officer in Charge, Marine Inspection.)

(2) CG 935A—Affidavit of Manufacturer of Materials or Appliances on Vessels Subject to the Rules and Regulations of the U. S. Coast Guard (required only for manufacturers of engineering material or appliances). (Submitted to the Commandant.)

(3) CG Form (no number)—Affidavit of Manufacturer of Standard Type Life Saving Equipment (buoyant cushions and cork and balsa life preservers only). (Submitted to the Commandant.)

§ 2.75–50 *Withdrawals or terminations of approvals.* (a) Approvals may be withdrawn if items are found not to be in compliance with the conditions of approval or if necessary by reason of changes in regulations. Notice will be given to the manufacturer who is given an opportunity to present his case at a public hearing of the Merchant Marine Council. (See 33 CFR 1.05–1, 1.05–10).

(b) Approvals of equipment are terminated when the manufacturer is no longer in business, or when the item is no longer being manufactured, or when the approval expires.

§ 2.75–60 *Certification of ship's stores and supplies.* Ship's stores and supplies of a dangerous nature as defined in §§ 147.02–1 and 147.02–2 of this chapter shall not be used on board vessels, domestic or foreign, on the navigable waters of the United States, including its territories and possessions, unless they have been certified for such use by the Coast Guard. The procedure for obtaining certification and the stores of a dangerous nature which do not require such certification are contained in or referred to in §§ 147.03–1 to 147.03–11, inclusive, of this chapter.

§ 2.75–70 *Welders.* Welders are required to pass tests before being permitted to make welds subject to inspection by the Coast Guard. Description of the tests is contained in Part 56 of this chapter. Upon satisfactory performance of the tests, Form CG 965, Record Card Welder's Qualification Tests, is issued by the Officer in Charge, Marine Inspection to the applicant who shall carry such card while engaged in welding subject to inspection by the Coast Guard or by similar cards issued by the Department of the Navy or the American Bureau of Shipping.

SUBPART 2.85—LOAD LINES

§ 2.85–1 *Assignment of load lines.* Vessels listed in 46 U. S. C. 85 and 46 U. S. C. 88 are required by those acts to have load lines assigned. The procedures for the assignment of load lines, the issuance of Load Line Certificates, the annual inspections required, the causes for cancellation of certificates, and the forms of those certificates are contained in the regulations appearing in Parts 43–45 of this chapter.

SUBPART 2.90—PLANS, DRAWINGS OR BLUEPRINTS

§ 2.90–1 *General requirements.* (a) Drawings, blueprints or plans showing the details of construction of vessels subject to inspection or installations thereon are required to be submitted for approval in accordance with applicable regulations in this chapter, information as to which may be obtained at any local Marine Inspection Office.

(b) The requirements for passenger vessel construction are in Parts 43–46, 70–78, of this chapter.

(c) The requirements for tank vessel construction are in Parts 30–39, 43–45, of this chapter.

(d) The requirements for cargo and miscellaneous vessel construction are in Parts 43–45, 90–97, of this chapter.

(e) The requirements for marine engineering installations or equipment are in Parts 50–69 of this chapter.

(f) The requirements for electrical engineering installations or equipment are in Parts 110–113 of this chapter.

(g) The requirements for items to be manufactured under specific approval by the Commandant are in Parts 160–164 of this chapter.

PART 3—MERCHANT MARINE PERSONNEL

Part 3 is amended to read as follows:

SUBPART 3.01—LICENSES AND DOCUMENTS

Sec.
3.01–1 Applications for licenses or documents.
3.01–75 Appeals.

SUBPART 3.13—SHIPMENT AND DISCHARGE OF SEAMEN

3.13–1 Signing-on and discharging seamen.
3.13–10 Shipping articles.
3.13–15 Forecastle card.
3.13–20 Crew list.
3.13–30 Allotments.
3.13–35 Log books.
3.13–40 Discharges.
3.13–45 Seamen not shipped or discharged before shipping commissioners.
3.13–50 Service record.

SUBPART 3.15—ARBITRATION BY SHIPPING COMMISSIONERS

Sec.
3.15–1 Arbitration.
3.15–5 Mutual releases.

SUBPART 3.19—EFFECTS OF DECEASED OR DESERTING SEAMEN

3.19–1 Accounts of wages and effects.
3.19–5 Kinsman's petition.

CROSS REFERENCE: For Coast Guard jurisdiction, see 33 CFR Part 1.

AUTHORITY: §§ 3.01–1 to 3.19–5 issued under R. S. 4405, as amended, 4462, as amended; 46 U. S. C. 375, 416. Interpret or apply sec. 7, 49 Stat. 1936, as amended; 46 U. S. C. 669.

SUBPART 3.01—LICENSES AND DOCUMENTS

§ 3.01–1 *Applications for licenses or documents.* Applications for licenses, extension of routes, or documents required for officers or seamen by 46 U. S. C. 214, 224, 226, 228, 229, 229b, 230, 237, 243, 367, 391a, 404, 405, 526f, 1333, 672, 643, 481, or 50 U. S. C., App., 1275 and Public Law 525, 80th Congress, 2d Session and the regulations in Parts 10 and 12 of this chapter as a prerequisite for employment shall be made on one of the following Coast Guard forms which are obtainable from the Officer in Charge, Marine Inspection, at any local marine inspection office: CG 866, License application; CG 719, Seaman's certificate application. The procedures for obtaining the licenses or documents, renewals, if necessary, or duplicates, if lost; the qualifications; and examinations necessary, are all set forth in Parts 10 and 12 of this chapter, together with Coast Guard numbers and titles of forms used, obtainable from any marine inspection office.

§ 3.01–75 *Appeals*—(a) *General.* Any person aggrieved by any decision or action of the Officer in Charge, Marine Inspection, may appeal therefrom to the Coast Guard District Commander of the district in which the action or decision was made. A further appeal may be made to the Commandant, U. S. Coast Guard, from the decision of the District Commander.

(b) *Time limits.* (1) Appeals from decisions of the inspectors or the Officer in Charge, Marine Inspection, to the Coast Guard District Commander, shall be made in writing within 30 days after the decisions or actions appealed from shall have been rendered or taken. Such appeals shall set forth the requirements appealed from and the reasons why the decision or action should be set aside or revised.

(2) Appeals from the decisions of the Coast Guard District Commander to the Commandant shall be made in writing within 30 days after the decisions appealed from shall have been rendered.

(c) *Decision on appeals.* Pending the determination of the appeal, the decision of the Officer in Charge, Marine Inspection, shall remain in effect. The decision of the Commandant is final.

SUBPART 3.13—SHIPMENT AND DISCHARGE OF SEAMEN

§ 3.13–1 *Signing-on and discharging seamen.* The master of any merchant vessel of 75 tons or upward, engaged in the intercoastal trade or of any vessel bound from a port in the United States to any foreign port, other than vessels engaged in trade between the United States and the British North American possessions or the West Indies, or the Republic of Mexico, is required to enter into an agreement with each member of the crew who shall be discharged under the agreement and receive wages in the presence of a shipping commissioner in accordance with 46 U. S. C. 564. Where the complete crew has been signed on in the presence of a shipping commissioner and the later shipment of other seamen becomes necessary because of desertion or casualty, the master may sign on such replacements without the presence of a shipping commissioner but he is required to report the transaction immediately upon arrival at first port of call to the United States consul at or nearest such port, or in the Panama Canal Zone to the shipping commissioners or deputy shipping commissioners there. Shipping commissioners may, at the request of the master or owner of a vessel, ship and discharge all or part of the crew of a vessel engaged in the coastwise trade, or trade between the United States and the Dominion of Canada, or Newfoundland, or the West Indies, or Mexico, in accordance with 46 U. S. C. 646.

§ 3.13–10 *Shipping articles.* For the signing-on and discharging of seamen in accordance with 46 U. S. C. 564, 565, 566, and 713, and the regulations in Part 14 of this chapter, the shipping commissioners furnish Forms CG 705, 705A, and 705B, Shipping articles, same except for size, to record the agreement entered into between the master and crew of a vessel. Copies of these forms are obtainable upon request from shipping commissioners or Officers in Charge, Marine Inspection, at marine inspection offices, U. S. Coast Guard. It is the duty of shipping commissioners to see that each officer signing on is in possession of a continuous discharge book, certificate of identification, or United States merchant mariner's document, and a license; and that each signing on in an unlicensed capacity is in possession of a continuous discharge book or a certificate of identification and a certificate of service or certificate of efficiency or a United States merchant mariner's document representing such certificates. The shipping articles are prepared in quadruplicate, original and duplicate retained by the master pending completion of voyage, the triplicate retained by shipping commissioner, and quadruplicate forwarded to Commandant, U. S. Coast Guard. After the members of the crew are signed on the shipping commissioner prepares Form CG 708, Shipping of Seamen, certifying that the crew members knew and willingly signed the shipping articles, which is attached to the shipping articles. When the voyage or period of time covered by the shipping articles is completed, the members of the crew are discharged and the wages paid in the presence of the shipping commissioner, if required by law, and proper entries made in the shipping articles.

§ 3.13–15 *Forecastle card.* At the commencement of every voyage or engagement the master is required to post certain excerpts from the shipping articles in such part of the vessel as to be accessible to the crew in accordance with 46 U. S. C. 577. The Forecastle Card, Form CG 704, is obtainable from shipping commissioners or Officer in Charge, Marine Inspection, U. S. Coast Guard.

§ 3.13–20 *Crew list.* The master of a merchant vessel in certain cases is required to file with the collectors of customs a list of crew members. Form CG 710A is furnished for this purpose and may be obtained from shipping commissioners or Officer in Charge, Marine Inspection.

§ 3.13–30 *Allotments.* A merchant mariner desiring to make an allotment of his wages, in accordance with the regulations in Part 15 of this chapter, fills out Form CG 722, Seaman's Allotment Note, furnished by the shipping commissioner at the time he signs the shipping articles, or copies may be obtained upon request from shipping commissioners in the United States ports, or from United States consular officers in foreign ports. If the allotment complies with the law, it is approved. No appeals are permitted.

§ 3.13–35 *Log books.* Every vessel of 75 tons or upward, engaged in the intercoastal trade, or any vessel bound from a port in the United States to any foreign port, other than in the British North American possessions, shall have an official log book and every master of such vessel shall make or have entries made therein regarding matters required by 46 U. S. C. 201, 202, 203, 701, 702, and 85. One or more copies of the official log book, Coast Guard Form 706–B or 706–C, depending upon the number of persons employed as crew, is furnished the master of a vessel at the time the crew is signed on before a shipping commissioner; or copies of the official log book are obtainable upon request from the Officer in Charge, Marine Inspection. After the official log books have served their purpose they are filed with the shipping commissioner or Officer in Charge, Marine Inspection.

§ 3.13–40 *Discharges.* When a master of a vessel in accordance with Part 14 of this chapter discharges a merchant seaman and makes entries in the seaman's continuous discharge book, he will fill out Form CG 718E, Record of Entry in Continuous Discharge Book, which is forwarded to the Commandant, United States Coast Guard. The Form CG 718E is obtainable from shipping commissioners, collectors of customs and deputy collectors of customs acting as shipping commissioners or Officers in Charge, Marine Inspection. When a seaman holds a certificate of identification, a certificate of discharge, Form CG 718A, is issued and approved by a shipping commissioner or master as evidence of service performed. This form may be obtained upon request from shipping commissioners, collectors of customs or deputy collectors of customs acting as shipping commissioners or Officers in Charge, Marine Inspection.

§ 3.13–45 *Seamen not shipped or discharged before shipping commissioners.* Masters of certain vessels are required to report on ship personnel not shipped or discharged before a shipping commissioner. The Form CG 735 (T) has been prepared and must be used by the masters in accordance with Part 14 of this chapter. The form may be obtained upon request from shipping commissioners, collectors or deputy collectors of customs acting as shipping commissioners, or Officers in Charge, Marine Inspection. When voyage is completed, it must be delivered to nearest marine inspection office for transmission to Headquarters.

§ 3.13–50 *Service record.* A merchant mariner upon discharge in accordance with the requirements of Part 14 of this chapter has recorded in his continuous discharge book entries regarding his service. When the merchant mariner requests in person or writing for a record of sea service shown in a surrendered continuous discharge book, the Officer in Charge, Marine Inspection, or other issuing officer will prepare in duplicate Form CG 723, Certificate of Seamen's Service, and will deliver the original to the seaman and send the duplicate to Commandant, U. S. Coast Guard.

SUBPART 3.15—ARBITRATION BY SHIPPING COMMISSIONERS

§ 3.15–1 *Arbitration.* The Form CG 717, Agreement as to Arbitration, is used by seamen, master, consignees, agents or owners of vessels in submitting matters to shipping commissioners. This form is obtainable from shipping commissioners or collectors of customs or deputy collectors of customs acting as shipping commissioners. One copy of the form is made and this copy is retained by the shipping commissioner who acts on the matters submitted and his decision is final. No appeals are allowed.

§ 3.15–5 *Mutual releases.* The Form CG 713A, Mutual Release, is used by masters and seamen to effect settlement of claims for wages in cases of seamen signed off prior to completion of a voyage. This form may be obtained from shipping commissioners or collectors of customs or deputy collectors of customs acting as shipping commissioners. One copy is prepared and retained by the shipping commissioner who acts on the matters involved and his decision is final. A certificate of mutual release, Form CG 739, is prepared by the shipping commissioner or person acting as shipping commissioner, signed by the seaman when given to him by the shipping commissioner, and is used by the seaman not present at sign-off of vessel's crew as evidence that he has signed a mutual release. This form is prepared in duplicate from information in shipping articles and official log book.

SUBPART 3.19—EFFECTS OF DECEASED OR DESERTING SEAMEN

§ 3.19–1 *Accounts of wages and effects.* The masters of certain United States vessels in the cases of deceased or deserting seamen have to prepare Form CG 1517, Account of Wages and Effects of Deceased or Deserting Seamen, for use in disposition of the wages and effects of such seamen. The forms may

be obtained upon request from shipping commissioners, collectors or deputy collectors of customs acting as shipping commissioners, or Officers in Charge, Marine Inspection. Four copies are prepared and submitted to the shipping commissioner for transmission to the District Court. The shipping commissioner upon examination of information on the form, may approve or disapprove the account after reviewing the vessel's official log book. No appeal is permitted. The seamen's next of kin is informed of the action taken.

§ 3.19–5 *Kinsman's petition.* The next of kin of a deceased seaman has to petition the District Court of the United States for the wages and effects of the deceased seaman on Form CG 726, Kinsman's petition for wages and effects of deceased seaman. This form may be obtained upon request from shipping commissioners, collectors or deputy collectors of customs acting as shipping commissioners, or Officers in Charge, Marine Inspection. One copy of the form is presented by the next of kin to the United States District Court who acts upon the petition and either approves or disapproves the petition.

Subchapter B—Merchant Marine Officers and Seamen

PART 16—UNITED STATES SHIPPING COMMISSIONERS

Chapter I is amended by adding a new Part 16 to Subchapter B reading as follows:

Sec.
16.01 Shipping commissioners designated as enforcement officers.
16.05 Acceptance of unclaimed wages.
16.10 Payment of deceased or deserting seamen's wages.

AUTHORITY: §§ 16.01 to 16.10 issued under sec. 7, 49 Stat. 1936, as amended; 46 U. S. C. 689.

§ 16.01 *Shipping commissioners designated as enforcement officers.* (a) Section 7 of the act of June 25, 1936 (49 Stat. 1936), makes it the duty of the Commandant, U. S. Coast Guard to enforce the provisions of the above act through collectors of customs and other Government officers acting under the direction of the Coast Guard, and to make such rules and regulations as he may deem necessary to carry out the provisions of the said act.

(b) In order to enforce more effectually compliance with the provisions of this act, persons or officials performing United States shipping commissioners duties are hereby designated as enforcement officers for carrying out the provisions of the act.

§ 16.05 *Acceptance of unclaimed wages.* (a) Shipping commissioners or employees shall not accept unclaimed wages of seamen except in the form of checks or duly recognized money orders. In cases where the advisability of accepting the personal check of a master is doubtful, a money order must be provided.

(b) Every effort should be made to discourage the leaving of unclaimed wages with shipping commissioners. The acceptance of these wages is outside of the duties of shipping commissioners and they are personally responsible therefor.

CROSS REFERENCE: For Department of State regulations relating to seamen's wages, see 22 CFR 110.5.

§ 16.10 *Payment of deceased or deserting seamen's wages.* In the case of deceased or deserting seamen's wages, such wages must be paid in the form of a check or duly recognized money order, unless such payment is made direct to the shipping commissioner. In cases where the advisability of accepting the personal check of a master is doubtful, the payment must be made by money order or direct to the shipping commissioner in cash.

CROSS REFERENCE: For Department of State regulations relating to seamen's wages, see 22 CFR 110.5.

Subchapter C—Uninspected Vessels

1. The Title for Subchapter C is changed from "Motorboats, and Certain Vessels Propelled by Machinery Other Than by Steam More Than 65 Feet in Length" to "Uninspected Vessels," and Part 24 is amended to read as follows:

PART 24—GENERAL PROVISIONS

SUBPART 24.01—AUTHORITY AND PURPOSE

Sec.
24.01–1 Purpose of regulations.
24.01–5 Assignment of functions.
24.01–10 Authority for regulations.

SUBPART 24.05—APPLICATION

24.05–1 Vessels subject to the requirements of this subchapter.
24.05–5 Specific application noted in text.

SUBPART 24.10—DEFINITION OF TERMS USED IN THIS SUBCHAPTER

24.10–1 Approved.
24.10–3 Carrying passengers for hire.
24.10–5 Carrying freight for hire.
24.10–7 Commandant.
24.10–9 Coast Guard District Commander.
24.10–11 Headquarters.
24.10–13 International voyage.
24.10–15 Marine inspector or inspector.
24.10–17 Motorboat.
24.10–19 Motor vessel.
24.10–21 Officer in Charge, Marine Inspection.
24.10–23 Passenger.
24.10–25 Pilot rules.
24.10–27 Vessel.

SUBPART 24.15—EQUIVALENTS

24.15–1 Conditions under which equivalents may be used.

SUBPART 24.20—GENERAL MARINE ENGINEERING REQUIREMENTS

24.20–1 Marine engineering details.

AUTHORITY: §§ 24.01–1 to 24.20–1 issued under R. S. 4405, as amended, 4462, as amended, sec. 17, 54 Stat. 166, as amended; 46 U. S. C. 375, 416, 526p.

SUBPART 24.01—AUTHORITY AND PURPOSE

§ 24.01–1 *Purpose of regulations.* (a) The purpose of the regulations in this subchapter is to set forth uniform minimum requirements for motorboats, certain motor vessels, and barges carrying passengers when towed by motorboats or motor vessels in accordance with the intent of the Motorboat Act of April 25, 1940, as amended (54 Stat. 163–167; 46 U. S. C. 526–526t). The regulations are necessary to carry out the provisions of the Motorboat Act of April 25, 1940, and such regulations have the force of law.

§ 24.01–5 *Assignment of functions.* (a) By Reorganization Plan No. 3 of 1946, effective July 16, 1946, the marine inspection functions of the former Bureau of Marine Inspection and Navigation and its officers and employees were transferred to the Commandant, United States Coast Guard. By Reorganization Plan No. 26 of 1950, effective July 31, 1950 (15 F. R. 4935, 5 U. S. C. Note under 241), the functions formerly vested in the Commandant, United States Coast Guard, were transferred to the Secretary of the Treasury with certain specified exceptions. The Secretary of the Treasury by an order dated July 31, 1950 (15 F. R. 6521), delegated to the Commandant the functions formerly performed by him under Reorganization Plan No. 3 of 1946.

§ 24.01–10 *Authority for regulations—*(a) *General.* (1) The authority to prescribe regulations generally is set forth in R. S. 4405 and 4462, as amended, and in section 17 of the Motorboat Act of April 25, 1940, as amended (46 U. S. C. 375, 416, 526p).

(b) *Lifesaving appliances.* (1) The regulations regarding lifesaving appliances interpret or apply section 6 of the Motorboat Act of April 25, 1940, as amended (46 U. S. C. 526e).

(c) *Fire protection equipment.* (1) The regulations regarding fire protection equipment interpret or apply section 8 of the Motorboat Act of April 25, 1940, as amended, and section 2 of the Act of October 9, 1940, as amended (46 U. S. C. 526g, 463a).

(d) *Flame arresters.* (1) The regulations regarding flame arresters interpret or apply section 10 of the Motorboat Act of April 25, 1940, as amended (46 U. S. C. 526i).

(e) *Ventilation of bilges.* (1) The regulations regarding ventilation of bilges interpret or apply section 11 of the Motorboat Act of April 25, 1940, as amended (46 U. S. C. 526j).

SUBPART 24.05—APPLICATION

§ 24.05–1 *Vessels subject to the requirements of this subchapter.* (a) This subchapter shall be applicable to all vessels indicated in Column 6 of Table 24.05–1 (a), and shall apply to all such United States flag vessels, and to all such foreign vessels, except as follows:

(1) Any vessel operating exclusively on inland waters which are not navigable waters of the United States.

(2) Any vessel while laid up and dismantled and out of commission.

(3) With the exception of vessels of the U. S. Maritime Administration, any vessel with title vested in the United States and which is used for public purposes.

TABLE 24.05–1 (a)

Method of propulsion	Size or other limitations	Classes of vessels (including motorboats) examined or inspected under various Coast Guard regulations			
		Vessels inspected and certificated under Subchapter D—Tank Vessels [1]	Vessels inspected and certificated under Subchapter H—Passenger Vessels [1]	Vessels inspected and certificated under Subchapter I—Cargo and Miscellaneous Vessels [1]	Vessels subject to provisions of Subchapter C—Uninspected Vessels [1] [2]
Column 1	Column 2	Column 3	Column 4	Column 5	Column 6
Steam	Vessels 40 feet in length and under.[4]	All vessels carrying combustible or inflammable liquid cargo in bulk.	None	All tug boats and tow boats.	All vessels except those covered by Subchapters D and I.
	Vessels over 40 but not over 65 feet in length.[4]	All vessels carrying combustible or inflammable liquid cargo in bulk.	None	All tug boats and tow boats.	All vessels except those covered by Subchapters D and I.[4]
	Vessels over 65 feet in length.[4]	All vessels carrying combustible or inflammable liquid cargo in bulk.[4]	All vessels carrying more than 12 passengers on an international voyage except yachts, and all other vessels carrying passengers except: 1. Yachts. 2. Documented cargo vessels issued a permit to carry not more than 16 persons in addition to the crew. 3. Towing and fishing vessels, in other than ocean and coastwise service, issued a permit to carry persons on the bona fide business of the vessel, in addition to the crew, but not to exceed one for each net ton of the vessel.	All vessels except those covered by Subchapters D and H.	None.
Motor	Vessels of not over 15 gross tons.	All vessels carrying combustible or inflammable liquid cargo in bulk.	None	None	All vessels except those covered by Subchapter D.
	Vessels over 15 gross tons except seagoing motor vessels of 300 gross tons and over.	All vessels carrying combustible or inflammable liquid cargo in bulk.	All vessels carrying more than 12 passengers on an international voyage, except yachts, and all other vessels carrying passengers for hire except documented cargo vessels over 65 feet in length issued a permit to carry not more than 16 persons in addition to the crew.	All vessels carrying freight for hire except those covered by Subchapters D and H.	All vessels except those covered by Subchapters D, H, and I.
	Seagoing motor vessels of 300 gross tons and over.	All vessels carrying combustible or inflammable liquid cargo in bulk.[4]	All vessels carrying more than 12 passengers on an international voyage except yachts, and all other vessels carrying passengers except: 1. Yachts. 2. Documented cargo vessels issued a permit to carry not more than 16 persons in addition to the crew.	All vessels except those covered by Subchapters D and H, and those engaged in the fishing, oystering, clamming, crabbing, or any other branch of the fishery, kelp, or sponge industry.	All vessels except those covered by Subchapters D, H, and I.
Sail		All vessels carrying combustible or inflammable liquid cargo in bulk.	All vessels over 700 gross tons carrying passengers for hire.	None	None.
	Seagoing barges	All barges carrying combustible or inflammable liquid cargo in bulk.	All barges 100 gross tons and over carrying passengers.	All barges 100 gross tons and over except those covered by Subchapters D and H.	All barges carrying passengers except those covered by Subchapter H.
Non self-propelled.	Inland barges	All barges carrying combustible or inflammable liquid cargo in bulk.	All barges over 100 gross tons carrying passengers for hire.	None	All barges carrying passengers except those covered by Subchapter H.

[1] Subchapters E (Load Lines), F (Marine Engineering), and J (Electrical Engineering) of this chapter are also applicable under certain conditions.
[2] Public nautical school ships, other than vessels of the Navy and Coast Guard, shall meet the requirements of part 167 of Subchapter R (Nautical Schools) of this chapter. Civilian nautical school ships, as defined by 46 U. S. C. 1331, shall meet the requirements of Subchapter H (Passenger Vessels) and part 168 of Subchapter R (Nautical Schools) of this chapter.
[3] Any vessel on an international voyage is subject to the applicable requirements of the International Convention for the Safety of Life at Sea, 1948.
[4] Length measured from end to end over deck, excluding sheer.
[5] Boilers and machinery are subject to examination.
[6] Vessels covered by Subchapter H (Passenger Vessels) or I (Cargo and Miscellaneous Vessels) of this chapter, where the principal purpose or use of the vessel is not for the carriage of liquid cargo, may be granted a permit to carry a limited amount of combustible liquid cargo in bulk. The portion of the vessel used for the carriage of the combustible liquid cargo shall meet the requirements of Subchapter D (Tank Vessels) in addition to the requirements of Subchapter H (Passenger Vessels) or I (Cargo and Miscellaneous Vessels) of this chapter.

§ 24.05–5 *Specific application noted in text.* (a) At the beginning of the various parts, subparts, and sections, a more specific application is generally given for the particular portion of the text involved. This application sets forth the types, sizes, or services or vessels to which the text pertains, and in many cases limits the application of the text to vessels contracted for before or after a specific date. As used in this subchapter, the term "vessels contracted for" includes not only the contracting for the construction of a vessel, but also the contracting for a material alteration to a vessel, the contracting for the conversion of a vessel to a passenger vessel, and the changing of service or route of a vessel if such change increases or modifies the general requirements for the vessel or increases the hazards to which it might be subjected.

SUBPART 24.10—DEFINITION OF TERMS USED IN THIS SUBCAPTER

§ 24.10–1 *Approved.* This term means approved by the Commandant unless otherwise stated.

§ 24.10–3 *Carrying passengers for hire.* The carriage of any person or persons by a vessel for a valuable consideration, whether directly or indirectly flowing to the owner, charterer, operator, agent or any other person interested in the vessel.

§ 24.10–5 *Carrying freight for hire.* The carriage of any goods, wares, or merchandise or any other freight for a valuable consideration, whether directly or indirectly flowing to the owner, charterer, operator, agent, or any other person interested in the vessel.

§ 24.10–7 *Commandant.* This term means the Commandant of the Coast Guard.

§ 24.10–9 *Coast Guard District Commander.* This term means an officer of the Coast Guard designated as such by the Commandant to command all Coast Guard activities within his district, which include the inspection, enforcement, and administration of Title 52, Revised Statutes, and acts amendatory thereof or supplemental thereto, and rules and regulations thereunder.

§ 24.10–11 *Headquarters.* This term means the Office of the Commandant, Washington, D. C.

§ 24.10–13 *International voyage.* An international voyage as applied to United States vessels includes voyages between United States ports and ports

outside the United States as well as between United States Continental ports and ports in the Territory of Alaska, Commonwealth of Puerto Rico, Territory of Hawaii, the Panama Canal Zone, or any other separate portion of the United States constituting a possession or held under a protectorate or mandate. However, vessels solely navigating the Great Lakes and their connecting and tributary waters as far east as the exit of the Lachine Canal at Montreal, in the province of Quebec, Canada, shall not be considered as on an international voyage for the purpose of the regulations contained in this subchapter.

§ 24.10–15 *Marine inspector or inspector.* These terms mean any person from civilian or military branch of the Coast Guard assigned under the superintendence and direction of an Officer in Charge, Marine Inspection, or any other person as may be designated for the performance of duties with respect to the inspection, enforcement, and administration of Title 52, Revised Statutes, and acts amendatory thereof or supplemental thereto, and rules and regulations thereunder.

§ 24.10–17 *Motorboat.* This term means any vessel indicated in Column 6 of Table 24.05–1 (a), 65 feet in length or less which is propelled by machinery (including steam). The length shall be measured from end to end over the deck excluding sheer. This term includes a boat temporarily or permanently equipped with a detachable motor and any such boat when so propelled is subject to the applicable provisions of the Motorboat Act of April 25, 1940, and the regulations promulgated thereunder. For the purpose of this subchapter, motorboats are included under the term "vessel" unless specifically noted otherwise. The various classes of motorboats are as follows:

Class A—Any motorboat less than 16 feet in length.
Class 1—Any motorboat 16 feet or over and less than 26 feet in length.
Class 2—Any motorboat 26 feet or over and less than 40 feet in length.
Class 3—Any motorboat 40 feet or over and not more than 65 feet in length.

§ 24.10–19 *Motor vessel.* This term means any vessel more than 65 feet in length, which is propelled by machinery other than steam.

§ 24.10–21 *Officer in Charge, Marine Inspection.* This term means any person from the civilian or military branch of the Coast Guard designated as such by the Commandant and who, under the superintendence and direction of the Coast Guard District Commander, is in charge of an inspection zone for the performance of duties with respect to the inspections, enforcement, and administration of Title 52 Revised Statutes, and acts amendatory thereof or supplemental thereto, and rules and regulations thereunder.

§ 24.10–23 *Passenger.* A passenger is every person, other than the master and the members of the crew or other persons employed or engaged in any capacity on board a vessel in the business of that vessel. In the case of a vessel on an international voyage a child under one year of age is not counted as a passenger.

§ 24.10–25 *Pilot rules.* (a) The term "pilot rules" means the statutory rules of the road and the implementing regulations of the Commandant. The regulatory pilot rules are contained in 33 CFR Parts 80, 82, 84, 90, 92, 95, and 100.

(b) In accordance with law, the Coast Guard publishes the statutory rules of the road and regulatory pilot rules in pamphlet form as follows:

(1) Rules to Prevent Collisions of Vessels and Pilot Rules for Certain Inland Waters of the Atlantic and Pacific Coasts and of the Coast of the Gulf of Mexico. (CG 169)

(2) Pilot Rules for the Great Lakes and Their Connecting and Tributary Waters and the St. Marys River. (CG 172)

(3) Pilot Rules for the Western Rivers and the Red River of the North. (CG 184)

§ 24.10–27 *Vessel.* Where the word "vessel" is used in this subchapter, it shall be considered to include all vessels indicated in Column 6 of Table 24.05–1 (a), except as otherwise noted in this subpart.

SUBPART 24.15—EQUIVALENTS

§ 24.15–1 *Conditions under which equivalents may be used.* (a) Where in this subchapter it is provided that a particular fitting, appliance, apparatus, or equipment, or type thereof, shall be fitted or carried in a vessel, or that any particular arrangement shall be adopted, the Commandant may accept in substitution therefor any other fitting, apparatus, or equipment, or type thereof, or any other arrangement, provided that he shall have been satisfied by suitable trials that the fitting, appliance, apparatus, or equipment, or type thereof, or the arrangment is at least as effective as that specified in this subchapter.

(b) In any case where it is shown to the satisfaction of the Commandant that the use of any particular equipment, apparatus, or arrangement not specifically required by law is unreasonable or impracticable, the Commandant may permit the use of alternate equipment, apparatus, or arrangement to such an extent and upon such conditions as will insure to his satisfaction, a degree of safety consistent with the minimum standards set forth in this subchapter.

SUBPART 24.20—GENERAL MARINE ENGINEERING REQUIREMENTS

§ 24.20–1 *Marine engineering details.* (a) All marine engineering details relative to the design, construction, and testing of boilers and machinery on steam-propelled motorboats of over 40 feet in length will be found in Subchapter F (Marine Engineering) of this chapter.

PART 25—REQUIREMENTS

2. Part 25 is amended to read as follows:

SUBPART 25.01—APPLICATION

Sec.
25.01–1 Applicable to all vessels.

SUBPART 25.05—NAVIGATION LIGHTS AND SHAPES

Sec.
25.05–1 Vessels other than motorboats.
25.05–5 Motorboats operating on the high seas.
25.05–10 Motorboats operating on the navigable waters of the United States.

SUBPART 25.10—WHISTLES

25.10–1 Vessels other than sailing vessels, barges, and motorboats.
25.10–5 Motorboats operating on the high seas.
25.10–10 Motorboats operating on the navigable waters of the United States.

SUBPART 25.15—FOG HORNS

25.15–1 Vessels other than motorboats.
25.15–5 Motorboats.

SUBPART 25.20—FOG BELLS

25.20–1 Vessels other than motorboats.
25.20–5 Motorboats operating on the high seas.
25.20–10 Motorboats operating on the navigable waters of the United States.

SUBPART 25.25—LIFE PRESERVERS AND OTHER LIFESAVING EQUIPMENT

25.25–1 Application.
25.25–5 General provisions.
25.25–10 Life preservers and other lifesaving equipment required.
25.25–15 Storage.
25.25–90 Vessels contracted for prior to November 19, 1952.

SUBPART 25.30—FIRE EXTINGUISHING EQUIPMENT

25.30–1 Application.
25.30–5 General provisions.
25.30–10 Hand portable fire extinguishers and semiportable fire extinguishing systems.
25.30–15 Fixed fire extinguishing systems.
25.30–20 Fire extinguishing equipment required.
25.30–90 Vessels contracted for prior to November 19, 1952.

SUBPART 25.35—CARBURETOR BACKFIRE FLAME ARRESTERS

25.35–1 Must be approved.

SUBPART 25.40—VENTILATION

25.40–1 Tanks and engine spaces.

SUBPART 25.45—LIQUEFIED PETROLEUM GAS

25.45–1 Prohibited on vessels carrying passengers for hire.

AUTHORITY: §§ 25.01–1 to 25.45–1 issued under R. S. 4405, as amended, 4462, as amended, sec. 17, 54 Stat. 166; 46 U. S. C. 375, 416, 526p. Interpret or apply sec. 2, 54 Stat. 1028, as amended; 46 U. S. C. 463a.

SUBPART 25.01—APPLICATION

§ 25.01–1 *Applicable to all vessels.* (a) The provisions of this part shall apply to all vessels except as specifically noted.

SUBPART 25.05—NAVIGATION LIGHTS AND SHAPES

§ 25.05–1 *Vessels other than motorboats.* (a) All vessels other than motorboats shall be equipped with navigation lights and shapes as prescribed by the Pilot Rules applicable to the waters on which the vessel is navigated.

§ 25.05–5 *Motorboats operating on the high seas.* (a) All motorboats operating on the high seas outside the navigable waters of the United States shall meet the requirements for navigation lights and shapes prescribed by § 25.05–1 for vessels other than motorboats.

§ 25.05–10 *Motorboats operating on the navigable waters of the United States.* (a) Every motorboat operating on the navigable waters of the United States shall, in all weathers from sunset to sunrise, carry and exhibit lights when under way as prescribed by this section, and during such time no other lights which may be mistaken for those prescribed shall be exhibited. No penalty is incurred by motorboats for a failure to carry lights between the hours of sunrise and sunset.

(b) Every motorboat of Classes A and 1 shall carry the following lights:

(1) A bright white light aft to show all around the horizon.

(2) A combined lantern in the fore part of the vessel and lower than the white light aft, showing green to starboard and red to port, so fixed as to throw the light from right ahead as to to 2 points abaft the beam on their respective sides.

(c) Every motorboat of Classes 2 and 3 shall carry the following lights:

(1) A bright white light in the fore part of the vessel as near the stem as practicable so constructed as to show an unbroken light over an arc of the horizon of 20 points of the compass, so fixed as to throw the light 10 points on each side of the vessel; namely, from right ahead to 2 points abaft the beam on either side.

(2) A bright white light aft to show all around the horizon and higher than the white light forward.

(3) On the starboard side a green light so constructed as to show an unbroken light over an arc of the horizon of 10 points of the compass, so fixed as to throw the light from right ahead to 2 points abaft the beam on the starboard side. On the port side a red light so constructed as to show an unbroken light over an arc of the horizon of 10 points of the compass, so fixed as to throw the light from right ahead to 2 points abaft the beam on the port side. The said lights shall be fitted with inboard screens of sufficient length and height or shall be mounted on cabin sides and so set as to prevent these lights from being seen across the bow.

(d) All motorboats propelled by sail and machinery or by sail alone shall carry and exhibit the following lights:

(1) Motorboats of Classes A and 1 when propelled by sail and machinery or by sail alone shall carry the white light prescribed by § 25.05–10 (b) (1), but not the lantern prescribed by § 25.05–10 (b) (2).

(2) Motorboats of Classes 2 and 3 when propelled by sail and machinery or by sail alone shall carry the colored lights prescribed by § 25.05–10 (c) (3), but not the white lights prescribed by § 25.05–10 (c) (1) and (2).

(3) In addition, motorboats of all classes when so propelled shall carry ready at hand a lantern or flashlight showing a white light which shall be exhibited in sufficient time to avert collision.

(e) Every white light prescribed by this section shall be of such character as to be visible at a distance of at least 2 miles. Every colored light prescribed by this section shall be of such character as to be visible at a distance of at least 1 mile. The word "visible" when applied to lights shall mean visible on a dark night with clear atmosphere.

(f) The lights described in paragraphs (a) through (d) of this section are required by the Motorboat Act, as amended, 46 U. S. C. 526b. Other navigation lights and shapes required by the Pilot Rules applicable to the waters on which the motorboat is operated, such as anchor lights, amber whistle light, etc., which are not in conflict with the lights required by the Motorboat Act, shall also be carried.[1]

SUBPART 25.10—WHISTLES

§ 25.10–1 *Vessels other than sailing vessels, barges, and motorboats.* (a) All vessels other than sailing vessels, barges, and motorboats shall be equipped with an efficient whistle or similar appliance to give the necessary whistle signals required by the Pilot Rules applicable to the waters on which the vessel is navigated.

§ 25.10–5 *Motorboats operating on the high seas.* (a) All motorboats operating on the high seas outside the navigable waters of the United States shall meet the requirements for whistles or similar appliances prescribed by § 25.10–1 for vessels other than motorboats.

§ 25.10–10 *Motorboats operating on the navigable waters of the United States.* (a) Motorboats operating on the navigable waters of the United States shall be provided with an efficient whistle or other sound producing mechanical device as set forth in Table 25.10–10 (a), except:

(1) Commercial fishing motorboats may carry any device specified in Table 25.10–10 (a).

[1] Running lights. The lights provided for in section 3 of the Act of April 25, 1940 (54 Stat. 164, U. S. C. 526b), are running lights for motorboats subject to the provisions of that act in lieu of the lights prescribed respectively, by Article 2 of the Act approved June 7, 1897 (30 Stat. 96, 33 U. S. C. 172) covering certain harbors, rivers, and inland waters of the United States); Rule 3 of the act approved February 8, 1895, as amended (28 Stat. 645, as amended, 33 U. S. C. 252) (covering the Great Lakes and their connecting and tributary waters); and Rules 3, 5, 6, and 7 of R. S. 4233, as amended (28 Stat. 672, 33 U. S. C. 312, 314–316) (covering western rivers and the Red River of the North). These running lights are required to be carried on all motorboats when under way on navigable waters of the United States, in all weathers, from sunset to sunrise, but not on the high seas. Motorboats, when on the high seas, shall exhibit the lights prescribed by the International Rules of 1890, as amended (26 Stat. 312–325, as amended, 33 U. S. C. 71–82). The provisions of section 3 of the Act of April 25, 1940 (54 Stat. 164, 46 U. S. C. 526b), requiring running lights on motorboats are not in conflict with the provisions of the acts previously cited requiring anchor lights and other lights in addition to the running lights on pilot, towing, and fishing vessels. It will be observed that the penalties for violations of existing laws not in conflict with the act of April 25, 1940 (54 Stat. 163–167, 46 U. S. C. 526–526t), remain unchanged.

(2) Motorboats engaged in a race which has been previously arranged or announced, or while engaged in such navigation as is incidental to the tuning up of the motorboat and engines for the race, need not carry the devices required by Table 25.10–10 (a).

TABLE 25.10–10 (a)

Class of motorboat	Type of device
A	None.
1	Mouth, hand, or power operated, capable of producing a blast of 2 seconds or more duration, and audible for at least one-half mile.
2	Hand or power operated, capable of producing a blast of 2 seconds or more duration, and audible for a distance of at least 1 mile.
3	Power operated, capable of producing a blast of 2 seconds or more duration, and audible for a distance of at least 1 mile.

SUBPART 25.15—FOG HORNS

§ 25.15–1 *Vessels other than motorboats.* (a) All vessels other than motorboats shall be equipped with an efficient fog horn as prescribed by the Pilot Rules applicable to the waters on which the vessel is navigated. On vessels in ocean or coastwise service, the fog horn shall be sounded by mechanical means.

§ 25.15–5 *Motorboats.* (a) All motorboats operating on the high seas outside the navigable waters of the United States shall meet the requirements for fog horns prescribed by § 25.15–1 for vessels other than motorboats.

SUBPART 25.20—FOG BELLS

§ 25.20–1 *Vessels other than motorboats.* (a) All vessels other than motorboats shall be provided with fog bells as prescribed by the Pilot Rules applicable to the waters on which the vessel is operated.

§ 25.20–5 *Motorboats operating on the high seas.* (a) All motorboats operating on the high seas outside the navigable waters of the United States shall meet the requirements for fog bells prescribed by § 25.20–1 for vessels other than motorboats.

§ 25.20–10 *Motorboats operating on the navigable waters of the United States.* (a) When operating on the navigable waters of the United States, motorboats of Classes A and 1 are not required to carry fog bells. However, motorboats of Classes 2 and 3 operating on the navigable waters of the United States shall be provided with an efficient fog bell, except:

(1) Motorboats engaged in a race which has been previously arranged or announced, or while engaged in such navigation as is incidental to the tuning up of the motorboat and engines for the race, need not carry the fog bell required by this section.

SUBPART 25.25—LIFE PRESERVERS AND OTHER LIFESAVING EQUIPMENT

§ 25.25–1 *Application.* (a) The provisions of this subpart, with the exception of § 25.25–90, shall apply to all vessels contracted for on or after November 19, 1952. Vessels contracted for prior to that date shall meet the requirements of § 25.25–90.

§ 25.25–5 *General provisions.* (a) Where equipment in this subpart is required to be of an approved type, such equipment requires the specific approval of the Commandant. Such approvals are published in the FEDERAL REGISTER, and in addition, are contained in Coast Guard publication CG–190, "Equipment Lists for Merchant Vessels."

(b) Specifications for items of equipment required in this subpart have been promulgated and are contained in Subchapter Q (Specifications) of this chapter. In general, such specifications are of interest only to the manufacturer of the specific item of equipment.

(c) All life preservers shall be of an approved type, constructed in accordance with the applicable provisions of Subparts 160.002, 160.003, 160.004, or 160.005 of Subchapter Q (Specifications) of this chapter.

(d) All wood floats shall be of a type constructed in accordance with Subpart 160.039 of Subchapter Q (Specifications) of this chapter.

(e) All buoyant cushions shall be of an approved type, constructed in accordance with the applicable provisions of Subpart 160.007 or 160.008 of Subchapter Q (Specifications) of this chapter.

(f) All ring life buoys shall be of an approved type, constructed in accordance with Subpart 160.009 of Subchapter Q (Specifications) of this chapter.

§ 25.25–10 *Life preservers and other lifesaving equipment required.* (a) All motor vessels shall carry an approved life preserver for each person on board. Motor vessels carrying passengers for hire shall also be provided with an additional number of approved life preservers suitable for children, equal to at least 10 percent of the total number of persons carried.

(b) All motorboats shall carry lifesaving equipment as follows:

(1) Motorboats which carry passengers for hire shall be provided with an approved life preserver for each person carried, and with an additional number of approved life preservers suitable for children equal to at least 10 percent of the total number of persons carried when such barges are regularly operated with motorboats or motor vessels or steam vessels.

§ 25.25–15 *Storage.* (a) The lifesaving equipment on all vessels shall be so placed as to be readily accessible.

§ 25.25–90 *Vessels contracted for prior to November 19, 1952.* (a) Vessels contracted for prior to November 19, 1952, shall meet the applicable provisions of §§ 25.25–5 through 25.25–15 insofar as the number of items of equipment and the method of stowage is concerned. Existing items of equipment previously approved, but not meeting the applicable specifications may be continued in service so long as they are maintained in good condition. All new installations and replacements shall meet the applicable specifications.

SUBPART 25.30—FIRE EXTINGUISHING EQUIPMENT

§ 25.30–1 *Application.* (a) The provisions of this subpart, with the exception of § 25.30–90, shall apply to all vessels contracted for on or after November 19, 1952. Vessels contracted for prior to that date shall meet the requirements of § 25.30–90.

§ 25.30–5 *General provisions.* (a) Where equipment in this subpart is required to be of an approved type, such equipment requires the specific approval of the Commandant. Such approvals are published in the Federal Register, and in addition, are contained in Coast Guard publication CG–190, "Equipment List for Merchant Vessels." (b) All hand portable fire extinguishers, semiportable fire extinguishing systems, and fixed fire extinguishing systems shall be of an approved type.

§ 25.30–10 *Hand portable fire extinguishers and semiportable fire extinguishing systems.* (a) Hand portable fire extinguishers and semiportable fire extinguishing systems are classified by a combination letter and number symbol. The letter indicating the type of fire which the unit could be expected to extinguish, and the number indicating the relative size of the unit.

(b) For the purpose of this subchapter, all required hand portable fire extinguishers and semiportable fire extinguishing systems are of the "B" type; i.e., suitable for extinguishing fires involving flammable liquids, greases, etc.

(c) The number designations for size will start with "I" for the smallest to "V" for the largest. For the purpose of this subchapter, only sizes I through III will be considered. Sizes I and II are considered hand portable fire extinguishers and sizes III, IV, and V are considered semiportable fire extinguishing systems which shall be fitted with suitable hose and nozzle or other practicable means so that all portions of the space concerned may be covered. Examples of size graduations for some of the typical hand portable and semiportable fire extinguishing systems are set forth in Table 25.30–10 (c).

TABLE 25.30–10 (c)

Classification type—size	Foam, gallons	Carbon dioxide, pounds	Carbon tetrachloride, quarts	Dry chemical, pounds
B–I	1¼	4	1	4
B–II	2½	15	----	12
B–III	12	35	----	(1)

[1] Minimum values not established at this time.

(d) All hand portable fire extinguishers and semiportable fire extinguishing systems shall have permanently attached thereto a metallic name plate giving the name of the item, the rated capacity in gallons, quarts, or pounds, the name and address of the person or firm for whom approved, and the identifying mark of the actual manufacturer.

§ 25.30–15 *Fixed fire extinguishing systems.* (a) When a fixed fire extinguishing system is installed, it shall be of an approved carbon dioxide type, designed and installed in agreement with the applicable provisions of Subpart 76.15 of Subchapter H (Passenger Vessels) of this chapter.

§ 25.30–20 *Fire extinguishing equipment required.* (a) *Motorboats.* (1) All motorboats shall carry at least the minimum number of hand portable fire extinguishers set forth in Table 25.30–20 (a) (1), except that motorboats propelled by outboard motors and not carrying passengers for hire need not carry such hand portable fire extinguishers.

TABLE 25.30–20 (a) (1)

Class of motorboat	Length, feet	Minimum number of B–1 or B–II hand portable fire extinguishers required	
		No fixed fire extinguishing system in machinery space	Fixed fire extinguishing system in machinery space
A	Under 16	1	0
1	16 and over, but under 26	1	0
2	26 and over, but under 40	2	1
3	40 and over, but not over 65	3	2

(b) *Motor vessels.* (1) All motor vessels shall carry at least the minimum number of hand portable fire extinguishers set forth in Table 25.30–20 (b) (1).

TABLE 25.30–20 (b) (1)

Gross tonnage		Minimum number of B–II hand portable fire extinguishers
Over	Not over	
----	50	1
50	100	2
100	500	3
500	1,000	6
1,000	----	8

(2) In addition to the hand portable fire-extinguishers required by Subparagraph (1) of this paragraph, the following fire-extinguishing equipment shall be fitted in the machinery space:

(i) One Type B–II hand portable fire extinguisher shall be carried for each 1,000 B. H. P. of the main engines or fraction thereof. However, not more than 6 such extinguishers need be carried.

(ii) On motor vessels of over 300 gross tons, either one Type B–III semiportable fire-extinguishing system shall be fitted, or alternatively, a fixed fire-extinguishing system shall be fitted in the machinery space.

(c) *Barges carrying passengers.* (1) All barges of 65 feet in length or less carrying passengers, which are regularly operated with a motorboat or motor vessel, shall be fitted with hand portable fire extinguishers as required by Table 25.30–20 (a) (1), depending upon the length of the barge.

(2) All barges of over 65 feet in length carrying passengers, which are regularly operated with a motorboat or motor vessel, shall be fitted with hand portable fire extinguishers as required by Table 25.30–20 (b) (1), depending upon the gross tonnage of the barges.

§ 25.30–90 *Vessels contracted for prior to November 19, 1952.* (a) Vessels contracted for prior to November 19, 1952, shall meet the applicable provisions of §§ 25.30–5 through 25.30–20 insofar as the number and general type of equipment is concerned. Existing items of equipment and installations previously approved but not meeting the applicable requirements for type approval may be continued in service so long as they are in good condition. All new installations and replacements shall meet the requirements of §§ 25.30–5 through 25.30–20.

SUBPART 25.35—CARBURETOR BACKFIRE FLAME ARRESTERS

§ 25.35–1 *Must be approved.* (a) Carburetors on all engines on motorboats, other than outboard engines, and on all motor vessels, shall be fitted with an approved device for arresting backfire, constructed in accordance with Subpart 162.015 of Subchapter Q (Specifications) of this chapter. Installations made before November 19, 1952, need not meet the detailed requirements of the specification and may be continued in use so long as they are in good condition.

SUBPART 25.40—VENTILATION

§ 25.40–1 *Tanks and engine spaces.* (a) All motorboats or motor vessels using fuel having a flash point of 110 degrees F. or less shall have at least 2 ventilators fitted with cowls or their equivalent for the purpose of properly and efficiently ventilating the bilges of every engine and fuel tank compartment in order to remove any inflammable or explosive gases. Such motorboats or motor vessels so constructed as to have the greater portion of the bilges under the engines and fuel tanks open and exposed to the natural atmosphere at all times need not be required to be fitted with such ventilators.

SUBPART 25.45—LIQUEFIED PETROLEUM GAS

§ 25.45–1 *Prohibited on vessels carrying passengers for hire.* (a) On vessels carrying passengers for hire, the use of liquefied petroleum gases and certain inflammable liquids for cooking, heating, or lighting is prohibited by Parts 146 and 147 of Subchapter N (Explosives or other Dangerous Articles or Substances and Combustible Liquids on Board Vessels) of this chapter.

PART 26—OPERATIONS

3. Part 26 is amended to read as follows:

SUBPART 26.01—APPLICATION

Sec.
26.01–1 Applicable to all vessels.

SUBPART 26.05—PENALTIES

26.05–1 General.
26.05–5 Reckless operation.

SUBPART 26.10—MITIGATION OR REMISSION OF FINES OR PENALTIES

26.10–1 Procedure.

SUBPART 26.15—BOARDING OFFICERS

26.15–1 May board at any time.

SUBPART 26.20—EXHIBITION OF MOTORBOAT OPERATOR'S LICENSE

26.20–1 Must be available.

SUBPART 26.25—LICENSED PERSONNEL IN CHARGE

26.25–1 Licensed personnel required.

AUTHORITY: §§ 26.01–1 to 26.25–1 issued under R. S. 4405, as amended, 4462, as amended, sec. 17, 54 Stat. 166, as amended; 46 U. S. C. 375, 416, 526p.

SUBPART 26.01—APPLICATION

§ 26.01–1 *Applicable to all vessels.* (a) The provisions of this part shall apply to all vessels except as specifically noted.

SUBPART 26.05—PENALTIES

§ 26.05–1 *General.* (a) If any motorboat or motor vessels subject to any of the provisions of the Motorboat Act of April 25, 1940, as amended (54 Stat. 163–167; 46 U. S. C. 526–526t), is operated or navigated in violation of said Act or any of the applicable regulations in this chapter, the owner or operator, either one or both of them are subject to the following penalty:

SEC. 16. If any motorboat or vessel subject to any of the provisions of this Act is operated or navigated in violation of this Act or any regulation issued thereunder, the owner or operator, either one or both of them, shall, in addition to any other penalty prescribed by law than that contained in section 14 of this Act, be liable to a penalty of $100: *Provided*, That in the case of motorboats or vessels subject to the provisions of this Act carrying passengers for hire, a penalty of $200 shall be imposed on the owner or operator, either one or both of them, thereof for any violation of section 6, 7, or 8 of this Act or of any regulations pertaining thereto. For any penalty incurred under this section the motorboat or vessel shall be held liable and may be proceeded against by way of libel in the district court of any district in which said motorboat or vessel may be found. (Apr. 25, 1940, sec. 16; 54 Stat. 166; 46 U. S. C. 526o.)

§ 26.05–5 *Reckless operation.* (a) Any person who shall operate a motorboat or any vessel in a reckless or negligent manner is subject to the following penalty:

SEC. 14. Any person who shall operate any motorboat or any vessel in a reckless or negligent manner so as to endanger the life, limb, or property of any person shall be deemed guilty of a misdemeanor and on conviction thereof by any court of competent jurisdiction shall be punished by a fine not exceeding $2,000, or by imprisonment for a term of not exceeding one year, or by both such fine and imprisonment, at the discretion of the court. (Apr. 25, 1940, sec. 14; 54 Stat. 166; 46 U. S. C. 526m.)

SUBPART 26.10—MITIGATION OR REMISSION OF FINES OR PENALTIES

§ 26.10–1 *Procedure.* (a) The Commandant or any officer of the Coast Guard authorized by the Commandant may, upon application therefor, remit or mitigate any fine, penalty, or forfeiture incurred under the Motorboat Act of April 25, 1940, or any of these regulations except the penalties provided for in section 14 of said act.[1] The application should be in such form and filed in such manner as prescribed by the Commandant. For details see §§ 2.50–20 to 2.50–30, inclusive, in Subchapter A (Procedures Applicable to the Public) of this chapter.

SUBPART 26.15—BOARDING OFFICERS

§ 26.15–1 *May board at any time.* (a) Officers duly authorized to enforce the navigation laws of the United States are authorized to board all motorboats and motor vessels for the purpose of determining and reporting violations of the Motorboat Act of April 25, 1940, and the regulations in this subchapter.

SUBPART 26.20—EXHIBITION OF MOTORBOAT OPERATOR'S LICENSE

§ 26.20–1 *Must be available.* (a) Any person to whom a license as a motorboat operator has been issued shall have such license in his possession and available for immediate production to any Coast Guard boarding officer at all times during which any vessel which he is operating is carrying passengers for hire.

SUBPART 26.25—LICENSED PERSONNEL IN CHARGE

§ 26.25–1 *Licensed personnel required.* (a) All vessels shall be under the charge of licensed personnel as required by Subchapter P (Manning of Vessels) of this chapter.

PART 27—REQUIREMENTS FOR MOTORBOATS AND MOTOR VESSELS OF MORE THAN 15 GROSS TONS CARRYING PASSENGERS FOR HIRE

4. Part 27 is canceled.

(R. S. 4405, as amended, 4462, as amended; 46 U. S. C. 375, 416)

PART 28—SPECIFICATIONS AND PROCEDURE FOR APPROVAL OF EQUIPMENT

5. Part 28 is canceled.

(R. S. 4405, as amended, 4462, as amended; 46 U. S. C. 375, 416)

PART 29—NUMBERING OF UNDOCUMENTED VESSELS

6. Part 29 is canceled. (The text of this part is revised and transferred to Part 172.)

(R. S. 4405, as amended, 4462, as amended; 46 U. S. C. 375, 416)

---

[1] Section 6, 7, and 8 require, respectively, life preservers, licensed operators for motorboats carrying passengers for hire, and fire extinguishers.

Subchapter D—Tank Vessels

PART 30—GENERAL PROVISIONS

Section 30.01–5 is amended to read as follows:

§ 30.01–5 *Application of regulations—TB/ALL.* (a) The regulations in this subchapter contain requirements for materials, design, construction, inspection, manning, and operation of tank vessels, including handling and stowage of cargo and duties of officers and crew. However, vessels certificated as cargo or passenger vessels, where the principal purpose or use of vessel is not for the carriage of inflammable or combustible liquid cargo in bulk, may be granted a permit to carry Grade E liquid cargo in bulk in the case of passenger vessels and Grade D or E liquid cargo in bulk in the case of cargo vessels.

(b) The requirements of this subchapter are divided into parts as follows:

(1) Inspection and certification.
(2) Special equipment, machinery, and hull requirements.
(3) Lifesaving appliances.
(4) Fire-fighting equipment.
(5) Operations.
(6) Liquefied petroleum gases.
(7) Combustible or inflammable liquids with lethal qualities.

(c) The vessels and services to which each regulation applies are indicated by letters in the heading of the section or paragraph. The first letter or two letters indicate the type of vessel and the letter or letters following the oblique line indicate the waters in which such vessels may operate. These letters are described as follows:

(1) "T" signifies a tank ship.
(2) "B" signifies a tank barge when it precedes an oblique line; or it signifies service on bays, sounds, and lakes other than the Great Lakes when it follows an oblique line.
(3) "ALL" signifies service on all waters.
(4) "O" signifies service on ocean waters.
(5) "C" signifies services on coastwise waters.
(6) "L" signifies service on Great Lakes' waters.
(7) "R" signifies service on river waters.

(d) This subchapter shall be applicable to all United States flag vessels indicated in Column 3 of Table 30.01–5(d), except as follows:

(1) Any vessel operating exclusively on inland waters which are not navigable waters of the United States.
(2) Any vessel while laid up and dismantled and out of commission.
(3) With the exception of vessels of the U. S. Maritime Administration, any vessel with title vested in the United States and which is used for public purposes.

TABLE 30.01–5 (d)

Method of propulsion	Size or other limitations	Classes of vessels (including motorboats) examined or inspected under various Coast Guard regulations			
		Vessels inspected and certificated under Subchapter D—Tank Vessels [1]	Vessels inspected and certificated under Subchapter H—Passenger Vessels [1 2]	Vessels inspected and certificated under Subchapter I—Cargo and Miscellaneous Vessels [1 2]	Vessels subject to provisions of Subchapter C—Uninspected Vessels [1 2 3]
Column 1	Column 2	Column 3	Column 4	Column 5	Column 6
Steam	Vessels 40 feet in length and under.[6]	All vessels carrying combustible or inflammable liquid cargo in bulk.	None	All tugboats and towboats	All vessels except those covered by Subchapters D and I.
	Vessels over 40 but not over 65 feet in length.[4]	All vessels carrying combustible or inflammable liquid cargo in bulk.	None	All tugboats and towboats	All vessels except those covered by Subchapters D and I.[3]
	Vessels over 65 feet in length.[5]	All vessels carrying combustible or inflammable liquid cargo in bulk.[6]	All vessels carrying more than 12 passengers on an international voyage except yachts, and all other vessels carrying passengers except: 1. Yachts. 2. Documented cargo vessels issued a permit to carry not more than 16 persons in addition to the crew. 3. Towing and fishing vessels, in other than ocean and coastwise service, issued a permit to carry persons on the legitimate business of the vessel, in addition to the crew, but not to exceed one for each net ton of the vessel.	All vessels except those covered by Subchapters D and H.	None.
Motor	Vessels of not over 15 gross tons.	All vessels carrying combustible or inflammable liquid cargo in bulk.	None	None	All vessels except those covered by Subchapter D.
	Vessels over 15 gross tons except seagoing motor vessels of 300 gross tons and over.	All vessels carrying combustible or inflammable liquid cargo in bulk.[6]	All vessels carrying more than 12 passengers on an international voyage, except yachts, and all other vessels carrying passengers for hire except documented cargo vessels over 65 feet in length issued a permit to carry not more than 16 persons in addition to the crew.	All vessels carrying freight for hire except those covered by Subchapters D and H.	All vessels except those covered by Subchapters D, H, and I.
	Seagoing motor vessels of 300 gross tons and over.	All vessels carrying combustible or inflammable liquid cargo in bulk.[6]	All vessels carrying more than 12 passengers on an international voyage except yachts, and all other vessels carrying passengers except: 1. Yachts. 2. Documented cargo vessels issued a permit to carry not more than 16 persons in addition to the crew.	All vessels except those covered by Subchapters D and H, and those engaged in the fishing, oystering, clamming, crabbing, or any other branch of the fishery, kelp, or sponge industry.	All vessels except those covered by Subchapters D, H, and I.
Sail		All vessels carrying combustible or inflammable liquid cargo in bulk.	All vessels over 700 gross tons carrying passengers for hire.	None	None.
Non-self propelled	Seagoing barges	All barges carrying combustible or inflammable liquid cargo in bulk.	All barges 100 gross tons and over carrying passengers.	All barges 100 gross tons and over except those covered by Subchapters D and H.	All barges carrying passengers except those covered by Subchapter H.
	Inland barges	All barges carrying combustible or inflammable liquid cargo in bulk.	All barges over 100 gross tons carrying passengers for hire.	None	All barges carrying passengers except those covered by Subchapter H.

[1] Subchapters E (Load Lines), F (Marine Engineering), and J (Electrical Engineering) of this chapter are also applicable under certain conditions.
[2] Public nautical school ships, other than vessels of the Navy and Coast Guard, shall meet the requirements of Part 167 of Subchapter R (Nautical Schools) of this chapter. Civilian nautical school ships, as defined by 46 U. S. C. 1331, shall meet the requirements of Subchapter H (Passenger Vessels) and Part 168 of Subchapter R (Nautical Schools) of this chapter.
[3] Any vessel on an international voyage is subject to the applicable requirements of the International Convention for the Safety of Life at Sea, 1948.
[4] Length measured from end to end over deck, excluding sheer.
[5] Boilers and machinery are subject to examination.
[6] Vessels covered by Subchapter H (Passenger Vessels) or I (Cargo and Miscellaneous Vessels) of this chapter, where the principal purpose or use of the vessel is not for the carriage of liquid cargo, may be granted a permit to carry a limited amount of combustible liquid cargo in bulk. The portion of the vessel used for the carriage of the combustible liquid cargo shall meet the requirements of Subchapter D (Tank Vessels) in addition to the requirements of Subchapter H (Passenger Vessels) or I (Cargo and Miscellaneous Vessels) of this chapter.

(e) This subchapter shall be applicable to all foreign flag vessels indicated in Column 3 of Table 30.01–5(d) while in the navigable waters of the United States insofar as meeting the general intent of the safety and cargo handling requirements set forth in Subparts 35.30 and 35.35 of this subchapter. Further, such vessels that carry 12 or less passengers from any port of the United States shall be subject to the provisions of this subchapter to the extent prescribed by law except as follows:

(1) Any vessel of a foreign nation signatory to the International Convention on Safety of Life at Sea, 1948, and which has on board a current, valid Safety Equipment Certificate.

(2) Any vessel of a foreign nation having inspection laws approximating those of the United States together with reciprocal inspection arrangements with the United States, and which has on board a current, valid certificate of inspection issued by its government under such arrangements.

(R. S. 4405, as amended, 4417a, as amended, 4462, as amended; 46 U. S. C. 375, 391a, 416)

PART 31—INSPECTION AND CERTIFICATION

SUBPART 31.10—INSPECTIONS

1. Section 31.10–1 is amended to read as follows:

§ 31.10–1 *Recognized classification society—TB/ALL.* (a) In the inspection of hulls, boilers, and machinery, the current standards established by the American Bureau of Shipping and designated "Rules for Building and Classing Steel Vessels" respecting material and construction of hulls, boilers, and machinery, except as otherwise provided for by law and regulations in this chapter, shall be accepted as standard by the Coast Guard.

(b) The current standards established by the American Bureau of Shipping in effect at the time of construction of the vessel, or otherwise as applicable, shall be used. The book "Rules for Building and Classing Steel Vessels" is usually published annually and may be purchased from the American Bureau of Shipping, 45 Broad Street, New York 4, New York. These standards may be also examined at the office of the Commandant (M), U. S. Coast Guard, Washington, D. C., or at the office of any Coast Guard District Commander or Officer in Charge, Marine Inspection.

(c) The approved plans and certificate of the American Bureau of Shipping, or other recognized classification society for classed vessels, may be accepted by the Coast Guard as evidence of the structural efficiency of the hull and reliability of machinery of vessels subject to the regulations in this subchapter, except as otherwise provided for by laws and regulations in this chapter.

(R. S. 4405, as amended, 4417a, as amended, 4462, as amended; 46 U. S. C. 375, 391a, 416. Interpret or apply sec. 5, 55 Stat. 244, 245, as amended, 50 U. S. C. App. 1275)

2. Section 31.10–20 (a) is amended to read as follows:

§ 31.10–20 *Drydocking or hauling out—TB/ALL.* (a) Each steel hull tank vessel shall be placed in drydock or on a slipway or hauled out for examination depending upon its service, as follows:

(1) Each tank vessel whose operations in salt-water service aggregate more than 6 months in a calendar year shall be drydocked or hauled out at least once each calendar year.

(2) Each tank vessel whose operations in salt-water service aggregate 6 months or less in a calendar year shall be drydocked or hauled out at least once in every 2 calendar years.

(3) Each tank ship used in fresh water service exclusively shall be drydocked or hauled out at least once in every 5 calendar years.

(4) Tank barges used in fresh water service exclusively need not be drydocked or hauled out during the first 5 calendar years after date of build, but shall be drydocked or hauled out between that time and the end of the tenth calendar year after date of build, and once in every 5 calendar years thereafter.

(R. S. 4405, as amended, 4417a, as amended, 4462, as amended, 46 U. S. C. 375, 391a, 416. Interpret or apply sec. 5, 55 Stat. 244, 245, as amended, 50 U. S. C. App. 1275)

3. Section 31.10–30 is amended to read as follows:

§ 31.10–30 *Stability test—TB/ALL.* When the Officer in Charge, Marine Inspection, has reason to question the stability of any tank vessel under his jurisdiction, he shall require the owners of the tank vessel to make a stability test of such vessel.

(R. S. 4405, as amended, 4417a, as amended, 4462, as amended, 46 U. S. C. 375, 391a, 416. Interpret or apply sec. 5, 55 Stat. 244, 245, as amended, 50 U. S. C. App. 1275)

4. Part 31 is amended by adding a new § 31.10–31 reading as follows:

§ 31.10–31 *Stability tests—T/OC.* Each mechanically propelled tank ship of 500 gross tons and over, construction or conversion of which was started on or after November 19, 1952, shall be subjected to a stability test. A stability letter prepared by the Coast Guard and embodying the necessary instructions to insure maintenance of sufficient intact stability at all times shall be posted under glass in the pilothouse. The Commandant may allow the stability test of a ship to be dispensed with provided basic stability data are available from the stability test of a sister ship and it is shown to the satisfaction of the Commandant that reliable stability information for the exempted ship can be obtained from such basic data.

(R. S. 4405, as amended, 4417a, as amended, 4462, as amended, 46 U. S. C. 375, 391a, 416. Interpret or apply sec. 5, 55 Stat. 244, 245, as amended, 50 U. S. C. App. 1275)

PART 32—SPECIAL EQUIPMENT, MACHINERY, AND HULL REQUIREMENTS

SUBPART 32.10—COOKING OR HEATING EQUIPMENT

Subpart 32.10, consisting of §§ 32.10–1 to 32.10–45 is cancelled.

(R. S. 4405, as amended, 4417a, as amended, 4462, as amended; 46 U. S. C. 375, 391a, 416)

SUBPART 32.15—NAVIGATION EQUIPMENT

Part 32 is amended by adding §§ 32.15–20 and 32.15–25 reading as follows:

§ 32.15–20 *Radiotelegraph—T/ALL.* Radiotelegraph installations are required on certain tank ships. Details of the application of this requirement, as well as the details of the installation, shall be as required by the statutes and regulations under the jurisdiction of the Federal Communications Commission.

§ 32.15–25 *Radio direction finder—T/OC.* All tank ships of 1,600 gross tons and over on an international voyage or in ocean service shall be fitted with a radio direction finder. Details of the installation shall be as required by the statutes and regulations under the jurisdiction of the Federal Communications Commission. Such tank ships of over 1,600 gross tons, but not over 5,000 gross tons, construction or conversion of which was started prior to November 19, 1952, need not meet the requirements of this section until November 19, 1954.

(R. S. 4405, as amended, 4417a, as amended, 4462, as amended; 46 U. S. C. 375, 391a, 416)

SUBPART 32.35—MAIN AND AUXILIARY MACHINERY

Sections 32.25–1 to 32.35–25, inclusive, are cancelled; and new regulations designated §§ 32.35–1 to 32.35–15, inclusive, are added reading as follows:

Sec.
32.35–1 Boilers and machinery—TB/ALL.
32.35–5 Installation of internal combustion engines—TB/ALL.
32.35–10 Steering apparatus on tank vessels—TB/ALL.
32.35–15 Communication—T/ALL.

AUTHORITY: §§ 32.35–1 to 32.35–15 issued under R. S. 4405, as amended, 4417a, as amended, 4462, as amended; 46 U. S. C. 375, 391a, 416. Interpret or apply sec. 5, 55 Stat. 244, as amended; 50 U. S. C. App., 1275.

§ 32.35–1 *Boilers and machinery—TB/ALL.* Boilers, main and auxiliary machinery, and piping systems shall conform to the requirements of Subchapter F (Marine Engineering) of this chapter, except as otherwise provided for in this subchapter.

§ 32.35–5 *Installation of internal combustion engines—TB/ALL.* Each internal combustion engine located on the weather deck shall be provided with a ventilated metal hood or, where space permits, with a well-ventilated metal housing of sufficient size to allow for proper operation and maintenance.

§ 32.35–10 *Steering apparatus on tank vessels—TB/ALL.* Tank vessels shall be provided with steering apparatus as required by Subpart 57.25 of Subchapter F (Marine Engineering) of this chapter.

§ 32.35–15 *Communication—T/ALL.* Efficient means of communication shall be provided between the pilothouse, the emergency steering station, and the steering engine room.

SUBPART 32.45—ELECTRICAL INSTALLATIONS

Section 32.45–5 is amended to read as follows:

§ 32.45–5 *General installation requirements—TB/ALL.* (a) Where practicable, electrical cable is to be located

well inboard from the sides, preferably along or near the centerline, to reduce the risk of injury in the event of collision, but it shall be kept clear of cargo tank openings. Except where Grade E liquids only are involved, feeders shall be run as far as practicable to avoid cargo pump rooms and enclosed spaces immediately adjoining cargo tanks.

(b) The armor on all cables shall be electrically and mechanically continuous.

(c) Except where Grade E liquids only are involved, switchboards, distributing panels, switches, fuses, and other current-interrupting devices shall not be fitted in cargo pump rooms or enclosed spaces immediately adjoining cargo tanks.

(d) Portable extension cables and fittings are to be of an approved type.

(e) Main distribution circuits shall be protected against overload by circuit breaking devices, the capacity of which shall be marked at each such device.

(R. S. 4405, as amended, 4417a, as amended, 4462, as amended; 46 U. S. C. 375, 391a, 416)

SUBPART 32.50—PUMPS, PIPING, AND HOSE FOR CARGO HANDLING

Sections 32.50–5 to 32.50–20, inclusive, are amended to read as follows:

Sec.

32.50–5 Cargo pump fittings and controls on tank vessels constructed on or after November 10, 1936—TB/ALL.

32.50–10 Cargo pumps on tank vessels with independent cargo tanks which were constructed prior to November 10, 1936—TB/ALL.

32.50–15 Cargo piping on tank vessels constructed on or after July 1, 1951—TB/ALL.

32.50–20 Cargo piping for tank vessels constructed between November 10, 1936, and July 1, 1951—TB/ALL.

AUTHORITY: §§ 32.50–5 to 32.50–20 issued under R. S. 4405, as amended, 4417a, as amended, 4462, as amended; 46 U. S. C. 375, 391a, 416. Interpret or apply sec. 5, 55 Stat. 244, as amended; 50 U. S. C., App., 1275.

§ 32.50–5 *Cargo pump fittings and controls on tank vessels constructed on or after November 10, 1936—TB/ALL.* (a) On all tank vessels, the construction or conversion of which is started on or after November 10, 1936, where a cargo pump is capable of developing a pressure exceeding 125 pounds at the pump under shut-off head conditions (based on water), a suitable relief valve shall be installed between the pump and shut-off valve in the cargo pump discharge and piped back into the suction. The relief valve setting shall not exceed the pressure for which the piping system is designed.

(b) A pressure gage shall be installed for each pump discharge, and it shall be located at a point visible with respect to the pump controls.

§ 32.50–10 *Cargo pumps on tank vessels with independent cargo tanks which were constructed prior to November 10, 1936—TB/ALL.* (a) Cargo pumps on tank vessels, the construction or conversion of which was started prior to November 10, 1936, may be located in a hold space containing independent cargo tanks or on deck. If the pump driving unit is of the type permitted in cargo pump rooms, it also may be located in the hold space. If other types of driving units are used, they shall be located on deck or in an engine compartment. If the pump drive shaft passes through decks or bulkheads into a hold space or pump room, it shall be provided with suitable stuffing boxes at such points.

§ 32.50–15 *Cargo piping on tank vessels constructed on or after July 1, 1951—TB/ALL.* (a) On all tank vessels, the construction or conversion of which is started on or after July 1, 1951, the cargo piping shall be:

(1) A fixed cargo piping system shall be installed on a tank vessel carrying Grade A, B or C cargo. The piping shall be arranged so as to avoid excessive stresses at the joints. For sizes exceeding 2 inches in diameter, flanged, welded, or other approved types of joints shall be employed. Packing material shall be suitable for the cargo carried. Connections at bulkheads shall be made so that the plating does not form part of a flanged joint. Piping may be carried through bunker spaces and deep tanks provided it is run through a pipe tunnel. The tunnel may be omitted where the pipe is extra heavy, all joints are welded, and bends are installed to provide for expansion and contraction.

(2) Cargo piping, where installed in tank vessels carrying Grade D or E cargo only, shall conform with the requirements contained in subparagraph (1) of this paragraph.

(3) Cargo piping shall not pass through spaces containing machinery where sources of vapor ignition are normally present: *Provided*, That, in special cases the Commandant may permit the piping to pass through such spaces if Grade E liquids only are involved.

(b) Valve operating rods in cargo tanks shall be solid, except that tank barges having plug cocks inside the cargo tanks may have operating rods of extra heavy pipe with the annular space between the lubricant tube and the pipe wall sealed with a nonsoluble material to prevent penetration of the cargo. Valve operating rods shall be of ample size, well guided and supported, and attached to the valve stems in a manner so as to to prevent the operating rods from working loose. Where the operating rods pass through a deck, gastight stuffing boxes shall be fitted. The leads of operating rods shall be as direct as possible. Valves shall be of suitable design for the intended service.

(c) All cargo loading and discharge hose connections shall be fitted with valves or blind flanges.

§ 32.50–20 *Cargo piping for tank vessels constructed between November 10, 1936, and July 1, 1951—TB/ALL.* (a) On tank vessels, the construction or conversion of which is started on or after November 10, 1936, and prior to July 1, 1951, the piping shall be arranged so as to avoid excessive stresses at the joints. For sizes exceeding 2 inches in diameter, flanged, welded, or other approved types of joints shall be employed. Packing material shall be suitable for the cargo carried. Connections at bulkheads shall be made so that the plating does not form part of a flanged joint. Piping may be carried through bunker spaces and deep tanks provided it is run through a pipe tunnel. The tunnel may be omitted where the pipe is extra heavy, all joints are welded, and bends are installed to provide for expansion and contraction.

(b) Cargo piping shall not pass through spaces containing machinery where sources of vapor ignition are normally present: *Provided*, That in special cases the Commandant may permit the piping to pass through such spaces if Grade E liquids only are involved.

(c) Valve operating rods in cargo tanks shall be solid and of ample size, well guided and supported, and attached to the valve stems in a manner to guard against their working loose. Where such valve rods pass through the deck, gastight stuffing boxes shall be fitted. The leads of valve rods shall be as direct as possible. All valves and fittings shall be of material, design, and manufacture for the intended service on the cargo system; either rising or nonrising stem valves may be used.

SUBPART 32.52—BILGE SYSTEMS

Part 32 is amended by adding a new Subpart 32.52, consisting of §§ 32.52–1 to 32.52–10, inclusive, reading as follows:

Sec.

32.52–1 Bilge pumps on tank vessels constructed or converted on or after November 19, 1952—TB/ALL.

32.52–5 Bilge piping for pump rooms and adjacent cofferdams on tank vessels constructed or converted on or after November 19, 1952—TB/ALL.

32.52–10 Bilge pumps and piping on tank vessels constructed or converted prior to November 19, 1952—TB/ALL.

AUTHORITY: §§ 32.52–1 to 32–52–10 issued under R. S. 4405, as amended, 4417a, as amended, 4462, as amended. Interpret or apply sec. 5, 55 Stat. 244, 245, as amended, 50 U. S. C. App. 1275.

§ 32.52–1 *Bilge pumps on tank vessels constructed or converted on or after November 19, 1952—TB/ALL.* The number and arrangement of bilge pumps on each tank vessel shall conform to the requirements of Subchapter F (Marine Engineering) of this chapter, except as hereinafter provided in this subpart.

§ 32.52–5 *Bilge piping for pump rooms and adjacent cofferdams on tank vessels constructed or converted on or after November 19, 1952—TB/ALL.* (a) Provisions shall be made for removing drainage from the pump room bilges and adjacent cofferdams. A separate bilge pump, ejector, or bilge suction from a cargo pump or cargo stripping pump may be provided for this purpose. The bilge pump shall not be located in nor shall the piping pass through spaces containing machinery where sources of vapor ignition are normally present.

(b) Where a bilge suction is provided from a cargo or stripping pump, a stop-check valve shall be fitted in the suction branch, and an additional stop valve shall be fitted also if the bilge suction branch can be subjected to a head of oil from the filling line.

(c) Means shall be provided for controlling the cargo or pump room bilge pumps and their suctions or discharges in order that a flooded pump room may be pumped out. Suitable portable or manually operated pumps may be accepted as complying with this provision, or alternatively, the pump controls shall be arranged so that they are operable from inside the pump room and either from an accessible position outside the pump room, or from the pump room casing above the freeboard deck.

§ 32.52–10 *Bilge pumps and piping on tank vessels constructed or converted prior to November 19, 1952—TB/ALL.* (a) On tank vessels, the construction or conversion of which was started prior to November 19, 1952, bilge pumps and piping which do not fully comply with the regulations of this subchapter shall be made as nearly equal to the requirements for tank vessels constructed on or after November 19, 1952, as is necessary in the interest of safety.

(b) Bilge suctions from hold spaces containing independent cargo tanks may be connected to cargo pumps or stripping pumps, provided the installation complies with the requirements of § 32.52–5 (b).

SUBPART 32.55—VENTILATION AND VENTING

1. Sections 32.55–20 to 32.55–30, inclusive, are amended to read as follows:

Sec.

32.55–20 Venting of cargo tanks of tank ships constructed on or after July 1, 1951—T/ALL.

32.55–25 Venting of cargo tanks of tank barges constructed on or after July 1, 1951—B/ALL.

32.55–30 Venting of cargo tank of tank vessels constructed between November 10, 1936, and July 1, 1951—TB/ALL.

AUTHORITY: §§ 32.55–20 to 32.55–30 issued under R. S. 4405, as amended, 4417a, as amended, 4462, as amended; 46 U. S. C. 375, 391a, 416. Interpret or apply sec. 5, 55 Stat. 244, as amended; 50 U. S. C., App., 1275.

§ 32.55–20 *Venting of cargo tanks of tank ships constructed on or after July 1, 1951—T/ALL.*—(a) *Venting required.* (1) On all tank ships, the construction or conversion of which is started on or after July 1, 1951, each cargo tank shall be equipped with a vent. The diameter of a vent shall be not less than 2½ inches.

(2) In any case where a venting system is required for a particular grade of liquid, the venting system permitted for a higher grade of liquid may be used instead.

(b) *Grade A liquids.* (1) Cargo tanks in which Grade A liquids are to be transported shall be fitted with a venting system consisting of a branch vent line from each cargo tank connected to a vent header which shall extend to a height above the weather deck equal to at least one-third the beam of the vessel and shall terminate at a comparable distance from any other living or working space, ventilator inlet, or source of ignition. When special conditions will prevent the vent line or header outlets being permanently installed at a height above the deck of one-third the beam of the vessel, then an adjustable system shall be provided which, when extended vertically, shall be capable of reaching a height of one-third the beam of the vessel.

(2) A weather hood may be installed at the vent outlet providing it is of such design as not to direct the flow of vapor below the horizontal.

(3) The branch vent lines shall consist of either:

(i) Pipe with no valves or other hindrances to a free flow of gas; or,

(ii) Piping fitted with a pressure vacuum relief valve, provided means are supplied for relieving all internal pressure on cargo tanks by fitting the valve with a positive means for opening its pressure valve to allow free passage of gases through the branch vent line or by the installation of a by-pass fitted with a manually operated stop valve.

(4) The vent header shall be fitted with a flame arrester or pressure vacuum relief valve. If a pressure vacuum relief valve is used in the header, means shall be provided for relieving all internal pressure on cargo tanks by fitting the valve with a positive means for opening its pressure valve to allow free passage of gases through the header or by the installation of a by-pass fitted with a manually operated stop valve. A suitable means of relieving pressure shall be fitted in the header in order to prevent excess pressure being built up in the tanks, in the event of overfilling of the latter. The vent header system shall be provided with suitable connections for flushing and draining. The vent header system shall be of sufficient capacity as to be able to carry off all displaced air and vapors during loading of the cargo tanks without opening of ullage plates, cargo hatches, etc. See § 32.20–20 for liquid level gaging requirements.

(c) *Grade B or C liquids.* Cargo tanks in which Grade B or C liquids are to be transported shall be fitted with either individual pressure-vacuum relief valves which shall extend to a reasonable height above the weather deck or shall be fitted with a venting system consisting of branch vent lines connected to a vent header which shall extend to a reasonable height above the weather deck and be fitted with a flame arrester or a pressure-vacuum relief valve at the outlet to the atmosphere. The vent header system, if fitted shall be provided with suitable connections for flushing and draining, and if desired, stop valves may be placed in the individual branch vent lines provided that each such stop valve is bypassed by a pressure-vacuum relief valve.

(d) *Grade D or E liquids.* Cargo tanks in which Grade D or E liquids only are to be transported shall be fitted with gooseneck vents and flame screens.

§ 32.55–25 *Venting of cargo tanks of tank barges constructed on or after July 1, 1951—B/ALL.*—(a) *Venting required.* (1) On all tank barges, the construction or conversion of which is started on or after July 1, 1951, each cargo tank shall be equipped with a vent. The diameter of a vent shall be not less than 2½ inches.

(2) In any case where a venting system is required for a particular grade of liquid, the venting system permitted for a higher grade of liquid may be used instead.

(b) *Grade A, B, or C liquids.* Cargo tanks in which Grade A, B, or C liquids are to be transported shall be fitted with either individual pressure-vacuum relief valves which shall extend to a reasonable height above the weather deck or shall be fitted with a venting system consisting of branch vent lines connected to a vent header which shall extend to a reasonable height above the weather deck and be fitted with a pressure-vacuum relief valve at the outlet to the atmosphere. The vent header system, if fitted, shall be provided with suitable connections for flushing and draining, and if desired, stop valves may be placed in the individual branch vent lines: *Provided*, That each such stop valve is bypassed by a pressure-vacuum relief valve.

(c) *Grade D or E liquids.* Cargo tanks in which Grade D or E liquids only are to be transported shall be fitted with gooseneck vents and flame screens.

§ 32.55–30 *Venting of cargo tanks of tank vessels constructed between November 10, 1936, and July 1, 1951—TB/ALL.*—(a) *Venting required.* On all tank vessels, the construction or alteration of which is started on or after November 10, 1936, and prior to July 1, 1951, each cargo tank shall be equipped with a vent. The details of the venting system shall meet the requirements of this section, or alternatively, the requirements of either § 32.55–20 or § 32.55–25, as applicable, shall be met.

(b) *Grade A liquids.* (1) Cargo tanks in which Grade A liquids are to be transported shall be fitted with a venting system consisting of branch vent line from each cargo tank connected to a vent header which shall extend to a reasonable height above the weather deck and be fitted with a flame arrester or pressure-vacuum relief valve. Each branch vent line may be provided with a manually operated control valve, provided it is bypassed with a pressure-vacuum relief valve or each cargo tank to which such a branch vent line is connected is fitted with an independent pressure-vacuum relief valve. The vent header system shall be provided with suitable connections for flushing and draining.

(2) In barges with independent tanks carrying Grade A liquids, separate discharge pipes may be fitted to each pressure-vacuum relief valve, or the pressure-vacuum relief valve may be elevated, so that in either case the discharge from such valve will not be less than 7 feet above the deck where practicable.

(c) *Grade B or C liquids.* Cargo tanks in which Grade B or C liquids are to be transported shall be fitted with individual pressure-vacuum relief valves or shall be fitted with a venting system consisting of branch vent lines connected to a vent header which shall extend to a reasonable height above the weather deck and be fitted with a flame arrester or a pressure-vacuum relief valve at the outlet to the atmosphere.

(d) *Grade D or E liquids.* Cargo tanks in which Grade D or E liquids only are

to be transported shall be fitted with gooseneck vents and flame screens unless such tanks are vented by pressure-vacuum relief valves or a venting system of branch vent lines and a vent header.

2. Section 32.55–45 is amended to read as follows:

§ 32.55–45 *Venting of cofferdams of tank vessels constructed on or after November 10, 1936—TB/ALL.* On all tank vessels, the construction or conversion of which was started on or after November 10, 1936, cofferdams shall be provided with gooseneck vents fitted with a flame screen or pressure-vacuum relief valves. The diameter of a vent shall be not less than 2½ inches.

(R. S. 4405, as amended, 4417a, as amended, 4462, as amended; 46 U. S. C. 375, 391a, 416)

SUBPART 32.60—HULL REQUIREMENTS FOR TANK VESSELS CONSTRUCTED ON OR AFTER JULY 1, 1951

1. Section 32.60–10 is amended by adding a new paragraph (e) reading as follows:

§ 32.60–10 *Segregation of cargo; Grade A, B, C, or D—TB/ALL.* * * *

(e) *Openings.* Except as provided in paragraph (c) of this section, there shall be no manholes or other openings from cargo tanks to any other enclosed spaces. Any vents, sounding tubes, and similar piping passing through such tanks shall be run in a suitable trunk.

(R. S. 4405, as amended, 4417a, as amended, 4462, as amended; 46 U. S. C. 375, 391a, 416)

2. Section 32.60–30 (a) is amended to read as follows:

§ 32.60–30 *Tank vessels with independent tanks—TB/ALL.* (a) Independent cargo tanks may be located in hold spaces or in other cargo tanks; however, a working space of at least 15 inches shall be maintained around each independent tank, or else provisions shall be made for moving such tanks to furnish such working space, except that less than 15 inches around such tanks may be permitted if in the judgment of the Officer in Charge, Marine Inspection, having jurisdiction, a satisfactory inspection of the cargo tanks and hull structure can be made.

(R. S. 4405, as amended, 4417a, as amended, 4462, as amended; 46 U. S. C. 375, 391a, 416)

3. Section 32.60–40 is amended to read as follows:

§ 32.60–40 *Construction and testing of cargo tanks and bulkheads—TB/ALL.* (a) All cargo tanks vented at gage pressure of 4 pounds per square inch or less shall be constructed and tested as required by standards established by the American Bureau of Shipping or other recognized classification society. The design of cargo tanks integral with the hull and vented at a gage pressure exceeding 4 pounds per square inch but not exceeding 10 pounds per square inch gage pressure will be given special consideration by the Commandant.

(b) Cargo tanks vented at a gage pressure exceeding 10 pounds per square inch are considered unfired pressure vessels and shall be of cylindrical or similar design and meet the requirements of Parts 52 through 61 of Subchapter F (Marine Engineering) of this chapter.

(R. S. 4405, as amended, 4417a, as amended, 4462, as amended; 46 U. S. C. 375, 391a, 416)

PART 33—LIFESAVING APPLIANCES

SUBPART 33.05—LIFEBOATS, LIFE RAFTS, AND BUOYANT APPARATUS REQUIRED

Sections 33.05–1 to 33.05–10, inclusive, are amended to read as follows:

Sec.

33.05–1 Lifeboats for tank ships; ocean; construction or conversion of which was started prior to November 19, 1952—T/O.

33.05–2 Lifeboats for tank ships; ocean; construction or conversion of which was started on or after November 19, 1952—T/O.

33.05–5 Lifeboats for barges; ocean—B/O.

33.05–10 Lifeboats for tank ships; coastwise; construction or conversion of which was started prior to November 19, 1952—T/C.

33.05–11 Lifeboats for tank ships; coastwise; construction or conversion of which was started on or after November 19, 1952—T/C.

AUTHORITY: §§ 33.05–1 to 33.05–11 issued under R. S. 4405, as amended, 4417a, as amended, 4462, as amended, sec 5, 55 Stat. 244, as amended; 46 U. S. C. 375, 391a, 416, 50 U. S. C. App. 1275.

§ 33.05–1 *Lifeboats for tank ships; ocean; construction or conversion of which was started prior to November 19, 1952—T/O.* (a) All tank ships which normally operate more than 20 miles offshore shall carry a sufficient number of lifeboats on each side to accommodate all persons on board: *Provided,* That such tank ships of 350 feet in length or over, having superstructure amidships and propelling machinery aft shall be provided with at least four lifeboats, one on each side in way of the after accommodations, and one on each side in way of amidship accommodations.

(b) No lifeboat shall be of less than 180 cubic feet measurement.

§ 33.05–2 *Lifeboats for tank ships; ocean; construction or conversion of which was started on or after November 19, 1952—T/O.* (a) All tank ships which normally operate more than 20 miles offshore shall carry a sufficient number of lifeboats on each side to accommodate all persons on board: *Provided,* That such tank ships of 3,000 gross tons and over, having superstructure amidships and propelling machinery aft shall be provided with at least four lifeboats, one on each side in way of the after accommodations, and one on each side in way of amidship accommodations.

(b) No lifeboat shall be less than 24 feet in length, except where owing to the size of the tank ship, or for other reasons, the Commandant may permit smaller lifeboats, but in no case shall they be less than 16 feet in length.

(c) All tank ships of 1,600 gross tons and over shall carry at least one motor-propelled or hand-propelled lifeboat.

§ 33.05–5 *Lifeboats for barges; ocean—B/O.* (a) All tank barges which normally operate more than 20 miles offshore shall carry a sufficient number of lifeboats to accommodate all persons on board.

(b) No lifeboat shall be of less than 125 cubic feet measurement.

§ 33.05–10 *Lifeboats for tank ships; coastwise; construction or conversion of which was started prior to November 19, 1952—T/C.* (a) All tank ships which normally operate 20 miles or less offshore shall carry a sufficient number of lifeboats on each side to accommodate all persons on board.

(b) No lifeboat shall be of less than 180 cubic feet measurement, except by approval of the Commandant.

§ 33.05–11 *Lifeboats for tank ships; coastwise; construction or conversion of which was started on or after November 19, 1952—T/C.* (a) All tank ships which normally operate 20 miles or less offshore shall meet the requirements of § 33.05–2 of this subpart.

(R. S. 4405, as amended, 4417a, as amended, 4462, as amended, 46 U. S. C. 375, 391a, 416. Interpret or apply sec. 5, 55 Stat. 244, 245, as amended, 50 U. S. C. App. 1275)

SUBPART 33.10—LIFEBOAT HANDLING EQUIPMENT REQUIREMENTS

Sections 33.10–5 and § 33.10–10 are amended to read as follows:

§ 33.10–5 *Lifeboat winches—TB/ALL.* (a) When lifeboat winches are installed on tank vessels, wire falls shall be provided for each set of davits.

(b) On tank ships of 500 gross tons and over in ocean or coastwise service, construction or conversion of which is started on or after November 19, 1952, lifeboat winches shall be provided for all lifeboats, where the deck on which the lifeboats are carried exceeds 20 feet from the lightest seagoing draft.

(c) Lifeboat winches proposed for use in new installations shall be of an approved type and constructed in accordance with Subpart 160.015 of Subchapter Q (Specifications) of this chapter.

(d) Suitable fabric covers shall be provided, so fitted over exposed mechanisms that ice formations may be readily broken adrift when necessary to operate the lifeboat winch.

(e) Installation: Lifeboat winches shall be so located that the operator can observe the movement of the lifeboat during the lowering operation. The lead of the falls to the lifeboat winch shall be in accordance with § 33.10–10 (g).

(f) Tests: Upon completion of the installation of all lifeboat winches, and before the vessel is certificated for service, the following tests and examinations shall be made in the presence of an inspector:

(1) Swing lifeboat out from chocks and lower to level for loading, at which point the lifeboat shall be loaded with dead weight equivalent to the number of persons allowed (165 pounds per person) together with weight of equipment, plus 10 percent of the total load. The lifeboat should then be lowered to the water, stopping at approximately 6-foot intervals by action of the counterweight alone. During the test the following observations should be made:

(i) Brake action shall be smooth, but positive. Brakes exposed to the weather shall also be tested under the load lowering condition with the braking surface wetted.

(ii) Counterweight shall be capable of stopping and holding the lifeboat when released.

(iii) The lifeboat winch shall be capable of controlling the speed of lowering of the fully equipped lifeboat with its complement of persons on board to not more than 120 feet per minute. In addition, the speed of lowering of the fully equipped lifeboat without its complement of persons shall be not less than 40 feet per minute.

(iv) No part of lowering gear shall show any distress under load.

(v) Deck under lifeboat winch and davits must be of sufficient strength to prevent any undue stress of the deck under load.

(vi) Mechanical davits shall swing to extreme outboard position without slacking the lifeboat winch brake.

(vii) Action of governor brake and lowering speed permitted by same should be noted.

(viii) Determine that falls are of sufficient length to lower to light load line with vessel listed 15 degrees either way.

(2) A report of the results of the installation test covering all the above points shall be recorded.

§ 33.10–10 *Blocks and falls—TB/ALL.* Blocks and falls installed after May 1, 1942, shall conform to the following requirements:

(a) All blocks, falls, fairleads, padeyes, fastenings, etc., used in connection with lifeboat gear shall be designed with a minimum factor of safety of six, based on the maximum working load.

(b) Where lifeboat winches are installed, not more than two-part wire falls shall be used, except in specific cases where three-part wire falls may be accepted. Where lifeboat winches are not used, the falls shall be of manila rope or equivalent but wire rope may not be used.

(c) Wire rope falls of 6 x 19 regular lay filler wire construction prelubricated at the factory with suitable neutral wire rope lubricant shall be accepted as standard. Any other type of wire superior or equally as good as the minimum standard specified may be used.

(d) Falls shall be of such length that the lifeboat may be lowered to the water at the lightest seagoing draft with the vessel listed to 15°.

(e) All ocean and coastwise vessels and all other vessels of over 1,000 gross tons, not fitted with lifeboat winches, shall be provided with covered tubs, boxes, or reels for stowage of falls and with suitable lowering bitts in easily accessible positions; except that all ocean and coastwise, self-propelled vessels of over 1,000 gross tons, not fitted with lifeboat winches for which contracts for construction are let on or after September 2, 1945, shall be fitted with cruciform bitts in such position as will render lowering practicable.

(f) Where more than one lifeboat is served by the same set of davits, if the falls are of manila rope, separate falls shall be provided to serve each lifeboat.

(g) Such blocks as are necessary to allow the falls to lead fair in all positions of the davit shall be fitted. Sheaves for wire rope shall have a diameter at the base of the groove at least equal to 12 times the diameter of the rope.

(h) There shall be ample clearance between the cheeks of blocks in which manila rope is used. The width between the cheeks shall be half an inch greater than the diameter of new ropes when those ropes are 3¾ inches in circumference or greater; blocks for smaller ropes shall be designed with clearance in the same proportion.

(i) Means for lubrication shall be provided for all moving parts of blocks.

(j) Where lifeboat winches are provided on tank vessels, construction or conversion of which was started prior to November 19, 1952, there shall be at least 8 feet between the center of the drum and the center of the nearest sheave.

(k) Where lifeboat winches are provided on tank vessels, construction or conversion of which is started on or after November 19, 1952, the lead sheaves to the drums shall be so located as to provide fleet angles of not more than 8 degrees for grooved drums and not more than 4 degrees for nongrooved drums. By fleet angle is meant the angle included between an imaginary line from the lead sheave perpendicular to the axis of the drum and the line formed by the wire rope when lead from the lead sheave to either extremity of the drum.

(R. S. 4405, as amended, 4417a, as amended, 4462, as amended; 46 U. S. C. 375, 391a, 416. Interprets or applies sec. 5, 55 Stat. 244, 245, as amended, 50 U. S. C. App. 1275)

SUBPART 33.15—EQUIPMENT FOR LIFEBOATS, LIFE RAFTS, OR BUOYANT APPARATUS

1. Section 33.15–1 is amended to read as follows:

§ 33.15–1 *Tank ship lifeboat equipment; ocean and coastwise—T/OC*—(a) *General.* All lifeboats on tank ships operating on ocean or coastwise routes shall be equipped as set forth in this section. All items other than boathooks shall be stowed in lockers or be suitably lashed to the lifeboat. The stowage shall be such as not to interfere with the releasing gear or impede entry into the lifeboat.

(b) *Bailer.* One bailer of sufficient size and suitable for bailing, with lanyard attached.

(c) *Boathooks.* Two boathooks of clear-grained white ash of suitable length, but not less than 8 feet by 1½ inches in diameter.

(d) *Buckets.* Two galvanized iron buckets of about 2 gallons each, with lanyards attached.

(e) *Compass and mounting.* One efficient liquid compass with not less than a 2-inch card. On and after January 1, 1946, all compasses and mountings for new installations or replacements shall be of an approved type. The Coast Guard specification for such approved type, which requires a card of not less than 3¾ inches in diameter, will be made available upon request.

(f) *Distress signals.* Twelve approved hand red flare distress signals in a watertight container, and 2 approved floating orange smoke distress signals. Service use shall be limited to a period of 3 years from date of manufacture. Distress signals not bearing date of manufacture shall not be carried. For specifications for the above signals, see Subparts 160.021, 160.022, and 160.023 of Subchapter Q (Specifications) of this chapter.

(g) *Ditty bag.* One canvas bag containing sailmaker's palm, needles, sail twine, marline, and marlinspike.

(h) *Drinking cups.* One enameled drinking cup.

(i) *Flashlight.* One approved type I, size No. 3 flashlight together with 3 spare batteries and 2 spare bulbs. A flashlight which obtains its source of energy from other than dry cells may be used provided such flashlight has been approved by the Commandant. For specifications for flashlights, see Subpart 161.008 of Subchapter Q (Specifications) of this chapter. No battery cell shall remain in the flashlight beyond the serviceability date appearing on the cell or its jacket. Approved flashlights not conforming to the requirements in Subpart 161.008 of Subchapter Q (Specifications) of this chapter may be continued in service so long as they are in good and serviceable condition.

(j) *Hatchets.* Two hatchets attached to the lifeboat by individual lanyards and readily available for use, one at each end of the lifeboat. All hatchets provided for use on tank ships shall be of an approved type. For specifications for hatchets, see Subpart 160.013 in Subchapter Q (Specifications) of this chapter. Hatchets provided prior to December 1, 1944, may be continued in service so long as they are in good and serviceable condition.

(k) *Illuminating oil.* One quart illuminating oil in metal container.

(l) *Lantern.* One lantern containing sufficient oil to burn at least 9 hours and ready for immediate use.

(m) *Life line.* A life line or grab line, properly secured the entire length of each side festooned in bights not longer than 3 feet, with a seine float in each bight. The life line shall be of a size and strength not less than 12-thread manila rope, and the seine float in each bight shall hang to within 12 inches of the surface of the water when the lifeboat is light.

(n) *Life preservers.* Two life preservers of an approved type. These life preservers are in addition to the vessel's equipment of life preservers.

(o) *Locker.* A suitable locker or box for the storage and preservation of the small items of equipment.

(p) *Mast and sails.* A mast or masts with at least one good sail, colored India Orange (Cable No. 70072, Standard Color Card of America) and proper gear for each, the sail and gear to be protected by a suitable canvas cover. Galvanized wire rope or equivalent corrosion resistant metal stays shall be used. A mast and sail is not required on hand-propelled or motor-propelled lifeboats.

(q) *Matches.* Two boxes of safety matches in a watertight container, and carried in a box secured to the underside of the stern thwart, or stowed in locker.

(r) *Oars.* (1) A single banked complement of oars, two spare oars, and a steering oar with a rowlock or becket, conforming to the requirements in Table 33.15–1 (r).

TABLE 33.15–1 (r)—MINIMUM NUMBER AND LENGTH OF OARS

Length of boat	Number of oars	Spare oars	Total, including steering oar	Rowing oars (feet)	Steering oars (feet)
16 feet and under 18 feet	4	2	7	10	12
18 feet and under 20 feet	4	2	7	11	13
20 feet and under 24 feet	4	2	7	13	14
24 feet and under 28 feet	6	2	9	14	15
28 feet and over	6	2	9	15	16

(2) Motor lifeboats and lifeboats fitted with propellers operated by hand shall be equipped with 4 oars and 1 steering oar.

(s) *Painter.* Two painters of manila rope not less than 2¾ inches in circumference and a length not less than 3 times the distance between the boat deck and the light draft. One shall have a long eye splice and be attached to the thwart with a toggle so that it can be released and the other shall be firmly secured to the stem of the lifeboat and be ready for use.

(t) *Parachute flare distress signals.* Twelve approved parachute red flare distress signals and an approved means of projecting them, all contained in a portable watertight case. Service use of the signals shall be limited to a period of 3 years from date of manufacture. For specifications for the above equipment, see Subparts 160.024, 160.028, and 160.036 in Subchapter Q (Specifications) of this chapter.

(u) *Plugs and pumps.* Each drain hole, fitted with an automatic plug, shall be provided with one cap attached by chain to the lifeboat. Where an automatic plug is not provided, there shall be two plugs to each drain hole attached to the lifeboat by separate chains. Decked lifeboats shall have no plug hole but shall be provided with at least two bilge pumps.

(v) *Propellers (hand-operated).* Lifeboats may be fitted with a hand-operated propeller of an approved type, but all lifeboats, except motor lifeboats, having a capacity of 60 or more persons shall be fitted with a hand-operated propeller of an approved type. For construction of hand-propelling gear see Subpart 160.034 of Subchapter Q (Specifications of this chapter. The hand-propelling gear shall be required in all such lifeboats fitted on new tank ships or as replacements of such lifeboats.

(w) *Provisions.* Two pounds of provisions for each person consisting of hard bread or its equivalent in any approved emergency ration of cereal or vegetable compound. It shall be packaged in hermetically sealed containers of an approved type and stowed in provision lockers or other compartments providing suitable protection. No meat or other ration requiring saline preservative shall be allowed. In addition, there shall be one pound of condensed milk for each person stowed in provision lockers or other compartments providing suitable protection.

(x) *Rowlocks.* One set and a half of rowlocks or thole pins attached to the lifeboats by separate chains.

(y) *Rudder.* One rudder and tiller. For construction of rudder and tiller see § 160.035–3 (t) of Subpart 160.035 of Subchapter Q (Specifications) of this chapter.

(z) *Sea anchor.* One sea anchor of an approved type.

(aa) *Signaling mirrors.* Two signaling mirrors of an approved type.

(bb) *Storm oil.* One container holding 1 gallon of vegetable or animal oil, so constructed that the oil can be easily distributed on the water and so arranged that it can be attached to the sea anchor.

(cc) *Drinking water.* For each person at least 3 quarts of drinking water contained in hermetically sealed cans of an approved type and stowed in the drinking water tanks, lockers, or other compartments providing suitable protection.

(dd) *First-aid kit.* One first-aid kit of an approved type, constructed and fitted in accordance with Subpart 160.041 of Subchapter Q (Specifications) of this chapter.

(ee) *Jackknife.* One approved jackknife, constructed in accordance with Subpart 160.043 of Subchapter Q (Specifications) of this chapter.

(ff) *Heaving line.* Two heaving lines of adequate strength, 10 fathoms in length, and one inch in circumference. They shall be of such quality as to be buoyant after 24 hours submergence.

(gg) *Bilge pump.* One approved bilge pump constructed in accordance with Subpart 160.044 of Subchapter Q (Specifications) of this chapter. They shall be of a size noted in Table 33.15–1 (gg) depending upon the cubic capacity of the lifeboat as determined by the six-tenths rule:

TABLE 33.15–1 (gg)

Capacity of lifeboat, cubic feet		Bilge pump size
Over	Not over	
---	330	1
330	700	2
700	---	3

(hh) *Ladders.* All lifeboats approved to carry more than 60 persons shall be fitted with suitable means to enable persons in the water to climb into the lifeboat.

(ii) *Grab lines.* Unless other approved means are provided to achieve the same purpose, three ½ inch manila grab lines shall be fitted extending from gunwale to gunwale under the keel to enable persons to cling to and climb upon an upturned lifeboat. The ends of each grab line shall be securely attached to the side benches or other permanent part of the lifeboat and each grab line shall be made up with figure eight knots spaced approximately 18 inches apart in order to provide hand grips. Means shall be provided for taking up any slack in the grab lines.

(R. S. 4405, as amended, 4417a, as amended, 4462, as amended; 46 U. S. C. 375, 391a, 416. Interprets or applies sec. 5, 55 Stat. 244, 245; 50 U. S. C. App. 1275)

2. Part 33 is amended by adding a new § 33.15–3 to read as follows:

§ 33.15–3 *Portable radiotelegraph apparatus—T/OC.* All tank ships of 500 gross tons and over shall be provided with a portable radiotelegraph apparatus complying with the requirements of the Federal Communications Commission. The apparatus shall be kept in the radio room, or the chart room, or other suitable location and shall be immediately available for placement in one of the lifeboats.

(R. S. 4405, as amended, 4417a, as amended, 4462, as amended, 46 U. S. C. 375, 391a, 416. Interpret or apply sec. 5, 55 Stat. 244, 245, as amended, 50 U. S. C. App. 1275)

3. Section 33.15–5 (p) is amended to read as follows:

§ 33.15–5 *Tank ship lifeboat equipment; Great Lakes—T/L.* • • •

(p) *Plugs.* Each drain hole, fitted with an automatic plug, shall be provided with one cap attached by chain to the lifeboat. Where an automatic plug is not provided, there shall be two plugs to each drain hole attached to the lifeboat by separate chains.

(R. S. 4405, as amended, 4417a, as amended, 4462, as amended, 46 U. S. C. 375, 391a, 416. Interpret or apply sec. 5, 55 Stat. 244, 245, as amended, 50 U. S. C. App. 1275)

4. Section 33.15–10 (j) is amended to read as follows:

§ 33.15–10 *Tank ship lifeboat equipment; bays, sounds, and lakes other than Great Lakes, and Rivers—T/BR.* • • •

(j) *Plugs.* Each drain hole, fitted with an automatic plug, shall be provided with one cap attached by chain to the lifeboat. Where an automatic plug is not provided, there shall be two plugs to each drain hole attached to the lifeboat by separate chains.

(R. S. 4405, as amended, 4417a, as amended, 4462, as amended, 46 U. S. C. 375, 391a, 416. Interpret or apply sec. 5, 55 Stat. 244, 245, as amended, 50 U. S. C. App. 1275)

5. Section 33.15–15 (i) is amended to read as follows:

§ 33.15–15 *Tank barge lifeboat equipment; all waters—B/ALL.* • • •

(i) *Plugs.* Each drain hole, fitted with an automatic plug, shall be provided with one cap attached by chain to the lifeboat. Where an automatic plug is not provided, there shall be two plugs to each drain hole attached to the lifeboat by separate chains.

(R. S. 4405, as amended, 4417a, as amended, 4462, as amended, 46 U. S. C. 375, 391a, 416. Interpret or apply sec. 5, 55 Stat. 244, 245, as amended, 50 U. S. C. App. 1275)

SUBPART 33.20—STOWAGE OF LIFEBOATS, LIFE RAFTS, AND BUOYANT APPARATUS

Section 33.20–1 is amended to read as follows:

§ 33.20–1 *Davits and launching devices—TB/ALL.* (a) Tank ships of 100 gross tons or more shall be equipped with davits for each lifeboat carried. Only approved mechanical or gravity davits may be installed on such ships constructed on or after November 19, 1952.

(b) Tank ships of less than 100 gross tons and tank barges where lifeboats are carried shall provide means for the launching of such lifeboats by davits or crane or, where the freeboard is less than 6 feet when the vessel has no cargo aboard, by slide.

(c) On all tank ships of 500 gross tons and over in ocean and coastwise service, the following conditions shall be met:

(1) An approved ladder, constructed in accordance with Subpart 160.017 of Subchapter Q (Specifications) of this chapter shall be provided at each set of davits to afford access to the lifeboats when waterborne.

(2) Two lifelines shall be fitted to the davit spans of such length as to reach the water with the vessel at its lightest seagoing draft and listed 15 degrees either way.

(3) Suitable means shall be provided for illuminating the launching gear and the lifeboats during the process of launching the lifeboats from the stowed position until they are waterborne.

(4) Where applicable, means shall be provided outside the machinery space to prevent the discharge of water into the lifeboats while they are being lowered. This shall consist of baffles to deflect the water down the vessel's side, or reach rods or other means to close the discharge openings.

(5) Lifeboats, when stowed on a deck more than 15 feet above the deepest seagoing draft, shall be fitted with skates or other suitable means to facilitate launching against an adverse list of up to 15 degrees. However, skates may be dispensed with if, in the opinion of the Commandant, the arrangements are such as to insure that the lifeboats can be satisfactorily launched without skates.

(d) Lifeboats shall not be placed in the bows of tank ships. They shall be stowed in such positions as to insure safe launching.

(e) Suitable access to the lifeboats shall be provided to enable the crew to prepare the lifeboats for launching.

(R. S. 4405, as amended, 4417a, as amended, 4462, as amended, 46 U. S. C. 375, 391a, 416. Interpret or apply sec. 5, 55 Stat. 244, 245, as amended, 50 U. S. C. App. 1275)

SUBPART 33.40—LIFE BUOYS

1. Section 33.40–1, and Table 33.40–1, are amended to read as follows:

§ 33.40–1 *Number required on tank ships—T/LBR.* The minimum number of approved 30-inch life buoys and the minimum number to which approved automatic electric water lights shall be attached are fixed by Table 33.40–1.

(R. S. 4405, as amended, 417a, as amended, 4462, as amended, 46 U. S. C. 375, 391a, 416. Interpret or apply sec. 5, 55 Stat. 244, 245, as amended, 50 U. S. C. App. 1275)

TABLE 33.40–1—RING LIFE BUOYS REQUIRED

Length of tank ship (feet)	Minimum number of ring life buoys	Minimum number of ring life buoys in column 2 which shall have water lights attached
Column 1	Column 2	Column 3
Under 100	2	1
100 and under 200	4	2
200 and under 300	6	2
300 and under 400	12	4
400 and under 600	16	8
600 and under 800	24	12
800 and over	30	15

2. Part 33 is amended by adding a new § 33.40–2 reading as follows:

§ 33.40–2 *Number required on tank ships—T/OC.* (a) On all tank ships of less than 500 gross tons, the minimum number of approved 30-inch life buoys and the minimum number to which approved automatic electric water lights shall be attached are fixed by Table 33.40–1.

(b) On all tank ships of 500 gross tons and over, the minimum number of approved 30-inch life buoys and the minimum number to which automatic water lights shall be attached are fixed by Table 33.40–2 (b).

(R. S. 4405, as amended, 4417a, as amended, 4462, as amended, 46 U. S. C. 375, 391a, 416. Interpret or apply sec. 5, 55 Stat. 244, 245, as amended, 50 U. S. C. App. 1275)

TABLE 33.40–2 (b)—RING LIFE BUOYS REQUIRED

Length of tank ship (feet)	Minimum number of ring life buoys	Minimum number of ring life buoys in column 2 which shall have water lights attached
Column 1	Column 2	Column 3
Under 300	8	6
300 and under 400	12	6
400 and under 600	16	8
600 and under 800	24	12
800 and over	30	15

SUBPART 33.45—DISTRESS LIGHTS

Section 33.45–5 is amended to read as follows:

§ 33.45–5 *Parachute distress signals—T/OC.* In addition to the equipment required by § 33.45–1, all tank ships of 500 gross tons and over shall be provided with 12 approved hand-held rocket-propelled parachute red flares distress signals, contained in a portable watertight container, constructed in accordance with Subpart 160.036 of Subchapter Q (Specifications) of this chapter. Service use of the distress signals shall be limited to a period of 3 years from date of manufacture.

(R. S. 4405, as amended, 4417a, as amended, 4462, as amended, 46 U. S. C. 375, 391a, 416. Interpret or apply sec. 5, 55 Stat. 244, 245, as amended, 50 U. S. C. App. 1275)

SUBPART 33.50—SIGNALING LAMP

Section 33.50–1 is amended to read as follows:

§ 33.50–1 *Signaling lamp—T/OC.* Ocean and coastwise tank ships over 150 gross tons shall be equipped with an approved daylight signaling lamp.

(R. S. 4405, as amended, 4417a, as amended, 4462, as amended, 46 U. S. C. 375, 391a, 416. Interpret or apply sec. 5, 55 Stat. 244, 245, as amended, 50 U. S. C. App. 1275)

PART 34—FIRE-FIGHTING EQUIPMENT

Part 34 is amended to read as follows:

SUBPART 34.01—GENERAL FIRE-FIGHTING REQUIREMENTS

Sec.
34.01–1 Fire equipment for tank vessels—TB/ALL.
34.01–5 Repairs and alterations to fire-fighting equipment—TB/ALL.
34.01–10 Special types of fire apparatus may be used—TB/ALL.
34.01–15 Shutting down of boilers and machinery—T/ALL

SUBPART 34.05—INSPECTIONS

34.05–1 Inspection of fire-fighting equipment; general—TB/ALL.
34.05–5 All fire-fighting equipment may be tested—TB/ALL.
34.05–10 Testing of fire hose and pumps—TB/ALL.
34.05–15 Inspection of bilges—TB/ALL.

SUBPART 34.10—FIRE PUMPS, MAINS, HYDRANTS, AND FIRE HOSE FOR TANK SHIPS

34.10–1 Fire pumps required—T/ALL.
34.10–5 Capacity of fire pumps; tank ships of 500 gross tons and over—T/ALL.
34.10–10 Type of fire pumps—T/ALL.
34.10–15 Location of fire pumps—T/ALL.
34.10–20 Fire pump relief valves and piping—T/ALL.
34.10–25 Fire hydrants—T/ALL.
34.10–30 Fire hose—T/ALL.
34.10–35 Fire hose nozzles on tank ships constructed on or after July 1, 1951—T/ALL.
34.10–40 Fire hose nozzles on tank ships constructed prior to July 1, 1951—T/ALL.

SUBPART 34.15—CARGO SPACES ON TANK SHIPS

34.15–1 General requirements for cargo spaces on tank ships constructed or converted on or after November 19, 1952—T/ALL.
34.15–5 General requirements for cargo spaces on tank ships constructed or converted prior to November 19, 1952—T/ALL.
34.15–10 General requirements for fire extinguishing systems—T/ALL.
34.15–15 Steam systems for cargo spaces—T/ALL.
34.15–20 Carbon dioxide or other inert gas system for cargo spaces—T/ALL.
34.15–25 Foam systems for cargo spaces—T/ALL.
34.15–30 Carbon tetrachloride systems for cargo spaces—T/ALL.
34.15–35 Flue gas fire extinguishing systems for cargo spaces—T/ALL.

SUBPART 34.20—BOILER ROOM AND MACHINERY SPACES ON TANK SHIPS

34.20–1 Fixed fire extinguishing systems for boiler rooms and machinery spaces—T/ALL.
34.20–5 General requirements for fixed fire extinguishing systems—T/ALL.

Sec.
34.20-10 Fixed carbon dioxide fire extinguishing systems installed on tank ships on or after November 19, 1952—T/ALL.
34.20-15 Fixed carbon dioxide fire extinguishing systems installed on tank ships prior to November 19, 1952—T/ALL.
34.20-20 Fixed foam fire extinguishing systems—T/ALL.
34.20-25 Fire extinguishing equipment, other than fixed, for boiler and machinery spaces on tank ships—T/ALL.

SUBPART 34.21—PUMP ROOMS ON TANK SHIPS

34.21-1 Fixed fire extinguishing systems for tank ships constructed or converted on or after November 19, 1952—T/ALL.
34.21-5 Fire extinguishing systems for tank ships constructed or converted prior to November 19, 1952—T/ALL.

SUBPART 34.22—LAMP AND PAINT ROOMS AND SIMILAR COMPARTMENTS ON TANK SHIPS

34.22-1 Fireproofing of lamp, oil, and paint rooms—T/ALL.
34.22-5 Fixed fire extinguishing systems for lamp and paint rooms and similar spaces on tank ships constructed or converted on or after November 19, 1952—T/ALL.
34.22-10 Fire extinguishing systems for lamp and paint rooms and similar spaces on tank ships constructed or converted prior to November 19, 1952—T/ALL.

SUBPART 34.25—HAND FIRE EXTINGUISHERS

34.25-1 Hand fire extinguishers; test and approval—TB/ALL.
34.25-5 Hand fire extinguishers; marking—TB/ALL.
34.25-10 Hand fire extinguishers; location—TB/ALL.
34.25-15 Hand fire extinguishers; inspection—TB/ALL.
34.25-20 Hand fire extinguishers; spare charges and parts—TB/ALL.
34.25-25 Hand fire extinguishers; number required on tank ships—T/ALL.
34.25-30 Hand fire extinguishers required on tank vessels of over 15 gross tons using oil as fuel—TB/ALL.

SUBPART 34.30—FIRE AXES

34.30-1 Fire axes required—T/ALL.
34.30-5 Location and use of fire axes—T/ALL.

SUBPART 34.35—SAND BOXES

34.35-1 Sand boxes required on tank vessels using oil as fuel under boilers—TB/ALL.

SUBPART 34.40—FIRE-FIGHTING EQUIPMENT FOR TANK BARGES

34.40-1 Portable extinguishing equipment for cargo spaces—B/ALL.
34.40-5 Hand fire extinguishers for quarters, pump room, and machinery spaces—B/ALL.

AUTHORITY: §§ 34.01-1 to 34.40-5 issued under R. S. 4405, as amended, 4417a, as amended, 4462, as amended; 46 U. S. C. 375, 391a, 416. Interpret or apply sec. 5, 55 Stat. 244, 245, as amended; 50 U. S. C. App. 1275.

SUBPART 34.01—GENERAL FIRE-FIGHTING REQUIREMENTS

§ 34.01-1 *Fire equipment for tank vessels—TB/ALL.* All tank vessels subject to the regulations in this subchapter shall have fire extinguishers and fire-fighting apparatus in accordance with the regulations in this subchapter, and where required, the equipment shall be constructed in accordance with the regulations contained in the applicable subparts of Subchapter Q (Specifications) of this chapter: *Provided, however,* That all fire extinguishers and fire-fighting apparatus which is of the character that complied with the rules and regulations of the Commandant on vessels in existence at the time the regulations in this subchapter are promulgated, and have been in use on such vessels, may be continued in use so long as such fire extinguishers and such fire-fighting apparatus are found to be in good and workable condition. Where fire extinguishers and fire-fighting apparatus are not found to be in good and workable condition, they shall be repaired or else replaced by fire extinguishers or fire-fighting apparatus of the latest approved type, as required by the regulations in this subchapter and Subchapter Q (Specifications) of this chapter. Where fire extinguishers or fire-fighting apparatus are found to be in good and workable condition, but deficient as to quantity or numbers, the additional quantity or numbers required by the regulations in this subchapter shall be of the latest approved type. Fixed systems which are included in the fire-fighting equipment for tank vessels and which have been in the past approved by the Commandant shall be deemed to comply with the regulations in this subchapter both as to character and quantity, provided such systems are in good and workable condition.

§ 34.01-5 *Repairs and alterations to fire-fighting equipment—TB/ALL.* (a) No extensive repairs or alterations, except in emergency, shall be made to any fire-extinguishing apparatus, or other appliance subject to inspection, without advance notice to the Officer in Charge, Marine Inspection. Such repairs or alterations shall so far as is practicable be made with materials and tested in the manner specified within the regulations in this subchapter and Subchapter Q (Specifications) of this chapter for new construction.

(b) Emergency repairs or alterations shall be reported as soon as practicable to the Officer in Charge, Marine Inspection, where the vessel may call after such repairs are made.

§ 34.01-10 *Special types of fire apparatus may be used—TB/ALL.* Where in this part any special type of appliance, fire extinguishing medium, or arrangement is specified, the Commandant may approve the substitution of any other appliance, fire extinguishing medium, or arrangement, such as, for example, a fixed dry chemical system for a fixed fog system, provided it is first demonstrated to his satisfaction that the substitution is at least as effective as that specified in this part.

§ 34.01-15 *Shutting down of boilers and machinery—T/ALL.* The fire-extinguishing systems provided for in this part which depend for their operation on the ship's boilers or machinery, shall not be required to be immediately available at docks or at anchorages.

SUBPART 34.05—INSPECTIONS

§ 34.05-1 *Inspection of fire-fighting equipment; general—TB/ALL.* (a) At each annual inspection, and at any other time as required in the judgment of the Officer in Charge, Marine Inspection, all fire-fighting equipment on tank vessels shall be inspected.

(b) The examination of the fire-fighting equipment shall be made by inspectors. This applies to fire pumps, hose, chemical fire extinguishers, axes, and steam or gas smothering lines to cargo holds and compartments.

(c) The inspectors shall examine the fire-fighting equipment provided for the fireroom and engine room to ascertain if it conforms to the regulations in this subchapter and that it is in good condition for immediate use.

(d) At the annual inspection or at any other time as required, the inspectors shall examine the water-sprinkling system, when fitted, to ascertain if it is in good condition and ready for immediate use.

§ 34.05-5 *All fire-fighting equipment may be tested—TB/ALL.* During the inspection of fire-fighting equipment, the Officer in Charge, Marine Inspection, may require fire apparatus to be tested; and used, except as provided under §§ 34.15-25 and 34.25-15.

§ 34.05-10 *Testing of fire hose and pumps—TB/ALL.* The inspectors shall examine all pumps, hose, and other fire apparatus and shall see that the hose is subjected to a pressure of 100 pounds to the square inch, and that the hose couplings are securely fastened in accordance with the regulations in this subchapter.

§ 34.05-15 *Inspection of bilges—TB/ALL.* When inspecting oil-burning vessels, either internal-combustion type or steam-driven type, the inspector shall examine the tank tops and bilges in the fireroom and engine room to see that there is no accumulation of oil which might create a fire hazard.

SUBPART 34.10—FIRE PUMPS, MAINS, HYDRANTS, AND FIRE HOSE FOR TANK SHIPS

§ 34.10-1 *Fire pumps required—T/ALL.* All tank ships shall be provided with pumps available for use as fire pumps, as follows:

(a) Tank ships of less than 500 gross tons shall be equipped with an efficient hand pump capable of delivering 50 gallons per minute or a power driven pump of equivalent capacity: *Provided,* That on tank ships of 20 gross tons or under where it is impracticable to install a hand or power operated fire pump, or on tank ships with only one man in the crew, at least one additional 15-pound carbon dioxide or the equivalent fire extinguisher may be accepted in lieu of a fire pump.

(b) Tank ships of 500 gross tons and over, but not over 1,000 gross tons shall be provided with one independently driven power pump.

(c) Tank ships of over 1,000 gross tons shall be provided with two independently driven power pumps.

§ 34.10-5 *Capacity of fire pumps; tank ships of 500 gross tons and over—T/ALL.* (a) The capacity of the combined fire pump installation shall be one-fifth gallon per minute per gross ton of the ship. The maximum total fire pump capacity required for any tank ship shall be 800 gallons per minute.

(b) Fire pumps on tank ships of 500 gross tons and over shall be capable of delivering two powerful jets of water simultaneously from the highest outlets on the fire main at a Pitot tube pressure of approximately 50 pounds per square inch through nozzles, each having an orifice of not less than ⅞ inch diameter, where the internal diameter of the hose exceeds 1½ inches, and not less than ⅝ inch diameter, where the internal diameter of the hose does not exceed 1½ inches.

(c) While arranged with permanent connections to the fire main the pumps may be utilized also for other purposes, provided that one of the required pumps is kept available for immediate use on the fire system. In no case, however, shall a pump having connection to oil lines be used as a fire pump.

§ 34.10-10 *Type of fire pumps—T/ALL.* Tank ships are not restricted to any particular type or proportions for fire pumps.

§ 34.10-15 *Location of fire pumps—T/ALL.* (a) On oil-burning tank ships, provided with two fire pumps, where the engine and firerooms are not entirely separated by iron or steel bulkheads, or if fuel can drain from fireroom bilges into the engine room, one of the fire pumps shall be located in an accessible space separate from the machinery compartment.

(b) On all tank ships the construction or conversion of which is started on or after November 19, 1952, where 2 fire pumps are required, they shall be located in separate spaces, and the arrangements of pumps, sea connections, and sources of power shall be such as to insure that a fire in any one space will not put all of the fire pumps out of operation. However, where it is shown to the satisfaction of the Commandant that it is unreasonable or impracticable to provide two sources of power due to the size or arrangement of the vessel, or for other reasons, the installation of a total flooding carbon dioxide system may be accepted as an alternate method of extinguishing the fire affecting the powering and operation of at least one of the required fire pumps in lieu of having separate sources of power.

§ 34.10-20 *Fire pump relief valves and piping—T/ALL.* (a) Fire pumps shall be fitted on the discharge side with a relief valve and a pressure gage to indicate the pressure on the fire main. Except when the fire pumps are being used in tank cleaning operations, the relief valves shall be set to relieve at 25 pounds higher than the pressure necessary to maintain the requirements of § 34.10-5 (b) of this part. If the fire pumps operating under shut-off conditions are not capable of producing a pressure exceeding 125 pounds per square inch, the relief valves may be omitted.

(b) Suction pipes for all fire pumps shall be so arranged as to have an area of opening sufficiently large to supply water when the pumps are working at full capacity.

(c) The size of the discharge pipe leading from fire pumps shall in no case be less than that of the discharge opening of the pump, and in no case shall it be less than 1½ inches in internal diameter.

(d) The pipe, valves, fittings, and construction of fire lines shall conform to the requirements contained in Part 55 of Subchapter F (Marine Engineering) of this chapter.

§ 34.10-25 *Fire hydrants—T/ALL.* (a) Fire hydrants shall be of sufficient number and so arranged that any part of the living quarters, weather decks, machinery spaces, stores and working spaces, and any part of cargo decks accessible to the crew while at sea may be reached with 2 streams of water, one of which shall be from a single 50-foot length of hose.

(b) Hose connections shall be brass or composition material.

(c) Outlet openings shall have a diameter of not less than 1½ inches.

(d) All fire hydrants shall be equipped with hose spanners.

(e) The arrangement of the fire hydrant shall be limited to any position from the horizontal to the vertical pointing downward, so that the hose will lead downward or horizontally, in order to minimize the possibility of kinking. In no case will a hydrant arranged in a vertical position with the outlet pointing upward be accepted.

(f) The pipes and hydrants shall be so placed that the fire hose may be easily coupled to them. In ships where deck cargo may be carried, the position of the hydrants shall be such that they are always readily accessible and the pipes shall be arranged as far as practicable to avoid risk of damage by such cargo.

(g) Each fire hydrant shall be equipped with a valve so that the hose may be removed while there is pressure on the fire main.

§ 34.10-30 *Fire hose—T/ALL.* (a) Fire hose shall be connected to the outlet at all times except on open decks, where the location of the fire hydrants is such that no protection is afforded for the hose in heavy weather.

(b) The fire hose may be temporarily removed when it will interfere with the landing of cargo.

(c) Each fire hose shall be provided with a suitable nozzle.

(d) Fire hose, when part of the fire equipment, shall not be used for any other purpose than fire extinguishing, fire drills, and testing.

(e) Fire hose shall be drained and stowed in its proper place immediately after being used.

§ 34.10-35 *Fire hose nozzles on tank ships constructed on or after July 1, 1951—T/ALL.* (a) Where smooth bore type hose nozzles are used, the nozzle orifice size shall be as indicated in § 34.10-5 (b).

(b) On all tank ships of 1,000 gross tons and over, the nozzles used on at least 2 hose lines in the boiler and machinery spaces shall be of approved combination solid stream and water fog nozzles which are capable of producing a solid stream or a high velocity fog, and being shut off. In addition, an approved applicator equipped with a low velocity water fog tip, which is capable of being attached directly to the nozzle or the hose, shall be provided for each nozzle. Unless a self-cleaning strainer is contained within the nozzle itself and within the applicator where the applicator is attached directly to the hose, there shall be a self-cleaning strainer attached to the fire hydrant either directly or by means of a short length of hose.

(c) At least 25 percent of the hydrants, exclusive of those in the boiler and machinery spaces, shall be fitted with approved combination nozzles, applicators with low velocity fog spray heads, and self-cleaning strainers as described in § 34.10-35 (b). Such nozzles shall be strategically located throughout the tank ship.

(d) Where approved combination nozzles are used with fire lines other than required in § 34.10-35 (b) and (c), the applicators with low velocity fog spray heads, and self-cleaning strainers may be fitted but will not be required.

§ 34.10-40 *Fire hose nozzles on tank ships constructed prior to July 1, 1951—T/ALL.* (a) Where smooth bore type hose nozzles are used, the nozzle orifice size shall be as indicated in § 34.10-5 (b).

(b) Fire hose lines in boiler and machinery spaces of vessels of 1,000 gross tons or over shall be provided with at least 2 suitable nozzles of an approved type which are capable of effectively extinguishing oil fires. Approved combination nozzles as described in § 34.10-35 (b), together with the applicator and low velocity fog spray head, will be acceptable for this purpose. The self-cleaning strainer may be fitted, but will not be required.

SUBPART 34.15—CARGO SPACES ON TANK SHIPS

§ 34.15-1 *General requirements for cargo spaces on tank ships constructed or converted on or after November 19, 1952—T/ALL.* (a) Every tank ship shall be provided with an approved fixed fire extinguishing system for all cargo spaces.

(b) The types of fire extinguishing systems which may be used are as follows:

(1) Steam.
(2) Carbon dioxide or other inert gas.
(3) Foam. (May not be used for dry cargo spaces.)
(4) Carbon tetrachloride. (May be used on the approval of the Commandant only. May not be used for tanks in excess of 6,300 cubic feet, not for any dry cargo spaces.)

§ 34.15-5 *General requirements for cargo spaces on tank ships constructed or converted prior to November 19, 1952—T/ALL.* (a) Every tank ship shall be provided with an approved fire extinguishing system for all cargo spaces. Such system may be portable, semiportable or fixed.

(b) The types of fire extinguishing systems which may be used are as follows:

(1) Steam.
(2) Carbon dioxide or other inert gas.
(3) Foam.

(4) Carbon tetrachloride. (May be used on the approval of the Commandant only. May not be used for tanks in excess of 6,300 cubic feet.)

§ 34.15–10 *General requirements for fire extinguishing systems—T/ALL.* (a) For the purposes of this subpart, the term "largest cargo compartment" shall be considered as the cargo space, either liquid or dry, having the greatest volumetric measurement. In the case of liquid cargo tanks, the gross volume of the individual tanks shall be used. In the case of dry cargo compartments, the gross volume shall be taken between adjacent watertight or fire screen bulkheads, and from tank top or lowest deck to the deckhead of the uppermost deck on which cargo may be carried, and if a trunk extends beyond such deckhead, the volume of the trunk shall be included.

(b) The valves of all fixed fire extinguishing systems shall be so located as to be easily accessible and not readily cut off from use by an outbreak of fire, and shall be marked as required by § 35.40–10.

(c) Provisions shall be made for draining the manifolds and individual lines of fire extinguishing systems to protect them against freezing.

(d) In general, all piping shall comply with the requirements of Subchapter F (Marine Engineering) of this chapter. The piping systems for carbon dioxide shall have a minimum bursting pressure of 6,000 p. s. i.

(e) Piping for dry cargo spaces shall be run independent of the extinguishing system for the bulk cargo tanks. If this should be impracticable, valves shall be installed between the main bulk tank extinguishing system and other compartments served, such valves to be marked: "This valve to be kept closed except in case of fire."

(f) For dry cargo spaces, means shall be provided for stopping any ventilator fans and closing all openings from outside the spaces protected.

§ 34.15–15 *Steam systems for cargo spaces—T/ALL.* (a) When a steam fire extinguishing system is installed, the requirements of this section shall be met.

(b) Steam for fire extinguishing systems shall be available from the main boilers, donkey or auxiliary boilers, or from a shore source. The capacity of the steam supply shall be at least equal to one pound of steam per hour for each 12 cubic feet of the largest cargo compartment in the case of tank ships constructed or converted on or after November 19, 1952, and one pound of steam per hour for each 50 cubic feet of the largest cargo compartment in the case of tank ships constructed or converted prior to November 19, 1952.

(c) A steam pressure of at least 100 pounds per square inch shall be maintained for fire extinguishing purposes. Where the maximum allowable boiler working pressure will not permit of this, or where steam from a shore plant is being used, the maximum steam pressure available from either source shall be used, but not to exceed the normal operating pressure of the ship's steam system.

(d) The master valve control shall be located above the uppermost complete deck having permanent means of closing all openings in the weather portions of the deck. The main lines shall have sufficient area to supply all individual lines to the largest tank and the tanks adjacent thereto, and in the case of dry cargo compartments, the entire compartment. The valves to the tanks shall be left open at all times so that, in case of fire, it will be necessary only to open the master valve to insure a flow of steam into each tank, after which, the valves to the tanks which are not on fire may be closed: *Provided*, That where the opening of such branch lines may cause contamination of cargo or cause the passage of gases or vapors between tanks or compartments, they may be kept closed.

(e) Steam smothering lines shall be tested with at least 50 pounds per square inch of air pressure or by blowing steam through the lines at the working pressure and a survey made for detecting corrosion and defects using hammer test or such other means as may be necessary.

(f) The minimum nominal diameter of any steam fire extinguishing pipe shall be 1½ inches.

§ 34.15–20 *Carbon dioxide or other inert gas system for cargo spaces—T/ALL.* (a) When a carbon dioxide system is installed it shall be of an approved type and shall meet the requirements of this section. Specific approval by the Commandant is required for the installation of other inert gas system, and it shall be demonstrated that such system offers protection at least equivalent to the required carbon dioxide system.

(b) At least one pound of carbon dioxide shall be available for each 30 cubic feet of the largest cargo compartment.

(c) For liquid cargo spaces, the rate of discharge shall be such as to supply the required amount within 5 minutes.

(d) For dry cargo spaces, no specific rate of discharge need be provided. However, the pipes to the individual spaces shall be at least ¾ inch.

(e) At annual inspections, all carbon dioxide cylinders for fixed, semiportable, and portable systems shall be examined externally and replaced if any corrosion is found. They shall also be checked by weighing to determine their contents, and if found to be more than 10 percent under the required contents of carbon dioxide, they shall be recharged.

§ 34.15–25 *Foam systems for cargo spaces—T/ALL.*—(a) *Approved type.* When a foam system is installed, it shall be of an approved type and shall meet the requirements of this section.

(b) *Area protected.* The system shall be so designed and arranged as to spread a blanket of foam over the entire liquid surface of any tank within the range of usual trim. The arrangement of piping shall be such as to give a uniform distribution over the entire area protected.

(c) *Rate of application.* (1) The rate of discharge to foam outlets to the various tanks shall be at least as set forth in this paragraph.

(2) For chemical foam systems with stored "A" and "B" solutions, a total of at least one gallon per minute of the 2 solutions shall be discharged for each 10 square feet of the area protected.

(3) For other types of foam systems, the water rate to the dry powder generators or air foam production equipment shall be at least one gallon per minute for each 10 square feet of the area protected.

(d) *Supply of foam producing material.* There shall be provided a quantity of foam producing materials sufficient to operate the equipment at the discharge rate specified in § 34.15–25 (c) in the tank having the largest superficial liquid area for a period of at least 5 minutes.

(e) *Fixed type.* If the foam system is of the fixed type, the apparatus and chemicals shall be contained in a fire-resistant compartment protected from the weather and where the operator will be shielded from fire and smoke.

(f) *Portable or semiportable type.* If the foam system is of the portable or semiportable type, the apparatus and chemicals shall be stowed in a readily accessible place protected from the weather.

§ 34.15–30 *Carbon tetrachloride systems for cargo spaces—T/ALL.* (a) When a carbon tetrachloride system is installed, at least one quart shall be available for each 225 cubic feet of the largest cargo compartment.

§ 34.15–35 *Flue gas fire extinguishing systems for cargo spaces—T/ALL.* Inert-gas system for extinguishing fires in cargo spaces, where the source of the inert gas is the stack or a furnace for producing such inert gas shall be considered as complying with the regulations in this subchapter, provided such system shall have the approval of the Commandant as required in § 34.15–20 (a).

SUBPART 34.20—BOILER ROOM AND MACHINERY SPACES ON TANK SHIPS

§ 34.20–1 *Fixed fire extinguishing systems for boiler rooms and machinery spaces—T/ALL.* (a) Any fixed fire extinguishing system installed in boiler rooms or machinery spaces, whether required or not, shall be of an approved type.

(b) All tank ships propelled by internal combustion engines using a fuel having a flash point of less than 110 degrees F. shall be fitted with a fixed carbon dioxide fire extinguishing system in the engine room space.

(c) All steam propelled tank ships using oil for fuel, construction or conversion of which is started on or after November 19, 1952, shall be fitted with a fixed carbon dioxide or foam fire extinguishing system in all spaces containing oil fired boilers, whether main or auxiliary, or their fuel oil units, valves, or manifolds in the line between the settling tanks and the boilers.

(d) All tank ships propelled by internal combustion machinery and having auxiliary boilers using oil for fuel, construction or conversion of which is started on or after November 19, 1952, shall be fitted with a fixed carbon dioxide or foam fire extinguishing system in all spaces containing such boilers or their fuel oil units, valves, or manifolds in the line between the settling tanks and the boilers.

(e) If a fixed fire extinguishing system is installed to protect an internal combustion propelling machinery installation, the system shall be of the carbon dioxide type.

§ 34.20–5 *General requirements for fixed fire extinguishing systems—T/ALL.* (a) The valves of all fire extinguishing systems shall be plainly marked to indicate the compartments into which they discharge, and they shall be so located as to be easily accessible and not readily cut off from use by an outbreak of fire.

(b) Provisions shall be made for draining the manifolds and individual lines.

(c) Where the same type medium is used for both the machinery space and cargo extinguishing systems, the same supply may be used.

(d) If fuel can drain from the compartment being protected to an adjacent compartment, or if the compartments are not entirely separate, the requirements for both compartments shall be used to determine the amount of extinguishing agent to be provided. The extinguishing agent shall be arranged to discharge into both such compartments simultaneously.

§ 34.20–10 *Fixed carbon dioxide fire extinguishing systems installed on tank ships on or after November 19, 1952—T/ALL.* (a) The quantity of carbon dioxide in pounds to be supplied shall be at least equal to the gross volume of the space in cubic feet, taken between watertight or oiltight bulkheads and from tank top or flat forming the lower boundary of the space to the deck head of the space, divided by a factor as set forth in Table 34.20–10 (a) depending upon the volume of the space. For machinery spaces, the upper boundary of the space shall be taken as the underside of the deck forming the hatch opening unless the machinery or boilers extend into such hatch, in which case, the volume shall be taken to the top of the hatch trunk or the next material reduction in area of the trunk, whichever is lower.

TABLE 34.20–10 (a)

Gross volume of space, cubic feet		Factor
Over	Not over	
------	500	15
500	1,600	16
1,600	4,500	18
4,500	50,000	20
50,000	------	22

(b) The whole charge of carbon dioxide shall be capable of being released simultaneously by operating one valve and one control; such valve and control shall be adequately protected to avoid the accidental discharge of the system. The valves shall be marked as required by § 35.40–10.

(c) The system shall be so designed that the cylinders are completely discharged in not more than 2 minutes.

(d) The arrangement of piping shall be such as to give a general and fairly uniform distribution over the entire space protected. All pipes, valves, and fittings shall have a minimum bursting pressure of 6,000 p. s. i.

(e) A suitable alarm shall be provided to operate automatically when the control valve is operated. The alarm shall be conspicuously and centrally located in the space protected and shall be marked as required by § 35.40–7.

(f) Means shall be provided for stopping all mechanical ventilation to the space protected from outside such space.

(g) Means shall be provided for closing all openings to the space protected from outside such space. In this respect, dampers or other means shall be available for blanking-off natural ventilators, and relatively tight doors and shutters shall be provided for openings in the lower portion of the space. The construction shall be such that openings in the upper portion of the space can be closed-off either by permanently installed means or by the use of canvas or other materials which is normally carried by the tank ship.

§ 34.20–15 *Fixed carbon dioxide fire extinguishing systems installed on tank ships prior to November 19, 1952—T/ALL.* (a) (1) A total flooding system is one in which the entire space is protected. The quantity of carbon dioxide in pounds to be supplied shall be at least equal to the gross volume of the space in cubic feet, taken between oiltight or watertight bulkheads and from tank top or flat forming the lower boundary of the space to the deck head of the space, divided by 22. For machinery spaces, the upper boundary of the space shall be taken as the underside of the deck forming the hatch opening unless the machinery or boilers extend into such hatch, in which case, the volume shall be taken to the top of the machinery or boilers.

(2) A bilge system is one in which the bilge or space below the floor plates is protected. The quantity of carbon dioxide in pounds to be supplied shall be at least equal to the gross volume of the space in cubic feet, taken between watertight or oiltight bulkheads and from the tank top or flat forming the lower boundary of the space to the top of the shell of a fire tube boiler or top of the casing or drums of a water tube boiler, divided by 36.

(b) When a fixed carbon dioxide extinguishing system is installed to protect a space containing oil fired boilers, either a bilge system or a total flooding system may be used.

(c) When a fixed carbon dioxide fire extinguishing system is installed to protect a space containing internal combustion propelling machinery, a total flooding system shall be used.

(d) The provisions of § 34.20–10 (b) through (e) shall be complied with and § 34.20–10 (f) and (g) shall be complied with insofar as is reasonable and practicable.

§ 34.20–20 *Fixed foam fire extinguishing systems—T/ALL.* (a) (1) The system shall be so designed and arranged as to spread a blanket of foam over the entire tank top or bilge of the space protected. The arrangement of piping shall be such as to give a uniform distribution over the entire area protected.

(2) Where such installations are made on or after November 19, 1952, to protect an oil fired boiler installation on a flat which is open to or can drain to the lower engine room or other space, both the flat and the lower space shall be protected simultaneously. The flat shall be fitted with suitable coamings on all openings other than the deck drains to properly restrain the foam at that level. Other installations of a similar nature shall be considered in a like manner.

(b) (1) The rate of discharge to foam outlets protecting the hazard or area shall be at least as set forth in this paragraph.

(2) For chemical foam systems with stored "A" and "B" solutions, a total of at least 1.6 gallons per minute of the two solutions shall be discharged for each 10 square feet of area protected.

(3) For other types of foam systems, the water rate to the dry powder generators or air foam production equipment shall be at least 1.6 gallons per minute for each 10 square feet of surface to be protected.

(c) There shall be provided a quantity of foam producing materials sufficient to operate the equipment at the discharge rate specified in § 34.20–20 (b) for a period of at least 3 minutes.

(d) All containers and valves by which the foam system is operated shall be easily accessible and so placed that they will not readily be cut off from use by an outbreak of fire. The valves shall be marked as required by § 35.40–10.

(e) Where installations are made on or after November 19, 1952, in order that any residual fires above the floor plates may be extinguished when a foam system is used, at least 2 fire hydrants, in addition to those required for the machinery space by § 34.10–35 (b), shall be installed outside of the machinery space entrances. Such hydrants shall be fitted with sufficient hose so that any part of the machinery space may be reached with at least 2 streams of water, and each hose shall be equipped with an approved combination nozzle, applicator, and self-cleaning strainer as described in § 34.10–35 (b).

(f) On installations installed prior to November 19, 1952, a semiportable foam generator using a dry chemical mixture or mechanical foam in conjunction with the fire lines may be substituted for the fixed system subject to the following conditions:

(1) There shall be at least one fire pump of suitable capacity available which can be operated and controlled from outside the space protected.

(2) Stop valves shall be installed in the line so that if any portion of the fire main is ruptured, the foam generator may still be operated. Connections for at least 2 fire hoses shall be provided between the pump and the stop valve.

(g) All piping shall comply with the requirements of Subchapter F (Marine Engineering) of this chapter.

§ 34.20–25 *Fire extinguishing equipment, other than fixed, for boiler and machinery spaces on tank ships—T/ALL.* (a) The minimum requirements for fire

fighting equipment on all tank ships which are not fitted with fixed fire extinguishing systems in boiler room and machinery spaces shall be of the type and character specified as follows:

(1) Steam tank ships of more than 750 gross tons: One semiportable fire extinguisher of either the 40-gallon capacity foam type, 100-pound capacity carbon dioxide type, or dry chemical type having approved equivalent capacity, for each boiler room.

(2) Steam tank ships of 750 gross tons and under: One semiportable fire extinguisher of either the 20-gallon capacity foam type, 50-pound capacity carbon dioxide type, or dry chemical type having approved equivalent capacity, for each boiler room.

(3) Internal combustion engine driven tank ships of 50 gross tons and upward: One semiportable fire extinguisher of either the 12-gallon capacity foam type, 35-pound capacity carbon dioxide type, or dry chemical type having an approved equivalent capacity, for each 1,000 b. hp. or fraction thereof. Alternately, approved units having a larger capacity may be used, provided the total capacity is not less than that required for the individual units.

(4) When donkey boilers using oil as fuel are located in the machinery spaces on tank ships propelled by internal combustion engines, a 40-gallon capacity semiportable fire extinguisher of the foam type, or its equivalent as set forth in subparagraph (1) of this paragraph, shall be substituted for one of the 12-gallon capacity semiportable fire extinguishers, or equivalent, required by subparagraph (3) of this paragraph.

(5) All of the foregoing semiportable fire extinguishers shall be fitted with suitable hose attachments or other approved methods of distributing the foam, carbon dioxide, or dry chemical in any part of the space to be protected.

(b) On tank ships of 1,000 gross tons and over in ocean or coastwise service, the construction or conversion of which was started on or after November 19, 1952, there shall be installed in any space containing an oil fired boiler, either main or auxiliary, one 2½-gallon foam type fire extinguisher, or the equivalent as described in § 34.25–25, for each burner. However, the total number need not exceed 5 in any one space. These fire extinguishers are in addition to those required by §§ 34.25–25 and 34.25–30.

(c) On tank ships of 1,000 gross tons and over in ocean or coastwise service, propelled by internal combustion engines, the construction or conversion of which was started on or after November 19, 1952, there shall be installed one 2½-gallon foam type fire extinguisher, or the equivalent as described in § 34.25–25, for each 1,000 b. hp. of the main engines or fraction thereof; provided there shall be at least 2 such fire extinguishers, but need not be more than 6. These fire extinguishers are in addition to those required by § 34.25–25.

(d) On tank ships of 1,000 gross tons and over in ocean or coastwise service, propelled by internal combustion engines, the construction or conversion of which was started on or after November 19, 1952, if a fixed fire extinguishing system is fitted in the machinery space, there shall be in addition to each space containing such engines a 12-gallon capacity semiportable fire extinguisher of the foam type, or its equivalent as set forth in paragraph (a) (3) of this section, fitted in accordance with the provisions of paragraph (a) (5) of this section.

SUBPART 34.21—PUMP ROOMS ON TANK SHIPS

§ 34.21–1 *Fixed fire extinguishing systems for tank ships constructed or converted on or after November 19, 1952—T/ALL.* (a) On tank ships the construction or conversion of which was started on or after November 19, 1952, a fixed steam, foam, or carbon dioxide fire extinguishing system shall be provided for the pump rooms.

(b) Piping for the pump room system shall be run independent of the fire extinguishing system for the bulk cargo tanks. If this should be impracticable, valves shall be installed between the main bulk tank extinguishing systems and the pump room, such valves to be marked: "This valve to be kept closed except in case of fire."

(c) Control valves for pump room extinguishing systems shall be located adjacent to the pump room exit. The valves shall be marked as required by § 35.40–10.

(d) Means shall be provided for stopping ventilation fans from outside the space, and for closing all doorways, hatches, and other openings, when steam or inert gas is used.

(e) When a steam smothering system is installed, the outlets shall terminate in the lower pump room, just above the floor plates. The steam smothering system shall meet the general requirements of § 34.15–15.

(f) When a carbon dioxide system is installed, it shall meet the general requirements contained in § 34.20–10.

(g) When a foam system is installed, it shall meet the general requirements of § 34.20–20.

§ 34.21–5 *Fire extinguishing systems for tank ships constructed or converted prior to November 19, 1952—T/ALL.* (a) On tank ships the construction or conversion of which was started prior to November 19, 1952, but on or after July 1, 1951, a steam, inert gas, or foam system shall be provided for extinguishing fires in pump rooms. For vessels the construction or conversion of which was started prior to July 1, 1951, such systems are not required, but if installed, should meet the general requirements of this section.

(b) Piping for fixed pump room systems, shall be run independent of the fire extinguishing system for the bulk cargo tanks. If this should be impracticable, valves shall be installed between the main bulk tank extinguishing system and the pump room, such valves to be marked: "This valve to be kept closed except in case of fire."

(c) Control valves for pump room extinguishing systems shall be located adjacent to the pump room exit. The valves shall be marked as required by § 35.40–10.

(d) Means shall be provided for stopping ventilation fans from outside the space, and for closing all doorways, hatches, and other openings, when steam or inert gas is used.

(e) When a steam smothering system is installed, the outlets shall terminate in the lower pump room, just above the floor plates.

SUBPART 34.22—LAMP AND PAINT ROOMS AND SIMILAR COMPARTMENTS ON TANK SHIPS

§ 34.22–1 *Fireproofing of lamp, oil, and paint rooms—T/ALL.* Lamp, oil and paint rooms shall be wholly and tightly lined with metal.

§ 34.22–5 *Fixed fire extinguishing systems for lamp and paint rooms and similar spaces on tank ships constructed or converted on or after November 19, 1952—T/ALL.* (a) On tank ships the construction or conversion of which was started on or after November 19, 1952, a fixed carbon dioxide or steam fire extinguishing system shall be installed in all paint rooms and similar compartments.

(b) Piping for the lamp and paint lockers and similar compartments shall be run independent of the extinguishing system for the bulk cargo tanks. If this should be impracticable, valves shall be installed between the main bulk tank extinguishing system and other compartments, such valves to be marked: "This valve to be kept closed except in case of fire."

(c) Control valves shall be marked as required by § 35.40–10.

(d) When a steam system is installed, it shall meet the general requirements of § 34.15–15.

(e) When a carbon dioxide system is installed, it shall meet the general requirements contained in § 34.20–10.

(f) Means shall be provided for stopping ventilation fans from outside the space, and for closing all doors and other openings.

§ 34.22–10 *Fire extinguishing systems for lamp and paint rooms and similar spaces on tank ships constructed or converted prior to November 19, 1952—T/ALL.* (a) On tank ships the construction or conversion of which was started prior to November 19, 1952, a steam, inert gas, or foam system shall be provided for extinguishing fires in all lamp and paint rooms and similar compartments.

(b) Piping for the lamp and paint lockers and similar compartments shall be run independent of the extinguishing system for the bulk cargo tanks. If this should be impracticable, valves shall be installed between the main bulk tank extinguishing system and other compartments, such valves to be marked: "This valve to be kept closed except in case of fire."

(c) Control valves for fixed systems shall be marked as required by § 35.40–10.

(d) Means shall be provided for stopping ventilation fans from outside the space, and for closing all doors and other openings when steam or inert gas is used.

SUBPART 34.25—HAND FIRE EXTINGUISHERS

§ 34.25–1 *Hand fire extinguishers; test and approval—TB/ALL.* Every type of fire extinguisher provided for and required by this part shall be tested by the National Bureau of Standards, Department of Commerce, and a report made by that bureau to the Commandant, who shall then determine whether the said extinguisher shall be approved for use on vessels subject to inspection.

§ 34.25–5 *Hand fire extinguishers; marking—TB/ALL.* Every fire extinguisher approved after May 31, 1921, for use on vessels under the jurisdiction of the Coast Guard shall have affixed thereto a metallic name plate having plainly stamped thereon the name of the fire extinguisher, the rated capacity in gallons, quarts, or pounds, and the name and address of the person or firm for whom approved.

§ 34.25–10 *Hand fire extinguishers; location TB/ALL.* (a) Hand fire extinguishers shall be located in such parts of the tank vessel as in the opinion of the Officer in Charge, Marine Inspection, will be most convenient and serviceable in case of emergency and so arranged that they may be easily removed from their fastenings.

(b) One of the hand fire extinguishers intended for use in any space shall be stowed near the entrance to that space.

(c) Hand fire extinguishers in which the medium is stored under pressure shall not be kept in passenger or crew accommodations.

§ 34.25–15 *Hand fire extinguishers; inspection—TB/ALL.* Every fire extinguisher shall be discharged and examined at each annual inspection: *Provided,* That carbon tetrachloride fire extinguishers shall be tested for their pumping efficiency and the liquid discharged with proper care so that it may be replaced in the extinguishers. Carbon dioxide fire extinguishers shall be checked by weighing to determine contents, and, if found to be more than 10 percent under required contents of carbon dioxide, they shall be recharged.

§ 34.25–20 *Hand fire extinguishers; spare charges and parts—TB/ALL.* (a) Extra charges shall be carried on board for 50 percent of each class of fire extinguishers required. If 50 percent of each class of fire extinguishers carried gives a fractional result, extra charges and extra safety valve units shall be provided for the next largest whole number: *Provided,* That extra charges for carbon dioxide type fire extinguishers shall be considered either an additional carbon dioxide extinguisher or a 2½-gallon foam extinguisher, and for this 2½-gallon foam extinguisher no extra charge will be required.

(b) Recharges, particularly the acid used in charging soda-and-acid type of fire extinguisher, shall be packed in such manner that the filling operation (i. e., in recharging the extinguisher) can be performed without subjecting the person doing the recharging to undue risk of acid burns and shall be contained in Crown stopper type of bottle.

(c) Extra safety valve units shall be carried on board for 50 percent of all hand fire extinguishers of the foam type.

§ 34.25–25 *Hand fire extinguishers; number required on tank ships—T/ALL.* (a) Tank ships shall be provided with chemical fire extinguishers as follows:

Size of tank ship, gross tons:	*Minimum number of fire extinguishers*
Not over 100	2
Over 100 and not over 500	3
Over 500 and not over 1,000	6
Over 1,000	8

(b) The number of fire extinguishers required by paragraph (a) of this section is based on the ordinary 2½-gallon foam type fire extinguisher and other types of fire extinguishers may be substituted according to the following schedule: One 2½-gallon foam type fire extinguisher is equivalent to one 15-pound carbon dioxide type, or two 1-quart carbon tetrachloride type, or one 12-pound dry chemical type. A 2½-gallon soda-acid type fire extinguisher, or its equivalent in other approved water types, may be substituted for the required foam type fire extinguisher within the accommodation spaces and similar spaces where neither oil nor electrical fires are the primary anticipated hazard.

(c) No fire extinguisher of a capacity greater than 2½ gallons (or equivalent sizes of other types) shall be allowed a greater rating than the ordinary 2½-gallon size, but fire extinguishers of less capacity are allowable under paragraphs (a) and (b) of this section when their total contents equal the required quantity on tank ships.

§ 34.25–30 *Hand fire extinguishers required on tank vessels of over 15 gross tons using oil as fuel—TB/ALL.* (a) In boiler rooms, and machinery spaces which contain internal-combustion engines, there shall be provided at least two 2½-gallon foam type fire extinguishers or their equivalents as provided in § 34.25–25. On tank ships these fire extinguishers shall be in addition to those provided in § 34.25–25.

(b) Where gasoline is carried in a separate storage tank for use in an auxiliary lighting or wireless unit or work boats, at least two 2½-gallon foam type extinguishers or their equivalents, as required in § 34.25–25, shall be provided, and such fire extinguishers shall be located within a reasonable distance of the gasoline storage tank.

SUBPART 34.30—FIRE AXES

§ 34.30–1 *Fire axes required—T/ALL.* All tank ships shall be provided with fire axes as follows:

Size of tank ship, gross tons:	*Minimum number of fire axes*
Not over 50	1
Over 50 and not over 200	2
Over 200 and not over 500	3
Over 500 and not over 1,000	4
Over 1,000	5

§ 34.30–5 *Location and use of fire axes—T/ALL.* All fire axes shall be located so as to be readily found in time of need, shall not be used for general purposes, and shall be kept in good condition.

SUBPART 34.35—SAND BOXES

§ 34.35–1 *Sand boxes required on tank vessels using oil as fuel under boilers—TB/ALL.* (a) Tank vessels of 500 gross tons and under, using oil as fuel under boilers, shall be fitted with metal tanks in the space where such oil is used, containing 5 cubic feet of sand and a scoop or shaker for distributing the same, and such tank, sand, and scoop, when so provided may be considered as replacing one of the fire extinguishers required under § 34.25–30 (a).

(b) Tank vessels of over 500 gross tons, using oil as fuel, under boilers, shall be fitted with metal tanks in the space where such oil is used, containing 10 cubic feet of sand and a scoop or shaker.

SUBPART 34.40—FIRE-FIGHTING EQUIPMENT FOR TANK BARGES

§ 34.40–1 *Portable extinguishing equipment for cargo spaces—B/ALL.* (a) All tank barges of 100 gross tons and over, whose certificate requires that they be manned, and which are not equipped with a steam fire-extinguishing system as required on a tank ship, shall be equipped with approved chemical, inert gas, or foam in the following quantities:

33 gallons of foam; or,
200 pounds of carbon dioxide; or,
7 gallons of carbon tetrachloride.

This is in addition to the hand extinguishers required in § 34.40–5.

(b) The above equipment may be either portable or equipped with sufficient lengths of hose or piping to deliver the extinguishing agent to any point on deck or in the crew's accommodation. If portable extinguishers are used, each unit must weigh less than 55 pounds. Extinguishers shall be located in protected and accessible places but not immediately adjacent to cargo tank hatches and openings.

§ 34.40–5 *Hand fire extinguishers for quarters, pump room, and machinery spaces—B/ALL.* (a) Each tank barge whose certificate requires that it be manned and each unmanned tank barge with pump room shall be provided with approved hand extinguishers located in or adjacent to the entrance of spaces, as follows:

(1) Living accommodations.
(2) Galley.
(3) Pump room.
(4) Pump engine room.
(5) Fireroom.

(b) The fire extinguishers at each location shall be not less than one of the equivalent amounts as follows:

(1) 2½ gallons of foam; or,
(2) 15 pounds of carbon dioxide; or,
(3) 2 quarts of carbon tetrachloride; or,
(4) 12 pounds dry chemical.

(c) In no event shall a manned tank barge or an unmanned tank barge with a pump room be provided with less than one of the equivalent quantities, as follows:

(1) 5 gallons of foam; or,
(2) 30 pounds of carbon dioxide; or,
(3) 4 quarts of carbon tetrachloride.

(d) Each unmanned tank barge not provided with a cargo pump room shall

be equipped with at least one 2½-gallon foam-type fire extinguisher or the equivalent, which may be carried aboard the barge or the towing vessel while under way. When the barge is moored to the dock, such equipment shall be accessible, or equivalent equipment may be supplied by the terminal.

PART 35—OPERATIONS

SUBPART 35.15—CASUALTY OR ACCIDENT REPORTS

Section 35.15–1 (a) (5) is amended to read as follows:

§ 35.15–1 *Notice of casualty and voyage records—TB/ALL.* (a) * * *

(5) Injury causing any person to remain incapacitated for a period in excess of 72 hours; except injury to harbor workers not resulting in death and not resulting from vessel casualty or vessel equipment casualty.

(R. S. 4405, as amended, 4462, as amended, sec. 5, 55 Stat. 244, as amended; 46 U. S. C. 375, 416; 50 U. S. C., App. 1275. Interpret or apply R. S. 4450, as amended, secs. 1, 2, 49 Stat. 1544; 46 U. S. C. 239, 367)

SUBPART 35.30—GENERAL

Section 35.30–20 is amended to read as follows:

§ 35.30–20 *Fresh air breathing apparatus—TB/ALL.* (a) All manned tank vessels having tanks which exceed 15 feet in depth, measured from the deck to the lowest point at which cargo is carried, and all tank ships of 1,000 gross tons and over shall be provided with an outfit as follows:

(1) One approved fresh air breathing apparatus, including belt and life line. The length of the air hose shall be sufficient to reach from the open deck, well clear of hatch or doorway, to any part of the holds, tanks, or machinery spaces.

(2) One approved 3-cell, explosion-proof flashlight, constructed in accordance with Subpart 161.008 of Subchapter Q (Specifications) of this chapter.

(3) One fire axe.

(R. S. 4405, as amended, 4417a, as amended, 4462, as amended; 46 U. S. C. 375, 391a, 416)

SUBPART 35.35—CARGO HANDLING

Section 35.35–1 is amended to read as follows:

§ 35.35–1 *Men on duty—TB/ALL.* A sufficient number of the crew shall be on duty to perform transfer operations. In the case of unmanned barges, a person holding a valid license as master, mate, pilot, or engineer, or a certificated tankerman may be supplied by a terminal.

(R. S. 4405, as amended, 4417a, as amended, 4462, as amended; 46 U. S. C. 375, 391a, 416)

SUBPART 35.40—MARKING OF FIRE AND EMERGENCY EQUIPMENT

Part 35 is amended by adding a new § 35.40–7 reading as follows:

§ 35.40–7 Carbon dioxide alarm—*T/ALL.* Adjacent to all carbon dioxide fire extinguishing alarms installed after November 19, 1952, there shall be conspicuously marked: "WHEN ALARM SOUNDS VACATE AT ONCE. CARBON DIOXIDE BEING RELEASED."

(R. S. 4405, as amended, 4417a, as amended, 4462, as amended; 46 U. S. C. 375, 391a, 416)

PART 38—LIQUEFIED PETROLEUM GASES

SUBPART 38.10—PIPING, VALVES, FITTINGS, AND ACCESSORY EQUIPMENT

Section 38.10–15 is amended to read as follows:

§ 38.10–15 *Safety relief valves—TB/ALL.* (a) Each tank shall be fitted with one or more approved safety relief valves designed, constructed and flow-tested for capacity in conformance with Subpart 162.018 of Subchapter Q (Specifications) of this chapter.

(b) Each safety relief valve shall be set to start to discharge at a pressure not in excess of the design pressure of the tank.

(c) The safety relief valves shall have a relieving capacity sufficient to prevent a rise of pressure in the tank of more than 20 percent above the maximum design pressure when all the safety relief valves are blowing. The minimum required rates of discharge of safety relief valves shall not be less than that shown in Table 38.10–15 (c).

TABLE 38.10–15 (c)—MINIMUM REQUIRED RELIEVING CAPACITIES FOR SAFETY RELIEF VALVES

[Discharge measured in cubic feet per minute of liquefied petroleum gas at 60° F. and atmospheric pressure (14.7 p. s. i. absolute)]

Tank size D x U [1]	Minumum tank design pressure, p. s. i.[2]			
	100	150	200	250 [3]
40	2,725	2,840	3,050	3,250
41	2,795	2,910	3,120	3,330
42	2,860	2,980	3,200	3,410
43	2,930	3,050	3,270	3,490
44	3,000	3,120	3,350	3,570
45	3,070	3,190	3,420	3,650
46	3,140	3,260	3,500	3,730
47	3,205	3,340	3,570	3,810
48	3,275	3,400	3,650	3,890
49	3,340	3,470	3,720	3,970
50	3,410	3,550	3,800	4,050
51	3,475	3,620	3,880	4,120
52	3,545	3,680	3,960	4,200
53	3,615	3,760	4,030	4,270

580	22,940	23,580	24,690	25,540
600	23,470	24,120	25,250	26,120
620 [4]	24,000	24,650	25,800	26,700
	Air conversion factors [5]			
	1.180	1.142	1.078	1.010

[4] For D x U over 620, discharge capacity shall be calculated in direct proportion to preceding values.

[5] To obtain equivalent rates of discharge for air, multiply the discharge rates for liquefied gas petroleum by the factors indicated under each column.

(d) Safety relief valves shall be attached to the tank near the highest point of the vapor space. Shutoff valves shall not be installed between the tanks and safety relief valves, except manifolds for mounting multiple safety relief valves may be fitted with acceptable interlocking shutoff valves so arranged at all times as to permit the required capacity discharge through the open safety relief valves.

(R. S. 4405, as amended, 4417a, as amended, 4462, as amended; 46 U. S. C. 375, 391a, 416)

SUBPART 38.20—VENTING AND VENTILATION

1. Section 38.20–1 (a) is amended to read as follows:

§ 38.20–1 *Venting—T/ALL.* (a) Each safety relief valve installed on a cargo tank shall be connected to a branch vent of a venting system which shall be constructed so that the discharge of gas will be directed vertically upward to a point at least 10 feet above the weather deck or the top of any tank or house located above the weather deck.

(R. S. 4405, as amended, 4417a, as amended, 4462, as amended; 46 U. S. C. 375, 391a, 416)

2. Section 38.20–5 is amended to read as follows:

§ 38.20–5 *Venting—B/ALL.* (a) Safety relief valves on cargo tanks in barges may be connected to individual or common risers which shall extend to a reasonable height above the deck. An alternate arrangement consisting of a branch vent header system as required by § 38.20–1 may be installed. In any case, the provisions of § 38.20–1 (d) through (h) shall apply.

(b) Arrangement specially provided for venting cargo tanks forming a part of the hull on unmanned barges will be considered by the Commandant upon presentation of plans.

(R. S. 4405, as amended, 4417a, as amended, 4462, as amended; 46 U. S. C. 375, 391a, 416)

Subchapter E—Load Lines

PART 43—FOREIGN OR COASTWISE VOYAGE [1]

Part 43 is amended to read as follows:

SUBPART 43.01—ADMINISTRATION

Sec.
43.01–1 Establishment of regulations.
43.01–5 Responsibility for administration.
43.01–10 Application of regulations.
43.01–15 Timber cargoes.
43.01–20 Tankers.
43.01–25 New and existing vessels.
43.01–30 Vessels of special type.
43.01–35 Marks to indicate load lines.
43.01–40 Assignment and certification; assigning authority.
43.01–45 Certification of existing load lines.
43.01–50 Surveys.
43.01–55 Annual inspection.
43.01–60 Application for assignment, renewal, and certification.
43.01–65 Application for annual inspection.
43.01–70 Equivalents.
43.01–75 Validity and renewal of certificates.
43.01–80 Forms of certificates.
43.01–85 Cancellation of certificate.
43.01–90 Zones and seasonal areas.
43.01–95 Log book entries.
43.01–97 Control.
43.01–100 Approval of Commandant, U. S. Coast Guard.

SUBPART 43.05—GENERAL RULES FOR DETERMINING MAXIMUM LOAD LINES OF MERCHANT VESSELS

43.05–1 Definitions.
43.05–5 Deck line.
43.05–10 Load line disk.
43.05–15 Lines used with disk.
43.05–20 Mark of assigning authority.
43.05–25 Details of marking.
43.05–30 Verification of marks.

SUBPART 43.10—CONDITIONS OF ASSIGNMENT OF LOAD LINES

43.10–1 Construction of vessel.
43.10–5 Cargo and other hatchways not protected by superstructures.
43.10–10 Hatchway coamings.
43.10–15 Hatchway covers.
43.10–20 Hatchway beams and fore-and-afters.
43.10–25 Carriers or sockets.
43.10–30 Cleats.
43.10–35 Battens and wedges.
43.10–40 Tarpaulins.
43.10–45 Security of hatchway covers.
43.10–50 Cargo and other hatchways in the freeboard deck within superstructures which are fitted with closing appliances less efficient than class 1.
43.10–55 Hatchway coamings and closing arrangements.
43.10–60 Machinery space openings in exposed positions on freeboard and raised quarter-decks.
43.10–65 Machinery space openings in exposed positions on superstructure decks other than raised quarter-decks.
43.10–67 Machinery space openings in the freeboard deck within superstructures which are fitted with closing appliances less efficient than class 1.
43.10–70 Flush bunker scuttles.
43.10–75 Companionways.
43.10–77 Ventilators in exposed positions on freeboard and superstructure decks.
43.10–80 Air pipes.
43.10–85 Gangway, cargo, and coaling ports.
43.10–87 Scuppers and sanitary discharge pipes.
43.10–90 Air ports.
43.10–95 Guard rails.
43.10–97 Freeing ports.
43.10–100 Protection of crew.

SUBPART 43.15—LOAD LINES FOR STEAMERS

43.15–1 Length (L).
43.15–5 Breadth (B).
43.15–7 Molded depth.
43.15–10 Depth for freeboard (D).
43.15–15 Coefficient of fineness (c).
43.15–17 Strength.
43.15–20 Height of superstructure.
43.15–25 Standard height of superstructure.
43.15–27 Length of superstructure (S).
43.15–30 Enclosed superstructure.
43.15–35 Superstructure bulkheads.
43.15–37 Class 1 closing appliances.
43.15–40 Class 2 closing appliances.
43.15–43 Temporary closing appliances.
43.15–45 General, relative superstructures.
43.15–47 Poop.
43.15–50 Raised quarter-deck.
43.15–53 Bridge.
43.15–55 Forecastle.
43.15–57 Trunk.
43.15–60 Enclosed superstructure with middle line openings in the deck not provided with permanent means of closing.
43.15–63 Deductions for superstructures.
43.15–65 Sheer, general.
43.15–67 Standard sheer profile.
43.15–70 Measurement of variations from standard sheer profile.
43.15–73 Correction for variations from standard sheer profile.
43.15–75 Addition for deficiency in sheer.
43.15–77 Deduction for excess sheer.
43.15–80 Standard round of beam.
43.15–83 Round of beam correction.
43.15–85 Summer freeboard.
43.15–87 Tropical freeboard.
43.15–90 Winter freeboard.
43.15–93 Winter North Atlantic freeboard.
43.15–95 Fresh-water freeboard.
43.15–97 Freeboard table for steamers.

SUBPART 43.20—LOAD LINES FOR SAILING VESSELS

43.20–1 Lines to be used on sailing vessels in connection with the disk.
43.20–5 Conditions of assignment of sailing vessel load lines.
43.20–10 Computation of freeboard, sailing vessels.
43.20–15 Depth for freeboard, sailing vessels (D).
43.20–20 Coefficient of fineness, sailing vessels (c).
43.20–25 Superstructures in wood sailing vessels.
43.20–30 Deductions for sailing vessel superstructures.
43.20–35 Minimum freeboards for sailing vessels.
43.20–40 Freeboard table for sailing vessels.
43.20–45 Freeboard for wood sailing vessels.

SUBPART 43.25—LOAD LINES FOR STEAMERS CARRYING TIMBER DECK CARGOES

43.25–1 Definitions.
43.25–5 Marks on the vessel's sides; timber cargo; timber load lines.
43.25–10 Construction of vessel; timber cargo.
43.25–15 Superstructures; timber cargo.
43.25–20 Machinery casings; timber cargo.
43.25–25 Double bottom tanks; timber cargo.
43.25–30 Bulwarks; timber cargo.
43.25–35 Deck openings covered by timber deck cargo.
43.25–40 Stowage; timber cargo.
43.25–45 Protection of crew, access to machinery space; timber cargo.
43.25–50 Steering arrangements; timber cargo.
43.25–55 Uprights; timber cargo.
43.25–60 Lashings; timber cargo.
43.25–65 Plans; timber cargo.
43.25–70 Computation of freeboard; timber cargo.

SUBPART 43.30—LOAD LINES FOR TANKERS

43.30–1 Marks on the vessel's sides; tanker.
43.30–5 Construction of tanker.
43.30–10 Forecastle; tanker.
43.30–15 Machinery casings; tanker.
43.30–20 Gangway; tanker.
43.30–25 Protection of crew; access to machinery space; tanker.
43.30–30 Hatchways; tanker.
43.30–35 Ventilators; tanker.
43.30–40 Freeing arrangements; tanker.
43.30–45 Plans; tanker.
43.30–50 Computation of freeboard; tanker.
43.30–55 Deductions for detached superstructures; tankers.
43.30–60 Deduction for excess sheer; tanker.
43.30–65 Winter North Atlantic freeboard; tanker.
43.30–70 Freeboard table for tankers.

SUBPART 43.35—LUMBER SCHOONERS

43.35–1 Load line marks for vessels specially constructed for the carriage of complete cargoes of timber (lumber schooner type).

SUBPART 43.40—ZONES AND SEASONAL AREAS AND MISCELLANEOUS REQUIREMENTS

43.40–1 Boundaries of the zones and seasonal areas.
43.40–5 Fees, travel expense.
43.40–10 Forms of load line certificates.
43.40–15 Titles of load line laws and rules regarded as equivalent to the British Board of Trade Rules, 1906.

AUTHORITY: §§ 43.01–1 to 43.40–15 issued under sec. 2, 45 Stat. 1493, as amended, sec. 2, 49 Stat. 888, as amended; 46 U. S. C. 85a, 88a.

SUBPART 43.01—ADMINISTRATION

§ 43.01–1 *Establishment of regulations.* [1] (a) Load lines are established by the regulations in this part for:

(1) Merchant vessels of 150 gross tons or over when engaged in a foreign voyage by sea (the Great Lakes excepted) in conformity with the act to establish load lines for American vessels, and for other purposes, approved March 2, 1929 (45 Stat. 1492; 46 U. S. C. 85–85g), and effective September 2, 1930, and in conformity with the International Load Line Convention, 1930, ratified by the United States February 27, 1931, effective January 1, 1933; and,

(2) Merchant vessels of 150 gross tons or over when engaged in a coastwise voyage by sea from one port or place in the United States or its possessions to another port or place in the United States or its possessions, or conversely, and passes outside the line dividing inland waters from the high seas as established in accordance with section 2 of the act of February 19, 1895, as amended (28 Stat. 672; 33 U. S. C. 151), in conformity with the Coastwise Load Line Act of 1935, amended June 20, 1936 (49 Stat. 888, 1543; 46 U. S. C., 88–88i), effective for vessels of 4,000 gross tons and over November 27, 1935, and for other vessels August 27, 1936.

[1] See Parts 44 and 45 of this subchapter for regulations relating to steam colliers, tugs, barges, self-propelled barges, and Great Lakes vessels.

[1] See Part 44 for load line regulations applicable to coastwise load lines for steam colliers, tugs, barges, and self-propelled barges in special services and for Great Lakes vessels making foreign and coastwise voyages.

(b) This part shall not apply to merchant vessels on foreign voyages that are being towed and which are carrying neither cargo nor passengers.

§ 43.01–5 *Responsibility for administration.* (a) The Commandant of the U. S. Coast Guard is vested with the responsibility and authority, under direction and supervision of the Secretary of the Treasury, for the administration of the act of March 2, 1929, the International Load Line Convention, 1930, and Coastwise Load Line Act 1935, as amended June 20, 1936.

§ 43.01–10 *Application of regulations.* (a) No merchant vessel of the United States of 150 gross tons, or over shall proceed to sea (Great Lakes excepted) and no foreign merchant vessel of 150 gross tons or over when within the jurisdiction of the United States shall proceed to sea (Great Lakes excepted), unless the vessel being:

(1) A foreign vessel and is exempted insofar as marking and certification of marks is concerned by section 5 of the Load Line Acts and § 43.01–97.

(2) A new vessel that:

(i) Has been surveyed in accordance with the provisions of § 43.01–50;

(ii) Complies with the provisions of this part as applicable to the type of vessel dealt with;

(iii) Has been marked in accordance with the provisions of this part; and,

(iv) Has had the marks certified as correct as provided by § 43.05–30.

(3) An existing vessel that:

(i) Has been surveyed, marked, and the marks certified either under the provisions of this part, as applicable to the type of vessel, or under one of the sets of rules particularized in § 43.40–15;

(ii) Complies, as defined for the type of vessel, with the provisions of this part in principle and also in detail, as far as is reasonable and practicable, having regard to the efficiency of (*a*) the protection of openings, (*b*) guard rails, (*c*) freeing ports, and (*d*) means of access to crews' quarters provided by the existing arrangements, fittings, and appliances on the vessel.

(iii) Where it is neither reasonable nor practicable to comply with the provisions in this part in their entirety, the assigning authority will, in each case, report to the Commandant, U. S. Coast Guard, the specific matters in which the vessel is deficient, together with such recommendations as may seem desirable. Upon receipt of this report the Commandant, U. S. Coast Guard shall determine such addition to the freeboard as will, in the judgment of the Commandant, U. S. Coast Guard, make the vessel as safe as if it had fully complied with this part.

CROSS REFERENCE: For definition of "a new vessel," and "an existing vessel," see § 43.01–25 (a).

§ 43.01–15 *Timber cargoes.* (a) A steamer (other than a tanker or a vessel assigned load lines on a tanker basis) which has been surveyed and marked as provided by §§ 43.01–10, 43.05–1—43.15–97, may on application by the owner be surveyed and marked with timber load lines applicable only when carrying timber deck cargoes, and the steamer when carrying a deck cargo complying with the provisions of §§ 43.25–5—43.25–70, may be loaded to the timber load line as determined by this part applicable to the voyage if being:

(1) A new steamer, it complies with the conditions and provisions prescribed in §§ 43.25–5—43.25–70.

(2) An existing steamer (other than one defined in § 43.01–15) if it complies with the conditions and provisions of §§ 43.25–5—43.25–70, (other than § 43.25–15), but the vessel shall comply in principle, so far as is reasonable and practical, with the conditions and provisions prescribed by § 43.25–15: *Provided*, That in assigning a timber load line to an existing steamer there shall be made such additions to the freeboard as shall be reasonable, having regard to the extent to which such steamer falls short of full compliance with the conditions and provisions prescribed in § 43.25–15.

(b) Existing vessels propelled by either sail or steam which have been specially constructed to carry complete cargoes of timber (that is, of the lumber schooner type) when carrying a complete cargo of timber will be marked with a load line. This load line will be applicable to all seasons and zones, and the assignment of and the certification of the load line will be made after consideration of the vessel's experience in similar voyages and of the condition of the vessel and her appliances. The conditions of assignment as required by §§ 43.25–5—43.25–70, are to be complied with so far as is reasonable and practicable. The Commandant, U. S. Coast Guard, shall approve the assignment of a load line for vessels of this type when such line is determined by experience.

(c) Existing steamers which have been specially constructed to carry complete cargoes of timber (that is, steam lumber schooner type) will be surveyed and marked and the marks certified in accordance with the conditions and provisions of §§ 43.01–10, 43.05–1—43.15–97, and these marks will be applicable when the steamers are engaged on voyages laden with a cargo other than a complete timber cargo.

(d) Existing sailing vessels of the lumber schooner type will be surveyed and marked and the marks certified in accordance with the conditions and provisions of §§ 43.01–10, 43.05–1—43.20–45, and these marks will be applicable when engaged on a voyage laden with cargo other than a complete timber cargo.

CROSS REFERENCE: For approval of Commandant, U. S. Coast Guard, see § 43.01–100.

§ 43.01–20 *Tankers.* (a) A steamer specially constructed for the carriage of liquid cargoes in bulk, which has been surveyed as provided by § 43.01–10, shall be marked with tanker load lines and the marks certified as correct if being:

(1) A new vessel, it complies with the conditions and provisions prescribed in §§ 43.30–1—43.30–70.

(2) An existing vessel, it complies with the conditions and provisions in §§ 43.30–5, 43.30–20—43.30–35, and, also in principle so far as is reasonable and practicable with §§ 43.30–10, 43.30–15, 43.30–40, providing that in assigning a tanker load line to an existing vessel such additions to the freeboard shall be made as is reasonable, having regard to the extent to which the vessel falls short of full compliance with the conditions and provisions prescribed in §§ 43.30–10, 43.30–15, 43.30–40.

§ 43.01–25 *New and existing vessels.* (a) For the purpose of marking and certification of load lines on the international form, a "new vessel" is one whose keel was laid on or after July 1, 1932, all other vessels being regarded as existing vessels.

(b) For the purpose of marking and certification of load lines on the coastwise form, a "new vessel" is one whose keel was laid:

(1) If of 4,000 gross tons and over, on or after November 27, 1935.

(2) If less than 4,000 gross tons, on or after August 27, 1936.

(3) All other vessels being regarded as existing vessels.

§ 43.01–30 *Vessels of special type.* (a) For steamers over 300 feet in length possessing constructional features similar to those of a tanker which afford extra invulnerability against the sea, a reduction in freeboard from that determined under §§ 43.15–1—43.15–97, may be granted.

(b) The amount of such reduction shall be determined by the assigning authority in relation to the freeboard assigned to tankers, having regard to the degree of compliance with the condition of assignment laid down for these vessels and the degree of subdivision provided. The freeboard assigned to such a vessel shall in no case be less than would be assigned to the vessel as a tanker.

(c) Before assignment or certification of the load lines for vessels of special type, the approval of the Commandant, U. S. Coast Guard, shall be obtained.

CROSS REFERENCE: For approval of the Commandant, U. S. Coast Guard, see § 43.01–100.

§ 43.01–35 *Marks to indicate load lines.* (a) Marks to indicate the maximum mean drafts to which a vessel can be lawfully submerged, in the various circumstances and seasons, shall be permanently marked on each side of the vessel in the form, manner, and location provided by this part.

§ 43.01–40 *Assignment and certification; assigning authority.* (a) As provided in the Load Line Acts approved March 2, 1929, and August 27, 1935, the American Bureau of Shipping is appointed to assign load lines and to determine whether the position of and the manner of marking each vessel to which the act applies has been performed in accordance with this part, and is authorized to issue a load line certificate, certifying to the correctness of the marks, under its own hand and seal. The American Bureau of Shipping is authorized to renew from time to time by indorsement a load line certificate. Load line certificates will not be issued until the load line marks have been verified. This certificate will be issued in duplicate, one copy being delivered to the owner or master of the vessel and one

copy, together with a summary of the data used to determine the load line, will be forwarded to the Commandant, U. S. Coast Guard, Washington, D. C. In addition, effective January 1, 1948, each new vessel, when receiving its first load line certificate, shall be furnished a copy of the load line survey report which shall be retained on board to be available for the information of inspectors and surveyors when carrying out subsequent load line surveys.

(b) The American Bureau of Shipping is referred to in this part as the assigning authority.

(c) The scale of maximum fees payable to the assigning authority for this service is contained in § 43.40–5.

§ 43.01–45 *Certification of existing load lines.* (a) Vessels required by the act of March 2, 1929, to have a load line and which have previous to September 2, 1930, been surveyed and marked in accordance with the British Board of Trade Rules of 1906, will be considered as having complied with the act of March 2, 1929 (45 Stat. 1492; 46 U. S. C. 85–85g), until such time (not later than September 2, 1931) as certification of the existing marks has been made, and the inspection requirements laid down in § 43.01–50 have been carried out for the purpose of insuring that:

(1) Alterations have not been made in the hull or superstructures that would affect the freeboard on which the original load line certificate was based.

(2) The conditions of assignment provided by this part are complied with so far as is considered reasonable and practicable by the assigning authority, and that the structural strength of the vessel has been maintained.

(b) If the provisions of this section have been complied with, the present load line certificate shall be indorsed by the American Bureau of Shipping to that effect and this indorsement shall limit the time of its validity, having regard to the condition of the vessel and her appliances. The Commandant, U. S. Coast Guard, shall be notified of every such indorsement and the date of its expiration.

CROSS REFERENCE: For titles of load line laws and rules regarded as equivalent to the British Board of Trade Rules, 1906, see § 43.40–15.

§ 43.01–50 *Surveys*—(a) *Steel vessels.* (1) The vessel is to be placed in dry dock to determine the condition of the hull plating, etc.

(2) The holds, 'tween decks, peaks, bilges, engine and boiler spaces, and bunkers are to be examined to determine the condition of the framing, etc.

(3) Deep tanks and other tanks which form part of the vessel are to be examined internally.

(4) Where a double bottom is fitted, the tanks are to be examined internally. Where double bottom and other tanks are used for fuel-oil bunkers, such tanks need not be cleaned out, provided the surveyors are able to determine by an external examination that their general condition is satisfactory.

(5) The decks are to be examined.

(6) The hatch covers, hatch beams, and fore-and-afters, tarpaulins, battens and wedges, the hatchway and ventilator coamings, companionways, the engine and boiler casings, the superstructures on the freeboard deck, and all means of protecting the openings in the freeboard deck and superstructures and bulkheads are to be examined.

(7) All air pipe outlets, scuppers, sanitary discharges in the vessel's sides, and air ports are to be examined.

(8) All gangways, cargo, and coaling ports or other similar openings in vessel's sides are to be examined.

(9) Guard rails, gangways, and shutters in freeing ports are to be examined.

(10) All eye plates or similar fittings for timber deck cargo lashings and sockets for uprights are to be examined.

(11) Where, owing to the age and condition of the vessel, the surveyors deem it necessary, the shell and deck plating may be required to be drilled in order to ascertain the then thickness of such plating.

(b) *Wood vessels.* (1) The vessel is to be placed on a dry dock or a slip way and the keel, stem, stern frame or stern post and outside planking are to be examined. Caulking is to be tried at such places about the planking as deemed necessary by the surveyors.

(2) Careful examination must be made for faulty fastenings and such bolts or treenails must be backed out, or otherwise dealt with, as may be deemed necessary by the surveyors.

(3) Careful examination is to be made of the entire structure and if considered necessary borings are to be made to ascertain the conditions of the materials; should these disclose cause for further examination, listings are to be made where required to satisfy the surveyors as to the true condition of the vessel.

(4) The holds, 'tween decks, peaks, bilges, engine and boiler spaces, and bunkers are to be examined.

(5) The decks are to be examined and bored where necessary.

(6) The hatch covers, hatch beams, fore-and-afters, tarpaulins, battens and wedges, the hatchway and ventilator coamings, companionways, the engine and boiler casings, the superstructures on the freeboard deck, and all means of protecting the openings in the freeboard deck and superstructures and bulkheads are to be examined.

(7) All air pipe outlets, scuppers, sanitary discharges in the vessel's sides, and air ports are to be examined.

(8) All gangways, cargo, and coaling ports or other similar fittings in the vessel's sides are to be examined.

(9) Guard rails, gangways, and shutters in freeing ports are to be examined.

(10) All eye plates or similar fittings for timber deck cargo lashings and sockets for uprights are to be examined.

(c) *Correction of deficiencies.* (1) Any such parts or fittings of the vessel as are found to be in an unsatisfactory condition are to be repaired or renewed in order to place the vessel in a seaworthy condition so as to be eligible for a load line certificate.

§ 43.01–55 *Annual inspection.* (a) A vessel having been marked as provided by this part, and the mark certified as correct, will be inspected at intervals of approximately 12 months in order to insure the maintenance in an effective condition of the fittings and appliances for the:

(1) Protection of openings,

(2) guard rails,

(3) freeing ports,

(4) means of access to crews' quarters, and

(5) that there have not been alterations made to the hull or superstructures which would affect the calculations determining the position of the load lines.

(b) The American Bureau of Shipping is appointed to make this inspection and to report thereon to the owners of the vessel, a copy of this report being forwarded to the Commandant, U. S. Coast Guard, Washington, D. C.

(c) The scale of fees payable to the American Bureau of Shipping for this service is contained in § 43.40–5.

§ 43.01–60 *Application for assignment, renewal, and certification.* (a) Application for assignment and certification of load line marks or for renewal of load line certificates shall be made in writing to the American Bureau of Shipping by the owners of the vessel.

(b) Application for the assignment of load lines to a foreign vessel belonging either to a country ratifying the International Load Line Convention, 1930, or to a country with which the United States has reciprocal load line agreement in effect shall be made by the Government to which the vessel belongs, otherwise load lines shall not be assigned such a vessel under this part.

§ 43.01–65 *Application for annual inspection.* (a) Application for annual load line inspection required by § 43.01–55 shall be made in writing to the American Bureau of Shipping by the owners of a vessel.

§ 43.01–70 *Equivalents.* (a) Where in this part it is provided that a particular fitting or appliance, or type thereof, shall be fitted or carried in a vessel, or that any particular arrangement shall be adopted, there may be substituted any other fitting or appliance or type thereof, or any other arrangement: *Provided*, That such fittings, appliance, or arrangement shall be considered a suitable equivalent by the assigning authority and the approval of the Commandant, U. S. Coast Guard, for such substitution shall have been issued.

CROSS REFERENCE: For approval of Commandant, U. S. Coast Guard, see § 43.01–100.

§ 43.01–75 *Validity and renewal of certificates.* (a) As the assignment of load lines is conditioned upon the structural efficiency of the vessel and upon the provision of effective protection to vessel and crew, every vessel required to be marked by the acts of March 2, 1929, and August 27, 1935, as amended June 20, 1936 (45 Stat. 1492, 49 Stat. 888, 1543; 46 U. S. C. 85–85g, 88–88i), with load lines shall be surveyed by the assigning authority at least once in each 5 years to determine that the load lines are then correctly placed as required by this part. If the load line mark be found correct for the vessel in the condition she is then in,

the certificate shall be renewed for such time as the condition of the vessel then warrants, but in no case for a longer period than 5 years and the facts shall be attested by indorsement upon the back of the certificate in the form shown in § 43.40–10.

(b) Foreign vessels belonging to countries which have not ratified the Load Line Convention and which have not been exempted pursuant to section 5 of the Load Line Act (45 Stat. 1493; 46 U. S. C. 85d) shall have their load line certificate limited to a period of 1 year. The certificate may be validated for additional 1-year periods: *Provided*, That the condition of the vessel then warrants, and the facts are attested by indorsement upon the back of the load line certificate by a surveyor of the American Bureau of Shipping or of the classification society issuing the certificate. The certificate will become void 5 years from date of issue, or at the expiration of the fourth yearly validation, whichever occurs first.

(c) The Commandant, U. S. Coast Guard, shall be notified of every renewal indorsement and the date of its expiration.

§ 43.01–80 *Forms of certificates.* (a) The form of certificate certifying to the correctness of the load line mark assigned under the regulations in this part shall be as shown in § 43.40–10, as follows:

(1) International load line certificate issued to United States vessels engaged in foreign voyages, applicable as stated:

(i) A, For General use.

(ii) A_2 For sailing vessels.

(iii) A_1 General use combined with timber deck cargo.

(2) For foreign vessels belonging to countries that have not ratified or acceded to the International Load Line Convention, 1930:

(i) B for general use.

(3) Coastwise load line certificate issued to United States vessels engaged solely in coastwise voyages (other than special services provided for by Part 44 of this subchapter).

(i) C, For general use.

(ii) C_2 For sailing ships.

(iii) C_1 General use combined with timber deck cargo.

(b) The assigning authority may provide forms similar to the above, these forms to be approved by the Commandant, U. S. Coast Guard, before being issued.

CROSS REFERENCE: For forms of load line certificates, see §§ 43.40–10, 44.05–35 of this subchapter.

§ 43.01–85 *Cancellation of certificate.* (a) Notwithstanding the marking of a load line and the issuance of a load line certificate, the certificate will be canceled if:

(1) The annual load line inspection required by § 43.01–55 has not been carried out or that the items described under § 43.01–55 (a) (1), (2), (3), and (4) are not maintained in an effective condition.

(2) The survey required by § 43.01–50 has not been carried out or that any defects disclosed by the survey have not been corrected.

(3) Due to any cause the conditions of assignment have not been maintained as provided by this part, or alterations have been made to hull or superstructures which affect the calculations made to determine the location of the load line.

§ 43.01–90 *Zones and seasonal areas.* (a) A vessel coming under the provisions of the acts of March 2, 1929, as amended (45 Stat. 1492; 46 U. S. C. 85–85g), and August 27, 1935, as amended (49 Stat. 888; 46 U. S. C. 88–88l), shall conform to the conditions applicable to the zones and seasonal areas described in § 43.40–1.

(b) A port located on the boundary line between two zones shall be regarded as within the zone from which the vessel arrived or into which the vessel departs.

(c) No vessel to which these acts apply shall be loaded so as to submerge the load line then applicable to her voyage. When loading a vessel in a favorable zone for a voyage on which the vessel will enter a less favorable zone, such allowance must be made that the vessel, when crossing into the less favorable zone, will conform to the regulations and freeboard for the less favorable zone.

§ 43.01–95 *Log book entries.* (a) The master of a vessel subject to the regulations in this part shall note in the vessel's official log the data required by section 6 of the Load Line Act of March 2, 1929, as amended (45 Stat. 1494; 46 U. S. C. 85e), and for coastwise voyages he shall note in the vessel's log the data required by section 6 of the Coastwise Load Line Act, 1935, as amended (49 Stat. 889; 46 U. S. C. 88e); that is, before departing from her loading port or place, the position of the load line mark, port and starboard, as applicable to the voyage and the actual drafts of the vessel forward and aft at the time of departing from port as nearly as the same can be ascertained.

§ 43.01–97 *Control.* (a) The Collector of Customs may detain a vessel for survey if he has reason to believe that the vessel is proceeding on her journey in excess of the draft allowed by the regulations in this part as indicated by the vessel's load line certificate, or otherwise. Immediately upon ordering a vessel detained, the Collector of Customs shall inform the Coast Guard District Commander thereof, who shall thereupon advise the collector whether or not he deems that the vessel may proceed to sea with safety. The Coast Guard District Commander may detain a vessel if it is so loaded as to be manifestly unsafe to proceed to sea, without advice thereof from the Collector of Customs. However, in such case, immediate notice of such detention shall be furnished the Collector of Customs so that clearance may be withheld.

(b) In the case of retention of a vessel, which shall be by written order, the detaining officer will immediately arrange for a survey in the manner prescribed by section 7 of the Load Line Act of March 2, 1929 (45 Stat. 1494; 46 U. S. C. 85f), and of the Coastwise Load Line Act, 1935 (49 Stat. 889; 46 U. S. C. 88f). In the case of such a survey, the detaining officer shall appoint three disinterested surveyors and, where practicable, one of them shall be from the Surveying Staff of the American Bureau of Shipping. Where such surveyors are appointed by the Collector of Customs, such appointments shall be with the approval of the Coast Guard District Commander. Whenever a vessel is detained the master may, within five days, appeal to the Commandant, U. S. Coast Guard, who may, if he desires, order a further survey and may affirm, set aside, or modify the order of the detaining officer.

(c) Where a foreign vessel is detained or any action is taken which would appear likely to result in legal proceedings being taken against such a vessel, the consul of the country to which the vessel belongs shall be informed as soon as possible of the circumstances of the case.

(d) Pursuant to the provisions of sections 5 of the Load Line Act of March 2, 1929, as amended (45 Stat. 1493; 46 U. S. C. 85d), and the Coastwise Load Line Act, 1935 as amended (49 Stat. 889; 46 U. S. C. 88d), it is hereby certified that a vessel of a foreign country which has ratified the International Load Line Convention, 1930, shall be deemed a vessel of a foreign country as described in sections 5 of the cited acts, and such a vessel shall be exempt from the provisions of the regulations in this part insofar as the marketing of the load lines and the certificating thereof are concerned, only so long as such country similarly recognizes the load lines established by the regulations in this part, for the purpose of a voyage by sea: *Provided*, That the vessel is marked with load lines and has on board a valid load line certificate certifying to the correctness of the mark, the vessel shall not be loaded beyond the limits allowed by the certificate, the position of the load line of the vessel shall correspond with the certificate, the hull and superstructure shall not have been so materially altered as to affect the calculations on which the load line was based, and alterations have not been made so that the protection of openings, guard rails, freeing ports, and means of access to crew's quarters, have made the vessel manifestly unfit to proceed to sea without danger to human life.

CROSS REFERENCE: For regulation concerning surveys on both steel and wooden vessels, see § 43.01–50.

§ 43.01–100 *Approval of Commandant, U. S. Coast Guard.* (a) Where the active approval of the Commandant, U. S. Coast Guard is required in connection with this part, such information as will enable the Commandant, U. S. Coast Guard to obtain a comprehensive understanding of the question at issue shall be furnished and will remain with the Commandant, U. S. Coast Guard as a record.

SUBPART 43.05—GENERAL RULES FOR DETERMINING MAXIMUM LOAD LINES OF MERCHANT VESSELS

NOTE: The rules necessarily assume that the nature and stowage of the cargo, ballast, etc., are such as to secure sufficient stability for the vessel.

§ 43.05–1 *Definitions*—(a) *Steamer.* (1) The term "steamer" or "steamship" includes all vessels having sufficient means for mechanical propulsion, except where provided with sufficient sail area for navigation under sails alone.

(2) A vessel fitted with mechanical means of propulsion and with sail area insufficient for navigation under sails alone may be assigned a load line under §§ 43.15–1—43.15–97.

(3) A lighter, barge, or other vessel without independent means of propulsion, when towed, is to be assigned a load line under §§ 43.15–1—43.15–97.

(b) *Sailing vessel.* The term "sailing vessel" includes all vessels provided with sufficient sail area for navigation under sails alone, whether or not fitted with mechanical means of propulsion.

(c) *Flush-deck vessel.* A flush-deck vessel is one which has no superstructure on the freeboard deck.

(d) *Superstructure.* A superstructure is a deck structure on the freeboard deck extending from side to side of the vessel. A raised quarter-deck is considered a superstructure.

(e) *Load line.* The load line is the line defining the maximum mean draft to which a vessel may be lawfully submerged. It is the lower limit of the freeboard as determined by the regulations in this part having regard to the various conditions and seasons.

(f) *Freeboard.* The freeboard assigned is the distance measured vertically downward at the side of the vessel amidships from the upper edge of the deck line to the upper edge of the load line.

(g) *Freeboard deck.* The freeboard deck is the deck from which the freeboard is measured, and is the uppermost complete deck having permanent means of closing all openings in weather portions of the deck in accordance with §§ 43.10–1—43.10–45. It is the upper deck in flush-deck vessels and vessels with detached superstructures. In vessels having discontinuous freeboard decks within superstructures which are not intact, or which are not fitted with class 1 closing appliances, the lowest line of the deck below the superstructure deck is taken as the freeboard deck.

(h) *Amidships.* Amidships is the middle of the length of the summer load water line, as defined in § 43.15–1.

§ 43.05–5 *Deck line.* (a) The deck line is a horizontal line 12 inches in length and 1 inch in breadth. It is to be marked amidships on each side of the vessel, and its upper edge is to pass through the point where the continuation outward of the upper surface of the freeboard deck intersects the outer surface of the shell. (See fig. 43.05–5 (a).) Where the deck is partly sheathed amidships, the upper edge of the deck line is to pass through the point where the continuation outward of the upper surface of the actual sheathing at amidships intersects the outer surface of the shell.

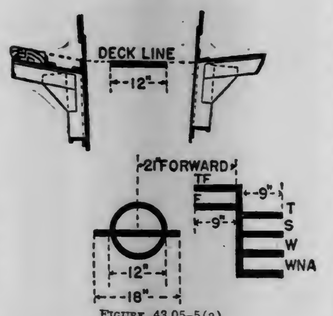

FIGURE 43.05–5(a)

§ 43.05–10 *Load line disk.* (a) The load line disk is 12 inches in diameter and is intersected by a horizontal line 18 inches in length and 1 inch in breadth, the upper edge of which passes through the center of the disk. The disk is to be marked amidships below the deck line.

§ 43.05–15 *Lines used with disk.* (a) The lines which indicate the maximum load line in different circumstances and in different seasons (see § 43.40–1) are to be horizontal lines, 9 inches in length and 1 inch in breadth, which extend from, and are at right angles to, a vertical line marked 21 inches forward of the center of the disk. (See figure 43.05–5 (a).)

(b) The following are the lines to be used:

(1) *Summer load line.* The summer load line is indicated by the upper edge of the line which passes through the center of the disk and also by a line marked "S."

(2) *Winter load line.* The winter load line is indicated by the upper edge of a line marked "W."

(3) *Winter North Atlantic load line.* The winter North Atlantic load line is indicated by the upper edge of a line marked "WNA."

(4) *Tropical load line.* The tropical load line is indicated by the upper edge of a line marked "T."

(5) *Fresh-water load lines.* The fresh-water load line in summer is indicated by the upper edge of a line marked "F." The difference between the fresh-water load line in summer and the summer load line is the allowance to be made for loading in fresh water at the other load lines. The tropical fresh-water load line is indicated by the upper edge of a line marked "TF."[1] (This provision for deeper loading in fresh water is not applicable to the Great Lakes.)

(c) Where the draft is restricted on a basis of subdivision or stability and this draft is less than any of the various seasonal drafts permitted by this part the center of the disk shall be located on the line of this restricted draft and it shall be applicable to all zones and seasons. If such a permissible maximum draft comes between the seasonal markings, the seasonal markings below shall also be added. A fresh-water load line may be marked forward of the disk as provided in this section.

[1] Where seagoing steamers navigate a river or inland water, deeper loading is permitted corresponding to the weight of fuel, etc., required for consumption between the point of departure and the open sea.

§ 43.05–20 *Mark of assigning authority.* (a) The authority by whom the load lines are assigned may be indicated by letters measuring about 4½ by 3 inches marked alongside the disk and above the center line.

§ 43.05–25 *Details of marking.* (a) The disk, lines, and letters are to be painted in white or yellow on a dark ground or in black on a light ground. They are also to be carefully cut in or center punched on the sides of iron and steel vessels, and on wood vessels they are to be cut into the planking for at least one-eighth of an inch. The marks are to be plainly visible, and, if necessary, special arrangements are to be made for this purpose.

§ 43.05–30 *Verification of marks.* (a) The load lines certificate is not to be delivered to the vessel until a surveyor of the assigning authority has certified that the marks are correctly and permanently indicated on the vessel's side.

SUBPART 43.10—CONDITIONS OF ASSIGNMENT OF LOAD LINES

§ 43.10–1 *Construction of vessel.* (a) The assignment of load lines is conditional upon the vessel being structurally efficient and upon the provision of effective protection to vessel and crew.

(b) Sections 43.10–1—43.10–100 apply to vessels to which minimum freeboards are assigned. In vessels to which greater freeboards than the minimum are assigned, the protection is to be relatively as effective.

(c) Passenger vessels; subdivision and stability load lines: Where in passenger vessels the position of the maximum load lines are determined by the application of subdivision and stability regulations as provided in Part 46 of this subchapter the provisions of this part shall also be effective insofar as they are applicable.

§ 43.10–5 *Cargo and other hatchways not protected by superstructures.* (a) The construction and fitting of cargo and other hatchways in exposed positions on freeboard and superstructure decks are to be at least equivalent to the standards laid down in §§ 43.10–10—43.10–45.

§ 43.10–10 *Hatchway coamings.* (a) The height of hatchway coamings on freeboard decks is to be at least 24 inches above the deck. The height of coamings on superstructure decks is to be at least 24 inches above the deck if situated within a quarter of the ship's length from the stem, and at least 18 inches if situated elsewhere.

(b) Coamings are to be of steel, are to be substantially constructed and, where required to be 24 inches high, are to be fitted with an efficient horizontal stiffener placed not lower than 10 inches below the upper edge, and fitted with efficient brackets or stays from the stiffener to the deck, at intervals of not more than 10 feet. Where end coamings are pro-

tected, the requirements of this section may be modified.

§ 43.10–15 *Hatchway covers.* (a) Covers to exposed hatchways are to be efficient, and where they are made of wood, the finished thickness is to be at least 2⅜ inches in association with a span of not more than 5 feet. The width of each bearing surface for these hatchway covers is to be at least 2½ inches.

§ 43.10–20 *Hatchway beams and fore-and-afters.* (a) Where wood hatchway covers are fitted the hatchway beams and fore-and-afters are to be of the scantlings and spacing given in Table 43.10–20 (a1) where coamings 24 inches high are required, and as given in Table 43.10–20 (a2) where coamings 18 inches high are required. Angle bar mountings on the upper edge are to extend continuously for the full length of each beam. Wood fore-and-afters are to be steel shod at all bearing surfaces.

TABLE 43.10–20 (a1).—HATCHWAY BEAMS AND FORE-AND-AFTERS FOR VESSELS 200 FEET OR MORE IN LENGTH [1]

HATCHWAY BEAMS

[Coamings 24 inches in height]

10′ 0″	8	7	8½	8	9	9	8	7	8½	8	9	9

A=Plain angle. BP=Bulb plate. P=Plate. D=Depth. B=Breadth.

[1] In vessels not exceeding 100 feet in length, the depths of beams which are formed of plates and angles may be 60 percent of the depths given above; the depths of beams and steel fore-and-afters formed of bulb angle or bulb plate section may be 80 percent of the depths given above; the thickness of plates, bulb angles, and bulb plates should correspond to the thickness tabulated for the reduced depths with a minimum thickness of 0.30 inch; the depths and breadths of wood fore-and-afters may be 80 percent of those given in the tables for side fore-and-afters, but the center fore-and-afters must be not less than 6½ inches wide. In vessels between 100 feet and 200 feet in length, the sizes of the beams and fore-and-afters are to be determined by linear interpolation.

[2] Depths for hatchway beams are at the middle of the length and are measured from the top mounting to the lower edge. Depths for fore-and-afters are measured from the underside of the hatch covers to the lower edge. Sizes for intermediate lengths and spacing are obtained by interpolation. Where plates are specified, two angles of the size given for mountings, are to be fitted at the upper and at the lower part of the beam. Where bulb plates are specified, two angles, of the size given for mountings, are to be fitted at the upper part of the beam or fore-and-after. Where bulb angles are specified, one angle, of the size given for mountings, is to be fitted at the upper part of the section. Where the specified flanges of an angle are of different dimensions, the larger flange is to be horizontal.

TABLE 43.10–20 (a2).—HATCHWAY BEAMS AND FORE-AND-AFTERS FOR VESSELS 200 FEET OR MORE IN LENGTH [1]

HATCHWAY BEAMS

[Coamings 18 inches in height]

Breadth of hatchway	Mounting	Beams with fore-and-afters, spacing center to center			Beams without fore-and-afters, spacing center to center

A=Plain angle. BP=Bulb plate. P=Plate. D=Depth. B=Breadth.

[1] In vessels not exceeding 100 feet in length, the depths of beams which are formed of plates and angles may be 60 percent of the depths given above; the depths of beams and steel fore-and-afters formed of bulb angle or bulb plate section may be 80 percent of the depths given above; the thickness of plates, bulb angles, and bulb plates should correspond to the thickness tabulated for the reduced depths with a minimum thickness of 0.30 inch; the depths and breadths of wood fore-and-afters may be 80 percent of those given in the tables for side fore-and-afters, but the center fore-and-afters must be not less than 6½ inches wide. In vessels between 100 feet and 200 feet in length, the sizes of the beams and fore-and-afters are to be determined by linear interpolation.

[2] Depths for hatchway beams are at the middle of the length and are measured from the top mounting to the lower edge. Depths for fore-and-afters are measured from the under side of the hatch covers to the lower edge. Sizes for intermediate length and spacing are obtained by interpolation. Where plates are specified, two angles, of the sizes given for mountings, are to be fitted at the upper and at the lower part of the beam. Where bulb plates are specified, two angles, of the size given for mountings, are to be fitted at the upper part of the beam or fore-and-after. Where bulb angles are specified, one angle, of the size given for mountings, is to be fitted at the upper part of the section. Where the specified flanges of an angle are of different dimensions, the larger flange is to be horizontal.

§ 43.10–25 *Carriers or sockets.* (a) Carriers or sockets for hatchway beams and fore-and-afters are to be of steel at least one-half inch thick, and are to have a width of bearing surface of at least 3 inches.

§ 43.10–30 *Cleats.* (a) Strong cleats at least 2½ inches wide are to be fitted at intervals of not more than 2 feet from center to center; the end cleats are to be placed not more than 6 inches from each corner of the hatchway.

§ 43.10–35 *Battens and wedges.* (a) Battens and wedges are to be efficient and in good condition.

§ 43.10–40 *Tarpaulins.* (a) At least two tarpaulins in good condition, thoroughly waterproofed and of ample strength, are to be provided for each hatchway in an exposed position on freeboard and superstructure decks. The material is to be guaranteed free from jute, and shall not be less than No. 4 cotton canvas or No. 6 hemp canvas before waterproofing.

§ 43.10–45 *Security of hatchway covers.* (a) At all hatchways in exposed positions on freeboard and superstructure decks ring bolts or other fittings for lashings are to be provided.

(b) Where the breath of the hatchway exceeds 60 percent of the breadth of the deck in way of the hatchway, and the coamings are required to be 24 inches high, fittings for special lashings are to be provided for securing the hatchway covers after the tarpaulins are battened down.

§ 43.10–50 *Cargo and other hatchways in the freeboard deck within superstructures which are fitted with closing appliances less efficient than class 1.* (a) The construction and fittings of such hatchways are to be at least equivalent to the standards laid down in § 43.10–55.

§ 43.10–55 *Hatchway coamings and closing arrangements.* (a) Cargo, coaling, and other hatchways in the freeboard deck within superstructures which are fitted with class 2 closing appliances are to have coamings at least 9 inches in height and closing arrangements as effective as those required for exposed cargo hatchways whose coamings are 18 inches high.

(b) Where the closing appliances are less efficient than class 2, the hatchways are to have coamings at least 18 inches in height, and are to have fittings and closing arrangements as effective as those required for exposed cargo hatchways.

CROSS REFERENCE: For class 1 and class 2 closing appliances, see §§ 43.15–37, 43.15–40.

§ 43.10–60 *Machinery space openings in exposed positions on freeboard and raised quarter-decks.* (a) Such openings are to be properly framed and efficiently enclosed by steel casings of ample strength, and where the casings are not protected by other structures their strength is to be specially considered. Doors in such casings are to be of steel, efficiently stiffened, permanently attached, and capable of being closed and secured from both sides. The sills of openings are to be at least 24 inches above the freeboard deck and at least 18 inches above the raised quarter-deck.

(b) Fiddley, funnel, and ventilator coamings are to be as high above the deck as is reasonable and practicable. Fiddley openings are to have strong steel covers permanently attached in their proper positions.

§ 43.10–65 *Machinery space openings in exposed positions on superstructure decks other than raised quarter-decks.* (a) Such openings are to be properly framed and efficiently inclosed by strong steel casings. Doors in such cases are to be strongly constructed, permanently attached, and capable of being closed and secured from both sides. The sills of the openings are to be at least 15 inches above superstructure decks.

(b) Fiddley, funnel, and ventilator coamings are to be as high above the deck as is reasonable and practicable. Fiddley openings are to have strong steel covers permanently attached in their proper positions.

§ 43.10–67 *Machinery space openings in the freeboard deck within superstructures which are fitted with closing appliances less efficient than class 1.* (a) Such openings are to be properly framed and efficiently inclosed by steel casings. Doors in such casings are to be strongly constructed, permanently attached, and capable of being securely closed. The sills of the openings are to be at least 9 inches above the deck where the superstructures are closed by class 2 closing appliances, and at least 15 inches above the deck where the closing appliances are less efficient than class 2.

CROSS REFERENCES: For class 1 and class 2 closing appliances, see §§ 43.15–37, 43.15–40.

§ 43.10–70 *Flush bunker scuttles.* (a) Flush bunker scuttles may be fitted in superstructure decks, and where so fitted are to be of iron or steel, of substantial construction, with screw or bayonet joints. Where a scuttle is not secured by hinges, a permanent chain attachment is to be provided. The position of flush bunker scuttles in small vessels in special trades is to be dealt with by each assigning authority.

§ 43.10–75 *Companionways.* (a) Companionways in exposed positions on freeboard decks and on decks of inclosed superstructures are to be of substantial construction. The sills of the doorways are to be of the heights specified for hatchway coamings (see §§ 43.10–10, 43.10–55). The doors are to be strongly

constructed and capable of being closed and secured from both sides. Where the companionway is situated within a quarter of the vessel's length from the stem, it is to be of steel and riveted to the deck plating.

§ 43.10–77 *Ventilators in exposed positions on freeboard and superstructure decks.* (a) Such ventilators to spaces below freeboard decks or decks of superstructures which are intact or fitted with class 1 closing appliances are to have coamings of steel, substantially constructed, and efficiently connected to the deck by rivets spaced four diameters apart center to center, or by equally effective means. The deck plating at the base of the coamings is to be efficiently stiffened between the deck beams. The ventilator openings are to be provided with efficient closing arrangements.

(b) Where such ventilators are situated on the freeboard deck, or on the superstructure deck within a quarter of the vessel's length from the stem, and the closing arrangements are of a temporary character, the coamings are to be at least 36 inches in height; in other exposed positions on the superstructure deck they are to be at least 30 inches in height. Where the coaming of any ventilator exceeds 36 inches in height, it is to be specially supported and secured.

§ 43.10–80 *Air pipes.* (a) Where the air pipes to ballast and other tanks extend above the freeboard or superstructure decks, the exposed parts of the pipes are to be of substantial construction; the height from the deck to the opening is to be at least 36 inches in wells on freeboard decks, 30 inches on raised quarter decks, and 18 inches on other superstructure decks. Satisfactory means are to be provided for closing the openings of the air pipes.

§ 43.10–85 *Gangway, cargo, and coaling ports.* (a) Openings in the sides of vessels below the freeboard deck are to be fitted with watertight doors or covers, which, with their securing appliances, are to be of sufficient strength.

§ 43.10–87 *Scuppers and sanitary discharge pipes.* (a) Discharges from scuppers and sanitary pipes led through the vessel's sides from spaces below the freeboard deck are to be fitted with efficient and accessible means for preventing water from passing inboard. Each separate discharge may have an automatic nonreturn valve with a positive means of closing it from a readily accessible position above the freeboard deck, or two automatic nonreturn valves without positive means of closing, provided the upper valve is situated so that it is always accessible for examination under service conditions. The positive-action valve is to be accessible and is to be provided with means for showing whether the valve is opened or closed.

(b) Conditional upon the type and the location of the inboard ends of such openings, similar provisions may be prescribed by the assigning authority as to discharge from spaces within inclosed superstructures.

(c) Where scuppers are fitted in superstructures not fitted with class 1 closing appliances they are to have efficient means for preventing the accidental admission of water below the freeboard deck.

§ 43.10–90 *Air ports.* (a) Air ports to spaces below the freeboard deck or to spaces below the superstructure deck of superstructures closed by class 1 or class 2 closing appliances are to be fitted with efficient inside deadlights permanently attached in their proper positions so that they can be effectively closed and secured watertight.

(b) Where, however, such spaces in superstructures are appropriated to passengers other than steerage passengers or to crew, the air ports may have portable deadlights stowed adjacent to the air ports, provided they are readily accessible at all times on service.

(c) The air ports and deadlights are to be of substantial and approved construction.

CROSS REFERENCE: For class 1 and class 2 closing appliances, see §§ 43.15–37, 43.15–40.

§ 43.10–95 *Guard rails.* (a) Efficient guard rails or bulwarks are to be fitted on all exposed portions of freeboard and superstructure decks.

§ 43.10–97 *Freeing ports.* (a) Where bulwarks on the weather portions of freeboard or superstructure decks form "wells" ample provision is to be made for rapidly freeing the decks of water and for draining them. The minimum freeing port area on each side of the vessel for each well on the freeboard deck and on the raised quarter-deck is to be that given by the following scale: The minimum area for each well on any other superstructure deck is to be one-half the area given by the scale. Where the length of the well exceeds 0.7 *L*, the scale may be modified.

SCALE OF FREEING PORT AREA

Length of bulwarks in "well" in feet:	*Freeing port area on each side in square feet*
15	8.0
20	8.5
25	9.0
30	9.5
35	10.0
40	10.5
45	11.0
50	11.5
55	12.0
60	12.5
65	13.0
Above 65	(1)

[1] One square foot for each additional 5 feet length of bulwark.

(b) The lower edges of the freeing ports are to be as near the deck as practicable and preferably not higher than the upper edge of the gunwale bar. Two-thirds of the freeing port area required is to be provided in the midship half of the well. In vessels with less than the standard sheer the freeing port area is to be suitably increased.

(c) All such openings in the bulwarks are to be protected by rails or bars spaced about 9 inches apart. If shutters are fitted to freeing ports, ample clearance is to be provided to prevent jamming. Hinges are to have brass pins.

§ 43.10–100 *Protection of crew.* (a) Gangways, life lines, or other satisfactory means are to be provided for the protection of the crew in getting to and from their quarters. The strength of houses for the accommodation of crew on flush deck steamers is to be equivalent to that required for superstructure bulkheads.

SUBPART 43.15—LOAD LINES FOR STEAMERS [1]

§ 43.15–1 *Length (L).* (a) The length used with the rules and freeboard tables is the length in feet on the summer load water line from the foreside of the stem to the afterside of the rudder post. Where there is no rudder post, the length is measured from the foreside of the stem to the axis of the rudder stock. For vessels with cruiser sterns, the length is to be taken as 96 percent of the total length on the designed summer load water line or as the length from the foreside of the stem to the axis of the rudder stock if that be the greater.

§ 43.15–5 *Breadth (B).* (a) The breadth is the maximum breadth in feet amidships to the molded line of the frame in iron or steel vessels and to the outside of the planking in wood or composite vessels.

§ 43.15–7 *Molded depth.* (a) The molded depth is the vertical distance in feet measured amidships, from the top of the keel to the top of the freeboard deck beam at side. In wood and composite vessels the distance is measured from the lower edge of the keel rabbet. Where the form at the lower part of the midship section is of a hollow character, or where thick garboards are fitted, the depth is measured from the point where the line of the flat of the bottom continued inwards cuts the side of the keel.

§ 43.15–10 *Depth for freeboard (D).* (a) The depth used with the freeboard table is the molded depth plus the thickness of stringer plate, or plus

$$\frac{T\,(L-S)}{L} \qquad (1)$$

if that be greater, where

(1) T is the mean thickness of the exposed deck clear of deck openings, and

(2) S is the total length of superstructures as defined in § 43.15–27.

(b) Where the topsides are of unusual form, D is the depth of a midship section having vertical topsides, standard round of beam, and area of topside section equal to that in the actual midship section. Where there is a step or break in the topsides (that is, as in the turret-deck vessel) 70 percent of the area above the step or break is included in the area used to determine the equivalent section.

(c) In a vessel without an inclosed superstructure covering at least 0.6L amidships, without a complete trunk or

[1] The provisions of §§ 43.01–1—43.01–100, inclusive, and §§ 43.05–1—43.10–100, inclusive, apply to all vessels and for steamers, are further supplemented by §§ 43.15–1—43.15–97, inclusive. Steamers taking advantage of special classifications, such as tankers, steamers carrying timber deck cargo, lumber schooners, etc., are also subject to these requirements except as specifically modified in their separate classifications as set forth in the regulations.

without a combination of intact partial superstructures and trunk extending all fore-and-aft, where D is less than $\frac{L}{15}$, the depth used with the table is not to be taken as less than $\frac{L}{15}$.

§ 43.15–15 *Coefficient of fineness (c).* (a) The coefficient of fineness used with the freeboard table is given by

$$c=\frac{35\Delta}{L.B.d_1} \qquad (1)$$

where Δ is the vessel's molded displacement in tons (excluding bossing) at a mean molded draft d_1 which is 85 percent of the molded depth.

(b) The coefficient c is not to be taken as less than 0.68.

§ 43.15–17 *Strength.* (a) The assigning authority is to be satisfied with the structural strength of vessels to which freeboards are assigned.

(b) Vessels which comply with the highest standard of the rules of a classification society recognized by the Commandant, U. S. Coast Guard, shall be regarded as having sufficient strength for the minimum freeboards allowed under the regulations in this part.

(c) Vessels which do not comply with the highest standard of the rules of a classification society recognized by the Commandant, U. S. Coast Guard, shall be assigned such increased freeboards as shall be determined by the assigning authority, and for guidance the following strength moduli are formulated:

(1) *Material.* The strength moduli are based on the assumption that the structure is built of mild steel, manufactured by the open-hearth process (acid or basic), and having a tensile strength of 26 to 32 tons per square inch, and an elongation of at least 16 percent, on a length of 8 inches.

(2) *Strength deck.* The strength deck is the uppermost deck which is incorporated into and forms an integral part of the longitudinal girder within the half-length amidships.

(3) *Depth to strength deck (Ds).* The depth to strength deck is the vertical distance in feet amidships from the top of the keel to the top of the strength deck beam at side.

(4) *Draft (d).* The draft is the vertical distance in feet amidships from the top of the keel to the center of the disk.

(5) *Longitudinal modulus.* The longitudinal modulus $\frac{I}{y}$ is the moment of inertia I of the midship section about the neutral axis divided by the distance y measured from the neutral axis to the top of the strength deck beam at side, calculated in way of openings but without deductions for rivet holes. Areas are measured in square inches and distances in feet.

(i) Below the strength deck, all continuous longitudinal members other than such parts of underdeck girders as are required entirely for supporting purposes are included. Above the strength deck, the gunwale angle bar and the extension of the sheerstrake are the only members included.

(ii) The required longitudinal modulus for effective material is expressed by $f.d.B.$, where f is the factor obtained from Table 43.15–17(c) (5) (ii).

TABLE 43.15–17 (c) (5) (ii)

L	f	L	f	L	f
100	1.80	280	6.20	460	14.15
120	2.00	300	6.95	480	15.15
140	2.35	320	7.70	500	16.25
160	2.70	340	8.55	520	17.35
180	3.15	360	9.40	540	18.45
200	3.60	380	10.30	560	19.60
220	4.20	400	11.20	580	20.80
240	4.80	420	12.15	600	22.00
260	5.45	440	13.10		

(iii) For intermediate lengths, the value of f is determined by interpolation. This formula applies where L does not exceed 600 feet; B is between

$$\frac{L}{10}+5 \text{ and } \frac{L}{10}+20 \qquad (1)$$

both inclusive, and $\frac{L}{D_s}$ is between 10 and 13.5, both inclusive.

(6) *Frame.* For the purpose of the frame modulus, the frame is regarded as composed of a frame angle and a reverse angle each of the same size and thickness.

(7) *Frame modulus.* The modulus $\frac{I}{y}$ of the midship frame below the lowest tier of beams is the moment of inertia I of the frame section about the neutral axis divided by the distance y measured from the neutral axis to the extremity of the frame section, calculated without deduction for rivet and bolt holes. The modulus is measured in inch units.

TABLE 43.15–17 (c) (7) (i)

H in feet	0	7	9	11	13	15	17	19	21	23	25
f_1	9	11	12.5	15	19	24	29.5	36	43	51	59
K in feet	0	5	10	15	20	25	30	35	40	------	------
f_2	0	0.5	1.0	2.0	3.0	4.5	6.5	9.0	12.0	------	------

Intermediate values are obtained by interpolation.

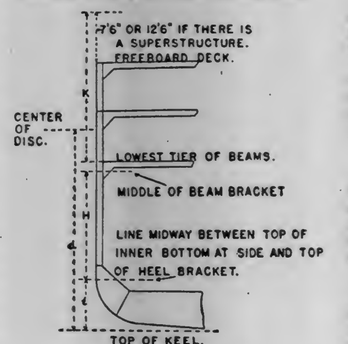

FIGURE 43.15–17 (c) (7) (i)

(ii) This formula applies where D is between 15 feet and 60 feet, both inclusive, B is between

$$\frac{L}{10}+5 \text{ and } \frac{L}{10}+20, \text{ both inclusive, } \frac{L}{D_s}$$

is between 10 and 13.5, both inclusive, and the horizontal distance from the outside of the frame to the center of the first row of pillars does not exceed 20 feet.

(iii) In single-deck vessels of ordinary form, where H does not exceed 18 feet, the frame modulus determined by the preceding method is multiplied by the factor f_3 where

$$f_3=0.50+0.05\,(H-8) \qquad (3)$$

(iv) Where the horizontal distance from the outside of the frame to the center of the first row of pillars exceeds 20 feet, the assigning authority is to be satisfied that sufficient additional strength is provided.

(i) The required frame modulus is expressed by

$$\frac{s(d-t)\,(f_1+f_2)}{1{,}000} \qquad (2)$$

where:

s is the frame spacing in inches.

t is the vertical distance in feet measured at amidships from the top of the keel to a point midway between the top of the inner bottom at side and the top of the heel bracket (see fig. 43.15–17 (c) (7) (i)); where there is no double bottom, t is measured to a point midway between the top of the floor at center and the top of the floor at side.

f_1 is a coefficient depending on H, which, in vessels fitted with double bottoms, is the vertical distance in feet from the middle of the beam bracket of the lowest tier of beams at side to a point midway between the top of the inner bottom at side and the top of the heel bracket (see fig. 43.15–17 (c) (7) (i)); where there is no double bottom, H is measured to a point midway between the top of the floor at center and the top of the floor at side. Where the frame obtains additional strength from the form of the vessel, due allowance is made in the value of f_1.

f_2 is a coefficient depending on K, which is the vertical distance in feet from the top of the lowest tier of beams at side to a point 7 feet 6 inches above the freeboard deck at side, or, if there is a superstructure, to a point 12 feet 6 inches above the freeboard deck at side. (See fig. 43.15–17 (c) (7) (i).) The values of f_1 and f_2 are obtained from Table 43.15–17 (c) (7) (i).

§ 43.15–20 *Height of superstructure.* (a) The height of a superstructure is the least vertical height measured from the top of the superstructure deck to the top of the freeboard deck beams minus the difference between D and the molded depth. (See §§ 43.15–7, 43.15–10.)

§ 43.15–25 *Standard height of superstructure.* (a) The standard height of a raised quarter-deck is 3 feet for vessels up to and including 100 feet in length, 4 feet for vessels 250 feet in length, and 6 feet for vessels 400 feet in length and above. The standard height of any

other superstructure is 6 feet for vessels up to and including 250 feet in length and 7 feet 6 inches for vessels 400 feet in length and above. The standard height at intermediate lengths is obtained by interpolation.

§ 43.15–27 *Length of superstructure (S).* (a) The length of a superstructure is the mean covered length of the parts of the superstructure which extends to the sides of the vessel and lie within lines drawn perpendicular to the extremities of the summer load water line, as defined in § 43.15–1.

§ 43.15–30 *Inclosed superstructure.* (a) A detached superstructure is regarded as inclosed only where:

(1) The inclosing bulkheads are of efficient construction. (See § 43.15–35.)

(2) The access openings in these bulkheads are fitted with class 1 or class 2 closing appliances. (See §§ 43.15–37, 43.15–40.)

(3) All other openings in sides or ends of the superstructure are fitted with efficient weather-tight means of closing.

(4) Independent means of access to crew, machinery, bunker, and other working spaces within bridges and poops are at all times available when the bulkhead openings are closed.

§ 43.15–35 *Superstructure bulkheads.* (a) Bulkheads at exposed ends of poops, bridges, and forecastles are deemed to be of efficient construction where the assigning authority is satisfied that, in the circumstances, they are equivalent to the following standard for vessels with minimum freeboards under which standard the stiffeners and plating are of the scantlings given in Table 43.15–35 (a), the stiffeners are spaced 30 inches apart, the stiffeners on poop and bridge front bulkheads have efficient end connections, and those on after bulkheads of bridges and forecastles extend for the whole distance between the margin angles of the bulkheads.

TABLE 43.15–35 (a).—EXPOSED BULKHEADS OF SUPERSTRUCTURES OF STANDARD HEIGHT

Bridge front bulkheads, unprotected bulkheads of poops 0.4*L* or more in length		Bulkheads of poops partially protected or less in length than 0.4*L*		After bulkheads of bridges and forecastles	
Length of vessel	Bulb angle stiffeners	Length of vessel	Plain angle stiffeners	Length of vessel	Plain angle stiffeners
Feet	*Inches*	*Feet*	*Inches*	*Feet*	*Inches*
Under 160	5¼ by 3 by 0.30.	Under 150	3 by 2½ by 0.30.	Under 150	2½ by 2½ by 0.26.
160	6 by 3 by 0.32.	150	3½ by 2½ by 0.32.	150	3 by 2½ by 0.28.
200	6½ by 3 by 0.34.	200	4 by 3 by 0.34.	250	3½ by 3 by 0.30.

520	10½ by 3½ by 0.50.				
560	11 by 3½ by 0.52.				

Length of vessel	Bulkhead plating [1]	Length of vessel	Bulkhead plating [1]	Length of vessel	Bulkhead plating [1]
Feet	*Inch*	*Feet*	*Inch*	*Feet*	*Inch*
200 and under	0.3	160 and under	0.24	160 and under	0.20
380 and above	.44	400 and above	.38	400 and above	.30

[1] For vessels intermediate in length the thicknesses of bulkhead plating are obtained by interpolation.

§ 43.15–37 *Class 1 closing appliances.* (a) These appliances are of iron or steel, are in all cases to be permanently and strongly attached to the bulkhead, are framed, stiffened, and fitted so that the whole structure is of equivalent strength to the unpierced bulkhead, and are weathertight when closed. The means for securing these appliances are permanently attached to the bulkhead or to the appliances, and the latter are so arranged that they can be closed and secured from both sides of the bulkhead or from the deck above. The sills of the access openings are at least 15 inches above the deck.

§ 43.15–40 *Class 2 closing appliances.* (a) These appliances are (1) strongly framed hardwood hinged doors, which are not more than 30 inches wide nor less than 2 inches thick, or (2) shifting boards fitted for the full height of the opening in channels riveted to the bulkhead, the shifting boards being at least 2 inches thick where the width of opening is 30 inches or less, and increased in thickness at the rate of 1 inch for each additional 15 inches of width, or (3) portable plates of equal efficiency.

§ 43.15–43 *Temporary closing appliances.* (a) Temporary closing appliances for middle line openings in the deck of an inclosed superstructure consist of

(1) A steel coaming not less than 9 inches in height efficiently riveted to the deck;

(2) Hatchway covers as required by § 43.10–15, secured by hemp lashings; and

(3) Hatchway supports as required by §§ 43.10–20, 43.10–25 and by Table 43.05–20 (a1) or 43.05–20 (a2).

§ 43.15–45 *General, relative superstructures.* (a) Where exposed bulkheads of the ends of poops, bridges, and forecastles are not of efficient construction (see § 43.10–25), they are considered as nonexistent.

(b) Where in the side plating of a superstructure there is an opening not provided with permanent means of closing, the part of the superstructure in way of the opening is regarded as having no effective length.

(c) Where the height of a superstructure is less than the standard, its length is reduced in the ratio of the actual to the standard height. Where the height exceeds the standard, no increase is made in the length of the superstructure.

§ 43.15–47 *Poop.* (a) Where there is an efficient bulkhead and the access openings are fitted with class 1 closing appliances (§ 43.15–37), the length to the bulkhead is effective. Where the access openings in an efficient bulkhead are fitted with class 2 closing appliances (§ 43.15–40) and the length to the bulkhead is 0.5*L* or less, 100 percent of that length is effective; where the length is 0.7*L* or more, 90 percent of that length is effective; where the length is between 0.5*L and* 0.7*L*, an intermediate percentage of that length is effective; where an allowance is given for an efficient adjacent trunk (see § 43.15–57), 90 percent of the length to the bulkhead is to be taken as effective; 50 percent of the length of an open poop or of an open extension beyond an efficient bulkhead is effective.

§ 43.15–50 *Raised quarter-deck.* (a) Where there is an efficient intact bulkhead, the length to the bulkhead is effective. Where the bulkhead is not intact, the superstructure is considered as a poop of less than standard height.

§ 43.15–53 *Bridge.* (a) Where there is an efficient bulkhead at each end, and the access openings in the bulkhead are fitted with class 1 closing appliances, the length between the bulkheads is effective.

(b) Where the access openings in the forward bulkhead are fitted with class 1 closing appliances and the access openings in the after bulkhead with class 2 closing appliances, the length between the bulkheads is effective; where an allowance is given for an efficient trunk, adjacent to the after bulkhead (see § 43.15–57), 90 percent of the length is effective. Where the access openings in both bulkheads are fitted with class 2 closing appliances, 90 percent of the length between the bulkheads is effective. Where the access openings in the forward bulkhead are fitted with class 1 or class 2 closing appliances and the access openings in the after bulkhead have no closing appliances, 75 percent of the length between the bulkheads is effective. Where the access openings in both bulkheads have no closing appliances, 50 percent of the length is effective; 75 percent of the length of an open extension beyond the after bulkhead and 50 percent of that beyond the forward bulkhead are effective.

CROSS REFERENCE: For class 1 and class 2 closing appliances, see §§ 43.15–37, 43.15–40.

§ 43.15–55 *Forecastle.* (a) Where there is an efficient bulkhead and the access openings are fitted with class 1 or class 2 closing appliances, the length to the bulkhead is effective. Where no closing appliances are fitted and the sheer forward of amidships is not less than the standard sheer, 100 percent of the length of the forecastle forward of 0.1*L* from the forward perpendicular is effective; where the sheer forward is half the standard sheer or less, 50 percent of that length is effective; and where the sheer forward is intermediate between the standard and half the standard sheer, an intermediate percentage of that length is effective; 50 percent of the length of an open extension beyond the bulkhead or beyond 0.1*L* from the forward perpendicular is effective.

CROSS REFERENCE: For class 1 and class 2 closing appliances, see §§ 43.15–37, 43.15–40.

§ 43.15–57 *Trunk.* (a) A trunk or similar structure which does not extend to the sides of the vessel is regarded as efficient: *Provided*, That,

(1) The trunk is at least as strong as a superstructure.

(2) The hatchways are in the trunk deck, and comply with the requirements of §§ 43.10–1—43.10–45 and the width of the trunk deck stringer provides a satisfactory gangway and sufficient lateral stiffness.

(3) A permanent working platform fore and aft fitted with guard rails is provided by the trunk deck, or by detached trunks connected to other superstructures by efficient permanent gangways.

(4) Ventilators are protected by the trunk, by watertight covers or by equivalent means.

(5) Open rails are fitted on the weather portions of the freeboard deck in way of the trunk for at least half their length.

(6) The machinery casings are protected by the trunk, by a superstructure of standard height, or by a deck house of the same height and of equivalent strength.

(b) Where access openings in poop and bridge bulkheads are fitted with class 1 closing appliances, 100 percent of the length of an efficient trunk reduced in the ratio of its mean breadth to *B* is added to the effective length of the superstructures. Where the access openings in these bulkheads are not fitted with class 1 closing appliances 90 percent is added.

(c) The standard height of a trunk is the standard height of a bridge.

(d) Where the height of the trunk is less than the standard height of a bridge, the addition is reduced in the ratio of the actual to the standard height; where the height of hatchway coamings on the trunk deck is less than the standard height of coamings (see § 43.10–10), a reduction from the actual height of trunk is to be made which corresponds to the difference between the actual and the standard height of coamings.

§ 43.15–60 *Inclosed superstructure with middle line openings in the deck not provided with permanent means of closing.* (a) Where there is an inclosed superstructure with one or more middle line openings in the deck not provided with permanent means of closing (see §§ 43.10–1—43.10–45), the effective length of the superstructure is determined as follows:

(1) Where efficient temporary closing appliances are not provided for the middle line deck openings (see § 43.15–43), or the breadth of openings is 80 percent or more of the breadth B_1 of the superstructure deck at the middle of the opening, the vessel is considered as having an open well in way of each opening, and freeing ports are to be provided in way of this well. The effective length of superstructure between openings is governed by §§ 43.15–47, 43.15–53, 43.15–55.

(2) Where efficient temporary closing appliances are provided for middle line deck openings, and the breadth of openings is less than 0.8B_1 the effective length is governed by §§ 43.15–47, 43.15–53, 43.15–55, except that where access openings in between deck bulkheads are closed by class 2 closing appliances, they are regarded as being closed by class 1 closing appliances in determining the effective length. The total effective length is obtained by adding to the length determined by subparagraph (1) of this paragraph the difference between this length and the length of the vessel modified in the ratio of

$\frac{B_1-b}{B_1}$ where b=breadth of deck opening

where

$\frac{B_1-b}{B_1}$ is greater than 0.5, it is taken as 0.5

§ 43.15–63 *Deductions for superstructures.* (a) Where the effective length of superstructures is 1.0*L*, the deduction from the freeboard is 14 inches at 80 feet length, 34 inches at 280 feet length, and 42 inches at 400 feet length and above; deductions at intermediate lengths are obtained by interpolation. Where the total effective length of superstructures is less than 1.0*L* the deduction is a percentage obtained from Table 43.15–63:

TABLE 43.15–63 (a).—TOTAL EFFECTIVE LENGTH OF SUPERSTRUCTURE (E)

Superstructures	0	0.1*L*	0.2*L*	0.3*L*	0.4*L*	0.5*L*	0.6*L*	0.7*L*	0.8*L*	0.9*L*	1.0*L*	Line
	Per cent	*Per cent*	*Per cent*	*Per cent*	*Per cent*	*Per cent*	*Per cent*	*Per cent*	*Per cent*	*Per cent*	*Per cent*	
All types with forecastle and without detached bridge	0	5	10	15	23.5	32	46	63	75.3	87.7	100	A
All types with forecastle and detached bridge [1]	0	6.3	12.7	19	27.5	36	46	63	75.3	87.7	100	B

[1] Where the effective length of a detached bridge is less than 0.2*L* the percentages are obtained by interpolation between lines B and A. Where no forecastle is fitted the above percentages are reduced by 5. Percentages for intermediate lengths of superstructures are obtained by interpolation.

§ 43.15–65 *Sheer, general.* (a) The sheer is measured from the deck at side to a line of reference drawn parallel to the keel through the sheer line at amidships.

(b) In vessels designed to trim by the stern in service, the sheer may be measured in relation to the load line, provided an additional mark is placed at 0.25 *L* forward of amidships to indicate the assigned load line. This mark is to be similar to the load line disk amidships.

(c) In flush deck vessels and in vessels with detached superstructures the sheer is measured at the freeboard deck.

(d) In vessels with topsides of unusual form in which there is a step or break in the topsides, the sheer is considered in relation to the equivalent depth amidships. (See § 43.15–15.)

(e) In vessels with a superstructure of standard height which extends over the whole length of the freeboard deck, the sheer is measured at the superstructure deck; where the height exceeds the standard, the sheer may be considered in relation to the standard height.

(f) Where a superstructure is intact or access openings in its inclosing bulkheads are fitted with class 1 closing appliances (§ 43.15–37), and the superstructure deck has at least the same sheer as the exposed freeboard deck, the sheer of the inclosed portion of the freeboard deck is not taken into account.

§ 43.15–67 *Standard sheer profile.* (a) The ordinates (in inches) of the standard sheer profile are given in Table 43.15–67, where *L* is the number of feet in the length of the vessel.

TABLE 43.15–67 (a)

Station	Ordinate	Factor
A. P.[1]	0.1 *L*+10	1
1/6 L from A. P.	.0445*L*+4.45	4
1/3 L from A. P.	.011 *L*+1.1	2
Amidships	0	4
1/3 L from F. P.[2]	.022 *L*+2.2	2
1/6 L from F. P.	.089 *L*+8.9	4
F. P.	.2 *L*+20	1

[1] A. P.=After end of summer load water line.
[2] F. P.=Fore end of summer load water line.

§ 43.15–70 *Measurement of variations from standard sheer profile.* (a) Where the sheer profile differs from the standard, the 7 ordinates of each profile are multiplied by the appropriate factors given in the table of ordinates. The difference between the sums of the respective products, divided by 18, measures the deficiency or excess of sheer. Where the after half of the sheer profile is greater than the standard and the forward half is less than the standard, no credit is allowed for the part in excess and the deficiency only is measured.

(b) Where the forward half of the sheer profile exceeds the standard, and the after portion of the sheer profile is not less than 75 percent of the standard, credit is allowed for the part in excess; where the after part is less than 50 percent of the standard no credit is given for the excess sheer forward. Where the after sheer is between 50 percent and 75 percent of the standard, intermediate allowances may be granted for excess sheer forward.

§ 43.15–73 *Correction for variations from standard sheer profile.* (a) The

correction for sheer is the deficiency or excess of sheer (see § 43.15–70 (a)) multiplied by $0.75-\frac{S}{2L}$ where S is the total length of superstructure, as defined in § 43.15–27.

§ 43.15–75 *Addition for deficiency in sheer.* Where the sheer is less than the standard, the correction for deficiency in sheer (see § 43.15–73) is added to the freeboard.

§ 43.15–77 *Deduction for excess sheer.* (a) In flush deck vessels and in vessels where an inclosed superstructure covers 0.1 *L* before and 0.1 *L* abaft amidships, the correction for excess of sheer (see § 43.15–73) is deducted from the freeboard; in vessels with detached superstructures where no inclosed superstructure covers amidships, no deduction is made from the freeboard; where an inclosed superstructure covers less than 0.1 *L* before and 0.1 *L* abaft amidships, the deduction is obtained by interpolation. The maximum deduction for excess sheer is 1½ inches at 100 feet and increases at the rate of 1½ inches for each additional 100 feet in the length of the vessel.

§ 43.15–80 *Standard round of beam.* (a) The standard round of beam of the freeboard deck is one-fiftieth of the breadth of the vessel.

§ 43.15–83 *Round of beam correction.* (a) Where the round of beam of the freeboard deck is greater or less than the standard, the freeboard is decreased or increased respectively by one-fourth of the difference between the actual and the standard round of beam, multiplied by the proportion of the length of the freeboard deck not covered by inclosed superstructures. Twice the standard round of beam is the maximum for which allowance is given.

§ 43.15–85 *Summer freeboard.* (a) The minimum freeboard in summer is the freeboard derived from the freeboard table after corrections for departures from the standards and after deduction for superstructures. The freeboard in salt water measured from the intersection of the upper surface of the freeboard deck with the outer surface of the shell is not to be less than 2 inches.

§ 43.15–87 *Tropical freeboard.* (a) The minimum freeboard in the tropical zone is the freeboard obtained by a deduction from the summer freeboard of one-fourth inch per foot of summer draft measured from the top of the keel to the center of the disk. The freeboard in salt water measured from the intersection of the upper surface of the freeboard deck with the outer surface of the shell is not to be less than 2 inches.

§ 43.15–90 *Winter freeboard.* (a) The minimum freeboard in winter is the freeboard obtained by an addition to the summer freeboard of one-fourth inch per foot of summer draft, measured from the top of the keel to the center of the disk.

§ 43.15–93 *Winter North Atlantic freeboard.* (a) The minimum freeboard for vessels not exceeding 330 feet in length on voyages across the North Atlantic from a port or place of departure north of latitude 36° N. to a port or place of arrival north of latitude 36° N., regardless of the route of the vessel while it is in either of the northern seasonal winter zones during the winter season, shall be the winter freeboard plus 2 inches. For vessels over 330 feet in length it is the winter freeboard.

§ 43.15–95 *Fresh-water freeboard.* (a) The minimum freeboard in fresh water of unit density is the freeboard obtained by deducting from the minimum freeboard in salt water $\frac{\Delta}{40T}$ inches, where

Δ=displacement in salt water in tons at the summer load water line, and T=tons per inch immersion in salt water at the summer load water line.

(b) Where the displacement at the summer load water line cannot be certified, the deduction is to be one-fourth inch per foot of summer draft, measured from the top of the keel to the center of the disk.

§ 43.15–97 *Freeboard table for steamers.* (a) Table 43.15–97 (a) gives the basic minimum summer freeboard for steamers which comply with the standards in this part.

TABLE 43.15–97 (a).—BASIC MINIMUM SUMMER FREEBOARD FOR STEAMERS

L	Freeboard	*L*	Freeboard	*L*	Freeboard
Feet	*Inches*	*Feet*	*Inches*	*Feet*	*Inches*
80	8.0	310	45.9	540	113.7
90	9.0	320	48.4	550	116.4
100	10.0	330	51.0	560	119.1
110	11.0	340	53.7	570	121.8
120	12.0	350	56.5	580	124.4
130	13.0	360	59.4	590	127.0
140	14.2	370	62.4	600	129.5
150	15.5	380	65.4	610	132.0
160	16.9	390	68.4	620	134.4
170	18.3	400	71.5	630	136.8
180	19.8	410	74.6	640	139.1
190	21.4	420	77.8	650	141.4
200	23.1	430	80.9	660	143.7
210	24.8	440	84.0	670	145.9
220	26.6	450	87.1	680	148.1
230	28.5	460	90.2	690	150.2
240	30.3	470	93.3	700	152.3
250	32.3	480	96.3	710	154.4
260	34.4	490	99.3	720	156.4
270	36.5	500	102.3	730	158.5
280	38.7	510	105.2	740	160.5
290	41.0	520	108.1	750	162.5
300	43.4	530	110.9		

(b) The minimum freeboards for flush deck steamers are obtained by an addition to Table 43.15–97 (a) at the rate of 1½ inches for every 100 feet of length.

(c) The freeboards at intermediate lengths are obtained by interpolation.

(d) Where c exceeds 0.68, the freeboard is multiplied by the factor

$$\frac{c+0.68}{1.36} \quad (1)$$

(e) Where *D* exceeds $\frac{L}{15}$ the freeboard is increased by $\left(D-\frac{L}{15}\right)R$ inches, where R is $\frac{L}{130}$ at lengths less than 390 feet, and 3 at 390 feet length and above.

(f) In a vessel with an inclosed superstructure covering at least 0.6*L* amidships with a complete trunk or with a combination of intact partial superstructures and trunk which extends all fore and aft, where *D* is less than $\frac{L}{15}$ the freeboard is reduced at the above rate.

(2) Where the height of superstructures or trunk is less than the standard height, the reduction is in the ratio of the actual to the standard height.

(f) Where the actual depth to the surface of the freeboard deck amidships is greater or less than *D*, the difference between the depths (in inches) is added to or deducted from the freeboard.

SUBPART 43.20—LOAD LINES FOR SAILING VESSELS [4]

§ 43.20–1 *Lines to be used on sailing vessels in connection with the disk.* (a) Winter and tropical load lines are not marked on sailing vessels. The maximum load lines to which sailing vessels may be laden in salt water in winter and in the tropical zone is the center of the disk. (See fig. 43.20–1 (a).)

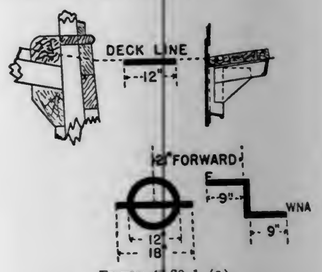

FIGURE 43.20–1 (a)

§ 43.20–5 *Conditions of assignment of sailing vessel load lines.* (a) The conditions of assignment for sailing vessels are those contained in §§ 43.10–1—43.10–100.

§ 43.20–10 *Computation of freeboard, sailing vessels.* (a) Freeboards are computed from the freeboard table for sailing vessels in the same manner as the freeboards for steamers are computed from the freeboard table for steamers, except as provided by §§ 43.20–15—43.20–45.

§ 43.20–15 *Depth for freeboard, sailing vessels (D).* (a) In sailing vessels having a greater rate of rise of floor than 1½ inches per foot, the vertical distance from the top of keel (§ 43.15–7) is reduced by half the difference between the total rise of floor at the half breadth of the vessel and the total rise of 1½ inches per foot; 2½ inches per foot of half breadth is the maximum rate of rise for which a deduction is made.

(b) Where the form at the lower part of the midship section is of a hollow character, or thick garboards are fitted, the depth is measured from the point where the line of the flat of the bottom continued inwards cuts the side of the keel.

[4] The provisions of §§ 43.01–1—43.01–100 and 43.05–1—43.15–97, inclusive, apply to sailing vessels, except as modified by §§ 43.20–1—43.20–45, inclusive.

(c) The depth used with the freeboard table is to be taken as not less than $\frac{L}{12}$.

§ 43.20–20 *Coefficient of fineness, sailing vessels (c).* (a) The coefficient used with the freeboard table for sailing vessels is to be taken as not less than 0.62 and not greater than 0.72.

§ 43.20–25 *Superstructures in wood sailing vessels.* (a) In wood sailing vessels the construction and closing arrangements of superstructures for which deductions are made from the freeboard are to be to the satisfaction of the assigning authority.

§ 43.20–30 *Deductions for sailing vessel superstructures.* (a) Where the effective length of superstructures on sailing vessels is 1.0*L*, the deduction from the freeboard is 3 inches at 80 feet length of vessel, and 28 inches at 330 feet length and above; deductions in intermediate lengths are obtained by interpolation. Where the total effective length of superstructures is less than 1.0*L*, the deduction is a percentage obtained from Table 43.20–30 (a).

TABLE 43.20–30 (a).—TOTAL EFFECTIVE LENGTH OF SUPERSTRUCTURES (E)

Type of superstructures	0	0.1*L*	0.2*L*	0.3*L*	0.4*L*	0.5*L*	0.6*L*	0.7*L*	0.8*L*	0.9*L*	1.0*L*	Line
	Per-cent	*Per-cent*	*Per-cent*	*Per-cent*	*Per-cent*	*Per-cent*	*Per-cent*	*Per-cent*	*Per-cent*	*Per-cent*	*Per-cent*	
All types without bridge	0	7	13	17	23.5	30	47½	70	80	90	100	A
All types with bridge [1]	0	7	14.7	22	32	42	56	70	80	90	100	B

[1] Where the effective length of bridge is less than 0.2*L*, the percentages are obtained by interpolation between lines B and A. Percentages for intermediate lengths of superstructures are obtained by interpolation.

§ 43.20–35 *Minimum freeboards for sailing vessels.* (a) No addition to the freeboard is required for winter freeboard, nor is a deduction permitted for tropical freeboard.

(b) An increase in freeboard of 3 inches is made for voyages across the North Atlantic north of latitude 36° N. during the winter months.

(c) In computing the fresh water freeboard for a wood vessel, the draft is measured from the lower edge of the rabbet of keel to the center of the disk.

§ 43.20–40 *Freeboard table for sailing vessels.* (a) Table 43.20–40 (a) gives the basic minimum summer, winter, and tropical freeboards for iron and steel flush deck sailing vessels, which comply with the standards in this part.

TABLE 43.20–40 (a).—MINIMUM SUMMER, WINTER, AND TROPICAL FREEBOARDS FOR IRON AND STEEL FLUSH DECK SAILING VESSELS

L (feet)	Freeboard	*L* (feet)	Freeboard	*L* (feet)	Freeboard
	Inches		*Inches*		*Inches*
80	9.2	170	28.2	260	50.8

110	14.9	200	35.4	290	59.1
120	17.0	210	37.9	300	61.9
130	19.1	220	40.4	310	64.7
140	21.3	230	42.9	320	67.6
150	23.5	240	45.5	330	70.5
160	25.8	250	48.1		

(b) The freeboards at intermediate lengths are obtained by interpolation.

(c) Where c exceeds 0.62 the freeboard is multiplied by the factor

$$\frac{c+.62}{1.24} \quad (1)$$

(d) Where *D* exceeds $\frac{L}{12}$ the freeboard is increased by

$$\left(D-\frac{L}{12}\right)\times\left(1+\frac{L}{250}\right) \text{ inches.} \quad (2)$$

(e) Where the actual depth to the surface of the freeboard deck amidships is greater or less than *D*, the difference between the depths (in inches) is added to or deducted from the freeboard.

§ 43.20–45 *Freeboard for wood sailing vessels.* (a) The freeboard for a wood sailing vessel is the final freeboard the vessel would obtain if she were of iron or steel, with the addition of such penalties as the assigning authority may determine, having regard to the classification, construction, age, and condition of the vessel.

SUBPART 43.25—LOAD LINES FOR STEAMERS CARRYING TIMBER DECK CARGOES [5]

§ 43.25–1 *Definitions*—(a) *Timber deck cargo.* The term "timber deck cargo" means a cargo of timber carried on an uncovered part of a freeboard or superstructure deck. The term does not include wood pulp or similar cargo.

(b) *Timber load line.* A timber load line is a special load line to be used only when the vessel is carrying a timber deck cargo in compliance with the requirements in this subpart.

§ 43.25–5 *Marks on the vessel's sides; timber cargo; timber load lines.* (a) The lines which indicate the maximum timber load lines in different circumstances and at different seasons are to be horizontal lines, 9 inches in length and 1 inch in breath, which extend from, and are at right angles to, a vertical line marked 21 inches abaft the center of the disk. (See fig. 43.25–5 (a).) They are to be marked and verified similarly to the ordinary load lines. (See §§ 43.05–20—43.05–30.)

(b) The summer timber load line is indicated by the upper edge of a line marked *"LS."*

(c) The winter timber load line is indicated by the upper edge of a line marked *"LW."*

(d) The winter North Atlantic timber load line is indicated by the upper edge of a line marked *"LWNA."*

(e) The tropical timber load line is indicated by the upper edge of a line marked *"LT."*

(f) The fresh water timber load line in summer is indicated by the upper edge of a line marked *"LF."* The difference between the fresh water timber load line in summer and the summer timber load line is the allowance to be made for loading in fresh water at the other timber load lines. The fresh water timber load line in the tropical zone is indicated by the upper edge of a line marked "LTF." [6]

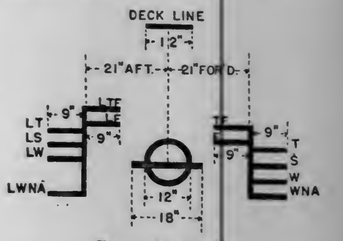

FIGURE 43.25–5 (a)

§ 43.25–10 *Construction of vessel; timber cargo.* (a) The structure of the vessel is to be of sufficient strength for the deeper draft allowed and for the weight of the deck cargo.

§ 43.25–15 *Superstructures; timber cargo.* (a) The vessel is to have a forecastle of at least standard height and at least 7 percent of the length of the vessel, and, in addition, a poop, or a raised quarter deck with a strong steel hood or deck house fitted aft.

§ 43.25–20 *Machinery casings; timber cargo.* (a) Machinery casings on the freeboard deck are to be protected by a superstructure of at least standard height, unless the machinery casings are of sufficient strength and height to permit of the carriage of timber alongside.

§ 43.25–25 *Double bottom tanks; timber cargo.* (a) Double bottom tanks where fitted within the midship half length of the vessel are to have adequate longitudinal subdivision.

§ 43.25–30 *Bulwarks; timber cargo.* (a) The vessel must be fitted either with permanent bulwarks at least 3 feet 3 inches high, specially stiffened on the upper edge and supported by strong bulwark stays attached to the deck in the way of the beams and provided with necessary freeing ports or with efficient rails of the same height as the above and of specially strong construction.

§ 43.25–35 *Deck openings covered by timber deck cargo.* (a) Openings to spaces below the freeboard deck are to be securely closed and battened down. All fittings, such as hatchway beams fore-and-afters, and covers are to be in place. Where hold ventilation is needed, the ventilators are to be efficiently protected.

§ 43.25–40 *Stowage; timber cargo.* (a) The wells on the freeboard deck are to be filled with timber stowed as solidly as possible, to at least the standard height of a bridge.

[5] The provisions of §§ 43.01–1—43.01–100, inclusive, and §§ 43.05–1—43.15–97, inclusive, also apply to steamers marked to carry timber deck cargoes except as they are modified by §§ 43.25–1—43.30–5, inclusive.

[6] Where seagoing steamers navigate a river or inland water, deeper loading is permitted corresponding to the weight of fuel, etc., required for consumption between the point of departure and the open sea.

(b) On a vessel within a seasonal winter zone in winter, the height of the deck cargo above the freeboard deck is not to exceed one-third of the extreme breadth of the vessel.

(c) All timber deck cargo is to be compactly stowed, lashed, and secured. It must not interfere in any way with the navigation and necessary work of the vessel, or with the provision of a safe margin of stability at all stages of the voyage, regard being given to additions of weight, such as those due to absorption of water and to losses of weight such as those due to consumption of fuel and stores.

§ 43.25–45 *Protection of crew, access to machinery space; timber cargo.* (a) Safe and satisfactory access to the quarters of the crew, to the machinery space, and to all other parts used in the necessary work of the vessel is to be available at all times. Deck cargo in way of openings which give access to such parts is to be so stowed that the openings can be properly closed and secured against the admission of water. Efficient protection for the crew in the form of guard rails, or life lines, spaced not more than 12 inches apart vertically, is to be provided on each side of the deck cargo to a height of at least 4 feet above the cargo. The cargo is to be made sufficiently level for gangway purposes.

§ 43.25–50 *Steering arrangements; timber cargo.* (a) Steering arrangements are to be effectively protected from damage by cargo and, as far as practicable, are to be accessible. Efficient provision is to be made for steering in the event of a breakdown in the main steering arrangements.

§ 43.25–55 *Uprights; timber cargo.* (a) Uprights, when required by the nature of the timber, are to be of adequate strength and may be of wood or metal, the spacing is to be suitable for the length and character of timber carried, but is not to exceed 10 feet. Strong angles or metal sockets efficiently secured to the stringer plate or equally efficient means are to be provided for securing the uprights.

§ 43.25–60 *Lashings; timber cargo.* (a) Timber deck cargo is to be efficiently secured throughout its length by independent overall lashings spaced not more than 10 feet apart.

(b) Eye plates for these lashings are to be riveted to the sheer strake at intervals of not more than 10 feet, the distance from an end bulkhead of a superstructure to the first eye plate being not more than 6 feet 6 inches. Additional eye plates may be fitted on the stringer plate.

(c) Overall lashings are to be in good condition and are to be not less than three-fourths inch close link chain or flexibile wire rope of equivalent strength, fitted with sliphooks and stretching screws, which are to be accessible at all times. Wire rope lashings are to have a short length of long link chain to permit the length of lashings to be regulated.

(d) When timber is in lengths less than 12 feet, the spacing of the lashings is to be reduced to suit the length of timber or other suitable provision made.

(e) When the spacing of the lashings is 5 feet or less, the size of the lashing may be reduced, but not less than one-half inch chain or equivalent wire rope is to be used.

(f) All fittings required for securing the lashings are to be of strength corresponding to the strength of the lashings.

(g) On superstructure decks, uprights, where fitted, are to be about 10 feet apart and are to be secured by athwartship lashings of ample strength.

§ 43.25–65 *Plans; timber cargo.* (a) Plans showing the fittings and arrangements for stowing and securing timber deck cargoes in compliance with the foregoing conditions and §§ 43.77a–43.89 are to be submitted to the assigning authority.

§ 43.25–70 *Computation of freeboard; timber cargo.* (a) Where the assigning authority is satisfied that the vessel is suitable and that the conditions and arrangements are at least equal to the foregoing requirements for the carriage of timber deck cargo, the summer freeboards computed in accordance with the rules and tables in §§ 43.15–1—43.15–97, may be modified to give special timber freeboards by substituting the following percentages for those in § 43.15–63:

TABLE 43.25–70 (a).—TOTAL EFFECTIVE LENGTH OF SUPERSTRUCTURES

	0	0.1*L*	0.2*L*	0.3*L*	0.4*L*	0.5*L*	0.6*L*	0.7*L*	0.8*L*	0.9*L*	1.0*L*
	Percent	*Percent*	*Percent*	*Percent*	*Percent*	*Percent*	*Percent*	*Percent*	*Percent*	*Percent*	*Percent*
All types	20	30.75	41.5	52.25	63	69.25	75.5	81.5	87.5	93.75	100

(b) The winter timber freeboard is to be obtained by adding to the summer timber freeboard one-third of an inch per foot of the molded summer timber draft.

(c) The winter North Atlantic timber freeboards are the winter North Atlantic freeboards prescribed in § 43.15–93.

(d) The tropical timber freeboard is to be obtained by deducting from the summer timber freeboard one-quarter of an inch per foot of the molded summer timber draft.

CROSS REFERENCE: For requirements for the carriage of timber deck cargo, see §§ 43.25–1—43.25–65.

SUBPART 43.30—LOAD LINES FOR TANKERS[1]

NOTE: The term "tanker" includes all steamers specially constructed for the carriage of liquid cargoes in bulk.

§ 43.30–1 *Marks on the vessel's sides; tanker.* (a) The marks on the vessel's sides are to be as provided in the figure in § 43.05–15.

§ 43.30–5 *Construction of tanker.* (a) The structure of the vessel is to be of sufficient strength for the increased draft corresponding to the freeboard assigned.

§ 43.30–10 *Forecastle; tanker.* (a) The vessel is to have a forecastle of which the length is not less than 7 percent of the length of the vessel and the height is not less than the standard height.

§ 43.30–15 *Machinery casings; tanker.* (a) The openings in machinery casings on the freeboard deck are to be fitted with steel doors. The casings are to be protected by an inclosed poop or bridge of at least standard height, or by a deck house of equal height and of equivalent strength. The bulkheads at the ends of these structures are to be of the scantlings required for bridge front bulkheads. All entrances to the structures from the freeboard deck are to be fitted with effective closing appliances and the sills are to be at least 18 inches above the deck. Exposed machinery casings on the superstructure deck are to be of substantial construction, and all openings in them are to be fitted with steel closing appliances permanently attached to the casings and capable of being closed and secured from both sides; the sills of such openings are to be at least 15 inches above the deck. Fiddley openings are to be as high above the superstructure deck as is reasonable and practicable and are to have strong steel covers permanently attached in their proper positions.

§ 43.30–20 *Gangway; tanker.* (a) An efficiently constructed permanent gangway of sufficient strength for its exposed position is to be fitted fore and aft at the level of the superstructure deck between the poop and midship bridge, and when crew are berthed forward, from the bridge to the forecastle, or other equivalent means of access may be provided to carry out the purpose of the gangway, such as passages below deck.

§ 43.30–25 *Protection of crew access to machinery space; tanker.* (a) Safe and satisfactory access from the gangway level to the quarters of the crew, the machinery space, and all other parts used in the necessary work of the vessel is to be available at all times. This section does not apply to pump rooms entered from the freeboard deck, when fitted with class 1 closing appliances.

CROSS REFERENCE: For class 1 closing appliances, see § 43.15–37.

§ 43.30–30 *Hatchways; tanker.* (a) All exposed hatchways on the freeboard deck and on the deck of expansion trunks are to be closed watertight by efficient steel covers. Hatchways on the freeboard deck within a forecastle which is closed at the after end with a bulkhead and closing appliances no less effective than Class 2 may be fitted with wood covers, coamings, and closing appliances in accordance with § 43.05–55, provided hatchways on the forecastle deck are closed watertight by efficient steel covers.

[1] The provisions of §§ 43.01–1—43.01–100, inclusive, and §§ 43.05–1—43.15–97, inclusive, also apply to tankers except as they are modified by §§ 43.30–1—43.30–70, inclusive.

§ 43.30–35 *Ventilators; tanker.* (a) Ventilators to spaces below the freeboard deck are to be of ample strength or are to be protected by superstructures or equally efficient means.

§ 43.30–40 *Freeing arrangements; tanker.* (a) Vessels with bulwarks are to have open rails fitted for at least half the length of the exposed portion of the weather deck or other effective freeing arrangements. The upper edge of the sheer strake is to be kept as low as practicable and preferably not higher than the upper edge of the gunwale bar.

(b) Where superstructures are connected by trunks, open rails are to be fitted for the whole length of the weather portions of the freeboard deck.

§ 43.30–45 *Plans; tanker.* (a) Plans showing proposed fittings and arrangements are to be submitted to the assigning authority for approval.

§ 43.30–50 *Computation of freeboard; tanker.* (a) When the assigning authority is satisfied that the foregoing requirements are fulfilled, the summer freeboard may be computed from the table for tankers; all corrections except those for flush-deck steamers, detached superstructures, excess sheer, and winter voyages across the North Atlantic are to be made in accordance with §§ 43.15–1—43.15–97.

§ 43.30–55 *Deductions for detached superstructures; tankers.* (a) When the total effective length of superstructure is less than 1.0*L*, the deduction is a percentage of that for a superstructure of length 1.0*L*, and is obtained from Table 43.30–55 (a).

TABLE 43.30–55 (a).—TOTAL EFFECTIVE LENGTH OF SUPERSTRUCTURES

	0	0.1*L*	0.2*L*	0.3*L*	0.4*L*	0.5*L*	0.6*L*	0.7*L*	0.8*L*	0.9*L*	1.0*L*
	Percent	*Percent*	*Percent*	*Percent*	*Percent*	*Percent*	*Percent*	*Percent*	*Percent*	*Percent*	*Percent*
All types	0	7	14	21	31	41	52	63	75.3	87.7	100

§ 43.30–60 *Deduction for excess sheer; tanker.* (a) Where the sheer is greater than the standard, the correction for excess sheer (see § 43.15–73) is deducted from the freeboard for all tankers. Section 43.15–77 does not apply except that the maximum deduction for excess sheer is 1½ inches at 100 feet and increases at the rate of 1½ inches for each additional 100 feet in the length of the vessel.

§ 43.30–65 *Winter North Atlantic freeboard; tanker.* (a) The minimum freeboard for tankers on voyages across the North Atlantic from a port or place of departure north of latitude 36° N. to a port or place of arrival north of latitude 36° N., regardless of the route of the vessel while it is in either of the northern seasonal winter zones during the winter season, shall be the winter freeboard plus an addition at a rate of one inch per 100 feet in length.

§ 43.30–70 *Freeboard table for tankers.* (a) Table 43.30–70 (a) gives the basic minimum summer freeboard for tankers which comply with the standards in this part.

TABLE 43.30–70 (a).—BASIC MINIMUM SUMMER FREEBOARD FOR TANKERS

L (feet)	Freeboard	*L* (feet)	Freeboard	*L* (feet)	Freeboard

[1] Vessels above 750 feet are to be dealt with by the administration.

SUBPART 43.35—LUMBER SCHOONERS

§ 43.35–1 *Load line marks for vessels specially constructed for the carriage of complete cargoes of timber (lumber schooner type).* (a) Load lines for existing vessels propelled by either sail or steam which have been specially constructed to carry complete cargoes of timber (that is, of the lumber schooner type) when carrying a complete cargo of timber will be marked with a load line as provided in § 43.01–15. The mark is illustrated by figure 43.35–1 (a).

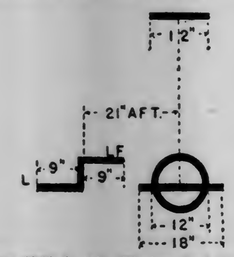

FIGURE 43.35–1 (a).—Timber load line for vessels constructed for the carriage of complete cargoes of timber.

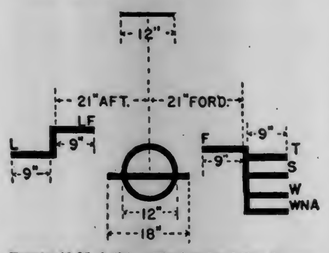

FIGURE 43.35–1 (b).—Timber load line in conjunction with steamer load line for vessels constructed for the carriage of complete cargoes of timber.

(b) Existing vessels which have been specially constructed to carry complete cargoes of timber (the lumber schooner type) and which carry cargoes other than complete timber cargoes, will be marked as provided in § 43.01–15, the marking is illustrated by figure 43.35–1 (b).

(c) The forward mark will be determined as provided in §§ 43.15–1—43.15–97 or §§ 43.20–1—43.20–45, as applicable to the type of vessel dealt with.

SUBPART 43.40—ZONE AND SEASONAL AREAS AND MISCELLANEOUS REQUIREMENTS

§ 43.40–1 *Boundaries of the zones and seasonal areas.* (a) The southern boundary of the northern "winter seasonal" zone is a line drawn from the east coast of North America along the parallel of lat. 36° N. to Tarifa, in Spain; from the east coast of Korea along the parallel of lat. 35° N. to the west coast of Honshu, Japan; from the east coast of Honshu along the parallel of lat. 35° N. to long. 150° W., and thence along a rhumb line to the west coast of Vancouver Island at lat. 50° N., Fusan (Korea) and Yokohama to be considered as being on the boundary line of the northern "winter seasonal" zone and the "summer" zone.

(b) The northern boundary of the "tropical" zone is a line drawn from the east coast of South America at lat. 10° N. along the parallel of lat. 10° N. to long. 20° W., thence north to lat. 20° N. and thence along the parallel of lat. 20° N. to the West Coast of Africa; a line from the east coast of Africa along the parallel of lat. 8° N. to the west coast of the Malay Peninsula, following thence the coast of Malay and Siam to the east coast of Cochin China at lat. 10° N., thence along the parallel of lat. 10° N. to long. 145° E., thence north to lat. 13° N. and thence along the parallel of lat. 13° N. to the west coast of Central America, Saigon to be considered as being on the boundary line of the "tropical" zone and the "seasonal tropical" area (4).

(c) The southern boundary of the "tropical" zone is a line drawn from the east coast of South America along the Tropic of Capricorn to the West Coast of Africa; from the east coast of Africa along the parallel of lat. 20° S. to the west coast of Madagascar, thence along the west and north coast of Madagascar to long. 50° E., thence north to lat. 10° S., thence along the parallel of lat. 10° S. to long. 110° E., thence along a rhumb line to Port Darwin, Australia, thence eastward along the coast of Australia and Wessel Island to Cape Wessel, thence along the parallel of lat. 11° S. to the west side of Cape York from the east side of Cape York at lat. 11° S. along the parallel of lat. 11° S. to long. 150° W., thence along a rhumb line to the point lat. 26° S., long. 75° W., and thence along a rhumb line to the west coast of South America at lat. 30° S., Coquimbo, Rio de Janeiro, and Port Darwin to be considered as being on the boundary line of the "tropical" and "summer" zones.

(d) The following regions are to be included in the "tropical" zone:

(1) The Suez Canal, the Red Sea, and the Gulf of Aden, from Port Said to the meridian of 45° E., Aden and Berbera to be considered as being on the boundary

line of the "tropical" zone and the "seasonal tropical" area 2 (ii)

(2) The Persian Gulf to the meridian of 59° E.

(e) The northern boundary of the southern "winter seasonal" zone is a line drawn from the east coast of South America along the parallel of lat. 40° S. to long. 56° W., thence along a rhumb line to the point lat. 34° S., long. 50° W., thence along the parallel of lat. 34° S. to the west coast of South Africa; from the east coast of South Africa at lat. 30° S. along a rhumb line to the west coast of Australia at lat. 35° S., thence along the south coast of Australia to Cape Arid, thence along a rhumb line to Cape Grim, Tasmania, thence along the north coast of Tasmania to Eddystone Point, thence along a rhumb line to the west coast of South Island, New Zealand, at long. 170° E., thence along the west, south, and east coasts of South Island to Cape Saunders, thence along a rhumb line to the point lat. 33° S., long. 170° W.; and thence along the parallel of lat. 33° S. to the west coast of South America, Valparaiso, Cape Town, and Durban to be considered as being on the boundary line of the Southern "seasonal winter" and "summer" zones.

(f) The remaining areas constitute the "summer" zones. The following areas are seasonal tropical areas:

(1) In the North Atlantic Ocean: An area bounded on the north by a line from Capa Catoche in Yucatan to Cape San Antonio in Cuba, by the South Cuban Coast to lat. 20° N. and by the parallel of lat. 20° N. to the point lat. 20° N., long. 20° W., on the west by the coast of Central America; on the south by the north coast of South America and by parallel of lat. 10° N., and on the east by the meridian of 20° W.

Tropical: 1st November to 15th July.
Summer: 16th July to 31st October.

(2) Arabian Sea: (i) North of lat. 24° N. Karachi is to be considered as being on the boundary line of this area and the seasonal tropical area below.

Tropical: 1st August to 20th May.
Summer: 21st May to 31st July.

(ii) South of lat. 24° N.

Tropical: 1st December to 20th May, and 16th September to 15th October.
Summer: 21st May to 15th September and 16th October to 30th November.

(3) Bay of Bengal:

Tropical: 16th December to 15th April.
Summer: 16th April to 15th December.

(4) In the China Sea: An area bounded on the west and north by the coast of Indo-China and China to Hong Kong, on the east by a rhumb line to the port of Sual (Luzon Island), and by the west coast of the Islands of Luzon, Samar, and Leyte to the parallel of 10° N., and on the south by the parallel of lat. 10° N., Hong Kong and Sual to be considered as being on the boundary of the "seasonal tropical" and "summer" zones.

Tropical: 21st January to 30th April.
Summer: 1st May to 20th January.

(5) In the north Pacific Ocean: (i) An area bounded on the north by the parallel of lat. 25° N., on the west by the meridian of 160° E., on the south by the parallel of lat. 13° N., and on the east by the meridian of 130° W.

Tropical: 1st April to 31st October.
Summer: 1st November to 31st March.

(ii) An area bounded on the north and east by the coast of California, Mexico, and Central America, on the west by the meridian of 120° W., and by a rhumb line from the point lat. 30° N., long. 120° W., to the point lat. 13° N., long. 105° W., and on the south by the parallel of lat. 13° N.

Tropical: 1st March to 30th June and 1st to 30th November.
Summer: 1st July to 31st October and 1st December to 28th/29th February.

(6) In the south Pacific Ocean: (i) An area bounded on the north by the parallel of lat. 11° S., on the west by the east coast of Australia, on the south by the parallel of lat. 20° S., and on the east by the meridian of 175° E., together with the Gulf of Carpentaria south of lat. 11° S. Mackay is to be considered as being on the boundary of the "seasonal tropical" and the "summer" zones.

Tropical: 1st April to 30th November.
Summer: 1st December to 31st March.

(ii) An area bounded on the west by the meridian of 150° W., on the south by the parallel of lat. 20° S., and on the north and east by the rhumb line forming the southern boundary of the tropical zone.

Tropical: 1st March to 30th November.
Summer: 1st December to 28/29th February.

(g) The following are seasonal winter areas: (1) Northern seasonal winter zone (between North America and Europe). (i) In the area within and to the northwards of the following line: A line drawn south from the coast of Greenland at long. 50° W. to lat. 45° N., thence along the parallel of lat. 45° N. to the meridian of 15° W., thence north to lat. 60° N., thence along the parallel of lat. 60° N. to the west coast of Norway, Bergen to be considered as being on the boundary line of this area and area subdivision (ii) of this subparagraph.

Winter: 16th October to 15th April.
Summer: 16th April to 15th October.

(ii) An area outside area subdivision (i) of this subparagraph and north of the parallel of lat. 36° N.

Winter: 1st November to 31st March.
Summer: 1st April to 31st October.

(2) Baltic (bounded by the parallel of latitude of the Skaw).

Winter: 1st November to 31st March.
Summer: 1st April to 31st October.

(3) Mediterranean and Black Sea.

Winter: 16th December to 15th March.
Summer: 16th March to 15th December.

(4) Northern "seasonal winter" zone (between Asia and North America, except Sea of Japan), south of 50° N.

Winter: 16th October to 15th April.
Summer: 16th April to 15th October.

(5) Sea of Japan between the parallels of lat. 35° N. and 50° N.

Winter: 1st December to 28th/29th February.
Summer: 1st March to 30th November.

(6) Southern "seasonal winter" zone.

Winter: 16th April to 15th October.
Summer: 16th October to 15th April.

§ 43.40–5 *Fees, travel expense—Scale of fees.* (a) Table 43.40–5 (a) gives the maximum fees payable by owners for assignment of load line (including load line and condition survey, verification of markings, and issuance of load line certificate).

TABLE 43.40–5 (a)—MAXIMUM FEES

	Classed vessels	Unclassed vessels
Under 500 gross tons	$30.00	$80.00
500 and under 1,000 gross tons	35.00	105.00
1,000 and under 2,000 gross tons	40.00	125.00
2,000 and under 3,000 gross tons	50.00	150.00
3,000 and under 4,000 gross tons	60.00	175.00
4,000 and under 5,000 gross tons	70.00	200.00
5,000 and under 6,000 gross tons	80.00	220.00
6,000 and under 7,000 gross tons	90.00	240.00
7,000 and under 8,000 gross tons	100.00	260.00
8,000 and under 10,000 gross tons	110.00	280.00
10,000 and under 12,000 gross tons	120.00	300.00
12,000 gross tons and above	130.00	320.00

(b) *Fees for renewal of load line certificates.* The fees for condition survey and renewal of load line certificates shall be 50 percent of the above scale. In the case of an American Bureau classed vessel no charge will be made for this survey if carried out in conjunction with a special periodical survey required for maintenance of class and for which a fee is chargeable.

(c) *Fee for annual load line inspection.* The fee for annual load line inspection shall be $25. In the case of a vessel classed by the American Bureau of Shipping, no charge will be made for this inspection if carried out at the same time as a survey to the hull that is required by the rules of the American Bureau of Shipping for maintenance of class and for which a fee is chargeable.

(d) *Traveling expenses.* All traveling expenses incurred in connection with the above surveys will be an additional charge.

§ 43.40–10 *Forms of load line certificates.*

INTERNATIONAL LOAD LINE CERTIFICATE

[Form A1]

Issued under the authority of the United States of America, Commandant, U. S. Coast Guard, under the provisions of the International Load Line Convention, 1930.

[SEAL]

Issued by _____
Certificate No. _____
Name of ship _____ Official No. _____
Port of registry _____ Gross tonnage _____

FREEBOARD FROM DECK LINE

LOAD LINE

Tropical	(T)	Above (S)
Summer	(S)	Upper edge of line through center of disk
Winter	(W)	Below (S)
Winter (North Atlantic)	(WNA)	Below (S)

*Allowance for fresh water for all freeboards _____

(All measurements are to upper edges of the respective horizontal lines)

The upper edge of the deck line from which these freeboards are measured is _____ inches above the top of the _____ deck at side.

This is to certify that this ship has been surveyed and the freeboards and load lines shown above have been assigned in accordance with the Convention.

**This certificate remains in force until _____ on the _____ day of _____, 19__.

Issued at _____

(Here follows the signature or seal and description of the assigning authority.)

NOTE: In accordance with the Load Line Regulations, the disk and lines must be permanently marked by center punch marks or cutting. Letters indicating the assigning authority are to be marked alongside the disk and above the center line. Periodic inspections are to be made at intervals of approximately twelve months.

(On the reverse side of the load line certificate or on a separate sheet attached and forming part of the certificate, provision is to be made for annual inspection and renewal endorsements.)

RENEWAL OF LOAD LINE CERTIFICATE

The provisions of the Convention being fully complied with by this ship, this certificate is renewed until _____, 19__.

Place _____
Date _____

ASSIGNING AUTHORITY

By _____
(Surveyor)

NOTES

1. The Winter North Atlantic Load Line applies for voyages across the North Atlantic Ocean north of latitude 36° N. during the winter months as defined by the Load Line Regulations. The periods during which the other seasonal load lines apply in different parts of the world are as stated in the Load Line Regulations.

2. This Load Line Certificate will be canceled by the Commandant, U. S. Coast Guard, if—

(a) The periodic inspections have not been carried out.

(b) Material alterations have been made to the hull or superstructures which would affect the calculations determining the position of the load lines.

(c) The fittings and appliances for the protection of the openings, guardrails, freeing ports, or the means of access to the crew's quarters have not been maintained in as effective a condition as they were when the Certificate was issued.

3. When this Certificate has expired or been canceled, it must be delivered to the Assigning Authority.

PART 44—VARIANCE FOR STEAM COLLIERS, TUGS, BARGES, AND SELF-PROPELLED BARGES (WHEN ENGAGED IN SPECIAL SERVICES OR COASTWISE AND INTER-ISLAND VOYAGES)

Part 44 is amended to read as follows:

SUBPART 44.01—ADMINISTRATION

Sec.
44.01–1 Establishment of regulations for special service.
44.01–5 Administration; special service.
44.01–10 Approval by Commandant of special service.
44.01–15 Special service certificate.
44.01–20 New and existing vessels; special service.

SUBPART 44.05—RULES OF ASSIGNMENT; SPECIAL SERVICE

44.05–1 General.
44.05–5 Definitions.
44.05–10 Load Line markings.
44.05–15 Existing vessels.
44.05–20 Conditions of assignment.
44.05–25 Freeboards.
44.05–30 Load line certificates.
44.05–35 Form of load line certificates.

AUTHORITY: §§ 44.01–1 to 44.05–35 issued under sec. 2, 49 Stat. 888, as amended; 46 U. S. C. 88a.

SUBPART 44.01—ADMINISTRATION

§ 44.01–1 *Establishment of regulations for special service.* (a) Pursuant to the Coastwise Load Line Act, 1935, as amended June 20, 1936 (49 Stat. 888, 1543; 46 U. S. C. 88–88g), the Commandant, U. S. Coast Guard, under the direction and supervision of the Secretary of Treasury, is vested with discretion to vary the load line marks from those established by the International Load Line Treaty, 1930, on steam colliers, tugs,

barges, and self-propelled barges engaged in special services on inter-island voyages, and on coastwise voyages from port to port in the continental United States, the following regulations in this part are hereby established.

§ 44.01–5 *Administration; special service.* (a) The administrative provisions of §§ 43.01–1—43.01–100 of this subchapter, relating to vessels engaged in foreign and coastwise voyages, where applicable, shall apply to vessels subject to this part except as modified in paragraph (b) of this section.

(b) Application for the assignment of load lines under this part for the above classes of vessels shall be made to the Commandant, U. S. Coast Guard, stating:

(1) Name of vessel and official number.

(2) Type of vessel (steam collier, tug, barge, or self-propelled barge).

(3) Date keel was laid.

(4) Normal sea speed of vessel.

(5) Limits of voyage for which approval is requested.

(6) Normal maximum distance off shore in course of voyage.

(7) Length of voyage in days and nautical miles.

(8) Statement of weather conditions to be expected.

(9) Cargo to be carried.

§ 44.01–10 *Approval by Commandant, U. S. Coast Guard, of special service.* (a) Whenever the Commandant, U. S. Coast Guard, shall find that the position of the load line for the classes of vessels above stated may be varied safely from the position fixed by the International Load Line Treaty, 1930, and that any such change will not locate the load line above the actual line of safety, he may approve load lines, as determined by this part for steam colliers, tugs, barges, and self-propelled barges (separately by class) to be applicable between two specific ports of the continental United States and the intermediate continental United States ports between these limits or between the islands of a group over which the United States has jurisdiction. The marking of such load lines and the certifications thereof shall be in accordance with this part and the load line certificate shall define the limits of the voyage for which the load lines are valid.

§ 44.01–15 *Special service certificate.* (a) The use of the special service load line certificate issued under this part is limited to voyages only as described in the certificate. If the vessel engages on any voyage not contemplated by the certificate where a load line is required, the load line prescribed by Part 43 of this subchapter shall govern.

(b) Vessels engaged on special services in the coastwise trade and the inter-island trade will be certificated on the form shown in § 44.05–35.

§ 44.01–20 *New and existing vessels; special service.* (a) A new vessel marked with load lines for special service on a coastwise or inter-island voyage is a vessel whose keel was laid on or after September 28, 1937. An existing vessel is one whose keel was laid before that date.

SUBPART 44.05—RULES OF ASSIGNMENT; SPECIAL SERVICE

§ 44.05–1 *General.* (a) The load line regulations in this part are complementary to those in Part 43 or Part 45 (Great Lakes load line regulations) of this subchapter, as reference is made thereto.

§ 44.05–5 *Definitions.* (a) A steam collier is a vessel mechanically propelled, and specially designed for the carriage of coal in bulk.

(b) A tug is a vessel specially designed for towing vessels or floating equipment.

(c) A towed barge is a vessel without sufficient means for self-propulsion and which requires to be towed.

(d) A self-propelled barge is a vessel mechanically propelled of the type specially designed for use in limited coastwise and Great Lakes service and capable of transiting inter-connecting canals.

§ 44.05–10 *Load line markings.* (a) The load line marks on the vessel's sides are to be in accordance with § 43.05–15 of this subchapter, Figure 43.05–5. Seasonal markings such as "Winter North Atlantic" which are not applicable to the voyage will be omitted.

(b) In the case of vessels which engage in special services on coastwise voyages and voyages on the Great Lakes, the marks on the vessel's sides are to be in accordance with figure 44.05–10 (b) shown below.

(c) The load lines aft of the combined disk and diamond will be applicable for voyages on the Great Lakes and those on the forward side will be applicable to limited coastwise voyages. The summer line on the ocean will correspond to the summer line on the Lakes and the winter line on the ocean will correspond to the intermediate line on the Lakes.

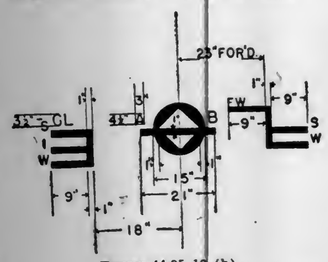

FIGURE 44.05–10 (b).

(d) In the case of vessels which operate both on special service coastwise voyages and on unlimited coastwise voyages, the marks on the ship's sides are to be in accordance with figure 44.05–10 (d). The load lines aft of the disk will be applicable to voyages in special service coastwise or inter-island voyages and those on the forward side will be applicable to unlimited coastwise voyages. (A vessel marked for both special service and unlimited coastwise voyages and furnished with a load line certificate on the international form shall, when entering the foreign trade, arrange that the load line markings are in accord with the vessel's international load line certificate by the elimination of the marks aft of the disk.)

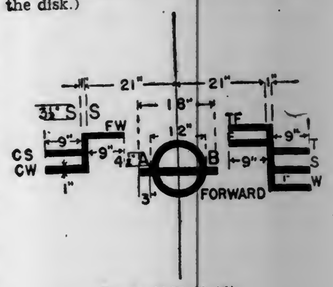

FIGURE 44.05–10 (d).

§ 44.05–15 *Existing vessels.* (a) In assigning load lines to an existing vessel the provisions of the regulations in this part shall be complied with in principle and detail insofar as is reasonable and practicable, having regard to the proven efficacy of existing arrangements for a special service voyage, and having particular regard to the provision of sufficient means for the protection and safety of the crew.

(b) Where it is neither reasonable nor practicable to comply with this part in its entirety, the assigning authority will, in each case, report to the Commandant, U. S. Coast Guard, the specific matters in which the vessel is deficient with such recommendations as may seem desirable. Upon the receipt of this report the Commandant, U. S. Coast Guard, shall determine such addition to the freeboard as will, in the judgment of the Commandant, U. S. Coast Guard, make the vessel as safe as if it had fully complied with this part.

§ 44.05–20 *Conditions of assignment*—(a) *Steam colliers.* The conditions of assignment for steam colliers shall be in accordance with the requirements of Part 43 of this subchapter and also with the supplementary requirements of §§ 43.30–1—43.30–70 of this subchapter in cases where a tanker freeboard is assigned, except that in the case of steam colliers constructed with bulwarks, the freeing port may be of a practically continuous slot type, located as low as possible, the clear area of the slot to be not less than 20 percent of the superficial area of the unpierced bulwarks. If, due to sheer, or other conditions, the assigning authority considers that extra local provision should be made for freeing decks of water, the slots are to be located so as to have maximum efficacy.

(b) *Tugs.* The conditions of assignment for tugs shall be in accordance with the provisions of §§ 45.10–5—45.10–100 of this subchapter and in addition port lights in exposed casings leading to spaces below the freeboard deck shall be fitted with deadlights.

(c) *Towed barges.* The conditions of asignment for towed cargo barges where the cargo is carried under deck shall be in accordance with §§ 45.10–5—45.10–100 of this subchapter. In the case of tank barges and cargo barges carrying cargo only on deck, compliance will also be required with the supplementary conditions of §§ 45.20–1—45.20–70 of this subchapter. In the case of towed cargo barges of the open type, the construction of the vessel must be such as to satisfy the assigning authority that no unusual hazards will be experienced.

(d) *Self-propelled barges.* The conditions of assignment for self-propelled cargo barges carrying cargo under decks shall be in accordance with the provisions of §§ 45.10–5—45.10–100 of this subchapter. In the case of self-propelled tank barges and self-propelled cargo barges carrying cargo only on deck, compliance will also be required with the supplementary conditions of §§ 45.20–1—45.20–70 of this subchapter.

§ 44.05–25 *Freeboards.* (a) *General.* When the assigning authority is satisfied that the requirements of this part as applicable to the type of vessel under consideration are complied with the freeboards will be computed as described in this section.

(b) *Steam colliers.* Steam colliers that have constructional features similar to those of a tanker which afford extra invulnerability against the sea may be assigned a reduction of freeboard from that determined under §§ 43.15–1—43.15–97 of this subchapter. The amount of such reduction shall be determined by the assigning authority, with the approval of the Commandant, U. S. Coast Guard, in relaton to the freeboard assigned to tankers, having regard to the degree of compliance with the supplementary conditions of assignment laid down for these ships, but without regard to the degree of subdivision provided. The freeboard assigned to such vessel shall in no case be less than would be assigned the vessel as a tanker, as determined by §§ 43.30–1—43.30–70 of this subchapter.

(c) *Tugs.* The freeboard is to be computed in accordance with §§ 45.15–1—45.15–97 of this subchapter. The fresh water and seasonal markings where applicable are to be the same as determined from §§ 43.15–1—43.15–97 of this subchapter.

(d) *Towed cargo barges with cargo under deck.* The freeboard is to be computed under §§ 45.15–1—45.15–97 of this subchapter. The fresh water and seasonal markings where applicable are to be determined from §§ 43.15–1—43.15–97 of this subchapter.

(e) *Towed cargo barges with cargo only on deck.* The freeboard for barges of this type is to be computed in accordance with the requirements of §§ 45.20–1—45.20–70 of this subchapter. The fresh water and seasonal markings where applicable are to be the same as determined from §§ 43.15–1—43.15–97 of this subchapter.

(f) *Towed cargo barges of the open type.* The load line will be placed where, in the judgment of the assigning authority, with the approval of the Commandant, U. S. Coast Guard, the draft will be such that no unusual hazard will be experienced.

(g) *Towed tank barges.* The freeboard is to be computed in accordance with §§ 45.20–1—45.20–70 of this subchapter. The fresh water and seasonal markings where applicable are to be determined from §§ 43.15–1—43.15–97 of this subchapter.

(h) *Self-propelled cargo barges.* The freeboard is to be computed under §§ 45.15–1—45.20–15 of this subchapter. The fresh water and seasonal markings where applicable are to be determined from §§ 43.15–1—43.15–97 of this subchapter.

(i) *Self-propelled tank barges.* The freeboard is to be computed in accordance with §§ 45.20–1—45.20–70 of this subchapter. The fresh water and seasonal markings where applicable are to be determined from §§ 43.15–1—43.15–97 of this subchapter.

§ 44.05–30 *Load line certificates.* (a) The load line certificates for a special service coastwise or special service inter-island voyage are to be on the forms shown in § 44.05–35.

§ 44.05–35 *Form of load line certificate.*

LOAD LINE CERTIFICATE FOR A SPECIAL SERVICE COASTWISE OR INTER-ISLAND VOYAGE

Issued under the authority of the Commandant, U. S. Coast Guard, United States of America, under the provisions of the Coastwise Load Line Act of August 27, 1935, as amended.

[SEAL]

Issued by _____

Certificate No._____

This certificate is valid only for coastwise or inter-island voyages that are between the limits of_____ and_____ provided the vessel is engaged solely in the trade stated herein.

Ship_____ Official No_____

Port of registry_____ Trade of vessel_____

Gross tonnage_____

FREEBOARD FROM DECK LINE		LOAD LINE
Tropical_____	(T)	_____Above (S)
Summer_____	(S)	__Upper edge of line through center of disk.
Winter_____	(W)	_____Below (S)

*Allowance for fresh water for all freeboards (except on the Great Lakes) _____

The upper edge of the deck line from which these freeboards are measured is____ inches above the top of the____deck at side.

This is to certify that this ship has been surveyed and the freeboards and load lines shown above have been found to be correctly marked upon the vessel in manner and location as provided by the Load Line Regulations of the Commandant, U. S. Coast Guard, applicable to vessels engaged on this special service voyage.

**This certificate remains in force until _____ Issued at_____ on the_____ day of_____, 19____.

(Here follows the signature or seal and description of the assigning authority)

NOTE: In accordance with the Load Line Regulations the disc or diamond and the lines must be permanently marked by center punch marks or cutting.

(On the reverse side of the load line certificate, the provision for annual inspection endorsement and for renewal of the certificate is to be the same as for vessels engaged in the foreign trade.)

*Where seagoing steamers navigate a river or inland water, deeper loading is permitted corresponding to the weight of fuel, etc., required for consumption between the point of departure and the open sea.

**Upon the expiration of the certificate renewal must be obtained as provided by the Load Line Regulations and the certificate so endorsed. Endorsement should also be made in the spaces provided on the occasion of each annual inspection required by the Load Line Regulations.

PART 45—MERCHANT VESSELS WHEN ENGAGED IN A VOYAGE ON THE GREAT LAKES

Part 45 is amended to read as follows:

SUBPART 45.01—ADMINISTRATION

45.01–1	Establishment of regulations.
45.01–5	Responsibility for administration.
45.01–10	Application of regulations.
45.01–15	Tankers.
45.01–20	Vessels of special design.
45.01–25	Marks to indicate maximum load lines.
45.01–30	Assignment and certification of load lines; assigning authority.
45.01–35	Survey for the assignment of new load line and renewal of load line certificate.
45.01–40	Annual load line inspection.
45.01–45	Application for assignment, renewal, and certification of load line marks.
45.01–50	Application for annual load line inspections.
45.01–55	Equivalents.
45.01–60	Validity of certificates; renewal of certificates.
45.01–65	Form of certificate.
45.01–70	Cancelation of load line certificates.
45.01–75	Seasonal load lines.
45.01–80	Log book entries.
45.01–85	Control.
45.01–90	Approval of the Commandant.

SUBPART 45.05—GENERAL RULES FOR DETERMINING MAXIMUM LOAD LINES OF MERCHANT VESSELS ON THE GREAT LAKES

Sec.
45.05–1 Definitions.
45.05–5 Deck line.
45.05–10 Load line diamond.
45.05–15 Lines to be used in connection with the diamond.
45.05–20 Mark of assigning authority.
45.05–25 Details in marking.
45.05–30 Verification of marks.

SUBPART 45.10—CONDITIONS OF ASSIGNMENT OF LOAD LINES

45.10–1 Construction of vessel.
45.10–5 Cargo and other hatchways not protected by superstructures.
45.10–10 Hatchway coamings.
45.10–15 Hatchway covers.
45.10–20 Hatchway beams.
45.10–25 Carries or sockets.
45.10–30 Cleats and fasteners.
45.10–35 Battens and wedges.
45.10–40 Tarpaulins.
45.10–45 Security of hatchway covers.
45.10–50 Cargo and other hatchways in the freeboard deck within superstructure which are fitted with closing appliances less efficient than class 1.
45.10–55 Hatchway coamings and closing arrangements.
45.10–57 Machinery space openings in exposed positions on freeboard and raised quarter-decks.
45.10–60 Machinery space openings in exposed positions on superstructure decks other than raised quarter-decks.
45.10–65 Machinery space openings in the freeboard deck within superstructures which are fitted with closing appliances less efficient than class 1.
45.10–67 Flush scuttles.
45.10–70 Companionways.
45.10–75 Ventilators in exposed positions on freeboard and superstructure decks.
45.10–77 Air pipes.
45.10–80 Gangway, cargo and coaling ports.
45.10–85 Scuppers and sanitary discharge pipes.
45.10–87 Airports.
45.10–90 Guard rails.
45.10–95 Freeing ports.
45.10–100 Protection of crew.

SUBPART 45.15—LOAD LINES FOR STEAMERS

45.15–1 Length (L).
45.15–5 Breadth (B).
45.15–7 Molded depth.
45.15–10 Depth for freeboard (D).
45.15–15 Coefficient of fineness (C).
45.15–17 Strength.
45.15–20 Height of superstructure.
45.15–25 Standard height of superstructure.
45.15–27 Length of superstructure (S).
45.15–30 Enclosed superstructure.
45.15–35 Superstructure bulkheads.
45.15–37 Class 1 closing appliances.
45.15–40 Class 2 closing appliances.
45.15–45 Temporary closing appliances.
45.15–47 Superstructures, general.
45.15–50 Poop.
45.15–55 Raised quarter-deck.
45.15–57 Bridge.
45.15–60 Forecastle.
45.15–65 Trunk.
45.15–67 Inclosed superstructure with middle line openings in the deck not provided with permanent means of closing.
45.15–70 Deductions for superstructures.
45.15–73 Sheer, general.
45.15–75 Standard sheer profile.
45.15–77 Measurement of variations from standard sheer profile.
45.15–80 Correction for variations from standard sheer profile.
45.15–83 Addition for deficiency in sheer.
45.15–85 Deduction for excess sheer.
45.15–87 Standard round of beam.
45.15–90 Round of beam correction.
45.15–93 Summer freeboard.
45.15–95 Intermediate and winter freeboard.
45.15–97 Freeboard table for steamers.

SUBPART 45.20—LOAD LINES FOR TANKERS

45.20–1 Definition.
45.20–5 Marks on sides.
45.20–10 Construction.
45.20–15 Forecastle.
45.20–20 Machinery casings.
45.20–25 Gangway.
45.20–30 Protection of crew, access to machinery space, etc.
45.20–35 Hatchways.
45.20–40 Ventilators.
45.20–45 Freeing arrangements.
45.20–50 Plans.
45.20–55 Computation of freeboard.
45.20–60 Deductions for detached superstructures.
45.20–65 Deduction for excess sheer.
45.20–70 Freeboard table for tankers.
45.20–75 Fees, travel expense.
45.20–80 Form of load line certificate.

AUTHORITY: §§ 45.01–1 to 45.20–80 issued under sec. 2, 49 Stat. 888, as amended; 46 U. S. C. 88a.

SUBPART 45.01—ADMINISTRATION

§ 45.01–1 *Establishment of regulations.* (a) Load lines are established by this part for merchant vessels of 150 gross tons or over when engaged in a voyage on the Great Lakes in conformity with the Coastwise Load Line Act, 1935, amended June 20, 1936 (49 Stat. 888, 1543; 46 U. S. C. 88–88i), and effective as to vessels of 4,000 gross tons and upwards November 27, 1935, and as to all other vessels subject thereto August 27, 1936.

§ 45.01–5 *Responsibility for administration.* (a) The Commandant, U. S. Coast Guard, is vested with the responsibility and authority, under direction and supervision of the Secretary of the Treasury, for the administration of the Coastwise Load Line Act, 1935, as amended by the act of June 20, 1936.

§ 45.01–10 *Application of regulations.* (a) After November 27, 1935, no merchant vessel of 4,000 gross tons or over shall proceed from any port or place in the United States on the Great Lakes for a voyage on the Great Lakes and after August 27, 1936, no merchant vessel of 150 gross tons and upwards to 4,000 gross tons shall proceed from any port or place in the United States on the Great Lakes for a voyage on the Great Lakes unless such vessel is:

(1) Marked with load lines under the load lines regulations in Part 43 of this subchapter and has on board a valid load line certificate, or

(2) A foreign vessel exempted under section 5 of the Coastwise Load Line Act, 1935, or is marked and certificated as to load lines under the provisions of and in accordance with the International Load Line Convention 1930 and has on board a valid load line certificate, or

(3) A new vessel:

(i) Has been surveyed in accordance with the provisions of this part.

(ii) Complies with the provisions of this part as applicable to the type of vessel dealt with.

(iii) Has been marked in accordance with the provisions of this part.

(iv) Has had the marks certified as correct as provided by this part.

(A new vessel is one whose keel was laid on or after August 27, 1935.)

(4) An existing vessel:

(i) Has been surveyed, marked, and the marks certified either under the provisions of the regulations in this part as applicable to the type of vessel, or

(ii) Complies as defined for the type of vessel with the provisions of this part in principle and detail so far as is reasonable and practicable, having regard to the efficacy of the protection of openings, guard rails, freeing ports, and means of access to crews quarters, provided by the existing arrangements, fittings, and appliances of the vessel.

(b) Where it is neither reasonable nor practicable to comply with this part in its entirety, the assigning authority will, in each case, report to the Commandant, U. S. Coast Guard, the specific matters in which the vessel is deficient with such recommendations as seem desirable. Upon the receipt of this report the Commandant, U. S. Coast Guard, shall determine such addition to the freeboard as will, in the judgment of the Commandant, U. S. Coast Guard, make the vessel as safe as if it had fully complied with this part.

§ 45.01–15 *Tankers.* (a) A steamer specially constructed for the carriage of liquid cargoes in bulk which has been surveyed as provided by § 45.01–10 shall be marked with tanker load lines and the marks certified as correct, if being:

(1) A new vessel, it complies with the conditions and provisions prescribed in §§ 45.20–10—45.10–70.

(2) An existing vessel, it complies with the conditions and provisions in §§ 45.20–10, 45.20–25—45.20–40 and, also, in principle so far as is reasonable and practicable, with §§ 45.20–15, 45.20–20, 45.20–45: *Provided*, That in assigning a tanker load line to an existing vessel such additions to the freeboard shall be made as is reasonable having regard to the extent to which the vessel falls short of full compliance with the conditions and provisions prescribed in §§ 45.20–15, 45.20–20, 45.20–45.

§ 45.01–20 *Vessels of special design.* (a) Sand suckers, open hopper barges, and other vessels of special design that cannot be assigned load lines by direct application of the rules set forth herein, will be assigned load lines based on the individual consideration of each vessel, and before such vessels are marked and certified, the assigning authority shall obtain the approval of the Commandant, U. S. Coast Guard, as to the position of the load line marks.

§ 45.01–25 *Marks to indicate maximum load lines.* (a) Marks to indicate maximum mean drafts to which a vessel can be lawfully submerged, in the various circumstances and seasons, shall be permanently marked on each side of the vessel in the form, manner, and location provided by this part.

§ 45.01–30 *Assignment and certification of load lines; assigning authority.* (a) As provided in the Coastwise Load Line Act, 1935, the American Bureau of Shipping is appointed to assign load lines and to determine whether the position of and the manner of marking each vessel to which the act applies has been performed in accordance with this part, and is authorized to issue a load line certificate, certifying to the correctness of the marks under its own hand and seal. The assigning authority is authorized to renew from time to time by indorsement a load line certificate. Load line certificates will not be issued until the load line marks have been verified. This certificate will be issued in duplicate, one copy being delivered to the owner or master of the vessel and one copy, together with a summary of the data used to determine the load line, will be forwarded to the Commandant, U. S. Coast Guard, Washington, D. C. In addition, effective January 1, 1948, each new vessel, when receiving its first load line certificate, shall be furnished a copy of the load line survey report which shall be retained on board to be available for the information of inspectors and surveyors when carrying out subsequent load line surveys.

(b) The agency appointed by the Commandant, U. S. Coast Guard, to assign load lines as provided by section 3 of the Coastwise Land Line Act, 1935 (49 Stat. 888; 46 U. S. C. 88b), is referred to in this part as the assigning authority.

(c) The fees to be charged by the assigning authority for services in connection with this part shall not exceed the scale of maximum fees as set forth in § 45.20–75.

§ 45.01–35 *Survey for the assignment of new load line and renewal of load line certificate*—(a) *Steel vessels.* (1) Unless specifically waived by the Commandant, U. S. Coast Guard, the vessel is to be placed in dry dock to determine the condition of the hull plating and underwater connections.

(2) The holds, 'tween decks, peaks, bilges, engine and boiler spaces, and bunkers are to be examined to determine the condition of the structure.

(3) Deep tanks and other tanks which form part of the vessel are to be examined internally.

(4) Where a double bottom is fitted, the tanks are to be examined internally. Where double bottom and other tanks are used for fuel-oil bunkers, such tanks need not be cleaned out, provided the surveyors are able to determine by an external examination that their general condition is satisfactory.

(5) The decks are to be examined.

(6) The hatch covers, hatch beams, and fore-and-afters, tarpaulins, battens and wedges, the hatchway and ventilator coamings, companionways, the engine and boiler casings, the superstructures on the freeboard deck, and all means of protecting the openings in the freeboard deck and superstructures are to be examined.

(7) All air pipe outlets, scuppers, sanitary discharges in the vessel's sides, and air ports are to be examined.

(8) All gangways, cargo, and coaling ports or similar openings in the vessel's sides are to be examined.

(9) Guard rails, gangways, and freeing ports are to be examined.

(10) Where, owing to the age and condition of the vessel, the surveyors deem it necessary, the shell and deck plating may be required to be drilled in order to ascertain the thickness of such plating.

(b) *Wood and composite vessels.* (1) Unless specifically waived by the Commandant, U. S. Coast Guard, the vessel is to be placed on a drydock or a slipway and the keel, stem, sternframe or sternpost, and outside planking are to be examined. Caulking is to be tried at such places about the planking as is deemed necessary by the surveyors.

(2) Careful examination must be made for faulty fastenings and such bolts or treenails must be backed out, or otherwise dealt with, as may be deemed necessary by the surveyors.

(3) Careful examination is to be made of the entire structure and, if considered necessary, borings are to be made to ascertain the conditions of the material; should these disclose cause for further examination, listings are to be made where required to satisfy the surveyors as to the true condition of the vessel.

(4) The holds, 'tween decks, peaks, bilges, engine and boiler spaces, and bunkers are to be examined.

(5) The decks are to be examined and bored where necessary.

(6) The hatch covers, hatch beams, fore-and-afters, tarpaulins, battens, and wedges, the hatchway and ventilator coamings, companionways, the engine and boiler casings, the superstructures on the freeboard deck, and all means of protecting the openings in the freeboard deck and superstructures are to be examined.

(7) All air pipe outlets, scuppers, sanitary discharges in the vessel's sides, and air ports are to be examined.

(8) Guard rails, gangways, and freeing ports are to be examined.

(c) *Correction of deficiencies.* Any such structure or parts or fittings of the vessel as are found to be in an unsatisfactory condition are to be rebuilt or repaired or renewed in order to place the vessel in a seaworthy condition so as to be eligible for a load line certificate.

§ 45.01–40 *Annual load line inspection.* (a) A vessel having been marked as provided by this part, and the mark certified as correct, will be inspected at intervals of approximately 12 months in order to insure the maintenance in an effective condition of the fittings and appliances for the:

(1) Protection of openings,

(2) guard rails,

(3) freeing ports,

(4) means of access to crew's quarters, and that there have not been alterations made to the hull or superstructures which would affect the calculations determining the position of the load lines.

(b) If upon examination the fittings and appliances are found to be in a satisfactory condition, the load line certificate will be endorsed to this effect. If it shall be found that alterations have been made to the hull or superstructures that affect the calculations determining the position of the load line, the matter shall be reported to the Commandant, U. S. Coast Guard for appropriate action.

(c) The assigning authority shall make this inspection and report thereon to the owners of the vessel, and a copy of such report shall be forwarded to the Commandant, U. S. Coast Guard, Washington 25, D. C.

§ 45.01–45 *Application for assignment, renewal, and certification of load line marks.* (a) Application for assignment and certification of load line marks or for renewal of load line certificates shall be made in writing to the assigning authority by the owners of the vessel.

§ 45.01–50 *Application for annual load line inspections.* (a) Application for annual load line inspection required by § 45.01–40 shall be made in writing to the assigning authority by the owners of a vessel.

§ 45.01–55 *Equivalents.* (a) Where in the regulations in this part it is provided that a particular fitting or appliance, or type thereof, shall be fitted or carried in a vessel, or that any particular arrangement shall be adopted, there may be substituted any other fitting or appliance or type thereof, or any other arrangement: *Provided*, That such fitting, appliance, or arrangement shall be considered a suitable equivalent by the assigning authority and the approval of the Commandant, U. S. Coast Guard for such substitution shall have been issued.

§ 45.01–60 *Validity of certificates; renewal of certificates.* (a) As the assignment of load lines is conditioned upon the structural efficiency of the vessel and upon the provision of effective protection to vessel and crew, every vessel required to be marked by the Coastwise Load Line Act, 1935, with load lines shall be surveyed by the assigning authority at least once in each 6 years to determine that the load lines are then correctly placed as required by this part. If the load line mark be found correct for the vessel in the condition she is then in, the certificate shall be renewed for such time as the condition of the vessel then warrants, but in no case for a longer period than 6 years and the facts shall be attested by indorsement upon the back of the certificate in the form shown in § 45.20–80.

(b) The Commandant, U. S. Coast Guard, shall be notified of every renewal indorsement and the date of its expiration.

(c) Foreign vessels which have not been exempted pursuant to section 5 of the Load Line Act shall have their load line certificate limited to a period of 1 year. The certificate may be validated for additional 1-year periods (provided, after survey, the condition of the vessel is found to warrant such validation, and the facts are attested by endorsement upon the back of the load line certificate by a surveyor of the American Bureau of Shipping or of the classification society issuing the certificate.) The certificate will become void 5 years from date of issue, or at the expiration of the fourth yearly validation, whichever occurs first.

§ 45.01–65 *Form of certificate.* (a) The forms for certificates certifying to the correctness of the load line mark as required by the Coastwise Load Line Act, 1935, as shown in § 45.20–80.

§ 45.01–70 *Cancellation of load line certificate.* (a) Notwithstanding the marking of a load line and the issuance of a load line certificate, the certificate will be cancelled if:

(1) The annual load line inspection required by § 45.01–40 has not been carried out or that the items described under § 45.01–40 are not maintained in an effective condition; or

(2) The survey required by § 45.01–35 has not been carried out, or that any defects disclosed by the survey have not been corrected; or

(3) Due to any cause the conditions of assignment have not been maintained as provided by the regulations in this part, or alterations have been made to hull or superstructures which affect the calculations made to determine the location of the load line.

§ 45.01–75 *Seasonal load lines.* (a) For load line purposes there is hereby established for the Great Lakes a winter, intermediate, and summer season, and load lines applicable to each season are established by the regulations in this part. The winter season shall be that period from November 1 through April 15 of the next year, the intermediate seasons from April 16 through May 15 and from September 16 through October 31, and the summer season from May 16 through September 15 (all dates inclusive).

(b) For those vessels that are marked and certificated with load lines under the International Load Line Convention, 1930, the load line marks shall be applicable to voyages on the Great Lakes in accordance with Table 45.01–75 (b).

TABLE 45.01-75 (b).

Load line mark, salt water	Season applicable
Tropical (T)--- Summer (S)---	May 16–Sept. 15 (Summer). Apr. 16–May 15, Sept. 16–Oct. 31 (Intermediate).
Winter (W)----	Nov. 1–Apr. 15 (Winter).

(c) No vessel shall be loaded so as to submerge at any time the load line applicable to the season.

§ 45.01–80 *Log book entries.* (a) The master of a vessel subject to this part shall note in the vessel's log the data required by section 6 of the Coastwise Load Line Act, 1935 (49 Stat. 889; 46 U. S. C. 88e); that is, before departing from her loading port or place, the position of the load line mark, port and starboard, as applicable to the voyage and the actual drafts of the vessel forward and aft at the time of departing from port as nearly as the same can be ascertained.

§ 45.01–85 *Control.* (a) The Collector of Customs may detain a vessel for survey if he has reason to believe that the vessel is proceeding on her journey in excess of the draft allowed by the regulations in this part as indicated by the vessel's load line certificate, or otherwise. Immediately upon ordering a vessel detained, the Collector of Customs shall inform the Coast Guard District Commander thereof, who shall thereupon advise the collector whether or not he deems that the vessel may proceed to sea with safety. The Coast Guard District Commander may detain a vessel if it is so loaded as to be manifestly unsafe to proceed to sea, without advice thereof from the Collector of Customs. However, in such case, immediate notice of such detention shall be furnished the Collector of Customs so that clearance may be withheld.

(b) In the case of detention of a vessel, which shall be by written order, the detaining officer will immediately arrange for a survey in the manner prescribed by section 7 of the Coastwise Load Line Act, 1935 (49 Stat. 889; 46 U. S. C. 88f). In the case of such a survey, the detaining officer shall appoint three disinterested surveyors and, where practicable, one of them shall be from the Surveying Staff of the American Bureau of Shipping. Where such surveyors are appointed by the Collector of Customs, such appointments shall be with the approval of the Coast Guard District Commander. Whenever a vessel is detained the master may, within five days, appeal to the Commandant, U. S. Coast Guard, who may, if he desires, order a further survey and may affirm, set aside, or modify the order of the detaining officer.

(c) Where a foreign vessel is detained or any action is taken which would appear likely to result in legal proceedings being taken against such a vessel, the consul of the country to which the vessel belongs shall be informed as soon as possible of the circumstances of the case.

(d) Pursuant to the provisions of section 5 of the Coastwise Load Line Act, 1935 (49 Stat. 889; 46 U. S. C. 88d), as amended, it is hereby certified that a vessel of a foreign country which has ratified the International Load Line Convention, 1930, shall be deemed a vessel of a foreign country as described in section 5 of the cited act, and such a vessel shall be exempt from the provisions of this part insofar as the marking of the load lines and the certificating thereof are concerned, only so long as such country similarly recognizes the load lines established by the regulations in this part, for the purpose of a voyage by sea: *Provided*, That the vessel is marked with load lines and has on board a valid load line certificate certifying to the correctness of the mark, the vessel shall not be loaded beyond the limits allowed by the certificate, the position of the load line of the vessel shall correspond with the certificate, the hull and superstructure shall not have been so materially altered as to affect the calculations on which the load line was based, and alterations have not been made so that the protection of openings, guard rails, freeing ports, and means of access to crew's quarters, have made the vessel manifestly unfit to proceed to sea without danger to human life.

§ 45.01–90 *Approval of the Commandant.* (a) Where the active approval of the Commandant, U. S. Coast Guard is required in connection with this part, such information as will enable the Commandant, U. S. Coast Guard to obtain a comprehensive understanding of the question at issue shall be furnished and will remain with the Commandant, U. S. Coast Guard, as a record.

SUBPART 45.05—GENERAL RULES FOR DETERMINING MAXIMUM LOAD LINES OF MERCHANT VESSELS ON THE GREAT LAKES

NOTE: The rules necessarily assume that the nature and stowage of the cargo, ballast, etc., are such as to secure sufficient stability for the vessel.

§ 45.05–1 *Definitions*—(a) *Steamer.* (1) The term "steamer" or "steamship" includes all vessels having sufficient means for mechanical propulsion, except where provided with sufficient sail area for navigation under sails alone.

(2) A vessel fitted with mechanical means of propulsion and with sail area insufficient for navigation under sails alone may be assigned a load line under §§ 45.15–1—45.20–1.

(3) A lighter, barge, or other vessel without independent means of propulsion, when towed, is to be assigned a load line under §§ 45.15–1—45.20–1, except steel tank barges specially constructed for the carriage of liquids in bulk and cargo barges having only small access hatches in the freeboard deck, the load lines for which may be calculated under §§ 45.20–10—45.20–70.

(b) *Flush-deck vessel.* A flush-deck vessel is one which has no superstructure on the freeboard deck.

(c) *Superstructure.* A superstructure is a decked structure on the freeboard deck extending from side to side of the vessel. A raised quarter-deck is considered a superstructure.

(d) *Load line.* The load line is the line defining the maximum mean draft to which a vessel may be lawfully submerged. It is the lower limit of the freeboard as determined by the regulations in this part having regard to the various conditions and seasons.

(e) *Freeboard.* The freeboard assigned in the distance measured vertically downward at the side of the vessel amidships from the upper edge of the deck line to the upper edge of the load line.

(f) *Freeboard deck.* The freeboard deck is the deck from which the freeboard is measured, and is the uppermost complete deck having permanent means of closing all openings in weather portions of the deck in accordance with §§ 45.10–1—45.10–45. It is the upper deck in flush-deck vessels and vessels with detached superstructures. In vessels having discontinuous freeboard decks within superstructures which are not intact, or which are not fitted with class 1 closing appliances, the lowest line of the deck below the superstructure deck is taken as the freeboard deck.

(g) *Amidships.* Amidships is the middle of the length of the summer load water line, as defined in § 45.15–1.

CROSS REFERENCE: For class 1 closing appliances, see § 45.15–37.

§ 45.05–5 *Deck line.* (a) The deck line is a horizontal line 15 inches in length and 1 inch in breadth. It is to be marked amidships on each side of the vessel, and its upper edge is to pass through the point where the continuation outward of the upper surface of the freeboard deck intersects the outer surface of the shell. (See fig. 45.05–5 (a).) Where the deck is partly sheathed amidships, the upper edge of the deck line is to pass through the point where the continuation outward of the upper surface of the actual sheathing at amidships intersects the outer surface of the shell.

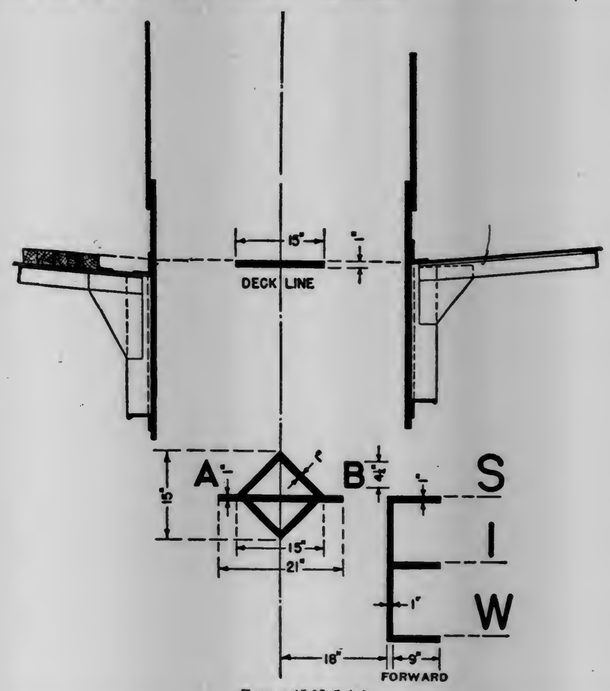

FIGURE 45.05–5 (a)

§ 45.05–10 *Load line diamond.* (a) The load line diamond is a square 15 inches on each diagonal with one diagonal vertical, the other horizontal, and is intersected by a horizontal line of 21 inches in length and 1 inch in breadth, the upper edge of which coincides with the horizontal diagonal of the diamond. The diamond is to be marked amidships below the deck line, port and starboard.

§ 45.05–15 *Lines to be used in connection with the diamond.* (a) The lines which indicate the maximum load line in different seasons are to be horizontal lines, 9 inches in length and 1 inch in breadth, which extend from and are at right angles to, a vertical line marked 18 inches forward of the center of the diamond. (See fig. 45.01–5.)

(b) The following are the lines to be used:

(1) *Summer load line.* The summer load line is indicated by the upper edge of the line which passes through the center of the diamond and also by a line marked "S."

(2) *Intermediate load line.* The intermediate load line is indicated by the upper edge of a line marked "I."

(3) *Winter load line.* The winter load line is indicated by the upper edge of a line marked "W."

(c) Where the draft is restricted on a basis of subdivision or stability and this draft is less than any of the various seasonal drafts permitted by the regulations in this part, the center of the diamond shall be located on the line of this restricted draft and it shall be applicable to all seasons. If such a permissible maximum draft comes between the seasonal markings, the seasonal markings below shall also be added.

§ 45.05–20 *Mark of assigning authority.* (a) The authority by whom the load lines are assigned may be indicated by letters measuring about 4½ by 3 inches marked alongside the diamond and above the center line.

§ 45.05–25 *Details of marking.* (a) The diamond, lines, and letters are to be painted, in white or yellow on a dark ground or in black on a light ground. They are also to be carefully cut in or center punched on the sides of iron and steel vessels, and on wood vessels they are to be cut into the planking for at least one eighth of an inch. The marks are to be plainly visible, and if necessary special arrangements are to be made for this purpose.

§ 45.05–30 *Verification of marks.* (a) The load line certificate is not to be delivered to the vessel until a surveyor of the assigning authority has certified that the marks are correctly and permanently indicated on the vessel's side.

SUBPART 45.10—CONDITIONS OF ASSIGNMENT OF LOAD LINES

§ 45.10–1 *Construction of vessel.* (a) The assignment of load lines is conditional upon the vessel being structurally efficient and upon the provision of effective protection to vessel and crew.

(b) Sections 45.10–1—45.10–100 apply to vessels to which minimum freeboards are assigned. In vessels to which greater freeboards than the minimum are assigned, the protection is to be relatively as effective.

(c) Passenger vessels—Subdivision and stability load lines: Where in passenger vessels the positions of the maximum load lines are determined by the application of subdivision and stability regulations as provided in Part 46 of this subchapter pertaining to passenger vessels on the Great Lakes, the provisions of the regulations in this part shall also be effective insofar as they are applicable.

§ 45.10–5 *Cargo and other hatchways not protected by superstructures.* (a) The construction and fittings of cargo and other hatchways in exposed positions on freeboard and superstructure decks are to be at least equivalent to the standards laid down in §§ 45.10–10—45.10–45.

§ 45.10–10 *Hatchway coamings.* (a) The minimum height of hatchway coamings on freeboard decks is to be at least 18 inches above the deck. The minimum height of coamings on superstructure decks is to be at least 18 inches above the deck if situated within a quarter of the vessel's length from the stem, and at least 12 inches if situated elsewhere.

§ 45.10–15 *Hatchway covers.* (a) On bulk freighters over 350 feet in length steel hatch covers are to be fitted to all exposed hatchways on the freeboard deck and they are to be of such thickness and provided with such stiffening as will enable them to be handled without deformation.

(b) Solid covers are to have stiffeners spaced not over 42 inches apart. The plating is to be not less than 0.24" at 24-inch spacing and 0.36" at 42-inch spacing with intermediate thicknesses at intermediate spacings. The stiffeners are not to be less effective than provided by angles, bulb angles or channels riveted or welded to the plate and having a section modulus in inches cubed not less than given by the formula:

$$I/y = S \times L^2 \times 0.025 \qquad (1)$$

where:

S = spacing of stiffeners in feet.
L = length in feet of the unsupported spans.
I = moment of inertia of the section.
y = distance from center of gravity of the section to the outermost strain fiber.

(c) Covers of the sliding plate type with flanges on one edge or with stiffeners riveted or welded to one edge shall have a sufficient number of sections so that when closed the spacing of the stiffeners does not exceed 42 inches. Plates are not to be less in thickness than required for solid steel covers in association with the spacing of the stiffeners when closed. The stiffening at the edge of the covers is not to be less effective than required above for solid covers. If hatch covers of the sliding plate type are used for spans exceeding 12'—1", additional support must be provided, the details of which will be specially considered.

(d) Where wood hatch covers are used they are to be made of long leaf yellow pine or fir and the finished thickness is not to be less than 2¼ inches in association with a span of 6 feet. The width of each bearing surface is to be at least 2½ inches.

§ 45.10–20 *Hatchway beams.* (a) Hatchways having wood covers are to be fitted with a system of main beams all extending in one direction or a system of main beams in association with auxiliary beams across the top of the main beams so arranged that the unsupported spans of the covers do not exceed 6 feet except where specially approved. The main beams may be of solid, rolled, or built shapes and the auxiliary beams may be either rolled shapes or timber of rectangular section. They are to have a section modulus in inches cubed of not less than given by the formula.

$$I/y = S \times L^2 \times C \qquad (1)$$

where:

S = the breadth of the area supported in feet.
L = the length of the unsupported spans in feet.
C = 0.03 for steel main beams where 18" coamings are required.
C = 0.025 for steel auxiliary beams where 18" coamings are required.
C = 0.025 for steel main beams where 12" coamings are required.
C = 0.02 for steel auxiliary beams where 12" coamings are required.
C = 0.15 for wood auxiliary beams where 18" coamings are required.
C = 0.12 for wood auxiliary beams where 12" coamings are required.
I = moment of inertia of the section.
y = distance from center of gravity of the section to the outermost strain fiber.

(b) Where rolled section beams are used the top flanges and the top angles in the case of built beams are to extend for the full length of the beams. Where wood auxiliary beams are used they are to be steel shod at all points where they bear on the main beams and at the ends.

§ 45.10–25 *Carriers or sockets.* (a) Carriers or sockets for hatchway beams and fore-and-afters are to be of steel at least one-half inch thick, and are to have a width of bearing surface of at least 3 inches.

§ 45.10–30 *Cleats and fasteners.* (a) Strong cleats at least 2½ inches wide or efficient clamping devices are to be fitted at intervals of approximately 2 feet from center to center; the end cleats are to be placed not more than 6 inches from each corner of the hatchway. Where steel sliding covers are fitted, patent fasteners of the "Mulholland type" or equal, spaced to suit the width of covers, may be used in place of cleats and wedges.

§ 45.10–35 *Battens and wedges.* (a) Battens, wedges, or tarpaulin securing devices are to be efficient and in good condition.

§ 45.10–40 *Tarpaulins.* (a) At least one tarpaulin in good condition, thoroughly waterproofed and of ample strength, is to be provided for each hatchway in an exposed position on freeboard and superstructure decks. The material is to be guaranteed free from jute, and shall not be less than No. 4 cotton canvas or equal before waterproofing.

§ 45.10–45 *Security of hatchway covers.* (a) At all hatchways in exposed positions on freeboard or superstructure decks suitable provision is to be made for securing the covers after the tarpaulins are battened down.

§ 45.10–50 *Cargo and other hatchways in the freeboard deck within superstructures which are fitted with closing appliances less efficient than class 1.* (a) The construction and fitting of such hatchways are to be at least equivalent to the standards laid down in § 45.10–55 (a).

§ 45.10–55 *Hatchway coamings and closing arrangements.* (a) Cargo, coaling, and other hatchways in the freeboard deck within superstructures which are fitted with class 2 closing appliances are to have coamings at least 9 inches in height and closing arrangements as effective as those required for exposed cargo hatchways.

(b) Where the closing appliances are less efficient than class 2, the hatchways are to have coamings at least 12 inches in height and are to have fittings and closing arrangements as effective as those required for exposed cargo hatchways.

(c) In the case of car ferries fitted with efficient "sea gates" extending above the freeboard deck at least to the height of a standard superstructure, coamings of less height may be fitted provided the hatches within superstructures are fitted with close fitting steel covers with efficient securing devices. When the openings in freeboard decks are not provided with closing devices the coamings are to extend above the freeboard deck at least to the height of a standard superstructure.

CROSS REFERENCE: For class 2 closing appliances, see § 45.15–40.

§ 45.10–57 *Machinery space openings in exposed positions on freeboard and raised quarter-decks.* (a) Such openings are to be properly framed and efficiently inclosed by steel casings of ample strength, and where the casings are not protected by other structures their strength is to be specially considered; doors in such casings are to be of steel, efficiently stiffened, permanently attached, and capable of being closed and secured from both sides. The sills of openings are to be at least 18 inches above the freeboard deck and 12 inches on a raised quarter-deck.

(b) Fiddley, funnel, and ventilator coamings are to be as high above the deck as is reasonable and practicable. Fiddley openings are to have strong steel covers permanently attached in their proper positions. Engine room skylights are to be of strong construction, preferably of steel.

§ 45.10–60 *Machinery space openings in exposed positions on superstructure decks other than raised quarter-decks.* (a) Such openings are to be properly framed and efficiently inclosed by strong steel casings. Doors in such cases are to be strongly constructed, permanently attached, and capable of being closed and secured from both sides. The sills of the openings are to be at least 9 inches above superstructure decks.

(b) Fiddley, funnel, and ventilator coamings are to be as high above the deck as is reasonable and practicable. Fiddley openings are to have strong steel covers permanently attached in their proper positions. Where the fiddley openings are more than 15 feet in height above the freeboard deck, covers need not be provided.

(c) Engine room skylights are to be of strong construction, preferably of steel.

§ 45.10–65 *Machinery space openings in the freeboard deck within superstructures which are fitted with closing appliances less efficient than class 1.* (a) Such openings are to be properly framed and efficiently inclosed by steel casings. Doors in such casings are to be strongly constructed, permanently attached, and capable of being securely closed. The sills of the openings are to be at least 6 inches above the deck where the superstructures are closed by class 2 closing appliances, and at least 12 inches above the deck where the closing appliances are less efficient than class 2.

CROSS REFERENCE: For class 2 closing appliances, see § 45.15–40.

§ 45.10–67 *Flush scuttles.* (a) Flush scuttles, where fitted, are to be of iron or steel, of substantial construction, with screw or bayonet joints.

§ 45.10–70 *Companionways.* (a) Companionways in exposed positions on freeboard decks and on decks of inclosed superstructures are to be of substantial construction. The sills of the doorways are to be 18 inches on freeboard decks and on superstructure decks within a quarter of the vessel's length from the stem and 12 inches on superstructure decks elsewhere. The doors are to be strongly constructed and capable of being closed and secured from both sides. Where the companionway is situated within a quarter of the vessel's length from the stem, it is to be of steel and riveted to the deck plating.

§ 45.10–75 *Ventilators in exposed positions on freeboard and superstructure decks.* (a) Such ventilators to spaces below freeboard decks or decks of superstructures which are intact or fitted with class 1 closing appliances are to have coamings of steel, substantially constructed, and efficiently connected to the deck. The deck plating at the base of the coamings is to be efficiently stiffened between the deck beams. The openings of ventilator coamings are to be provided with efficient closing arrangements.

(b) Where such ventilators are situated on the freeboard deck, or on the superstructure deck within a quarter of the vessel's length from the stem, and the closing arrangements are of a temporary character, the coamings are to be at least 30 inches in height; in other exposed positions on the superstructure deck they are to be at least 24 inches in height. Where the coaming of any ventilator exceeds 36 inches in height, it is to be specially supported and secured.

§ 45.10–77 *Air pipes.* (a) Where the air pipes to ballast and other tanks extend above the freeboard or superstructure decks, the exposed parts of the pipes are to be of substantial construction; the height from the deck to the opening is to be, when practical, at least 30 inches in wells on freeboard decks, 24 inches on raised quarter-decks, and 12 inches on other superstructure decks. Satisfactory means are to be provided for closing the openings of the air pipes. Where these heights may interfere with the working of the vessel a lower height may be approved provided the air pipe cap is properly protected and the air pipe is fitted with adequate means of closing.

§ 45.10–80 *Gangway, cargo, and coaling ports, etc.* (a) Openings in the sides of vessels below the freeboard deck are to be fitted with watertight doors or covers, which, with their securing appliances, are to be of sufficient strength.

§ 45.10–85 *Scuppers and sanitary discharge pipes.* (a) Discharges from scuppers and sanitary pipes led through the vessel's sides from spaces below the freeboard deck are to be fitted with efficient and accessible means for preventing water from passing inboard. Each separate discharge may have an automatic nonreturn valve with a positive means of closing it from a readily accessible position above the freeboard deck, or two automatic nonreturn valves without positive means of closing, provided the upper valve is situated so that it is always accessible for examination under service conditions. The positive-action valve is to be accessible and is to be provided with means for showing whether the valve is opened or closed.

(b) Conditional upon the type and the location of the inboard ends of such openings, similar provisions may be prescribed by the assigning authority as to discharge from spaces within inclosed superstructures.

(c) Where scuppers are fitted in superstructures not fitted with class 1 closing appliances they are to have efficient means for preventing the accidental admission of water below the freeboard deck.

§ 45.10–87 *Air ports.* (a) Air ports to spaces below the freeboard deck or to spaces below the superstructure deck of superstructures, closed by class 1 or class 2 closing appliances, are to be fitted with efficient inside deadlights permanently attached in their proper positions so that they can be effectively closed and secured watertight. Where, however, such spaces in superstructures are appropriated to passengers other than steerage passengers or to crew, the air ports may have portable deadlights stowed adjacent to the air ports, provided they are readily accessible at all times on service.

(b) The air ports and deadlights are to be of substantial and approved construction.

CROSS REFERENCE: For class 1 and class 2 closing appliances, see §§ 45.15–37, 45.15–40.

§ 45.10–90 *Guard rails.* (a) Efficient guard rails or bulwarks are to be fitted on all exposed portions of freeboard and superstructure decks.

§ 45.10–95 *Freeing ports.* (a) Where bulwarks on the weather portions of freeboard or superstructure decks form "wells" ample provision is to be made for rapidly freeing the decks of water and for draining them. The minimum freeing port area on each side of the vessel for each well on the freeboard deck and on the raised quarter-deck is to be that given by the following scale: The minimum area for each well on any other superstructure deck is to be one-half the area given by the scale. Where the length of the well exceeds .7L, the scale may be modified.

TABLE 45.10–95 (a)—SCALE OF FREEING PORT AREA

Length of bulwarks in "well" in feet	Freeing port area on each side in square feet	Length of bulwarks in "well" in feet	Freeing port area on each side in square feet
15	8.0	45	11.0
20	8.5	50	11.5
25	9.0	55	12.0
30	9.5	60	12.5
35	10.0	65	13.0
40	10.5	Above 65	(1)

[1] 1 square foot for each additional 5 feet length of bulwark.

(b) The lower edges of the freeing ports are to be as near the deck as practicable and preferably not higher than the upper edge of the gunwale bar. Two thirds of the freeing port area required is to be provided in the midship half of the well. In vessels with less than the standard sheer the freeing port area is to be suitably increased.

(c) All such openings in the bulwarks are to be protected by rails or bars spaced about 9 inches apart. If shutters are fitted to freeing ports, ample clearance is to be provided to prevent jamming. Hinges are to have brass pins.

§ 45.10–100 *Protection of crew.* Gangways, life lines, or other satisfactory means are to be provided for the protection of the crew in getting to and from their quarters.

SUBPART 45.15—LOAD LINES FOR STEAMERS [1]

§ 45.15–1 *Length* (L). (a) The length used with the rules and the freeboard tables is the length in feet on the summer load water line from the foreside of the stem to the afterside of the rudder post. Where there is no rudder post, the length is measured from the foreside of the stem to the axis of the rudder stock. For vessels with cruiser sterns, the length is to be taken as 96 percent of the total length on the designed summer load water line or as the length from the foreside of the stem to the axis of the rudder stock if that be the greater.

§ 45.15–5 *Breadth* (B). (a) The breadth is the maximum breadth in feet amidships to the molded line of the frame in iron or steel vessels and to the outside of the planking in wood or composite vessels.

§ 45.15–7 *Molded depth.* (a) The molded depth is the vertical distance in feet, measured amidships, from the top of the keel to the top of the freeboard deck beam at side. In wood and composite vessels the distance is measured from the lower edge of the keel rabbet. Where the form at the lower part of the midship section is of a hollow character, or where thick garboards are fitted, the depth is measured from the point where the line of the flat of the bottom continued inwards cuts the side of the keel.

§ 45.15–10 *Depth for freeboard* (D). (a) The depth used with the freeboard table is the molded depth plus the thickness of stringer plate, or plus

$$\frac{T(L-S)}{L} \qquad (1)$$

if that be greater, where

T is the mean thickness of the exposed deck clear of deck openings, and

S is the total length of superstructures as defined in § 45.15–60.

(b) Where the topsides are of unusual form, D is the depth of a midship section having vertical topsides, standard round of beam and area of topside section equal to that in the actual midship section. Where there is a step or break in the topsides (that is, as in the turret-deck vessel) 70 percent of the area above the step or break is included in the area used to determine the equivalent section.

(c) In a vessel without an enclosed superstructure covering at least 0.6L amidships, without a complete trunk or without a combination of intact partial superstructures and trunk extending all fore and aft, the depth to be used with the freeboard table is not to be less than L/15 in vessels below 350 feet in length, nor less than those tabulated below for lengths above 350 feet (minimum depths at intermediate lengths are obtained by interpolation).

TABLE 45.15–10 (a)—FREEBOARD TABLE

L	Minimum depth	L	Minimum depth	L	Minimum depth
350	23.35	450	27.65	550	30.20
375	24.70	475	28.40	575	30.70
400	25.80	500	29.05	600	31.15
425	26.80	525	29.65	625	31.60

[1] The provisions of §§ 45.01–1–45.01–90, inclusive, and §§ 45.05–1–45.10–100, inclusive, apply to all vessels having Great Lakes load lines and, for steamers, are supplemented by §§ 45.15–1–45.15–97, inclusive. Tankers having Great Lakes load lines are also subject to these requirements except as specifically modified in §§ 45.20–1–45.20–70, inclusive.

§ 45.15–15 *Coefficient of fineness (c).* (a) The coefficient of fineness used with the freeboard table is given by

$$c=\frac{\Delta}{L.B.d_1} \quad (1)$$

Where Δ is the volume in cubic feet of the vessel's molded displacement excluding bossing at a mean molded draft d_1 which is 85 percent of the molded depth. The coefficient c is not to be taken as less than 0.68, nor more than 0.86.

§ 45.15–17 *Strength.* (a) The assigning authority is to be satisfied with the structural strength of vessels to which freeboards are assigned.

(b) Vessels which comply with the highest standard of the rules of a classification society recognized by the Commandant, U. S. Coast Guard, shall be regarded as having sufficient strength for the minimum freeboards allowed under Commandant, U. S. Coast Guard, in this part.

(c) Vessels which do not comply with the highest standard of the rules of a classification society recognized by the Commandant, U. S. Coast Guard, shall be assigned such increased freeboards as shall be determined by the assigning authority, and for guidance the following strength moduli are formulated:

(1) *Material.* The strength moduli are based on the assumption that the structure is built of mild steel, manufactured by the open-hearth process (acid or basic), and having a tensile strength of 60,000 to 72,000 pounds per square inch, and a minimum elongation on a length of 8 inches of at least

$$\frac{1{,}500{,}000}{\text{Tensile strength}}.$$

(2) *Strength deck.* The strength deck is the uppermost deck which is incorporated into and forms an integral part of the longitudinal girder within the half-length amidships.

(3) *Depth to strength deck (Ds).* The depth to strength deck is the vertical distance in feet amidships from the top of the keel to the top of the strength deck beam at side.

(4) *Draft (d).* The draft is the vertical distance in feet amidships from the top of the keel to the center of the diamond.

(5) *Longitudinal modulus.* The longitudinal modulus $\frac{I}{y}$ is the moment of inertia I of the midship section about the neutral axis divided by the distance y measured from the neutral axis to the top of the strength deck beam at side, calculated in way of openings but without deductions for rivet holes. Areas are measured in square inches and distances in feet.

(i) Below the strength deck, all continuous longitudinal members other than such parts of underdeck girders as are required entirely for supporting purposes are included. Above the strength deck, the gunwale-angle bar and the extension of the sheerstrake are the only members included.

(ii) The required longitudinal modulus for effective material is expressed by f. d. B., where f is the factor obtained from the Table 45.15–17 (c) (5) (ii).

TABLE 45.15–17 (c) (5) (ii)

L	f	L	f	L	
100	1.70	280	5.70	460	11.10
120	1.95	300	6.30	480	11.70
140	2.20	320	6.90	500	12.30
160	2.50	340	7.50	520	12.90
180	2.90	360	8.10	540	13.50
200	3.40	380	8.70	560	14.10
220	3.90	400	9.30	580	14.70
240	4.50	420	9.90	600	15.30
260	5.10	440	10.50	620	15.90

(iii) For intermediate lengths, the value of f is determined by interpolation.

(iv) This formula applies where the ratio $\frac{L}{D_s}$ does not exceed 13.5 in vessels of 325 feet length and under and 19 in vessels of 600 feet length and above. Intermediate values between lengths of 325 feet and 600 feet length are to be obtained by interpolation.

(6) *Frame.* For the purpose of the frame modulus, the frame is regarded as composed of a frame angle and a reverse angle each of the same size and thickness.

(7) *Frame modulus.* The modulus $\frac{I}{y}$ of the midship frame below the lowest tier of beams is the moment of inertia I of the frame section about the neutral axis divided by the distance y measured from the neutral axis to the extremity of the frame section, calculated without deduction for rivet and bolt holes. The modulus is measured in inch units.

The required frame modulus is expressed by

$$\frac{s\,(d-t)\,(f_1+f_2)}{1{,}000} \quad (2)$$

where:

s is the frame spacing in inches.

t is the vertical distance in feet measured at amidships from the top of the keel to a point midway between the top of the inner bottom at side and the top of the heel bracket (see fig. 45.15–17 (c) (7) (i)); where there is no double bottom, t is measured to a point midway between the top of the floor at center and the top of the floor at the side.

f_1 is a coefficient depending on H, which, in vessels fitted with double bottoms, is the vertical distance in feet from the middle of the beam bracket of the lowest tier of beams at side to a point midway between the top of the inner bottom at side and the top of the heel bracket (see fig. 45.15–17 (c) (7) (i)); where there is no double bottom, H is measured to a point midway between the top of the floor at center and the top of the floor at side. Where the frame obtains additional strength from the form of the vessel, due allowance is made in the value of f_1.

f_2 is a coefficient depending on K which is the vertical distance in feet from the top of the lowest tier of beams at side to a point 7 feet, 6 inches above the freeboard deck at side, or, if there is a superstructure, to a point 12 feet 6 inches above the freeboard deck at side. (See fig. 45.15–17 (c) (7) (i).) The values of f_1 and f_2 are obtained from Table 45.15–17 (c) (7) (i).

TABLE 45.15–17 (c) (7) (i)

H in feet	0	7.0	9.0	11.0	13.0	15.0	17.0	19.0	21.0	23.0	25.0
f_1	9	11.0	12.5	15.0	19.0	24.0	29.5	36.0	43.0	51.0	59.0
K in feet	0	5.0	10.0	15.0	20.0	25.0	30.0	35.0	40.0	.....	.....
f_2	0	.5	1.0	2.0	3.0	4.5	6.5	9.0	12.0	.....	.....

NOTE: Intermediate values are obtained by interpolation.

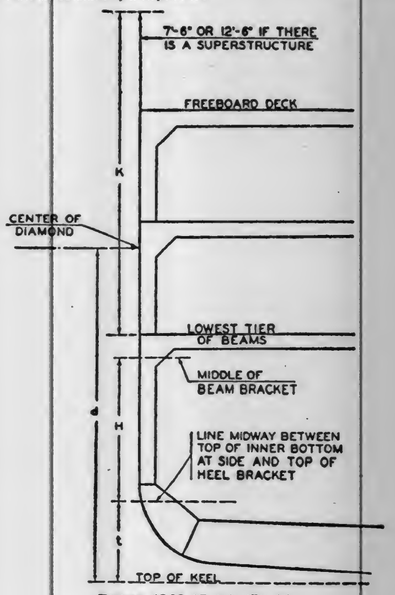

FIGURE 45.15–17 (c) (7) (i)

(ii) This formula applies where D is between 15 feet and 60 feet, both inclusive;

B is between $\frac{L}{10}+5$ and $\frac{L}{10}+20$, both inclusive;

$\frac{L}{D_s}$ is between 10 and 13.5, both inclusive; and the horizontal distance from the outside of the frame to the center of the first row of pillars does not exceed 20 feet.

(iii) In single-deck vessels of ordinary form, where H does not exceed 18 feet, the frame modulus determined by the preceding method is multiplied by the factor f_3 where

$$f_3=0.50+0.05\ (H-8)$$

(iv) Where the horizontal distance from the outside of the frame to the center of the first row of pillars exceeds 20 feet, the assigning authority is to be satisfied that sufficient additional strength is provided.

§ 45.15–20 *Height of superstructure.* (a) The height of a superstructure is the least vertical height measured from the top of the superstructure deck to the top of the freeboard deck beams minus the difference between D and the molded depth. (See §§ 45.15–7, 45.15–10.)

§ 45.15–25 *Standard height of superstructure.* (a) The standard height of a raised quarter-deck is 3 feet for vessels up to and including 100 feet in length, 4 feet for vessels 250 feet in length, and 6 feet for vessels 400 feet in length and above. The standard height of any other superstructure is 6 feet for vessels up to and including 250 feet in length and 7 feet 6 inches for vessels 400 feet in length and above. The standard height at intermediate lengths is obtained by interpolation.

§ 45.15–27 *Length of superstructure (S).* (a) The length of a superstructure is the mean covered length of the parts of the superstructure which extend to the sides of the vessel and lie within lines drawn perpendicular to the extremities of the summer load water line, as defined in § 45.15–1.

§ 45.15–30 *Inclosed superstructure.* (a) A detached superstructure is regarded as inclosed only where:

(1) The inclosing bulkheads are of efficient construction. (See § 45.15–35.)

(2) The access openings in these bulkheads are fitted with class 1 or class 2 closing appliances. (See §§ 45.15–37, 45.15–40.)

(3) All other openings in sides or ends of the superstructure are fitted with efficient weather-tight means of closing.

(4) Independent means of access to crew, machinery, bunker, and other working spaces within bridges and poops are at all times available when the bulkhead openings are closed.

§ 45.15–35 *Superstructure bulkheads.* (a) Bulkheads at exposed ends of poops, bridges, and forecastles are deemed to be of efficient construction where the assigning authority is satisfied that, in the circumstances, they are equivalent to the following standard for vessels with minimum freeboards under which standard the stiffeners and plating are of the scantlings given in Table 45.15–35 (a), the stiffeners are spaced 30 inches apart, the stiffeners on poop and bridge front bulkheads have efficient end connections, and those on after bulkheads of bridges and forecastles extend for the whole distance between the margin angles of the bulkheads.

TABLE 45.15–35 (a).—EXPOSED BULKHEADS OF SUPERSTRUCTURES OF STANDARD HEIGHT [1]

Bridge front bulkheads, unprotected bulkheads of poops 0.4 L or more in length		Bulkheads of poops partially protected or less in length than 0.4 L		After bulkheads of bridges and forecastles	
Length of vessel (feet)	Bulb angle stiffeners (inches)	Length of vessel (feet)	Plain angle stiffeners (inches)	Length of vessel (feet)	Plain angle stiffeners (inches)
Under 160	5½ x 3 x 0.32.	Under 150	3 x 2½ x 5/16.	Under 150	2½ x 2½ x 1/4.
160	6 x 3 x 0.34.	150	3½ x 2½ x 5/16.	150	3½ x 2½ x 1/4.
200	7 x 3 x 0.32.	200	4 x 3 x 5/16.	250	3½ x 3 x 5/16.
240	7 x 3 x 0.38.	250	5 x 3 x 5/16.	350 and above	4 x 3 x 5/16.
280	7 x 3 x 0.44.	300	5 x 3 x 3/8.		
320	8 x 3 x 0.40.	350	6 x 3½ x 3/8.		
360	8 x 3 x 0.46.	400	6 x 3½ x 7/16.		
400	9 x 3½ x 0.38.	450	7 x 3½ x 7/16.		
440	9 x 3½ x 0.50.	500 and above	7 x 3½ x ½.		
480	10 x 3½ x 0.40.				
520	10 x 3½ x 0.52.				
560 and above	10 x 3½ x 0.64.				

Length of vessel (feet)	Bulkhead plating (inch)	Length of vessel (feet)	Bulkhead plating (inch)	Length of vessel (feet)	Bulkhead plating (inch)
200 and under	0.3	160 and under	0.24	160 and under	0.29
380 and above	0.44	400 and above	0.38	400 and above	0.30

[1] For vessels intermediate in length the thickness of bulkhead plating is obtained by interpolation.

§ 45.15–37 *Class 1 closing appliances.* (a) These appliances are of iron or steel, are in all cases to be permanently and strongly attached to the bulkhead, are framed, stiffened, and fitted so that the whole structure is of equivalent strength to the unpierced bulkhead, and are weather tight when closed. The means for securing these appliances are permanently attached to the bulkhead or to the appliances and the latter are so arranged that they can be closed and secured from both sides of the bulkhead or from the deck above. The sills of the access openings are at least 12 inches above the deck.

§ 45.15–40 *Class 2 closing appliances.* (a) These appliances are (1) strongly framed hardwood hinged doors, which are not more than 30 inches wide nor less than 2 inches thick, or (2) shifting boards fitted for the full height of the opening in channels riveted to the bulkhead, the shifting boards being at least 2 inches thick where the width of opening is 30 inches or less, and increased in thickness at the rate of 1 inch for each additional 15 inches of width, or (3) portable plates of equal efficiency.

§ 45.15–45 *Temporary closing appliances.* (a) Temporary closing appliances for middle line openings in the deck of an inclosed superstructure consists of: (1) a steel coaming not less than 9 inches in height efficiently rivited to the deck; (2) hatchway covers as required by § 45.10–15, secured by hemp lashings; and (3) hatchway supports as required by §§ 45.10–20, 45.10–25.

§ 45.15–47 *Superstructures, general.* (a) Where exposed bulkheads at the ends of poops, bridges, and forecastles are not of efficient construction (see § 45.15–35), they are considered as nonexistent.

(b) Where in the side plating of a superstructure there is an opening not provided with permanent means of closing, the part of the superstructure in way of the opening is regarded as having no effective length.

(c) Where the height of a superstructure is less than the standard its length is reduced in the ratio of the actual to the standard height. Where the height exceeds the standard, no increase is made in the length of the superstructure.

§ 45.15–50 *Poop.* (a) Where there is an efficient bulkhead and the access openings are fitted with class 1 closing appliances, the length to the bulkhead is effective. Where the access openings in an efficient bulkhead are fitted with class 2 closing appliances and the length to the bulkhead is 0.5 L or less, 100 percent of that length is effective; where the length is 0.7 L or more, 90 percent of that length is effective; where the length is between 0.5 L and 0.7 L, an intermediate percentage of that length is effective; where an allowance is given for an efficient adjacent trunk (see § 45.15–65), 90 percent of the length to the bulkhead is to be taken as effective; 50 percent of the length of an open poop or of an open extension beyond an efficient bulkhead is effective.

CROSS REFERENCE: For class 2 closing appliances, see § 45.15–40.

§ 45.15–55 *Raised quarter deck.* (a) Where there is an efficient intact bulkhead, the length to the bulkhead is effective. Where the bulkhead is not intact, the superstructure is considered as a poop of less than standard height.

§ 45.15–57 *Bridge.* (a) Where there is an efficient bulkhead at each end, and the access openings in the bulkheads are fitted with class 1 closing appliances, the length between the bulkheads is effective.

(b) Where the access openings in the forward bulkhead are fitted with class 1 closing appliances and the access openings in the after bulkhead with class 2 closing appliances, the length between

the bulkheads is effective; where an allowance is given for an efficient trunk, adjacent to the after bulkhead (see § 45.15–65), 90 percent of the length is effective. Where the access openings in both bulkheads are fitted with class 2 closing appliances, 90 percent of the length between the bulkheads is effective. Where the access openings in the forward bulkhead are fitted with class 1 or class 2 closing appliances and the access openings in the after bulkhead have no closing appliances, 75 percent of the length between the bulkheads is effective. Where the access openings in both bulkheads have no closing appliances, 50 percent of the length is effective; 75 percent of the length of an open extension beyond the after bulkhead and 50 percent of that beyond the forward bulkhead are effective.

CROSS REFERENCE: For class 1 and class 2 closing appliances, see §§ 45.15–37, 45.15–40.

§ 45.15–60 *Forecastle.* (a) Where there is an efficient bulkhead and the access openings are fitted with class 1 or class 2 closing appliances, the length to the bulkhead is effective. Where no closing appliances are fitted and the sheer forward of amidships is not less than the standard sheer, 100 percent of the length of the forecastle forward of 0.1 *L* from the forward perpendicular is effective; where the sheer forward is half the standard sheer or less, 50 percent of that length is effective; and where the sheer forward is intermediate between the standard and half the standard sheer, an intermediate percentage of that length is effective; 50 percent of the length of an open extension beyond the bulkhead or beyond 0.1 *L* from the forward perpendicular is effective.

CROSS REFERENCE: For class 1 and 2 closing appliances, see §§ 45.15–37, 45.15–40.

§ 45.15–65 *Trunk.* (a) A trunk or similar structure which does not extend to the sides of the vessel is regarded as efficient, *Provided*, That:

(1) The trunk is at least as strong as a superstructure;

(2) The hatchways are in the trunk deck, and comply with the requirements of §§ 45.10–1—45.10–45, and the width of the trunk deck stringer provides a satisfactory gangway and sufficient lateral stiffness;

(3) A permanent working platform fore and aft fitted with guard rails is provided by the trunk deck, or by detached trunks connected to other superstructures by efficient permanent gangways. On tank barges an efficient life line may be accepted in lieu of guard rails;

(4) Ventilators are protected by the trunk, by watertight covers, or by equivalent means;

(5) Open rails are fitted on the weather portions of the freeboard deck in way of the trunk for at least half their length;

(6) The machinery casings are protected by the trunk, by a superstructure of standard height, or by a deck house of the same height and of equivalent strength.

(b) Where access openings in poop and bridge bulkheads are fitted with class 1 closing appliances, 100 percent of the length of an efficient trunk reduced in the ratio of its mean breadth to *B* is added to the effective length of the superstructures. Where the access openings in these bulkheads are not fitted with class 1 closing appliances 90 percent is added.

(c) The standard height of a trunk is the standard height of a bridge.

(d) Where the height of the trunk is less than the standard height of a bridge, the addition is reduced in the ratio of the actual to the standard height; where the height of hatchway coamings on the trunk deck is less than the standard height of coamings (see § 45.15–10), a reduction from the actual height of trunk is to be made which corresponds to the difference between the actual and the standard height of coamings.

§ 45.15–67 *Inclosed superstructure with middle line openings in the deck not provided with permanent means of closing.* (a) Where there is an inclosed superstructure with one or more middle line openings in the deck not provided with permanent means of closing (see §§ 45.10–1—45.10–45), the effective length of the superstructure is determined as follows:

(1) Where efficient temporary closing appliances are not provided for the middle line deck openings (see §§ 45.15–45), or the breadth of opening is 80 percent or more of the breadth B_1 of the superstructure deck at the middle of the opening, the vessel is considered as having an open well in way of each opening, and freeing ports are to be provided in way of this well. The effective length of superstructure between openings is governed by §§ 45.15–50, 45.15–57, 45.15–60.

(2) Where efficient temporary closing appliances are provided for middle line deck openings and the breadth of opening is less than 0.8 B_1, the effective length is governed by §§ 45.15–50, 45.15–57, 45.15–60, except that where access openings in 'tween deck bulkheads are closed by class 2 closing appliances, they are regarded as being closed by class 1 closing appliances in determining the effective length. The total effective length is obtained by adding to the length determined by subparagraph (a) (1) of this section the difference between this length and the length of the vessel modified in the ratio of

$$\frac{B_1-b}{B_1}$$ where b=breadth of deck opening

where

$$\frac{B_1-b}{B_1}$$ is greater than 0.5 it is taken as 0.5.

§ 45.15–70 *Deductions for superstructures.* (a) Where the effective length of superstructures is 1.0 *L*, the deduction from the freeboard is 14 inches at 80 feet length of vessel, 34 inches at 280 feet length, and 42 inches at 400 feet length and above; deductions at intermediate lengths are obtained by interpolation. Where the total effective length of superstructures is less than 1.0 *L*, the deduction is a percentage obtained from Table 45.15–70 (a).

TABLE 45.15–70 (a)—TOTAL EFFECTIVE LENGTH OF SUPERSTRUCTURE (E)

Superstructure	0	0.1*L*	0.2*L*	0.3*L*	0.4*L*	0.5*L*	Line
	Per-cent	*Per-cent*	*Per-cent*	*Per-cent*	*Per-cent*	*Per-cent*	
All types with forecastle and without detached bridge	0	5	10	15	23.5	32	A
All types with forecastle and detached bridge [1]	0	6.3	12.7	19	27.5	36	B

Superstructures	0.6*L*	0.7*L*	0.8*L*	0.9*L*	1.0*L*	Line
	Per-cent	*Per-cent*	*Per-cent*	*Per-cent*	*Per-cent*	
All types with forecastle and without detached bridge	46	63	75.3	87.7	100	A
All types with forecastle and detached bridge [1]	46	63	75.3	87.7	100	B

[1] Where the effective length of a detached bridge is less than 0.2*L* the percentages are obtained by interpolation between lines B and A. Where no forecastle is fitted the above percentages are reduced by 5. Percentages for intermediate lengths of superstructures are obtained by interpolation.

§ 45.15–73 *Sheer, general.* (a) The sheer is measured from the deck at side to a line of reference drawn parallel to the keel through the sheer line at amidships.

(b) In vessels designed to trim by the stern in service, the sheer may be measured in relation to the load line, provided an additional mark is placed at 0.25*L* forward of amidships to indicate the assigned load line. This mark is to be similar to the load line diamond amidships.

(c) In flush deck vessels and in vessels with detached superstructures the sheer is meaured at the freeboard deck.

(d) In vessels with topsides of unusual form in which there is a step or break in the topsides, the sheer is considered in relation to the equivalent depth amidships (see § 45.15–10).

(e) In vessels with a superstructure of standard height which extends over the whole length of the freeboard deck, the sheer is measured at the superstructure deck; where the height exceeds the standard, the sheer may be considered in relation to the standard height.

(f) Where a superstructure is intact or access openings in its inclosing bulkheads are fitted with class 1 closing appliances, and the superstructure deck has at least the same sheer as the exposed freeboard deck, the sheer of the enclosed portion of the freeboard deck is not taken into account.

CROSS REFERENCE: For class 1 closing appliances, see § 45.15–37.

§ 45.15–75 *Standard sheer profile.* (a) The ordinates (in inches) of the standard sheer profile are given in Table 45.15–75

(a) where *L* is the number of feet in the length of the vessel.

TABLE 45.15–75 (a)

Station [1]	Ordinate	Factor
A. P.	0.1 *L*+10	1
1/6L from A. P.	0.0445 *L*+4.45	4
1/3L from A. P.	0.011 *L*+1.1	2
Amidships	+0	4
1/3L from F. P.	0.022 *L*+2.2	2
1/6L from F. P.	0.089 *L*+8.9	4
F. P.	0.2 *L*+20	1

[1] A. P.=After end of summer load water line. F. P.=Fore end of summer load water line.

§ 45.15–77 *Measurement of variations from standard sheer profile.* (a) Where the sheer profile differs from the standard, the 7 ordinates of each profile are multiplied by the appropriate factors given in the table of ordinates. The difference between the sums of the respective products, divided by 18, measures the deficiency or excess of sheer. Where the after half of the sheer profile is greater than the standard and the forward half is less than the standard, no credit is allowed for the part in excess and the deficiency only is measured.

(b) Where the forward half of the sheer profile exceeds the standard, and the after portion of the sheer profile is not less than 75 percent of the standard, credit is allowed for the part in excess; where the after part is less than 50 percent of the standard no credit is given for the excess sheer forward. Where the after sheer is between 50 percent and 75 percent of the standard, intermediate allowances may be granted for excess sheer forward.

§ 45.15–80 *Correction for variations from standard sheer profile.* (a) The correction for sheer is the deficiency or excess of sheer (see § 45.15–77) multiplied by $0.75-\frac{S}{2L}$ where *S* is the total length of the superstructure, as defined in § 45.15–27.

§ 45.15–83 *Addition for deficiency in sheer.* (a) Where the sheer is less than the standard, the correction for deficiency in sheer (see § 45.15–80) is added to the freeboard.

§ 45.15–85 *Deduction for excess sheer.* (a) Where an enclosed superstructure covers 0.1*L* before and 0.1*L* abaft amidships, the correction for excess of sheer (see § 45.15–80) is deducted from the freeboard; in vessels with detached superstructures where no enclosed superstructure covers amidships, no deduction is made from the freeboard, where an enclosed superstructure covers less than 0.1*L* before and 0.1*L* abaft amidships, the deduction is obtained by interpolation. The maximum deduction for excess sheer is 1½ inches at 100 feet and increases at the rate of 1½ inches for each additional 100 feet in the length of the vessel.

§ 45.15–87 *Standard round of beam.* (a) The standard round of beam of the freeboard deck is one-fiftieth of the breadth of the vessel.

§ 45.15–90 *Round of beam correction.* (a) Where the round of beam of the freeboard deck is greater or less than the standard, the freeboard is decreased or increased respectively by one-fourth of the difference between the actual and the standard round of beam, multiplied by the proportion of the length of the freeboard deck not covered by enclosed superstructures. Twice the standard round of beam is the maximum for which allowance is given.

§ 45.15–93 *Summer freeboard.* (a) The minimum freeboard in summer is the freeboard derived from the freeboard table after corrections for departures from the standards and after deduction for superstructures. The freeboard measured from the intersection of the upper surface of the freeboard deck with the outer surface of the shell is not to be less than 2 inches.

§ 45.15–95 *Intermediate and winter freeboard.* (a) The minimum freeboards for the intermediate and winter seasons is obtained by an addition to the summer freeboard of a distance in inches obtained by multiplying the factors given in Table 45.15–95 (a) by the summer draft in feet measured from the top of the keel to the center of the diamond.

TABLE 45.15–95 (a)

Length between perpendiculars [1]	Factor for intermediate season	Factor for winter season
Under 400 feet	0.25	0.50
450 feet	.25	.65
500 feet	.35	.80
550 feet and above	.45	1.00

[1] Factors for intermediate lengths to be obtained by interpolation.

§ 45.15–97 *Freeboard table for steamers.* (a) Table 45.15–97 (a) gives the basic minimum summer freeboard for steamers which comply with the standards in this part.

TABLE 45.15–97 (a).—BASIC MINIMUM SUMMER FREEBOARD FOR STEAMERS

L (feet)	Freeboard	*L* (feet)	Freeboard	*L* (feet)	Freeboard
	Inches		*Inches*		*Inches*
80	7.2	270	33.8	460	84.5
90	8.0	280	35.8	470	87.5
100	8.9	290	37.8	480	90.5
110	9.9	300	40.0	490	93.4
120	11.0	310	42.2	500	96.3
130	12.1	320	44.6	510	99.1
140	13.3	330	47.0	520	101.9
150	14.5	340	49.5	530	104.7
160	15.7	350	52.1	540	107.4
170	17.1	360	54.8	550	110.0
180	18.5	370	57.6	560	112.6
190	19.9	380	60.5	570	115.1
200	21.4	390	63.4	580	117.6
210	23.0	400	66.4	590	120.0
220	24.6	410	69.4	600	122.3
230	26.3	420	72.4	610	124.5
240	28.1	430	75.4	620	126.7
250	29.9	440	78.5		
260	31.8	450	81.5		

(b) The freeboards at intermediate lengths are obtained by interpolation.

(c) Where *c* exceeds 0.68, the freeboard is multiplied by the factor

$$\frac{c+0.68}{1.36}$$

(d) Where *D exceeds or is less than* $\frac{L}{15}$ the freeboard is increased or decreased accordingly, by $\left(D-\frac{L}{15}\right)R$ inches, where *R* is $\frac{L}{130}$ at lengths less than 390 feet, and 3 at 390 feet length and above, except that the depth to be used in the above correction is not to be taken at less than $L/15$ in vessels below 350 feet in length, nor less than those given in Table 45.15–97 (d), for lengths 350 feet and above. Minimum depths at intermediate lengths are obtained by interpolation.

TABLE 45.15–97 (d)

L	Minimum depth	*L*	Minimum depth	*L*	Minimum depth
350	23.35	450	27.65	550	30.20
375	24.70	475	28.40	575	30.70
400	25.80	500	29.05	600	31.15
425	26.80	525	29.65	625	31.60

(1) *Provided, however*, a vessel with an enclosed superstructure covering at least 0.6 *L* amidships with a complete trunk or with a combination of intact partial superstructures and trunk which extends all fore and aft, where *D* is less than $L/15$, the freeboard is reduced at the above rate. Where the height of superstructures or trunk is less than the standard height, the reduction is in the ratio of the actual to the standard height.

(e) Where the actual depth to the surface of the freeboard deck amidships is greater or less than *D*, the difference between the depths (in inches) is added to or deducted from the freeboard.

SUBPART 45.20—LOAD LINES FOR TANKERS [1]

§ 45.20–1 *Definition.* (a) The term "tanker" includes all steamers specially constructed for the carriage of liquid cargoes in bulk.

§ 45.20–5 *Marks on sides.* (a) The marks on the tanker's sides are to be as shown by the figure in § 45.05–15.

§ 45.20–10 *Construction.* (a) The structure of the vessel is to be of sufficient strength for the increased draft corresponding to the freeboard assigned.

§ 45.20–15 *Forecastle.* (a) The vessel is to have a forecastle of which the length is not less than 7 percent of the length of the vessel and the height is not less than the standard height.

(b) A forecastle is not required in the case of self-propelled barges, tank barges, and cargo barges carrying cargo only on deck.

§ 45.20–20 *Machinery casings.* (a) The openings in machinery casings on the freeboard deck are to be fitted with steel doors. The casings are to be protected by an enclosed poop or bridge of at least standard height, or by a deck house of equal height and of equivalent strength. These conditions may be modified in the case of self-propelled barges. The bulkheads at the ends of these structures are to be of the scantlings required for bridge front bulkheads. All entrances to the structures from the freeboard deck are to be fitted with effective closing appliances, and the sills are to be at least 18 inches above the deck. Exposed machinery casings on the

[1] The provisions of §§ 45.01–1—45.01–90, inclusive, and §§ 45.05–1—45.15–97, inclusive, shall apply to Great Lakes tankers except as they are modified by §§ 45.20–1—45.20–70, inclusive.

superstructure deck are to be of substantial construction, and all openings in them are to be fitted with steel closing appliances permanently attached to the casings and capable of being closed and secured from both sides; the sills of such openings are to be at least 15 inches above the deck. Fiddley openings are to be as high above the superstructure deck as is reasonable and practicable and are to have strong steel covers permanently attached in their proper positions. Engine room skylights are to be of substantial construction, fitted with strong glass lights, which may be required to be fitted with steel covers depending on their height above the freeboard deck.

§ 45.20–25 *Gangway.* (a) An efficiently constructed permanent gangway of sufficient strength for its exposed position is to be fitted fore and aft at the level of the superstructure deck between the poop and midship bridge, and when crew are berthed forward from the bridge to the forecastle, or other equivalent means of access may be provided to carry out the purpose of the gangway, such as passage below deck.

(b) On towed tank barges a wire cable arranged and equipped to facilitate safe communication between both ends of the vessel at all times may be accepted in lieu of a permanent gangway.

§ 45.20–30 *Protection of crew, access to machinery space, etc.* (a) Safe and satisfactory access from the gangway level to the quarters of the crew, the machinery space, and all other parts used in the necessary work of the vessel is to be available at all times. This section does not apply to pump rooms entered from the freeboard deck, when fitted with class 1 closing appliances. Deck houses for the accommodation of the crew, pilothouses, etc., on the freeboard deck are to be of steel efficiently constructed and provided with port lights fitted with steel dead lights.

§ 45.20–35 *Hatchways.* (a) All hatchways on the freeboard deck and on the deck of expansion trunks are to be closed watertight by efficient steel covers.

§ 45.20–40 *Ventilators.* (a) Ventilators to spaces below the freeboard deck are to be of ample strength or are to be protected by superstructures or equally efficient means.

§ 45.20–45 *Freeing arrangements.* (a) Vessels with bulwarks are to have open rails fitted for at least half the length of the exposed portion of the weather deck or other effective freeing arrangements. The upper edge of the sheer strake is to be kept as low as practicable and preferably not higher than the upper edge of the gunwale bar.

(b) Where superstructures are connected by trunks, open rails are to be fitted for the whole length of the weather portions of the freeboard deck.

§ 45.20–50 *Plans.* (a) Plans showing proposed fittings and arrangements are to be submitted to the assigning authority for approval.

§ 45.20–55 *Computation of freeboard.* (a) When the assigning authority is satisfied that the foregoing requirements are fulfilled, the summer freeboard may be computed from the table for tankers; all corrections, except those for flush-deck steamers, detached superstructures, and excess sheer, are to be made in accordance with §§ 44.15–1—45.20–1.

§ 45.20–60 *Deductions for detached superstructures.* (a) When the total effective length of superstructure is less than 1.0 *L*, the deduction is a percentage of that for a superstructure of length 1.0 *L*, and is obtained from Table 45.20–60 (a).

TABLE 45.20–60 (a).—TOTAL EFFECTIVE LENGTH OF SUPERSTRUCTURES

	0	0.1*L*	0.2*L*	0.3*L*	0.4*L*	0.5*L*	0.6*L*	0.7*L*	0.8*L*	0.9*L*	1.0*L*
	Percent	*Percent*	*Percent*	*Percent*	*Percent*	*Percent*	*Percent*	*Percent*	*Percent*	*Percent*	*Percent*
All types	0	7	14	21	31	41	52	63	75.3	87.7	100

§ 45.20–65 *Deduction for excess sheer.* (a) Where the sheer is greater than the standard, the correction for excess sheer (see § 45.15–80) is deducted from the freeboard for all tankers. Section 45.15–85 does not apply except that the maximum deduction for excess sheer is 1½ inches at 100 feet and increases at the rate of 1½ inches for each additional 100 feet in the length of the vessel.

§ 45.20–70 *Freeboard table for tankers.* (a) Table 45.20–70 (a) gives the basic minimum summer freeboard for tankers which comply with the standards in this part.

TABLE 45.20–70 (a)—BASIC MINIMUM SUMMER FREEBOARD FOR TANKERS

L (feet)	Freeboard	*L* (feet)	Freeboard	*L* (feet)	Freeboard
	Inches		*Inches*		*Inches*
80	6.4	220	22.8	360	48.5
90	7.2	230	24.0	370	50.6
100	8.1	240	25.9	380	52.7
110	9.1	250	27.8	390	54.9
120	10.1	260	29.2	400	57.1
130	11.1	270	30.9	410	59.4
140	12.2	280	32.7	420	61.7
150	13.3	290	34.5	430	64.1
160	14.5	300	36.4	440	66.5
170	15.8	310	38.3	450	69.0
180	17.1	320	40.2	460	71.5
190	18.5	330	42.2	(1)	
200	19.9	340	44.3		
210	21.3	350	46.4		

[1] Tankers above 460 feet in length to be specially considered, and the assigned freeboards are to be approved by the Commandant, U. S. Coast Guard, before issuance of certificate.

§ 45.20–75 *Fees; travel expense*—(a) *Scale of fees.* Table 45.20–75 (a) gives the scale of maximum fees payable by owner for assignment of load line (including load line and condition survey, verification of markings, and issuance of load line certificate).

TABLE 45.20–75 (a).—SCALE OF MAXIMUM FEES

	Classed vessels	Unclassed vessels
Under 500 gross tons	$30.00	$90.00
500 and under 1,000 gross tons	35.00	105.00
1,000 and under 2,000 gross tons	40.00	125.00
2,000 and under 3,000 gross tons	50.00	150.00
3,000 and under 4,000 gross tons	60.00	175.00
4,000 and under 5,000 gross tons	70.00	200.00
5,000 and under 6,000 gross tons	80.00	220.00
6,000 and under 7,000 gross tons	90.00	240.00
7,000 and under 8,000 gross tons	100.00	260.00
8,000 and under 10,000 gross tons	110.00	280.00
10,000 and under 12,000 gross tons	120.00	300.00
12,000 gross tons and above	130.00	320.00

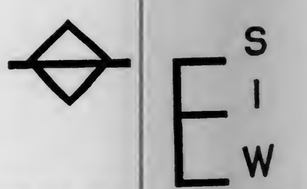
(b) *Fees for renewal of load line certificate.* The maximum fees for condition survey and renewal of load line certificate shall be 50 percent of the above scale. In the case of an American Bureau classed vessel no charge will be made for this survey if carried out in conjunction with a special periodical survey required for maintenance of class and for which a fee is chargeable.

(c) *Fee for annual load line inspection.* The fee for annual load line inspection shall be $25. In the case of a vessel classed by the American Bureau of Shipping, no charge will be made for this inspection if carried out at the same time as a survey to the hull that is required by the rules of the American Bureau of Shipping for maintenance of class and for which a fee is chargeable.

(d) *Traveling expenses.* All traveling expenses incurred in connection with the above surveys will be an additional charge.

§ 45.20–80 *Form of load line certificate.*

LOAD LINE CERTIFICATE FOR THE GREAT LAKES



[SEAL]

Issued under the authority of the Commandant, U. S. Coast Guard, United States of America, under the provisions of the act of August 27, 1935, as amended, to establish load lines for American merchant vessels of 150 gross tons or over engaged in trade on the Great Lakes of North America.

Ship ---------- Official No.----------
Port of registry----------
Gross tonnage----------

FREEBOARD FROM DECK LINE	LOAD LINE
Summer ----------	S ----------
Intermediate ----------	I ----------
Winter ----------	W ----------

The upper edge of the deck line from which these freeboards are measured is ---------- inches above the top of the ---------- deck at side.

This is to certify that this ship has been surveyed and the freeboards and load lines shown above have been found to be correctly marked upon the vessel in manner and location as provided by the load line regulations of the Commandant, U. S. Coast Guard, applicable to the Great Lakes.

This certificate[1] remains in force until ---------- Issued at ----------
on the ------ day of ---------- 19---.

(Here follows the signature, seal, if any, and the name of the authority issuing the certificate.)

NOTES: In accordance with the Great Lakes Load Line Regulations the diamond and lines must be permanently marked by center punch marks or cutting.

(On the reverse side of the load line certificate, or on a separate sheet attached and forming part of the certificate, provision is to be made for annual inspection and renewal indorsements.)

(Reverse side of certificate)

ANNUAL INSPECTIONS

I have surveyed this ship for the purpose of seeing whether this Certificate should remain in force and the Survey has been completed to my satisfaction.

Renewal of Load Line Certificate.

The provisions of the Great Lakes Load Line Regulations having been fully complied with by this vessel or when not fully complied with proper penalties to freeboard having been enforced, this certificate is renewed till—

Place ---------- Date ----------

(Signature and name of authority)

[1] Upon the expiration of the certificate, renewal must be obtained as provided by the Great Lakes Load Line Regulations and the certificate so endorsed.

PART 46—SUBDIVISION LOAD LINES FOR PASSENGER VESSELS

Part 46 is amended to read as follows:

SUBPART 46.01—AUTHORITY AND PURPOSE

Sec.
46.01–1 Purpose.
46.01–5 Authority.
46.01–10 Responsibility for administration.
46.01–15 Application of regulations.

SUBPART 46.05—DEFINITIONS USED IN THIS PART

46.05–1 Passenger vessel.
46.05–10 Foreign vessel.
46.05–15 Coastwise voyage.
46.05–20 Great Lakes voyage.
46.05–25 New passenger vessel.
46.05–30 Existing passenger vessel.

SUBPART 46.10—ADMINISTRATION

Sec.
46.10–1 Relaxation from regulations.
46.10–5 Load line requirements of Parts 43, 44, and 45, for subdivision.
46.10–10 Marks to indicate subdivision load lines.
46.10–15 Survey for the establishment and renewal of subdivision load line marks.
46.10–20 Application for the assignment and renewal of subdivision load lines.
46.10–25 Equivalents.
46.10–30 Subdivision load line certificates.
46.10–35 Validity of subdivision load line certificate.
46.10–40 Nonsubmergence subdivision load line (Great Lakes).
46.10–45 Nonsubmergence subdivision load lines in salt water.
46.10–50 Drills and inspections.
46.10–55 Log book entries.
46.10–60 Control.
46.10–65 Construction.
46.10–70 Plans and inspections of new and converted vessels.

SUBPART 46.15—SUBDIVISION LOAD LINES FOR PASSENGER VESSELS ENGAGED IN FOREIGN AND COASTWISE VOYAGES, INCLUDING VOYAGES ON THE GREAT LAKES

46.15–1 Procedure for determination of subdivision load line.
46.15–5 Engineering requirements.
46.15–10 Subdivision load lines.

AUTHORITY: §§ 46.01–1 to 46.15–10 issued under sec. 2, 45 Stat. 1493, as amended, sec. 2, 49 Stat. 888, as amended; 46 U. S. C. 85a, 88a. Interpret or apply R. S. 4490, as amended, sec. 3, 24 Stat. 129, as amended, 41 Stat. 305, as amended, sec. 5, 49 Stat. 1384, as amended, secs. 1, 2, 49 Stat. 1544, as amended, sec. 3, 54 Stat. 346, sec. 5, 55 Stat. 244, as amended; 46 U. S. C. 482, 483, 363, 369, 867, 1333, 50 U. S. C., app., 1275.

SUBPART 46.01—AUTHORITY AND PURPOSE

§ 46.01–1 *Purpose.* (a) The purpose of the regulations in this part is to set forth uniform minimum requirements applicable to passenger vessels required to have subdivision load lines. These requirements deal with the following:

(1) Load line requirements applicable before a passenger vessel will be marked with and certificated as to subdivision load lines.

(2) Assigning, marking, and recording of subdivision load lines.

(3) Administration of subdivision load lines.

(4) Application of requirements to passenger vessels.

§ 46.01–5 *Authority* (a) The regulations regarding subdivision and subdivision load lines interpret or apply R. S. 4490, as amended; sec. 3, 24 Stat. 129, as amended; 41 Stat. 305, as amended; sec. 2, 45 Stat. 1493, as amended; sec. 2, 49 Stat. 888, as amended; sec. 5, 49 Stat. 1384, as amended; secs. 1 and 2, 49 Stat. 1544, as amended; sec. 3, 54 Stat. 346; and sec. 5, 55 Stat. 244, 245, as amended (46 U. S. C. 482, 483, 363, 85a, 88a, 369, 367, 1333, and 50 U. S. C. App. 1275). The International Load Line Convention, 1930, and the International Convention for Safety of Life at Sea, 1948, also establish minimum requirements for load lines and subdivision.

§ 46.01–10 *Responsibility for administration.* (a) Under the direction and supervision of the Secretary of the Treasury, and in accordance with the delegation of authority in an order dated July 31, 1950 (15 F. R. 6521), the Commandant, United States Coast Guard, is vested with the responsibility and authority to determine the position and to assure the correct marking of subdivision load lines on all passenger vessels subject to the International Convention for Safety of Life at Sea, 1948, or the Load Line Act of March 2, 1929, as amended, or the Coastwise Load Line Act, 1935, as amended (45 Stat. 1492–1494, 49 Stat. 888–890; 46 U. S. C. 85–85g, 88–88i).

§ 46.01–15 *Application of regulations.* (a) No passenger vessel of the United States required to be marked with subdivision load lines shall depart from any port or place for a foreign voyage by sea, a coastwise voyage by sea, or a voyage on the Great Lakes; no foreign passenger vessel belonging to a country that has ratified or acceded to the International Convention for Safety of Life at Sea, 1948, shall depart from any port or place under the jurisdiction of the United States, and no foreign passenger vessel of 150 gross tons or over subject to the Load Line Act of March 2, 1929, as amended, or the Coastwise Load Line Act, 1935, as amended, shall depart from any port or place under the jurisdiction of the United States including ports on the Great Lakes, unless such passenger vessel has been marked with subdivision load lines in accordance with the regulations in this part and has on board a valid certificate certifying to the correctness of the location of such subdivision load line marks.

(b) Subdivision load lines shall be marked on both sides of passenger vessels where determined and in the manner described in Subpart 46.15 as applicable to the vessel's service.

SUBPART 46.05—DEFINITIONS USED IN THIS PART

§ 46.05–1 *Passenger vessel.* (a) For the purpose of the regulations in this part, a vessel is a passenger vessel if:

(1) Engaged on an international voyage by sea, it carries or is authorized to carry more than 12 passengers; or,

(2) Engaged on a coastwise voyage by sea or a voyage on the Great Lakes, it carries or is authorized to carry more than 16 persons in addition to the crew.

§ 46.05–10 *Foreign voyage.* (a) A foreign voyage for the purpose of marking passenger vessels with subdivision load lines is a voyage by sea between a port under the jurisdiction of the United States and a port of a foreign country, its colonies, territories, or protectorates, or conversely (a voyage exclusively on the Great Lakes excepted).

§ 46.05–15 *Coastwise voyage.* A coastwise voyage by sea, for the purpose of marking passenger vessels with subdivision load lines, is a voyage in which a vessel in the usual course of her employment proceeds from one port or place in the United States to another port or place in the United States or from a port or place in a territory or possession of the United States to another port or place in that territory or possession, and passes outside the line dividing inland

waters from the high seas, as established in accordance with section 2 of the Act of February 19, 1895, as amended (28 Stat. 672; 33 U. S. C. 151).

§ 46.05–20 *Great Lakes voyage.* A Great Lakes voyage is any voyage from a United States port or place on the Great Lakes to another United States port or place on the Great Lakes or to a Canadian port or place on the Great Lakes, or conversely.

§ 46.05–25 *New passenger vessel.* A new passenger vessel is a vessel whose keel was laid or was a vessel converted into a passenger vessel on or after November 19, 1952.

§ 46.05–30 *Existing passenger vessel.* An existing passenger vessel in respect to its voyage is any passenger vessel that is not a new passenger vessel as defined in § 46.05–25.

SUBPART 46.10—ADMINISTRATION

§ 46.10–1 *Relaxation from regulations.* (a) New passenger vessels making foreign voyages by sea shall comply with the requirements in this part. An existing passenger vessel engaged in foreign voyages by sea may be permitted relaxation from the requirements of this part if, in the opinion of the Commandant, U. S. Coast Guard, such requirements are unreasonable or impracticable.

(b) A new passenger vessel making coastwise voyages by sea or making Great Lakes voyages shall comply with the requirements in this part. An existing passenger vessel making coastwise voyages by sea or Great Lakes voyages may be permitted relaxation from the requirements of this part if, in the opinion of the Commandant, U. S., Coast Guard, such requirements are unreasonable or impracticable.

§ 46.10–5 *Load line requirements for subdivision.* (a) The load line requirements of Parts 43, 44, 45 of this subchapter as applicable to the passenger vessel and her service, shall be complied with before a passenger vessel will be marked with and certificated as to subdivision load lines.

§ 46.10–10 *Marks to indicate subdivision load lines.* (a) Marks to indicate the maximum mean draft to which a passenger vessel may be lawfully submerged shall be permanently marked on each side of the passenger vessel in the form, manner, and location provided in this part.

(b) The Commandant, U. S. Coast Guard, shall determine the position of the subdivision load lines by the application of the requirements contained in this part and Part 73 of Subchapter H (Passenger Vessels) of this chapter: *Provided*, That in determining the position of the load lines for passenger vessels engaged on coastwise voyages by sea and for passenger vessels engaged on Great Lakes voyages, due consideration shall be given to the age and condition of the passenger vessel, its subdivision, and the efficacy thereof and the probable stability of the vessel if damaged and such increases made to the freeboards as existing conditions indicate to be necessary. The correct marking of subdivision load lines on passenger vessels shall be certified to by the American Bureau of Shipping or a classification society approved by the Commandant for such purpose.

(c) Certificates certifying to the correctness of subdivision load line marks shall not be furnished until it is determined that the marks have been correctly placed upon the passenger vessel.

(d) In the case of passenger vessels that are required by the International Convention for Safety of Life at Sea to have on board a safety certificate, the certification of subdivision load line marks shall be made by letter to the Commandant, U. S. Coast Guard, Washington 25, D. C.

§ 46.10–15 *Survey for the establishment and renewal of subdivision load line marks.* (a) Every passenger vessel to be marked with and certificated for subdivision load lines must comply with the requirements as set forth in Subchapter H (Passenger Vessels) of this chapter for ocean, coastwise, and Great Lakes service as applicable to the particular vessel and the service in which she is to be employed.

(b) Every passenger vessel marked with a subdivision load line shall be subjected to the surveys specified in this paragraph. The details of the surveys or inspections indicated in § 46.40–15 (b) (1) through (3) shall be as set forth in the applicable sections of Part 71 of Subchapter H (Passenger Vessels) of this chapter.

(1) A survey before the vessel is put in service.

(2) A periodical survey once every 12 months.

(3) Additional surveys as occasion arises.

(4) Surveys required by Parts 43, 44, or 45 of this subchapter.

§ 46.10–20 *Application for the assignment and renewal of subdivision load lines.* (a) Application for assignment and renewal of subdivision load lines and certification thereof shall be made in writing to the Commandant, U. S. Coast Guard, Washington 25, D. C.

§ 46.10–25 *Equivalents.* (a) Where in the regulations in this part it is provided that a particular fitting, appliance, apparatus, or type thereof, shall be fitted or carried in a vessel engaged on foreign voyages by sea or that any particular arrangement shall be adopted, there may be substituted any other fitting or appliance or type thereof or any other arrangement provided that the Commandant, U. S. Coast Guard, shall have been satisfied by suitable trials that the fitting, appliance, or apparatus, or type thereof, or that the arrangement substituted is at least as effective as that specified in this part.

(b) Where, in the application of the regulations in this part to passenger vessels engaged in coastwise voyages by sea and on Great Lakes voyages, it is desired to substitute other construction, arrangement, fitting, or appliance, or type thereof, such substitution may be made if approved by the Commandant, U. S. Coast Guard, provided the degree of safety provided by this part is obtained.

§ 46.10–30 *Subdivision load line certificates.* (a) Passenger vessels engaged in foreign voyages by sea shall have their subdivision load lines certificated on the safety certificate required by the International Convention for Safety of Life at Sea, 1948. Safety certificates shall be issued by the Commandant, U. S. Coast Guard, Washington 25, D. C., for a period not to exceed one year. These vessels will also be provided with the load line certificate required by Part 43 of this subchapter, the minimum freeboard shown thereon to be not less than the minimum freeboard corresponding to the principal passenger condition. The fact that they are subdivision load lines is to be noted on the load line certificate.

(b) Passenger vessels engaged on coastwise voyages by sea or Great Lakes voyages shall have the position of their subdivision load lines recorded on a load line certificate in the form required by Parts 43 or 45 of this subchapter. The fact that they are subdivision load lines is to be noted on the load line certificate.

(c) A note shall be added to the load line certificate below the signature of the assigning authority in the following form:

> The bulkhead deck used for determining the position of the subdivision load lines certified above is ---------- (here described bulkhead deck).

(d) Annual inspections of passenger vessels shall be as required by §§ 43.01–55 and 46.10–15 of this subchapter and renewal of passenger vessels' load line certificates shall be as required by § 43.01–75.

(e) Each new passenger vessel which receives its first load line certificate shall also be provided with a copy of the load line survey report as required by §§ 43.01–40 or 45.01–30 of this subchapter.

§ 46.10–35 *Validity of subdivision load line certificates.* (a) Subdivision load line certificates issued to passenger vessels shall only be valid during the time for which the certificates are issued.

(b) If, due to any cause, the conditions as required by this part are not carried out, the load line certificate may be cancelled and the load lines considered nonexistent: *Provided*, That if the conditions causing the cancellation of the certificate are satisfactorily corrected, the load line certificate shall be reinstated for the remainder of its term.

(c) A valid subdivision load line certificate for foreign voyages by sea shall be valid for coastwise voyages by sea and Great Lakes voyages. A valid subdivision load line certificate for coastwise voyages by sea shall be valid for Great Lakes voyages but not for foreign voyages by sea. A valid subdivision load line certificate for Great Lakes voyages shall not be valid for foreign or coastwise voyages by sea.

§ 46.10–40 *Nonsubmergence subdivision load line (Great Lakes).* (a) Passenger vessels on the Great Lakes of 150 gross tons or over shall not submerge the subdivision load line applicable to the voyage.

§ 46.10–45 *Nonsubmergence subdivision load lines in salt water.* (a) Passenger vessels required to be marked with subdivision load lines, engaged on foreign and coastwise voyages other than the Great Lakes voyages, shall not submerge in salt water the subdivision load line applicable to the voyage. Passenger vessels engaged on ocean foreign or coastwise voyages may be marked with fresh water load lines. A passenger vessel on foreign or coastwise voyages (except Great Lakes voyages) may have an allowance made for the degree of brackishness of the water in which the vessel is floating but not for the weight of fuel, water, etc., required for consumption between the point of departure and the open sea, and no allowance is to be made for bilge or ballast water that may be in the passenger vessel at the time of departure.

§ 46.10–50 *Drills and inspections.* (a) For the required drills and inspections to be conducted on passenger vessels, see Subpart 78.17 of Subchapter H (Passenger Vessels) of this chapter.

§ 46.10–55 *Log book entries.* (a) For required log book entries to be made on passenger vessels, see Subpart 78.17 of Subchapter H (Passenger Vessels) of this chapter.

§ 46.10–60 *Control.* (a) The duties and responsibilities of the Collector of Customs or the Coast Guard District Commander in respect to the load lines certified on the safety certificates of, and marked on passenger vessels engaged on foreign voyages by sea shall be the same as stated in § 43.01–97 of this subchapter.

(b) The duties and responsibilities of the Collector of Customs or the Coast Guard District Commander in respect to passenger vessels engaged in coastwise voyages by sea or Great Lakes voyages are as defined by § 43.01–97 or § 45.01–85 of this subchapter, as applicable.

§ 46.10–65 *Construction.* (a) The watertight subdivision of every passenger vessel shall be as efficient as possible, having regard to its intended service. This principle is given effect by the requirements of Part 73 of Subchapter H (Passenger Vessels) of this chapter which provide for variations in the standard of subdivision according to the length of the vessel and the degree to which the vessel approaches the exclusive passenger type, the highest standard being required in vessels of the greatest length engaged primarily in the carriage of passengers.

(b) Passenger vessels engaged in foreign voyages by sea or coastwise voyages by sea or voyages on the Great Lakes, to be marked with subdivision load lines shall comply with the requirements in this part.

§ 46.10–70 *Plans and inspections of new and converted vessels.* (a) Plans for a new passenger vessel or a vessel to be converted to a passenger vessel shall be submitted to the Commandant as required by Subpart 71.65 of Subchapter H (Passenger Vessels) of this chapter.

(b) Inspections shall be made during the construction or conversion of the vessel as required by Subpart 71.20 of Subchapter H (Passenger Vessels) of this chapter.

(c) Upon completion of the construction or conversion of a passenger vessel, a stability test shall be performed and stability information shall be supplied to the operator as required by Part 74 of Subchapter H (Passenger Vessels) of this chapter.

SUBPART 46.15—SUBDIVISION LOAD LINES FOR PASSENGER VESSELS ENGAGED IN FOREIGN, COASTWISE, AND GREAT LAKES VOYAGES

§ 46.15–1 *Procedure for determination of subdivision load line.* (a) The procedure for the determination of the subdivision load line as well as special construction features of the vessel shall be as set forth in Subpart 72.01 and Parts 73 and 74 of Subchapter H (Passenger Vessels) of this chapter.

§ 46.15–5 *Engineering requirements.* (a) Bilge and ballast systems, piping, inlets and discharges, ash chutes, astern power, and auxiliary steering shall be in accordance with the provisions of Subchapter F (Marine Engineering) of this chapter.

§46.15–10 *Subdivision load lines.* (a) Subdivision load lines shall be located by measuring vertically down from the deck line required by Part 43 of this subchapter.

(b) The length, width, and manner of marking the lines shall be as provided in Subpart 43.05 of this subchapter.

(c) No subdivision load line is to be placed so that the freeboard is reduced from that determined by the highest seasonal mark permitted by Part 43.

(d) When the highest subdivision load line is located on a vessel used as a passenger vessel in a position between the highest and lowest seasonal load line marks, the seasonal load line marks above the subdivision load line will be omitted and those below will be marked.

(e) When the freeboard from the highest subdivision load line on a vessel used as a passenger vessel is greater than the freeboard from the lowest load line permitted by Part 43 of this subchapter, the load lines required by Part 43 of this subchapter shall be omitted and the disk with its horizontal line located in line with the highest subdivision load line.

(f) One fresh water line shall be marked. When a subdivision and a normal load line are combined, the normal fresh water line only shall be used unless the position of the subdivision load line is such that confusion will result, in which case a subdivision fresh water line may be used, marked FC, and the normal fresh water line omitted.

(g) Subdivision load lines shall be aft of the vertical line. The vertical line shall be extended as necessary to connect the lowest and highest load lines marked on the vessel.

(h) When a vessel has spaces used for cargo and passengers alternatively so that the position of the subdivision load line varies with the service, subdivision load lines for the principal passenger condition shall be marked and denoted by C, and the alternative conditions marked and denoted by C_1, C_2, etc. The position of each load line and the conditions under which a particular load line is applicable shall be noted in the certificate.

(i) The principal passenger condition for a vessel having spaces used for passengers and cargo alternatively is the condition where only those spaces appropriated exclusively to passengers are taken into consideration for determination of the subdivision load line.

(j) For Great Lakes vessels, references to Part 43 shall read Part 45 and a "diamond" shall be substituted for the "disc". No "fresh water" line will be marked.

Subchapter F—Marine Engineering

PART 50—GENERAL PROVISIONS

Part 50 is amended to read as follows:

SUBPART 50.01—BASIS AND PURPOSE

Sec.
50.01–1 Authority.
50.01–5 Assignment of functions.
50.01–10 Purpose of regulations.
50.01–15 Application of regulations.

SUBPART 50.10—DEFINITION OF TERMS USED IN THIS SUBCHAPTER

50.10–1 Commandant.
50.10–5 Coast Guard District Commander.
50.10–10 Officer in Charge, Marine Inspection.
50.10–15 Marine inspector or inspector.
50.10–20 Requirements.
50.10–25 Headquarters.

AUTHORITY: §§ 50.01–1 to 50.10–25 issued under R. S. 4405, as amended, 4462, as amended; 46 U. S. C. 375, 416. Interpret or apply R. S. 4399, 4400, 4417, 4417a, 4418, 4421, 4426–4431, 4433, 4434, 4453, 4491, as amended, sec. 14, 29 Stat. 690, 41 Stat. 305, 49 Stat. 1544, sec. 17, 54 Stat. 166, sec. 3, 54 Stat. 346, sec. 2, 54 Stat. 1028, sec. 5, 55 Stat. 244, 245, as amended; 46 U. S. C. 361, 362, 391, 391a, 392, 399, 404–409, 411, 412, 435, 489, 366, 363, 367, 526p, 1333, 463a, 50 U. S. C. App. 1275.

SUBPART 50.01—BASIS AND PURPOSE

§ 50.01–1 *Authority.* (a) The authority to prescribe regulations generally is set forth in R. S. 4405 and 4462, as amended (46 U. S. C. 375 and 416), as well as in other provisions of Title 52 of the Revised Statutes and acts amendatory thereof or supplemental thereto. Under the provisions of R. S. 4403, as amended (46 U. S. C. 372), the Commandant, United States Coast Guard, superintends the administration of the vessel inspection laws and is required to produce a correct and uniform administration of the inspection laws, rules, and regulations.

(b) The regulations regarding marine engineering interpret or apply R. S. 4399, 4400, 4417, 4417a, 4418, 4421, 4426–4431, 4433, 4434, 4453, and 4491, as amended, sec. 14, 29 Stat. 690, 41 Stat. 305, 49 Stat. 1544, sec. 17, 54 Stat. 166, sec. 3, 54 Stat. 346, sec. 2, 54 Stat. 1028, and sec. 5, 55 Stat. 244, 245, as amended (46 U. S. C. 361, 362, 391, 391a, 392, 399, 404–409, 411, 412, 435, 489, 366, 363, 367, 526p, 1333, 463a, and 50 U. S. C. App. 1275).

§ 50.01–5 *Assignment of functions.* By Reorganization Plan No. 3 of 1946, effective July 16, 1946, the marine inspection functions of the former Bureau of Marine Inspection and Navigation and its officers and employees were

transferred to the Commandant, United States Coast Guard by Reorganization Plan No. 26 of 1950, effective July 31, 1950, the functions formerly vested in the Commandant, United States Coast Guard were transferred to the Secretary of the Treasury with certain specific exceptions. The Secretary of the Treasury by an order dated July 31, 1950 (15 F. R. 6521), delegated to the Commandant the functions formerly performed by him under Reorganization Plan No. 3 of 1946.

§ 50.01–10 *Purpose of regulations.* The purpose of the regulations in this subchapter is to set forth uniform minimum requirements for marine engineering in accordance with the intent of Title 52 of the Revised Statutes and acts amendatory thereof or supplemental thereto, as well as to implement various International Conventions for Safety of Life at Sea and other treaties which affect the merchant marine. The regulations are necessary to carry out the provisions of law affecting inspected vessels and such regulations have the force of law.

§ 50.01–15 *Application of regulations.* (a) The regulations in this subchapter contain specifications and requirements for materials, design, construction, installation, and inspection of machinery, boilers, unfired pressure vessels, safety valves and appurtenances, including piping systems, upon the strength and efficiency of which safety of life is dependent.

(b) The regulations in this subchapter apply to installations contracted for or built on or after July 1, 1935. The regulations in Subchapter G (Marine Engineering Installations Contracted for Prior to July 1, 1935) of this chapter apply only to installations contracted for or built prior to July 1, 1935.

(c) The regulations in this subchapter are not retroactive in effect, except as provided in paragraph (d) of this section or if specifically provided for in the regulation at the time it is amended or added. The regulations amended or added subsequent to July 1, 1935, are applicable to installations contracted for or built on or after the effective date of such regulations. For the purpose of recalculating the maximum allowable pressure of boilers, unfired pressure vessels and piping under the provisions of § 61.20–15 (f), the formulas found in this subchapter may be used for boilers, unfired pressure vessels and piping: *Provided*, That such recalculation shall not permit a higher pressure than that originally allowed by the regulations in effect at the time such work was contracted for or built.

(d) Where existing vessels are reboilered, the mountings and attachments, including feed and blow-off valves and fittings, shall be renewed in accordance with regulations in this subchapter, in effect at the time such work is contracted for or built. The steam piping shall be gaged and examined by the Officer in Charge, Marine Inspection, and if found to be of the thickness required at the time the piping was installed it may be continued in use so long as the Officer in Charge, Marine Inspection, is of the opinion that the piping may be safely continued in use. Changes in specifications of articles of equipment shall not apply to such articles which have been passed as satisfactory until replacement shall become necessary.

§ 50.10–1 *Commandant.* The term "Commandant" means the Commandant of the Coast Guard.

§ 50.10–5 *Coast Guard District Commander.* The term "Coast Guard District Commander" means an officer of the Coast Guard designated as such by the Commandant to command all Coast Guard activities within his district, which include the inspections, enforcement, and administration of Title 52, Revised Statutes, and acts amendatory thereof or supplemental thereto, and rules and regulations thereunder.

§ 50.10–10 *Officer in Charge, Marine Inspection.* The term "Officer in Charge, Marine Inspection," means any person from the civilian or military branch of the Coast Guard designated as such by the Commandant and who under the superintendence and direction of the Coast Guard District Commander is in charge of an inspection district for the performance of duties with respect to the inspections, enforcement, and administration of Title 52, Revised Statutes, and acts amendatory thereof or supplemental thereto, and rules and regulations thereunder.

§ 50.10–15 *Marine inspector or inspector.* The terms "marine inspector" or "inspector" mean any person from the civilian or military branch of the Coast Guard assigned under the superintendence and direction of an Officer in Charge, Marine Inspection, or any other person as may be designated for the performance of duties with respect to the inspections, enforcement, and the administration of Title 52, R. S., and acts amendatory thereof or suplemental thereto, and rules and regulations thereunder.

§ 50.10–20 *Requirements.* The term "requirements" refers to process of manufacture, characteristic, physical and chemical properties, tests, workmanship, and finish of materials.

§ 50.10–25 *Headquarters.* The term "headquarters" means the Office of the Commandant, United States Coast Guard, Washington 25, D. C.

PART 52—CONSTRUCTION

SUBPART 52.01—PROCEDURE AND GENERAL REQUIREMENTS

1. Sections 52.01–20 and 52.01–25 are amended to read as follows:

§ 52.01–20 *Appeals.* In case the design is disapproved by the Officer in Charge, Marine Inspection, the manufacturer may appeal within 30 days, to the Coast Guard District Commander of the district, and should the Coast Guard District Commander sustain the Officer in Charge, Marine Inspection, the manufacturer may, within 30 days, further appeal to the Commandant. The decision of the Commandant shall be final.

52.01–25 *Certifications and affidavits of manufacturers.* (a) In requesting inspection of a new boiler or pressure vessel subject to inspection by the Coast Guard, the manufacturer shall file with the Officer in Charge, Marine Inspection, a certification of a data report in triplicate on Form CG 2935 for boilers or Form CG 2936 for unfired pressure vessels. (See § 61.45–5 or § 61.45–10 of this subchapter.)

(b) Manufacturers of class B materials, such as pipe, valves, flanges, fittings, traps, separators, castings, forgings, etc., or appliances, proposed for use on vessels subject to inspection by the Coast Guard, shall file at Headquarters affidavits duly executed on Form CG 935A certifying that such materials or appliances will be manufactured in accordance with the regulations in this subchapter. (See § 61.45–15 of this subchapter.)

(R. S. 4405, as amended, 4462, as amended; 46 U. S. C. 375, 416. Interpret or apply R. S. 4399, 4400, 4417, 4417a, 4418, 4421, 4426–4431, 4433, 4434, 4453, as amended, sec. 14, 29 Stat. 690, 41 Stat. 305, 49 Stat. 1544, sec. 17, 54 Stat. 166, sec. 3, 54 Stat. 346, sec. 2, 54 Stat. 1028, sec. 5, 55 Stat. 244, 245, as amended; 46 U. S. C. 361, 362, 391, 391a, 392, 399, 404–409, 411, 412, 435, 489, 366, 363, 367, 526p, 1333, 463a, 50 U. S. C. App. 1275)

2. Section 52.01–45 *Inspection of boilers under construction* is canceled.

(R. S. 4405, as amended, 4462, as amended; 46 U. S. C. 375, 416)

3. Section 52.01–55 is amended to read as follows:

§ 52.01–55 *Request for increase of pressure.* (a) When a maximum allowable pressure has been established for a boiler, an increase in pressure shall not be authorized unless the boiler design, piping system and machinery meet the requirements of this subchapter for the pressure requested. An increase in maximum allowable pressure shall be granted only by the Commandant upon presentation of data or drawings proving that the requested increase in pressure is justified.

(b) When existing boilers are replaced by new boilers designed to operate at pressures in excess of the pressure allowed by the certificate of inspection, an increase in pressure shall not be authorized unless the boiler design, piping systems and machinery meet the requirements of this subchapter for the maximum pressure requested. An increase in maximum allowable pressure shall be granted only by the Commandant upon presentation of data or drawings proving that the boiler, piping system and machinery will operate safely at the desired maximum pressure of the system.

(R. S. 4405, as amended, 4462, as amended; 46 U. S. C. 375, 416. Interpret or apply R. S. 4399, 4400, 4417, 4417a, 4418, 4421, 4426–4431, 4433, 4434, 4453, as amended, sec. 14, 29 Stat. 690, 41 Stat. 305, 49 Stat. 1544, sec. 17, 54 Stat. 166, sec. 3, 54 Stat. 346, sec. 2, 54 Stat. 1028, sec. 5, 55 Stat. 244, 245, as amended; 46 U. S. C. 361, 362, 391, 391a, 392, 399, 404–409, 411, 412, 435, 489, 366, 363, 367, 526p, 1333, 463a, 50 U. S. C. App. 1275.)

4. Section 52.01–65 *Repairs, replacements, or alterations* is canceled.

(R. S. 4405, as amended, 4462, as amended; 46 U. S. C. 375, 416)

SUBPART 52.65—SAFETY VALVES

Subpart 52.65, consisting of §§ 52.65–1 to 52.65–15, is amended to read as follows:

Sec.
52.65–1 Definitions.
52.65–5 General requirements.
52.65–15 Installation.

AUTHORITY: §§ 52.65–1 to 52.65–15, issued under R. S. 4405, as amended, 4462, as amended; 46 U. S. C. 375, 416. Interpret or apply S. 4399, 4400, 4417, 4417a, 4418, 4424–4431, 4433, 4434, 4453, 4491, as amended, sec. 14, 29 Stat. 690, 41 Stat. 305, 49 Stat. 1544, sec. 17, 54 Stat. 166, sec. 3, 54 Stat. 346, sec. 2, 54 Stat. 1028, sec. 5, 55 Stat. 244, 245, as amended; 46 U. S. C. 361, 362, 391, 391a, 392, 399, 404–409, 411, 412, 435, 489, 366, 363, 367, 526p, 1333, 463a, 50 U. S. C. App. 1275.

§ 52.65–1 *Definitions* — (a) *Safety valve.* Safety valve is a valve designed to open or close automatically to relieve excess pressure in the pressure vessel to which it is attached.

(b) *Spring-loaded safety valve.* Spring-loaded safety valve is a safety valve fitted with a spring which normally holds the valve disk in a closed position against the seat and allows it to open or close at predetermined pressures. Spring-loaded safety valves are characterized by pop action.

(c) *Pressure loaded safety valve.* Pressure loaded pilot actuated safety valve is one which is held in the closed position by steam pressure and controlled in operation by a pilot actuator valve.

(d) *Spring loaded pilot actuated safety valve.* Spring loaded, pilot actuated safety valve is one in which a spring is used in the conventional way to hold the disk against the seat, but which has a piston attached to the spindle and inclosed within a cylinder, which when subjected to a limiting or set pressure, unbalances the spring load thereby opening the valve.

(e) *Spring loaded pilot valve.* Spring loaded pilot valve is a conventional safety valve designed to actuate another spring loaded safety valve through a pressure transmitting line led from the body of the pilot valve.

(f) *Lever safety valve.* Lever safety valve is a safety valve having the disk held on its seat by the action of a weight hung on a lever which is pivoted on a fulcrum.

(g) *Relief valve.* Relief valve is a valve constructed on the general design of safety valves to relieve excess pressure. It may be used for service where an approved safety valve is not required by the regulations of this subchapter. (See § 54.07–5 of this subchapter.)

§ 52.65–5 *General requirements.* (a) Each boiler and its superheater shall be provided with one or more approved safety valves designed, constructed and flow-tested in conformance with Subpart 162.001 in Subchapter Q (Specifications) of this chapter. Boilers of more than 500 square feet of water heating surface but without superheaters shall be fitted with at least two safety valves, and boilers with integral superheaters shall have at least two safety valves attached to the drum and one safety valve fitted to the superheater outlet. On river steam vessels whose boilers are connected in batteries without means of shutting off one boiler from another, each battery of boilers shall be treated as a single boiler and equipped with not less than two safety valves of equal size.

(b) Drum safety valves shall be set to relieve at a pressure not in excess of that allowed by the certificate of inspection. Where for any reason this is lower than the pressure for which the boiler was originally designed, an accumulation test, as provided for in paragraph (g) of this section, shall be conducted to insure that the relieving capacity of the safety valve is sufficient for the lower pressure.

(c) The setting of the superheater safety valve shall not exceed the design pressure of the machinery plus the pressure drop in the piping from the superheater outlet to the machinery. To prevent damage to the superheater, the drum safety valves shall be set at a pressure not less than that of the superheater safety valve setting plus 5 pounds minimum plus approximately the normal load pressure drop through the superheater. If there are no intervening valves between the superheater safety valve and boiler, the relieving capacity of the superheater safety valve rated in accordance with the requirements of Subpart 162.001, Subchapter Q (Specifications), may be included in determining the total required relieving capacity of the boiler, provided the drum safety valves have at least 75 percent of the aggregate relieving capacity required. The foregoing requirements do not apply when drum pilot actuated superheater safety valves are used. Installations employing pilot actuated safety valves will be given special consideration by the Commandant.

(d) In the event the maximum steam generating capacity of the boiler is increased by any means, the relieving capacity of the safety valves shall be checked by an inspector and if determined to be necessary, valves of increased relieving capacity shall be installed.

(e) The total rated relieving capacity of drum and superheater safety valves as certified by the valve manufacturer shall not be less than the maximum generating capacity of the boiler as certified by the boiler manufacturer. The safety valves shall be capable of discharging all the steam that can be generated without allowing the pressure to rise more than 6 percent above the set pressure of the valve.

(f) (1) The boiler manufacturer may certify the normal as well as the maximum generating capacity of the boiler. In the absence of such certification the minimum safety valve relieving capacity shall be determined upon the basis of the pounds of steam generated per hour per square foot of boiler heating surface and the water-wall heating surface, as given in the Table 52.65–5 (f) (1).

TABLE 52.65–5 (f) (1)—MINIMUM RELIEVING CAPACITY

Type of boiler	Minimum pounds of steam per hour per square foot of surface					
	Boiler heating surface			Water wall surface		
	Hand-fired	Stoker-fired	Oil, or pulverized fuel-fired	Hand-fired	Stoker-fired	Oil, or pulverized fuel-fired
Fire-tube	5	7	8	8	10	14
Water-tube	6	8	10	8	12	16

(2) In many cases a greater relieving capacity of safety valves must be provided than required by this paragraph, and in every case the requirements of paragraph (e) of this section shall be met.

(3) The heating surface shall be computed for that side of the boiler surface exposed to the products of combustion exclusive of the superheating surface. In computing the heating surface only the tubes, fireboxes, shells, tube sheets, and the projected area of the headers need be considered. For vertical fire-tube boilers, only that portion of the tube surface up to the middle gauge cock is to be computed. The minimum number and size of safety valves required shall be determined on the basis of the aggregate steaming capacity and the aggregate rated relieving capacity of the valves shall be in accordance with Subpart 162.001 in Subchapter Q (Specifications) of this chapter.

(g) An accumulation test shall be conducted in the presence of an inspector to determine the adequacy of protection provided by the aggregate relieving capacity of the boiler safety valves except in instances where possible damage to superheaters makes this impractical. During this test all steam outlet connections except the safety valves and such others as may be necessary to operate the boiler shall be closed and the fires forced to their maximum capacity for a period of 15 minutes for fire-tube boilers and 7 minutes for water-tube boilers.

(h) On new installations, the safety valve diameter for power boilers, superheaters, or unfired steam generators shall be not less than 1½ inches nor more than 4 inches. Safety valves of 4½ inches diameter may be used for replacements on existing boilers or unfired steam generators. The foregoing diameters apply to the valve inlet.

(i) Lever or weighted safety valves now installed may be continued in use and may be repaired, but when renewals are necessary, lever or weighted safety valves shall not be used. All such replacements shall conform to the requirements of Subpart 162.001 in Subchapter Q (Specifications) of this chapter.

(j) Gags or clamps for holding the safety valve disk on its seat shall be carried on board the vessel at all times.

§ 52.65–15 *Installation.* (a) The final setting of boiler safety valves shall be checked and adjusted under steam

pressure by an inspector who upon acceptance shall seal the valves. This requirement applies to drum and also superheater safety valves when the latter provide part of the required relieving capacity for the boiler.

(b) Except in the case of superheater valves, safety valves are not to be connected to any fitting with outlets for any purpose other than the escape of steam through the safety valve. They shall be connected directly to the boiler or as close thereto as possible and installed in an upright position with spindles vertical except in the case of especially designed and approved valves.

(c) No shut-off valves shall be placed between the required safety valves and the boiler or unfired steam generator, nor in the escape pipe between the safety valve and atmosphere, nor in the drain pipe from the safety valve.

(d) Twin valves, made by placing individual valves on Y bases, or duplex valves having two valves in the same body, shall be of equal size.

(e) (1) To insure safety valves being free, each safety valve shall have a substantial lifting device by which the valve disk may be positively lifted from its seat when there is at least 75 percent of the maximum allowable pressure on the boiler. Such mechanism shall be connected by suitable relieving gear so arranged that controls may be operated from the fireroom or engine-room floor.

(2) When, due to high pressure, it is impracticable to fit a relieving gear to raise the safety valve from its seat in order to relieve the boiler of pressure, suitable piping and a valve having a relieving capacity of not less than the safety valve(s), may be connected from the boiler to the escape pipe or condenser. The valve shall be arranged to permit operation from the fire-room or engine-room floor.

SUBPART 52.70—BOILER MOUNTINGS AND ATTACHMENTS

Section 52.70–25 *Feed connections* is amended by canceling paragraph (b).

(R. S. 4405, as amended, 4462, as amended; 46 U. S. C. 375, 416)

PART 53—LOW PRESSURE HEATING BOILERS

SUBPART 53.03—STEEL PLATE HEATING BOILERS

1. Section 53.03–60 is amended to read as follows:

§ 53.03–60 *Safety valves.* (a) Each steam heating boiler shall have one or more approved safety valves set to discharge at a pressure of not to exceed 30 p. s. i., and designed, constructed and flow-tested for actual capacity in conformance with Subpart 162.012 of Subchapter Q (Specifications) of this chapter.

(b) The minimum safety valve capacity in pounds per hour shall be determined by dividing the maximum B. t. u. output at the boiler nozzle obtained by the firing of any fuel, for which the unit is designed, by 1,000 or by multiplying the square feet of heating surface by 5. In many cases a greater relieving capacity of valves will have to be provided than the minimum specified by these regulations. In all cases the requirements of paragraph (c) of this section shall be met.

(c) The steam safety valve capacity for each boiler shall be such that with the fuel-burning equipment installed, the pressure cannot rise more than 6 percent above the maximum allowable pressure of the boiler. For set pressures not exceeding 15 p. s. i., the safety valve capacity may be such that with the fuel-burning equipment installed, the pressure cannot rise more than 5 pounds above the maximum allowable pressure.

(d) When operating conditions are changed, or additional boiler heating surface is installed, the safety valve capacity shall be increased, if necessary, to meet the new conditions and be in accordance with paragraph (c) of this section. The additional safety valves may be installed on the outlet piping provided there is no intervening valve.

(R. S. 4405, as amended, 4462, as amended; 46 U. S. C. 375, 416. Interpret of apply R. S. 4399, 4400, 4417, 4417a, 4418, 4421, 4426–4431, 4433, 4434, 4453, as amended, sec. 14, 29 Stat. 690, 41 Stat. 305, 49 Stat. 1544, sec. 17, 54 Stat. 166, sec. 3, 54 Stat. 346, sec. 2, 54 Stat. 1028, sec. 5, 55 Stat. 244, 245, as amended; 46 U. S. C. 361, 362, 391, 391a, 392, 399, 404–409, 411, 412, 435, 489, 366, 363, 367, 526p, 1333, 463a, 50 U. S. C. App. 1275.)

2. Part 53 is amended by adding a new § 53.03–62 reading as follows:

§ 53.03–62 *Relief valves.* (a) Each hot-water heating or hot-water supply boiler shall have one or more approved relief valves set to relieve at a pressure not to exceed 30 p. s. i., and designed, constructed and flow-tested for actual capacity in conformance with Subpart 162.013 of Subchapter Q (Specifications) of this chapter.

(b) The steam relieving capacity in pounds per hour shall be determined by dividing the maximum B. t. u. output at the boiler nozzle obtained by the firing of any fuel, for which the unit is designed, by 1,000 or by multiplying the square feet of heating surface by 5. In many cases a greater relieving capacity of valves will have to be provided than that minimum specified by the regulations in this subpart. In every case, the requirements of paragraph (c) of this section shall be met.

(c) The relief valve capacity for each boiler shall be such that with any fuel burning equipment installed the pressure cannot rise more than 3 pounds per square inch above the maximum allowable pressure of the boiler.

(R. S. 4405, as amended, 4462, as amended; 46 U. S. C. 375, 416. Interpret or apply R. S. 4399, 4400, 4417, 4417a, 4418, 4421, 4426–4431, 4433, 4434, 4453, as amended, sec. 14, 29 Stat. 690, 41 Stat. 305, 49 Stat. 1544, sec. 17, 54 Stat. 166, sec. 3, 54 Stat. 346, sec. 2, 54 Stat. 1028, sec. 5, 55 Stat. 244, 245, as amended; 46 U. S. C. 361, 362, 391, 391a, 392, 399, 404–409, 411, 412, 435, 489, 366, 363, 367, 526p, 1333, 463a, 50 U. S. C. App. 1275.)

3. Section 53.03–65 *Discharge capacities of safety and relief valves* is cancelled.

(R. S. 4405, as amended, 4462, as amended; 46 U. S. C. 375, 416).

SUBPART 53.05—CAST-IRON HEATING BOILERS

1. Section 53.05–40 is amended to read as follows:

§ 53.05–40 *Safety and relief valves.* (a) The provisions of §§ 53.03–60, 53.03–62 and 53.03–63 shall apply to cast-iron heating boilers except as specified in this section.

(b) Safety and relief valves shall be set to discharge at a pressure not to exceed 15 pounds per square inch.

(c) Safety and relief valves for cast-iron heating boilers shall be such that with any fuel burning equipment installed, the pressure cannot rise above the maximum allowable pressure more than 5 pounds per square inch for a steam boiler and 3 pounds per square inch for a hot-water boiler.

(R. S. 4405, as amended, 4462, as amended; 46 U. S. C. 375, 416. Interpret or apply R. S. 4399, 4400, 4417, 4417a, 4418, 4421, 4426–4431, 4433, 4434, 4453, as amended, sec. 14, 29 Stat. 690, 41 Stat. 305, 49 Stat. 1544, sec. 17, 54 Stat. 166, sec. 3, 54 Stat. 346, sec. 2, 54 Stat. 1028, and sec. 5, 55 Stat. 244, 245, as amended; 46 U. S. C. 361, 362, 391, 391a, 392, 399, 404–409, 411, 412, 435, 489, 366, 363, 367, 526p, 1333, 463a, 50 U. S. C. App. 1275)

2. Section 53.05–45 *Discharge capacities of safety and relief valves,* is cancelled.

(R. S. 4405, as amended, 4462, as amended; 46 U. S. C. 375, 416)

PART 54—UNFIRED PRESSURE VESSELS

SUBPART 54.07—PRESSURE-RELIEF DEVICES

Part 54 is amended by adding a new § 54.07–25 reading as follows:

§ 54.07–25 *Safety relief valves.* (a) Unified pressure vessels containing liquefied compressed gases and where required by the regulations of this subchapter, shall be fitted with one or more approved safety relief valves designed, constructed and flow-tested for capacity in conformance with Subpart 162.018 of Subchapter Q (Specifications) of this chapter.

(b) Each safety relief valve shall be set to start to discharge at a pressure not in excess of the design pressure of the vessel and the combined relieving capacities of the safety relief valves shall be sufficient to prevent a rise of pressure in the vessel of more than 20 percent above the maximum design pressure when all the safety relief valves are blowing.

(c) The minimum rates of discharge of the safety relief valves for liquefied compressed gas service shall be not less than that required by the applicable regulations governing the transportation in bulk of the particular commodity.

NOTE: The requirements covering the transportation of liquefied petroleum gases in bulk may be found in Part 38 of Subchapter D (Tank Vessels) of this chapter. The requirements covering the transportation in bulk of certain liquefied compressed gases of a hazardous nature, but not considered flammable, may be found in Part 146 of Subchapter N (Explosives or Other Dangerous Articles or Substances and Combustible Liquids on Board Vessels) of this chapter.

(d) Each safety relief valve shall be tested in the presence of an inspector before being placed in service. The tests shall satisfactorily indicate that the safety relief valves will start to discharge at a pressure not in excess of the design pressure of the tank

(R. S. 4405, as amended, 4462, as amended; 46 U. S. C. 375, 416. Interpret or apply R. S. 4399, 4400, 4417, 4417a, 4418, 4421, 4426–4431, 4433, 4434, 4453, as amended, sec. 14, 29 Stat. 690, 41 Stat. 305, 49 Stat. 1544, sec. 17, 54 Stat. 166, sec. 3, 54 Stat. 346, sec. 2, 54 Stat. 1028, sec. 5, 55 Stat. 244, 245, as amended; 46 U. S. C. 361, 362, 391, 391a, 392, 399, 404–409, 411, 412, 435, 489, 366, 363, 367, 526p, 1333, 463a, 50 U. S. C. App. 1275)

PART 55—PIPING SYSTEMS, PUMPS, REFRIGERATION MACHINERY, AND FUEL TANKS

SUBPART 55.07—DETAIL REQUIREMENTS

1. Section 55.07–25 (m) is amended to read as follows:

§ 55.07–25 *Installation.* • • •

(m) (1) Pipes piercing the collision bulkhead shall be fitted with screwdown valves operable from above the bulkhead deck and the valve shall be secured to the bulkhead fitting inside the forepeak tank.

(2) Passenger vessels shall not have the collision bulkhead pierced below the margin line by more than one pipe conveying liquids in the forepeak tank except as provided for in subparagraph (3) of this paragraph.

(3) If the forepeak tank is divided to hold two different kinds of liquids, the collision bulkhead may be pierced below the margin by two pipes, provided there is no practical alternative to the fitting of the second pipe and further provided the safety of the vessel is maintained.

(R. S. 4405, as amended, 4462, as amended; 46 U. S. C. 375, 416. Interpret or apply R. S. 4399, 4400, 4417, 4417a, 4418, 4421, 4426–4431, 4433, 4434, 4453, as amended, sec. 14, 29 Stat. 690, 41 Stat. 305, 49 Stat. 1544, sec. 17, 54 Stat. 166, sec. 3, 54 Stat. 346, sec. 2, 54 Stat. 1028, sec. 5, 55 Stat. 244, 245, as amended; 46 U. S. C. 361, 362, 391, 391a, 392, 399, 404–409, 411, 412, 435, 489, 366, 363, 367, 526p, 1333, 463a, 50 U. S. C. App. 1275)

2. Section 55.07–30 *Tests* is cancelled.

(R. S. 4405, as amended, 4462, as amended; 46 U. S. C. 375, 416)

SUBPART 55.10—PUMPING ARRANGEMENTS AND PIPING SYSTEMS

Sections 55.10–45 and 55.10–50 are amended to read as follows:

§ 55.10–45 *Gasoline fuel systems—*(a) *Material.* (1) Fuel supply piping to the engines shall be of seamless drawn annealed copper tubing or iron pipe size copper pipe.

(2) Tubing wall thicknesses shall not be less than that shown in Table 55.10–45 (a).

TABLE 55.10–45 (a)—TUBING WALL THICKNESS

Outside diameter of tubing in inches	Thickness	
	B. W. G.	Inch
⅛, 3/16, ¼	#21	0.032
5/16, ⅜	#20	.035
7/16, ½	#19	.042

(3) Tubing fittings shall be of nonferrous drawn or forged metal and of the flared type. Tubing shall be cut square and flared by suitable tools. Tube ends shall be annealed before flaring. Pipe fittings shall be of nonferrous material. Pipe thread joints shall be made tight with a suitable compound.

(4) Valves for fuel lines shall be of nonferrous material of the union-bonnet type with ground seats. Cocks are prohibited for use in gasoline fuel lines.

(b) *Installation.* (1) The piping shall be run in sight wherever practicable, protected from mechanical injury, and effectively secured against vibration by use of soft nonferrous metal clips. Where passing through steel decks or bulkheads, fuel lines shall be protected by close fitting ferrules or stuffing boxes. A short length of suitable flexible tubing or a loop of copper tubing shall be installed in the fuel line at or near the carburetor to prevent damage by vibration.

(2) Valves in fuel lines shall be installed to close against the flow.

(c) *Shut-off valves.* Shut-off valves of a suitable type shall be installed in the fuel supply lines, one as close to each tank as practicable, and one as close to each carburetor as practicable. Where fuel tanks are installed below the weather deck, arrangements shall be provided for operating all shut-off valves at the tanks from outside the compartments in which they are located, preferably from an accessible position on the weather deck. The operating gear for the shut-off valves at the tanks shall be accessible at all times.

(d) *Strainers.* A suitable twin strainer shall be fitted in the fuel supply line in the engine compartment. Strainers shall be of the type opening on top for cleaning screens. A drip pan shall be fitted under the strainer.

(e) *Outlets and drains.* Outlets in fuel lines for drawing gasoline for any purpose are prohibited. Drains or any openings in the bottom of fuel tanks are prohibited.

(f) *Fuel suction connections.* All fuel suction and return lines shall enter the top of the fuel tanks and connections shall be fitted into spuds. Such lines shall extend nearly to the bottom of the tank.

(g) *Filling and sounding pipes.* Filling and sounding pipes shall be so arranged that vapors or possible overflow when filling cannot escape to the inside of the vessel but will discharge overboard. Such pipes shall terminate on the weather deck clear of any coamings and shall be fitted with suitable shut-off valves or deck plugs. Filling and sounding pipes shall extend to within one-half of their diameter from the bottom of the tank or from the surface of the striking plate in case of a sounding pipe. A flame screen of noncorrodible wire mesh shall be fitted in the throat of the filling pipe. Sounding pipes shall be kept closed at all times except during sounding.

(h) *Vent pipes.* Each tank shall be fitted with a vent the net cross-sectional area of which shall be not less than that of the filling pipe. The vent pipes shall terminate at least two feet above the weather deck and not less than three feet from any opening into living quarters or other below deck space. The ends of vent pipes shall terminate with U-bends and shall be fitted with flame screens or flame arrestors. The flame screens shall consist of a single screen of corrosion resistant wire of at least 30 x 30 mesh.

(i) *Gasoline tanks.* For requirements pertaining to gasoline tanks, see Subpart 59.05 of this subchapter.

§ 55.10–50 *Diesel fuel systems.*—(a) *Scope.* The piping shall comply with the requirements of §§ 55.10–35, 55.10–60 and 55.10–65, except as otherwise provided in this section.

(b) *Material and workmanship.* Fuel supply piping shall be of seamless steel or annealed seamless copper or brass pipe or tubing.

(c) *Installation.* The piping shall run in sight whenever practicable, protected from mechanical injury and effectively secured against vibration.

(d) *Shut-off valves.* Shut-off valves shall be installed in the fuel supply lines, one as close to each tank as practicable, and one as close to each fuel pump as practicable. Valves shall be accessible at all times.

(e) *Outlets and drains.* Outlets for drawing fuel or draining water from the fuel oil system are not permitted in engine compartment.

(f) *Filling pipe.* Tank filling pipes on motorboats and motorvessels of less than 100 gross tons and tank barges shall terminate on an open deck and shall be fitted with suitable shut-off valves, deck plugs, or caps.

(g) *Vent pipes.* Each tank shall be fitted with a vent pipe complying with § 55.10–45 (h).

(h) *Diesel fuel tanks.* For requirements pertaining to diesel fuel tanks see Subpart 59.10 of this subchapter.

(R. S. 4405, as amended, 4462, as amended; 46 U. S. C. 375, 416. Interpret or apply R. S. 4399, 4400, 4417, 4417a, 4418, 4421, 4426–4431, 4433, 4434, 4453, as amended, sec. 14, 29 Stat. 690, 41 Stat. 305, 49 Stat. 1544, sec. 17, 54 Stat. 166, sec. 3, 54 Stat. 346, sec. 2, 54 Stat. 1028, sec. 5, 55 Stat. 244, 245, as amended; 46 U. S. C. 361, 362, 391, 391a, 392, 399, 404–409, 411, 412, 435, 489, 366, 363, 367, 526p, 1333, 463a, 50 U. S. C. App. 1275.)

SUBPART 55.16—LIQUEFIED PETROLEUM GASES FOR COOKING AND HEATING

Subpart 55.16, consisting of §§ 55.16–1 to 55.16–20, inclusive, is amended to read as follows:

Sec.
55.16–1 Scope.
55.16–5 Definition.
55.16–10 Approvals.
55.16–15 Installation.
55.16–20 Ventilation of compartments containing gas-consuming appliances.
55.16–25 Odorization.
55.16–30 Operating instructions.
55.16–35 Markings.

AUTHORITY: §§ 55.16–1 to 55.16–35 issued under R. S. 4405, as amended, 4462, as amended 46 U. S. C. 375, 416. Interpret or apply R. S. 4399, 4400, 4417, 4417a, 4418, 4421, 4426–4431, 4433, 4434, 4453, 4461, as amended, sec. 14, 29 Stat. 690, 41 Stat. 305, 49 Stat. 1544, sec. 17, 54 Stat. 166, sec. 3, 54 Stat. 346, sec. 2, 54 Stat. 1028, sec. 5, 55 Stat. 244, 245, as amended; 46 U. S. C. 361, 362, 391, 391a, 392, 399, 404–409, 411, 412, 435, 489, 366, 363, 367, 526p, 1333, 463a, 50 U. S. C. App. 1275.

§ 55.16–1 *Scope.* (a) Liquefied petroleum gas may be used for cooking and heating on all vessels subject to inspection by the Coast Guard, except passenger vessels, provided the installation complies with the requirements of this subpart.

§ 55.16–5 *Definition.* (a) For the purpose of this subpart the term "liquefied petroleum gas" means any liquefied inflammable gas which is composed predominantly of hydrocarbons or mixtures of hydrocarbons, such as propane, propylene, butane, butylene, or butadiene, and which has a Reid [1] vapor pressure exceeding 40 pounds per square inch absolute at 100° F.

§ 55.16–10 *Approvals*—(a) *Gas appliances.* All gas-consuming appliances used for cooking and heating shall be of a type approved by the Commandant, and shall be tested and approved for liquefied petroleum gas service by the American Gas Association and shall bear the Approval Seal of the American Gas Association Testing Laboratories.

(b) *Cylinders.* (1) Cylinders in which liquefied petroleum gas is stored and handled shall be constructed, tested, and marked in accordance with Interstate Commerce Commission Specifications effective at the date of manufacture.

(2) All liquefied petroleum gas cylinders in service shall be periodically tested and marked with the retest date in accordance with the Interstate Commerce Commission regulations.

(3) Each cylinder shall be fitted with one or more safety relief devices approved as to type, size, pressure, setting and location, by the Bureau of Explosives in conformance with the Interstate Commerce Commission regulations.

(c) *Valves, regulators and vaporizers.* Each regulator, manifold valve assembly, cylinder valve, gauging device, relief valve, excess flow valve and shut-off valve, and vaporizer, when used, shall be tested and approved by, and bear the label of the Underwriters Laboratories, Inc., or other recognized testing laboratory.

(d) *Plan approval.* In triplicate, showing the location and installation of gas-burning appliances, cylinders, regulators, manifolds and all piping shall be submitted for approval by the Commandant.

§ 55.16–15 *Installation*—(a) *Cylinders.* (1) Cylinders shall be installed in a substantially constructed and firmly fixed metal inclosure located on or above the weather deck. The cylinder inclosure shall have access from the weather deck only. The inclosure shall be provided with top and bottom ventilation consisting of a fresh air inlet pipe and an exhaust pipe both entering through top of the inclosure. The inclosure shall be so constructed that when the access opening is closed, no gas can escape except through the ventilating system.

(2) Cylinders shall be securely fastened and supported within the metal inclosure. The cylinders shall be so mounted as to be readily accessible and capable of easy removal for refilling and inspection. Where possible, cylinders shall be mounted in an upright position.

(3) Storage of spare and empty cylinders shall be within the metal inclosure or they shall be properly checked on the weather deck.

(b) *Valves, regulators and vaporizers.* (1) A spring-loaded relief valve shall be installed in the system to protect the cylinders from excessive pressure. The relief valve shall comply with the requirements of § 55.16–10 (b) (3), and shall be located and vented within the metal inclosure.

(2) The low pressure side of all pressure regulators shall be protected against excessive pressure by means of a suitable relief valve which may be integral with or independent of the pressure regulator.

(3) All relief valve and regulator vents shall discharge into the metal inclosure.

(4) All valves, manifolds and regulators shall be securely mounted in locations readily accessible for inspection, maintenance and testing, and shall be adequately protected.

(5) Valves in the assembly of multiple cylinder systems shall be so arranged that the replacement of empty cylinders can be made without shutting down the flow of gas in the system.

(6) A shut-off valve shall be installed in each branch connection, located as close as possible to the gas-consuming appliances.

(7) The installation of vaporizers shall be subject to approval by the Commandant.

(c) *Piping and fittings.* (1) The piping between the cylinders and appliances shall be seamless annealed copper tubing or such other seamless tubing as may be approved by the Commandant.

(2) All piping shall be installed so as to provide minimum interior runs with adequate flexibility. The tubing connections shall be flared and the number held to a minimum. The piping at the cylinder outlets shall be fitted with flexible connections to minimize the effect of cylinder movement on the outlet piping.

(3) All piping or tubing shall be leak tested after installation as required by § 55.16–30 (j) and at each regular annual inspection at a pressure of not less than the normal operating pressure of the system. Tests may be made by qualified persons acceptable to the Officer in Charge, Marine Inspection, and one copy of the report of test shall be posted and the other forwarded to the Officer in Charge, Marine Inspection, where the test was made.

(d) *Electrical.* No electrical connections shall be made within the cylinder inclosure.

§ 55.16–20 *Ventilation of compartments containing gas-consuming appliances.* (a) Compartments containing gas-consuming appliances which are located above the weather deck shall be fitted with at least two natural ventilator ducts led from atmosphere and extending to the floor level and to the overhead of the compartment. Mechanical ventilation may also be provided.

(b) Where compartments in which gas-consuming appliances are located entirely below the weather deck, mechanical or power ventilation shall be provided with sufficient capacity to effect a change of air at least once every six minutes.

§ 55.16–25 *Odorization.* (a) All liquefied petroleum gases shall be effectively odorized by an agent of such character as to indicate positively, by a distinctive odor, the presence of gas down to concentration in air of not over one-fifth the lower limit of combustibility.

§ 55.16–30 *Operating instructions.* (a) Before opening a cylinder valve, the outlet of the cylinder shall be connected tightly to system; and in the case where only a single cylinder is used in the system, all appliance valves and pilots shall be shut off before the cylinder valve is opened.

(b) Before opening cylinder valve after connecting it to system, the cylinder shall be securely fastened in place.

(c) When cylinders are not in use their outlet valves shall be kept closed.

(d) Cylinders when exhausted shall have their outlet valves closed.

(e) Nothing shall be stored in the metal enclosure except liquefied petroleum gas cylinders and permanently fastened parts of the system.

(f) Valve protecting caps, if provided, shall be firmly fixed in place on all cylinders not attached to the system. Caps for cylinders in use may remain in the cylinder enclosure if rigidly fastened thereto.

(g) The opening to the cylinder enclosure shall be closed at all times except when access is required to change cylinders or maintain equipment.

(h) Gas pressure to consuming appliances should be approximately eleven inches water column (6.4 ounces per square inch).

(i) No smoking is permitted in the vicinity of the cylinder enclosure when access to inclosure is open.

(j) Tests for gas leaks should be made with a soap solution or low freezing point liquids but in no case shall a flame be used.

(k) Report any presence of gas odor to ----------

§ 55.16–35 *Markings.* (a) The outside of the cylinder inclosure housing liquefied petroleum gas cylinders, valves and regulators shall be marked as follows:

Liquefied Petroleum Gas
Keep Open Fires Away.
Operating Instructions
Inside and In——

(b) Operating Instructions as listed in § 55.16–30 shall be framed under glass and shall be posted prominently, both in the interior of the metal enclosure and near the most frequently used gas consuming device, so they may be easily read.

[1] As determined by the American Society for Testing Materials Standard D–323 (most recent revision)—Method of Test for Vapor Pressure of Petroleum Products (Reid Method).

PART 56—ARC WELDING, GAS WELDING, AND BRAZING

SUBPART 56.01—ARC WELDING AND GAS WELDING

1. Sections 56.01–25 and 56.01–30 are amended to read as follows:

§ 56.01–25 *Classes of arc-welded pressure vessels.* For the purpose of the uniform application of the regulations in this subchapter, arc-welded pressure vessels shall be divided into three classes as given in Table 56.01–25.

TABLE 56.01–25.—PRESSURE VESSEL CLASSIFICATION

Class of pressure vessel	Service	Limitations: Pressure, p. s. i.	Limitations: Temperature, ° F.	Maximum metal thickness, in inches
I	Power boilers: All pressure parts	Over 30	All	None
	Unfired pressure vessels containing:			
	(a) Vapors or gases	Over 600	Over 700	None
	(b) Liquids	Over [1] 600	Over 400	None
	(c) Dangerous substances	(2)	(2)	
II	Unfired pressure vessels containing:			
	(a) Vapors or gases	31 to 600, inclusive	276 to 700, inclusive	[3] 1¼
	(b) Liquids	201 to [1] 600, inclusive	251 to 400, inclusive	[3] 1¼
	(c) Dangerous substances	(2)	(2)	
III	Heating boilers:			
	(a) Steam	30 and under	275 and under	
	(b) Hot water	30 and under	250 and under	
	Unfired pressure vessels containing:			
	(a) Vapors or gases [4]	30 and under	275 and under [5]	[3] ⅝
	(b) Liquids [4]	200 and under	250 and under [5]	[3] ⅝

[1] This pressure limitation does not apply to vessels containing liquids under hydrostatic pressure at atmospheric temperatures.

[2] Stored or stowed dangerous substances may be carried in either Class I or Class II pressure vessels within the pressure and temperature limits prescribed in Subchapter N (Explosives or Other Dangerous Articles or Substances and Combustible Liquids on Board Vessels) of this chapter.

[3] The limit of plate thickness does not apply to heads formed from a single plate.

[4] Class III pressure vessels shall not be used for the storage or stowage of lethal gases or liquids or such dangerous substances which are regulated by the requirements of Subchapter N (Explosives or other Dangerous Articles or Substances and Combustible Liquids on Board Vessels) of this chapter.

[5] Class III pressure vessels shall not be used for the storage or stowage of gases or liquids at temperatures exceeding their boiling point at atmospheric pressure.

§ 56.01–30 *Welded joint efficiencies.* (a) The maximum joint efficiencies to be used in the design of pressure vessels or parts of pressure vessels fabricated by arc or gas welding shall be as given in Table 56.01–30 (a). The joint efficiencies shall depend on the type of joint welded and on whether or not the pressure vessel is stress-relieved or radiographed.

(b) A maximum joint efficiency of 0.95 may be used for Class I pressure vessels provided the weld reinforcement is removed so that the longitudinal weld(s) on both sides of the joint is substantially flush with the surface of the plates, and on all intersecting butt-welded circumferential joints the reinforcement is similarly removed five times the plate thickness (or 6 inches whichever is less) on each side adjacent to any longitudinal joint.

TABLE 56.01–30 (a).—MAXIMUM ALLOWABLE EFFICIENCIES FOR WELDED JOINTS [1]

Type of joint	Limitations	Basic joint efficiency (percent) [2]	Radiographed	Thermally stress relieved	Maximum joint efficiency (percent)
Double-welded butt joint	None	90	R	R	[3] 95
	Class I welded pressure vessel		R	R	90
Single-welded butt joint with backing strip. [4]	Long. joint maximum thickness 1¼ inches. No thickness limitation on circumferential joints. If welds not radiographed and stress-relieved this type joint limited to Class II and III welded pressure vessel.	80	R	NR	85
			NR	R	85
			NR	NR	80
Single-welded butt joint without backing strip. [5]	Circumferential joints only. Maximum thickness ⅝ inch. Limited to Class II and III welded pressure vessel.	70	NR	R	75
			NR	NR	70
Double-welded full-fillet lap joints.	Long. joints maximum thickness ⅝ inch. Circumferential joints maximum thickness ⅝ inch. Limited to Class III welded pressure vessel.	65	NR	R	70
			NR	NR	65

R—Indicates "Required."
NR—Indicates "Not Required."

[1] See § 56.01–25 for classes of welded pressure vessels and Subpart 56.10 for unfired brazed pressure vessel requirements.

[2] Spot examination required by § 56.05–6 unless specifically exempted.

[3] Weld reinforcement required to be removed (see § 56.01–30 (b)).

[4] Where not possible to employ double-welded butt joint the above type may be considered equivalent to a double-welded joint if the requirements of § 56.01–55 are met.

[5] In welding single-welded butt joints, complete penetration at the root is required, which must be demonstrated by the qualification of the procedure to be used. If complete penetration cannot otherwise be secured, the procedure shall include a backing ring or equivalent.

(R. S. 4405, as amended, 4462, as amended; 46 U. S. C. 375, 416. Interpret or apply R. S. 4399, 4400, 4417, 4417a, 4418, 4421, 4426–4431, 4433, 4434, 4453, as amended, sec. 14, 29 Stat. 690, 41 Stat. 305, 49 Stat. 1544, sec. 17, 54 Stat. 166, sec. 3, 54 Stat. 346, sec. 2, 54 Stat. 1028, sec. 5, 55 Stat. 244, 245, as amended; 46 U. S. C. 361, 362, 391, 391a, 392, 399, 404–409, 411, 412, 435, 489, 366, 363, 367, 526p, 1333, 463a, 50 U. S. C. App. 1275.)

2. Section 56.01–35 *Class III Welding* is cancelled.

(R. S. 4405, as amended, 4462, as amended; 46 U. S. C. 375, 416)

SUBPART 56.05—TESTS AND INSPECTION

1. Section 56.05–5 (a) and (b) are amended to read as follows:

§ 56.05–5 *Nondestructive tests.* (a) All longitudinal and circumferential arc- or gas-welded butt joints of Class I welded pressure vessels shall be radiographically examined throughout their length except as specifically exempted in other sections of this subchapter. Butt-welded pipe joints may be tested either by radiography or by the magnetic powder method.

(b) All welded joints to be radiographed shall be prepared as follows: The weld ripples or weld surface irregularities, on both the inside and outside, shall be removed by any suitable mechanical process, to a degree such that the resulting radiographic contrast due to any remaining irregularities cannot mark or be confused with that of any objectionable defect. Also the weld surface shall merge smoothly into the plate surface. The finished surface of the reinforcement may have a crown of approximately uniform amount not to exceed the following:

Plate thickness, inches:	*Thickness of reinforcement, inches*
Up to ½, inclusive	1/16, maximum.
Over ½ to 1, inclusive	1/16 to 3/32.
Over 1	3/32 to 1/8.

Single-welded butt joints made the equivalent of double-welded butt joints in accordance with § 56.01–55, may be radiographed without removal of backing strip provided the backing strip image will not interfere with the interpretation of resultant radiographs.

(R. S. 4405, as amended, 4462, as amended; 46 U. S. C. 375, 416. Interpret or apply R. S. 4399, 4400, 4417, 4417a, 4418, 4421, 4426–4431, 4433, 4434, 53, as amended, sec. 14, 29 Stat. 690, 41 Stat. 305, 49 Stat. 1544, sec. 17, 54 Stat. 166, sec. 3, 54 Stat. 346, sec. 2, 54 Stat. 1028, sec. 5, 55 Stat. 244, 245, as amended; 46 U. S. C. 361, 362, 391, 391a, 392, 399, 404–409, 411, 412, 435, 489, 366, 363, 367, 526p, 1333, 463a, 50 U. S. C. App. 1275)

2. Section 56.05–10 *Hydrostatic and hammer tests* is cancelled.

(R. S. 4405, as amended, 4462, as amended, 46 U. S. C. 375, 416)

3. Section 56.05–15 *Inspection* is cancelled.

(R. S. 4405, as amended, 4462, as amended; 46 U. S. C. 375, 416)

PART 57—MAIN AND AUXILIARY MACHINERY

Part 57 is amended by changing the title from "Installations, Tests, Inspections, Repairs, and Miscellaneous Requirements" to "Main and Auxiliary Machinery"; §§ 57.01–1 to 57.20–20, inclusive, are cancelled; and §§ 57.01–1 to 57.20–5 are added reading as follows:

SUBPART 57.01—GENERAL REQUIREMENTS

Sec.
57.01–1 Scope.
57.01–5 Applicable standards.
57.01–10 Fuel for internal combustion engines on passenger vessels.

SUBPART 57.05—MAIN PROPULSION MACHINERY

57.05–1 Material, design and construction.
57.05–5 Astern power.

SUBPART 57.10—INTERNAL COMBUSTION ENGINE INSTALLATIONS

57.10–1 Scope.
57.10–5 Gasoline engine installations.
57.10–10 Diesel engine installations.

SUBPART 57.20—REFRIGERATING MACHINERY

Sec.
57.20–1 Installation of refrigerating machinery.
57.20–5 Small portable, self-contained units.

AUTHORITY: §§ 57.01–1 to 57.20–5 issued under R. S. 4405, as amended, 4462, as amended; 46 U. S. C. 375, 416. Interpret or apply R. S. 4399, 4400, 4417, 4417a, 4418, 4426–4431, 4433, 4434, 4453, 4491, as amended; sec. 14, 29 Stat. 690, sec. 10, 35 Stat. 428, 41 Stat. 305, secs. 1 and 2, 49 Stat. 1544, sec. 17, 54 Stat. 166, sec. 3, 54 Stat. 346, sec. 2, 54 Stat. 1028, sec. 5, 55 Stat. 244, 245, as amended; 46 U. S. C. 361, 362, 391, 391a, 392, 404–409, 411, 412, 435, 489, 366, 395, 367, 526p, 1333, 463a, 50 U. S. C. App. 1275.

SUBPART 57.01—GENERAL REQUIREMENTS

§ 57.01–1 *Scope.* (a) The regulations in this part contain requirements for the design and construction of main and auxiliary machinery installed on vessels subject to inspection by the Coast Guard, except as otherwise prescribed in this subchapter.

§ 57.01–5 *Applicable standards.* In general the applicable standards established by the American Bureau of Shipping may be considered as standard for the design, construction, and testing of main and auxiliary machinery, except as modified in this subchapter.

§ 57.01–10 *Fuel for internal combustion engines on passenger vessels.* All internal combustion engines installed on passenger vessels exceeding 100 gross tons whether for propulsion or auxiliaries shall be driven by fuel having a flash point exceeding 110° F.

SUBPART 57.05—MAIN PROPULSION MACHINERY

§ 57.05–1 *Material, design and construction.* The material, design, construction and workmanship of main and auxiliary machinery shall be at least equivalent to the standards established by the American Bureau of Shipping or other recognized classification society.

§ 57.05–5 *Astern power.* All passenger vessels shall have sufficient power for going astern to secure proper control of the ship in all normal circumstances.

SUBPART 57.10—INTERNAL COMBUSTION ENGINE INSTALLATIONS

§ 57.10 *Scope.* The requirements in this subpart apply to all vessels subject to inspection. The requirements governing the installation of internal combustion engines on motorboats and motor vessels of more than 15 gross tons carrying passengers for hire shall be effective on new vessels or vessels converted to passenger service for the first time, the construction of which is commenced on or after December 1, 1945, and to all existing vessels as far as it is practicable.

§ 57.10–5 *Gasoline engine installations*—(a) *Engine design.* All installations shall be of marine type engines suitable for the intended service, designed and constructed in conformance with the requirements of this subchapter.

(b) *Carburetors.* (1) Drip collectors shall be fitted under all carburetors, except the down-draft type, to prevent fuel leakage from reaching the bilges and so arranged as to permit ready removal of such fuel leakage. Drip collectors shall be covered with flame screens.

(2) Carburetors of all engines shall be fitted with effective backfire flame arrestors. Backfire flame arrestors used on new installations or replacements shall be of approved type, design, construction and tested in conformance with Subpart 162.015 of Subchapter Q (Specifications) of this chapter. Air intakes shall be so directed that backfire cannot blow down into the bilge.

(c) *Exhaust manifold.* The exhaust manifold shall either be water-jacketed and cooled by discharge from a pump which operates whenever the engine is running, or woodwork within 9 inches shall be protected by ¼-inch asbestos board covered with not less than No. 22 USSG galvanized sheet iron or nonferrous metal. A dead air space of ¼ inch shall be left between the protecting asbestos and the wood, and a clearance of not less than 2 inches maintained between the manifold and the surface of such protection.

(d) *Exhaust pipe.* (1) The exhaust pipe shall be gas tight and the installation shall comply with one of the following requirements:

(i) All of the engine cooling water shall be discharged through the exhaust pipe when water cooled and shall enter the exhaust pipe at a point as near to the manifold as practicable.

(ii) A length of not less than 12 diameters of the exhaust pipe adjacent to the manifold shall be water-jacketed and cooled in the same manner as the manifold. The remainder of the pipe shall be kept clear of internal woodwork at least 1½ inches.

(iii) Woodwork within 6 inches of any part of the exhaust pipe shall be protected by ¼-inch asbestos board covered with not less than No. 22 USSG galvanized sheet iron or nonferrous metal. A dead air space of ¼ inch shall be left between the protecting asbestos and the wood, and a clearance of not less than ½ of its diameter shall be maintained between the pipe and the surface of such protection.

(2) In all of the above cases described in subparagraph (1) of this paragraph, the exhaust pipe shall be properly supported by noncombustible hangers or blocks and protective gratings shall be provided at such locations where persons or gear might come in contact therewith. Arrangements shall be made to provide access to the exhaust pipe throughout its length. A spark arrester shall be installed in each exhaust line.

(3) Where exhaust lines pass through watertight bulkheads, noncombustible packings shall be installed. Exhaust piping shall be led to the point of escape without traps and with a minimum number of bends and elbows. 90 degree elbows or bends of less than 5 diameters radius are not permitted.

(4) Where flexibility is necessary a section of flexible metallic hose, or suitable nonmetallic hose may be used if the exhaust is water cooled.

§ 57.10–10 *Diesel engine installations.* (a) The requirements of § 57.10–5 (a), (c) and (d) shall apply to diesel engine installations.

(b) On installations of engines of the semi-diesel or hot-bulb type, woodwork within 3 feet of starting torches shall be protected by at least ¼-inch asbestos board covered with sheet metal and a dead air space of ¼ inch between the asbestos board and the wood.

SUBPART 57.20—REFRIGERATING MACHINERY

§ 57.20–1 *Installation of refrigerating machinery.* (a) Where refrigerating machines are installed in which anhydrous ammonia is used as a refrigerant, such machines shall be located in a well-ventilated, isolated compartment, preferably on the deck, but in no case shall it be permissible to install such machines in the engine-room space unless it is vented and isolated so as to eliminate any hazard from gas escaping to the engine room. Absorption machines using a solution of aqua ammonia and machines using carbon anhydride (CO_2 gas) are exempt from this requirement, provided the maximum charges that might be released in the event of breakage do not exceed 300 pounds.

(b) Machinery compartments containing equipment for ammonia shall be fitted with a sprinkler system providing an effective water spray and having a remote control device located outside the compartment.

(c) All refrigeration compressor spaces shall be effectively ventilated and drained and shall be separated from the insulated spaces by watertight bulkhead, unless otherwise approved.

§ 57.20–5 *Small portable, self-contained units.* The requirements of this subpart shall not apply to small, portable, self-contained units.

PART 58—REPAIRS TO BOILERS, UNFIRED PRESSURE VESSELS AND APPURTENANCES

Part 58 is amended to read as follows:

SUBPART 58.01—GENERAL REQUIREMENTS

58.01–1 Scope.
58.01–5 Repairs, replacements, or alterations.

SUBPART 58.05—WELDING REPAIRS TO NEW PRESSURE VESSELS

58.05–1 Welding repairs when plate defects develop or are discovered during fabrication.

SUBPART 58.10—WELDING REPAIRS TO BOILERS AND UNFIRED PRESSURE VESSELS IN SERVICE

58.10–1 Scope.
58.10–5 Cracks.
58.10–10 Corroded surfaces.
58.10–15 Rivets and staybolts.
58.10–20 Patches in shells and tube sheets.
58.10–25 Stayed areas.
58.10–30 Seal welding.
58.10–35 Wrapper plates and back heads.

SUBPART 58.15—MISCELLANEOUS BOILER REPAIRS

58.15–1 Furnace repairs.
58.15–5 Stayed furnaces and combustion chambers.
58.15–10 Bagged or blistered shell plates.

SUBPART 58.20—WELDING REPAIRS TO CASTINGS

58.20–1 Welding repairs to defective carbon-steel castings.
58.20–5 Welding repairs to defective alloy-steel castings.

AUTHORITY: §§ 58.01–1 to 58.20–5 issued under R. S. 4405, as amended, 4462, as amended; 46 U. S. C. 375, 416. Interpret or apply R. S. 4399, 4400, 4417, 4417a, 4418, 4426–4431, 4433, 4434, 4453, 4491, as amended, sec. 14, 29 Stat. 690, sec. 10, 35 Stat. 428, 41 Stat. 305, secs. 1, 2, 49 Stat. 1544, sec. 17, 54 Stat. 166, sec. 3, 54 Stat. 346, sec. 2, 54 Stat. 1028, sec. 5, 55 Stat. 244, 245, as amended; 46 U. S. C. 361, 362, 391, 391a, 392, 404–409, 411, 412, 435, 489, 366, 395, 367, 526p, 1333, 463a, 50 U. S. C. App. 1275.

SUBPART 58.01—GENERAL REQUIREMENTS

§ 58.01–1 *Scope.* The regulations in this part apply to the repairs of all boilers, unfired pressure vessels and appurtenances subject to inspection by the Coast Guard.

§ 58.01–5 *Repairs, replacements, or alterations.* (a) No repairs, replacements or alterations, except emergency repairs, etc., shall be made to machinery boilers, unfired pressure vessels, their mountings or internal fittings, safety valves, piping systems, or pressure appliances without prior approval by the Officer in Charge, Marine Inspection.

(b) Emergency repairs, replacements, or alterations shall be reported as soon as practicable to the Officer in Charge, Marine Inspection, at or nearest the first port where the vessel may call after such repairs are made.

(c) Repairs, replacements, or alterations to installations in service shall so far as practicable be made with materials and in the manner specified for new construction.

SUBPART 58.05—WELDING REPAIRS TO NEW PRESSURE VESSELS

§ 58.05–1 *Welding repairs when plate defects develop or are discovered during fabrication*—(a) *Cracked plates.* Plates which crack during cold forming operations as a result of localized stress raisers such as sharp plate edges, minor localized surface imperfections, and fractures which subsequent microstructure shows to be caused by coarse grain size may be repaired if authorized by the Commandant. Prior to such repairs being authorized, information shall be furnished as follows:

(1) Heat treatment to be employed prior to undertaking repairs.

(2) Method of excavating defective material and type of groove to be employed.

(3) Method of examining excavation to insure that all defective material has been removed.

(4) Welding procedure to be employed in effecting the repair.

(5) Heat treatment to be employed during and after welding.

(6) Type of nondestructive test to be made to insure that repair is satisfactory.

(b) *Laminations.* Laminations or inclusions in the plate which initially appear in the heat affected zone during welding operations or appear during the drilling of tube holes may be repaired if authorized by the Commandant. Prior to such repairs being authorized information shall be furnished as follows:

(1) Method of excavating defective material and type of welding groove to be used if any.

(2) Method of examining excavation to insure that all defective material has been removed.

(3) Welding procedure to be employed in effecting repair.

(4) Heat treatment to be employed during and after welding.

(5) Type of nondestructive test to be made to insure that repair is satisfactory.

SUBPART 58.10—WELDING REPAIRS TO BOILERS AND UNFIRED PRESSURE VESSELS IN SERVICE

§ 58.10–1 *Scope.* (a) Repairs to boilers or unfired pressure vessels in service may be performed by welding provided the welding meets the applicable requirements of Part 56 of this subchapter. No repairs by welding shall be made, except temporary emergency repairs, without the prior approval of the Officer in Charge, Marine Inspection. Emergency repairs shall be replaced with permanent repairs meeting the requirements of this subchapter when the vessel returns to a port in which an Officer in Charge, Marine Inspection, is located, except in the case of minor repairs which in the opinion of the Officer in Charge, Marine Inspection, do not materially affect the safety of the boiler or pressure vessel.

(b) Repair welding of power boilers not meeting requirements for class I welded pressure vessels is prohibited unless the stress is carried by such other type(s) of construction complying with the requirements of this subchapter, and where the adequacy of the boiler design is not solely dependent upon the strength of the welds.

(c) Only welded repairs as specified in this subchapter are permitted on boilers and unfired pressure vessels. The welding repairs allowed by this subpart apply only to boilers and unfired pressure vessels fabricated of carbon steel. Welding repairs to boilers and unfired pressure vessels fabricated of alloy steel will be given special consideration by the Commandant. Such other method of repairs by means of welding not covered in this subchapter shall be referred to the Commandant and may be authorized by him if, in his opinion, it meets the intent of this subchapter.

§ 58.10–5 *Cracks.* (a) Cracks extending from the calking edge of plates to the rivet holes of circumferential joints may be welded provided the cracks are veed out so that complete penetration of the weld metal is secured.

(b) Circumferential cracks from rivet hole to rivet hole in girth joints may be welded provided there are not more than three consecutive cracked ligaments nor more than a total of six cracked ligaments in any one girth joint.

(c) Cracks in staybolted plates may be welded provided they are located entirely within staybolted areas and the total length of any crack or series of consecutive cracks does not exceed two staybolt pitches.

(d) Cracks in plain, circular or Adamson ring or similar type furnaces may be welded provided any one crack does not exceed 12 inches in length and after completion the weld is stress-relieved as required by § 56.01–70 of this subchapter. Cracks in corrugated furnaces may be repaired by welding provided any one crack does not exceed 20 inches in length.

(e) Fire cracks may be welded at riveted door openings extending from the edge of the plate, but not more than 2 inches beyond the centerline of the rivet holes.

(f) Cracks may be welded between tube holes in the shell of water-tube boiler drums, provided there are not more than two cracks in any one row in any direction, nor more than a total of four cracks in a drum, and further provided the welding meets the requirements of this subchapter for class I welded pressure vessels and is approved by the Commandant.

(g) All cracks permitted to be repaired under this subpart shall be excavated to sound metal by grinding, flame gouging or chipping out the defective metal to form a clean welding groove. The first two methods of excavation are preferable, either a V groove or U groove wherein complete penetration of the weld metal is secured may be used. After excavation is completed and prior to welding, the excavated area shall be examined by magnetic particle testing to insure that the entire crack was excavated. When the reverse side of the weld is accessible the root of the weld shall be chipped or ground out to insure a clean surface of the originally deposited metal and the resultant groove welded to obtain a sound weld having complete penetration. During welding a preheat of 200 degrees plus or minus 50 degrees F. shall be maintained by controlled temperature. For thicknesses exceeding ¾ inch, suitable U grooves should be employed. A welding sequence shall be used so as to equalize welding stresses. Each complete bead of welding except the last shall be peened before depositing the succeeding bead.

(h) After cracks originating in tube or rivet holes are repaired by welding, the holes shall be properly reamed and the weld reinforcing ground flush with the plate in way of rivet heads.

(i) Flat tube sheets in fire-tube boilers which have corroded or where cracks exist in the ligaments may be repaired by welding.

(j) The welding repairs to drums of power boilers, except as otherwise permitted in this subpart, is prohibited.

§ 58.10–10 *Corroded surfaces.* (a) Corroded surfaces in the calking edges of circumferential seams may be built up by welding to the original thickness under the following conditions:

(1) The thickness of the original metal to be built up between rivet holes and calking edge shall not be less than one-fourth of the diameter of the rivet hole, and the portion of the calking edge to be thus reinforced shall not exceed 30 inches in length in a circumferential direction.

(2) In all repairs to circumferential seams by welding, the rivets shall be removed over the portions to be welded for a distance of at least 6 inches beyond the repaired portion.

(3) After repairs are made the rivet holes shall be reamed before the rivets are re-driven.

(b) It is not permissible to build up or reinforce a grooved or corroded area of unstayed internal surfaces by means of welding, except that widely scattered pit holes may be built up by welding.

(c) Where external corrosion has reduced the thickness of flat plates around hand holes to an extent of not more than 40 percent of the original thickness and for a distance not exceeding 2 inches from the edge of the hole, the plate may be built up by welding.

(d) Where stayed sheets have corroded to a depth not exceeding 40 percent of their original thickness, they may be reinforced or built up by welding. Where the staybolts are fitted with riveted heads, the staybolts in the reinforced area shall be renewed in accordance with the provisions of Subparts 52.30 and 52.35 of this subchapter, but where the staybolts are fitted with nuts, the nuts may be removed and after reinforcing has been applied, collars may be welded around the staybolts in lieu of the nuts. Such reinforced areas shall not exceed 400 square inches nor more than 30 inches in one direction. Two such areas in any one plate may be reinforced: *Provided*, That the distance between the reinforced surfaces is not less than 30 inches.

(e) When the corroded portion of a staybolted surface exceeds 400 square inches, it is permissible to repair the same by cutting out the defective portion and replacing it with a new plate, the edges of the new plate to be welded in position. In such cases, new staybolts shall be fitted in accordance with the requirements of Subparts 52.30 and 52.35 of this subchapter and where welding is performed through a line of staybolts, welded collars as required by Figure 52.35–1 of this subchapter shall be used to attach the staybolts.

§ 58.10–15 *Rivets and staybolts.* (a) It is not permitted to reinforce or build up by welding the heads of rivets or staybolts that have deteriorated. Such rivets or staybolts shall be replaced. The seal welding of rivet heads to secure tightness is prohibited.

(b) Where leaks develop around staybolts which are otherwise in good condition, the nuts may be replaced with a beveled collar formed around the end of the stay by means of welding. In such cases, the depth of collar measured on the stay and the width measured on the plate, shall be equal to one-half the diameter of the staybolt. (See Figure 52.35–1 of this subchapter.)

§ 58.10–20 *Patches in shells and tube sheets.* (a) Unreinforced openings in the shells or drums of boilers or pressure vessels, the diameter of which does not exceed the maximum diameter of an unreinforced opening, in accordance with Figures 52.25–15 (b1) and 52.25–15 (b2) of this subchapter, may be closed by the use of a patch or plate inside the drum or shell and sealed against leakage by welding. Such plates shall have a diameter of at least 2 inches larger than the diameter of the hole and shall have a thickness equal to the thickness of the plate to which it is attached. It is not permissible to insert such patches in the shell or head flush with the surrounding plate unless the requirements of this subchapter for Class I welded pressure vessels are met.

(b) Portions of tube sheets which have deteriorated may be renewed by replacing the wasted portion with a new section. The ligaments between the tube holes may be joined by means of welding and staytubes, or other acceptable means of lowering the stress on the repaired section may be installed if in the judgment of the Officer in Charge, Marine Inspection, it is necessary.

(c) The edge preparation and preheat of butt-welded joints employed in the renewal of defective or corroded boiler plates shall comply with the requirements of § 58.10–5 (g).

§ 58.10–25 *Stayed areas.* Welding repairs are permitted in staybolted areas or areas adequately stayed by other means so that should failure of the welds occur the stress will be carried by stays. The welds shall be located entirely within staybolted areas which prohibit welds passing through the outer row of stays.

§ 58.10–30 *Seal welding.* Where leaks occur in riveted joints or connections, they shall be carefully investigated to determine the cause. Such leaks may be made tight by seal welding the edge, if, in the opinion of the Officer in Charge, Marine Inspection, this will make a satisfactory repair.

§ 58.10–35 *Wrapper plates and back heads.* Wrapper plates and back heads may be renewed in whole or repaired as follows:

(a) Wrapper plates or back heads shall be cut between two rows of staybolts or on a line of staybolts where the thickness is approximately the same as the original construction. If welding is employed on a line of staybolts, the staybolts shall be fitted with a welded collar as required in Figure 52.35–1 of this subchapter.

(b) The edges of wrapper plates riveted to tube sheets and back heads shall be removed by cutting out the rivets.

(c) The edges of existing plates and new plates shall be beveled by chipping, flame cutting, or grinding so as to form a suitable groove whereby complete penetration of the weld metal will be obtained. The edge preparation and preheat shall comply with the requirements of § 58.10–5 (g).

(d) The edges of the new plate shall be butt-welded and the plate shall be riveted to the flanges of the tube sheet and back heads and the staybolts renewed.

(e) Sections of wrapper plates of combustion chambers outside of stayed areas may be repaired by welding provided the welded joints are stress-relieved by means of controlled heat and the joints are nondestructively tested.

SUBPART 58.15—MISCELLANEOUS BOILER REPAIRS

§ 58.15–1 *Furnace repairs.* (a) Where corrugated or plain furnaces or flues are distorted to a difference of 1½ inches in diameter (that is 1½-inch deviation from a true circle), they shall be forced back to a true circular shape, and the Officer in Charge, Marine Inspection, may require strong-backs or other acceptable means of support to hold the furnace from future collapse if in his opinion such action is necessary.

(b) Where the distortion is in excess of 1½ inches, the furnace shall be forced back to practically a true circle or adequately stayed as found necessary in the judgment of the inspector.

(c) Where the distortion does not exceed 1½ inches it will not be necessary to force the furnace back to a true circle if the allowable pressure is reduced in the ratio of 1½ percent for each 1/10 of an inch that the furnace is out of round. However, if the maximum distortion does not exceed 1 inch and the length of the distorted area is not more than three corrugations, or if the maximum distortion does not exceed ¾ inch for a length greater than three corrugations of distorted area, the repairs or reduction in pressure will not be required unless considered necessary by the inspector.

(d) When it becomes necessary to rivet a patch to a furnace or other part of the heating surface, the riveted patch shall be placed on the water side of the plate in order not to form a pocket in which sediment may collect.

(e) Furnace crowns which have become distorted, not in excess of the limitations provided in paragraph (c) of this section, may be repaired by pumping back the distorted section to as nearly a true circle as possible and reinforcing the same by means of a ring, arc or gas welded to the distorted corrugation as shown in Figure 58.15–1 (e), the welding to be done by qualified welders using acceptable welding electrodes in accordance with § 56.01–20 of this subchapter.

§ 58.15–5 *Stayed furnaces and combustion chambers.* (a) Where the plate forming the walls of stayed furnaces or combustion chambers becomes bulged between staybolts, repairs may be made by inserting an additional staybolt in the center of such space supported by the four staybolts.

(b) Where it is desired to rivet a patch to the wall of a stayed furnace or combustion chamber, the defective portion of the plate shall be cut away until solid material is reached, the patch shall be riveted on the water side, and the staybolts renewed, and extended through the new plate.

§ 58.15–10 *Bagged or blistered shell plates.* (a) When the shell plates of cylindrical boilers which are exposed to the radiant heat of the fire become bagged or blistered, it shall be the duty of the chief engineer in charge of the vessel to notify the Officer in Charge, Marine Inspection, for examination before raising steam on the boiler.

(b) Where the shell plate is bagged due to overheating, the Officer in Charge, Marine Inspection, may, if in his judgment it is practicable, permit the same to be driven back to its original position.

(c) Where the shell plate has blistered, bagged, or bulged to such an extent that there is an appreciable thinning of the plate, the Officer in Charge, Marine Inspection, shall require the defective portion to be cut away and the shell repaired by fitting a patch of steel plate conforming to the requirements of Subpart 51.04 of this subchapter in place of the defective portion, care being taken that the riveting schedule of the patch is so arranged as to give the plate sufficient strength to withstand the stress placed on it in service.

meet the chemical and physical properties of the base metal.

(g) The defective material removed shall be replaced using pipe welders qualified in accordance with Qualification Test No. 4 for the position in which the welding is to be done as given in § 56.01–10 of this subchapter. The use of welders qualified to weld plate shall be permitted provided the welding is done in the flat position.

(h) Completed welds shall be inspected for cracks and other defects by magnetic particle testing, and in the case of major repairs, the welded area shall be examined by radiography if the casting is to be used in steam lines subject to boiler pressure, boiler feed, or blow-off lines. Prior to the use of magnetic particle inspection, the welds shall be made smooth and free of grooves or depressions.

(i) After repair of defective castings has been completed a hydrostatic test as outlined in Table 55.07–15 (e12) or 55.07–15 (e13) of this subchapter based upon the primary service pressure rating shall be applied.

§ 58.20–5 *Welding repairs to defective alloy-steel castings.* Defects in alloy-steel castings may be repaired by arc or gas welding in accordance with the requirements of § 58.20–1, provided the preheat and postheat employed are satisfactory for the material to be welded and process approval tests are conducted. The heat treatment and process approval tests shall be acceptable to the Commandant.

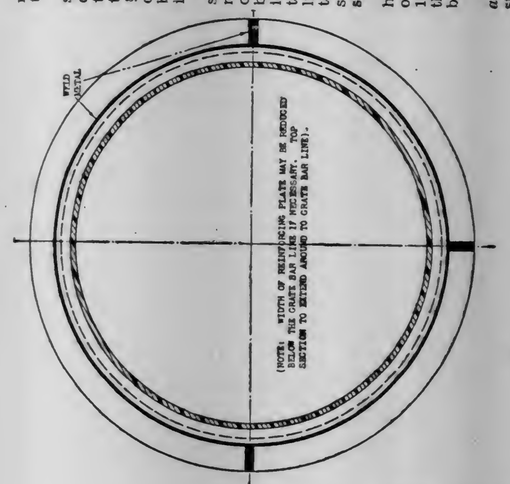
PART 59—INDEPENDENT INTERNAL COMBUSTION ENGINE FUEL TANKS

Part 59 is amended to read as follows:

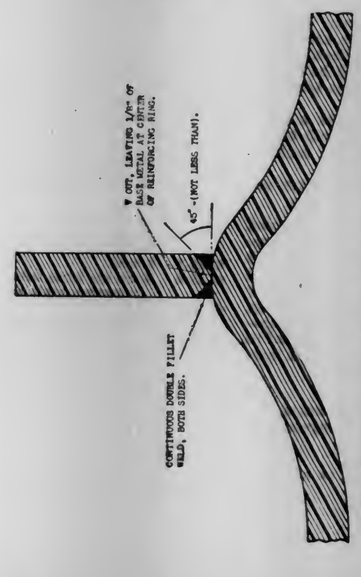
SUBPART 59.01—GENERAL REQUIREMENTS

Sec.

59.01–1 Scope.



SUBPART 59.05—GASOLINE FUEL TANKS



59.05–1 Construction.
59.05–5 Installation.
59.05–10 Tests.

SUBPART 59.10—DIESEL FUEL TANKS

59.10–1 Construction.
59.10–5 Installation.
59.10–10 Tests.

AUTHORITY: §§ 59.01–1 to 59.10–10 issued under R. S. 4405, as amended, 4462, as amended, 46 U. S. C. 375, 416. Interpret or apply R. S. 4399, 4400, 4417, 4418, 4426–4433, 4434,

(Note: Reinforcing ring to be put on in not more than three sections, and where the sections butt they are to be double V welded. Width of ring to be not less than 3" and thickness not to exceed that of the furnace shell. Welding to end flush with the surface of the ring and to be done by a welding operator duly qualified.)

FIGURE 58.15–1 (e)—Approved method of reinforcing furnace crowns by means of arc or gas welding.

SUBPART 58.20—WELDING REPAIRS TO CASTINGS

§ 58.20–1 *Welding repairs to defective carbon-steel castings.* (a) Defects in carbon-steel castings, such as valve bodies, pipe fittings, channels, covers, manifolds, and other pressure-containing appliances, may be repaired by arc or gas welding.

(b) Defects in carbon-steel castings shall be classed as follows:

(1) *Minor defects.* Minor defects are undersized defective areas resulting from oxyacetylene cutting, grinding, or chipping during cleaning operation, surface sand or slag defects or other slight surface defects except cracks or cold shuts. The excavated depth of a minor defect shall not exceed 20 percent of the wall thickness or 1 inch, whichever is the lesser. No lineal dimension shall exceed four times the wall thickness or be greater than 6 inches, whichever is the lesser.

(2) *Major defects.* All defects exceeding the depth or size given in subparagraph (1) of this paragraph shall be considered a major defect, which shall be repaired in the same manner as a minor defect. Repairs of major defects shall be nondestructively tested as required by paragraph (h) of this section.

(c) Prior to any welding being done, all defective material shall be removed until the base metal is shown to be sound. Defective areas of castings may be removed by chipping, grinding, drilling, or oxyacetylene grooving to a sufficient depth to insure that the remaining base metal is shown to be sound by acid etching, radiography, or magnetic particle testing. The latter methods of testing are preferred. Any slag remaining after oxyacetylene grooving shall be completely removed by chipping or grinding. When defects are removed by drilling, the resulting hole shall be countersunk to a depth of at least 25 percent of the metal thickness with a bevel of the included angle being not less than 45 degrees.

(d) Prior to any welding being done, the cavity and the adjoining area shall be preheated to a temperature suitable for the chemical elements and thickness of metal involved which experience indicates is satisfactory. Castings shall be preheated to a temperature which experience indicates is suitable for the chemical elements and thickness of the casting when lugs, supports, ribs, or bosses are to be welded thereto.

(e) Castings other than those which have been repaired for minor surface defects, the excavated dimensions of which do not exceed the limitations specified by subparagraph (b) (1) of this section, shall be stress-relieved in a furnace to a temperature of from 1,100° F. to 1,200° F. for 1 hour per inch of maximum thickness and allowed to cool in the furnace to 500° F. before removal.
